The agreement's timing is also execrable. This is the first major American-Soviet pact since the intervention in Afghanistan. Even more embarrassing, the new pact was announced the day that Yuri V. Andropov dismissed Mr. Reagan's suggestion for a summit meeting as "meaningless under existing circumstances." It comes at a time when a new Federal program has stopped cultivation of 20 percent to 30 percent of United States farmland and the worst drought in years is ravaging our grain belt. The corn harvest is down a projected 38 percent from last year, with wheat declining 14 percent and soybeans down 19 percent. Yet the Administration has dropped the provision allowing us to cut back on exports if its own supplies are short.

These steps might make political sense closer to election time. But why, today, surrender a key bargaining chip without a Soviet withdrawal from Afghanistan, major improvement in Poland or significant progress toward arms control? Why give Moscow this domestic victory, mitigating the damaging effect of grain shortages on civilian morale?

Article II also makes the Administration appear hypocritical—particularly to European allies whom the President has asked to reduce high-tech sales to Moscow. The agreement also puts the Russians first in line for American exports and will thus benefit them to the detriment of both American consumers and third world buyers, particularly if a poor corn harvest next year pushes prices up even further.

The United States' phenomenal agricultural production is one of the most persuasive weapons in the West's arsenal—particularly as Soviet agricultural productivity continues to decline. The United States exports 44 percent of the wheat, 54 percent of the feed grains and 87 percent of the soybeans sold internationally. All can be used as flexible and nonmilitary means of persuasion—not just as weapons but also as bargaining chips. By signing the new grain agreement, the President has forfeited one of the best tools at his command in future crises and negotiations with Moscow.

Mr. BYRD. Also, Mr. President, I ask unanimous consent that a chronology of events of incidents involving civilian aircraft be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CHRONOLOGY OF EVENTS: INCIDENTS INVOLVING CIVILIAN AIRCRAFT (1952-PRESENT)

September 3, 1978—An Air Rhodesia airliner on a domestic route from Kariba to Salisbury was shot down by guerrillas using a heat-seeking ground-to-air missile. Thirty-eight of 56 people aboard the plane died in the crash, and 10 were later killed by guerrillas. Air Rhodesia at first denied the guerrillas' claim to have shot down the plane, but subsequently admitted that it was true. The guerrillas claimed that the plane carried military supplies and South African army officers, a charge which Air Rhodesia and crash survivors denied.

April 20, 1970—A Korean Air Lines 707 en route from Paris to Seoul over the pole violated Soviet airspace in a high security area of Siberia. After spending about 2 hours in Soviet airspace, the plane was forced down by fighter aircraft, one of which fired upon the plane, killing 2 people and wounding 11. The plane made a forced landing on a frozen lake 230 miles south of Murmansk. Public outcry was minimal and the South Korean government thanked the Soviet Union for returning passengers and crew promptly.

It was not determined exactly why the pilot strayed so far off course or spent so much time over Soviet airspace. The Soviet Union refused to return the "black box" containing the flight recorder.

August 10, 1973—An Iraqi airliner en route from Beirut to Baghdad was intercepted over Lebanese airspace by Israeli fighter planes and forced to land at a military air base in Israel. Plane and passengers were released 2 hours later. Apparently the Israelis thought that a PLO extremist leader was aboard the plane. The U.N. Security Council censured Israel for the action.

February 21, 1973—A Libyan Airlines 727 en route from Tripoli to Cairo lost direction, intruded 12 miles into Israeli airspace over the occupied Sinai, and was shot down by Israeli fighters. The plane crashed with the loss of 108 lives. Egypt harshly condemned the incident, and Israel was censured by the International Civil Aviation Organization. Israel maintained the fighers had meant only to force the plane down, not to make it crash, and defended their right to use force by noting the sensitive nature of the area violated.

June 30, 1968—A U.S. airliner was intercepted over the Sea of Japan and forced to land on Ituruyin in the Kurile Islands. The plane was released on July 2 after the pilot signed a confession that he had strayed over the Soviet airspace and the United States issued an apology. The pilot later claimed that he had not violated Soviet airspace, and had only signed the confession to obtain his release and that of the plane.

January 8, 1962—A Belgina Sabena Airlines Caravelle jet was intercepted by Soviet MIGs over Armenia and forced to land in the Soviet Union. Passengers and plane were released 3 days later.

July 27, 1955—An El Al airliner en route from London to Tel Aviv was shot down over Bulgarian airspace near the Greco-Bulgarian border. All passengers and crew members were killed. The Bulgarian government initially claimed that it had been shot down by anti-aircraft fire, but later admitted that it had been downed by fighter aircraft. Israel, Great Britain, France, the United States and Switzerland all sent official letters of protest to Bulgaria. The Bulgarian government later promised to punish those responsible for the act, take steps to avoid a recurrence, and compensate the families of the victims.

July 23, 1953—A Cathay Pacific flight en route from Bangkok to Hong Kong was shot down by PRC fighters 10 miles east of the international air corridor off Hainan island. Two passengers were killed immediately and many others died when the plane was forced to ditch in the South China Sea. The United States and Great Britain expressed outrage at the incident and demanded damages. The PRC, after initially denying responsibility, later offered its apologies, saying that it had mistaken the plane for a nationalist one on an aggressive mission. The PRC offered to pay for the plane and compensate the families of the victims.

March 12, 1953—Soviet fighters fired tracer bullets at a British European Airways airliner when it strayed from the Berlin-Munich air corridor. The plane was not harmed.

April 29, 1952—An Air France airliner en route from Frankfurt to Berlin was attacked by Soviet fighters with cannon and attacked by Soviet fighters with cannon and machine gun fire. Despite serious damage, the plane landed in Berlin. Two passengers were severely wounded by bullets and 4 others sustained minor injuries. While the Soviet Union claimed the plane was outside the Berlin corridor, the Allied High Commission said that was not, and further claimed that such an attack was unwarranted whatever the circumstances. France demanded an inquiry and reparations.

Mr. BYRD. Mr. President, I ask unanimous consent that a chronology of events concerning Soviet incidents which involve military aircraft be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SOVIET INCIDENTS INVOLVING MILITARY AIRCRAFT

July 1, 1960—Soviet fighters shot down a U.S. Air Force RB-47 reconnaissance aircraft near the Kola Peninsula, killing 4 crewmen.

May 1, 1960—Soviet Union downed a CIA U-2, piloted by Lt. Francis Gary Powers, with a Surface to Air Missile (SAM) near Sverdlovsk, USSR. Powers was convicted of espionage and released in exchange for Col. Rudolph Abel.

Nov. 7, 1958—A U.S. plane was fired upon by Soviet fighters over the Baltic Sea, but was not hit.

Sept. 7, 1958—A C-130 reconnaissance plane was shot down 24 miles inside Soviet airspace in Armenia. At first the Soviets denied all knowledge of the incident. Later it announced that the plane had crashed and that 6 crewmen were dead. It denied that it had shot down the plane and made no mention of the other 11 crewmen aboard the plane.

June 27, 1958—A USAF C-118 transport plane was shot down near Eriva in Armenia, after straying some 30 miles into Soviet airspace. The United States expressed its regret over the incident, and the crew was released on July 7.

Sept 10, 1956—In the Sea of Japan, a USAF RB-50 was "lost" in a typhoon, possibly downed by Soviet fighters. No other information is available.

April 18, 1956—One USAF RB-47 was downed by Soviet fighters over the Kamchatka Peninsula. All crew members and aircraft were lost.

Aug. 28, 1955—Taiwan claimed that one of its jet trainers had been shot down by Soviet MIGs over the Taiwan straits, and that a commercial airliner carrying an American doctor to the island of Matsui had been fired upon. The United States denied knowledge of the incidents.

June 22, 1955—A U.S. Navy Neptune patrol plane was fired upon by 2 Soviet planes over international waters over the Bering Straits. The Soviet Union claimed that the plane was over Soviet airspace, but offered to pay 50% of the damages.

Nov. 7, 1954—A RB-29 reconnaissance plane was shot down by Soviet MIGs 10 miles off the coast of the Kurile Islands, and crash-landed on the Japanese island of Hokkaido. Another plane was sent up with fighter escorts to finish the photo mission. Both the United States and the Soviet Union issued complaints, but both tried to minimize the incident. Senator William Knowland demanded that the United States sever diplomatic relations with the Soviets over the incident.

Sept. 4, 1954—A U.S. Navy Neptune P-2V was fired upon by 2 Soviet fighters 40 miles off the Siberian coast. Nine crew members were rescued by other U.S. planes, while one was missing and presumed dead. The Soviets claimed that the plane had violated their airspace and that it had fired upon the Soviet planes. The U.S. denied both claims and threatened to bring the case before the U.N. Security Council.

July 29, 1953—Soviet jet fighters shot down an American B-50 bomber. Only one of 17 men survived. According to the airman, the American aircraft was attacked 40 miles off the coast of Siberia. In 1954, the United States demanded $2.8 million in damages.

March 14, 1953—A Siberian jet fighter pilot fired on a U.S. RB-50 bomber flying a weather reconnaissance mission off the Kamchatka coast. The American plane returned fire but neither plane was hit.

March 12, 1953—Seven British fliers died when their Lincoln bomber was downed by Soviet jets near the British Soviet zone along the Berlin-Hamburg corridor.

March 10, 1953—Czechs shot down an American Thunderjet inside the U.S. zone of Germany. The United States warned that "necessary" countermeasures would be taken if the Czechs repeated the "provocative" incident. A detachment of faster S-86 Sabre jets was transferred from Britain to Fuerstenfeldbruck by the USAF on Mar. 17.

Dec. 11, 1952—The Soviet Union refused to pay U.S. damages for the B-29 officially confirmed by the United States as shot down by Soviet fighter planes off northern Japan on Oct. 7, 1952. The United States repeated damands for damages on Dec. 16, 1952. No action was taken.

Nov. 13, 1952—Soviets downed a Swedish C-54 trainer over the Baltic Sea. Soviet authorities claimed only to have directed the aircraft away from the frontier.

Oct. 7, 1952—A B-29, with a crew of 8, disappeared over Japanese territorial waters. The Soviets said the B-29 flew over Yuri Island in "violation of the Soviet state frontiers" and was chased out "over the sea." Believing it had been shot down, the United

States demanded that the Soviets pay reparations but the demand was refused.

June 16, 1952—A Swedish air force Catalina flying boat was intercepted and fired upon by Soviet fighter planes, forcing it to crash land at sea.

June 13, 1952—A U.S. B-29 was shot down over the Sea of Japan or the Kamchatka peninsula by Soviet fighter planes.

Nov. 19, 1951—Soviet fighter planes forced down a USAF C-47 while it was enroute from Vienna to Belgrade and the 4 crewmen were turned over to Hungarian authorities. The United States demanded that the Hungarians return the plane or pay $100,000 damages. Hungary collected a $123,605.14 "fine" from the United States—levied by the Hungarian court—for release of the plane and crew of 4.

Dec. 6, 1951—Soviet fighter planes shot down a Navy P2V Neptune patrol plane in the Vladivostok area, killing 3 officers and 7 enlisted men. The plane was reportedly on a weather reconnaissance flight.

April 8, 1950—An American naval "Privateer" patrol plane was shot down over the Baltic, killing all 10 crew members aboard. The Soviets claimed that the aircraft violated Soviet airspace and had exchanged fire with Soviet fighters. The Soviets refused to pay indemnities demanded by the U.S. government.

April 22, 1946—At Treller, outside Vienna, the Soviets fired at an unarmed U.S. C-47 transport. The Soviets promised an investigation.

April 21, 1946—Near Linz, Austria, Soviet fighters fired at or near an unarmed U.S. C-47 transport. The Soviet authorities promised an investigation.

Feb. 20, 1946—A U.S. plane was shot at in Manchuria. In reply to a U.S. Navy protest, the Soviets claimed warning bursts were fired near the plane because it had entered the Soviet territory.

Feb. 20, 1946—A Soviet plane fired on a U.S. Navy seaplane near Dairen.

Oct. 15, 1945—A U.S. Navy plane was shot at 25 miles at sea near Dairen.

Mr. BYRD. I am going to read just a portion of the Soviet incidents involving military aircraft.

In 1960, Soviet fighters shot down a U.S. Air Force RB-47 reconnaissance aircraft near the Kola Peninsula, killing 4 crewmen.

In that same year, the Soviet Union downed a CIA U-2, piloted by Lt. Francis Gary Powers, with a surface-to-air missile. Powers was convicted of espionage and released in exchange for Col. Rudolph Abel.

In another incident, a U.S. plane was fired upon by Soviet fighters over the Baltic Sea, but was not hit.

In another incident, a C-130 reconnaissance plane was shot down 24 miles inside Soviet airspace in Armenia. At first the Soviets denied all knowledge of the incident. Later it announced that the plane had crashed and that six crewmen were dead. It denied that it had shot down the plane and made no mention of the other 11 crewmen aboard the plane.

In another incident, a U.S. Air Force C-118 transport plane was shot down near Eriva in Armenia, after straying some 30 miles into Soviet airspace. The United States expressed its regret over the incident.

In the Sea of Japan, in another incident, a U.S. Air Force RB-50 was "lost" in a typhoon, possibly downed by Soviet fighters. No other information is available.

In another incident, one U.S. Air Force RB-47 was downed by Soviet fighters over the Kamchatka Peninsula. All crew members and aircraft were lost.

In another instance, Taiwan claimed that one of its jet trainers had been shot down by Soviet Migs over the Taiwan straits, and that a commercial airliner carrying an American doctor to the island of Matsui had been fired upon. The United States denied knowledge of the incidents.

In another instance, a U.S. Navy Neptune patrol plane was fired upon by two Soviet planes over international waters over the Bering Strait. The Soviet Union claimed that the plane was over Soviet airspace, but offered to pay 50 percent of the damages.

In another instance, a RB-29 reconnaissance plane was shot down by Soviet Migs 10 miles off the coast of the Kurile Islands, and crash-landed on the Japanese island of Hokkaido. Another plane was sent up with fighter escorts to finish the photo mission. Both the United States and the Soviet Union issued complaints, but both tried to minimize the incident. Senator William Knowland demanded that the United States sever diplomatic relations with the Soviets over the incident.

In another instance, a U.S. Navy Neptune P-2V was fired upon by two Soviet fighters 40 miles off the Siberian coast. Nine crew members were rescued by other U.S. planes, while one was missing and presumed dead. The Soviet claimed that the plane had violated their airspace and that it had fired upon the Soviet planes. The United States denied both claims and threatened to bring the case before the U.N. Security Council.

In another incident, Soviet jet fighters shot down an American B-50 bomber. Only 1 of 17 men survived. According to the airman, the American aircraft was attacked 40 miles off the coast of Siberia.

In another incident, a Siberian jet fighter pilot fired on a U.S. RB-50 bomber flying a weather reconnaissance mission off the Kamchatka coast. The American plane returned fire but neither plane was hit.

In another instance, seven British fliers died when their Lincoln bomber was downed by Soviet jets near the British-Soviet zone along the Berlin-Hamburg corridor.

In another instance, the Czechs, one of the Warsaw Pact nations, shot down an American Thunderjet inside the U.S. zone of Germany. The United States warned that necessary countermeasures would be taken if the Czechs repeated the provocative incident.

In another instance, the Soviet Union refused to pay U.S. damages for the B-29 officially confirmed by the United States as shot down by Soviet fighter planes off northern Japan. The United States repeated demands for damages. No action was taken.

In another instance, Soviets downed a Swedish C-54 trainer over the Baltic Sea. Soviet authorities claimed only to have directed the aircraft away from the frontier.

In another instance, a B-29, with a crew of eight, disappeared over Japanese territorial waters. The Soviets said the B-29 flew over Yuri Island in "violation of the Soviet state frontiers" and was chased out "over the sea."

In another instance, a Swedish air force Catalina flying boat was intercepted and fired upon by Soviet fighter planes, forcing it to crash land at sea.

In another instance, a U.S. B-29 was shot down over the Sea of Japan or the Kamchatka Peninsula by Soviet fighter planes.

In another incident, Soviet fighter planes forced down a U.S. Air Force C-47 while it was enroute from Vienna to Belgrade and the four crewmen were turned over to Hungarian authorities. The United States demanded that the Hungarians return the plane or pay $100,000 damages. Hungary collected a $123,605.14 "fine" from the United States—levied by a Hungarian court—for release of the plane and crew of four.

In still another incident, Soviet fighter planes shot down a Navy P-2V Neptune patrol plane in the Vladivostok area, killing three officers and seven enlisted men. The plane was reportedly on a weather reconnaissance flight.

In another incident, an American naval "Privateer" patrol plane was shot down over the Baltic, killing all 10 crew members aboard. The Soviets claimed that the aircraft violated Soviet airspace and had exchanged fire with Soviet fighters. The Soviets refused to pay indemnities demanded by the U.S. Government.

In another incident, at Treller, outside Vienna, the Soviets fired at an unarmed U.S. C-47 transport. The Soviets promised an investigation.

In another incident, near Linz, Austria, Soviet fighters fired at or near an unarmed U.S. C-47 transport. The Soviet authorities promised an investigation.

In another incident, a U.S. plane was shot at in Manchuria. In reply to a U.S. Navy protest, the Soviets claimed warning bursts were fired near the plane because it had entered the Soviet's territory.

11-059 O-87-39 (Pt. 17)

In another incident, a Soviet plane fired on a U.S. Navy seaplane near Dairen.

In another instance, a U.S. Navy plane was shot at 25 miles at sea near Dairen.

So, Mr. President, this latest incident is but one in a series of incidents in which American planes have been shot at or shot down, and with loss of life, the shooting down having been done by the Soviets or the Warsaw Pact countries.

I could go on and read of other incidents but, by order of the Senate, they will be included in the RECORD.

I conclude my remarks at this point, and I yield the floor.

EULOGIES AND TRIBUTES TO THE LATE SENATOR HENRY M. JACKSON

The PRESIDING OFFICER (Mr. SIMPSON). Under the previous order, there will now be 2 hours of speeches and remarks concerning our former colleague, the late Senator HENRY M. JACKSON.

Mr. DOMENICI. Mr. President, other Senators may wish to speak at this time, and I will speak for only 3 or 4 minutes.

Mr. President, the death of Senator HENRY JACKSON marks a tremendous loss to the world, to this country, and, obviously, to the Senate. He was a great statesman and probably had as much impact on energy policy, defense policy, and foreign policy as many of our Presidents.

For many years in my home State of New Mexico, people had a special admiration for Senator JACKSON because he understood the strategic missions of Kirtland Air Force Base, White Sands Missile Range, and Sandia and Los Alamos Laboratories. In fact, many people in our State lovingly called him the third Senator from New Mexico.

SCOOP and my predecessor, Clinton Anderson, were close friends and hard working colleagues who championed nuclear energy—an area of vital concern to both Washington State and New Mexico. The common concern fostered a close working relationship which overlapped into their social lives.

I have heard the story told that it was Senator Anderson who first introduced one of his staff people, Helen Hardin, to Senator JACKSON, who was a 49-year-old bachelor at that time. Senator JACKSON was impressed by the same sweetness, poise, and graciousness that had won for her the homecoming crown during her senior year. This was back in Albuquerque, my home city and the home city of my wife, Nancy. Nancy grew up there and graduated from the same high school. She was a very close friend of Helen Hardin in high school in Albuquerque.

Some of us in New Mexico judged SCOOP JACKSON by the caliber of his wife, and we concluded that on that score he was a great Senator and a great man. He was dedicated to God, to country, and to his family. His two children are testimony that his father role was an important and caring duty. We can only hope that we could have as meaningful a relationship with our children as he had with his.

He liked people. That is why he was a Senator, and that is why he aspired to be President. When he talked to someone about a problem, that person came away feeling that he had really been understood. If you had a problem, it was his problem.

Peter Jackson, his son, explains his father's philosophy this way: "Equip yourself with the facts. Be honest and be a good listener."

Senator JACKSON had the immigrant son syndrome, as I see it. By this I mean that he really believed in America and wanted it to be the best, the strongest, and, in a very real sense, he always wanted it to be good. His efforts in the field of foreign relations were guided by this philosophy.

Throughout his life, he detested bigotry and prejudice and cruelty in every form. He was a champion of fairness, equality, and freedom. This unfaltering resolve toward these goals explains his commitment to civil rights and his attitude toward the Soviet Union.

SCOOP was an extraordinary influence on the course of events on the Energy Committee in the U.S. Senate, one area with which I am familiar. We served there together for years and worked on difficult energy, environment, and water resource questions. As chairman for a number of years, he was our boss, in a sense, but he was also our teacher. We could not help learn a lot from Senator JACKSON about getting things done through the art of negotiation and compromise.

The late President Kennedy considered four questions by which the "high court of history," as he said it, would judge public officials. The test, as I understand it, was this: Was he a man of courage, was he a man of judgment, was he a man of integrity, and was he a man of dedication? SCOOP JACKSON's courage was evident to all as he consistently and frequently spoke out, sometimes against the popular point of view. He had a consistency of perspective that is rare but precious. The tremendous wealth of respect that he earned attests to his integrity, and his unexcelled legislative skills and knowledge through diligence are SCOOP JACKSON's trademark of dedication.

As we deliberate some very difficult issues, we need men of SCOOP's caliber. This body, the U.S. Senate, will miss him. God bless Senator JACKSON.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. STENNIS. Mr. President, I came out of the front door of my residence, at the first crack of day, on my way to catch an airplane, and the gentleman who was taking me to the airport said, as I was getting into the car, "Did you hear on the radio last night that Senator HENRY JACKSON had had a massive heart attack and passed away?"

Well, I had not heard it. That statement he made stunned me into a silence, and I realized after I got to the airport, 30 miles away, that I had not spoken a word, not a word, all the way down.

I am not overcome by emotion now, but I do not have any disposition to try to make a cool analysis of Senator JACKSON's career.

I wish to say something, though, in tribute to the man, to his honor, to his character and very high integrity and the attitude of country first, the problems of the people, giving it his utmost attention.

It has been mentioned that he aspired to the Presidency at times. I am sure that the prime motivation there was the same at it has been in other fields of public service. It was a desire to be of service.

I was with him at one of the political meetings. I spent some time with him. By chance, we were together that afternoon when the word came that an opportunity had been missed by him or did not come to him all the way that would have made him President of the United States. He had not one word of bitterness or expression of ill feeling toward anyone or anything. But I know that he looked upon it as an opportunity of service and if it was not coming to him at that time so might it be.

I like to think of the late Senator Carl Hayden. Some one pointed him out to me when I came here as being one of the very wisest, if not the wisest, man in the membership at that time. So I sought him out and got his counsel, repeatedly talked to him about various things, the state of the Union, problems of the country, as well as the personalities in the Senate.

I remember one day he told me. He said:

> I have been around here a long time. I have seen a lot of them come and go.

He was talking about new Members of the Senate. He said:

> Some of them grow and some of them just swell.

That was his rugged philosophy, analysis, and summary of the situation.

I have not found anything that is more descriptive nor more truthful.

HENRY JACKSON and I sat either next to each other or almost next to each other for over 30 years in the Armed Services Committee, and I saw the

man grow. You could feel it. But I had a day-to-day contact with it.

In many fields he made a positive contribution. I never heard of him being an object of controversy or getting personal in matters of policy. I have heard him quoted hundreds and hundreds of times on many subjects strictly on the merits, and that is what I call growth.

Few men are endowed with the capacity to be knowledgeable and an expert in the many fields of the problems of life and, therefore, the problems of Government, as was true with Senator JACKSON.

It seemed to me that that capacity in many fields that he had, which was never abused, but rather used constructively, added up to the superior quality that we all seek in public life, especially added up to judgment, as he was a man of tremendous judgment on many, many different subjects and always thought out with a foundation of meaning and an application to the problem that he was contending with.

So I can say that he was always constructive.

If you went looking for help in a field involving a chance for something constructive, you just thought why not go to HENRY JACKSON, because he thought and acted, planned and acted in terms of trying to be constructive, trying to make a contribution.

I commend his record and his attitude to the youth of the land, and that includes new Senators who come here who have a chance to lay the foundation and carve out a career, to use him—none of us are perfect—but to use him as a model by which to guide themselves and develop in some fields, maybe not try as many as he was excellent in—few men have that capacity—but all Members can make a special contribution in one or more fields.

So I commend him to those who come to this body and try to make a contribution.

I wish to mention here his charming wife Helen, whom I learned to know and respect very highly indeed, and those who had a chance to know her better than I did, have spoken about her. I was in a position that I could not go to the funeral, so I called her up on the telephone. The clarity of her thought, the possessiveness that she had command of over the situation continued to impress me most favorably indeed, and I believe and I hope God will bless Helen and their two fine children. They deserve it on the merits and will earn it anyway many times over.

Mr. President, I could go on at length. Many fine tributes have been paid her also, and they are sincere. This is no form nor forum that the Senate is providing. These tributes are real. They are on the merits. They are deserved.

And I am proud that we have a man whose record was made in my time, my generation, for my people who are living now had a chance to know about it and appreciate it and through their representatives to express themselves on this subject.

I remember many times of crises also. He knew more about military preparedness I think, and I speak with all deference to the other Members, because we have many who have been very, very useful indeed, but I believe all the way around, everything considered, he had the best knowledge of the practical side of military preparedness of any Member who we have had here in the recent past, and he had a tremendous knowledge, and I do not see how he was so well versed in so many subjects with respect to the problem of energy.

He made a splendid contribution here with reference to an understanding of the problem and the passing of a bill that was a forerunner, a foundation, for the legislation that will come in the future in this highly important field. That bill, that Department, has been deemphasized now, but that problem has not been solved and it will come back, and we will find, whoever is here will find, that the path laid out by HENRY JACKSON in that early legislation, to which many others contributed in the House and the Senate, was a sound approach, a good foundation laid, and it will be the basis of what will be policy in the long run.

I am willing to conclude these remarks, Mr. President, now, but I am not willing to give up for one bit in my great esteem and appreciation for the fine legislative record that this gentleman made during this period, and I do not want the principles that he stood for to be abandoned but rather to be followed.

I remember when I first came here a Senator was speaking; a Senator who had been here some years said to one who had also been here a good while, "Does he know what he is talking about?" referring to the speech being made, and the reply was "Yes, he almost always does."

I took that as a fair warning, and I can say in summary here that SENATOR JACKSON'S speeches, his position and all, were alway based on facts, and he knew what he was talking about.

May his soul rest in peace and his example be followed.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I join in our tribute to our cherished colleague of the years and to our beloved former comrade. We are mourning, a continual constant mourning, in the passing of Senator HENRY M. JACKSON of Washington State. I served in the Congress for 31 years with HENRY JACKSON—I was with him 6 years in the House of Representatives and nearly 25 years in the Senate.

He was a manly man in every sense of the word. His character, his achievements shall not be forgotten on this historic legislative Hill.

He had always that well-reasoned advocacy of worthwhile programs and I shall, as long as I continue in this body, and hopefully for years afterward, be constant in my understanding of the legacy that he has left in what could be called the art of lawmaking.

We remember, of course, his vigorous actions. I talked with him 2 days before our recent recess, and we were in the gymnasium in the Russell Building. There may have been another Member or two but we were away from others as we talked. He said not once but twice, "Jennings, I am tired, I am very tired" and I could understand that, as we have remembered always his ambitious pace, that he was tired.

I want to remember today and always his flashing smile, his ready wit. He enjoyed stories, and told them and, of course, there was always present the clarity of his thinking, and the keenness of his productive mind.

His star of public service is indelibly inscribed on the rolls of the U.S. Senate and the House of Representatives in which he served.

There was a constructiveness about the career of HENRY JACKSON in the Congress, a period of more than 40 years, adding his service in both the House and the Senate. He provided a leadership, not always by the outpouring of words, but by the feeling that you had as you listened to him, consulted with him, not only in the floor work but in the cloakroom as well.

He gave you a feeling if he was opposed to legislation and its passage that there were very solid reasons for that opposition. Then he would put his hand on your shoulder often, men on both sides of the aisle felt it, and he would say, "Now, I believe this or that should be done." But even though he might have been in the negative, the loser on a vote, there was always a positiveness about him which I shall ever remember.

I know of no one during these years with whom I have served who so mastered the sensitivity of subject matter. He understood a shrinking world in which time and distance are no more. He talked about the subject of international relations in a manner that those of us who listened to him knew of his study bringing him to a position.

I think that he was perhaps the most knowledgeable man on Capitol Hill on national defense matters. I remember during his first year in the House, in 1941, we were faced on August 12 that year with a vote on whether we should continue the Selec-

tive Service draft. In those days we did not do as now, punch a button, but the rollcall was heard as Members answered.

That is a night that I shall always recall. The vote was 203 to 202 as to whether the Selective Service draft should be extended—203 to 202.

I turn aside to say that I have thought often that perhaps the 203 to 202 vote may have encouraged the warlords of Japan to strike us a few weeks later on December 7 of that year. They may have felt that America was divided and that there could be no unity within the citizenry of our country in answering an attack upon us from Japan on the sea and in the air.

I mention this only as one of the times when, in that body, SCOOP and others were called on for decisionmaking. That is why, in large part, I say, as I have said at the outset, that I think he was knowledgeable, deep down within himself, on what are characterized as national defense matters.

I think many of us through the years were really amazed at his grasp of such a diversity of interests and his devoted and his diligent service to not only his State but to the Nation. In doing what he did, although the clouds hang above this Hill and across America and other parts of the world, he wanted to build a better place for boys and girls and men and women on this Earth.

One example of Senator JACKSON'S leadership in worthwhile legislation was the establishment of the Youth Conservation Corps. His authorship of that legislation and the Young Adult Conservation Corps gave young people new hope and involvement. I was privileged to join with him in the introduction of that legislation. It was an initial pilot program and it came to pass in 1970. It was very much a new, adaptation of an old idea. During the Depression years of the 1930's, we created within the Congress, during the Presidency of Franklin Roosevelt, the Civilian Conservation Corps, which did an exceedingly constructive program of conservation. The work of course touched materially the parks and forests of this land, and it touched the lives of these young men.

This past weekend in the Monongahela National Forest in West Virginia, I was gathered with 372 former CCC enrollees who had come into our hill country, having served in one of the 41 camps, in my State during the period of 9 years.

Today thousands of young men and women are again, mustering their abilities and dedication to accomplish, good things in a great new works program to help preserve the strength of America. These individuals are there because a congressional leader like HENRY JACKSON saw the need to capture the prevailing spirit of our young people and their understandable concerns for productive achievement.

I recall June 25, 1971. I was privileged to join on the journey with HENRY into West Virginia where the first national youth camp was established. It was at Camp Wood that our program in the Monongahela National Forest was held and the dedication of the first of those youth camps, the brainchild of HENRY JACKSON, was held.

I feel it is proper that I give you a few of the inspiring words that he spoke to those young people on that occasion. I know that he had not only the thoughts of the preservation of the Earth, the forests, and the fields, but he was thinking of the strengthening of the fabric of the youth of our country.

It was a responsive group of young people who listened on that occasion.

I repeat JACKSON'S words:

> The Youth Corps program is premised on the fundamental concept that man and nature cannot be treated separately. Human resources and natural resources go together. Nature lacks meaning without man. And man's life, to be meaningful, requires contact and exposure to nature. The Youth Corps has provided an opportunity for the leaders of tomorrow to learn more about the environment; to be involved in its protection and preservation."

Those were the wise words of HENRY that I repeated in West Virginia this past weekend.

Shortly after Senators and others of the Congress, his friends, returned to the Nation's Capitol from Senator JACKSON'S memorial service, I reflected on the event. I shall never forget the two children, Anna Marie and Peter, as they spoke movingly of their father.

I know that Helen will understand these words by poet John Gray:

> "Love, like the ocean, is vast and forever,
> "And sorrow, but a shadow that moves across the sea."

As we think today of his career, we think too of the responsibilities of those who remain. I talk with many young people. It is surprising how they felt that they really know HENRY JACKSON. They understood his leadership and they sorrow at his going away. One of them said to me only yesterday, "You know, someone might think I am a little young to say this, but I feel I have lost a friend."

He was a champion; he was our beloved colleague.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, like many others, I join with my colleagues to express my sorrow on the passing of Senator HENRY "SCOOP" JACKSON. There can be no regret for a life as fully lived as his. I only fear the void left by his passing.

My wife Nancy and I were privileged to attend the funeral services for Senator JACKSON in Everett, Wash. At the service, many people spoke of his tremendous contributions to the defense and well-being of our Nation and of the world. The tributes paid to him by his colleagues and friends were very moving. But the part of that service that most deeply affected me were the reminiscences of his son Peter and his daughter Anna Marie. Their words truly reflected the greatest gift a father can have, the love and respect of his children.

Senator JACKSON was not only a great Senator. As others in this Chamber have already said, and as many more who had the privilege of serving with him will say, HENRY JACKSON was also a good and considerate man, a man who had no illusions either about the extent of his power, or about its limits. This sense of proportion was displayed on a trip we both took to Europe as part of a congressional delegation to NATO. It was my wife who noted that, even though Senator JACKSON was the senior member of the delegation and one of the most powerful Members of the Senate, he and his wife Helen never made anyone, whether it was another Senator or aide, wait for him.

That trip also held special meaning for me as a junior Senator. It gave me the opportunity to work closely with a master of over 40 years experience in the national and international arenas. I am honored both to have served with him and to have been able to learn from him.

Senator JACKSON was, to quote Time, "The hawk's hawk, the liberal's liberal." He was much more than that. In the 3 years that it has been my privilege to serve in the Senate, time and again it was Senator JACKSON'S voice that made the difference in debate. He was a consummate compromiser because he was a reasonable man and knew that reasonable views come in many forms. At the same time, his principles were deep and unshakable. Like his ability to compromise, they were based on reason.

Senator JACKSON will be missed not just by his family and his colleagues on both sides of the aisle, but by the Nation. On behalf of my State of Alaska, I would like to pay special homage to the man Alaskans liked to call the third Senator from Alaska.

SCOOP was the guardian angel of Alaska's developing economy during its final years as a territory, and was instrumental in passage of the legislation that gave Alaska statehood. He was a key figure in the compromises that led to approval of both the Alaska Native Claims Settlement Act and the Alaska National Interest Lands Conservation Act.

He sponsored the statute that refunds 90 percent of the Federal rent and royalty revenues from Alaska's public lands to the State. He worked

to insure funding for the Eklutna Hydroelectric Powerplant, for years the cornerstone of Alaska's energy infrastructure. He helped convince Congress to permit Alaskan cities to issue bonds, making possible construction of many of our schools, public buildings, and utilities.

He led the drive for the TransAlaska Pipeline System Act in 1973 and spearheaded efforts to authorize the Alaska Natural Gas Transmission System.

It was during these years that he acquired his second nickname as the third Senator from Alaska. It stuck, and deserved to. Alaskans are indebted to HENRY JACKSON. The Senate, the State, and the Nation mourn a hero.

HENRY JACKSON loved Alaska. He always said that it reminded him of the magnificent Norwegian scenery of his heritage. And in turn Alaskans loved him.

Mr. President, I ask unanimous consent to insert in the RECORD at this point one of the many tributes that appeared in Alaskan newspapers on the death of this great statesman.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Anchorage Times, Sept. 2, 1983]

SENATOR HENRY M. JACKSON—ALASKA'S THIRD SENATOR

(By Betty Mills)

WASHINGTON—The late Sen. Henry M. "Scoop" Jackson, D-Wash., was often called Alaska's third senator. He guided to passage the resolution granting statehood in 1958, and played a key role in every major Alaska issue that came before the Senate.

Jackson was the best Senate friend of Sen. Ted Stevens, R-Alaska; in many ways, Jackson was the mentor of Alaska's senior senator despite their different political parties and outlooks.

They often spent time in the Capitol steam room, discussing the events of the day and swapping stores. It was Jackson who organized the effort to obtain an Air Force plane to fly a Congressional delegation to Anchorage following the death of Ann Stevens, the senator's first wife, in a plane crash, in December 1978.

Stevens was shocked to learn Thursday night of Jackson's sudden death from a massive heart attack. He is expected to attend the funeral, an aide said.

"I am deeply saddened by the untimely death of Scoop Jackson," Stevens said in a statement.

"Alaska will always be indebted to Scoop Jackson. He was floor manager of the Alaska statehood bill in 1958 and successfully guided it through the Senate without amendment. Without his efforts, in all probability we would not have become a state at that time.

"Scoop Jackson should be remembered by Alaskans because he freely gave of his time and talents to assist Alaska to become a member of the union and to succeed as a new state."

Former Alaska Gov. Bill Egan, who worked closely on the Democratic side of the battle for statehood, said Jackson was a "real statesman" and a "wonderful supporter of the statehood fight."

Egan agreed that in many ways Jackson was Alaska's third senator, even in some cases where he and the Alaska delegation did not see eye to eye.

"Sometimes, like in the Alaska lands bill fight, we weren't always in tune," he said today. "But I think even then he was just looking to find some kind of workable, reasonable compromise."

During the four-year fight over Alaska lands legislation, Jackson chaired more than 40 separate sessions of the Senate Energy and Natural Resources Committee in an attempt to draft an acceptable bill.

Many of the meetings lasted far into the night, with only Stevens and Sen. Paul Tsongas, D-Mass., joining Jackson in the Senate committee room.

Jackson broke with his colleague on the first attempt to amend the landmark 1980 law—saying he could not support Stevens in his efforts to reopen 12 million acres of national parks to sport hunting.

But due to his friendship with Stevens, Jackson did not take an active role in opposing the amendments. He simply read a statement of opposition at the energy committee hearing last April, and then left the room.

Jackson was known as a true friend of Alaska natives, sponsoring the monumental Alaska Native Claims Settlement Act in 1971 that granted nearly $1 billion and 40 million acres of land. Since that law was enacted, he met frequently with natives to monitor its progress and to sponsor amendments correcting problems that surfaced.

Energy and national resource issues were his hallmark, and he frequently touted the untapped potential of Alaska. He led the drive for the Trans-Alaska Pipeline Authorization Act in 1973 and spearheaded efforts to build a natural gas transmission system from the North Slope.

Mr. MURKOWSKI. Mr. President, I would also like to express my sympathy to his wife Helen, and his children Anna Marie and Peter, who are in the gallery today.

Thank you, Mr. President.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I rise to join my colleagues in paying tribute to Senator HENRY "SCOOP" JACKSON, who died suddenly and tragically last week. Nearly every day this summer, before the Senate went into recess, I was with SCOOP.

As we debated the issues of national defense on the Armed Services Committee, he was at the height of his purposes and power. None of us—his colleagues, his friends—even imagined on those recent summer days that he was in the twilight of his leadership and his life. Now that this darkness has come, we look through it to his legacy and the light he has left.

In our era of slick images and slack ideas, SCOOP JACKSON was a real man, whomever remade himself to political convenience, who knew as much about the substance of policy as any Senator in modern history. He could discuss with equal ease the elements of global strategy and the components of a single weapons system.

His friend, John Kennedy, once urged Americans to be defenders of freedom in its hour of maximum danger. SCOOP JACKSON was, perhaps more than any other person over a longer time, a defender of freedom across a generation of maximum danger.

He reminded us always as his life recalls to us now, that our defense will depend not only on a strong military, but on a just society. He was an advocate of modern weaponry and greater security. But he never believed that we could or should pay for a missile or a bomber by taking food from a hungry child or hope from a jobless worker. On vote after vote, he was there for his beliefs—in both defense and domestic policy—despite the trends of the moment or the tides of an election. SCOOP did not wish it this way, he would have preferred to be President, but he would not, he could not, be false to his own vision of what was right.

There were those who said SCOOP lacked charisma; but he had a special charisma of character. During the fearful reign of intimidation which Joseph McCarthy was fanning the flames of a false Red scare, SCOOP JACKSON had the courage to walk off that committee and to stand up for fundamental civil liberties. He was only a young, first-term Senator; but it was the kind of Senator he would always be.

There were others who said SCOOP could be stubborn; but I would say that he was steadfast in the great causes which were his abiding concern.

There was no greater friend of the labor movement than SCOOP JACKSON, who never felt the need to redefine his views as a neoliberal or neoconservative—or to plead that he, too, knew what was wrong with the unions.

There was no greater friend of Israel than SCOOP JACKSON, who helped the Jewish people, as much as any American ever has, to hold their promised land. Some individuals have planted a tree in Israel; SCOOP helped to plant that entire Nation.

There was no greater friend of the dissident and the dispossessed victims of Soviet tyranny than SCOOP JACKSON, who heard and heeded the cry of Yelena Bonner that her husband, Andrei Sakharov—and so many other nameless human beings—must finally depend on us to defend their human rights.

Some famous words of Shakespeare apply so clearly to SCOOP JACKSON:

"This above all, to thine own self be true, and thou canst not then be false to any man."

The same spirit that made SCOOP true to himself made him so consistently true to his friends.

His ties of affection reached across the political spectrum.

I first came to know SCOOP. In the early days of my brother's Presidential campaign, when I was traveling across the Western States. From that

moment on, for nearly half my life, SCOOP JACKSON was with me, with my family, in the best and the darkest times.

On that day Jack died, he was a friend who comforted me. On more days than I can count, I felt his happy clasp on my shoulder; I saw his crinkled smile; I enjoyed his counsel and his company.

Others will recall him, and history will record him, for his significance and his span of national service—through the terms of nine Presidents, from Franklin Roosevelt to Ronald Reagan. For his service encompassed more than a fifth of the entire existence of this Republic.

We all know that, and honor him for it. But in this dark time for his family, when suddenly we must say our farewell, I recall and salute SCOOP most of all as among the best of friends.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. MATTINGLY. I thank the Chair.

Mr. President, I am thankful to have served in the U.S. Senate with SCOOP JACKSON. Pausing here to honor him, we are the poorer for having to go on without him, but the richer for having known and served with him. In his more than 40 years in Congress, he set an example for us all.

We will have to negotiate the perilous future without his advice and counsel on the Armed Services Committee, where he recognized the absolute necessity for this country to maintain a strong national defense. Straightforward, plain spoken, honorable, he was beloved in his home State, esteemed in his country, and respected throughout the free world.

He served so long and dependably, gave of himself so unstintingly, that we reacted, in grief and frustration, to our loss of him: "Not now when we need him most!" But, then, he combined the very qualities that are always scarce and sorely needed.

When, at his final news conference, he was asked about taking our protest against the Soviet Union to the United Nations, he appropriately suggested a higher authority. We can be thankful that he lived his life in touch with that higher authority, by whom it will surely be said of SCOOP JACKSON, "Well-done, good and faithful servant."

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, SCOOP JACKSON was a person of enormous energies, a dedicated patriot, and a person of enlightened wisdom.

He has been called courageous and inspiring by others, and justifiably so. He has been praised for his legislative leadership and craftsmanship, as the author of many landmark statutes. He has been described as a man of integrity, of courage, of wisdom. He was indeed all this, and yet much more.

Above all, SCOOP JACKSON was a good and decent person, a good and loving husband, a good and generous father. Although his public career was amply documented and publicized, he kept his private family life as sheltered as possible.

I was honored to share some moments in the private life of SCOOP JACKSON. It was always a heartwarming experience for me to observe the warm relationship between father SCOOP JACKSON and his children—daughter Anna Marie and son Peter. It was always touching to observe the loving, tender relationship between him and his wife, Helen.

I know that our loss is a great one, and the mere expression of my personal sorrow over the loss of our colleague will not help to alleviate the pain and sorrow which must weigh so heavily in the hearts of Helen Jackson and her children. But I hope that it consoles them to know that there are many others, here and elsewhere, in this country and abroad, who share with them this tremendous loss.

Mr. President, I will miss SCOOP JACKSON.

Mr. President, I will always remember him.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, when SCOOP JACKSON died so suddenly and so prematurely on the first day of this month, the Senate lost a man who was, almost completely, what a Senator should be. George Will has urged that a portrait of HENRY MARTIN JACKSON appear with those of Clay, Calhoun, Webster, LaFollette, and Taft in the Senate Hall of Fame in the Senate reception room just off this floor. I agree and so propose.

SCOOP JACKSON's record of accomplishment in any one of the fields in which he chose to be active would be sufficient to make the career of a Senator. He led the Senate in energy, environmental preservation, natural resource management, human rights, defense, and geopolitics. He led in all these areas without showing the slightest inclination to limit the range of targets for his relentless energy. It just was not necessary.

SCOOP JACKSON inspired legions of men and women to come to the Nation's capital to work for him. Actually, they ended up working with him, because his style of leadership was inextricably bound up with a compulsion to teach by example. The Jackson operation is a machine for doing the things suggested by his conception of a humane and intelligently managed world. An awesome lot got done. If you think that past and present members of the Jackson staff do not count themselves among the luckiest of warriors for the public good, just ask any one of them. They had the privilege to partake of SCOOP JACKSON's own incredible luck to be born to lead and, in addition, to obtain the opportunity to practice leadership.

His life is so exquisitely an American success story that if a fictional character were proposed whose life was SCOOP's, no literary critic would stand for it. He was a man of modest beginnings who believed in hard work, faith, constancy, personal dignity, loyalty, and optimism. He knew defeat and accepted it without bitterness. He also knew victory and accepted that modestly and without a trace of arrogance.

He rose very high in a profession he loved, became famous, and lived to examine and enjoy his successes. He knew the great leaders of his age, but he was always at home with the people who lived in Everett, Wash., where he was born. He was loved and had a chance to exercise his own large capacity to love.

He died in his own home suddenly and without pain at the height of his powers. Only when he was no longer there did people realize just how incredibly good he had actually been.

SCOOP JACKSON became chairman of the Senate Committee on Interior and Insular Affairs in the 88th Congress. He was chairman of that committee and its successor, the Committee on Energy and Natural Resources, for 18 years. His legislative accomplishments in the jurisdiction of these committees definitively established our national policies for such matters for the 1960's, the 1970's, and the 1980's. There is no reason to believe that certain of these policies, for example, the requirement of adequate prior assessment of the environmental impact of major Federal actions, will be significantly altered in our own lifetimes, if ever.

Mr. President, the legislative record of SCOOP JACKSON will cast a shadow throughout the decades of this history of this Republic, perhaps as long as we have a Republic. He was the essential mover in Alaska and Hawaii statehood, in the establishment of the Land and Water Conservation Fund, the National Wilderness System, the Nationwide System of Trails—including the Appalachian Trail and the Pacific Crest Trail, the System of Wild and Scenic Rivers, the North Cascades National Park and the Redwood National Park, and in the enactment of the National Environmental Policy Act, the Alaska Native Claims Settlement Act, the Youth Conservation Corps, the Surface Mining Control and Reclamation Act, and the Alaska National Interest Lands Conservation Act, and a host of other legislation.

In 1971, at SCOOP's instigation, the Senate authorized the creation of the National Fuels and Energy Policy

Study, anticipating the energy crisis that was about to explode into the consciousness of the Nation. A list of the elements of the Jackson energy policy that emerged from the activities conducted under the study is a recitation of the policies with which we have dealt with energy dependence. Legislation he caused to be enacted cleared the way for the Trans-Alaska Pipeline, established the strategic petroleum reserve, mandated an activist role for the Federal Government in support of research and development into alternative energy sources, and created programs in energy conservation and synthetic fuels development.

Of course, these accomplishments reflect only Scoop's energy and natural resource interests. Others will emphasize the many contributions for which he is known in, for example, national security. It is a massive record of legislative achievement. Yet this man could respond to a question from a college student that the work of which he was most proud was his role as chairman of the Democratic Party during the election campaign of John F. Kennedy when, as JACKSON told the student,

We put an end to religious bigotry as a major factor in American politics.

SCOOP JACKSON was a special friend to me, designating me, in a certain sense, as his apprentice chairman for the last years of his chairmanship of the Committee on Energy and Natural Resources. No apprentice ever had a better example to follow. He gave me room to make my own decisions and my own mistakes. He never withdrew his trust.

However, it was SCOOP who was presiding on the last committee markup day in the 96th Congress, after the results of the 1980 election were known, and the control of the Senate was about to pass to the Republicans. As was his custom, he conjured up a quorum through a series of personal telephone calls to Members. He then proceeded methodically to call up, adjudicate and cause to be reported each bill in its turn, until the calendar was clear. When the last bill had been ordered reported, those present, in awe of the performance and suspecting they were seeing it done for the last time, spontaneously broke into applause.

What he did for the institution of staff, I might say, is also to be emulated by us all. When I got to be ranking minority Member, of course, I kept all of SCOOP's staff; not as a favor to SCOOP, not out of sentimentality—although those would have been reasons to do it sufficient to themselves—but by the quality of staff that SCOOP assembled. That is true not only on this committee, but on his personal staff. He attracted competence.

He attracted people who wanted to work with him, not for him; he was that kind of person himself. It was as if you were a member of the SCOOP JACKSON team. It was again because of that infectious enthusiasm, that quality, that if you were around him he created that kind of feeling. As Mike Harvey expressed, he used to say, "Good work, troops!" It was a team effort. Indeed, some of us felt first and foremost as though we were a member of SCOOP's team before we were members of the committee. And I guess in a real sense we on the energy committee will always be members of SCOOP's team.

As a SCOOP watcher for over 10 years, I came to know and appreciate his particular way of getting things done. He simply talked to everyone involved in a particular issue, learned their problems, and found a way to put together a coalition of people interested in resolving the issue. His style of leadership was not flashy. In fact, I can vouch for the mind-numbing number of hours it took SCOOP and others to work out some of the more contentious and intricate pieces of energy legislation included in the 1978 package known as the National Energy Act. But he took the time when it was needed. He was a patient man in an impatient institution. To certain undiscerning people, it seemed that SCOOP lacked charisma. I join with those who knew him in praising his charisma of competence.

This is not a time when a person engaged in public service can expect to be greatly respected. Any rational examination of the life of HENRY MARTIN JACKSON cannot but refute this popular prejudice that causes so much ill feeling. For SCOOP JACKSON, through personal example, made public service look good. He made us look good, too, by virtue of our association with him and the things he did. It seems to me that it is up to all of us now, ourselves, to renew our commitment to the example he set, and in so doing, attempt to regain some measure of respect for the work of representative democracy.

We will not see the gap left by his death filled by any one man in this Congress, the next, nor the one after that. An important task is the completion of the work his death kept him from finishing. A far more important task, indeed the essential task, is the preservation of the spirit in which he addressed that work. I can think of no finer legacy for this decent, competent, cheerful, and deeply moral man.

Mr. President, as prodigious as his legislative record is, I would also like to speak today as a friend who labored for some 11 years side by side with SCOOP JACKSON in the Committee on Energy and Natural Resources. I was his friend; I was his protege. He was my teacher.

He had a special capability and characteristic of being able to attract friends to him to create personal relationships with them and to have them feel intensely about him. I was one of those who feel that way about SCOOP, as do staff of myriad numbers, spread all across this country, and friends in this body and without.

Every Senator has his constituency, his friends and his acquaintances and his supporters. But few people in the history of this Republic have had the number of personal friends, the number of personally loyal true believers, as did SCOOP JACKSON.

Mr. President, much has been said here since the untimely death of SCOOP JACKSON about his accomplishments, and I underline all of those things. But I simply want to allude to two personal characteristics which I shall sum up among many others in the words, "manly" and "boyish."

SCOOP was manly in an intensely masculine way, with a deep timbre in his voice, a strong face, all the manly characteristics of courage, duty, patriotism, strength, integrity, character—manly in the old-fashioned way, not in the sexist way. He attracted the company of men and, indeed, of women with that manly, strong character of his.

But he was also boyish in the freshness of his personality, in the enthusiasm which he had for life and for this job, in his zest for life, in his intellectual curiosity.

I do not think I have ever known anybody of any age who had as much intellectual curiosity as SCOOP JACKSON, always discovering some new area, always reading on some new issue, always interested, always talking to people, always alive with what he was doing.

He never seemed to be tired, never jaded, never bored. In a place where the capability of being bored is very great indeed, he was never bored.

He was never cynical, never hypocritical; he was ever ready for the challenge of life, for the challenge of a U.S. Senator. If somehow we could take the essence of that characteristic which is, among many others, one of the strongest characteristics of SCOOP JACKSON, his enthusiasm, and bottle that quality or transmit it to others, it would be the greatest thing that could be done for the human race, because SCOOP had that quality to a greater degree than almost anyone I have ever known. To say that SCOOP JACKSON will be missed is, indeed, an understatement. The greatest thing I can say about his passing is that he did pass at the height of his powers, at the height of his popularity, at the height of his productiveness. He was taken from us in a painless and quick way. He will be remembered; he will be missed; he will be loved. The imprint of his personality is very deep and very strong and very permanent in this body and in the country.

The PRESIDING OFFICER (Mr. COCHRAN). The Senator from Florida is recognized.

Mr. CHILES. Mr. President, on September 2, 1983, America lost one of the finest public servants of this century and the Senate lost a man who embodied the highest traditions of this institution.

As the history of this era is written, Senator HENRY M. JACKSON will be recorded as a stateman and legislator who met the test of difficult and challenging times. Many fine men and women have served in the Senate and made lasting contributions. A few emerge as true leaders who place their imprint on the course of the Nation's history. SCOOP JACKSON is certainly going to be one of these few.

Truly, the Senate is diminished by his death. As colleagues and friends we are bereft and have a hard time reconciling ourselves to his absence. And yet as we mourn his passing, we must also celebrate that such a man lived and that his life's work was service to our country.

As we attempt this morning to take the measure of this man, to comprehend the source of his greatness, I find in Ralph Waldo Emerson's essay, "Character," an understanding of what made SCOOP JACKSON different. For Emerson, character is nature in the highest form. Emerson felt it was a rare commodity in the political realm but in defining the element of character in an elected representative he could well have been describing Senator JACKSON, a rare politician:

> The people know that they need in their representative much more than talent, namely, the power to make his talent trusted. . . . The men who carry their points do not need to inquire of their constituents what they should say, but are themselves the country they represent; nowhere are its emotions or opinions so instant and true as in them; nowhere so pure from a selfish infusion.

SCOOP JACKSON, Mr. President, was, indeed, that man of character. His wise and generous nature represented the best of America. He could lead with sureness and strength because he understood this Nation and had no other goal than a just and strong America.

SCOOP was a Senate man; the consummate legislator of his generation in the Senate. His skills and energies were directed toward finding solutions; fashioning proposals that would become law. His record of achievement will occupy historians and biographers for years to come. The scope of his accomplishments is perhaps unparalleled.

SCOOP JACKSON'S career in the U.S. Congress was dynamic. He served in the House of Representatives for 12 years and in the Senate for 30, a total of 42 years of public service to this Nation. Neither his native State of Washington nor the whole United States could have found a better Senator than HENRY JACKSON. He was a tireless legislator, a man you could depend on to listen even if he did not agree with you. He will always be remembered by me as a fair and straightforward man who dealt honestly with his colleagues. He certainly was respected by his colleagues on both sides of the aisle because he respected us. It is the combination of these unique qualities that allowed SCOOP JACKSON to get things done.

Above all, he was firm in his convictions and stood tall on matters he felt were important. He had that rare ability to analyze each issue and not just in terms of how it affected the State of Washington, but how it affected the United States and the world community.

His attention to domestic issues facing this Nation was exceptional. He was aggressive in protecting the environment long before it became a popular issue. He authored the Environmental Protection Act of 1969 which set up the Environmental Protection Agency and required for the first time that an environmental impact statement be filed before a Federal project could begin. As chairman of the Senate Interior Committee and later of the Senate Energy and Natural Resources Committee, he worked hard to protect many of this Nation's most pristine areas. Without his help, we could not have been able to establish the Big Cypress National Preserve in Florida. Also, the Northern Cascades and Redwood National Parks owe their existence to him. The Land and Water Conservation Fund Act, the Wilderness Act of 1969, and the National Wild and Scenic Rivers Act can all be listed among his legislative achievements.

In addition to this work, SCOOP constantly opposed strip mining and mineral leasing in wilderness areas. Clearly, he was a friend to the environment but he did not turn a deaf ear to economic growth. His decisions showed time and time again that he believed economic development can and must be compatible with environmental protection.

Senator JACKSON was the Senate leader in energy development. As a 30-year member of the former Joint Atomic Energy Committee, he understood the need to develop new sources of fuel as a way to protect our national security. To SCOOP, an energy-independent America was a strong America. Not surprisingly, he was a proponent of nuclear power, oil exploration, and synfuels. As chairman of the Senate Energy and Natural Resources Committee, he showed his interest in energy development by helping establish the Alaska pipeline and by promoting safe and environmentally sound offshore drilling.

SCOOP JACKSON understood the world and the role of the United States in that world. He knew that the United States must be the leader of the free world and must be strong militarily in order to lead. His distrust of the Soviet Union specifically, and communism in general, consistently shaped his foreign policy views. His anticommunism was based upon a thorough knowledge of history. He demonstrated his levelheaded approach toward the threat of communism when he became an outspoken antagonist of Senator Joe McCarthy and redbaiting during the Army-McCarthy hearings in 1954. That was difficult for him to do, Mr. President, because he was a junior Member of the Senate at a time when many senior Senators, who knew that what was going on was wrong, were afraid to speak out. No one wanted to be tarred with that brush, but SCOOP JACKSON was not afraid. That was a mark of his character all through his career. If it was wrong, he would stand up to it. He would not be afraid.

As a member of the Senate Armed Services Committee, he was respected as an expert in matters of defense. He continually pushed for a strong defense because he understood that freedom, as all things we hold precious, must be protected if it is to remain intact. He was a man who understood global politics. Not only did he have an understanding of the players in the international relations game, but he had compassion for those helplessly caught in the middle.

I can remember vividly SCOOP'S successful push for the Jackson-Vanik amendment in 1974 to deny most-favored-nation treatment to the U.S.S.R. and other nations denying free emigration of Jews to Israel. He was a friend to the Jewish community and a human rights advocate.

Most recently, Senator JACKSON did not hesitate to speak out against the downing of the Korean airliner by Soviet jet fighters. He was speaking of that during his last press conference. He called it an act of barbarism and called not for a military response but for a moral one. Asked if he wanted to bring this matter before the United Nations, he responded, "I would rather call a prayer meeting."

While the long list of public laws initiated by Senator JACKSON will surely rank him as one of the towering figures in the history of the Senate, it will not tell the whole story. The written record will not show why SCOOP JACKSON holds such a special place in the hearts of his colleagues. It cannot show the wise counsel, the guiding hand, the generous spirit of compromise and cooperation that so characterized SCOOP. And it will not show that there is a great body of legislation enacted over the 20 or so years

that does not have JACKSON's name on it but is law because of him.

I think all of us can remember the many times we reached an impasse here and it appeared that there was no way out, and SCOOP would move around, with his soft voice, get somebody by the arm, and whisper to somebody, "It looks like there's some middle ground here," and that great impasse suddenly disappeared. Everyone was able to walk away happy and winning. SCOOP always realized that there had to be winners, not winners and losers. Time after time, I saw him work that particular magic on the floor.

From my own experience, I can think of numerous instances when SCOOP's help made th diference in bringing to fruition something on which I was working. SCOOP was the father of Public Law 91-129, the law which established the Commission on Government Procurement in 1969. That Commission was established to come up with ways to deal with the cost overruns for major weapon systems and to bring about reform in the way government buys goods and services. SCOOP was an original appointment to the Commission.

In 1971, shortly after I arrived in the Senate, SCOOP decided that he had so many things going that he would leave the Commission and let me, a freshman member, take his place. When I talked to him about it, he said, "It's a good way for you to learn about how the Government goes about buying things. You'll get a real education."

I started going to those meetings and wondered what in the world I was doing there. It was very technical. But as a freshman Member, I had a lot of time on my hands, and I did receive a good education serving on that Commission.

I later chaired an ad hoc subcommittee to try to take the Commission's recommendations and enact them into law. That later became a permanent subcommittee, my first chairmanship on government affairs. We were trying to start an office of Federal procurement policy, to put it in the White House. That was the No. 1 recommendation of the Commission.

When I was trying to get that started, the Defense Department did not want to be bothered by it. The other agencies were used to the way they were doing business, and they did not want to be bothered. At the time, even the White House did not think it was too important. They did not want any more members on the White House staff. They thought they might be criticized that the budget was becoming too big. The fact that nobody was overseeing Government purchasing did not seem to interest many people.

I talked to SCOOP about how I could get the legislation moving. He knew it was important—he started the Commission—and I remember his wise advice in telling me how to move on it. It became law.

The same thing happened some years later, in trying to do something to control paperwork. We reached a point again where it was touching the defense establishment, because there was a provision about how to buy computers. The Defense Department decided they did not want any part of that and started raising all kinds of problems. Finally, when I discussed it with SCOOP, he said, "That is something they should have. There is nothing wrong with that."

When I got his voice talking for it, things changed entirely. The people who were raising all kinds of specters went back into their holes.

I think each of us can recount some instance such as that, where we would go to SCOOP and tell him it was important.

I am going to miss his counsel. I learned a lot from him, and those are things I will never forget.

I learned from him the value he placed on his family. He had a wonderful family, and he was very proud of his lovely wife, Helen, and of their two children, Anna Marie and Peter.

I recall that he would bring Peter to the gymnasium and walk around and show him off. He was very proud of his son. His son was always very proud of his father.

That is something I carry with me in relationships that I try to establish with my own family.

Mr. President, we have lost a great man, and we have lost a great Senator. At the same time, the country has gained tremendously by having his 42 years of public service. Each of us who knew him gained very much by having him as our friend.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I, too, want to join my colleagues in expressing a deep sadness and a very real sense of personal loss on the passing of our good friend and respected fellow Senator, HENRY "SCOOP" JACKSON. The outpouring of love, affection, and respect, which has welled up from so many Members in these past hours and days serves as a most fitting memorial and a tribute to a gentleman whose death was a devastating and stunning shock to us all.

In the days since his passing, we have heard many moving personal statements—from colleagues and certainly from member of his family—of instance after instance where SCOOP JACKSON rose above pettiness or partisanship or self-importance to share a great deal of himself with other human beings, I can certainly attest to that. My association with—and admiration for—SCOOP JACKSON goes back a number of years.

My father, Milward Simpson, served with him on the Interior Committee when SCOOP was chairman. And despite my father being of the "other faith," SCOOP went out of his way to assist my Dad. Dad has always told me how much he appreciated those many kindnesses—and what a deep affection and regard he had for SCOOP JACKSON. My father is now nearly 86 years of age and with some very certain health problems, but when he learned of SCOOP's death, he said, "the whole Western World has lost a friend."

I came to this scene in 1979 and met the same steady and unfailing outpouring of courtesy and kindness from this man. On my first visit with him, SCOOP said, "let me know whatever I can do for you, AL, for I remember your Dad with great affection and high regard. He was a friend of mine." That was pretty heady stuff for a new raw recruit like I was. And coming from this man whom I greatly respected, a great American, it was pretty comforting, too.

But that was the way that SCOOP JACKSON was—a man who would always take time out to offer encouragement or a positive word to a new Member of this body—of whatever political stripe. I can tell you it was an honest gesture that meant much to me. And he proved it to be an authentic one time after time.

It was also a gesture that was totally in keeping with the character of this remarkable man. While he could be a tough and canny political foe on the floor or in any other forum, he was never so tough that the overwhelming humanity of the man did not just flow out to those around him.

He will be sorely missed—his leadership will be missed by his country—his wise advice and counsel will be missed by his State and by his party—and SCOOP JACKSON, the man, will be missed by each and every one of us in this body. For his was a stabilizing presence here. A kind word—a bit of encouragement—a slap on the back—so many little ways that you knew indeed that he was there and you also knew that he would often be there to wish you well. I remember several times right here at this desk—for the traffic is often heavy on this track here by the outfield wall—and I can often remember his hand on my shoulder and maybe a quick whisper "give 'em the business, cowboy!" or "I'll meet you over in the gym and I'll turn the heat up for you!" and boy would he! Until the skin nearly peeled. Then he would give me that hearty laugh and we would visit there often. That was a forum of ours. Those are rich memories for me.

I remember on the day of a particular exciting success for me in this body and he said to me "I bet your Dad would be proud of you—I think I will

write him a note." And he did and he would. That was pure SCOOP JACKSON.

And, then, of course, we officed together in the new Hart Building right next to each other. What was the first thing he wanted to do when we got settled—have a reception for both of our staffs. There was always a wonderful flow of informality and regard for the members of the whole staff there, and how well I remember his absolute generosity when Bob Hope visited the Senate, and SCOOP personally came over to my office and invited each and everyone of my crew to come over and meet Bob Hope and then of course he arranged a private time for me to do that. A generous and gracious act.

And he and Helen were always like that to Ann and to me, and we do not forget that, from our early days here.

And yet, we should not mourn this man, but we should celebrate his vital and vibrant life. We should celebrate the joy and the effervescence that he brought to this place. I shall miss him greatly, and my life is richer for having shared a portion of it with him in this body.

And in such times, then, we think also of, and our hearts go out to, the family of SCOOP JACKSON. Especially to the gracious, steady, and courageous Helen, a woman of real class and substance, and two children who I did not have the real privilege of coming to know well, Anna Marie and Peter—our thoughts and prayers go out to all of them. Just as SCOOP eased our way in this transitory life by sharing so much of himself with us, now we reach out to his lovely family in an effort to ease their pain in this trying time. Let them know that our collective strength and support and sympathy and condolences are ever extended to them and we share in their loss. May God bless them and buoy them up.

And we might just raise a strong paean of tribute and great pride to our departed friend, but sponge away further sadness or mourning. SCOOP would like that. So to him.

The PRESIDING OFFICER. The Senator from Washington.

Mr. EVANS. Mr. President, only this unusual and tragic occasion would lead me to speak so early on the floor of the Senate. It is with a mixture of sadness and pride I rise to honor Senator HENRY M. JACKSON and to begin to try to fill those remarkable shoes.

We came from different political backgrounds but shared close associations during my gubernatorial years. SCOOP was always a loyal, enthusiastic supporter of Washington State. Asking "How can I help?" he listened carefully and acted promptly and effectively.

Some called him the "Senator from Boeing" in recognition of Government contracts awarded to Washington's largest manufacturer. But SCOOP just was enormously proud of the skills and ingenuity of the workers and the wisdom of their management. Boeing could succeed on merit.

Some called him the "Senator from Israel" but he recognized at the birth of that nation, the fortitude and strength of a people seeking to be free, and the trials through which they had come.

To the eternal dismay of his political opponents he was consistently supported by both labor and the business establishment, by environmentalists, senior citizens and most of all by the plain people who made his Washington strong.

He did not win those 70-percent electoral margins by promising too much nor ducking tough problems. He combined a careful command of facts, a refreshingly candid stand on issues, and a true compassion for his fellow humans.

His was the politics of courage, candor, and competence. It was stunningly successful.

SCOOP JACKSON was a man of two Washingtons. He was at home with the power brokers of the Nation's Capital, advised nine Presidents, and stood tall with international leaders. But first in his heart was Washington State and his lifelong roots. He was deeply in love with the land and the sea, reveling in the beauty of our rich and varied State, and the diversity of its people.

He will be remembered long in both Washingtons as a giant of the Senate. Even as his name begins to fade, as it does even to the best, his good works will remain:

A yet unborn child who will live in an America stronger and more free; a student able to finish an education through the scholarships he so quietly built; a 21st century youth striding the wilderness of the North Cascades, experiencing a unique link to our past in this untouched paradise.

These are the true legacies of HENRY JACKSON.

For those of us fortunate enough to know and work with him—Thank you, SCOOP.

For those who never met him but whose lives will be enriched by his works—Bless you, SCOOP.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, Senator HENRY M. JACKSON, whose memory we honor today, was a rare and special human being.

With his passing, the Nation has lost what Columnist George Will described as, "The finest public servant I have known," in the article that George Will wrote about him, in which he talked about SCOOP JACKSON as being his hero.

I ask unanimous consent to have printed in the RECORD that article to which I refer.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HE WAS THE FINEST PUBLIC SERVANT I HAVE EVER KNOWN

(By George F. Will)

Painted on the walls of the Senate reception room are portraits of the five men who were selected by a special committee, a quarter of a century ago, to constitute a kind of Senate hall of fame, the portraits are of Clay, Calhoun, Webster, La Follette and Taft. There is no more space on the walls of that room, but there is a nonfunctional door. That door should be removed, and the wall filled in, and adorned with a portrait of a sixth senator. A Senate hall of fame without Henry Martin Jackson is as unthinkable as Cooperstown without George Herman Ruth.

A silly person once said that only silly persons have heroes. But only exceptionally small persons will not pay homage to the exceptionally large persons among us. Heroes make vivid the values by which we try to live. I say, unabashedly, and with many others; Henry Jackson was my hero.

Because he was magnificently uninterested in the cosmetics of politics, dull persons considered him unexciting. But discerning persons by the millions recognized that his kind of character is as exciting as it is rare. Persons who, under the pressure of fashion, are as flexible as fly rods found Jackson incomprehensible. They came to the absurd conclusion that he had departed from the liberal tradition.

He was a pioneer of environmentalism. He was the preeminent champion of civil rights. He fought for the full domestic agenda and authorized legislation that put teeth into U.S. pronouncements on behalf of Jews and others persecuted by the Soviet regime. And if Jackson's proposals for substantial force reductions had been adopted, we might have had arms limitation agreements that actually limit arms.

The ironic truth is that Jackson was one of those persons—Felix Frankfurter was another—whose constancy was mistaken for change. He never wavered from his party's traditional belief that there is no incompatibility between government with a caring face at home and government with a stern face toward adversaries.

Jackson was an anchor against weariness, wishful thinking and apostasy in his party, and his country. He nurtured in this republic something without which no republic can long endure: a sense that problems are tractable. To be in his presence was to experience the wholesome infection of a reviving spirit. This was especially remarkable because he, more than any contemporary, looked unblinkingly at, and spoke uncomfortingly about, the terrors of our time. He taught less clear-sighted, less brave persons how to combine realism and serenity.

He missed the ultimate prize of our politics, perhaps because he lacked the crackling temperament that marks persons who burn on the surface with a hard, gem-like flame. If his political metabolism seemed uncommonly calm, that is because he had the patience of a mature politician—a gift of planning, thirst for detail and a sense of ripeness in issues. He had a flame, but he had depth in which he kept it.

In committees and on the Senate floor, he was a cannon loaded to the muzzle with knowledge born of diligence. His unrivaled effectiveness was a rebuke to the less indus-

trious and a refutation of the theory that in politics fancy footwork is necessary and sufficient.

A legislature is a face-to-face society, where character and moral force tell. What Jackson did in committees and on the floor was awesome. But it was only a small fraction of the work he did during four decades of 18-hour days, working with one member after another, one member at a time, building coalitions of common sense.

I remember a day, nearly a decade ago, when I went panting along in the wake of Jackson on a campaign swing from Washington to Philadelphia to Shreveport and back. When I was decanted from the little plane after midnight, I was a broken shell of my former self. Henry Jackson, twice my age and fresh as a tulip, bounded off into the night.

His legendary energy flowed as much from his spirit as from his physiology. His biography is an esssay on the sources of American vitality. He was the son of immigrants, and of the American West. He had the stamina of parents who crossed an ocean and then a continent, and he had the optimism of his region.

For longer than I have been alive, Congress has been embellished by his presence. And for longer than I live, public life shall be enriched by the radiating force of his character. Why? Consider.

If you wonder who real leaders are, find out who has real followers. By real followers I mean persons who follow a leader onto a path of life, who adopt careers where they navigate by stars he has taught them to see. The social geology of this city is layer upon layer of persons pulled into public life by the example of lives worth emulating. Today, in numerous public offices, and in law and journalism, there is a thick layer of Henry Jackson's men and women.

There are those, and they are legion, who call themselves "Jackson Democrats." I can say with absolute authority that there is such a thing as a "Jackson Republican."

Henry Jackson mastered the delicate balance of democracy, the art of being a servant to a vast public without being servile to any part of it. He was the finest public servant I have known.

Mr. METZENBAUM. Mr. President, the Senate has lost a natural leader, a warm, patient, enormously intelligent man who time and time again instructed the rest of us in the true meaning of the expression "grace under pressure."

SCOOP JACKSON was the epitome of fairness. SCOOP JACKSON bespoke integrity in his every deed and word and action.

On a personal level, Mr. President, I have lost not only a warm friend but a kind and generous teacher and one who stood at my side in many a battle.

We did not always agree. The times we agreed were far more often than the times we disagreed. But even when you disagreed with SCOOP, there was always a kind of treatment of respect and fairness that he brought to the issue.

During my tenure in the Senate, I served with SCOOP JACKSON on the Energy Committee through many tiring and arduous hours of hearings, markups and, sometimes, rancorous debates.

During his chairmanship, the committee confronted some of the most serious crises this Nation has faced in recent years—the Arab oil embargo; natural gas decontrol; the Iranian oil crisis; oil price decontrol—just to name a few.

Through it all, SCOOP JACKSON was the statesman, bringing together the divergent views, allowing the time for all sides to be heard, using his great wit to liven the atmosphere and cool the tempers, all the timekeeping a firm hand to direct us to the ultimate conclusion.

But SCOOP JACKSON was more than a great Senator.

In the best and truest sense, he was a great American patriot.

For SCOOP JACKSON, patriotism meant striving—40 years worth of striving—to fulfill the promise of America.

In terms of any selfish political calculation, SCOOP JACKSON had nothing to gain from his early and vigorous advocacy of civil rights legislation. But he was a man who could not bear to see his country's honor soiled by racial discrimination.

SCOOP JACKSON had nothing to gain, and much to lose in a political sense, by speaking out against McCarthyism. But he did speak out. He spoke out courageously. And for that alone, we are all in his debt.

In the late 1940's, at a time when the survival of the State of Israel was very much in doubt, SCOOP JACKSON, who once again had nothing to gain for himself, emerged as a forceful friend of the young Jewish state. He remained so for the rest of his life. And in Israel, the name of HENRY JACKSON will never be forgotten.

Mr. President, SCOOP JACKSON was not a flag waver or the kind of politician who appeals to chauvinism or prejudice.

SCOOP JACKSON was a believer—a believer in American liberty and in the fundamental human rights of people everywhere.

I am sure, Mr. President, that many of those who have formed our foreign policy over the years would have preferred not to have raised an issue like emigration in the course of dealing with the Soviet Union and other Communist countries.

But SCOOP JACKSON would not allow our negotiators to conduct business as usual. He insisted—and he wrote into law—the Jackson-Vanik amendment, which is perhaps the most important weapon we have in the area of human rights.

The Soviets have loudly rejected Jackson-Vanik. Some in this country have tried to repeal it.

But the fact is, Mr. President, that many thousands of Soviet Jews—and others as well—owe their freedom today to SCOOP JACKSON'S hardnosed insistence that we make the right to emigrate a major point in our foreign policy. The Jewish community in the country loved SCOOP JACKSON more than any Member of the Congress.

This entire country mourns the passing of SCOOP JACKSON. In every part of the world, those who value freedom know that they have lost a friend.

In the Soviet Union, the persecuted dissenters and refuseniks know that one of their great defenders is gone.

We are today expressing the pain that all of us feel about the death of a respected and beloved colleague. But, Mr. President, the Senate will feel the loss of SCOOP JACKSON for many, many years to come.

On behalf of myself, my wife Shirley, and all the members of the Metzenbaum family, I express to Helen Jackson, to Anna Marie, to Peter, our deepest sympathy and our condolences on their terrible loss. And I also add a special note of sympathy to his constant companion and friend, to Don Donohue.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, I thank the Chair for this opportunity to rise and say a few words in tribute to the memory of my colleague and friend, Senator HENRY M. JACKSON.

Senator JACKSON has been eulogized by many in the days since his death on September 1, 1983, as a leader, statesman, hero, father, and friend. He was a man of immense personal integrity. He spent his entire public life serving the country he loved and striving to achieve a quality environment and a quality life for every individual. George Will has called SCOOP "the finest public servant I have ever known." I can think of no finer tribute.

Senator JACKSON served with great distinction as a Member of the House of Representatives and as a U.S. Senator from the State of Washington for 42 years. For 31 years, he was a member of the Committee on Energy and Natural Resources and its predecessor, the Committee on Interior and Insular Affairs. SCOOP was chairman of the committee with jurisdiction over natural resource, environmental, and energy legislation for 18 years, longer than anyone in the history of the Republic.

Senator JACKSON'S unparalleled contributions to this Nation's energy and natural resource policies will provide innumerable benefits for the American people for decades to come. His dedication to the work of the committee and his many legislative achievements will long be remembered.

Senator JACKSON was responsible for the integrity of the Committee on Energy and Natural Resources as an entity. The committee is respected as a working body because of SCOOP'S un-

tiring efforts and his nonpartisan approach.

I should not pass and cannot pass this moment without expressing my own personal appreciation to him for the assistance he gave to me, as a new Member of the Senate, and a new member of his committee, the committee that bore his imprint and his leadership for so many years.

I particularly appreciated his assistance to me when I assumed chairmanship of the committee. His cooperation and tremendous dedication to our work made the change of organization and the transfer of responsibility as smooth and as painless as it could be for everyone involved. Our deliberations in the committee have been less partisan in character and more bipartisan in their nature than much of the work of the Senate. It was SCOOP's strong belief that, "If we do disagree, we can do it without being disagreeable." He was truly a gentleman, and the workings of the committee bore his imprint of integrity for three decades.

Mr. President, I ask unanimous consent that a resolution of that committee adopted at its first business session following his death be made a part of the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION BY THE COMMITTEE ON ENERGY AND NATURAL RESOURCES, U.S. SENATE—HENRY M. JACKSON

Whereas, HENRY M. JACKSON served with great distinction as a United States Senator and Representative from the State of Washington from 1941 to 1983; and

Whereas, Senator JACKSON was for 31 years a member of the Committee on Energy and Natural Resources and its predecessor, the Committee on Interior and Insular Affairs; and

Whereas, Senator JACKSON was the Chairman of the Committee with jurisdiction over natural resource, environmental, and energy legislation for 18 years, longer than anyone in the history of the Republic; and

Whereas, Senator JACKSON's unparalleled contributions to the nation's energy and natural resource policies will continue to provide innumerable benefits for the American people for decades to come; and

Whereas, Senator JACKSON's dedication to the work of this Committee and his many legislative achievements will long be remembered: Now therefore be it

Resolved, That the members of the Committee on Energy and Natural Resources record with profound sorrow the death of HENRY M. JACKSON on September 1, 1983, and convey their deepest sympathies to his family and friends in Washington and throughout the country.

Mr. McCLURE. Mr. President, while Senator JACKSON was nonpartisan on many issues, there was one area in which he was indeed very partisan; that is, protecting the resources and the people of the Pacific Northwest. If anyone dared attempt a raid on the Columbia River or the Snake River or any of the beauties of his beloved Northwest, SCOOP JACKSON would "circle the wagons," and we all would join together in protecting our region. Senator JACKSON was a family man and the Pacific Northwest was a very special part of his family, and he in turn was part of ours.

I thought one of the most moving parts, one of the most moving tributes, at the memorial service held in his hometown of Everett, Wash., was the eulogy given by Congressman TOM FOLEY, as a former staff member and on behalf of that family of people who were SCOOP's staff, his fellow workers, some of whom, both past and present, are in the gallery today.

I think that bespeaks the truth of TOM FOLEY's words at that time of the special bond that this man had with members of that larger family of his that number in the hundreds at this time.

SCOOP's passing is a great loss to the world, the Nation, and especially to the Pacific Northwest. His voice will be particularly missed in the Committee on Energy and Natural Resources, as well as in the Senate. We have lost not only a leader, a stateman, a hero, a husband, a father, and a friend; we have lost an exceptionally fine man.

The PRESIDING OFFICER. The Senator from Texas.

Mr. BENTSEN. Thank you very much, Mr. President.

I, too, would like to say a few words about my friend, SCOOP JACKSON. He was a very close friend, a fellow Scandinavian, a gentleman of enormous talent, who enjoyed one of the most distinguished careers in the U.S. Senate.

This is a tough crowd in the Senate. It is not easy to earn their respect, but SCOOP JACKSON had it.

When I think of the fact that he passed away during a recess, when we had Senators scattered throughout the world and around our country, I would like to note that trips were canceled, and people changed their plans so they could attend the service that was given for him in Washington. Over 60 others traveled all the way across this country because they admired and loved this man.

I think SCOOP JACKSON exemplified what is the very finest and best in public service. He was compassionate, but he was strong. He was effective, but I never heard him be abrasive. He had an uncanny instinct for America's vital national interests and an ability to achieve them. He was a champion of the State of Washington, but he never forgot that he was a U.S. Senator looking out for the concerns of all of our country.

During his 30 years in the Senate, SCOOP established new standards of effective public service; he had the type of a career to which all of us in public service aspire, but very few achieve.

Many years ago, Mr. President, Andrew Jackson said one man with courage makes a majority. Senator JACKSON had unquestioned courage and sometimes would start out as one of very few, if not even alone, and would begin with his reason, with his integrity, with his knowledge of the facts, and with his persuasiveness to establish that majority.

I know of no Member that was more respected or trusted by his colleagues in the Senate. For many of us, when there was a difficult decision on defense, on environmental concerns, on human rights, we would say, "What does SCOOP think about this?" We asked that question because of SCOOP's experience, his instincts were sound, and his integrity was without question. SCOOP was a leader of the Senate, but he did not hold any title. He was a leader by example, by the respect he had earned in over three decades of service in this body.

Those of us who served with SCOOP in the Senate came to understand and admire his genius for consensus and his commitment to bipartisan politics in some of the critical issues facing this country. I think the latest evidence of SCOOP JACKSON's statesmanship is the Bipartisan Commission on Central America. SCOOP appreciated the importance of Central America to our national security. He was able to draw on his rich legacy of experience in government and advance the idea of a commission to study ways in which we could respond to the overall needs of this region of Central America as, in turn, we had responded to the problems of Europe after World War II.

Together with SCOOP, I was appointed as an adviser to the Bipartisan Commission. That Commission is referred to as the "Kissinger Commission," but in reality it is SCOOP JACKSON's commission. SCOOP was the author, he was the originator, he was the persuading force that put it into being. He sold it as a way to overcome the partisan divisiveness and hammer out a consensus on where this country ought to go and how it ought to get there.

That is the way SCOOP liked to operate; he liked to bring people together and reason and develop that kind of common consensus to work for a secure and strong and prosperous America.

Mr. President, I want to say my friendship with SCOOP has meant a great deal to me. When I came to the Senate one of the rewarding things was I had a warm friendship with SCOOP JACKSON from the House. He has been more than a colleague; SCOOP was an inspiration, the epitome of what a U.S. Senator should be. All of us will miss him and all of us, I am sure, join Helen and the Jackson family in mourning the passing of a

man who served his State, his country, and the U.S. Senate with the highest distinction.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. Thank you, Mr. President.

SCOOP JACKSON's death has meant great personal loss to his friends here in the Senate. Far more importantly, SCOOP JACKSON's death means the loss of a national asset. His three decades in the U.S. Senate were spent in acquiring a store of knowledge and experience which he exercised wisely and in an admirably bipartisan fashion to build a better and stronger America.

SCOOP was a true expert on defense who consistently voted his conviction that freedom for Americans and their allies depended upon an America strong enough to deter Soviet aggression. His legacy hopefully will be an America strong enough first to deter aggression, and strong enough then to achieve arms reduction for lasting peace for which SCOOP JACKSON worked all of his life.

I was privileged to know SCOOP through our service together on the Senate Armed Services Committee. He was the ranking Democrat on the committee and I was the junior Republican during what were the first months of my Senate service and the last months of his 30 years in the Senate. Characteristically, as I was to learn, he took the initiative in our relationship, befriending me in my first days in the Senate. Nothing could have been more flattering. Now that I have had the opportunity to observe him for many months, nothing remains more flattering.

Quite deservedly, he exercised enormous influence on the deliberations of both the committee and the entire Senate in many, many matters, but particularly those that related to our foreign policy and to the status of our preparedness. I experienced personally during these too brief months of our friendship the wisdom and the thoughtfulness, the kindness and the compassion that won him the deep respect and affection of colleagues on both sides of the aisle.

I wish that I might have had longer to enjoy and learn from SCOOP JACKSON, but feel privileged to have been his friend and colleague these few brief months. More important is the loss to our Nation and to our friends throughout the free world. SCOOP JACKSON will be mourned, he will be missed, and finally he will be remembered and recorded by history as what he has been to America and to the world: A wise and valued leader of uncommon courage.

Thank you, Mr. President.

Mr. BRADLEY. Senator HENRY M. JACKSON was the quintessential American for his era. He helped us see ourselves better. He emerged out of the great Northwest onto the national political scene like America onto the world in the late 1940's—fresh and strong; optimistic and purposeful; guided by a healthy moralism but never straitjacketed by it. Over the years his belief in America was never shaken. He saw our enemies clearly and insisted, at some political risk, that peace came through preparedness. He recognized our friends, too, and always stood by them. He reached down to those less fortunate and insisted that Government had commitments that must be kept. And, living between the majestic Olympics and the Cascades, he looked at the environment and saw something precious that must remain changeless for our children's children.

SCOOP tried for the Presidency twice and failed. Although that was a national loss, it was the Senate's gain. SCOOP JACKSON was a Senator's Senator. He gave the institution of the Senate his devotion, though he was never hesitant to speak out against Senators who would subvert its popular respect by tactics of fear or excuses of greed.

When he geared up for a battle, the best general would stand in awe. He laid out the record, oh, did he believe in the record of hearings and hearings that brought the voices of those who came because he asked them. And on that record he built his case. Quietly he assembled his troops, who joined their leader because they agreed with his point of view, yes, but also because they knew his preparation was flawless.

The more his loyal and superb staff fed him memos, the more he ate them up. He always made the meetings whether it was early morning hearings, birthday parties for colleagues, or the vote at 2:45 a.m. Simply, he loved his work. And he had more respect from more places than any Senator I have known. His view and range were global and so were his friends.

Above all, as we his Senate friends speak today, with him gone, we remember the man with the crinkly smile, the convert to health food and regular exercise, the chairman who gave generous credit and shared responsibility even with junior members. He understood the bond of Senate camaraderie—that while it brings us close together, it never joins us fully. It seemed to suit his Presbyterian personality that was at the same time as simple as the lines of the Washington Monument and as complex as the concept of predestination. That must be why we cared for him so much.

I thought about all this last week as I sat in the straight-backed pew in Everett, Wash., and said goodbye.

We will miss him greatly.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, the sizable election mandates which HENRY JACKSON received from the people of Washington were ample evidence of the esteem in which the people of his State held him. The many tributes which have poured in during the days since his recent and untimely death are ample evidence of HENRY JACKSON's importance as a world figure and a statesman. Today, we, his colleagues in the Senate, take this time to remember HENRY JACKSON and to pay him honor.

HENRY JACKSON was a Senator's Senator. He was a man who combined in the rarest way both firm conviction and collegiality. No one in this body ever doubted his commitment to the principles which he represented. Yet no one in this body ever doubted that he would represent those principles with tolerance, understanding, and grace. This combination of qualities is something for which each Senator strives, and SCOOP JACKSON's example will, I am certain, remain as large for us now as it did in the years during which he served with us.

Our thoughts go out to his family and to his closest friends. His family and friends are deeply aware of the loss which this institution and our country has experienced. It will be an important tribute to HENRY JACKSON to hold his principles and his example before us as we wrestle with the difficult questions we must now face without his leadership in debate.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, in Senator HENRY JACKSON's death, I lost a kind and considerate mentor, and my State lost a very special friend.

I was personally privileged, as the newest Democratic member of the Senate Armed Services Committee, to have worked closely with him in my first 8 months in the Senate. During that short time, we became good friends, and he invariably showed me great courtesy and wise counsel. I will miss him.

The people of my State knew Senator JACKSON even better and longer than I—he was an old and respected friend. He, in turn, felt very close to them.

Many times I referred to him as the third Senator from New Mexico, and I feel that he took pride in that title.

His concern for the State ran deep for many reasons. His wife, the former Helen Hardin, was a native of New Mexico and was raised there. Senator JACKSON met her while she was working on the late Senator Clinton P. Anderson's staff in Washington, and in 1961 she succeeded in ending, happily, his career as one of Washington's most eligible bachelors.

During their long careers in the Senate, JACKSON and Anderson often

teamed up on key legislation that continues to benefit my State. They worked together, for instance, on legislation authorizing and appropriating funds for the two great research laboratories in New Mexico—Los Alamos and Sandia. When Senator Anderson retired, Scoop succeeded him as chairman of the Joint Atomic Energy Committee, which oversaw the activities of both of those two important research and development facilities.

The Senator from Washington was one of the great legislators of American history. He was a man who cared deeply about all of the United States and its people, and his passing is a tragedy for us all.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, I am sorry that I could not have been on the floor during this entire period. Other Senators are in the arms control classified hearing right now who also wanted to be on the floor. I was chairing the hearing. It is a subject that was of deep interest to Senator JACKSON. But even in those hearings, he was very much in our thoughts.

Mr. President, we are joining together today to pay tribute to Senator JACKSON.

Mr. President, it is my privilege on this sad occasion to pay tribute to our beloved colleague Scoop JACKSON. His life and work will be long remembered, not only by those of us who had the honor of serving with him here in the Senate, but also by countless people all over the country who have benefited directly from the concerns and compassion he was in his long career able to translate into legislation.

I had the privilege, Mr. President, of knowing Scoop JACKSON for longer than our Senate careers together. It was some three decades ago that I issued an invitation to him to come to Chicago to attend a conference at the University of Chicago Public Affairs Conference Center, part of which was held in the conference center and part of which was held in our home in Kenilworth, Ill.

As I worked with him for the first time for 3 solid days on an extraordinarily complex issue of national impact at that conference, I was deeply impressed by his perceptiveness, by his remarkable understanding of the issues, and by his exceptional ability to outline quickly clear-cut objectives. I carried those impressions with me during the 16½ years we served together in the U.S. Senate.

We served on the Governmental Affairs Committee together for that 16½-year period. One of my incentives for going on that committee was the opportunity to work with him. He was chairman and I was the ranking member of the Permanent Subcommittee on Investigations of the Governmental Affairs Committee.

We worked intimately together. We did not always agree, obviously, but whenever we did disagree it was done in an agreeable way. No one could have more respect for the firm convictions with which Senator JACKSON always worked on every issue affecting the welfare of his country, his fellow countrymen, and the welfare of his State of Washington, than I with the opportunity I had to work intimately with him.

It was a great pleasure that I had more constitutents, even members of my family, in the State of Washington. Both of our sons, both of their wives and one grandchild, are residents of the State of Washington.

At one particular time in the business career of my son, Senator JACKSON made a valuable suggestion to me on my son's behalf that showed the way he perceived quickly a problem that I described to him, a challenge. Senator JACKSON looked on it as a challenge and he said, "here is an answer," and it was right on target.

That proved to be a very valuable suggestion that I was able to pass on to my son from his Senator, Senator Scoop JACKSON.

Senator JACKSON was a fighter on behalf of good causes. He was a leader in protecting the environment, promoting a strong defense, and supporting the security of Israel, and the rights of Soviet Jewry. He was a true humanitarian and a tireless legislator.

He was a "world-class" Senator whose perspective was truly global. Yet his concern for the problems and conditions in his own State was legendary—nothing was too small for his consideration when it involved the State of Washington.

Scoop was a fine friend. Loraine and I extend our heartfelt condolences to Helen, his beloved wife, to their beloved children, and to his entire family. All of us share their loss but are richer for having known him.

All of us are deeply grateful to Helen for everything she has meant to Scoop JACKSON throughout the course of their married life. She loved him, supported him. How many times have we seen her helping him here, right in the Senate? How many times has she enriched our lives as she enriched his life and the life of every person that she has touched? I know that her spirit will always inspire us, just as Scoop JACKSON's inspiration to every one of us shall be eternal.

How prophetic it was that his last press conference was an occasion for him to speak from the heart of a deep conviction about the nature of the Soviet Union at the very time millions, perhaps billions of people, for the first time in their lives, had a chance to really see what he had been talking about all his life—the inhumanity of the Soviet Government to its own people, to the people of Eastern Europe, to the people of Afghanistan, to the people of the world, and the affront that they have made.

Scoop JACKSON was a man of tremendous vision and great courage. He fought for everything he believed in that was right and he fought a good fight. His spirit shall always be with us as an inspiration to every single Member of this body.

Mr. BAKER. Mr. President, it is clear that the time provided for eulogies and tributes to our late colleague, Senator JACKSON, is not adequate. That is a great tribute to him in its own right. There are other Senators who wish to speak and who are entitled to speak. Therefore, Mr. President, I ask unanimous consent that the time for tributes and eulogies to Senator JACKSON be extended for 1½ additional hours, to expire at 1:30 p.m., and that the subsequent arrangements for the agenda of the Senate—that is to say, the 2 hours of morning business for the discussion of Lebanon and the recurrence of the resolution dealing with the Korean aircraft atrocity—be extended by an equal amount.

The PRESIDING OFFICER (Mr. WEICKER). Is there objection? Hearing none, it is so ordered.

Mr. BAKER. Mr. President, I observe that the additional hour and a half is an arbitrary time. If that is not adequate, it is the intention of the leadership to extend it still further. I think it is a great tribute to Senator JACKSON that so many Members have come to the floor to make their statements in person and say it with such eloquence and obvious sentiment.

Mr. PERCY. Mr. President, may I ask a question? What does that mean from the standpoint of taking up the Korean matter?

Mr. BAKER. Mr. President, we were scheduled to finish this at 12 o'clock, to have the Lebanon debate until 2 o'clock and then go to the Korean resolution at 2 p.m. Now we shall go to the Korean Air Lines resolution at 3:30 p.m. an hour and a half later, unless there is further time for statements on Senator JACKSON.

Mr. PERCY. We shall recess tonight at what time?

Mr. BAKER. Mr. President, I would not expect tonight to be a late night.

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, with Scoop JACKSON's death, all of us here have lost a friend and leader, one of the kindest and most caring people any of us has ever known. None of us who knew him well and watched him tirelessly and effectively serve his country and the people of Washington State will ever forget him.

His legislation accomplishments are as many as they are wide in range.

From human rights to civil rights, from national defense to arms control, from energy policy to environmental laws, SCOOP leaves the Nation a rich and full legislative legacy which will endure forever.

Nowhere is the breadth and timelessness of SCOOP's legislative accomplishments more apparent than in his contributions to conservation and the environment. As is true with so many of the causes HENRY JACKSON championed, he was ahead of his time on natural resource policy. Twenty-five years ago, he became the chairman of what was then called the Senate Committee on Interior and Insular Affairs—now the Energy and Natural Resources Committee. He spent years carefully and skillfully crafting and guiding legislation through the Senate which is now the legal bedrock of the conservation movement throughout this country. The Wilderness Act, the Land and Water Conservation Fund Act, the National Trails System Act, the Wild and Scenic Rivers Act, the Redwood National Park Act, the Federal Lands for Parks and Recreation Act, the National Environmental Policy Act, the Youth Conservation Corps Act, the Federal Land Policy and Management Act, the Surface Mining and Reclamation Act, the Outer Continental Shelf Lands Act Amendments of 1978, and in 1980, the Alaska National Interest Lands Conservation Act. What a list. They all bear the mark of SCOOP JACKSON's leadership, his patience, his fairness, and his commitment to the protection and wise management of America's precious natural resources.

For his beloved Washington State, he was the prime sponsor of legislation establishing the North Cascades National Park, the Lake Chelan and Ross Lake National Recreation Areas, the Alpine Lakes Wilderness, the Protection Island National Wildlife Refuge, the Mount St. Helens National Monument, and the expansion of Olympic National Park.

Of course, for those of us who worked closely with SCOOP on these things, particularly those on the Energy Committee, this impressive list of legal and policy accomplishments in the field of conservation and the environment is only part of the story. Long after the pages in the law books have yellowed and the print faded, we will remember the grace, the style, and the good judgment that SCOOP displayed at every stage of the legislative process. He was, to be sure, the consummate politician who had few equals in the ability to get things done in the Congress. He put these considerable skills to work for a number of causes, not the least of which was the environment. But more importantly, he was a gentleman; he was a teacher; he was an honorable and loyal public servant. For SCOOP, a noble end never justified ignoble means.

Only a few weeks before his death, he spent a day traveling by helicopter through the Cascade Mountains as a prelude to making the final decisions on the drafting of a statewide wilderness bill for Washington.

At SCOOP's request, the group took a short detour to view a spectacularly beautiful lake basin east of his hometown of Everett in the Mount Baker-Snoqualamie National Forest known as Monte Cristo. He spent his brief time there absorbing the breathtaking scenery and regaling his fellow travelers with stories about the sea.

It seemed that he had spent a lot of his happy days as a boy hiking, camping, and swimming the many hot springs that dot that area. He never forgot that place, and its memory served to forge and strengthen his strong commitment to protect the best of America's remaining park and forest lands. SCOOP had not returned to Monte Cristo since his boyhood. Mostly he had been here, of course, serving the Nation and the people of Washington State. He had had little time for nostalgic visits to his childhood haunts. But now, ironically, here he was in what would prove to be the twilight of a magnificent career, soaking up the enduring beauty and remembrances of this place that was so special to him.

I cannot help but believe that SCOOP is there now in Monte Cristo and in countless other places he worked so hard to preserve for all of us—there in spirit and forever.

Just a personal note, Mr. President. I came to the Senate prepared not to like SCOOP JACKSON. I did not know him. I had met him at the 1972 convention when he was running for President and I was chairman of our delegation. But against my wishes, I was put onto the committee he chaired. And in short time he and Helen invited—I never will forget it—John and Annie Glenn, Betty, and me for a Sunday lunch. And just in 2 hours' time I already had begun to change my opinion of him.

To shorten the story, he became a mentor, a tutor, a guide. He told me a lot of the pitfalls that I could avoid and save myself a lot of trouble. And so I came to love him. Nobody enjoyed turning the heat up in the sauna like he did so he could boast about his Viking background. It was a thing he regaled us all about.

The other day I was on television. The question was, "What do you think he would most like to be remembered for?" The answer I gave was probably not a very good one. I said that SCOOP considered himself a visionary, and he was. He saw a lot of things before the rest of us saw them. But, obviously, there were a lot of other things, like the way he took on Joe McCarthy before anybody else recognized the dangers that McCarthyism was presenting to the Nation.

I could go on and list all of those things in which SCOOP JACKSON took such great pride. I have already listed many legislative accomplishment. But I know the thing that he would want to be remembered for most is that of being a devoted husband and a loving father. If you did not have an hour to spend, you should not ask SCOOP about his children. All of us who are parents certainly can relate to that. I will miss him. We already all miss him. And so to Helen and their two beautiful children, I rise to express my deep and profound sympathy on the loss of my dear friend.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. NICKLES. Mr. President, few American leaders remain at the center of political influence for decades—Senator HENRY M. JACKSON was such an individual. For more than 40 years, Senator JACKSON served his constituents and the Nation, first as a Member of the House of Representatives, and then for the last 31 years as a Member in the Senate.

Although I had only personally known Senator JACKSON for just a few years, I quickly grew to respect his integrity, his fortitude and his broad knowledge and understanding of the issues. In the last 2½ years, I worked with Senator JACKSON on the Energy Committee. His contributions to national energy policy over the years have been significant and will be felt for years to come.

Senator JACKSON was a true patriot. His tireless efforts in trying to strengthen our national defense are hardly equaled in the Senate and are certainly respected. His efforts to help maintain peace around the globe and stability here at home have been appreciated by all. He was a stabilizing force in the Senate and his commonsense and moderation will be sorely missed by both sides of the aisle.

I am truly thankful to have known him and to have worked with him. My prayers and condolences go to his wife and to his family.

The PRESIDING OFFICER. The Senator from Hawaii is recognized.

Mr. MATSUNAGA. Mr. President, it is with a heavy heart that I join with my colleagues in paying tribute to Senator HENRY M. "SCOOP" JACKSON of Washington. He was a dear friend and a constant counselor to me, and I mourn his passing deeply.

It was while he was on his honeymoon with Helen that I first met SCOOP in Honolulu. Our friendship continued during the 14 years I served in the House, and upon my election to this body in 1976 SCOOP became my mentor on the Energy and Natural Resources Committee which he then chaired. His courtesies were boundless

as I attempted to make my mark as a fighter for renewable energy technologies.

The very fact that I am a U.S. Senator today and a former Member of the House I owe in no small measure to SCOOP JACKSON, for as floor manager of the admissions bill SCOOP played a crucial role in achieving statehood for Hawaii in this very Chamber.

In listening to the eulogies offered to his memory here today and reading press tributes, the word used most often is "giant."

Mr. President, I, too, spoke of him as being a giant in the political life of this Nation for decades. This is evident in the litany of his legislative accomplishment we have heard here this morning. But he was such an approachable giant, so unpretentious and good humored to everyone he met without exception, not only on this floor or even throughout the corridors of the Hill, Mr. President, but throughout this great land of ours.

Had he gained the Presidency, a position for which he was eminently qualified by intellect, experience, and strength of character, his administration would have been the most effective antedote for resolving any dangers of an "imperial Presidency" one can imagine. While he carried the weight of the world in the range of his interests and concerns, he traveled through life unburdened by an abundance of the world's material goods. One had only to see him driving his car to appreciate that.

If his lifestyle was modest his lifework was, nonetheless, prodigious. In what field of legislation has he not left an indelible imprint for good? The strength of our national security and our position in world affairs owe much to his steadfast, constant efforts over the years. His was the leadership we looked to in meeting the oil crisis early in the last decade. As chairman of the Interior Committee and then the Energy and Natural Resources Committee, he was known for his advocacy of atomic power and more domestic oil exploration. But he recognized the need for the Nation to broaden the mix of its energy resources, Mr. President, and encourage me in my efforts to foster new, renewable sources as well. And while he led the way in supporting the domestic oil industry to achieve greater production, he nevertheless became that industry's ablest critic in delving into its price hikes following the Arab oil embargo.

Military and energy preparedness were only the beginning of his reach. Consider the environment. SCOOP, who was advocating wilderness protection in the 1950's, wrote the National Environmental Protection Act and was largely responsible for the North Cascades and Redwood National Parks. In the realm of civil and human rights and the protection of minorities, he was a most effective lawmaker. He fashioned the Jackson amendment, which denies most-favored-nation treatment to those who would bar free emigration, such as of Jews to Israel. It is one of the most effective pieces of human rights legislation ever devised in Congress. He also authored the Indian Education Act and the Alaskan Native Claims Act. A firm friend of labor of long standing, he was a pioneer in the social welfare legislation we take for granted today.

All that I have mentioned only touches on the last half of his career in Washington. He was so youthful, vigorous, and forward looking, with such a young family, it was easy to lose sight of the fact that he first entered Congress before our country entered World War II. Except for wartime Army service, SCOOP represented his State here in Washington since 1940 when he was elected to the House; he has served in the Senate since 1952. A New Deal Democrat with the experience of the 1930's behind him, he believed firmly in the uses of Government to better the lot of people. But he recognized early in his career that the instrument of Government also can be applied to tyrannize people as well as help them; and as a young Congressman and Senator, he could see examples of this at both ends of the political spectrum. He also has the courage and ability to match this clarity of vision and act upon it.

That vision was the essence of his greatness, Mr. President. In a congressional career spanning more than four decades, he was ever an astute lawmaker of wide range. But for all his breadth of interest, ability, and concern, he bore a steady compass of conviction. He appreciated the diversity of his country and never faltered in his belief in its founding ideals. His legislative work has stood the test of time in ways few of us can ever hope to achieve.

Great men have stood in this Chamber throughout the years, Mr. President. It is my faith that many more will follow and our Nation will continue to be well served by the deliberations of this body. But we today may not see the likes of SCOOP JACKSON again in our lifetime. He was one of a kind.

Mr. President, may I add that Senator JACKSON was a public man who cherished the values of family life above all, perhaps more so for having married and undertaken parenting responsibilities when he was well along in life's journey. As I mentioned earlier he and his lovely wife, Helen, who is here today, spent their honeymoon in Hawaii and returned often to our shores where they were both very much loved.

The floral tribute you see at his desk, Mr. President, is a reflection of that high regard. The anthurium display was prepared by Alan Kuwahara, a Big Island flower grower from Pahoa, and the white ginger lei was sewn by Mrs. Lillian Nishi of Manoa, Oahu. Both Lillian and her husband, Dr. James Nishi, were deep admirers of SCOOP, as are we all.

So to Helen and her children, Peter and Anna Marie, I extend my heartfelt condolences and God's aloha from the people of Hawaii.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I have lost a friend, and already I miss him.

As you know, we have been on the road campaigning; but, invariably, whether Senator JACKSON had been on a trip or whether we were in daily attendance, there was the evening period in the gym. I learned long ago that in the Senate gym you could find out more about what occurs and what is to occur around here than anywhere else. And you make friendships there.

We did not serve on the same committees; but as a young junior Senator, I learned long ago in that gym to swim around in that pool at the same time he did. We talked, and whether it was the Panama Canal Treaty, whether it was the defense budget, whether it was a matter of environment or anything else, I always valued SCOOP's judgment. He was the best guide I had in the U.S. Senate over these many years. And yesterday, when I came back and went to the gym, he was not there.

In this Chamber we have mourned the passing of many wise and good Americans, men and women who have left their mark on this great land. But it is rare when a person of historic stature leaves us, because such people are so rare. HENRY M. JACKSON was such a man. Indeed, I think we would have to go all the way back to another great man, Richard Brevard Russell, to find a Senator so effective, a politician so constant, and a colleague of character so sterling.

I first met SCOOP in 1960 at the Democratic National Convention, and we worked together in those challenging days for the John F. Kennedy victory in the 1960 elections. When I came to the Senate in 1966, SCOOP had already been here 14 years. He reached out to this novice Senator, proffering his counsel, his judgment, his friendship. I jumped at the opportunity and benefited from it almost on a daily basis over these past 17 years. He struck me immediately as a unique public servant. He was not "flashy" or overbearing, but rather was a man of calm judgment and steadiness, a man whose basic decency, honesty, and commonsense were the keys to his leadership ability. He had what many strive for but few attain—the true re-

spect of his colleagues, and he never ever betrayed that respect.

SCOOP was one of those rare breed of politicians who could truly be called statesmen. He was a man of strong principle, but he knew compromise and coalition-building were essential for the proper functioning of government. He was a professional. He was unabashedly proud to be an American and in his patriotism reflected all that is good and decent in this country of ours.

He understood the necessity for bipartisanship in America's dealings with the rest of the world and he worked mightily to achieve consensus with Presidents of both our political parties. But he was never a rubberstamp to anyone. We all know that he knew exactly how to get his viewpoints across to colleagues here in Congress, to Presidents, and to leaders the world around.

As we came out of the conferences, as we all know, in the Democratic Caucus, it was SCOOP JACKSON who was taking the position for balance, for realism, for our Democratic response to Central America. He was challenged by some of the colleagues for even serving on that particular bipartisan commission. I think he appointed himself as as a professional looking, if you please, not just to the good of the party, but more than anything else into a very, very dangerous situation for the President—who is not as mature, not of the judgment, not of the experience, certainly not of the international intellect of HENRY M. JACKSON.

The record shows that few Americans have had so much respect overseas, from both allies, who admired his constancy, and from adversaries, who understood his determination, and few Americans had so much of a better understanding of foreign policy.

As one of those out on the track, you are asked many, many questions. Under the law you make no commitments, and I am not even in the position of committing, as I well know. But I have always stated that listening to SCOOP, his sense of history to my mind would have certainly made him a much, much better Secretary of State than a Secretary of Defense.

We all remember that there were two Republican administrations who considered SCOOP for high appointed office. I refer in these comments to the fact that SCOOP was a hawk and he knew defense, and, of course, many regarded him in the national media as a potential Secretary of Defense. If they knew him more intimately, as I had the wonderful privilege, they would have known him as a student of history, one who knew the peoples, the economies of the world, and who would have been the finest of Secretaries of State.

As a thing that is needlesome in this day and age, where people look for headlines, SCOOP looked for headway.

He was an insider in the positive sense of the term. In this increasingly media-conscious town, SCOOP enjoyed such tremendous respect because he would not grandstand. He just did his homework and went about persuading his fellow citizens of his case. His strength came from his untiring diligence, his command of the issues, and the finely honed character with which he met every problem.

With his no-frills approach, Senator JACKSON was a leader without match on a whole host of vital national issues, be it energy, the environment, foreign policy, or defense. He made his mark with historic initiatives in every one of these areas, showing a breadth of interest that is almost mind-boggling in this day of specialization and single issue politics.

Tempered by the fires of his experience in World War II, he became one of this Nation's staunchest defenders against tyranny, on the right or the left. No one was stronger in his antipathy for the Soviets than he. Yet there was SCOOP, as a junior Senator, standing up to the red-baiting demagoguery of Joe McCarthy when many of the senior Senators dared not take a stand.

He had an unwavering courage when it came to defending the freedom and individual liberties of his fellow man, a concern that gained him the everlasting love and respect of his constituents.

In his 31 years of experience as a Democratic Senator, SCOOP JACKSON was a pillar of our party. As a man who knew inherently that politics is the art of consensus building, he was one of the anchors that made the Senate a viable governing body for three decades. As a Democrat, SCOOP represented what our party stood for at its best. His belief in protecting and defending the rights of Americans against perils at home and abroad won the support of a broad spectrum of voters and gave meaning to the term "Jackson Democrat." He set the mold and it is his kind of democracy to which our party should always remain true, not just to insure success at the polls, but more importantly, to maintain our commitment to the principles which built this land.

It is extremely unfortunate that the people of our country never had a chance to benefit from his service in the Nation's highest office. He would have been, I am convinced, a great President. Quite to the point, in 1976 when my Southern colleague, Jimmy Carter, was running, it was my privilege at that particular time to be supporting HENRY "SCOOP" JACKSON for President.

But he contributed more than many Presidents to the well-being of his country, and when the history of our time is written, HENRY M. JACKSON will stand out as one of the handful of leaders who understood where America should be heading. He knew because he understood where we had been. And most of all, he knew the strength and goodness of our people.

People who say they do not believe in politicians any more are waiting, I am convinced, for political leaders who behave as though they believe in the people. That, in its essence, was the credo of SCOOP JACKSON. That was the reason for his success. And that belief, that elemental trust and confidence and decency, is—even more than all the landmark legislation—his finest legacy to the land he loved.

To his indomitable wife Helen, to his children Anna Marie and Peter—we will miss Peter in the gym on Saturday morning, and I do not mind that in the RECORD; he started there years ago, and I think that is where he first started to learn to swim—goes our deepest sympathy in this hour of tragic loss. We share your grief. We share your sense of loss. And we share your pride and thankfulness in having the privilege of closeness to one of the best this country has ever produced.

The PRESIDING OFFICER. The Senator from Kentucky is recognized.

Mr. HUDDLESTON. Mr. President, our Nation has lost one of its best friends in the death of SCOOP JACKSON. It is a deep personal loss for me but a far greater loss for this body and the Nation as a whole.

For those of a shallow understanding of statesmanship, for those who like to neatly categorize politicians through a simplistic catch phrase, SCOOP JACKSON was and will always remain an enigma.

As a Senator, he gave fresh meaning to the words "reasonable" and "moderation." And he accomplished this by being, always, true to himself.

When I first came to the Senate in 1973, I was assigned to the Senate Committee on Government Operations and its Permanent Subcommittee on Investigations. SCOOP JACKSON was, of course, chairman of the subcommittee.

During the time we worked together there, he conducted a rigorous schedule of hearings on many subjects, a number of which involved intricate matters or sequences of events. Not once did he ever fail to master the substance or the details.

He was knowledgeable and dedicated in a way that should be an example and an inspiration for us all. My service with Senator JACKSON on that subcommittee was a valuable lesson, indeed, for a freshman Senator.

Senator JACKSON and I again became committee colleagues in 1979, when he was first appointed to the Select Committee on Intelligence. There was no

stronger or more active proponent of the need for a more effective U.S. intelligence community than Senator JACKSON.

In 1979, the Select Committee on Intelligence was responsible for preparing a comprehensive assessment for the Senate of the capabilities of the U.S. intelligence community to monitor compliance with the proposed SALT II agreements. Senator JACKSON studied the issues in depth and worked closely with all of us on the committee to reach agreement on a unanimous report that was completed by the committee in the fall of 1979. Senator JACKSON's active participation in this bipartisan effort contributed to its success.

Senator JACKSON proudly recalled his longstanding support for the idea of a permanent intelligence oversight committee. He had supported resolutions to create such a committee in 1956, and again in 1966. His experience as a member of the Joint Committee on Atomic Energy had convinced him that the Congress was fully capable of exercising oversight with respect to the most sensitive activities of the Government.

Those of us who worked to establish the Senate Select Committee on Intelligence in 1976 owe a debt of gratitude for Senator JACKSON's pioneering work over two decades, as well as to his support for the passage of the Intelligence Oversight Act, requiring the CIA and other agencies to keep the intelligence oversight committees "fully and currently informed" of all intelligence activities.

At the same time, he remained sensitive to the need to maintain respect for individual rights by opposing efforts to expand CIA operations in the United States.

We will always remember his wise admonition that the key to better performance by the intelligence community and adherence to the rule of law would be found in the character of the people charged with the responsibility of Government.

His admonition holds true for the U.S. Senate as well. Better performance is found in the character of the people charged with the responsibility of Government. SCOOP JACKSON's service to this body added immeasurably to the character of the U.S. Senate. He will be sorely missed.

The PRESIDING OFFICER (Mr. HATCH). The Senator from Kansas is recognized.

HENRY JACKSON, 1911-1983

Mr. DOLE. Mr. President, HENRY JACKSON hailed from Washington State, and that made all the difference. His integrity towered as high as the Cascades. His intellect sparkled like Puget Sound. And his vision matched anything to be seen from the top of Seattle's space needle. He never forgot which Washington was his true home; even seeking the Presidency itself, he never succumbed to Potomac fever yet he graced this Chamber with a personal style that went far beyond mere charisma. He cared more for mankind than the media. And in this city, where some of the greatest of heroes are easier to admire than to like, HENRY JACKSON was never deserted by his audience, nor criticized personally by his most dogged opponents.

We in the Senate like to think of ourselves as Members of a distinguished body, elevated by tradition and enriched by statemanship. In truth, we are nothing more than a collection of men and women, highly fallible, subject to the whims of ambition and the necessities of the moment. To guide our conduct along a higher path, we have history and precedent to show the way—and occasionally a colleague whose own surefootedness instills a sense of direction in others.

If we are to lead, we must first have leaders. HENRY JACKSON was a leader. The figure he cut in this institution is matched only by the impact he had on four decades of legislative life, on the terms of nine Presidents, on the defense of the Nation he loved with unabashed patriotism, and on the world he recognized as the dangerous and unstable place it is. The list of his legislative achievements alone entitles him to membership in that small, select company who have raised the Senate to a level roughly commensurate with its own pretensions. But if he had never authored a bill, never fostered a program, never rescued a wilderness acre or conserved an invaluable energy resource, SCOOP JACKSON would still deserve the praise of his colleagues and the favorable verdict of history.

Because he came to us, all Americans can live a little more safely. Because he stayed with us for 40 years, the political process itself is a little nobler, a little less violent in its partisanship. Because he shared his commonsense and uncommon sensitivity with two generations of Washington figures, decency is in greater supply and humanity outweighs personal advantage on the scales of public life.

HENRY JACKSON's concerns, like his career, spanned the globe. But when I think of him, always there appear the rugged images of Washington State, the mountains and valleys and wildflowers that were his heritage and which he hoped to preserve for all who followed in his footsteps. And I think of the words of another Washingtonian, William O. Douglas, who once described his feelings on the day of his father's funeral, in the shadow of a great peak named Adams.

> As I stood by the edge of the grave [wrote Justice Douglas] a wave of lonesomeness swept over me. Then I became afraid—afraid of being left alone, afraid because the grave held my defender and protector * * * Then I happened to see Mount Adams towering over us on the west. It was dark purple and white in the August day and its shoulders of basalt were heavy with glacial snow. It was a giant whose head touched the sky. As I looked, I stopped sobbing. My eyes dried. Adams stood cool and calm, unperturbed by the event that had stirred us so deeply. Suddenly, the mountain seemed to be a friend, a force for me to tie to, a symbol of stability and strength.

Like the mountain in the west, HENRY JACKSON towers over our deliberations. He, too, is a giant whose head and whose heart touched the sky. He, too, is a symbol of national stability and national strength. Today, all of us feel alone; many of us feel a little bit afraid. But we have our memories. We have his example. And his life will remain a landmark for all of us confronted with the troubling issues of a perilous time. It will make the horizon a more inviting place.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. BIDEN. Mr. President, while there is probably no such thing as a timely death, there are certain times when a man's death especially eludes comprehension. While it is never easy to endure the loss of a friend and close colleague, there are certain friends and close colleagues whose deaths leave especially vast voids.

Early September is a time when we are reinvigorated by the life forces that burst through nature's summer and restored by a period of recreation with our families. In September 1983, SCOOP JACKSON was at the highest point of his influential and effective service in the U.S. Senate. SCOOP JACKSON's death on September 1 especially eludes comprehension.

SCOOP JACKSON exemplified the qualities of loyalty, selflessness, and affection that make friendship between men possible. He was a good friend. SCOOP JACKSON exemplified the qualities of competence, diligence, and lofty character that make a collegial enterprise such as the Senate of the United States of America viable. He was a close colleague. SCOOP JACKSON's death on September 1 leaves an especially vast void.

As bitter as the grief we feel at SCOOP JACKSON's death, it can only approximate that which his wife Helen, his daughter Anna Marie, and son Peter must endure. I hope that their pain is slightly lessened by their awareness of the intense admiration and affection which we reserved for their husband and father and our cherished friend. As SCOOP's colleague from Washington, Senator GORTON, has reminded us "We, in the Senate, may have thought that SCOOP belonged to us; his family knew better * * *. We thank them for sharing him with us."

Senator JACKSON was first elected to Congress by the people of Washington State in 1940 at the age of 28. He was re-elected to the House of Representatives five times. In 1952, he successfully ran for the Senate and was a unique Member of this body ever since.

During these 43 years in the U.S. Congress, SCOOP developed irreplaceable expertise in a wide range of areas. He is, perhaps, best known for his exceptional knowledge in the areas of national defense and atomic energy. His support not simply for the labor movement but, more fundamentally, for the needs and aspirations of the working men and women of this country was deep and continuous.

He was a major architect of the National Environmental Policy Act of 1969 and, as such, in the front ranks of the effort to preserve America's extraordinary environmental wealth and beauty. Perhaps nurtured by his visit to the Buchenwald concentration camp after its liberation, he was a valiant supporter of the State of Israel and the struggle of Jews everywhere to establish religious freedom and physical safety. More broadly, it was perhaps because of his concern to protect beleaguered minorities everywhere from the forces of persecution and state tyranny that he worked so adamantly for a strong national defense.

Of as great a worth, however, to those of us who had the good fortune to work with SCOOP JACKSON as his knowledgeability and competence in all these areas was his wisdom and sense of history. Senator HENRY JACKSON was intimately involved in most of the great public affairs of the last 40 years that shaped the constitutive elements of today's world. SCOOP's steadfastness of purpose and adherence to principle had already allowed him to see above the fray of day-to-day events and smaller considerations—both in the world and in this legislature. Fortunately for us, however, his wealth of experience only intensified his ability to see unfolding political and social events in a profoundly historical and human sense.

Men and women are individuals and, as such, able, in the exercise of their wills and human faculties, to shape to some extent the worlds in which they live. Men and women are also historical entities. They are the products of larger historical entities. They are the products of larger historical forces, they swim in undiscernible historical currents; and they contribute to future historical fact. SCOOP had a humbling appreciation and understanding for this complex matter of the individual in history.

In his own life he was, by an objective standard, an inordinately successful and powerful individual. He deserved to be. Through unsurpassed hard work and dedication to fulfilling the intensely complex and varied responsibilities of a U.S. Senator, SCOOP consistently over 40 years won the admiration of both Washington State and the Senate. It was admiration that allowed him to become former chairman of the Energy and National Resources Committee, to become ranking member of the Armed Services Committee, to become a productive legislative craftsman in areas ranging from the benefits for labor to statehood for Hawaii and Alaska, to national parks, to Strategic Air Command.

On the other hand, SCOOP's appreciation of what is, in another sense, the smallness of the individual in historical time preserved his deep humility and his sense of fellowship with all the people in Washington State, in the United States, and throughout the world whom he felt he had to honor to serve in the U.S. Senate.

It was remarked as curious that Senator JACKSON encompassed political principles that do not often grow together in the political flora. He was a deep humanitarian, yet also labeled an archtypical "cold warrior." He was an early environmentalist, yet a late supporter of U.S. involvement in the Vietnam war. He was a staunch friend of labor yet an insistent spokesman for increased spending on American military programs.

Yes, SCOOP JACKSON was a complex man. But the great public issues to which he dedicated his life were equally complex. Senator HENRY JACKSON's complexity was born from his individual effort which yielded him insight into these complex issues and earned him the stature to leave a mark on them in history. It was also born from a sensibility which left him open to and therefore aware of the largeness of history and the gravity of its consequences.

These are qualities of character that are indispensable for wise navigation through the affairs of state. As a fellow American and fellow Senator, I will deeply miss SCOOP's experienced guidance in the deliberations over the activities of the United States. As an individual man, I will be grateful for the good fortune to have known SCOOP and remember his exemplary life.

Mr. President, I, like I suspect others of my age and my generation, am in a slightly difficult position to stand and eulogize HENRY JACKSON, especially following men like Senator DOLE and Senator HOLLINGS and Senator BUMPERS, all men who had a close personal relationship with him, knew him well and had worked with him in many, many battles.

Quite frankly, particularly because Mrs. Jackson is still here, I would just like to say something from the heart and try to be as honest about it as I can.

I cannot say that, as I said, SCOOP JACKSON was a personal friend of mine in the way those other men who talked about him. That would be presumptuous on my part. I am 40 years old. SCOOP JACKSON had done as much of American politics before I was born as I have done up to this date, and he clearly has done so much more than I or most of my colleagues in this Chamber will ever be able to do to affect the welfare of this country.

But I did have a relationship with SCOOP JACKSON of which I am quite proud, and I think it reflects a side of SCOOP that maybe the men who knew him and were personally and emotionally closer to him than I was, maybe they did not even know.

I look up there and I see Don Donohue, and I remember in 1972 SCOOP JACKSON was fighting awfully hard for the nomination to be President in Miami, and things were at a fairly critical stage for him. It was the night before the voting was going to take place, and a 29-year-old kid from Wilmington, Del., who did not even know where Miami was let alone about being a U.S. Senator, who was trying like the devil for some legitimacy in order to convince constituents that he should run for the U.S. Senate—he found out, this young aspirant found out, that SCOOP JACKSON was having dinner alone with friends at a house in suburban Miami.

Another person said, "Why don't you just go over and knock on the door and ask SCOOP JACKSON for help?" And I said, "You have gotta be crazy. I never met SCOOP JACKSON, I don't know him. He is an international figure. I am 29 years old. You want me to get some legitimacy? My God, the one way to prove I am crazy is to do that."

This one person, who happened to know the people with whom SCOOP was having dinner, went up and knocked on the door. Don Donohue answered the door. He walked to the door, and never having seen me before in his life, I said, first of all, I was a Democrat. I was so scared I did not know what to say. I said I was a Democrat and I was running for the Senate in Delaware and that I wanted to—and I just stopped. I did not know whether Don—I stopped and I was tongue tied. I know it is difficult for people in this Chamber to believe, but I was tongue tied.

Don said, "You want to speak to SCOOP?" Well, my God, it took me 3 years to even call SCOOP "SCOOP," and I said, "Well, yes." And he said, "Well, come on in."

SCOOP was in there eating something he always liked, dessert, and he was sitting at a table and everybody was having dinner. SCOOP said, "Come on in, sit down. What's the problem?"

I started to talk with him. He got me dessert, and I sat there, having crashed a dinner that was supposedly

designed—and Mrs. Jackson was there also—for relaxation for SCOOP JACKSON while he was desperately trying to hang on to the prospect of being the nominee, the Democratic nominee, for President.

Shortly after I got to the U.S. Senate, again SCOOP JACKSON with whom I had very serious disagreements on foreign policy—Senator HOLLINGS who is probably the brightest man in the Senate today said how he admired Senator JACKSON's foreign policy position—I disagreed with him. I disagreed with him on almost everything in foreign policy. Every time we talked I disagreed with him.

Right after I was elected or just before I was elected, I had a little problem with my family that concerned me a great deal. Who was in my office a week after I got here? SCOOP JACKSON, saying, "Is there anything I can do for you?" He did not say "Anything I can do for you politically," such as "Can I help you get on committees," which he had already done, but he wanted to know whether or not he could help me.

He knew my brother was with me a lot and sort of taking over to help me move along, my youngest brother, my young brother and best friend. He said, "Why don't you have your brother Jim come down here and work for me?"

There was not anything—I did not ask him for anything. I could not believe it.

After that, in 1978 I was up for reelection, after having disagreed with SCOOP JACKSON almost repeatedly on things relating to foreign policy, particularly the SALT agreement. What happened? I was in real trouble. The right was coming at me. I would have been embarrassed because I disagreed with SCOOP so much on foreign policy questions to call SCOOP and say, "SCOOP, come help me."

SCOOP JACKSON called me unsolicited and said, "I was up in Philadelphia and I was speaking to a friend of yours, a guy named Sonny Dogal," who was really SCOOP's friend, "and he said you have got real problems in Delaware. What do you want me to do? You have got those guys from the right coming at you. What do you want me to do?"

He came into Delaware to help me. He went out unsolicited and raised money for me from his friends. SCOOP JACKSON I suspect did that for a lot of people other than JOE BIDEN, and maybe that is the one side of SCOOP JACKSON that I can offer as a contribution to this testimonial to SCOOP JACKSON that his senior colleagues who were close friends of his, my senior colleagues, close friends of his, either did not need or did not know.

But there is one place where I agreed with SCOOP JACKSON, I did not agree with everything else he did in the Senate, but there was one place where SCOOP JACKSON's commitment literally emotionally moved me, and he and a guy, for a totally different reason, Hubert Humphrey, changed my whole perspective on an issue that I had up to that point felt not nearly as strongly about, and that was Israel, and I suspect it was after a long, long discussion with SCOOP JACKSON and his telling me about his attitude and about after World War II, his visit to the Buchenwald concentration camp and what it meant and how it was, and so on, and encouraged me to do and make several long visits, which I did, to Israel, and then to Eastern Europe, and then to the concentration camps in Western Europe, which was the first time I was able to understand with any of the sense and depth of emotion that he, like me, a non-Jew, felt about what had happened.

SCOOP JACKSON changed a major part of my political life and my attitude about a whole segment of society that I did not understand before.

I can only say there is only one place that I probably have prior experience to Mrs. Jackson and the family, and that is that unforuntately we share a similar tragic occurrence in our lives. We have each lost a spouse.

I suspect right at this time in Mrs. Jackson's life and the life of their children there is a feeling that the black cloud will never go away; that nothing will ever change; and that every time a memory of SCOOP is conjured up, which will be daily, it probably brings a tear to their eyes.

There is only one thing I can assure you: As time goes on, memories of SCOOP will not bring a tear to your eye but a smile to your lips. As time goes on, it will be reinforcement. The pain will never go away, the memory will never leave, but you will find it will turn that something that just brings on a serious piece of depression; that something that enables you to move on to the next day.

That is presumptuous of me to say, but I can assure you that it will happen. And with that same kind of reassurance that SCOOP gave everyone in this Chamber, including me, that somehow there was somebody who knew, somebody in control, somebody who would not panic, someone who knew what he was about and was not going to change. That is what is lost in this Senate.

But the memory of SCOOP JACKSON's ability to convey that to us is bound to produce that kind of leadership in some of the other senior Members of this body. It is amazing how this place works. This place works in the people, who were unable to rise to occasions, when a void is created, tend to rise to it.

I am confident that, although SCOOP JACKSON can never be replaced, SCOOP JACKSON's example for 40 years in American politics and since 1954 in this body will have a lasting effect, not just in his memory in what it will actually produce in other men and women in this Chamber, who might not, if SCOOP were still here, be the ones to personally rise to the occasion, but in his absence, and knowing that he would have, will force them to.

Someone once said that an institution is little more than a lengthened shadow of a man. This institution is little more than the lengthened shadow of a great man like SCOOP JACKSON who served here.

My sympathies go to the Jackson family. But let me tell you, he left a legacy that can do nothing but benefit this body and this country.

I thank my colleagues.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, the tragic death of our dear friend and colleague, Senator HENRY "SCOOP" JACKSON, leaves an enormous void not only in this body but also in the leadership of the Nation. For more than 40 years, SCOOP JACKSON—for six terms in the House and then for some 30 years in the Senate—provided the Nation distinguished and outstanding service and leadership which placed him in the very forefront of America's public figures.

SCOOP, as we all know and heard from him on occasion, was the son of immigrant parents, who came to this country from Norway. He was enormously proud of that heritage and what it meant to him and what it has meant to this country.

He was an effective and early leader in so many fields of our national public life: the environment, educational opportunity, efforts to protect our people from poverty and from disease and from poor housing, civil rights here at home, human rights abroad, strong champion of the independent State of Israel, a forceful spoksman on national security policy, the leader on energy issues, the list goes on and on and on.

But above and beyond all of those specific achievements, I think SCOOP JACKSON's impact on the Senate as an institution and his impact on the political system of this country was perhaps his greatest public legacy.

SCOOP JACKSON never sacrificed the means to achieve an end. He had an understanding of what democracy entailed, a respect for those who differed with his views, a firm commitment to his own judgments and values, and an appreciation that this democratic system, which we have fashioned in this country over the last 200 years, is the most significant political achievement men and women have been able to accomplish anywhere at any time.

His whole life was marked by quality—quality in his thought, quality in

the example he set by how he conducted himself, and quality in how he treated others. He acted toward others with respect and reflected dignity and intergrity in his every action. He was committed to underscoring the differences that exist between free societies and those which have tragically and unfortunately fallen under totalitarian rule.

He gave virtually all of his adult life to public service. He believed it was the highest calling and he recognized that unless men and women of quality and ability are prepared to commit themselves to such a life, the body politic will suffer as a consequence. Those of us who were fortunate enough to have served with him, to have benefited from his wisdom and from his experience, from the kindness with which he treated each and every one of us, know that we have lost a dear and valued friend.

I join with my colleagues in expessing our very deepest sorrow on his passing and expressing our sympathies to his dedicated wife, Helen, their two children, to the other family members, and to his many friends.

I hope we all take some comfort from the example which he set, some comfort from what he meant in this body as truly one of its outstanding leaders in this generation, and some comfort from what he meant to the Nation.

America, and indeed free people everywhere, are the better because of the contributions which SCOOP JACKSON made. And those of us who were fortunate enough to have been touched personally by his friendship will miss him deeply.

The PRESIDING OFFICER (Mr. HUMPHREY). The Senator from Tennessee.

Mr. SASSER. Mr. President, I join my colleagues today not only in mourning the loss of a statesman, but in farewell and in respectful tribute to a friend of humankind, HENRY M. JACKSON.

For Senator JACKSON was, above all, a man committed to the causes of peace and freedom.

His complex views are best expressed in his own words. Allow me to quote Senator JACKSON with regard to his clear vision of the task he set for himself:

> In truth, the future holds only two eventual alternatives: atomic war, a war made hideous beyond imagination by the new destroyers of men and all their words, or atomic peace, a peace made rich beyond imagination by the power of modern science and technology freed for peaceful tasks. I would not presume for an instant to predict that the Soviet rulers will be willing to join with us and the other nations of the free world in a plan for carrying on a worldwide crusade against hunger and disease and human squalor. I see nothing in the conduct of the new Soviet regime which would make for confidence on this score.
>
> Yet, I cannot believe that our Nation must be deterred from subscribing to a noble goal simply because our adversaries may continue to act ignobly.

Those words were not uttered last week. They are among the first recorded remarks that HENRY JACKSON made as a Senator. He made them on May 1, 1953. Yet they are as timely today as they were more than 30 years ago.

Those words accompanied the introduction of a resolution in which Senator JACKSON called upon the "peoples of the world to join in a great moral crusade for peace and freedom."

Mr. President, none has served better than our respected colleague and valued friend, HENRY JACKSON, in that crusade which is, indeed, both great and moral.

It was the balance and precision in his logic, combined with his passion for peace, that moved so many of us to rely on HENRY JACKSON'S counsel when it came to matters of national defense and security of the free world.

We will miss his counsel, perhaps painfully.

Senator JACKSON never wavered in his conviction that a safe and secure and peaceful world could be achieved. He held that conviction when he came to the Senate in 1953. He carried it with him to the end.

I know, as we continue our duties to the people of the United States, that we will always be able to use the life and career of HENRY JACKSON as an example.

The respectful tone of the many tributes that followed his death indicate that much of America asks, too, that we remember his splendid example. Among those tributes are editorials from a number of newspapers in my State of Tennessee, a State that SCOOP JACKSON knew well, that he campaigned across; a State where the people admired him and respected him and held him in great affection.

I ask unanimous consent that a few of these editorials be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. SASSER. Mr. President, it is written in Ecclesiastes:

> A good name is better than precious ointment; and the day of death, than the day of birth.
>
> It is better to go to a house of mourning than to go to the house of feasting.
>
> For this is the end of all men.

And so it is, too, the end of life of that champion, that champion of small people, of little people, a champion in the cause of freedom, a champion in the cause of peace. HENRY JACKSON leaves us with his good name and his honorable life to remember and to carry with us always.

EXHIBIT 1

JACKSON, STATESMAN

Henry M. Jackson was a man of his times, bridging the political generations from Roosevelt to Reagan in a style that left both the Congress and the people of the United States the better.

Jackson was an open and candid advocate who could disagree so amiably he won many a congressional debate by totally disarming his opposing colleagues. His peers respected his personal integrity and his skill at compromise.

His refusal to become encamped with liberals or conservatives except on an issue-by-issue basis earned him a special reverence from people for whom those labels offer little distinction.

A Democrat who sought the presidency and was his party's national chairman, he would have been immediately and warmly welcomed by the GOP as well, should he have declared a change of political alliance.

Achievements by Jackson were of the highest order. He authored important environmental protection and energy conservation law, was a stalwart for a strong national defense and was a tireless supporter of the efforts of Soviet Jews to emigrate to freedom. His death last week took the nation by surprise and left it deeply saddened.

The senator from Washington state will continue to reap recognition for his diversity of knowledge and his dedication to principle far into the future. He deserves that recognition and the title, American statesman, as few others have. So long, Scoop.

[From the Oak Ridger (Tenn.), Sept. 6, 1983]

ONE OF OUR SOUNDEST, FAIREST, MOST HONEST SENATORS LOST

The U.S. Senate is being hard hit. First there were announcements by veteran senators Howard Baker, of Tennessee, and John Tower, of Texas, that they will not seek reelection next year.

Now comes the totally unexpected sudden death of Sen. Henry Jackson of Washington and the august body has lost or is about to lose three superior members, the variations in their partisan affiliations and political philosophies (although in many important respects they are not great) notwithstanding.

Sen. Jackson was a pillar of so many things the Senate needs, integrity perhaps most of all. But he was also a very sensitive yet also very realistic lawmaker. Without being a warmonger or indulging in breast-beating rhetoric, he favored a strong national defense and a tough policy in dealing with our adversaries, most of all Russia. He was, the very afternoon before his fatal heart attack, indignant in reaction to the shooting down of the South Korean passenger jetliner and who knows in what way his concern about this incident may have aggravated his physical condition.

But Sen. Jackson was also a most compassionate senator, feeling deeply the need for fair domestic programs, particularly as they offered assistance and hope to the less fortunate among us—the poor, the minorities, who often are one and the same. He was an uncompromising supporter of legislation and policies to guarantee equal rights to all citizens.

Sen. Jackson was also a strong supporter of a vigorous program of energy development, including nuclear power. But, as he was able to do on so many issues, he was

able to balance his energy advocacy with his equivalent advocacy of laws and policies that properly protect the environment.

We think of him locally most of all for his longtime knowledgeable support of intelligent, positive nuclear policies and programs. Granted, like Sen. Baker, he was from a state where there is a large nuclear establishment—the Department of Energy facilities at Richland, Wash., which along with Oak Ridge and Los Alamos, N. Mex. was one of the three cities literally created by the World War II Manhattan Project. (It is increasingly necessary to repeat this history. It cannot be assumed any longer that the majority of readers remember, or have ever really learned.) Still, his intelligent support for nuclear programs was based on much more than just blind backing of anything that provides jobs within his constituency.

And that is why his loss will be so keenly felt throughout the nuclear community. For, as a senator from a nuclear-industry state and, therefore, also as one of the earliest and longest-serving members of the former Joint House-Senate Committee on Atomic Energy, he became personally most knowledgeable about nuclear matters. And, to be knowledgeable of nuclear, in so many instances, is also to be supportive.

So much of the opposition to intelligent, orderly nuclear development comes from fear and paranoia based on ignorance. The hope can be that his replacement will also be a nuclear sophisticate and, therefore, equally as effectively supportive as "Scoop" Jackson (he earned that nickname because of his reliability, while a teen-ager, as a newsboy), surely one of the nation's best-liked and most-respected senators ever.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I rise to add my words to those of my colleagues in praise of, and in homage to our late colleague from the State of Washington—Senator HENRY M. "SCOOP" JACKSON.

The Senate, the people of Michigan, of Washington State, and of all the United States have lost a true public servant and an individual who worked tirelessly, both in and out of the limelight, in their best interests and in ways they may never realize fully.

It was a privilege and an honor to work with SCOOP JACKSON during the past 5 years that I have been in the Senate. It was a privilege and an honor to learn from him, to gain the benefits of his counsel and to share both mutual victories and mutual defeats.

On some issues, he was an occasional opponent who taught me a great deal about the substance and process of legislation. On others, he was an ally whose support was both welcome and effective in helping to carry the day.

SCOOP JACKSON was a passionate loyalist to this country, to its working people, to its environment and to its national security. He was a staunch defender of American interests and he worked with all of his soul to strengthen our Nation militarily, economically, and socially. He cared about the socioeconomic strength of our people as well as for their military welfare.

SCOOP's concerns for the basic human rights of individuals went beyond our borders. He was a passionate defender of such liberties throughout the world. He spent a great deal of his life, for example, trying to loosen the totalitarian grip of the Soviet Union on its own citizens and on the citizens of her neighbors.

One of the most accurate descriptions I have heard about SCOOP I think bears repeating today. He knew who were America's friends, and he knew who were her adversaries. To SCOOP JACKSON, certain aspects of this bewilderingly complex world were straightforward and simple. His activities on behalf of keeping America strong to deter the Soviets, of protecting Israel's existence in a hostile world, and of promoting human rights are eloquent testimony to the correctness of SCOOP's assessment of the basic verities of the international scene.

Recent world events have only reinforced the basic correctness of SCOOP's assessement.

The Senate and the Nation have lost a unique individual, whose mastery of the national security field and whose singular understanding of historical perspectives were unparallelled on the Armed Services Committee and in this body as a whole. SCOOP was the best student of history on our committee, and always articulated the historical implications of events, their strategic significance, and the patterns of history into which they fell. These insights will be missed sorely, since they often are overlooked in the daily press of legislative business.

SCOOP JACKSON also was an elected public servant who rose above partisan politics when it came to those issues he thought were of supreme national importance—foreign and defense policy. SCOOP believed deeply that we should have a truly bipartisan national security policy, and that there should be cooperation rather than confrontation between the legislative and executive branches of the Government on such matters. In this way, he believed our country would be stronger, and he was an eloquent spokesman for, and practitioner of, such bipartisanship, in private as well as in public.

Some talk about bipartisan foreign policy; he lived it and he breathed it, even when it was not easy for him to do so. His bipartisanship on national security gained him great respect in Washington and in other world capitals.

Finally, Mr. President, I would be remiss, having mentioned SCOOP JACKSON's achievement as a public servant if I did not briefly talk about him as the person he was. His individual and personal characteristics had an important influence on his public service. Mr. President, SCOOP JACKSON was a nice guy who cared a lot about the little people of this world, whether the person was a disadvantaged citizen of his own State, an unemployed worker in Alabama, or an oppressed citizen of the Soviet Union. Deep down, that caring is probably the best explanation for why SCOOP JACKSON acted and voted as he did in elected office.

There are many people in politics who think they are concerned about little people. Some hold these views as a matter of intellectual exercise, and even cast their votes in reflection of these calculations, but fall short in the way they personally think about and treat the people with whom they come into contact.

There are those who vote with both their heads and their hearts and SCOOP JACKSON was one of those. You could see it in the way he cared on a personal basis about the people who would be affected in their daily lives by the bills and the programs Congress enacted. You could see it in the considerate way that he treated all those around him, whether the person was a constituent or a member of his staff or a stranger.

You could see it in the special affection that his staff held for him, a model that each of us should seek to emulate. And you could see it in the special love that he had for Helen and their children—how proud he would have been of them last week.

SCOOP JACKSON respected people as individuals, with individual feelings and needs. To him, they were not just nameless, faceless voters, members of interest groups, or staffers. It showed in the way he treated them personally and in the way they returned that consideration with the support, loyalty, and devotion that such treatment deserved. That is another lesson that SCOOP's life of public service can teach us.

Mr. President, SCOOP JACKSON was a friend and I will always remember the acts of sensitivity and generosity and kindness that he showed to me. He was a public servant whose contributions to his country and history will be long remembered and appreciated.

I will miss him. The Senate will miss him. The Nation is poorer for his passing and we are all richer for having known him.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. TSONGAS. Mr. President, I remember, at SCOOP JACKSON's funeral, that Senator MAGNUSON made the remark that SCOOP seemed indestructible and it was just inconceivable to him that he could have passed away. I must say I have the same sense, as I stand here now, that there is something surreal about what we are doing, that if we just wait long enough, he will walk through those doors and be part of us once more.

For someone like me, who has only been here a short time, less than 5 years, and for those of us particularly who serve on the Energy Committee, he was a part of this place in a way that most people would not understand. The fact that the institution keeps on going without him does seem very strange.

There are and will always be great men and women who will serve in the U.S. Senate. That has always been referred to and there is no reason to assume that will not continue. We always hear talk of the lions of the Senate, those people who achieve a certain greatness. I do not think anyone doubts that SCOOP JACKSON will be included in that category. We have seen all kinds of speeches, editorials, and commentaries which point that out.

But that was not what brought so many of us to Washington for the funeral. It is not what has caused the emotion which we have heard on the floor today.

The legislative greatness of an individual is all well and good, and certainly, SCOOP is in the forefront of that kind of achievement. But I think what people should get out of today's tributes is SCOOP JACKSON, the human being. I do not know how you portray that, how you get people to understand the feelings that we all had for him. But let me just mention a few of the attributes that I shall remember.

One, he was unaffected. This is not a body which lends itself to that kind of characteristic. Anyone who has presided over this body and seen us all in action will realize that we all come to this institution with enormous capacity to dwell on one's self-importance. SCOOP was not that kind of person. Despite all the national acclaim, the Presidential races, and so on, he remained essentially an unaffected human being. That is what drew so many of us to him.

He was also very gentle. If you talk to any of those people who worked with him on his staff—and Tom Foley, I thought, did a remarkable job in his eulogy at the funeral—there is a loyalty to SCOOP the human being from those he had capacity over. That is not always the case. A lot of those who serve in government may have very good staffs and may have a certain respect for them, but the kind of love that existed for SCOOP JACKSON by those who worked for him I think was eloquent testimony to the kind of gentle person that he was.

Third, I was very impressed, when I went to Everett, Wash., and stood on the lawn in front of his house, by the clear sense of roots that he had. He had traveled the world and done all that one does in public life, but Everett, Wash., was his home. He was committed to that place, committed to that house, to his family, and I think that speaks well for him.

How many people come to Washington and never leave, even though their public life may be over, and forget where they came from, in many ways try to put that behind them? SCOOP was not that kind, and his loyalty to Everett speaks volumes for the loyalty that he had to other people.

Finally, let me mention just one other attribute. That is his concern for junior Members. There are a lot of great people in the U.S. Senate, and for someone who comes in new, it takes a while to get to know everybody. Eventually it does indeed take place.

I served on the Energy Committee under SCOOP, and those of us who did will always appreciate his outreach to those of us who were new and inexperienced and somewhat timid as we came into this body; that he was a great national figure, we were new Members, but that never made any difference. And the fact that he did what he did for us to make us comfortable, to make us feel conversant in the matters of the committee will always be appreciated.

He and I worked hard on the Alaska lands bill, the one thing that I was probably more involved with him in than any other piece of legislation. That bill is a tribute to not only his commitment to the environment but his capacity to get people to work together. I hope it is clear that in addition to the respect that we had for SCOOP, we also had an affection for him. And it is simply not a case of a colleague but one to whom love flowed.

Now that his example of simple humanity is gone, I hope that his absence will be so felt by all of us that it will set a tone, it will set a standard; that sensing the absence of that kind of humanity we will all change a bit and try to be as much as we can be loyal to the example that SCOOP gave to us.

I hope that when my time in this body is complete, I will have a small percentage of the respect and affection that SCOOP enjoyed from all of us.

Mr. BAKER. Mr. President, in consulting with staff, it appears that Senators on both of the aisle who wish to speak would require extending the time of eulogies beyond 1:30 p.m.

Mr. President, I ask unanimous consent that the time be extended until 2:30 p.m. and that the sequence of other events as described, that is to say, the Lebanon debate and the Korean plane resolution, be extended, the beginning time to be extended by 1 additional hour.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Michigan is recognized.

Mr. RIEGLE. Mr. President, today is one of great sadness and of commemoration as we reflect upon the life and accomplishments of our friend and magnificent colleague, SCOOP JACKSON. Our hearts are with Helen Jackson and Peter, and Anna Marie, and these bonds of caring and love will always continue.

The Senate in recent years has seen enormous change. Over 60 Senators have served less than a decade. As an institution, we have been relying very heavily on a diminishing handful of giants in the Senate—those special individuals whose length of service and particularly gifted leadership provided much of the guiding force of the Senate as a whole.

SCOOP JACKSON in a institutional sense must be seen in that light. No Senator provided more vitality or legislative leadership to the Senate than SCOOP JACKSON. His passing is an enormous loss to the Senate, to the Nation, and to every person on this Earth who loves freedom and is part of the struggle for human justice. The civilized world has lost one of its greatest champions.

SCOOP JACKSON was a Senator in the fullest sense. He was a forceful advocate, a prodigious worker, an independent thinker, a warm and giving colleague, a person of ideas, creative force, and convictions, a man with an enveloping concern for people and their well-being, a person wonderfully free of pretense and selfishness or mean motive and, as has been said by others, a Senator of truly historic legislative accomplishments.

Those fortunate enough to have served with SCOOP have been enriched by his good humor, his absolute integrity, his vision, and his example of excellence in a lifetime of devoted service to the public interest.

It is appropriate that a beautiful flower with many blossoms should now stand where SCOOP JACKSON did his work on the Senate floor. He was always in bloom—with ideas, legislative initiatives, a kind of word, a friendly pat on the arm, a bright vision of life where things could be changed for the better.

While the words of tribute spoken here today honor SCOOP and his memory, the greatest honor will come in the months and the years ahead when his continuing influence upon us, his example and teaching, causes us to strive harder and with a clearer vision for those national and international goals that he championed.

Finally, a special word must be said about the enormous contribution made by SCOOP's family in sharing him so unselfishly with the public needs that were the focus of his work life. Hours, months, literally years of time away from home, away from family were required for SCOOP to carry out

his public interest duties as he saw them. His recent tiring trip to China comes to mind.

Every hour of his time away from home and family was a gift of caring and concern by the Jackson family to people everywhere. The good work he accomplished late in the evenings on the Senate floor, on weekends with constituents in Washington, or in offering hope and help to others in need in this country and abroad was only possible because a loving and supportive family was willing to share so generously its husband and father. No family can give a more precious gift to their fellow citizens and none have given more than the Jackson family. So all these tributes today are family tributes. The good deeds remembered are those of the family and not a man alone. This family and that man shall always be a living part of the Senate.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized.

Mr. CHAFEE. Mr. President, it is difficult for us to think of the Senate without SCOOP JACKSON. As we stand in this Chamber, each of us have a flood of individual memories of him. To each of us he was truly a titan of the Senate. If one was in a legislative battle, one's chances of success were immeasurably improved if SCOOP JACKSON was on your side. When he signed on in a legislative effort, he did not just sign on his signature; he signed on to work, to produce, to succeed, and that is what he did.

I can remember we worked together about 2 years ago on a piece of legislation to protect the identities of CIA agents—in other words, to forbid the disclosure by some, whether they were Americans or foreigners, of the identities of these agents. There were many leading Members of this Senate who were opposed to that legislation for very legitimate reasons. But we worked together and succeeded in the passage of that legislation. We succeeded because SCOOP JACKSON individually buttonholed Senator after Senator to persuade them to our cause. It took work; it took effort; but that was the kind of person he was.

Yet, for all his legislative skills and all his dedication to a cause, everything HENRY JACKSON approached he did with a sense of fairplay. He never took unfair advantage of an opponent.

Again, let me give a personal illustration. I can remember being on the opposite side of SCOOP on a defense issue. In the course of my remarks, I made a serious factual error and was open to the opportunity for somebody to make me look very foolish. SCOOP had that opportunity, but he refused to seize it. Instead, he came up to me afterward and said, "I think you erred on that." Clearly, I had, but he did not say it publicly, and for that I am eternally grateful.

SCOOP JACKSON radiated enthusiasm. He was constantly innovative and original, open to new ideas. He was full of pep; he was constantly alive.

It seemed that both physically and in his character, he emphasized sturdiness. He was sturdy, like his State. He was sturdy in his positions, sturdy in his loyalties, sturdy in his judgments.

For all of us who have served here with him, his loss is a great blow. To his family, we extend our sympathies and our gratitude for giving this wonderful man to our Nation.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, the loss of Senator HENRY JACKSON has been a great tragedy—both for the Nation and to all of us who knew him personally.

Much has been written and said about this great loss to the country and to the U.S. Senate, and much of it with more eloquence than I could hope to achieve in paying tribute to one of the true giants of our time.

In the time that I have served in this great body, I came to know SCOOP as a warm friend—a friend in the best sense of the word.

Senator JACKSON was a product of the spirit of America. He came to Capitol Hill nurtured by the values and ideals of the people of his great State of Washington. He never forgot the grand purpose and responsibility which was entrusted to him. He never betrayed that trust. It would not have been in SCOOP's nature.

He was a man who brought the ideals of his home to this floor; who used them to serve the people of his State and the people of this Nation, and to inspire his friends and colleagues. He has left a permanent imprint on this body and on everyone who knew him.

Before I came to the Senate, I was touched by SCOOP's compassion. After the 1980 election, many congressional staffers on this side of the aisle were left unemployed. Senator JACKSON took it upon himself to help many of these people find new positions. That kind of intervention is extraordinary in this place and is only one example of the man's integrity and feeling for his fellow man.

When I did reach Washington, I was deeply and singularly impressed with Senator JACKSON's sense of feeling for the people of this country, and of his sound sense of reason about what needed to be done to assure that our people remained free to pursue their destiny.

He brought that sense of reason and those values to debates here. And he understood the profound wisdom of consistency to those values—never wavering in the face of expedient political advantage.

SCOOP was, above all else, a patriot first. He understood the need for a strong America—both in defense and in the compassion we must show to the less fortunate among us. He understood, from firsthand experience, the circumstances of history that bind us to the people of Israel. In fact, despite his reputation as an advocate of a strong defense, he clearly understood the need for military prowess to be complemented by American humanitarianism.

The loss of Senator HENRY JACKSON has left a great void in this country—and in this Chamber. His conscience and dedication will be sorely missed and not easily replaced.

My sincerest condolences go out to his beloved wife, Helen, his two children, Anna Marie and Peter, and other family members during this time of mourning. They should be comforted by the knowledge that HENRY JACKSON was a man dedicated to his God, his country, and his fellow man.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, the Nation and, indeed, the free world suffered a grievous loss on the first day of this month when our colleague and friend, Senator HENRY M. JACKSON, was suddenly taken from us.

SCOOP JACKSON, as we all fondly referred to him, was not only one of the giants of the Senate but also a giant of Western civilization. His passing has left a void in this Chamber that we can ill afford. The people of the State of Washington have lost a great representative, the U.S. Senate has lost a respected leader and Western civilization has lost a superlative defender of freedom.

The record will show, Mr. President, that Senator JACKSON spent more than half his life in elected public service. For 42 years, Senator JACKSON unselfishly and devotedly served his Nation in the Congress of the United States with honor, dignity, and everlasting credit. He was in truth a humanitarian and a patriot, dedicating his career to improve society and the common defense. HENRY JACKSON was the very embodiment of the truth that the greatest fulfillment of man's talents and abilities are realized through meaningful service to his Nation and fellowman.

Senator JACKSON's influence was not, of course, confined to the Senate nor to the shores of this Nation. He was well known throughout the globe for his steadfast efforts to maintain the security of the free world and was widely respected by those who worked to preserve, promote, and perpetuate peace among all nations. Senator JACKSON knew war and abhorred it, but he knew it could only be avoided if our Nation and our allies remained powerful, both militarily and economically. We are a better, stronger Nation because of his service. Western civili-

zation is improved because of his wisdom.

Senator JACKSON left a mark in this body which will of itself be a lasting monument to his service and his life. His presence will be sorely missed, but his record will shine brightly in the annals of the Senate. We can all learn from what he did.

It was my high privilege to know and serve with HENRY JACKSON. I admired him as a man and as a public servant. I was grateful for his friendship.

I share the sorrow, the sorrow that is common to all who knew Senator JACKSON and worked with him. On behalf of the people of Alabama, I extend my deepest sympathy to Mrs. Jackson and the Jackson family.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, it is difficult for us to put into words all that SCOOP meant, not only to us but to the country, to those who knew him personally, and to those who knew of him.

Some will remember SCOOP as an articulate spokesman for the defense of a strong and secure America, as a man who would not knuckle under, as a man who with his vision, clarity, and perception of a great America, stood up for its defense and security.

Others of us remember SCOOP for being at the forefront of pointing out the need for developing a sound national energy policy. He was one of the first to forecast OPEC and to warn us about the dangers we would face with energy shortages and high energy prices.

But I will remember SCOOP for his ability to balance competing and often controversial interests.

For example, while, on the one hand, he worked hard to protect our wilderness areas, he also emphasized the economic importance of developing our natural resources.

While he spoke out on the need for American military strength, he also showed a strong commitment to meeting social needs and providing those services. In many ways SCOOP stood for years where the country and the Democratic Party now appear to be heading.

Others will remember SCOOP for his compassion for the average, ordinary American—the man on the street, the housewife, the schoolteacher, or whatever. That compassion guided him whenever he spoke before this body on a piece of legislation.

Finally, I remember SCOOP as a northwesterner. We northwesterners, just as those in other parts of the country, pride ourselves on many qualities. One of them is just good, basic, down-to-Earth commonsense.

I am sure everyone in the country feels that he or she has some monopoly on commonsense. I must tell you, Mr. President, that I cannot think of anyone who epitomized that quality more than SCOOP JACKSON.

I say that because many times in the last several years, I sought out SCOOP for his advice—on energy policy, defense policy, and other issues. And always, his basic northwestern commonsense came through.

There is no one in this body whose advice I valued more and whose counsel I sought and respected more than SCOOP.

Let me just close, Mr. President, with one little anecdote.

A few years ago, I was on an airplane with SCOOP and several other Members of the Senate. As usual, most occupants on the airplane were talking and there was much conviviality. But not SCOOP. He was sitting in a seat off on the side, with a stack of newspapers that must have been 3 feet high. SCOOP had not had a chance to read those newspapers because of previous engagements. He sat there and read each newspaper, front page, page 2, page 3, to the end, and made little notation marks. While everyone else was just talking and having a good time, there was SCOOP working. I watched him. That was a long trip, but he stayed there until he finished every one of those newspapers.

That incident is only a small slice of SCOOP, but in another sense, I think it is a very large slice. It showed the devotion and dedication he felt for his job, his State, and his country.

Mr. President, I and the people of Montana share the sorrow felt by the people of the State of Washington and his family.

There are many qualities of SCOOP that we will remember. His memory will serve us very well, and I call on each of us to try to remember SCOOP every day. If we do that, we will be a better body, we will pass better legislation, and we will be a better country.

I will miss SCOOP. He was the dean of the Pacific Northwest and his voice of experience is a great loss for all of us.

The PRESIDING OFFICER. The Senator from Maine is recognized.

Mr. MITCHELL. Mr. President, the sudden and shocking death of our colleague, Senator JACKSON, will leave a void in the Senate and in the Nation's public service that will not easily be filled.

Senator JACKSON's career exemplified the best of American public life. His vision of our society was informed by a recognition that ours is a Nation which can flourish only when the public weal—the common weal—takes precedence over private desire. His principled and unchanging defense of a domestic order that served the powerless and poor as well as the strong and wealthy derived from the same goals which our Nation's founding document expounds: "* * * to form a more perfect union, establish justice, insure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity * * *."

Senator JACKSON was staunch and unyielding in his defense of our liberties, both at home and abroad. He was dedicated to the proposition that a strong military establishment can be reconciled with a strong defense of human rights. His was the effort that brought human rights concerns home to the Soviet Union, when he championed the right to free emigration from Communist as well as non-Communist nations. Even more importantly, he understood that a strong national defense and an effective foreign policy can only rest on the base of a prosperous and just society at home.

Senator JACKSON's vision and concern were broad and farsighted; his insights were not circumscribed by contemporary preoccupations. He was one of the earliest environmentalists in the Senate. Beginning in the 1960's, he made it a matter of priority to actively seek legislation to protect the natural resources in which our continent is so rich. He took an early and leading role in recognizing the constraints imposed by the enormous energy needs of our highly industrialized society, long before the first oil embargo brought that lesson home to the rest of the country.

His service spanned some of the most momentous decades in our Nation's history, and some of the most contentious. Senator JACKSON was not afraid to stand up for American principles against the witchhunting of the fifties; neither did he abandon his justified skepticism of the aims of the Soviet Union during the days of détente. His principles remained unaltered by the fashionable priorities of the times through which he lived. He alined himself neither with left nor right but rather pursued a course which his conscience told him served the best interests of his country.

Our Nation was fortunate to enlist and maintain Senator JACKSON in the ranks of its public servants for almost 43 years. He rose above empty rhetorical partisanship when the interests of his country demanded it, and he never surrendered his belief in the principles of the political party to which he gave his allegiance. His presence in this Chamber was a reminder to all of us that public service is an honorable calling.

Senator JACKSON's place can never be filled. His passing can only be mourned.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. SPECTER. Mr. President, because he was such a towering figure in the political and public life of our Nation for such a long time, the pass-

ing of U.S. Senator HENRY M. "SCOOP" JACKSON had been duly noted and his life fittingly eulogized by many. This has been altogether appropriate and due a great American.

For my part, however, although I, too, recognize his genius and greatness, I would prefer to dwell on his great humanity, his innate kindness and charity.

When I came to Washington almost 3 years ago, upon my election to this legislation body, I had occasion to meet HENRY JACKSON and, subsequently, to talk with him many times, mostly when we frequented the Senate gym together in the late afternoon.

Invariably, he was gracious and helpful in every way possible. In endeavoring to learn as quickly as possible the many great traditions of the U.S. Senate, I often turned to Senator JACKSON and always found him not only willing but eager to assist me.

His more than 30 years as a Member of the U.S. Senate earned him great deference from his colleagues, but he never sought it. Despite his great experience and his many achievements, Senator JACKSON was a truly humble man.

Those who have eulogized him and praised him for a life spent in the service of his fellow Americans have called him many things—a great patriot, a great American, a great Senator. All of this is deserved and I join in these encomiums.

I am proud to have had the opportunity to know him and to be able to say that he was my friend.

Mr. President, I feel honored to have an opportunity to join as a Member of this body in paying tribute to the career of Senator HENRY M. JACKSON, just as I feel honored to have had an opportunity to get to know SCOOP JACKSON and to number him as a friend during the course of the past 2½ years.

My own association with Senator JACKSON began in the Senate gymnasium where I met him shortly after coming here in January 1981. Our visits to the Senate gym about 5:30 p.m. on many days during the week provided a leisurely opportunity to discuss a wide variety of matters.

Before coming to the Senate, I had read and heard about Senator JACKSON and had great admiration for his long and distinguished career. One of the great opportunities in being a Member of the Senate is the chance to meet with and talk to and get to know on a closer basis some of our national heroes.

That was the contact that I first had with Senator JACKSON early in 1981. When I found him so readily accessible in the Senate gym, I then took the occasion to read about him in the many biographies and accounts of his illustrious career and then would inform him about which I had read. I would discuss with him some of the "inside" stories, which he was glad to talk about in a very convivial and jovial way.

I had occasion once to talk to him about the challenge that he made to Senator McCarthy shortly after Senator JACKSON came to the Senate in January 1953, and the difficulty of the challenge to the position of Senator McCarthy at that time. SCOOP JACKSON relished that discussion and conversation.

I had occasion to talk to him about the widely publicized incident where President-elect Nixon had offered him the job of Secretary of Defense, and the President-elect had called him to a meeting in Washington when he was in Hawaii, and how he might have accepted the offer had he been in Washington. SCOOP thought it over from that distance and later decided against taking the position because he thought he could make a greater contribution in the Senate, notwithstanding Senator JACKSON's keen interest in the position during the Vietnam war and the Soviet menace.

I also had occasion to talk to him about many of the topics of concern in the pending business. I had a discussion with him one day about the Mideast. He was a fountainhead of knowledge, having acquired it in trips, conversations, reading and extensive experience, and he pointed out how important Egypt is in the Arab world because 45 percent of the entire Arab world lives in Egypt.

He was a tower of strength in defense. One day in the Russell Building, where we were two floors apart, he asked if I had a few minutes to talk over the Jackson-Warner resolution which was competing with the Kennedy-Hatfield resolution on the freeze. He had 50 cosponsors, he told me on that day, and was looking for a 51st to push his resolution over the top.

He outlined all the reasons why there ought to be arms reduction before there is arms control. I told him I would think about cosponsoring. I eventually signed onto the Jackson-Warner resolution and was well aware it was as much Senator JACKSON's personality as it was the force of his argument which led to my agreement to cosponsor contrary to my customary practice of waiting to cosponsor as so much is learned at a later stage, and sometimes early cosponsorship is a position that one does not wish to stay with. I was willing to sign on after that kind of contact and that kind of expression I had with Senator JACKSON.

It was a stirring ceremony last Wednesday, a week ago today, in Everett, Wash., when so many Members of the United States Senate flew out, a 7 a.m. departure, and returned at midnight, to pay tribute to him at the funeral service.

There was an unusual atmosphere, both in the chapel when the eulogies were presented and later at the reception where Mrs. Jackson was so cordial and so hospitable, standing up under the strain in such magnificant style, as were SCOOP's daughter and son; but there was a feeling that Senator JACKSON had lived a full and complete life and had contributed so much. No one is ready to die at any age, let alone at 71, at the height of his physical prowess as it appeared to those of us who saw him frequently at the Senate gym.

There was a glow to the entire affair, notwithstanding there was a funeral, just as there was a glow to his life and career, and I feel honored to be able to stand on this floor today and pay tribute to a man we have known, for the opportunity I had to know, Senator JACKSON. I thank the Chair and yield the floor.

Mr. GLENN. Mr. President, I believe that Edmund Burke had a man like HENRY JACKSON in mind when he observed that elected representatives should stand on their judgment, not on their willingness to shift with the public passions of the moment. Well, for over three decades in the Senate, SCOOP JACKSON stood on his judgment—and that judgment added vast dimensions to our own understanding of steadfastness, courage, and wisdom.

If there was one objective that SCOOP constantly pursued during his years of public service, it was the cause of human rights. He was a man whose every action was rooted in the bedrock belief that freedom is the most valuable heritage of all Americans; a treasure not to be hoarded or locked away, but one to be shared generously with others less fortunate.

SCOOP contributed much to that which is the very best of America. A quintessential American, he was a man for all the world—a true champion of the homeless and oppressed. Millions of people in Israel, Western Europe, and throughout the free world owe their liberty to this man from Washington State—a man who had the towering strength to be tough, tender, and kind.

SCOOP JACKSON believed that America had to be both generous and strong. He believed in a country compassionate enough to care for its jobless and hungry at home and powerful enough to defend its vital interests and moral principles abroad.

We all bear a heavier burden because of SCOOP's death.

But we all have a clearer vision of our duty because of his life.

Mr. BOREN. Mr. President, during the Labor Day recess, the U.S. Senate lost one of its most respected elder statesmen with the death on Septem-

ber 1 of Senator HENRY M. "SCOOP" JACKSON of the State of Washington.

I was extremely saddened to learn of Senator JACKSON's death. He was a man of integrity and sincere patriotism who served his nation well during his 42 years in Congress.

But even more so, I feel a sense of personal loss. Two generations of my family have served with HENRY JACKSON in the Congress. My father, Lyle H. Boren, served with Senator JACKSON for 6 years in the House of Representatives during the time both of them were Congressmen, and Senator JACKSON was especially helpful to me when I first came to the Senate.

Senator JACKSON was an extremely influential Senator whose work and interests covered a broad spectrum of important issues. Through the political know-how, experience and authority which came from key committee assignments, Senator JACKSON was able to exert his influence in many important areas.

He continually advocated a strong American military establishment and supported the cause of national security while, at the same time, being a strong, consistent supporter of Israel and of the plight of the Soviet Jews.

He always attributed his concern for Jewish issues to his mother's strong views against anti-Semitism, and his own experiences, shortly after World War II, in visiting the Buchenwald concentration camp.

Along with former Representative Charles Vanik of Ohio, Senator JACKSON led the fight for the Jackson-Vanik amendment which prohibited most-favored-nation trading status for countries that restrict emigration. This was an effort aimed at the Soviets' refusal to allow Jews to emigrate.

Just prior to his death, Senator JACKSON had been on a factfinding trip to the People's Republic of China and, upon his return, held a news conference to denounce the downing of the Korean airliner by the Soviets as an "act of barbarism."

At the time of his death, Senator JACKSON was the ranking Democrat on the Armed Services Committee, supporting a more aggressive U.S. role in world affairs. As early as the 1960's, Senator JACKSON was known as a specialist in defense, whose major emphasis was a consistent and deeply held mistrust of the Soviets.

As the former chairman of the Senate Energy Committee, Senator JACKSON supported development of hydroelectric power, and he served for 30 years as a member of the old Joint Atomic Energy Committee, promoting nuclear power. At the same time, he was one of the first Members of Congress to speak out about the importance of protecting our Nation's environment.

HENRY JACKSON was a man of complete integrity who never used public office to promote any gain for himself. He held to the worthwhile, old-fashioned idea that public office is a public trust. The Nation would be far better off if the Nation had more leaders that had the courage and integrity exemplified by the life of HENRY JACKSON.

His presence in this body, and in the Nation, will be greatly missed. I know that all my colleagues join me in expressing sympathy to Mrs. Jackson and to the family.

Mr. JEPSEN. Mr. President, on September 1, 1983, the Senate lost one of its most distinguished and valued Members.

One would not be exaggerating in saying that an era has passed in this body and in the country as a result of his untimely passing.

Senator SCOOP JACKSON has left a gap in our ranks that will never be filled.

For the past 4½ years, it has been my privilege to serve with Senator JACKSON on the Senate Armed Services Committee and observe firsthand his effective style of developing broad-based support for his positions without sacrificing the integrity of those positions.

His Senate work was based on four decades of experience and seasoned with a rare consistency of outlook, tireless hard work, and a very healthy dose of commonsense.

Senator JACKSON established himself as an authority in the foreign policy and defense fields. He never lost sight of the big picture in world affairs. He refused to have any illusions about the Soviet Union's aggressive foreign policy. There was little change in Senator JACKSON's views on defense and foreign policy throughout his 30 years in the U.S. Senate. His integrity and commitment forced him to fight many lonely battles for a strong national defense and a vigorous foreign policy on a bipartisan basis throughout the years.

In his handling of all issues before the Senate, HENRY JACKSON was the epitome of the practical, clear-thinking, and sensitive legislator. May God grant this country leaders who partake of the Henry Jackson legacy.

Mr. PRYOR. Mr. President, we are saddened by today's occasion, but at the same time we are moved and challenged by the example of HENRY M. JACKSON, our colleague and friend. I want to concentrate on that example and recall those specific ways in which SCOOP JACKSON inspired us all.

Senator JACKSON's legislative record is a matter of history and needs no lengthy delineation. It serves as a fitting reminder of the 45 years he spent in public life and particularly his three decades in the Senate.

His tireless work on national security and defense matters will always distinguish the Jackson years during the 1960's and 1970's. Time and time again, he reminded us of the value of national preparedness and the need to keep our country strong.

It strikes me as an irony of history that his death came during the same week that a Korean airliner was downed by the Soviets, a demonstration of the necessity to keep constant vigil even in times of peace. It is appropriate that the President has announced that the next Trident submarine—to be launched on October 15 of this year—will be named the *Henry M. Jackson.*

Senator JACKSON was a friend to the friendless, not only in this country but around the world. Beginning in the stark days after World War II, when he visited the devastation of postwar Europe, he committed himself to the cause of human rights. And it was a distinguished commitment. SCOOP JACKSON was at the front of every movement toward freedom for all people.

It may be that his most cherished project was the series of achievements in environmental protection. Where would this country be today without the National Environmental Policy Act of 1970? And where would that landmark legislation have gone without the firm leadership of SCOOP JACKSON?

Mr. President, at times like this we all think of the personal associations, the friendships, and the private, individual moments we shared with a late colleague. SCOOP JACKSON was my friend. We did not always agree, but we never failed to respect the views of the other.

One reason we shared a common point of view was because we were both from the country. We shared a rural, small-town background. And when you have that kind of similar past, the result is bound to be a common vision.

HENRY M. JACKSON was a Senator's Senator. He was wedded to this institution probably more than anyone in recent years, and with his departure we have lost the closest possible ally and friend.

Mr. EAST. Mr. President, when our friend and colleague, Senator HENRY M. JACKSON, died on September 1, he left a void in the life of the Senate and the Nation. Although I served with him in the Senate for only 3 of the 30 years that he was here, Senator JACKSON has left an indelible mark on my memory.

Everyone who knew Senator JACKSON enjoyed his good humor and buoyant spirit. We were touched continually by his earnestness and sincerity. And we were impressed always by the depth of his knowledge of, and commitment to, solving the great public policy questions of our time.

I had the opportunity to get to know Senator JACKSON best from my service with him on the Senate Committee on Armed Services, on which he was the ranking minority member. That experience taught me more than I already knew about Senator JACKSON's commitment to the defense of our Nation.

Mr. President, Senator JACKSON once was reported to have said that "the true test of a man is where he stands on national defense." No member of the Senate can doubt that Senator JACKSON passed that test, time and time again, across the three decades during which he served in the Senate.

Elected to the Senate in 1952, SCOOP JACKSON quickly became a staunch ally of President Eisenhower on defense policy. And he supported the defense posture of President Kennedy. But perhaps the truest test of Senator JACKSON's commitment came during the administration of President Johnson.

Though it eventually became unpopular within his party to do so, Senator JACKSON supported the efforts of President Johnson unwaveringly during the Vietnam war. He became such a symbol of bipartisan support for a strong national defense, in fact, that, in 1968, President-elect Nixon reportedly offered him the post of Secretary of Defense.

Even though he decided to remain in the Senate, Senator JACKSON backed President Nixon's Vietnam policy and served as a major leader in the Senate fight that won approval of the antiballistic missile (ABM) program in 1969.

In 1972 and 1976, Senator JACKSON sought the Democratic nomination for President. He stood out, both times, as the leader of that wing of the Democratic Party that believes that a strong national defense cannot take second place on any list of the Nation's priorities.

The central conviction that animated Senator JACKSON'S overall view of national defense issues was that the Soviet Union is the implacable enemy of the United States and the entire free world. Indeed, it is fitting that Senator JACKSON'S last public statement was his strong denunciation of the brutal attack of the Soviet Union on a civilian airliner, Korean Air Lines flight 007, just hours before his death.

Senator JACKSON'S distrust of the Soviets led him to take a tough stance on the question of nuclear arms reduction negotiations and treaties. He is credited with having stengthened the SALT I treaty through the use of his strong influence with the Nixon administration's Defense Department. And, during the Carter administration, there can be little doubt that Senator JACKSON was a key force in preventing Senate ratification of the weak and dangerous SALT II treaty.

During the time in which I had the privilege of serving in the Senate with Senator JACKSON, I saw that his commitment to national defense, and his vigorous opposition to the Soviet Union, remained undiminished with the passage of time. Senator JACKSON'S steadfast support of President Reagan's program for rebuilding America's military strength has proven to be invaluable as that program has succeeded in winning congressional approval of its major components. Senator JACKSON backed the B-1 bomber. He supported the MX missile. And, most of all, he shared President Reagan's conviction that meaningful Soviet-American negotiations on nuclear arms control can occur only when the United States is bargaining from a position of strength and determination.

Mr. President, I am honored to join my colleagues in paying tribute to the late Senator HENRY M. JACKSON. Senator JACKSON rose above party. He rose above ideology. He towered above us all. The Senate is diminished by his passing. And each of us is saddened.

Mr. DANFORTH. Mr. President, as a rule, one should not judge the greatness of an individual from his eulogies. Remembrances amplify goodness and magnify virtue, either to comfort those who live or to provide them with an instructive model of life.

HENRY M. JACKSON is a magnificent exception to this rule, as to so many other commonplaces of our public life. It is our eulogies that will not measure up to the man, and not the reverse. Pages of declamation will not do justice to the goodness of our late colleague, to the clarity and integrity of his mind, nor to the sparkling innocence of his enthusiasm for politics and public service.

Historians and political scientists, then, should approach remembrances of Senator JACKSON with a standard of judgment radically different from that usually applied to eulogies. We are not telling the half of it. He was better than we can say.

One account of our proceedings took note of the striving for hyperbole in the commemoration of SCOOP JACKSON. The truth is that hyperbole is merely the best we can do.

The most direct measures of a public servant are his accomplishments and the opinion of his constituents. SCOOP JACKSON'S accomplishments were monumental. His support for civil rights legislation was vigorous and consistent. He was a champion of the cause of labor. He was the principle legislative architect of our national environmental policies. He played a crucial role on every major issue of energy policy. On questions of national security and military policy, SCOOP JACKSON was among the most influential figures of the 20th century.

His goodness is to account, I believe, for two of the brightest moments in a career in Congress that spanned four decades: His fierce dedication to the cause of human rights in the Soviet Union and his opposition to the malignant excesses of Senator Joseph McCarthy.

Today, more than a quarter of a million Soviet Jews live in freedom because of HENRY JACKSON. It was Senator JACKSON who formulated the linkage between American trade with Communist nations and the humanity of their emigration policies. It is a monument to his vision that he created a practical tool of economic leverage in foreign relations.

He joined with Senator Symington of my State and with Senator McClellan in standing up to the evil work of Senator Joseph McCarthy. SCOOP JACKSON, you see, believed in America. Senator McCarthy did not. It was the view of Senator McCarthy—a view that continues to stain our political life—that the great institutions of public life can fall into the hands of villains, that the central challenges of our national existence can be mastered by exposing and destroying evil people who held positions of public trust. Senator McCarthy believed that America is weak. SCOOP JACKSON believed that America is strong. Senator JACKSON believed that Americans must trust the institutions of representative government. He denied that democracy could be corrupted with ease by a handful of fantastic conspirators.

The judgment of SCOOP JACKSON'S constituents, the people of the State of Washington, was thundering. Nobody won elections like HENRY JACKSON won elections. He campaigned for the Presidential nomination of his party in 1972 and in 1976. Journalists enjoy saying that the Senate is populated with people who would like to be President. Ambition was the least of his qualifications for the Nation's highest office. He was capable of serving the American people as their President.

Each of us would treasure the stature enjoyed by Senator JACKSON and the affection and esteem lavished upon him by the people he served. We should put greater store, I suspect, in the personal qualities that enabled him to become a towering figure of national policy and a Senator in whom the people reposed such confidence.

One of those qualities—perhaps the most important—was simple goodness. To those who knew him, his personal goodness was powerfully and immediately apparent. The goodness of his personality came through most often in his sense of humor—gentle, constant, uniquely effervescent. His eyes always twinkled. He seemed always about to smile.

Another of his central qualities was a clear and profound sense of values. He knew that some nations stand for what is good and that some do not. He

knew that some nations care if people live or die, and that others could not care less.

Finally, he believed that government is a positive instrument for good. Such a belief is necessary to greatness in any public servant.

The purpose of Senate debate is to settle on particular methods by which to advance the public good. In the most basic sense, we work from an assumption that decisions on public policies make a difference, for better or for worse. SCOOP JACKSON was a daunting figure in debate, a marvelously effective advocate of his view on any matter under discussion. But the true article of his faith was the idea that public service can make a difference for the better.

He was a good person.

He was a brilliant public servant.

He made a difference.

It is one of the greatest honors of my life to have known HENRY M. JACKSON and to have served with him in the U.S. Senate.

Mr. WALLOP. Mr. President, we mourn HENRY JACKSON. But as we do, so we weep for our country as well. For we have lost more than a fine fellow human being. Though HENRY JACKSON was one of us, he was significantly different from the rest of us. He was what most of us would like to be but know in our hearts we are not. To see him at work was to be reminded of Matthew, chapter 7, verse 29, "he taught them as one having authority." All who are in public life, who struggle to exercise power, long for what office and power alone can never give: authority. People listened to HENRY JACKSON because they had learned from long experience he was worth listening to. People would have listened to him even if he had not held the powerful positions he did.

It behooves us all to remember how HENRY JACKSON gained, indeed how anyone gains, authority. First, he had knowledge—lots of it. He spent more time than most studying and observing. But many bright people work hard at gaining knowledge with little success. They lack the humility that is the prerequisite for all learning. HENRY JACKSON was humble enough intellectually to realize he had a lot to learn, and humble enough personally to associate habitually with people who knew more than he did—people he could and did learn from. Some of the Western World's first scholars found HENRY JACKSON congenial company. HENRY JACKSON was a very good listener.

Second, HENRY JACKSON was a man of right opinion. All the facts in the world will not help a man whose intellectual and moral compass is awry. HENRY JACKSON always knew who the friends—and the enemies of freedom in the world are. His deliberations were anything but sterile. He kept the chief fact of contemporary international life firmly in mind: The Soviet Union is running a ruthless worldwide campaign to take away our freedoms. That campaign will succeed unless we cause it to fail. Time and again Members of the U.S. Senate are pressed by various bureaucracies or constituencies to divert their thoughts and energies from this key consideration. Time and again I have been privileged to see HENRY JACKSON bring the discussion back to the essential point. Ultimately, the general public will listen only to those who speak to matters of general importance.

Third, HENRY JACKSON proved again and again that he acted and spoke for the common good. He never played partisan politics with national security. Thus it was that when he spoke or acted, his words and deeds were taken at face value, as the expression of a coherent point of view about what would actually enhance the Nation's security.

Fourth, HENRY JACKSON had the ability to bring his knowledge, his concentration on the essential, and his dedication to the common good to the American people's attention again and again, over a number of years. Of course his seniority helped. But many others have made much less of loftier pulpits. The point here is that, in order to gain HENRY JACKSON's authority, one must demonstrate HENRY JACKSON's qualities not for a day, month or year, but for a lifetime.

As I pray for HENRY JACKSON's soul, I also pray to God that by His grace the realization of what we have all lost will spur us to imitate HENRY JACKSON, so that the country he loved might enjoy a long and honorable life.

SCOOP JACKSON: A LIFE TO CELEBRATE

Mr. MOYNIHAN. Mr. President, I have the privilege today to join with my colleagues in paying tribute to Senator HENRY M. JACKSON. We knew each other almost a quarter century, from the time of the Democratic National Convention of 1960. He was my closest friend in the Senate, and without him this place will not be the same for me nor, I suspect, will it be for others.

SCOOP JACKSON served his country longer, and many would say better, than any public man of his time. Fashions changed; he did not. This led to much misunderstanding in later years. But he was invincibly good natured about it.

I remember having breakfast with him in Milwaukee during the 1976 Presidential primary campaign. We were watching television. One of the other contenders was protesting that he was a "progressive," not one of those "you-know-whats."

SCOOP smiled, poured a cup of coffee, and remarked: "You know, I may or may not be a liberal, but I am the only person in the campaign willing to call himself one." George F. Will captured this point precisely in his eulogy for our friend when he said:

> Because he was magnificently uninterested in the cosmetics of politics, dull persons considered him unexciting. But discerning persons by the millions recognized that his kind of character is as exciting as it is rare. Persons who, under the pressure of fashion, are as flexible as fly rods found Jackson incomprehensible. They came to the absurd conclusion that he had departed from the liberal tradition.
>
> He was a pioneer of environmentalism. He was the prominent champion of civil rights. He fought for the full domestic agenda and authored legislation that put teeth into U.S. pronouncements on behalf of Jews and others persecuted by the Soviet regime. And if Jackson's proposals for substantial force reductions had been adopted, we might have had arms limitation agreements that actually limit arms.
>
> The ironic truth is that Jackson was one of those persons—Felix Frankfurter was another—whose constancy was mistaken for change. He never wavered from his party's traditional belief that there is no incompatibility between government with a caring face at home and government with a stern face toward adversaries.

SCOOP JACKSON was all of this, but so much more. It is all the more striking, that he considered none of this the accomplishment for which he was most proud. In those special and private moments, SCOOP would reflect on the 1960 campaign and talk of his considerable role. It had been expected he would be John F. Kennedy's running mate, but when Lyndon B. Johnson agreed to accept the nomination, SCOOP cheerfully stepped aside, took on the job of party chairman, and campaigned with all of his great heart.

A Presbyterian, and a 32d degree Mason, he was as proud of his role in electing the Nation's first Roman Catholic President as anything he had ever done.

President Kennedy, I dare to say somehow knew this. The third item in the public papers of John F. Kennedy, following the inaugural address and the greetings to the Soviet leadership, is a transcript of remarks at the meeting of the Democratic National Committee on January 21, 1961. At this meeting, Senator JACKSON stepped down as chairman and his friend and colleague, the new President, recounted this and thanked him for it. The President ended, saying:

> So I hope we will all stand up and give a good cheer to Scoop Jackson.

So, too, I hope will this Senate, which SCOOP loved as a home, second only to his Everett. His is a life to celebrate, even as we mourn, and as we give the good cheer in our hearts, may the echo linger.

Mr. President, Helen Jackson, herself a person of rare spirit and grace, asked me to speak at the funeral in Everett. I had not much to say, but it meant so very much to be asked. I would like to share with my colleagues

who could not be present the words I spoke that day and the eulogy I delivered at the National Presbyterian Church here in Washington, D.C., the night before. My wife Elizabeth and I will find life different and difficult without him.

I ask unanimous consent that these remarks be included at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EULOGY FOR SENATOR HENRY M. JACKSON BY SENATOR DANIEL PATRICK MOYNIHAN AT THE NATIONAL PRESBYTERIAN CHURCH, WASHINGTON, D.C.

There is an old belief in the Judaic tradition that at any moment in history goodness in the world is preserved by the deeds of 36 just men who do not know that this is the role the Lord has given them. It is a thought to which one has returned these last days. For if it be so, and of course in the large sense it is so, Henry M. Jackson was one of those men. There could be no more telling evidence than that this would never have occurred to him.

He lived in the worst of time, the age of the totalitarian state. It fell to him to tell this to his own people, and to the world, and he did so full well knowing that there is a cost for such truthtelling.

But he was a Viking also; and knew the joy of battle. Of all things human, the only emotion he never knew was fear, the only weakness he could never comprehend was the love of ease.

He wanted his country strong because he knew the terrible danger of the age in which we live. Where others lurch from one issue to another with the attention span of a five-year-old, he sustained this understanding and this vision through five of the most awful decades in the history of mankind. He came onto the national scene at the time of Pearl Harbor and the end of American isolation, although—not then, not now, not ever perhaps—the end of American innocence. He lived until last Thursday; in his last public act shaking his fist at what he called the "barbarous" behavior of the greatest, for now, of the totalitarian powers.

As no man in his time, he understood the need for strength and also the sources of strength.

He wanted a just society; and because of him, the one he leaves behind is far more so than the one into which he was born. He wanted an American example as well as an American presence in the world, and to the extent this is so, much also is owed him.

He was a teacher almost before anything else. The purpose of Congressional enquiry, he wrote some two decades ago, was above all, an "educational one." "As long as we govern with the democratic system," he said, "the test of government is its acceptance by the people." For the people cannot intelligently choose where they do not understand, and in his view, the first thing all of us, Senators not least, need to understand is the complexity of things. "If every event had the clarity of Pearl Harbor," he continued, "policy-making would be much easier than it is. But as the citizens of Troy also discovered, appearances may be deceiving."

He paid a price for not insisting that things were simple. But he knew this. The American people have paid a price for not entirely wishing to hear him. But he forgave all.

And why not? It was a life of true greatness. In one of his books he quotes Robert Lovett saying:

"We can do whatever we have to do in order to survive and to meet any form of economic and political competition we are likely to face. All this we can do with one proviso: we must be willing to do our best."

For longer than any man of his age, he did just that. A great heart has died, but we are larger because he lived. All he would ask is that as we think now of all he did, we have in mind things yet to be done.

EULOGY FOR SENATOR HENRY M. JACKSON BY SENATOR DANIEL PATRICK MOYNIHAN AT THE FIRST PRESBYTERIAN CHURCH, EVERETT, WASH.

The poet Yeats wrote once of a man who was "blessed and had the power to bless." Henry Jackson was such a person.

To know him and to love him, as generations of men and women in American public life have done, is to have been touched by that abounding grace which he brought to the affairs of the Republic. He never took, he only gave; and he never stopped giving.

His was a Viking heart, a questing soul, yet gentle, gallant, generous. This too, he could impart. To know him was to be changed by him.

He lived in the worst of times; the age that saw the ideas and institutions of freedom challenged throughout the world, and displaced in much of it by the totalitarian state. For on to half a century, it fell to Henry Jackson to tell this to his people, and to the world. He knew well enough that this was not always welcome news. The more then did he know that it was we who would have to impart it, for the Lord had given him the strength.

To Helen, to Anna Marie, to Peter, wishing in no way to intrude, we would even so say that, as we shared your love of him, we share your loss.

And yet, now it is over; it is a life to celebrate as much as a death to mourn.

The third item in the Public Papers of John F. Kennedy, after the Inaugural Address, after the greetings to the Soviet leadership, is a transcript of remarks at the meeting of the Democratic National Committee on January 21, 1961. At this meeting, Senator Jackson stepped down as chairman of his Party, a post he had assumed in order to run the campaign and win the election for his friend and colleague, who now, as President, recounted this and thanked him and ended saying:

"So I hope we will all stand up and give a good cheer to Scoop Jackson."

Let us do that in our hearts; and may the echo linger.

Mr. GOLDWATER. Mr. President, today we are trying to honor the memory of our dear friend, SCOOP JACKSON of Washington. And I know that each of us has tried to put into words the feeling that rest in our hearts.

In my case, and I suspect in the case of many others, it is a feeling of futility when I try to say what SCOOP meant, not just to our country but to me, as a man and as a friend.

He and I came to the Senate at the same time and we were the last two of that class. In all of those years, almost 30, I had occasion to know him probably as well as anybody in the Chamber although, it was never a social friendship as much as it was a working friendship. We served on several committees together including the Interior Committee at one time, the Armed Services Committee for many, many years and the Intelligence Committee for several years. He and I have traveled, at different times, to parts of this world probably that no other Members of the Congress have visited. He gained a knowledge of the philosophy of communism and communism as it is practiced in the countries around this world that has destroyed the freedom of men and, he was never afraid to speak out to explain the terrible truth of this philosophy. He was never one to show any fear when it came to defending our country and our need to be strong. The words that he passed to us on the Armed Services Committee were always respected, and respected highly, because of the knowledge that was behind those words.

It is impossible for me to express completely the feelings I had for SCOOP. It is also impossible for me to relate completely what a great contribution his life was to our country and, indeed, to the people of the world. If we had more SCOOP JACKSONS scattered around, living in this world would be much safer and freer.

My heartfelt sympathy goes out to the family and, my thanks to the Lord above for having shared him with us for these many years.

Mrs. KASSEBAUM. Mr. President, I join my colleagues in a special tribute to Senate HENRY JACKSON. I can add little to what has already been said. In fact, none of our words can add much to the unique memorial that SCOOP JACKSON built for himself through his life, his work, and his service to the people of this Nation.

To find a true measure of his contributions, we must look not to words but to the life and spirit of the Nation. In his lifetime, and particularly during his years in the Senate, America rose to the status of world superpower and undisputed leader of what is properly called the free world. No one was more ardent than SCOOP JACKSON in protection of freedom around the world.

In those years, America moved steadily, if slowly at times, toward the founding promise of equality for all persons. Our economy flourished with a prosperity that lifted up millions of families. We became a nation that was committed to dignity for the elderly in retirement and to hope for the young in education and training for their future. We came, too, to an appreciation of the natural wealth of the Nation and the need to protect it from human excesses.

In short, we became a better nation. Not perfect by any means, but better. We became more sensitive to the

needs of individuals, to the power of Government for good or ill and to the interlocking relationships of the modern world.

In all of these changes, both subtle and sudden, there is the imprint of SCOOP JACKSON. But he would never want to be relegated to legend and folk mythology. He was no more saintly or perfect than the Nation and the people he loved. He knew that and it never worried him.

Perhaps that is the most powerful legacy that he leaves to us. He sought to serve, rather than to be served. He was an extraordinary public servant who never placed himself above those he served. I treasure the opportunity and privilege of having worked with him.

Dedicated and devoted, concise and conscientious, SCOOP JACKSON was a leader in every sense of the word. Never patronizing nor condescending, his leadership for the State of Washington and for the Nation was a straightforward commitment to both the principles and the people of America.

Mr. QUAYLE. Mr. President, I join with my colleagues in mourning the untimely death of Senator JACKSON. The loss of any colleague is bound to be an occasion for sadness. But when a fellow Senator of the stature of the Senator from Washington is taken from the scene, to that sadness is added an immense sense of loss.

As a member of the Committee on Armed Services, I had the pleasure of working with and learning from Senator JACKSON. And there was much to be learned. From his wealth of experience and wisdom he provided philosophical insights and political judgments that always kept the security of our Nation first and foremost.

When one considers the issue of arms control with which he was so closely associated, the contributions made by Senator JACKSON over the years loom like a giant oak in a field. And like a giant oak that has been felled, his absence from the arms control scene will most certainly be noticed. He leaves a void of experience and wise counsel that can never be filled.

As we mourn his passing, it is well that we recall his many achievements and ponder the various legacies he has left to us. Any review of his record on national security issues reveals a consistency of support for the security of this Nation that was never fazed by the antimilitary fads of post-Korea in the 1950's, Vietnam in the 1960's, détente in the 1970's, and the nuclear freeze today. His course was steady throughout, and his voice and vote equally steady.

Mr. President, that constancy of purpose is one legacy from the Senator from Washington we ought to cherish and emulate. I am confident he would want it so. To do less would diminish the immense contributions Senator JACKSON has made to this country throughout his illustrious career of public service.

Mr. HATCH. Mr. President, with the passing last week of Senator HENRY JACKSON, this Nation has lost one of its true patriots. A man who devoted his entire life to his country with a selflessness rarely seen. He will live on through the acts of goodness he has performed and in the hearts of those who cherish his memory.

We, in the Senate, from all parts of the political spectrum have praised Senator JACKSON since his death. To properly honor our late friend and colleague, we must rededicate ourselves to the strengthening of the defense of the United States. We must continue the fight that SCOOP had fought through his illustrious career.

The cold reality of the day is that deterrence of Soviet aggression is no longer assured. As I have heard SCOOP say time and time again, the Soviets are continuing to move farther ahead of the United States in every static and dynamic indicator of the strategic balance, and in every measure of relative strength in the critical areas of Central Europe, the Western Pacific, the Middle East and South Asia. Unless the adverse military trends of past years are reversed, and action taken to establish credible U.S. military presence in these regions, Soviet adventurism should be expected to increase, further impacting on vital United States and Western interests. SCOOP often perceived the future in terms of the past. Never in history has it happended that a nation achieved superiority in all significant weapons categories without seeking to translate it at some point into foreign policy benefit.

SCOOP is a personal friend. On a number of occasions he gave me personal advice on how to be a better Senator and how to serve my constituents better. He went out of his way for me. In the process, I gained inestimable respect and friendship for him. SCOOP was not only a giant in the Senate he was a true friend. There are so few people who rise to the highest levels of esteem among their colleagues. SCOOP accomplished this. I will miss him. My deepest and heartfelt sympathy are with his surviving wife and children.

It has been an honor to have served with SCOOP. I would like to offer the following prayer in memory of Senator HENRY "SCOOP" JACKSON:

A PRAYER FOR OUR COUNTRY

Grant us peace, Thy most precious gift, O Thou eternal source of peace. Bless our country that it may ever be a stronghold of peace and its advocate in the council of nations. May contentment reign within its borders, health and happiness within its homes. Strengthen the bonds of friendship and fellowship among the inhabitants of all lands. Plant virtue in every soul and may the love of Thy name hallow every heart. Praised be Thou, O Lord, giver of peace.

Mr. WEICKER. Mr. President, it was my extreme privilege to serve with Senator HENRY JACKSON during 13 of his 31 years in the Senate. And I can say from personal experience that a man more dedicated to public service never entered these doors.

Looking back over the course of his life, people marvel that the same SCOOP JACKSON who upbraided Joseph McCarthy and company for their red-baiting tactics also came down harder on the Soviet Union than most Members of this body, particularly where its emigration policies were concerned. But really, when you think about it, in both cases the same principle was at stake, that of individual liberty versus unreasoning official persecution. Principles were what SCOOP JACKSON paid allegiance to, not labels. At various times and on various issues, he was called a hawk, a liberal, a conservative, and a Communist. He refused to be hemmed in by any such characterization. "I don't worry about ideologies," he said.

What Senator JACKSON did worry about was striking a balance between all extremes, a balance that served the best interests of all Americans, and not just a special interest or two. When I came to the Energy and Natural Resources Committee in 1977, he had been its chairman for 15 years. He never ceased his search for the correct balance between conservation and development of our natural resources. He spearheaded the National Environmental Protection Act and when the 96th Congress came to be known as the energy Congress, it did so largely because of his leadership. He had a major hand in fashioning every bit of energy legislation now on the books. His hard work and devotion have benefited us all.

There are many more adjectives and anecdotes that could be used in a tribute to SCOOP JACKSON. But the surest testament to a man's greatness is the vacuum left by his passing. In SCOOP's case, that vacuum is felt not just by his family, to whom I extend my deep regrets, but also by his colleagues, his constituents, and the country as a whole. It will not soon be filled.

Mr. ANDREWS. Mr. President, for over 40 years, Senator HENRY M. JACKSON represented the citizens of Washington State in the House and Senate of the United States. However, his ability and stature were such that he was a national Senator in the truest sense of the word.

As far as I am concerned, SCOOP JACKSON represented all of America. He stood for the things that most of

us want from our elected Representatives: purpose, honesty, integrity, as well as social compassion, conservation of our natural resources, and a realistic view of our foreign policy and national defense obligations.

In addition, he was a consummate legislator, with an outstanding comprehension of the intricate workings of our National Government. He knew how to enact legislation and had a deep understanding of the major issues that come before this body.

While serving for many years as a Member of the House of Representatives, I was familiar with Senator JACKSON, and during the time I have been in the Senate, I have had the opportunity to know him well. He was a great Senator; one of the giants of the latter part of the 20th century. His loss diminishes this body, as well as our Nation. Therefore, I believe the best we can do is strive to emulate the tradition and memory he leaves us, of excellence in public service.

Mr. EAGLETON. Mr. President, SCOOP JACKSON had a long career in the Senate and, thus, one could give a long speech extolling his remarkable skills. But volumes of words really cannot add to a public record that speaks eloquently for itself.

I have served in the Senate for almost 15 years. Within that period of time and, hence, from my own experience, SCOOP JACKSON was most certainly the single most effective Member of the Senate. Whatever cause he espoused became a cause with which to reckon. When SCOOP JACKSON spoke, the Senate listened. When SCOOP JACKSON was for a particular amendment, that amendment took on added significance.

No one else in the Senate had his energy, his dedication, his sagacity, his prestige.

The dictionary defines the word "unique" as "being without a like or equal." That was SCOOP JACKSON.

Mr. ABDNOR. Mr. President, three characteristics stand out particularly in my memories of Senator HENRY JACKSON.

First of all, you always knew where he was coming from. He was straightforward in his dealings, never saying one thing to your face and another behind your back.

Second, he always took the time to talk, to learn, to consider the issues.

Third, if he agreed with you on a goal, he spared no effort to help you reach that goal.

These are characteristics I prize in any association; characteristics I have tried to follow throughout my life.

I will never forget the fact that the day I was sworn into the Senate, HENRY and Helen JACKSON took time from their busy schedule and stopped by my reception to wish me well. I am sure they had many many places to go, but they made time for a new Republican Senator from South Dakota.

SCOOP JACKSON and I agreed on many issues; we disagreed on others. But SCOOP JACKSON never hedged and you knew that before he made a judgment—even if you disagreed with that judgment—he had done his best to acquire all the facts. He always heard you out and rightly expected to receive the same consideration.

If he agreed with you on a goal, it did not matter if you were a Republican or a Democrat, he pledged headlong into helping you reach that goal. HENRY JACKSON helped me on any number of occasions with the same industry and enthusiasm he would muster for colleagues on his side of the aisle. It was the good of the country which remained uppermost of his goals, as it should be for all of us.

The Senate is diminished by the death of HENRY JACKSON, but he left all of us with a legacy of integrity, honor, industry, good will, and purpose which—if emulated—will make all of us better Senators.

We all will miss him, and the best tribute we can pay him is to follow his inspiring example.

Mr. PROXMIRE. Mr. President, it can be said of few Senators that their passing left a void that could not be filled. But it is no exaggeration to make that statement about my friend SCOOP JACKSON. He was just not another Senator, he was primus inter pares, first among equals in the Senate.

How do you measure the loss of one man? Consider what would not have happened without SCOOP JACKSON in the Senate. How much longer would the witch-hunting days of Joe McCarthy have gone on without SCOOP JACKSON's role in the Army-McCarthy hearings? How many more years would it have taken to achieve passage of the National Environmental Policy Act of 1969? Would we have an Environmental Protection Agency today?

Measured in human terms, there are hundreds of thousands of former Soviet Jews now residing around the world thanks to the efforts of Senator JACKSON and his 1974 Jackson-Vanik amendment to the trade bill. The Indian Education Act, the Alaskan Native Claims Act, the North Cascades and Redwood Park bills, all were products of his commitment to public service.

These achievements aside, we can only speculate about what future events would have been changed because of the prestige and wisdom SCOOP brought to the Senate. Perhaps that is our greatest loss—not having him here when we face the next international crisis, the next domestic problem area—that is when we will really miss him.

The Nation has too few individuals of SCOOP JACKSON's integrity and leadership that we can afford their loss. Too few. And new replacements are not born every year or every decade. That rare combination of good sense, legislative brilliance, and personal commitment is not found in normal circumstances.

In the 26 years I have served in the Senate I know of no Senator whom I respected more than SCOOP JACKSON. No one could disagree more vigorously or effectively than SCOOP without being disagreeable. I know that from longstanding personal experience. For 15 years I waged battle with SCOOP over the supersonic transport plane which he championed and I strongly opposed. Yet not once did I ever find that his commitment to the SST ever influenced our personal working relationship.

While we may have disagreed on issues such as the funding for certain military weapons, SCOOP was always fair, friendly, and straightforward. And when he was on your side you knew you had an ally as strong and influential as could be found. We all wanted SCOOP on our side in a fight.

It is impossible to say how history will treat any man or woman. But I suspect that there is more than a little room in the history books for HENRY JACKSON. A generation of Democrats call themselves Jackson Democrats patterned after his staunch commitment to our national defense and his equally strong vision of human rights, environmental protection, energy, labor, and consumer affairs. He had a distinct view of the world based on the belief that democracy must be defended vigilantly at home and abroad. That is why he was the champion of civil rights causes, of the labor movement, of the consumer and the environment. That is why he fought so tirelessly for preserving the rights of individuals against more powerful economic interests.

And perhaps that is why he felt so strongly about preserving the power and influence of the United States abroad—to guarantee that the average citizen here in the United States would continue to have the basic freedoms so often found wanting in other countries.

His was a constant commitment to the basic values of our society, the tenants of democracy, the protection of law, rights of the individual, and the old-fashioned American sense of fair play.

All Americans and those of us in the Senate could pay no higher tribute to SCOOP JACKSON than to adhere to his concept of how democracy works.

Mr. LAUTENBERG. Mr. President, it is difficult for all of us today to accept that our beloved friend and colleague, SCOOP JACKSON, will not be back amongst us again. I served with SCOOP for only a short time in the

Senate, but I knew him as a friend of many years.

I organized a function in New Jersey in 1970 on behalf of his senatorial campaign and was astounded at how many people felt a kinship with him and wanted to be of help. Among those who wanted to be included that night were the Panovs, internationally famous ballet dancers, who felt SCOOP JACKSON was the person most responsible for their freedom from the Soviet Union. Isaac Stern, world-renowned violinist, insisted on being there to honor SCOOP as well. This exceptional leader with his great human qualities, was respected and admired by all who came in contact with him.

He and I shared many common interests: Human rights for all oppressed people; emigration for the Jews of the Soviet Union; the security for Israel; and our party's credo to promote individual opportunity and ease the way for the disadvantaged. We worked together to address some of these issues.

When I came to the Senate at the beginning of this year, Mr. President, I instinctively looked to SCOOP JACKSON for advice and guidance. His response was immediate, his counsel wise, and his judgment correct as I look back over his recommendations. My respect for him as a private citizen and friend took on new dimensions when I joined him as a colleague. To me, he represented the ideal of the Senate. Mr. President, our Nation is immensely poorer for the loss of this great Senator and his absence here is marked as this fall session gets underway. There is a gloom and sadness that permeates these Halls. His long tenure provided continuity, perspective, and direction essential in the development of a complex society in a rapidly changing environment. His political wisdom over many years enabled him to influence the laws and policies so essential to our lives today. His contribution in the fields of energy, natural resources, environment, foreign policy, defense, matched perfectly his concern for the individual, civil rights, civil liberties, criminal justice, and programs to help all people strive toward newer horizons.

I express my profound sympathies to Helen, his devoted wife, and their two children, Ann Marie and Peter. I will remember always with pride that he was one of us, a great Senator, but more a great American and great human being. His example will serve as a permanent reminder to all of the standards of public service to which we must aspire.

Mr. GRASSLEY. Mr. President, Martin Luther once suggested that our spiritual mettle is truly tested in those situations brimming with controversy; those situations when the "crowd" is running like a herd away from their responsibilities. HENRY "SCOOP" JACKSON was not one to run away from difficult choices.

I was traveling when I heard the news of SCOOP's untimely passing. Typically, the first reports were sketchy and the slow construction of the story prolonged those first gnawing feelings of personal sadness and shock. Gradually I came to feel the full force of the loss of SCOOP JACKSON. He will be greatly missed in this body because of his skills as a legislator; skills tempered over 42 years in service to the U.S. Congress, 30 of those years being spent in the U.S. Senate. SCOOP JACKSON will also be missed because he carried with him a distinct "presence" which brought smiles to the faces of visiting children and urged laughter in the midst of all this seriousness that we often create in this city. How many times have we witnessed SCOOP's great ability to relax a harried tourist in the Halls of the Senate? We will cherish those moments when he ordered, so to speak, a vacationer to join him on a "Senators Only" elevator or subway. What delightful surprise he often created.

Think for a moment about the trust SCOOP has left us. What was the motivation that energized him? What gave him the fearlessness to speak out against totalitarianism? Why would SCOOP JACKSON consistently call us back to realism regarding the Soviet Union? What principle supports the Jackson-Vanik amendment, which prohibited most-favored-nation status for countries that restrict emigration? SCOOP JACKSON was a dynamic spokesman for realism in defense and foreign affairs, not because he was coldly bellicose and insensitive to the delicate tensions of the world situation. Far from it. He valued principled action in this body because he possessed a profound regard for human rights in the international community.

When we contemplate the work of HENRY "SCOOP" JACKSON in the future each of us will remember favorite traits: his wit, charm, intelligence, and perserverence. Others outside this body will doubtless recall his service to the Nation, his principled stands on issues, and his sensitivity to those with whom he disagreed. Beyond those memories stands one special trait for which SCOOP will be remembered by a very special group of people. He will always be remembered as a tireless and fearless advocate for dissidents in the Soviet bloc. There are people in the West today, emigrants who suffered great cruelties behind the Iron Curtain, whose exodus can be tracted to the energies of HENRY "SCOOP" JACKSON. "No greater love has any man than to lay down his life for another." For decades SCOOP JACKSON laid down his energies, his talents, his time, his health, and his hope for a group of people which was dispossessed. Their lives are our trust.

Mr. BURDICK. Mr. President, Senator JACKSON was a good friend of mine for over 24 years. I met him for the first time at my predecessor's funeral, Senator Langer, in 1959. That was the beginning of a long and close working relationship that lasted until the time of his death.

I served with Senator JACKSON on the Senate Interior Committee for many years. There he gave his strong support for North Dakota's Garrison project. The people of my State will never forget his hard work in getting Garrison authorized. He was an effective and able legislator.

SCOOP's death is a great loss to all of us. The Nation will miss him. And, I will miss him, both on the Senate floor, and, if I may say so, in the Senate gym, where we spent more than a few pleasant hours together.

My family, my staff, and I send our heartfelt sympathy to Helen, the children, and SCOOP's family. I know that they must be very proud of the brilliant legacy he leaves behind. But, most of all, they can be proud of SCOOP JACKSON—a wonderful husband, a good father, and a fine friend.

Mr. GARN. Mr. President, I join my colleagues today in paying tribute to one of the finest, most exemplary Members of this body.

SCOOP JACKSON was more than a colleague. He was a valued friend, a vigorous partner in the causes we shared, and a brilliant and effective opponent in those on which we differed. He was always a gentleman, a man of integrity and one of those Members of the Senate who represent what is most praiseworthy about our system of government.

Forty-four years of service in the Halls of Congress placed SCOOP among the most experienced and knowledgeable Members of the Senate. His judgment was valued and his advice sought by many of us on both sides of the aisle. His death creates a great and permanent void, for he is irreplaceable.

All of us in this Chamber know the burdens of this office to which we were elected. We know the demands of dealing with issues in a sometimes cumbersome, tedious process, and we experience the weight of making decisions that affect, in a direct way, the lives of our fellow citizens, and in some cases, the lives of people throughout the world. One of the things that make all of this worthwhile and even enjoyable is the sense of collegiality we share together as participants in this great democratic process and in this body. Whatever our differences, either in style or in substance, we have a common bond that transcends partisan or philosophical differences. Some observers call it a club; others call it a clique. I consider it to be the natural result of the work we do together in

this body, and I believe it helps provide the glue that keeps us together as a governing body despite the occasionally intense disputes we might have over given issues. SCOOP JACKSON was one who best represented that spirit of comraderie and collegiality, and has contributed to the legacy of the Senate in a real and very personal way because of that. We have lost one of our own. We experience a sense of loss that perhaps only we can fully understand. And we are uniquely saddened, in that sense, by his absence from our midst.

For the past 2 years I have had the added opportunity of serving with SCOOP as a member of the Board of Regents of the Smithsonian Institution. In that capacity, we worked closely on a number of issues dealing with the Smithsonian's role as the curator of the Nation's heritage. I saw, through that association with SCOOP beyond the Senate steps, further evidence of his tireless commitment to public service and constant willingness to give his time and energies unselfishly in the public interest. History will judge SCOOP JACKSON to be among the giants of statesmanship, and a man who affected in a positive way the lives of every person he touched. I will miss him greatly and extend again my sympathies to his wife, Helen, and their two children.

Mrs. HAWKINS. Mr. President, I mourn the passing of a fine and noble man, Senator HENRY M. JACKSON. At no other time in this country have we been in such a great need of HENRY'S unique combination of qualities that made him such a successful and influential Senator and popular man, as well as "Father of the Year." HENRY "SCOOP" JACKSON was tough on issues that needed a strong hand, such as foreign policy and national security, but remained sympathetic and understanding on sensitive domestic matters.

Senator JACKSON was a great man, in part because he had the courage to cross party and ideological lines to do what he felt was right. He was tremendously popular, especially with his Washington constituents, and served in Congress more than 42 years, including 30 in the Senate. Whether you remember him as a staunch supporter of a strong national defense policy, when it was not popular, or the author of the Environmental Protection Act, you will remember him as a man of deep and firm conviction and passionate loyalty to protecting his country.

Mr. President, like the ancient philosopher, we here in the Senate always have our lanterns out, searching for an honest man. Well, we found one in Senator JACKSON, and when we lost him, we lost one of the brightest lights our country has ever seen. I and all my colleagues will miss him in this Chamber.

IN MEMORY OF SENATOR HENRY "SCOOP" JACKSON

Mr. ROTH. Mr. President, it is with great sadness and a deep sense of respect and honor that I rise to memorialize the senior Senator from Washington, the Honorable HENRY M. JACKSON. SCOOP was a dominant figure on the national landscape and a leading statesman in world affairs, who served his beloved home State for almost 45 years. Through all his years in Congress, first in the House, then in the Senate, SCOOP was firm in his views—a social liberal on most domestic issues, an uncompromising adversary of the Soviet Union on many foreign policy issues, a great friend of Israel, and a man who viewed the protection of our Nation's values through a strong defense as critically important.

Senator JACKSON was not a man to seek recognition for his work and if he were here today, I am certain that he would have preferred to have his record speak for itself. It is well that we remind ourselves, however, of the great accomplishments and above all of the commitment of SCOOP to public service. I have rarely seen, in my years in Congress, such a genuine outpouring of sadness and respect expressed by so many at the passing of a well-known public official as I have in the case of HENRY M. JACKSON.

Mr. President, SCOOP had so many talents and was such a respected figure in the Senate that it would be easy to talk at length about his accomplishments. You could run a minifilibuster just listing SCOOP'S interests and the high points of his public career. As chairman of the Committee on Governmental Affairs, however, I would like to take just a moment to highlight some of the important roles Senator JACKSON had as a member of my committee.

SCOOP was appointed to the Government Operations Committee, the predecessor to the Governmental Affairs Committee, on January 13, 1953. He was assigned to Senator Joseph P. McCarthy's Permanent Investigations Subcommittee. SCOOP was an active participant in the hearings the subcommittee held on Communist subversion of Government officials. Eventually he began to question the far-reaching allegations of Communist influence in the State Department and the Armed Forces. His methodical questioning helped lead to the eventual ending of the McCarthy hearings.

Senator JACKSON was an active participant in the Governmental Affairs Committee's hearings and legislative activities over the years. He was vitally interested in national defense matters and his efforts, in large measure, prompted the creation of the National Security Staffing and Operations Subcommittee in 1962. The subcommittee, under Senator JACKSON'S leadership, conducted one of the most comprehensive series of oversight hearings ever held on the national security operations of the U.S. Government. In later years, this subcommittee investigated and reported to the Senate on numerous national security and defense matters including the Atlantic Alliance, the Warsaw Pact and its role in Soviet bloc affairs, and staffing problems in the U.S. State Department. In all of these matters, SCOOP'S leadership was evident.

Senator JACKSON was always interested in the Government reorganization proposals which came before the Governmental Affairs Committee. He was actively involved in the efforts to create a Department of Transportation in the mid-1960's and took a leadership role in developing several compromises which led to the enactment of legislation to create the new department. He was one of the Members who fought hard to insure that the National Transportation Safety Board would be an independent part of the Department so it would be free to conduct unbiased investigations of safety violations and air and rail crashes. His expertise contributed substantially to the passage of the Energy Reorganization Act in 1977 and his interest in energy matters continued on the committee in its reviews of nuclear proliferation problems and energy shortages.

While he was always interested and involved in the work of our committee, he seldom made his views known in a flashy or pretentious way. He was so respected that he was able to help develop compromises which insured the passage of important legislation. Members on both sides of the aisle depended on him for advice and listened with respect to his views.

Mr. President, I think I can speak for the entire committee when I say that we will sorely miss SCOOP JACKSON as a Member not only of the Senate but also of the Governmental Affairs Committee. Committees are truly the workhorses of the Senate and his devotion to our committee and his long service have added immeasurably to its ability to fulfill the oversight and legislative duties entrusted to it. The importance of the Senate to the character of our Republic has been built upon traditions formed by countless Senators over the decades. In his almost 45 years, SCOOP has had a big part in forming those traditions. My sincerest condolences go out to his wife, Helen, and his two children, Anna Marie and Peter.

Mr. PELL. Mr. President, the sudden death of our friend, Senator HENRY M. JACKSON, has removed one of this Nation's strongest and most effective voices for freedom and compassionate government. I had the privilege of serving with Senator JACKSON for nearly 23 of his 30 years in the Senate,

and knew him as a man of boundless imagination and energy, strong principle, and great vision for the future of his country. Within the Senate, he had earned the respect and admiration of all who served with him, and was truly one of the Senate's greatest internal leaders. The Senate as an institution cannot replace a man such as Senator JACKSON, and I know that all who serve here now will keenly feel his loss for years to come.

We were friends, too, before either he or I were Senators as we used to play touch football with the Kennedy brothers at Volta Place, Georgetown.

Senator JACKSON was best known for his advocacy of a strong American defense policy. While he and I sometimes differed on the most effective means of achieving this goal, there was no doubt in my mind that SCOOP JACKSON was singularly knowledgeable on defense issues, and his towering mastery of this area was borne out time and time again during the Senate's consideration of defense bills. Clearly Senator JACKSON favored a strong America, but his vision was one that emphasized the strength of our people and of our economy as much as our military strength. Few national leaders over the past 30 years understood as well as Senator JACKSON that a nation adequately armed, with full employment, and a healthy, well-educated people is best able to withstand the challenges from outside.

Senator JACKSON's legislative legacy clearly reflects his vision of a strong America. As chairman of the Senate Interior Committee during the 1970's, he developed what was really the first environmental agenda for the country. He was the main force behind the 1969 National Environmental Policy Act, one of the first symbols of the Government's awareness of the need for environmental protection. He used his powerful chairmanship to work for legislation regulating land use and strip mining, and creating parks and wilderness areas. Much of the progress that has taken place in the environmental field can be directly attributable to SCOOP JACKSON's personal involvement with key legislation coming out of his Interior Committee.

National energy policy is another major area which required strong leadership and vision over the past decade, and Senator JACKSON was a driving force behind congressional policy in this area. As a 30-year member of the Joint Atomic Energy Committee and later as a ranking Democrat on the Energy and Natural Resources Committee, SCOOP JACKSON was a principal figure in the emergence of a national energy policy as well as the architect of major legislation in this area.

SCOOP JACKSON was also a great friend of the working men and women in this country. He, himself, worked for his education and for his hard-won place in Washington State politics, and the people of his State perceived that he had remained close to their needs and values. That humility and interest in other people helped account for the fact that SCOOP JACKSON became the greatest votegetter in his State. Over the course of 12 congressional elections, 6 for the House and 6 more for the Senate, he failed to win at least 55 percent of the vote on just one occasion.

The loss of his 30 years of experience in this body is a great blow to the people of Washington, and one that affects me deeply. From the time I came here in 1961, SCOOP JACKSON offered his counsel and warm friendship. We joined forces on many legislative measures of great importance, and always his leadership and advice were irreplaceable. My wife Nuala joins me in extending our most heartfelt condolences to his widow, Helen, and to his children, Anna Marie and Peter. I know that they will find solace in this time of immeasurable grief from all that HENRY JACKSON did for his country.

Mr. STEVENS. Mr. President, the United States and the world has lost a friend with the death of Senator SCOOP JACKSON. His was the voice of reason and leadership in the area of foreign policy and international relations. Throughout his career, Senator JACKSON strived to know the facts and thoroughly understand the world situation. Over the years he provided a steady, wise leadership in foreign policy for Democrats and Republicans alike. In addition, throughout his career, SCOOP earned international respect and affection.

One of the outstanding qualities of SCOOP JACKSON was his foresight and openmindedness. This was his fourth official visit to China to talk to the top Chinese leadership in Beijing. On Saturday, August 27, 1983, Senator JACKSON held what was to be his last press conference on foreign soil. From the U.S. Embassy in Beijing, China, SCOOP left us with his impressions of his last visit to China.

I recommend to my colleagues that they read carefully, Senator JACKSON's main findings from his visit. Therefore, I ask unanimous consent that the text of the press conference held by Senator JACKSON in Beijing be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PRESS CONFERENCE: SENATOR HENRY M. JACKSON—SATURDAY, AUGUST 27, 1983, U.S. EMBASSY, BEIJING, CHINA

Senator JACKSON: I have had over twenty hours of discussion with Chinese leaders in Beijing and the Northeast. I have visited several communes, factories, including the large Daqing complex in the Northeast. This is my fourth trip; 1974, 1978, and 1979.

I brought with me on this visit a special letter from President Reagan to Chairman Deng Xiaoping which conveys the importance which the President attaches to Sino-American relations.

Here are my five major impressions from this two-week visit:

My major finding is that both sides must intensify their consultations, both on matters of common strategic concern and at the bilateral level as well. A good deal of misunderstanding exists on both sides at present and both sides could pay more attention to the rhetoric about each other. The opportunity is now present to expand our relations. I believe we have weathered a very difficult period, but to seize the opportunities before us requires much more frequent discussions on such issues as arms reductions, the strategic triangle, NATO, the Middle East, Africa, and Southeast Asia and Taiwan.

A second observation: the underlying factors which brought our two countries together remain in place. We have an interest in a strong secure independent China which contributes to the peace of the Asia-Pacific region. China now plays an important role in maintaining a global balance of power. China retains an interest in expanding Sino-American relations as a counterbalance against the Soviet Union and as a source of technology.

A third observation: the Taiwan issue continues to complicate our relations with China. The leaders of the People's Republic attach great importance to the reunification of China and their feelings on this issue, in my judgment, should not be underestimated. It is important that both sides fully implement the August 17 communiqué.

Fourth comment: I am impressed by the internal changes in China over the past four years. The policies of Chairman Deng and his associates are having a dramatic effect on the economy and I sense an increasing openness to the outside world.

A final observation: our bilateral relations are at an important stage. President Reagan has made several major decisions to improve relations with China and he is now committed to a one-China policy. The visits of Secretary Weinberger and Foreign Minister Wu, if well planned, can advance our common interests. That concludes my statement. Questions?

QUESTION. In addition to the arms sales to Taiwan issue, what other issues did Minister Deng mention are thorns in our relationship?

Senator JACKSON. I believe that the two major immediate issues are indeed Taiwan and the question of the details on technology transfer. As you know, they are yet to be worked out in depth. However, we have made that strategic decision of going from P to V, meaning that the People's Republic is now in the friendly category as contrasted with the previous rules and regulations. There are other issues, but those are the two big ones as I see it.

I was especially pleased with the Chairman's view of the world and I think—as it relates to the strategic side—I have not detected any change since I talked with him in 1979 on those fundamental points that relate to the strategic balance.

QUESTION. You said in your statement that President Reagan is now committed to a one-China policy. What specifically made you say that?

Senator JACKSON. I was very disturbed when the new administration came to office. I was concerned because the President had made certain statements during the course of the 1980 election. We know, historically speaking, that when Presidents assume au-

thority they have an unusual ability to adjust to reality. I should say that the President has come a long way and I have made this clear to the leaders that in my judgment the President is committed to a one-China policy.

I have talked with Chairman Deng about the letter, which I regret cannot be made public, at least at this time. It expresses a feeling of warmth toward China that the new China News Agency referred to as being pleasing. But the President and his Secretaries of State and Defense are now in agreement, I believe, on Taiwan.

Speaking personally, I want to expedite the ending of the arms sales so that we can at some point indicate when that will come, both from a quantitative and a qualitative standpoint. I want to emphasize that in my view the August 17 communiqué is a long step forward that corroborates what I have just said in terms of a change of policy toward China.

QUESTION. In your discussion about the strategic view, did the question of the Sino-Soviet talks or the forthcoming visit here by a Soviet Deputy Foreign Minister come up? How was it handled?

Senator JACKSON. I did not, or we did not get into any specific situations. But let me state in general terms what I see the current situation to be. For some time now the United States and the People's Republic have certain interests that are parallel. Those interests include a strong and independent China. They include a strong NATO. They, the government, support those two fundamental concepts. The Chinese contribution is enormous because the Soviets have a very large force along their border with China. This ties up a large force that would otherwise be deployed elsewhere in the world. On the strategic side, I see a cooperative American and Chinese adherence to the concept that is as old as time, and that's the doctrine of the balance of power. I see no change in those fundamentals.

Now, you may have problems where we disagree, Middle East, Africa to name some. And I want to emphasize, too, that I expect that there will be an ongoing expression of differences from time to time. But I want those differences to address collateral issues and not strategic issues in which the peace of the world rests in the balance.

QUESTION. Senator, the members of the House Armed Services Committee were here last week, you're here this week, are these visits in any way related to Weinberger's trip here? Do you anticipate that when he comes here there will be discussions initiated by either side about U.S. arms sales to China, either arms or military technology? Thirdly, what would be the congressional reaction to such sales?

Senator JACKSON. May I say that my visit is not related in any manner, shape or form to the Secretary of Defense visit.

I do believe that Secretary Weinberger's visit is an important one, and I believe a number of useful things can be addressed, especially some of the problems in more detail as pertaining to technology transfer, because technology transfer as you know, is a many-sided issue in which both military application and commercial application can be involved with a given transfer. But I do believe that his visit is important and I think there are opportunities for both countries to exchange ideas. But I wouldn't want to go beyond that because the Secretary will be here the latter part of September.

QUESTION. What will be the congressional reaction to a Reagan Administration initiative to start pumping a large-scale military-related technology into China?

Senator JACKSON. I don't see that happening. I think it's a "suppositious" case, an iffy case.

QUESTION. Did the question of trade come up? Sino-U.S. trade has dropped sharply in the last four or five months. Did Deng say anything about China buying more or wanting to export more to the U.S.?

Senator JACKSON. We do have an issue on the trade side dealing with wheat and corn. Namely, China is committed to purchase this year six million tons and thus far they have only purchased 2.6 million tons of wheat and corn. I am certain, or at least hopeful, that they will adhere to that agreement, and I am hopeful that they will move expeditiously to honor that agreement. Failure to do so could cause new tensions and new problems with the United States.

We are delighted, of course, and we saw evidence, that they are having bumper crops. But that means they will have more cash to buy other things—while I don't want to get parochial about my own state—maybe, airplanes. And they have a very nice balance of payment situation. I think that up until July, China has over 12 billion reserve in foreign currencies. By the end of the year, this reserve is going to be 18 billion. That reserve is not going to last indefinitely, as they inevitably must increase their purchases abroad. They are going to run deficits if they are really investing in new capital, new plant, new equipment.

QUESTION. Did you get the impression that the Chinese believe that Reagan is pursuing a one-China policy or do they still have their doubts?

Senator JACKSON. I can't answer that question adequately. I believe the people that I talked to place substantial credence in that commitment. I pointed out that I am the opposite political party to Mr. Reagan, I didn't campaign for him, my candidate lost but I made the point that a bipartisan American foreign policy is absolutely vital to an American President. I believe that President Reagan is committed to that doctrine.

I have been in Congress long enough to know that an American President cannot be effective in this troubled world unless he can elicit the support across the political aisle. That has been my position since the days of Roosevelt, Truman and on down, every American President from both political parties since the 1940's. I have made and emphasized that point with the Chinese leaders and they seemed to respond in a pleased fashion.

QUESTION. Senator, were you asked specifically what the present congressional sentiment was toward the Taiwan Relations Act?

Senator JACKSON. Well, the source of the Taiwan Relations Act is a fact that the nationalists were allies of the United States for a very long period of time, and there continues to this day a residual feeling of support for Taiwan. Americans can be contradictory, you know. On the other hand they say obviously there can only be one China and that policy was established in the Shanghai Communiqué of 1972 when Mr. Nixon was President. I think there is torn feelings about a commitment that we made a long time ago when the problem was in the minds of many a bit more simple.

My own personal judgment is that the Congress is moving realistically towards a one-China policy and that means that the two, Taiwan and China, can be reunified peaceably. The strong feelings of the Chennault era, the old China lobby, I see declining very rapidly. But the sentiment toward Taiwan is part of our, I guess, puritan ethic and that is that we made a commitment. Yet we are the only nation to my knowledge that has any kind of an ambiguous relationship—not in a juridical sense—set up in a way in which no one knows what it means. Sometimes you try and do it that way.

I think the critical thing is that Taiwan is going to exacerbate our relations until we can reach the point where there will be indeed a final resolution on the sale of arms qualitatively and quantitatively. That process is now under way and the August 17 communiqué, of which the Administration is a part, makes it very clear that there has to be an ending. As I say, we are going to have to expedite that ending and Chairman Deng's interview with Professor Yang is rather revealing and it is certainly an indication how far the People's Republic has been willing to go to reach an accord.

I believe it can be done. China is not interested in beating Taiwan and it is already beginning to become a Hong Kong any way in terms of trade with the mainland. To China this is an indication of how the market system is working.

QUESTION. Did any question of Hong Kong come up?

Senator JACKSON. No.

QUESTION. In terms of reunification?

Senator JACKSON. No, it did not.

QUESTION. What are the prospects for Premier Zhao going to the United States and the President coming to China?

Senator JACKSON. Well, I think it's very important that the Premier come to the United States after, of course, the visit of the Foreign Minister which is scheduled in October. It is my personal judgment, and I underline personal judgment, that things are improving for that visit and some time after the first of the year, hopefully, the Premier will be reciprocated by the President of the United States. It is important for our relations with one another, but I detected no hostility on that visit and on the other hand I detected an openness and a sense of warmth about what might happen from such a visit.

QUESTION. Do you think then that Premier Zhao will be going this calendar year?

Senator JACKSON. I would hope so. I think it would not be the wisest thing for the President to come over here right in the middle of an election. That's my personal opinion because then the charge will be that he's over here in order to aid his own reelection efforts, and I feel the wise course would be for the Premier to be able to visit the United States sometime in November or December. I would like to see that personally and right now I think things are moving, no decision made, but the movement is favorable.

QUESTION. Would that help the President's reelection?

Senator JACKSON. Well, my recollection of Presidential history which is not necessarily (laughter) ancient, is that you never lose votes; you have a chance of gaining votes when you are dealing especially on issues that affect the peace of the world.

The President, I would assume, and I can't speak for him obviously, would like to come to China on the one hand as we enter into arms agreement on the other with the Soviets. I think the chances of an arms agreement have improved but we have a long way to go. Several weeks ago, I emphasized that I would insist that any SS 20's taken out of Western Europe not be placed adjacent to

China because that would put China in a difficult spot. I was pleased that there is some movement in that direction on the part of Mr. Andropov's statement.

QUESTION. Did you discuss this with Mister Deng?

Senator JACKSON. I would rather not get into that area. I am not sure that the Chinese view Mr. Andropov's statement in a totally favorable light. They are interested in it but there could be some catches in it.

QUESTION. I certainly share your view about SS 20's being moved to Eastern Europe. That must have come up.

Senator JACKSON. They were very pleased with the position that I had taken before Andropov's statement. We do have interests that are parallel and an attempt to simply move the threat out of Europe and into Asia pointed at China would violate that fundamental concept of parallelism. I believe that this Administration would not be a party to that. I can only convey to you my own views and I personally will take a very strong position on it. That would upset the balance that we have so carefully crafted here between China and the United States that goes to the peace of the world.

QUESTION. Did you get a feeling from Mr. Deng or anyone else that you talked to or did they say outright that they are suspicious about whether or not for political reasons Reagan might be anxious to reach an arms control agreement?

Senator JACKSON. No. No comment on that at all by any of them. They may have their views but we didn't discuss it.

QUESTION. Did they discuss the U.S. pressure on Japan to increase its military spending?

Senator JACKSON. No. But over the years a strong and independent Japan has been part of that balance and I assume that that continues to be the policy because there has been no change in the fundamental elements of the strategic balance as viewed by the Chinese. Japan is a very important part of the balance in the Far East.

QUESTION. You think the Chinese feel that?

Senator JACKSON. Yes, I think they do. Now you get into a degree of strengthening Japan, but I think they realize that they are exposed in the Northeast and one of the conscious views that I came away with from the Northeast is that here is an area that is the industrial heartbeat of China. It is hard to believe that they produce eighty percent of all the lumber that is produced, over half of the oil that is produced. They produce a huge amount of light metals, aluminum and so on—a long list of industrial products that are vital to the security of the area. They are conscious of the history of that area, that Vladivostok until 1856 was indeed a part of China and that whole area was a part of China.

I have noted a special concern, not overtly, but when you ask probing questions. The Northeast is an area that is rich in industrial goods and raw materials that is important for the long haul.

If you don't mind I have really just about come to the end. My voice is going but I don't want to cut anyone off.

QUESTION. The Chinese have said that the latest arms sales to Taiwan violated the August communique. Did they bring up that point with you? And what do you sense is the mood in Congress, do you think they will agree to decrease arms substantially in the next few years?

Senator JACKSON. It's not my impression, at least to me, that they have said it violates the August 17 communiqué. The Chinese want to see this thing, the supplying of arms, quantitatively and qualitatively, coming to an end, and they are wondering whether that communiqué is going to be implemented fully. But they support the communiqué; and that Taiwan issue, I want to emphasize, is a pervasive issue as far as Chinese officialdom is concerned.

QUESTION. You mentioned about some hitches being involved in the Andropov statement.

Senator JACKSON. I don't want to go into the specifics on it. But I detect that the Chinese have reservations about the meaning of it. It is not one of those cure-alls for their problems with the Soviet Union by any means. I think it would be wrong to assume that this statement or the forthcoming visit by the Soviet Vice Foreign Minister are some new dramatic moves on the part of the Soviets that would change relations between the Soviet Union and China. That would be a mistaken interpretation, in my personal judgment.

QUESTION. How long did your meeting last and can you tell us anything about the Chairman's health?

Senator JACKSON. Our visit lasted about two hours and ten minutes. He has a marvelous sense of humor. I was kidding him about his smoking. He is 79 and I explained to him that I quit smoking when I was 12 and he thinks smoking is all right, if it's in the hands of the right person. My friend, Senator JESSE HELMS, might change his attitude if he learns that the great leader of China supports cigarette smoking. He ought to try to get a testimonial.

But the Chairman, from everything I can see, appears to be in good health. I'm 71 and I hope I'm in that good shape at 79. That is the only way I can answer that. I mean he is sharp and can maintain a sense of humor. I think that means longevity of service to his native country.

QUESTION. Did he suggest in any way that he would like to give up his reigning position and fully retire soon?

Senator JACKSON. I must say I detected no evidence of any desire to retire. That has been bantered around a lot. I invited him to stay at my house in Everett, Washington when he comes over and he is taking that under advisement. Thank you very much.

Mr. DECONCINI. Mr. President, it is with deep sorrow that I rise today to join with my colleagues in paying tribute to my close friend, the distinguished senior Senator from the great State of Washington, Senator HENRY M. "SCOOP" JACKSON. HENRY JACKSON has ably served his State and the Nation for nearly half a century. He was first elected to the U.S. House of Representatives in 1941, where he gained a reputation as a leader who was vitally concerned with the well-being of the public that he served. After serving the people of Washington for 11 years in the House, they elected SCOOP to the U.S. Senate where he worked effectively for the good of his State and all of the country.

The Senate has been diminished by the loss of one of its greatest Members. Senator JACKSON, through his many years here, had in a sense become the essence and the soul of the Senate.

I first met HENRY JACKSON when I was a young precinct committeeman and he was a U.S. Senator and the chairman of the National Democratic Party. I admired him then. As the years passed by and I became more nearly his equal, I got to know him much better, and I admired him even more. I got to know what a kind, considerate, effective, hard working, competent person he was, how you could always turn to him for help; and, how, because of his patience and understanding, he was always there to assist you whenever he could.

During all of these years, HENRY JACKSON had many friends in Arizona and many strong supporters—people like Chuck Ducey, who was his campaign manager in Arizona in the 1976 Presidential campaign, and Jack and Irene Sarver, who became strong supporters of his. Arizona, like other parts of the country, provided HENRY JACKSON with a legion of believers, because he was the kind of man who inspired that type of following, not only in his home State of Washington, but in diverse States like Arizona, and throughout the country.

There have been many eloquent editorials and articles written about HENRY JACKSON since his death; and I believe the intensity of those articles demonstrates how liked and admired he was by his colleagues, by the press, and by most people that he came in contact with. The better you knew him, the more you were convinced that he had the essence of greatness, the qualities that make men stand out among their peers, that make certain Senators stand out in the total Senate.

He was not President, although he was more able than many who were. He was in fact the model of what a Senator should be. Through the years, he helped me, as he helped the entire Senate and the entire country in areas of defense, in areas of foreign policy and in areas of reclamation and water policy. We worked closely on many projects. He was never to busy to help.

HENRY JACKSON was not a vain man; he was not a prima donna who demanded attention. He was not a man of form without substance. He was, in fact, a plain man with extraordinary abilities. He was a patriotic, hard-working, solid, competent American, who put service to his country ahead of most other things in an unassuming manner, and therein lies his greatness.

My wife, Susie, joins me in extending our sincerest condolences to his beloved wife, Helen, his two children, Anna Marie and Peter, and other family members during this time of bereavement. We know that they are comforted by the knowledge that SCOOP JACKSON did his best to serve his God, his country, and his fellow man.

I will miss him. He will be sorely missed in the Senate, but his accomplishments will live on.

Mr. MELCHER. Mr. President. Senator HENRY (SCOOP) JACKSON'S death has left a void in the leadership for his State of Washington, the Northwest, the Nation, and the world.

Our loss in the Senate of his great contributions, sage advice, and friendly guidance cannot be replaced.

Many have noted the unique accomplishments of SCOOP JACKSON in the areas of human rights, national security, conservation, and advancement of technology. For my part, I must add my experience with him as a confirmed advocate—in fact—a dedicated mentor that the country's greatness derived from the strength of the American people, the strength of American resources, technology, science, energy, and industry, tempered with thoughtful understanding and compassion for people endowed with loss.

On that SCOOP based his assessment of our Government's actions for our own people and with others throughout the world. I salute that astute judgment and fairness of our departed colleague, Senator HENRY JACKSON.

I shall add that those of us from the Northwest were proud of the Jackson leadership on issues particularly affecting us. We have lost a man truly a product of the dynamic Northwest.

At Everett, on the day of his funeral, I expressed my sympathy to Helen Jackson and their daughter Anna Marie and son Peter.

Now I wish I had also expressed to them my gratitude for the personal advice and guidance that SCOOP had provided to me. He was generous of his time in helping so many of us.

I do now express my personal thanks and gratefulness for the ready and willing help I have received from our fallen leader.

Farewell, friend and teacher.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. I thank the Chair.

Mr. President, the sudden death of Senator JACKSON has brought countless eulogies from colleagues, friends, and admirers. Many of these statements were presented with an eloquence I will not pretend to match. But I would still like to share with my colleagues my feelings about this most extraordinary man.

Senator HENRY JACKSON was elected to Congress the year I was born. From the time I became a student of government, I recognized Senator JACKSON as one of those leaders destined for greatness. By the time I first reached the Senate, his reputation as a leader was unchallenged.

From my early days as one of his colleagues on the Armed Services Committee, I looked to him for his wisdom and advice. And although there were times we found ourselves on opposite sides of an issue, I considered him a mentor during those early days, and constantly went to him for counsel on matters involving the security of our country, in matters involving energy, in matters involving the environment.

Senator JACKSON was a man of conviction. He was invulnerable to the ebb and flow of the political tides. Unwavering consistency was perhaps his greatest strength.

Mr. President, a little earlier, Senator BAUCUS and others shared personal vignettes involving Senator JACKSON with us. With my colleagues indulgence, I would like to comment on a couple of my personal experiences with Senator JACKSON that reflect the type of person he was.

When I was first elected in 1974, I was destined to have the least seniority in the U.S. Senate. Yet I recall on election night, when the returns started coming in, the first telephone call I received from outside the State of Vermont was from Senator HENRY JACKSON. He called offering congratulations and he called offering whatever help I might need when I got down to Washington.

I recall it very well, because a photograph I cherish and have in my home in Vermont shows me sitting in the wreckage of the campaign headquarters that night laughing and smiling on the phone. The person on the other end of the line was Senator JACKSON.

I recall he also talked with my parents at that time. During the last 9 years my parents have visited me here in Washington, Senator JACKSON was one of the people who would always see them in the halls and stop and talk. He would take my parents aside and tell them how well I was doing here, and somehow try to convince them that the future of the Nation rested on my abilities. Now we all know that is far from true, but Senator JACKSON had such a towering reputation, and was so well trusted that even my parents would believe those things coming from him. It was a mark of him not only as a colleague but as a parent himself to take time for that.

I also recall during my first few weeks here when he asked me about my two young sons. He asked why I did not bring them down to the Senate gym. I told him I assumed the rules were such that we could not. He said, "No; I bring my son down there on Saturday mornings. Meet me here at 10 o'clock next Saturday with your boys and we will go to the Senate gym together." At the time, being as new as I was, I would approach that place with a certain amount of trepidation even by myself. With him leading the way, however, I was able to bring my own sons there and enjoy many, many father-son times that I never would have been able to except for the intercession, the kindness, and the concern of SCOOP JACKSON.

I have lost a friend and a trusted confidant. The loss suffered by his wonderful wife, Helen, and his children, Peter and Anna Marie, is even greater. They lost not a national figure, they lost a husband, a father, and a wonderful human being. To our Nation, the loss of this man of courage and conviction is incalculable. He was a man who was able to reach the center; to bring the right and the left together in this body to refocus our attention and our debate so many times when it was needed.

So I join with my colleagues in expressing my sorrow and my sense of loss for a great man.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mrs. HAWKINS). The Senator from Minnesota.

Mr. BOSCHWITZ. Madam President, I also rise to speak in honor of and to eulogize my good friend SCOOP JACKSON. We can all learn a lesson from SCOOP in 1970. In 1970, because of his viewpoints on defense and Vietnam, SCOOP JACKSON was not endorsed by his State party as he sought reelection. He thought it was wise not to seek the endorsement at the State convention because there would be such an uproar and there would be so much contention. He and his colleague, Warren Magnuson, thought it would be best not to seek the endorsement of his own party that time.

But he was true to his beliefs, and he was always true and very constant in his beliefs, so in 1970, despite the uproar, despite the fact that he did not have the endorsement of his party, he won by 83.9 percent of the vote, perhaps as high a record as has ever been achieved in a contested election to the U.S. Senate. It was an enormous victory. It was a victory not only for SCOOP JACKSON but also for the idea that constancy and sticking to principle is an important aspect of our lives and certainly was one of the leading foundations of SCOOP JACKSON'S life.

I believe the first time I met SCOOP was in Minneapolis, long before I came here to the Senate, when he came to speak to the Jewish community in behalf of the UJA. He spoke very feelingly, telling us how we had to contribute and how we had to be generous. And indeed he was generous himself, Madam President, throughout his lifetime. I do not believe he ever took an honorarium. Whenever he received an honorarium for speaking, he gave it immediately to charity.

He spoke feelingly that evening about the State of Israel and about the Jewish people; to both he was a great friend. I was very moved by him

at that time as I have been at subsequent times.

At the end of that meeting, I spoke with some of my friends and told them that because he was running for President—and I forget which year it was; he ran several times, as we know—that perhaps we should help him financially. I got up and made a speech—and I was at that time the Republican National Committeeman—and said that I could not participate, but then my wife got up and she did. It was indeed a family affair and something that came very much from the heart.

In 1960, he almost became Vice President of this country. As a matter of fact, in reading his biography, I see he was the leading contender and all the press was guessing that he indeed was going to be the Vice Presidential candidate with his friend and colleague, President Kennedy. He did not make it, as we well know. It may have changed a good deal of the history of this country.

But it was without regret, he said later. He said that in the event he had become the Vice Presidential candidate, who knows, the President may well not have been Jack Kennedy but instead perhaps would have been Richard Nixon and who would have known what the course of history would have been in that event.

But he continued on in the service of the Senate without hesitation. Indeed, as my friend and colleague from Pennsylvania (Senator SPECTER) has mentioned, when SCOOP was asked to be Secretary of Defense by President Nixon, he was in Hawaii at the time. SCOOP was in Hawaii with his ailing sister, his oldest sister.

He was a great man in that regard. As I read about him and as I have listened to him here on the floor and in private conversations, he was a wonderful man with respect to his family for which I also admired him.

One of the most interesting conversations I had with SCOOP JACKSON was when we were considering draft registration. As he began to talk about it, I was a little confused and it took me a few moments to realize that he was talking about his vote for the draft in 1941! He always had this keen sense of history and provided a memory for this institution that we have now lost. It was interesting to get his perceptions in 1981 as it referred back to 1941 and how little times changed in the interim.

His funeral was a sad event, Madam President. As I went and listened to the eulogies given by some of my friends about SCOOP, it was sad to think that he, such a vibrant individual, would no longer be with us.

But after the funeral we went to his home. I must say I was quite interested in going to his home because I have read about it and he had talked to me about it. He talked to me about it and I thought it was quite quaint as he described it. And when I read about it, I got a little different viewpoint. When I saw it, the different viewpoint was confirmed.

When he was a young man and he was trying to make his way, both of his parents were immigrants from Norway—I am the Senator from Minnesota, and I am surprised they did not stop there; most Norwegians did, but they just kept right on going and went to Everett, Wash. But as he grew up the economic circumstances of his family were strained. So as a boy he added to his family's income by delivering newspapers. He delivered papers to the president of the bank, a fellow by the name of Butler, whose brother was the president of Columbia University. This man was indeed the economic titan of the Everett community and apparently gave SCOOP the feeling that he, SCOOP, would not amount to very much in this lifetime.

SCOOP made up his mind that someday he was going to live in that banker's house. Indeed, eventually he bought that banker's house.

As I saw it, it was a lovely place indeed, and reflected the warmth of our colleague and our friend SCOOP JACKSON.

George Will said recently in an article that he was a JACKSON Republican. He said there was something other than just JACKSON Democrats. There are, indeed, JACKSON Republicans and he said he was among them. I find myself also in that group, Madam President. I find that, with this constancy in the area of defense in this Nation, I joined him in that; with his feelings for his fellow human beings, I hope that I have the same strengths that he did in that regard as well.

We will miss SCOOP. We will relish the thoughts and the memories we have of him. He has left an indelible mark on this institution and all who serve it.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Madam President, much has already been said this morning, this afternoon, and, of course, over the past several days, as we eulogize our friend and colleague, Senator JACKSON of Washington.

Madam President, I am both saddened and honored to join my colleagues in the Senate this morning to pay tribute to the memory of one of the most capable and decent Americans ever to serve in this body, HENRY M. JACKSON of Washington.

In a lengthy and distinguished public career, HENRY JACKSON built a record of legislative accomplishment that very few in history could match. His congressional service spanned the administrations of nine American Presidents. It would be difficult to find a piece of energy or national security legislation passed by the Senate during his three decades in this institution that does not display the imprint of his insight and diligence. Henceforth, any history of the U.S. Senate will have no claim to comprehensiveness without a chapter devoted to HENRY JACKSON.

For those of us who served with him, and who knew him, however, the loss of SCOOP JACKSON, the man, will be every bit as grievous as that of Senator JACKSON, the public servant.

In an age of images, SCOOP was the genuine article. There was not anything contrived or fabricated about him. What you saw was what you got. Honesty, patience, conviction, straightforwardness, energy, devotion to his friends, family, and country were his hallmarks.

For me the honor of serving in the Senate with SCOOP JACKSON was a brief one of about 2½ years. But I knew him for 10 times that long. He was a close friend and respected colleague of my father. And as a teenger, I had the opportunity to observe him at close range as a Senate page in the summer of 1961. At least one role he played well has not received the attention it deserves.

SCOOP JACKSON was an outstanding teacher. There was a moment in a touching eulogy delivered by SCOOP's daughter, Anna Marie, that sparked memories for me and, I think, anyone who knew him. Anna Marie recalled a telephone call to her father to check some particulars about the New Deal, as she prepared for a history examination. He gave her the answers and then put them in context by explaining the New Deal in some detail. The phone call, she noted, lasted 2½ hours.

That anecdote, I am sure, has a familiar ring to anyone—whether a high school student, a page, a constitutent, or a junior Senator—whoever listened to SCOOP JACKSON explain the intricacies of petroleum marketing or decisionmaking in the Kremlin or environmental protection, or any one of a variety of other important subjects he understood so well. It was a rare individual who would not benefit immensely from one of SCOOP's impromptu tutorials.

He taught, of course, by example as well as by work. He was one of the hardest workers the Senate has seen. He never took on an issue or attended a hearing unprepared. In the judgment of one political almanac not given to hyperbole, he was "a living refutation of the charge that the Senate no longer has leaders of broad interests and deep knowledge and experience." To anyone who aspires to public service, he was an ideal role model. The Senate will not be quite the same without him, but it is a far better institution for having had the luxury of his presence.

Madam President, I first got to know Senator JACKSON some 22 years ago when I sat on the steps here as a page in this body, just as a couple of our young pages are sitting here this afternoon. Senator JACKSON, along with other distinguished Members of the body, at that time, of course, was engaged in the all-night civil rights debate.

I remember how kind Senator JACKSON was to pages. Pages talk about us, you know. We do not like to admit they do, but they have their thoughts and comments about Members of the Senate. I know we had some choice thoughts and remarks about Members of the body at that time which will never appear in public.

We talked about Senator JACKSON in those days because he was a true human being. He treated us with respect, with kindness, with courtesy. He did not treat us as some servile group that should do his bidding. He was always interested in our welfare, wanting to know how we were doing in school, how we enjoyed the work, whether we had questions about the institution or the legislation pending on the floor.

He was also a good friend of my father. In fact, they were similar in their views, if you will, "Jacksonian Democrats." They felt very strongly about the disadvantaged in our society. They had strong records to support their commitment to those less fortunate. They felt strongly about the security of this country. They would not take a back seat to anyone in doing all that they could to see to it that we were a secure and safe Nation.

Then, of course, to come to this body in January 1981 and become Senator JACKSON'S colleague added yet another dimension to the relationship.

We had our arguments and disagreements over points of policy. Not too many weeks ago, only this spring, in fact, we both ended up appearing on a Sunday news show to discuss Central America. I will remember it foreover because we disagreed. We debated rather vehemently over how the matters of Central America ought to be handled. I thought afterward that I had been a little too heated, perhaps, in trying to make my points.

Monday morning when I arrived back here, I wrote a note to Senator JACKSON, and I said if I had appeared strident, I wanted to apologize. I wrote that he had been a hero of mine for as many years as I could remember, from those days that I sat in this body as a page. I hoped that I had not done anything that would jeopardize that friendship because of the positions I had taken.

Well, about 24 hours passed, and I was here on the floor. He came over to me, and he said, "Do not ever apologize for having convictions. You and I disagree on this issue, and you were expressing your point of view. There is never any reason for a person to apologize because of strong convictions."

I was not really apologizing for the convictions but for how I had expressed them. But I thought it was so typical of SCOOP JACKSON to say, in effect, that you should not shrink from things that you believed in. Certainly, if there is anything that stands out in my mind about him as a legislator, putting aside his human qualities, it is that he was so constant throughout his public career. Times come and go and moods change in the country. A conservative one day is a progressive the next. But SCOOP JACKSON did not change. He held his views, his perspective, regardless of the shifts in public opinion in this country.

For someone who is relatively new to this body, having only been here 2½ years, and for others who will come here, SCOOP JACKSON serves as a great model of what a Senator ought to be, what a legislator ought to be, what a public servant ought to be.

Putting aside again the specific positions that he held or that others may hold, it was his conviction and it was his sense of purpose which were loved by this body.

Certainly, he will be missed. We all know that. It has been said over and over again. But this institution is a far better institution because we had the luxury of his presence and I am honored to join my colleagues in expressing these thoughts.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. SYMMS. Madam President, I recall when I was first elected to the other body, coming to this city and to the Congress, that one of the first things that happened when we started having some issues that came up was SCOOP JACKSON was always in the front in gathering the delegations from the Pacific Northwest. He was a real guardian of our interests in the Northwest.

I remember how impressed I was in the first meeting we had after having never met him personally. It was in his private office in the Capitol. How well he conducted the meeting. After it was over, I talked with him and told him that I thought we should do it more often, to get our delegation from the Northwest together. We did so after that, and I think it was very helpful to all of us from the Northwest to at least discuss some of those issues that we have a common interest in.

I will always remember Senator JACKSON for his strength of convictions and his willingness to work with many of us. I was a very young Member of the House from a different political party, with many views that were somewhat different than Senator JACKSON'S. That made no difference to SCOOP. He welcomed me into that group. I will always cherish that very fond memory. From that time on, we had a very good working relationship.

I was very shocked and saddened by hearing of his sudden death on September 1. At the time, I was in Seoul, Korea. We had all of the other dilemmas that had taken place, with the missing KAL airplane and everything. To add to that the death of Senator JACKSON, it was a disappointing day for all of us in Congress and for all Americans.

There is no question in my mind that Senator JACKSON was one of the most able and experienced Members of Congress, where he served with distinction for 42 years. As the ranking minority member of the Senate Armed Services Committee and a recognized expert on military technology, in my opinion, he was especially effective in promoting a strong national defense. There is no question in my mind that the military has lost one of its strongest advocates on Capitol Hill and President Reagan has lost one of his most effective allies on a strong defense policy.

As an articulate critic of the Soviet Union, SCOOP JACKSON repeatedly warned that we could not trust the Communists and we must always deal with them from a position of strength. That was a warning that should be obvious and must be heeded in light of their obscene murder of 269 innocent passengers aboard a Korean Air Lines jet 2 weeks ago. A few hours before he died, Senator JACKSON denounced the Kremlin for an "act of barbarism." It was on the news, I might mention, in Seoul, Korea, almost simultaneously with the news of his sudden passing.

Senator JACKSON also recognized the need and was a powerful spokesman for the development of adequate energy resources and, in many ways, he defended the vital interests of his country and the Pacific Northwest.

As I mentioned, on some issues of a partisan philosophical nature, SCOOP and I were on different sides, but we were always friends and I had enormous respect for him. I will miss him. His passing leaves a large void in the Senate that will be hard to fill—particularly I think, for those of us who come from the Pacific Northwest. We will especially miss him in the future.

Madam President, my sincere thoughts and prayers are with his lovely wife, Helen, and the family. I know that we shall miss him here in the Senate, but he will certainly be missed by those who were close and loved him also.

I yield the floor.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Madam President, I rise to express, with the greatest feeling of humility and compassion, my thoughts about our distinguished col-

league, the late senior Senator from Washington, SCOOP JACKSON. In the days since his death, SCOOP JACKSON has been called a statesman, a hero, and a patriot. He was, of course, all of those things and more—much more. In this body where some of our Nation's greatest leaders have served, SCOOP JACKSON will be remembered by historians as one of the best.

My first privileged contact with this great American was in 1969, when I joined the Department of the Navy as Under Secretary. I remained in that position for several years and succeeded our distinguished colleague, John Chafee, as Secretary in 1972. Therefore, for a period of over 5 years, I appeared many times before Senator JACKSON, a member of the Armed Services Committee.

When elected to the Senate, he was among the very first to extend the hand of welcome. Most importantly, he allowed me the opportunity to receive his wealth of wisdom. Indeed, the many long conversations that we have had, on a wide range of subjects, are unparalleled in terms of his ability to link historical precedents to present day crises. No Member of the U.S. Senate had a better grasp of Soviet history, a better ability to translate Soviet behavior in terms of their history.

In a world constantly threatened by aggressive powers, SCOOP worked tirelessly to keep America strong and prepared. It was my good fortune to work shoulder to shoulder with a legend, whose views I admired and supported. SCOOP JACKSON had vision. He recognized that America's freedom could never be taken for granted. His was a purposeful, forceful voice for those who believe that our Nation's national security should never be compromised. His commitment to these ideals transcended party lines and never wavered.

As a very junior Member of the Senate, it was an unusual privilege to be asked by Senator JACKSON to join him on certain pieces of legislation, foremost among them being the Jackson-Warner resolution which had the support, I recollect, of over 60 Members of the U.S. Senate. That resolution, of course, dealt with goals for which he lived night and day—to reduce tensions between the United States and the Soviet Union by way of a verifiable and equitable reduction of nuclear arms.

Late last year and early this year, Senator JACKSON, together with Senator NUNN, and myself, initiated efforts to encourage the administration and Congress to begin working toward improved technical communications relating to national security matters between the United States and the Soviet Union. The three of us sponsored an amendment, which became law, recommending a study of confidence-building measures. This amendment induced the President and members of his administration to perform a study to provide for the Soviet Union and the United States the most modern systems of communications to replace the national security "hot line."

We also were members of the Senate Energy and Natural Resources Committee. I recall very well after my first 2 years in the Senate, Senator JACKSON convinced me of the vital interdependence of national security and energy.

I reluctantly resigned from the Commerce Committee and accepted a position on the Energy Committee of which he was chairman. Our partnership was structured in yet another area of work, and our professional relationship broadened.

Many Senators knew him better than I and served with him far longer. Like you, he inspired me by example, by his boundless energy, by his kindness, and by his accomplishments. He was a teacher in the Senate. And I, for one, learned much from his lessons.

SCOOP JACKSON will be remembered as the prototype of the public servant. To the Congress in which he served for 43 years, he was a model of integrity, compassion, and commitment to the ideals in which he so deeply believed. And though his accomplishments were many, he will be remembered as a man of humility who earned the respect of all.

I say with great humility that I looked upon him as a big brother in the Senate, and to whatever extent I have made modest achievements in this body, much of it is owing to his wisdom, his teaching, and his patience. SCOOP JACKSON was always available—night or day, in the Senate Chamber, in his office, at home—to all of us to share his views.

I will never forget his funeral. We witnessed, in certain respects, the reincarnation of this extraordinary human being by the manner in which his young daughter and son spoke at the services.

All of us were deeply touched by their ability to eulogize their beloved father in the presence of over half the Senate, the Vice President, the Chief Justice, family, and friends. Only through wisdom and love given by a great father could two children have imparted to us the courage and conviction we need to carry on his beliefs. His wife, Helen, for whom we have the deepest respect and affection, will always be with us.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, our Nation lost a great patriot when Senator HENRY JACKSON died without warning during the recess. SCOOP, as we knew him, was a true friend and a man of his word who said what he believed. He was respected for his integrity above everything else.

SCOOP JACKSON was a longtime friend of mine. Our friendship predates my 8 years as Governor of Nebraska. We met in the early sixties when SCOOP was chairman of the Democratic National Committee. He visited our State several times during his public life. He was always well received, admired, and respected.

When SCOOP ran for the Presidency in 1972 and 1976, I actively supported his candidacy. I believe he would have made a great President who would have served our country well both in good and bad times. Many of us often called on SCOOP's wealth of knowledge and experience in the Congress on a whole range of issues.

As a Member of the Senate, I had the pleasure of serving with SCOOP on the Senate Armed Services Committee. He always expressed the importance of maintaining a sound defense in order to keep the peace. Our views on defense blended well, but even on those occasions when he disagreed, he always respected the opposing view.

HENRY "SCOOP" JACKSON was the great modern-day patriot of the Senate. He was dedicated, steady, and resolute. He was admired, respected, and loved. Words such as "we shall miss him" are the understatement of the decade. His contributions benefited our country; and while another person will accept his duties, he will not be replaced or forgotten in the Senate. History will record HENRY JACKSON as one of the true giants of the U.S. Senate.

A great leader of this institution and this country has been called to his greater reward. His beloved family, his friends and associates here are the losers. But Senator HENRY JACKSON was never associated with losers and would not want us to be so cast. His memory and work will be our inspiration for the future. Godspeed, SCOOP.

Mr. BAKER. Madam President, I thank the Senator from Nebraska and all other Senators who participated in the further statement of tribute and eulogy to Senator JACKSON. It is an impressive array of Senators and an extraordinary collection of statements expressing the love and affection that this body held for SCOOP JACKSON and clearly expressing the sense of loss which we all feel.

Madam President, Senators will recall, I am sure, that the resolution adopted on Monday provides that the RECORD will remain open until the close of business on September 30 for the introduction of other statements, tributes, memorials, and eulogies to the late SENATOR JACKSON.

After September 30, the Public Printer will collect these tributes and eulogies. They will be arranged appropriately and bound in a hard-cover

volume for presentation to Mrs. Jackson and the Jackson family and to be available to Senators and to the public.

VISIT TO THE SENATE BY THE SECRETARY OF STATE FOR DEFENSE OF THE UNITED KINGDOM, AND MEMBER OF PARLIAMENT

Mr. TOWER. Mr. President, we are honored to have with us today as guests the distinguished Secretary of State for Defense of the United Kingdom and a Member of Parliament, Mr. Michael Heseltine, and the Parliamentary Private Secretary to the Secretary of State and Defense, Dr. Keith Hampson, also a Member of Parliament, and I ask unanimous consent that we stand in recess for 2 minutes to greet our distinguished British visitors.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senate stands in recess.

The Senate, at 1:54 p.m., recessed until 1:56 p.m.; whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. HUMPHREY).

ROUTINE MORNING BUSINESS

Mr. BAKER. Madam President, at this time I believe there is an order for further routine morning business; is there not?

The PRESIDING OFFICER. Yes. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 2 hours with statements therein limited to 15 minutes each.

ORDER OF PROCEDURE

Mr. BAKER. Madam President, it is my understanding that there is a requirement for time so that Members may speak on the situation in Lebanon and on the provisions of the War Powers Act. I anticipate that most of the 2 hours will be consumed by that. If that is the case, it may be necessary to put over the Korean plane resolution until tomorrow.

ORDERS FOR WEDNESDAY

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Madam President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. I ask unanimous consent further, Madam President, that after the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business to extend not past 10:30 a.m. in which Senators may speak for not more than 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR INTERIOR APPROPRIATIONS BILL TO BE TEMPORARILY SET ASIDE

Mr. BAKER. Madam President, I now ask unanimous consent that the unfinished business, which is the Interior appropriations bill, be temporarily set aside at that point so that the Senate may resume consideration of the Korean plane resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Madam President, the arrangement that has just been provided for will commence the debate on the Korean plane resolution at 10:30 a.m. tomorrow. After that matter is disposed of, the Interior appropriations bill will recur as the unfinished business. It is hoped that both of those matters, together with perhaps others, can be disposed of this week. I do not anticipate that the Senate will be in session beyond 6 p.m. this evening. Tomorrow, however, is Thursday and there is a possibility that the Senate would be in later than that in order to finish the work that is to be done.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HUDDLESTON. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DESTRUCTION OF KOREAN AIR LINES FLIGHT 007

AMENDMENT NO. 2134

Mr. HUDDLESTON. Madam President, I send to the desk an amendment to Senate Joint Resolution 158, which, as the majority leader has indicated, will be considered tomorrow.

This amendment is cosponsored by me, Senator GOLDWATER, and Senator LEAHY. It would add a provision to the resolution that would declare that it is the intention of the Senate to reduce substantially the Soviet official presence within the United States in order to establish a real equivalence with the official U.S. presence in the Soviet Union.

It is important for the United States, I think, to take actions in response to the Soviet shootdown of the Korean airliner that penalize the Soviet Union in a substantial way which is consistent with the U.S. interests. This proposed action would achieve that objective.

Today, the number of Soviet Government employees in the United States is about 1,000 while the number of U.S. Government employees in the Soviet Union is about 300. In setting aside the roughly 500 Soviets at the U.N. Secretariat and the Soviet U.N. mission, the Soviet Government employees in this country still greatly outnumber of U.S. Government employees in the Soviet Union. The official Soviet presence in the United States could be reduced by at least 100 positions for real equivalency to be reached.

This action would directly serve the U.S. national security and counterintelligence interests by reducing the number of positions that the Soviets are able to use for intelligence purposes in this country. According to the FBI, approximately 40 percent of the Soviet Government employees in the United States are trained professional intelligence officers of the Soviet KGB and the Soviet military intelligence, the GRU. Many other Soviet officials are co-opted by the KGB and the GRU to perform intelligence assignments.

It seems to me that the time has come to draw the line, so that the Soviets no longer can take advantage of the imbalance that has existed for so long in this particular area. There is no better time than now, when we have a reason to take this kind of action, to demonstrate to the Soviet Union and to the rest of the world that the kind of action that the Soviets took against the Korean airliner is simply not acceptable in the civilized world. I think we should urge other countries to do the same.

There is hardly anything more dramatic than a group of diplomats having to pack up and go home. If this occurred at a number of points around the world, I think it would make the point to the Soviet people that their Government had committed an act that could not be accepted or tolerated by the rest of the free world.

Madam President, I ask unanimous consent that the amendment be printed in the RECORD.

(The text of the amendment is printed later in the RECORD under routine morning business.)

Mr. HUDDLESTON. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BYRD. Madam President, I hope that both cloakrooms are advised

that my statement will be with reference to war powers and Lebanon and that any Senators on both sides who wish to participate might want to come to the Chamber at this time; or, of course, they can wait until another day.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Madam President, what is the order insofar as time is concerned?

The PRESIDING OFFICER. The Senate is conducting morning business for 101 minutes, and the Senator is recognized for 15 minutes.

Mr. BYRD. Madam President, I doubt that I can confine my remarks to 15 minutes. If I can I will. If I cannot I will ask unanimous consent that I may be permitted to proceed longer.

THE WAR POWERS ACT

Mr. BYRD. Madam President, 10 years ago Congress enacted the War Powers Act, in response to abuses of Presidential power with respect to the making of war.

Discussions and hearings with respect to such an act had covered the span of 3 years at least.

The War Powers Act was enacted by a supermajority in both Houses over the veto of President Nixon—in the Senate I believe by a majority vote of 4 to 1 and in the House of Representatives, of course, by a majority of a little over 2 to 1.

Never in those 10 years have the provisions of the War Powers Act been called into play by the course of events. Today, we are confronted with an issue of historic dimensions, one that is pregnant with profound and far-reaching consequences.

This issue is bigger than political parties. It is bigger than personalities. And it is bigger than any particular officer of the United States in the executive, legislative, or judicial branches.

There are few issues of greater importance than the issue which confronts us; namely, the preservation of the balance of power between the executive and the legislature which our Founding Fathers laid out in the Constitution 196 years ago and specifically with reference to the war powers. The power to make war is the ultimate power because upon that power hangs the fate of nations and the lives of millions of individuals.

(Mr. NICKLES assumed the chair.)

Mr. BYRD. The situation in Lebanon has reached a critical point for the people of that nation and for U.S. interests in the Middle East.

The recent fighting which has erupted involving the Lebanese Armed Forces and the various militia in that country—in particular the Christian Phalange and the Druze—has brought U.S. Marines participating in the multinational force under direct fire. The United States has already lost four men to hostile fire and incurred numerous wounded since August 29.

The situation is complicated further by the heavy involvement of the Syrian Government through its supply of military equipment to, and possibly Syrian advisers working directly with, the Druze militia.

It is clear from all the evidence that our Marines are operating in a situation of hostilities. And it is for this reason that I believe that section 4(a)(1) of the war powers resolution has been triggered by events. The law is clear on this point. It reads, in part, as follows:

Sec. 4. (a) In the absence of a declaration of war, in any case in which United States Armed Forces are introduced—

(1) into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances;

the President shall submit within 48 hours to the Speaker of the House of Representatives and to the President pro tempore of the Senate a report, in writing, setting forth—

(A) the circumstances necessitating the introduction of United States Armed Forces;

(B) the constitutional and legislative authority

And I emphasize the words and legislative authority—

under which such introduction took place; and

(C) the estimated scope and duration of the hostilities or involvement.

The law states that in the absence of a declaration of war in any case in which U.S. Armed Forces are introduced into hostilities or in situations where imminent hostilities are clearly indicated by the circumstances, the presence of our forces beyond 60 to 90 days has to be authorized by Congress.

Since the first two of our Marines were killed on August 29 our men have come under hostile fire. We have returned that fire in self-defense. The Marine commander of our forces in Lebanon has awarded hostile fire pay for the entire Marine contingent for the month of August. He was right in doing so, and I am sure he will do so for the month of September.

Last month was the first time since the multinational force was introduced a year ago that hostile fire pay was awarded. Last month was the first instance in which an American Marine died as a result of direct hostile action.

So it is a clear sign that circumstances have changed in the last few weeks, and because of these changed circumstances, there should not be any doubt that full congressional participation is now required regarding U.S. policy toward Lebanon.

The war powers resolution was designed expressly for the purpose of resolving ambiguities between the executive and legislative branches of Government regarding situations of undeclared war. The Constitution expressly states in section 8, article I, certain enumerated powers of the Congress among which is the power to declare war.

The problem is in this day and age that the Nation may be more and more drawn into an undeclared war, and that is the reason why the war powers resolution was passed following an undeclared war in Vietnam that cost America 50,000 dead and over 300,000 wounded.

The war powers resolution was designed expressly for the purpose of resolving such ambiguities, as I say, between the executive and legislative branches regarding situations of undeclared war.

The war powers resolution signaled congressional determination when it was enacted into law, over a Presidential veto in 1973, that American interests were best served if there is a national consensus regarding the deployment of U.S. forces on foreign soil. Open-ended commitments of armed forces in the absence of support from the American people, as expressed through their elected representatives in the Congress—535 in number—pose grave dangers for U.S. policy.

I wrote the President on August 31 and met with him personally on September 4, along with other members of the joint congressional leadership in both Houses. I explained my position that circumstances required the invocation of section 4(a)(1) of the war powers resolution, and I stated that, by making Congress a coequal partner of the war powers resolution as it relates to deployment of U.S. forces in Lebanon it affords the President an opportunity to coalesce opinion and support of that decision. I think it is imperative that Congress exercise its constitutional responsibility, along with the President, when it comes to the deployment of U.S. forces abroad in a hostile situation.

Quoting from a book titled "The Wisdom of the Supreme Court," page 348, I find these words:

No penance would ever expiate the sin against free government of holding that a President can escape control of the executive powers by law through assuming his military role.

So what I am saying is directed toward the Congress, that no penance would ever expiate the sin, the congressional sin, against free government of holding that a President can escape

control of the executive powers by law through assuming his military role.

Thus, I respectfully requested that the President recognize and act appropriately upon the reality that the operative provisions of the war powers resolution have been clearly triggered. There is no need to perpetrate or to perpetuate the myth that our Marines are not engaged in hostilities or in a situation which clearly indicates imminent involvement under the circumstances, and anyone who argues otherwise is simply kidding himself. So I have said to the President in person and I have said in writing that the operative provisions of the war powers resolution have been triggered.

I have pointed out that the war powers resolution resulted from the abuses and the excesses that were engaged in by the executive branch and that were not seriously challenged by the legislative branch in the earlier years of the Vietnam war.

Quoting from page 272 of the same book, "Wisdom of the Supreme Court," I read this statement by Cardozo:

All history demonstrates that legislation intervenes only when a definite abuse has disclosed itself, through the excess of which public feeling has finally been aroused.

I can remember a time when one of the Nation's great newspapers said "we cannot afford to let Vietnam go down the drain," but public feeling was subsequently aroused and actions by the Federal legislature reflected that public feeling, and as a result the war powers resolution was enacted, as I say, by supermajorities in both Houses

While recommending this course of action, I think a clear signal should be sent to all parties involved in the present conflict in Lebanon. This is not an effort to pull the rug out from under the President. That is not my desire. I think that this is a matter which transcends party politics. I do not think it should be partisan.

What I am talking about is the realization that both the Congress and the executive branch have a significant role to play under the Constitution with respect to the declaration and the waging of war. The declaration is for the Congress alone, except when our own Nation is attacked and in certain other instances. What I am saying is that Congress has a very precise and definite role under the Constitution to play when it comes to a declaration of war. And what we are concerned with is what may become, what could become, another undeclared war costing blood and treasure.

I want to support a President when I feel that he is acting in the best interests of this country. Some will remember that I opposed my own majority leader, the then majority leader Mike Mansfield, when I offered an amendment to a resolution, my amendment providing that President Nixon had the duty to act to protect our Armed Forces that were sent into the war—the occasion at that time being the bombing of Vietcong in enclaves in Cambodia—and I lost.

I believe that the American interests in the Middle East are affected by the situation in Lebanon. But, Mr. President, the War Powers Act is the law of the land and there is no way of ripping it out of the statute books except by repeal of that law by the Congress or the invalidating of that law by the courts.

In my judgment, there is one part of the law which is not constitutional and that deals with the two-House veto. And it is my intention to offer legislation at some point providing for the words "concurrent resolution" to be changed to the words "bill or joint resolution." The reason that portion is unconstitutional is because it does not provide for a presentation to the President of the bill or joint resolution. It meets the requirement of bicameralism but it does not meet the requirement of presentment. And all bills and joint resolutions, with the exception of a joint resolution providing for a constitutional amendment, shall be presented to the President of the United States for his approval or disapproval.

So the War Powers Act is a statute; that is a law. It cannot be winked at; it cannot be wished away. And it is a law that obtains in the current situation.

I read again from "The Wisdom of the Supreme Court," and in this instance I quote from Mr. Frankfurter:

Statutes are not inert exercises in literary composition. They are instruments of government.

So it cannot be overlooked. It cannot be ignored. It is the law of the land. And the President of the United States—as do Members of the Senate and House—takes an oath to uphold and protect the Constitution, and the Constitution provides that the President shall see to it that the laws will be faithfully executed.

So I think that the time has come for Congress to be a partner in this process as dictated by the war powers resolution and by the Constitution of the United States. I think that the war powers resolution should be put in its proper constitutional context. Any suggestion that the President of the United States is vested with sole responsibility for the warmaking powers of our Government lies completely in the face of the Constitution and the intent of our Founding Fathers. The Constitution is clear that the power to declare war, as well as the power to raise and maintain armies and navies, belongs to the Congress. Under the Constitution, the President is designated as Commander in Chief for the purpose of prosecuting wars authorized by the Congress.

We should keep in mind that the Founding Fathers constructed a Government of intricate checks and balances in order to avoid the abuses they had suffered at the hands of the British monarchs. It was the power of the British sovereign to initiate war on its own prerogative that led to a deliberate decision on the part of the framers of our Constitution to vest powers to declare war in the body most broadly representative of the people.

During the debate at the Constitutional Convention on this matter, Mr. Elbridge Gerry of Massachusetts expressed the view that he "never expected to hear in a Republic a motion to empower the executive alone to declare war."

Mr. Gerry's point withstood the test of time for it is as relevant today as it was in 1787. Discussions of the President's power to control the Armed Forces have invariably focused on the provision in article II of the Constitution, which refers to the President as Commander in Chief. However, from the first it has been interpreted as simply placing the President at the top of the pyramid of military command, making him, in Alexander Hamilton's words, which are to be found in the Federalist No. 69—and I quote Hamilton:

The President is to be commander-in-chief of the army and navy of the United States. In this respect his authority would be nominally the same with that of the king of Great Britain, but in substance much inferior to it. It would amount to nothing more than the supreme command and direction of the military and naval forces, as first General and admiral of the confederacy; while that of the British king extends to the *declaring* of war and to the *raising* and *regulating* of fleets and armies,—all which, by the Constitution under consideration, would appertain to the legislature.

In recent months, the Monroe Doctrine has been bandied about as the justification for giving the President a free hand to use U.S. forces in any way he sees fit in this hemisphere. The Monroe Doctrine has been cited as an early precedent for the use of Armed Forces by the President acting on his own authority. However, President Monrose always kept the intent of the framers of the Constitution in proper persepective by making the appropriate distinction between a statement of policy and the authority to carry it out. In 1824 when the Government of Colombia inquired as to what action the United States might take under the Monroe Doctrine to repel certain European intervention in Latin American Republics, Secretary of State John Quincy Adams replied:

With respect to the question, "in what manner the government of the United States intends to resist on its part any interference of the Holy Alliance for the purpose of subjugating the new republics or interfering in their polticial forms" you understand that by the Constitution of the United

States, the ultimate decision of this question belongs to the Legislative Department of government.

Abraham Lincoln admonished Congress when he noted the following in 1848:

Allow the President to invade a neighboring nation, whenever he shall deem it necessary to repel an invasion, and you allow him to do so, whenever he may choose to say he deem it necessary for such purpose—and you allow him to make war at pleasure. Study to see if you can fix any limit to his power in this respect . . . If today, he should choose to say he thinks if necessary to invade Canada, to prevent the British from invading us, how could you stop him? You may say to him, I see no probability of the British invading us but he will say to you be silent; I see it, if you don't.

We were extremely fortunate to have had leaders of vision, and leaders of great intellectual capacity during our formative years as a republic. The sensitivity to the Constitution, the sensitivity to maintaining the proper role of each branch of Government was deeply ingrained in the early leaders of our country, One might ask why. I think the answer can be found from Abraham Lincoln himself when he was President. He wrote:

The provision of the Constitution giving the war making power to the Congress, was dictated, as I understand it, by the following reasons. Kings had always been involving and impoverishing their people in wars, pretending generally, if not always, that the good of the people was the object. This, our Convention undertook to be the most oppressive of all Kingly oppressions; and they resolved to so frame the Constitution that no one man should hold the power of bringing this oppression upon us.

The tyrannies of the monarch weighed very heavily on the conscience of our leaders in the early years of our Nation. They had felt the hand of tyranny and, once having thrown it off, these leaders were bound and determined that the Government we had so tortuously constructed would not be compromised in any way.

While there is substantial evidence that, absent direct attack on the United States, the Founding Fathers never intended troops to be used outside the country without congressional consent, a rapid expansion of Presidential power to use force abroad took place in the latter part of the 19th century and throughout this century.

In addition to the abuses of authority on the part of absolute monarchs, why were the framers of the Constitution so concerned about the delegation of warmaking powers of our Government? First, such a decision involves a risk of great economic and physical sacrifice and should not be incurred without approval from the body most directly representative of popular sentiment. Second, even in cases where no significant physical effort is likely to be required, the very act of using force against a foreign sovereign entails moral and legal consequences sufficiently significant to require an expression of popular approval.

Our involvement in Vietnam precipitated a major debate in the Congress that the balance of authority over warmaking had swung heavily to the President in modern times. The President's right to defend the Nation against attack, without prior congressional authorization, in extreme circumstances, such as a nuclear attack or direct invasion, was not the issue and is not the issue today. The issue involved the commitment of U.S. military forces exclusively by the President—allegedly under his authority as Commander in Chief—without congressional approval or adequate consultation with the Congress.

I again quote Cordoza:

All history demonstrates that legislation intervenes only when a definite abuse has disclosed itself through the excess of which public feeling has finally been aroused.

Senator Jacob Javits, the initial sponsor of the war powers legislation, in testimony before the committee in 1971, explained this problem very eloquently when he noted:

. . . We live in an age of undeclared war, which has meant Presidential war. Prolonged engagement is undeclared, Presidential war has created a most dangerous imbalance in our constitutional system of checks and balances.

After much debate and considerable compromise, the war powers resolution became law. The war powers resolution did not take power from the President. To the contrary, it was a tacit act on the part of the Congress according powers to the President, under certain circumstances, that were not accorded to him under the Constitution. Congress basically said, we recognize that in a modern age and with major global responsibilities, some degree of additional flexibility should be given the President in committing U.S. combat forces abroad.

The policy we finally choose in Lebanon will only succeed if there is a national consensus in support of that policy.

In summing up, Mr. President, I would say that the War Powers Act is a statute, is the law of the land, was passed by super majorities in both Houses over the veto of President Nixon. As a statute, as the law of the land, it cannot be ignored, however much some of us may wish to ignore it. It is binding upon the President. It is binding upon the Congress of the United States. It cannot be reasonably argued that section 4(a)(1) has not already been triggered by events, those events which I have already mentioned.

It is also clear that unless Congress acts to authorize further use of Armed Force beyond the 60- to 90-day period set forth in that provision which has now been triggered, unless the Congress authorizes further use of the Armed Forces, the President is required, by that law, to remove those Armed Forces from Lebanon.

I happen to be one who feels that the President acted appropriately and was correct in joining with the multinational forces in Lebanon.

We responded to a request by the Lebanese Government. I would be very likely to support the President's request for some additional time. But this is an institutional matter with me and I feel it incumbent upon us, those of us here, all of whom have taken the oath of office to protect the Constitution of the United States, to defend the congressional role which is set forth in that law.

I talked with former Republican Senator Javits last Friday and, he being the principal craftsman of that act, I felt it appropriate to ask him if he though that recent events had triggered the 4(a)(1) mechanism, and he said, absolutely, without any equivocation.

I asked if I might have the liberty of quoting him in so saying. He said, "Absolutely." I wish he were here as a Member of this body at this moment to give us his advice and to speak on this matter.

Mr. President, I do not want this to be a partisan issue. The making of war should not be a partisan issue. I do not desire to take away from the President any of his constitutional powers, nor would I be able to do so if I so desired. Congress cannot take away from the President those powers that are enumerated as being vested in the President of the United States. At the same time, I do not want to see the responsibilities and powers of the legislative branch taken away or not adhered to, and I think it is the responsibility of those of us on both sides of the aisle to zealously guard the responsibilities and duties of this body under the Constitution, and in so doing, protect the interests of our country and our people.

So, Mr. President, I simply hope that the President will act under and in accordance with the War Powers Act. He did report to the President pro tempore of the Senate and to the Speaker of the House. As I believe, if my memory is correct, he used the words "consistent with the act." The words, "pursuant to," would have been more appropriate, but I do not now quibble over those words at this point. But he did say that he had committed the Armed Forces of the United States pursuant to—I read: "pursuant to my constitutional authority with respect to the conduct of foreign relations and as Commander in Chief of the United States Armed Forces."

That does not fulfill the requirements of the act, which are that, when 4(a)(1) is triggered, "the President

shall submit within 48 hours to the Speaker of the House of Representatives and the President pro tempore of the Senate a report, in writing, setting forth," under 4(B), "the constitutional and legislative authority under which such introduction took place." I emphasize the words, "and legislative authority."

So the legislative authority was the War Powers Act. I can understand the reluctance of this President and other Presidents to perhaps follow the provisions of the act in every instance because I would expect every President to guard zealously whatever responsibilities are incumbent under the constitutional provisions that he shall be the Commander in Chief. But we, in this body, have just as great a responsibility in protecting our own institution and in living up to the responsibilities incumbent upon us under the Constitution. As I said to the President, "If you recognize the act and invoke it, you broaden the base of support that you will have. You cannot succeed in any warmaking venture unless you have the support of the American people and the support of the Congress, which will reflect the will of the people." We saw that in Vietnam.

I said additionally, "If your policies fail, we then will share the criticism."

If I wanted to be perfectly partisan, I would not say anything on this. I would simply say, "Well, fellows, let us just let him have it. Let him have the full responsibility. If he fails, then we shall have something for which we can criticize him and we can play politics"—if I wanted to be partisan in the matter. But in truth, I would have to be critical of ourselves if we did not take a stand in this matter and support the law which most of us, or a good many of us here today, voted for.

I do not like the idea of having a showdown on a vote of this kind; but it is not what I like that counts; it is my responsibility that counts. So I hope, and I do believe, that there are Members on both sides of the aisle who share my view that the War Powers Act obtains in this situation and that both the Congress and the President should work together and cooperate in conformity with the War Powers Act and, by such action, serve the best interests of the Nation.

I think that the President should indicate what additional time he feels he needs. I want to be supportive of the President, but my support is not absolutely assured at this point. I expect the Congress to live up to its responsibility under the act and under the Constitution; likewise, I feel that the act should be observed in its spirit and in its verbiage by the executive branch.

Mr. President, that is all I have to say at this time. I ask unanimous consent that I may have printed in the RECORD the War Powers Act and, together with it, a letter which I wrote to the President on June 10, 1982, urging that we mobilize quickly America's diplomatic resources to assist in restoring unity and full independence to Lebanon; the letter from the President to the President pro tempore of the Senate and the Speaker of the House dated August 30, to which I have earlier referred; my letter to the President on August 31, the following day, in which I again urged that he recognize the war powers resolution and that he submit notification pursuant to that provision 4(a)(1). There are other provisions of the War Powers Act, of course, which are not brought into play. I quote in part from that letter:

To assure that Members of Congress participate in the foreign policy responsibilities assigned by the Constitution, I call your attention to the need for full and timely consultation, as required by section 3 of the war powers resolution.

Any decision to supplement the American contingent in Lebanon requires seeking the advice of Congress to assure the support of the Congress and of the American people.

Mr. President, I also ask unanimous consent to have printed in the RECORD the President's letter of September 29, 1982.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

WAR POWERS RESOLUTION

[Public Law 93-148 (H.J. Res. 542), 87 Stat. 555, 50 U.S.C. 1541-1548, passed over President's veto November 7, 1973]

Joint resolution concerning the war powers of Congress and the President

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

Section 1. This joint resolution may be cited as the "War Powers Resolution".

PURPOSE AND POLICY

Sec. 2. (a) It is the purpose of this joint resolution to fulfill the intent of the framers of the Constitution of the United States and insure that the collective judgment of both the Congress and the President will apply to the introduction of United States Armed Forces into hostilities, or into situations where imminent involvement in hostilities is clearly indicated by the circumstances, and to the continued use of such forces in hostilities or in such situations.

(b) Under article I, section 8, of the Constitution, it is specifically provided that the Congress shall have the power to make all laws necessary and proper for carrying into execution, not only its own powers but also all other powers vested by the Constitution in the Government of the United States, or in any department or officer thereof.

(c) The constitutional powers of the President as Commander-in-Chief to introduce United States Armed Forces into hostilities, or into situations where imminent involvement in hostilities is clearly indicated by the circumstances, are exercised only pursuant to (1) a declaration of war, (2) specific statutory authorization, or (3) a national emergency created by attack upon the United States, its territories or possessions, or its armed forces.

CONSULTATION

Sec. 3. The President in every possible instance shall consult with Congress before introducing United States Armed Forces into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances, and after every such introduction shall consult regularly with the Congress until United States Armed Forces are no longer engaged in hostilities or have been removed from such situations.

REPORTING

Sec. 4. (a) In the absence of a declaration of war, in any case in which United States Armed Forces are introduced—

(1) into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances;

(2) into the territory, airspace of waters of a foreign nation, while equipped for combat, except for deployments which relate solely to supply, replacement, repair, or training of such forces; or

(3) in numbers which substantially enlarge United States Armed Forces equipped for combat already located in a foreign nation;

the President shall submit within 48 hours to the Speaker of the House of Representatives and to the President pro tempore of the Senate a report, in writing, setting forth—

(A) the circumstances necessitating the introduction of United States Armed Forces;

(B) the constitutional and legislative authority under which such introduction took place; and

(C) the estimated scope and duration of the hostilities or involvement.

(b) The President shall provide such other information as the Congress may request in the fulfillment of its constitutional responsibilities with respect to committing the Nation to war and to the use of United States Armed Forces abroad.

(c) Whenever United States Armed Forces are introduced into hostilities or into any situation described in subsection (a) of this section, the President shall, so long as such armed forces continue to be engaged in such hostilities or situation, report to the Congress periodically on the status of such hostilities or situation as well as on the scope and duration of such hostilities or situation, but in no event shall he report to the Congress less often than once every six months.

CONGRESSIONAL ACTION

Sec. 5. (a) Each report submitted pursuant to section 4(a)(1) shall be transmitted to the Speaker of the House of Representatives and to the President pro tempore of the Senate on the same calendar day. Each report so transmitted shall be referred to the Committee on Foreign Affairs of the House of Representatives and to the Committee on Foreign Relations of the Senate for appropriate action. If, when the report is transmitted, the Congress has adjourned sine die or has adjourned for any period in excess of three calendar days, the Speaker of the House of Representatives and the President pro tempore of the Senate, if they deem it advisable (or if petitioned by at least 30 percent of the membership of their respective Houses) shall jointly request the President to convene Congress in order that it may consider the report and take appropriate action pursuant to this section.

(b) Within sixty calendar days after a report is submitted or is required to be submitted pursuant to section 4(a)(1), whichever is earlier, the President shall terminate any use of United States Armed Forces with respect to which such report was submitted (or required to be submitted), unless the Congress (1) has declared war or has enacted a specific authorization for such use of United States Armed Forces, (2) has extended by law such sixty-day period, or (3) is physically unable to meet as a result of an armed attack upon the United States. Such sixty-day period shall be extended for not more than an additional thirty days if the President determines and certifies to the Congress in writing that unavoidable military necessity respecting the safety of United States Armed Forces requires the continued use of such armed forces in the course of bringing about a prompt removal of such forces.

(c) Notwithstanding subsection (b), at any time that United States Armed Forces are engaged in hostilities outside the territory of the United States, its possessions and territories without a declaration of war or specific statutory authorization, such forces shall be removed by the President if the Congress so directs by concurrent resolution.

CONGRESSIONAL PRIORITY PROCEDURES FOR JOINT RESOLUTION OR BILL

Sec. 6. (a) Any joint resolution or bill introduced pursuant to section 5(b) at least thirty calendar days before the expiration of the sixty-day period specified in such section shall be referred to the Committee on Foreign Affairs of the House of Representatives or the Committee on Foreign Relations of the Senate, as the case may be, and such committee shall report one such joint resolution or bill, together with its recommendations, not later than twenty-four calendar days before the expiration of the sixty-day period specified in such section, unless such House shall otherwise determine by the yeas and nays.

(b) Any joint resolution or bill so reported shall become the pending business of the House in question (in the case of the Senate the time for debate shall be equally divided between the proponents and the opponents), and shall be voted on within three calendar days thereafter, unless such House shall otherwise determine by yeas and nays.

(c) Such a joint resolution or bill passed by one House shall be referred to the committee of the other House named in subsection (a) and shall be reported out not later than fourteen calendar days before the expiration of the sixty-day period specified in section 5(b). The joint resolution or bill so reported shall become the pending business of the House in question and shall be voted on within three calendar days after it has been reported, unless such House shall otherwise determine by yeas and nays.

(d) In the case of any disagreement between the two Houses of Congress with respect to a joint resolution or bill passed by both Houses, conferees shall be promptly appointed and the committee of conference shall make and file a report with respect to such resolution or bill not later than four calendar days before the expiration of the sixty-day period specified in section 5(b). In the event the conferees are unable to agree within 48 hours, they shall report back to their respective Houses in disagreement. Notwithstanding any rule in either House concerning the printing of conference reports in the Record or concerning any delay in the consideration of such reports, such report shall be acted on by both Houses not later than the expiration of such sixty-day period.

CONGRESSIONAL PRIORITY PROCEDURES FOR CONCURRENT RESOLUTION

Sec. 7. (a) Any concurrent resolution introduced pursuant to section 5(c) shall be referred to the Committee on Foreign Affairs of the House of Representatives or the Committee on Foreign Relations of the Senate, as the case may be, and one such concurrent resolution shall be reported out by such committee together with its recommendations within fifteen calendar days, unless such House shall otherwise determine by the yeas and nays.

(b) Any concurrent resolution so reported shall become the pending business of the House in question (in the case of the Senate the time for debate shall be equally divided between the proponents and the opponents) and shall be voted on within three calendar days thereafter, unless such House shall otherwise determine by yeas and nays.

(c) Such a concurrent resolution passed by one House shall be referred to the committee of the other House named in subsection (a) and shall be reported out by such committee together with its recommendations within fifteen calendar days and shall thereupon become the pending business of such House and shall be voted upon within three calendar days, unless such House shall otherwise determine by yeas and nays.

(d) In the case of any disagreement between the two Houses of Congress with respect to a concurrent resolution passed by both Houses, conferees shall be promptly appointed and the committee of conference shall make and file a report with respect to such concurrent resolution within six calendar days after the legislation is referred to the committee of conference. Notwithstanding any rule in either House concerning the printing of conference reports in the Record or concerning any delay in the consideration of such reports, such report shall be acted on by both Houses not later than six calendar days after the conference report is filed. In the event the conferees are unable to agree within 48 hours, they shall report back to their respective Houses in disagreement.

INTERPRETATION OF JOINT RESOLUTION

Sec. 8. (a) Authority to introduce United States Armed Forces into hostilities or into situations wherein involvement in hostilities is clearly indicated by the circumstances shall not be inferred—

(1) from any provision of law (whether or not in effect before the date of the enactment of this joint resolution), including any provision contained in any appropriation Act, unless such provision specifically authorizes the introduction of United States Armed Forces into hostilities or into such situations and states that it is intended to constitute specific statutory authorization within the meaning of this joint resolution; or

(2) from any treaty heretofore or hereafter ratified unless such treaty is implemented by legislation specifically authorizing the introduction of United States Armed Forces into hostilities or into such situations and stating that it is intended to constitute specific statutory authorization within the meaning of this joint resolution.

(b) Nothing in this joint resolution shall be construed to require any further specific statutory authorization to permit members of United States Armed Forces to participate jointly with members of the armed forces of one or more foreign countries in the headquarters operations of high-level military commands which were established prior to the date of enactment of this joint resolution and pursuant to the United Nations Charter or any treaty ratified by the United States prior to such date.

(c) For purposes of this joint resolution, the term "introduction of United States Armed Forces" includes the assignment of members of such armed forces to command, coordinate, participate in the movement of, or accompany the regular or irregular military forces of any foreign country or government when such military forces are engaged, or there exists an imminent threat that such forces will become engaged, in hostilities.

(d) Nothing in this joint resolution—

(1) is intended to alter the constitutional authority of the Congress or of the President, or the provisions of existing treaties; or

(2) shall be construed as granting any authority to the President with respect to the introduction of United States Armed Forces into hostilities or into situations wherein involvement in hostilities is clearly indicated by the circumstances which authority he would not have had in the absence of this joint resolution.

SEPARABILITY CLAUSE

Sec. 9. If any provision of this joint resolution or the application thereof to any person or circumstances is held invalid, the remainder of the joint resolution and the application of such provision to any other person or circumstance shall not be affected thereby.

EFFECTIVE DATE

Sec. 10. This joint resolution shall take effect on the date of its enactment.

U.S. SENATE,
OFFICE OF THE DEMOCRATIC LEADER,
Washington, D.C., June 10, 1982.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We share your very deep concern over the current situation in Lebanon.

As you know, the roots of the present conflict stem from events arising out of the Lebanese Civil War of 1975-1976. Since that time, Lebanon has ceased to exist as a free and sovereign country. In fact, that country has been the victim of a de facto partition comprised of a solidly entrenched PLO military presence, Christian and Moslem Lebanese enclaves, and a Syrian military occupation now estimated to include 39,000 troops. Under these conditions Lebanon has been a source of significant instability in the region since 1976. Obviously, under these circumstances the situation can only continue to deteriorate and undermine our long-term interests in promoting stability in the Middle East.

Therefore, we are certain you recognize the importance of mobilizing quickly America's diplomatic resources to assist in restoring unity and full independence to Lebanon. We believe the chances for a cease-fire and a full withdrawal of Israeli forces might be best accomplished if the Syrians withdraw completely and permanently from Lebanon, if the PLO's ability to exercise military and political control over significant portions of Lebanese territory is neutralized, and finally, if the central government of Lebanon is allowed to re-establish control and sovereignty over all of Lebanese territory. The latter can only be accomplished through

free and open elections which, incidentally, have already been scheduled for this summer.

A long range negotiated settlement along these lines should be our ultimate objective. We fear that without such an agreement the region will continue to be plagued by the kind of instability which has precipitated the present crisis.

Thank you very much for your consideration of our views.

Sincerely,

ROBERT C. BYRD.

U.S. SENATE,
OFFICE OF THE DEMOCRATIC LEADER,
Washington, D.C., July 14, 1982.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Following the meeting at the White House on Tuesday, I would like to set forth some of my concerns about the possible deployment of United States troops to Lebanon and the procedures to be followed if the troops are sent to Lebanon.

I believe that it is essential that the Congress and the American people be fully informed about the terms and conditions under which the troops would be deployed. We must have a very clear understanding about the nature of United States involvement and the limitations on that involvement. At the same time, I believe that we should be realistic about the potential dangers that would face American forces in a highly volatile area.

In this regard, I strongly believe that if troops are sent to Lebanon that it should be done in conformity with Section 4 (a)(1) of the War Powers Resolution. I think that Congress should be involved in carefully monitoring the role of the United States forces and that their presence should be subject to the time limitations and conditions imposed by Section 4 (a)(1). If the Administration should seek to rely on Section 4 (a)(2) of the War Powers Resolution, which does not impose similar limitations, I would find it very difficult to support such action. I think we must have the guarantees and safeguards that Section 4 (a)(1) would provide.

I believe that the Legislative and Executive Branches should cooperate to the greatest degree possible on these critical international security issues. In this case it is my feeling that such cooperation and clear-cut understanding by all concerned could best be achieved by reliance on Section 4 (a)(1) of the War Powers Resolution.

Finally, in addition to the assurances you have provided about any American deployment and those I have urged, I would hope that any action by the United States will be directed toward achieving not only peace and stability in Lebanon, but toward progress on a long-term settlement in the Middle East, building on the foundation of the Camp David process.

Sincerely,

ROBERT C. BYRD.

THE WHITE HOUSE,
Washington, September 29, 1982.

Hon. STROM THURMOND,
President Pro Tempore of the Senate, Washington, D.C.

DEAR MR. PRESIDENT: On September 20, 1982, the Government of Lebanon requested the Government of France, Italy, and the United States to contribute forces to serve as a temporary Multinational Force, the presence of which will facilitate the restoration of Lebanese Government sovereignty and authority, and thereby further the efforts of the Government of Lebanon to assure the safety of persons in the area and bring to an end the violence which has tragically recurred.

In response to this request of the Government of Lebanon, I have authorized the Armed Forces of the United States to participate in this Multinational force. In accordance with my desire that the Congress be fully informed on this matter and consistent with the War Powers Resolution, I am hereby providing a report on the deployment and mission of these members of the United States armed forces.

On September 29, approximately 1200 Marines of a Marine Amphibious Unit began to arrive in Beirut. Their mission is to provide an interposition force at agreed locations and thereby provide the multinational presence requested by the Lebanese Government to assist it and the Lebanese Armed Forces. In carrying out this mission, the American force will not engage in combat. It may, however, exercise the right of self-defense and will be equipped accordingly. These forces will operate in close coordination with the Lebanese Armed Forces, as well as with comparably sized French and Italian military contingents in the Multinational Force. Although it is not possible at this time to predict the precise duration of the presence of U.S. forces in Beirut, our agreement with the Government of Lebanon makes clear that they will be needed only for a limited period to meet the urgent requirements posed by the current situation.

I want to emphasize that, as was the case of the deployment of U.S. forces to Lebanon in August as part of the earlier multinational force, there is no intention or expectation that U.S. Armed Forces will become involved in hostilities. They are in Lebanon at the formal request of the Government of Lebanon, and our agreement with the Government of Lebanon expressly rules out any combat responsibilities for the U.S. forces. All armed elements in the area have given assurances that they will refrain from hostilities and will not interfere with the activities of the Multinational Force. Although isolated acts of violence can never be ruled out, all appropriate precautions have been taken to ensure the safety of U.S. military personnel during their temporary deployment in Lebanon.

This deployment of the United States Armed Forces is being undertaken pursuant to the President's constructional authority with respect to the conduct of foreign relations and as Commander-in-Chief of the United States Armed Forces.

I believe that this step will support the objective of helping to restore the territorial integrity, sovereignty, and political independence of Lebanon. It is part of the continuing efforts of the United States Government to bring lasting peace to that troubled country, which has too long endured the trials of civil strife and armed conflict.

Sincerely,

RONALD REAGAN.

THE WHITE HOUSE,
Washington, August 30, 1983.

Hon. STROM THURMOND,
President pro tempore of the Senate, Washington, D.C.

DEAR MR. PRESIDENT: On September 29, 1982, I reported to you concerning the introduction of United States Armed Forces in Lebanon to participate in the Multinational Force (MNF) requested by the Government of Lebanon. The presence of this Force was designed to facilitate the restoration of Lebanese Government sovereignty and authority, and thereby further the efforts of the Government of Lebanon to assure the safety of persons in the area and bring to an end the violence that had tragically recurred. I directed this deployment pursuant to my constitutional authority with respect to the conduct of foreign relations and as Commander-in-Chief of the United States Armed Forces.

We have periodically provided Congress with updated information on the activities of these forces and on the circumstances of their deployment in Lebanon. In light of recent events, I am providing this further report on the deployment, in accordance with my desire that Congress continue to be informed on this matter, and consistent with Section 4 of the War Powers Resolution.

On August 28, sporadic fighting between Lebanese Armed Forces and various armed factions took place in South Beirut; from time to time during the course of this fighting, positions in the vicinity of the Beirut airport manned by U.S. Marines of the MNF came under small-arms fire (without injury to U.S. personnel), and this fire was returned. On August 29, fighting erupted again. Marine positions came under mortar, rocket, and small-arms fire, with the result that two Marines were killed and fourteen wounded. In addition, several artillery rounds fell near the U.S.S. IWO JIMA (an amphibious support vessel lying offshore), with no resulting damage or injuries. As contemplated by their rules of engagement, U.S. Marines returned fire with artillery, small arms, and, in one instance, rocket fire from a helicopter gunship. There were additional exchanges of fire earlier today, August 30, without injury to U.S. personnel.

Later today, a ceasefire came into effect in the area in which the Marines were deployed, and firing on Marine positions ceased. Diplomatic efforts are underway to extend this ceasefire. In the meantime, U.S. forces will be prepared to exercise their right of self-defense should such attacks recur.

I believe that the continued presence of these U.S. forces in Lebanon is essential to the objective of helping to restore the territorial integrity, sovereignty, and political independence of Lebanon. It is still not possible to predict the duration of the presence of these forces in Lebanon; we will continue to assess this question in the light of progress toward this objective.

I will keep the Congress informed as to further developments with respect to this situation.

Sincerely,

RONALD REAGAN.

(An identical letter was delivered to the Speaker of the House of Representatives.)

U.S. SENATE,
OFFICE OF THE DEMOCRATIC LEADER,
Washington, D.C., August 31, 1983.

The PRESIDENT,
The White House
Washington, D.C.

DEAR MR. PRESIDENT: Your report to the Congress yesterday concerning this week's tragic events in Lebanon gives cause for grave concern. These events are redefining the role of the multinational peacekeeping force, and United States participation in that effort. Sectarian violence in that sad country now threatens to rekindle total civil war. The continued presence of Syrian

troops further undermines the prospects for peace and stability. In your letter to the Senate of September 29, 1982, you expressed the belief that American Armed Forces "will be need only for a limited period." Nearly a year later, I am convinced that the increased violence and danger to American personnel requires a reassessment of the situation.

American forces are clearly involved in hostilities within the meaning of Section 4(a)(1) of the War Powers Resolution. Accordingly, I urge that you re-submit notification pursuant to that provision. This will assure the fullest possible cooperation between the Legislative and Executive branches in this important area of international security. As I said in my letter to you of July 14, 1982, we must have a very clear understanding about the nature of United States involvement and the limitations on that involvement.

Your letter does not contain any information about whether or not there is any possibility that additional U.S. combat personnel may be needed in the future to augment our present military commitment. To assure that Members of Congress participate in the foreign policy responsibilities assigned by the Constitution, I call your attention to the need for full and timely consultation, as required by Section 3 of the War Powers Resolution. These Consultations must not be restricted to notice and reportage, but should involve the Congress in the difficult and crucial decisions that must be made when American Armed Forces are exposed to hazards of war. Any decision to supplement the American contingent in Lebanon requires seeking the advice of Congress to assure the support of the Congress and of the American people.

I know you share my concern and sadness at the recent turn of events in Lebanon. I remain hopeful that the United States may play a role in achieving a lasting and stable peace in that country, and in the region.

Sincerely,

ROBERT C. BYRD.

Mr. BYRD. In closing, Mr. President, I make this plea: That in the interests of the American people, the legislative and the executive branches of the Government cooperate, work together, within the context of the War Powers Act.

I want to support the President; but whether I do so or not will depend upon whether or not the requirements of that act are met, because it is in the interests of the United States that the act be observed, and it is in the interests of the people who ultimately may have to send their boys or their daughters or their grandchildren to foreign shores to spill their blood.

I yield the floor.

Mr. KENNEDY. Mr. President, first, I commend the Senator from West Virginia for the leadership he has provided on this particular issue. His interest in this policy question, as he has pointed out, goes back to the origin of the war powers legislation.

From his statement here this afternoon and the exchange of letters, and his comments to the President, we have seen the very deep and continuing concern of the Senator from West Virginia about this issue, about the relationship of the executive branch to Congress. As a student of this institution and someone who has been a leader in this body, he understands full well that when the Executive does not respect a statute, it erodes the institutional basis of cooperation between the Executive and Congress. I believe that myself.

The Senator from West Virginia has spoken to that issue very clearly. To a great extent, the fact that the War Powers Act was enacted was because of the failure of past Presidents to deal effectively with Congress on the issues of war and peace. As he has pointed out, this statute is on the books at the present time, and I think he has made an irrefutable case about its application in this particular case.

As one Member of the Senate, I welcome his leadership on this issue, and I have every intention of supporting his efforts to insure that the war powers legislation will be respected by this administration.

Mr. President, the present crisis in Lebanon is one of the most important issues facing the Nation and the world today. The United States has a strong and abiding interest in helping to bring about a durable peace in the Middle East, and to provide an opportunity for the Lebanese Government to maintain its sovereignty and territorial integrity free from outside forces. There are 1,400 U.S. marines already in Lebanon as a part of the multinational peacekeeping force; 2,000 more are positioned off the Lebanese coast. The battleship *New Jersey* is steaming toward Lebanon to join other naval forces already off the coast.

The framers of the Constitution recognized the paramount importance of the conduct of our military affairs and carefully entrusted these vital decisions to the joint responsibility of the Congress and the President. The war powers resolution, enacted in 1973 over President Nixon's veto, established the framework for congressional involvement in the decision to commit our forces overseas.

The War Powers Resolution represents a wise accommodation between the President's constitutional responsibility as Commander in Chief under article II and the Congress constitutional responsibility under article I to declare war, to raise and support armies, to provide and maintain a Navy, and to make rules for the Government and regulation of the land and naval forces. As the resolution itself states, its purpose is to "fulfill the intent of the frames * * * and insure that the collective judgment of both the Congress and the President will apply to the introduction of the U.S. Armed Forces into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances, and to the continual use of such forces in hostilities or in such situation."

In this time of escalating conflict involving our forces in Lebanon, it is imperative that the procedures established by the war powers resolution be strictly observed. But the President continues to defy Congress and avoid the clear command of the law.

The issue we face is whether the present situation in Lebanon involves "hostilities" within the meaning of the war powers resolution.

Since the end of August, marine positions have been repeatedly shelled by the Druze militia. Each day brings new reports of American casualties. Four marines have been killed in the last 2 weeks, and more than 20 have been wounded. U.S. forces have returned hostile fire, and the President this week has authorized the use of naval artillery and air strikes to protect our forces.

The new Presidential order goes beyond retaliation for direct assault upon U.S. positions. Now, U.S. forces are authorized to help defend Lebanese Army positions as well.

The President has labeled the fighting in Lebanon as "outright civil war," and the Pentagon has authorized hostile fire pay for our forces in Lebanon. It is plain that, by any reasonable definition of the term, the situation in Lebanon involves "hostilities" within the meaning of the war powers resolution.

Under the resolution, the President must make a written report to Congress within 48 hours whenever military forces of the United States are "introduced into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances."

Once a report is submitted by the President under this provision, the military forces must be withdrawn within 60 days—or 90 days if necessary for safe withdrawal—unless Congress declares war, extends the period, or enacts specific legislation authorizing the action.

Both the plain meaning of the word "hostilities" and the legislative history make clear that hostilities are involved in Lebanon. The House report in 1973, which referred to "committing U.S. Armed Forces to hostilities outside the territory of the United States," observed:

> This includes all commitments of U.S. Armed Forces abroad to situations in which hostilities already have begun and when there is a reasonable expectation that American personnel will be subject to hostile fire.

The report further states:

> The word "hostilities" was substituted for the phrase "armed conflict" during the subcommittee drafting process because it was considered to be somewhat broader in scope. In addition to a situation in which fighting actually has begun, hostilities also encom-

passes a state of confrontation in which no shots have been fired but where there is a clear and present danger of armed conflict. "Imminent hostilities" denotes a situation in which there is a clear potential either for such a state of confrontation or for actual armed conflict.

Those are the words of the report interpreting the language of the resolution, for anyone who does not believe that the language itself is very clear and explicit.

The War Powers Act explicitly contrasts "hostilities," which trigger the 60-day time period, with the situation where troops are committed abroad "equipped for combat" but not into hostilities. In the latter case, no time limit is placed on the continued commitment of U.S. troops. The House report observes "while subsection (1) refers to the commitment of U.S. troops to an area where armed conflict actually is in progress, subsection (2) covers the initial commitment of troops in situations in which there is no actual fighting but some risk, however small, of the forces being involved in hostilities."

Even past executive practice, which has defined the term "hostilities" more narrowly than the legislative history requires, justifies the application of "hostilities" to the present situation in Lebanon. The Ford administration stated:

"Hostilities" was used to mean a situation in which units of the U.S. armed forces are actively engaged in exchanges of fire with opposing units of hostile forces and "imminent hostilities" was considered to mean a situation in which there is a serious risk from hostile fire to the safety of United States Forces.

Some may argue that the 60-day time period can only be triggered if the President specifically cites section 4(a)(1) in his report to Congress. The resolution itself refutes that assertion. Section 5(b) provides that in the absence of congressional authorization, troops must be withdrawn "within 60 calendar days after a report is submitted or is required to be submitted pursuant to section 4(a)(1)." The language "or is required to be submitted" makes clear that section 4(a)(1) is triggered if the circumstances so indicate, even if the President submits no report.

The 60-day requirement is thus self-executing, regardless of whether the President explicitly invokes section 4(a)(1) of the resolution.

The executive branch has itself recognized that the decision as to whether a situation involves hostilities is not the exclusive prerogative of the President. Monroe Lee, legal adviser of the State Department, testified to a House subcommittee in 1975:

I think it is perfectly within the power of Congress to decide even if we reported under 4(a)(2) that it was really 4(a)(1) and treat that as the beginning of the 60-day period trigger. I don't agree that the competency is absolute. I think Senator Javits was saying that the Executive can have an interpretation just as the Congress can have an interpretation and in the last analysis it would arise on some sort of lawsuit which the courts would probably decide.

The President's refusal to admit that hostilities are taking place cannot prevail in cases such as this, when the situation so clearly involves hostilities as defined in the act and its legislative history.

In this case, the President's report of August 30, 1983, is ambiguous, since it refers only generally to section 4. But the very language of that report itself is conclusive evidence that U.S. Forces have been introduced into hostilities.

It is clear, at least since the end of August, that American Forces have been involved in hostilities within the meaning of the war powers resolution, and that further congressional authorization will be required to keep our forces there beyond the 60 or 90 days provided in the resolution. I call on the President to submit a request for proper authorization to the Congress promptly, so that we may take timely and appropriate action to protect our forces and end this tragic conflict.

Finally, I believe that the President's actions in Lebanon are also in violation of a separate statute passed by Congress last June, the Lebanon Emergency Assistance Act. Section 4(a) of that act requires the President to obtain statutory approval from Congress for "any substantial expansion in the number or role" of U.S. Forces in Lebanon. The current U.S. military presence in Lebanon began in September 1982, when 1,200 marines were sent to Beirut as part of the Multinational Peacekeeping Force. On September 1, 1983, President Reagan more than doubled our present combat troops in the area by ordering 2,000 more marines into positions off the coast of Lebanon. Yet the President has not sought the required approval from Congress for this expansion in the number of forces there. Nor has he sought the approval of Congress for any of his decisions in recent days to expand the role of our forces in the area.

Our present task is already difficult enough, without the President provoking a needless confrontation with the Congress over the war powers resolution and the other statutes that apply to our forces in Lebanon. No President is above the law. It is time for President Reagan to heed his oath of office and obey the laws of the United States.

Thank you, Mr. President. I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. RIEGLE. I yield.

Mr. BYRD. Mr. President, I thank the distinguished Senator from Massachusetts for his comments on this issue and for his supporting comments with reference to the position that I took. I am very grateful for those comments.

Mr. RIEGLE. Mr. President, I rise to associate myself with the remarks of the Senator from West Virginia and the Senator from Massachusetts on this critical issue.

In the past 3 weeks, four Marines have been killed in action in Lebanon and at least 24 others have been wounded. It is a war zone by any reasonable definition of the term and American forces are involved in hostile action. I think they deserve the active support and protection that our laws and our entire Federal Government can provide. In my view they are not receiving that at this time, and I am deeply disturbed by this fact.

Military hostilities are underway today and any hour may bring the news that additional U.S. troops have been killed or wounded. As is known, additional U.S. Marines have been moved into the waters off Lebanon. We have learned today that U.S. military field commanders have been given new authority by President Reagan to use available U.S. military forces against such targets as they may determine not only to defend U.S. forces stationed in Lebanon but apparently in support of other Western military forces and even in support of the Lebanese Army itself.

The full meaning and implication of these new military orders is not clear. But they appear to lead us more deeply into the war that is now underway in Lebanon.

What is clear to me is that these events now trigger the provisions of the War Powers Act, and the administration is required to implement the provisions of that act.

It is obvious that U.S. Marines are stationed in areas of imminent danger, and these military forces deserve the protection and support of the full force of American law and, therefore, the active involvement of Congress as well as the executive branch is necessary.

Basic constitutional requirements necessitate this as do the legal requirements of the War Powers Act itself.

There is no proper basis for the administration to any longer sidestep the legal requirements of the War Powers Act and it is essential that they move without further delay to meet the requirements of that act.

The nature and extent of future U.S. military involvement in Lebanon is an open question that deserves the most careful consideration but only after the procedures of the War Powers Act have been implemented.

I yield the floor.

Mr. JEPSEN. Mr. President, the time has come for Congress to exercise its role of authorizing the continued presence of our marines in Lebanon. I commend Senator MATHIAS for introducing Senate Joint Resolution 159 on September 12, 1982, and reaffirming the important principle that the decision to deploy U.S. forces in hostile situations be a collective decision of the Executive and Congress.

When the President reintroduced the U.S. Marines into Lebanon as part of the multinational peacekeeping force on September 29, 1982, he reported to Congress as required under the War Powers Act of 1973 without specifying under which section of the act he was making the report. The administration claimed, and the Congress generally conceded, that the marines were not being introduced into a situation of hostilities or imminent hostilities. Therefore, we did not require full congressional authorization for the marines to remain in Beirut for more than the 60 to 90 days as specified in section 5 of the war powers resolution.

On August 29, the situation in Lebanon entered a new phase as two marines were killed in the fighting between the various factions near the Beirut Airport. The fighting has continued ever since. It first appeared that the marines were simply receiving random fire from the Druze militia fighting in the area. Now, there is strong evidence that the marines are being deliberately targeted by some of the factions fighting in and around Beirut.

Because of the involvement by the marines in the fighting, the continued deployment of the U.S. Marines in Beirut must be subject to congressional authorization. We must not shirk our responsibility to work with the executive branch to use our Armed Forces as a tool of foreign policy. If the deployment of the marines in the very volatile environment of Lebanon is to have the full support of the American people, they must have a voice in the decision through their elected representatives in Congress.

At present, the marines are playing a constructive role as a force for peace in Lebanon. We are committed to support the central government and the National Lebanese Army in their efforts to bring reconciliation between the warring factions in the torn Lebanese society. One instrument for rebuilding Lebanese society is the concentration of military power solely in the hands of the Lebanese Army.

I must confess that I have been pessimistic about the prospect of molding an effective fighting force out of an army of Christian Lebanese officers commanding an enlisted force of Lebanese Moslems. However, the infusion of new equipment and the intensive training we have provided seems to have paid off. The Lebanese Army has scored some successes on operations in recent weeks and the legacy of an army which immediately retreated to the barracks upon the outbreak of fighting is being erased.

But the Lebanese Army alone has no hope of cementing the Lebanese people into a unified nation. President Gamayel must work to make the Government and leading institutions in Lebanon more reflective of the balance of the general population.

I repeat, President Gemayel must work to make the Government and leading institutions in Lebanon more reflective of the balance of the general population. All factions and ethnic groups must have a share in the national life of Lebanon if it is indeed to succeed on a peaceful basis.

We must never lose sight of the role of our marines in helping to bring about a peaceful resolution of the deep divisions in Lebanon, and in providing an effective counter to those forces external to Lebanon which would like to see the fighting and dissension continue.

The marines have a constructive role to play, and I will continue to support their deployment in Beirut as long as they are able to carry out their peacekeeping mission.

Mr. President, a united and independent Lebanon is critical to the success of our Middle East policy. It is now for the Congress to decide whether the risks to our marines are outweighed by the prospects of peace in Lebanon. But in this globe of ours, which is very conscious of signals and is very concerned about peace and nuclear holocaust and the proliferation of nuclear capacity, and so on, it is essential that this country, as a nation unified, present a bipartisan unified foreign policy to the rest of the world.

I think this may be in itself a unique situation that we find ourselves here now in Lebanon, a time to forge that bipartisan, unified foreign policy this country might present to the rest of the world.

In any event, Mr. President, I think the time has come for the Congress to exercise its role in working together with the executive branch to determine whether our marines indeed shall continue to stay in Lebanon.

The PRESIDING OFFICER (Mr. SPECTER). The Senator from Florida.

Mr. CHILES. Mr. President, I want to say at the outset that I wish to associate myself with the remarks of the minority leader, Senator BYRD from West Virginia, and also the remarks of the Senator from Massachusetts and the Senator from Michigan.

I think we find ourselves with two debates going on here or the beginning of two debates. They may be the most far-reaching debates we are going to have in the Senate this year because of the possible consequences that we find for the United States.

Of the two debates going on, the first is on the question, should we invoke the War Powers Act, and the second is, what should be the U.S. policy in Lebanon. I really do not think, Mr. President, we should confuse those two debates. I think we ought to take them separately because they are separate.

Invoking the War Powers Act is not a referendum on administration policy in Lebanon. It should not be a partisan issue; neither one of the debates should be, for that matter. But it clearly derives from article I, section 8 of the Constitution which gives to the Congress the responsibility to make decisions on the commitment of Armed Forces abroad. Thus, whether or not a Senator believes that our troops should be taking fire in Beirut right now, whether we should or should not be there with our marines and our expanded military presence, it is our responsibility to the Constitution and to the public to invoke the War Powers Act and to do that immediately.

As a bipartisan body, we should and must conclude that the escalation of the violence and the deaths we have suffered in Lebanon have triggered the operative provisions of section 4(a)(1) of the war powers resolution. To maintain that our marines in Lebanon are not facing actual hostilities is not only a myth but it certainly is a disservice to the American public and it is a disservice to those marines and their families.

(Mr. JEPSEN assumed the chair.)

Mr. CHILES. So the first decision we have to make is on the War Powers Act. It must be invoked with the 60-day limit, and then, Mr. President, I think we can get on with the second and the very, very important debate, what to do in Lebanon.

In invoking the War Powers Act, we should not add 120 days to the length of the time the President has to come back for congressional authorization; we should not add 6 months; we should not add 18 months. Neither should we prejudge the issue. We should invoke the act, clear and simple, as it is written.

Then when the President begins to consult with Congress we can take the time to gather the facts and make an informed judgment on our policy in Lebanon.

Mr. President, I remember so vividly our discussions in regard to Vietnam when I came to the Senate as a freshman Member in 1971. At that time we were beginning to realize we had entered into a situation where we were not going to have a policy of trying to win. We had drawn lines which we would not cross. Our troops were fighting with their hands tied behind

their backs. Day after day we took those casualties, and day after day the Congress sort of sat back with a great debate going on and great divisions in the Congress. But at the same time many of us saying as we would answer our mail, "Well, it wasn't our decision to send the troops there. Now that they are there, we can't cut off the support. We have to continue to provide the support even though we weren't part of the decision to send them there."

In the aftermath of that disaster, Mr. President, we began to ask ourselves how did that happen, and how in the world can we keep that from happening again?

We have had two undeclared wars since World War II. In Korea we had a major war. I had an opportunity to serve at that time in the service. Then in Vietnam we took tremendous numbers of casualties with an expenditure of billions and billions of dollars. Under no circumstances could you really look back and say those were not wars; but those were never declared wars. They were never wars in which we could pinpoint that the Congress, the elected representatives of the people, had actually spoken that we were going to make war. In neither one of those wars did we ever have a clearly stated goal or purpose.

In Korea we had the Yalu River. We would not cross that. We would not turn loose our might, the might of our bombers, to try to hit bases beyond that river. It was a war of attrition. It was a war in which we suffered tremendous numbers of casualties. We got out of that one a little bit better than we got out of Vietnam. But many of us, in looking back to that history, decided we had to come up with something, and that was the genesis of the War Powers Act.

I believe, Mr. President, that never was the War Powers Act intended to handicap the President, to take away his powers. I do not think we can. They are constitutionally granted. Furthermore, Mr. President, I believe one purpose of the War Powers Act was to force Congress to make us take our responsibility under the Constitution that we are the ones to declare war.

Mr. President, we did not take the responsibility in Korea; we did not take the responsibility in Vietnam. We suffered tremendously because of that and our people and Armed Forces never understood what they were really there for, what was their goal, and what was their purpose.

After those wars, I made a pledge to myself. I prayed to God that I would never be involved in sending any of our young men to war; but if they are going to go to war, I was not going to have the responsibility for sending them without them knowing why they were there, without the American people knowing why they were there, without there being a commitment, and without us determining that if we are going to fight a war, we are going to fight under circumstances in which we can say when we have won.

Mr. President, I have heard many remarks about Central America: "El Salvador, look out, this is another Vietnam." I never really shared that feeling.

But I have that feeling about Lebanon. I have it every night when I am trying to go to sleep; I have that feeling when I wake up at night—and I have been waking up at night—and I have it every morning when I wake up, because we are going into the same thing.

I can hear the voices on the Senate floor during all the debates about Vietnam. I feel all of the tragedy of that. I feel in my conscience that part of the time when I was here as a freshman Senator trying to grope with what to do about Vietnam, I did not know what was right and what was wrong. Mr. President, I know now. And I know that we cannot sit and allow this to escalate, allow further troops and further casualties, without us taking our share of the responsibility.

We are the voice of the people under our Government. We are the elected representatives. We are the ones that go home and listen, as we have done during this recess, and hear the concerns. We are the ones that actually should report back and also take the responsibility for what we are doing.

This is our opportunity. It is not only our opportunity, it is our duty and our responsibility. Mr. President, we cannot shirk it. We must see that the law of the land, the War Powers Act, is complied with. We must then go into the debate on Lebanon and ask the hard questions. What is our purpose? Why are we there? Do we have a purpose that we should commit blood and our lives for? Is there a way of trying to win in the situation there? The answers, Mr. President, I do not prejudge now because I cannot tell you I have the answers. I am truly concerned, and I expect to spend an awful lot of time trying to determine what are the right answers and what my conscience tells me are the right answers.

But I have no doubt as to whether the act should be invoked. I have absolutely none as to what our duty is in this first step of the debate. I hope that the President will see that and that we will move forward to the second debate as to what our policy should be.

Mr. President, today's Miami Herald printed an editorial which spoke eloquently to this subject. The title of the editorial could well be the title of my remarks today. It was "Deal Congress In," and I request that it be printed in the RECORD at this time.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

DEAL CONGRESS IN

The controversy over the U.S. role in Lebanon is easily misunderstood, and should not be. It is not, at this point, a struggle between supporters and opponents of President Reagan; between hawks and doves, isolationists and interventionists, between Democrats and Republicans, or similar casts of antagonists.

Such splits yet may emerge, but at this point the debate submits Lebanon as a test case for resolving questions of legal procedure and institutional prerogative. That does not minimize the question's importance. To the contrary, the debate is over who holds the power to commit the United States to war, which is the most serious power entrusted in government. The struggle is rooted in Constitutional ambiguity, as old as the Republic, it pits Congress against the Presidency.

With one exception, President Reagan's decisions so far regarding Lebanon have drawn little criticism, and they merit none. His initial commitment of Marines as part of the multinational peace-keeping force was sound.

In recent weeks, as hostilities intensified and Marines died, the President responded quickly and admirably. He ordered sufficient force to be used to protect the exposed Marines and sent backup troops to bail them out if needed. Equally praiseworthy was his decision, taken in concert with the other governments participating in the the peace-keeping force, not to accede to the request from Lebanese President Amin Gemayel to increase the force to 12,000. Mr. Gemayel hoped that the multinational force would impose the order that eludes his army. Such a fundamental change of scope and mission in the murk of what Mr. Reagan recognizes as a "civil war" would be most ill-advised.

Mr. Reagan's balance of decisiveness and restraint, then, merits praise. This one exception is his understandable reluctance to invoke the War Powers Act. To do so would require Congress to approve of a continued U.S. presence amidst hostilities within 90 days or force the withdrawal of troops.

No President welcomes the sharing of authority over foreign policy with Congress and Mr. Reagan is no exception. Therefore his Administration continues to bend itself into verbal contortions, trying to deny that U.S. forces in Lebanon are amidst hostilities. This is a sham and should be stopped. Marines are exchanging fire and dying in an indisputable combat situation. The War Powers Act requires—as a matter of law—that Congress now be involved in the decision over whether U.S. troops shall remain in danger or not, and if so, under what terms.

The Constitution grants Congress the power to declare war, and makes the President the Commander-in-Chief. The War Powers Act is a statutory attempt to bridge the gap created by the Constitution over commitment of U.S. forces to battle. As such it is a direct extension of the Constitutional framework of checks and balances between branches of Government. A Supreme Court decision earlier this year outlawing the legislative veto may or may not have crippled the War Powers Act; clarification

of that point may require another Supreme Court test.

In the meantime, the War Powers Act remains law; the President must abide by it. Congress now must share anthority in defining U.S. interests in Lebanon and how those interests best are served. This process affords the nation a needed opportunity to forge a shared resolve.

Mr. ZORINSKY. Mr. President, I rise to express my deep concern over the failure of the administration to invoke section 4(a)(1) of the War Powers Act in connection with the continued presence of U.S. forces in Lebanon. This section of the War Powers Act requires the President to report to Congress when U.S. forces are introduced "into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances." The circumstances in Lebanon are that brave U.S. servicemen are fighting and dying. No legal nicety or obfuscation can make that set of circumstances anything other than hostile. And if there is one lesson from our Nation's experience in Vietnam on which we all agree, it is that when Americans are asked to fight and die, we had better make certain that a united country is behind that effort.

Mr. President, that is the heart of the War Powers Act, which our Founding Fathers might well have designed if they could have foreseen the 20th century. Our argument is less over the words of the Constitution, though I believe they sustain the role of Congress in this matter, and more over the spirit of democracy given life by that document. It is clear that the framers of the Constitution intended to create a balance of power in order to assure permanently a democratic form of government. That balance requires the involvement of the Congress in the major decisions and actions of the Government. The War Powers Act, by requiring the President to report to the Congress when U.S. forces are placed in hostile situations and by requiring the Congress, as the people's representatives, to approve the continued presence of U.S. forces in such situations after 60 days, provides an orderly mechanism for accomplishing what the Constitution and commensense demand.

We should be candid: The President should want the recorded and unequivocal support of Congress for his decision to introduce U.S. forces into Lebanon under the present circumstances. A practical prerequisite for such action should be a nation united. For my part, this is not a subterfuge for trying to force the President to withdraw U.S. forces from Lebanon. Whatever the wisdom of our initial decision, I agree with the President that to withdraw at this moment would be an unmitigated disaster. But if young Americans are to be asked to risk their lives in pursuit of peace, we ought all to be behind that effort giving them the support they need.

Mr. SPECTER. Mr. President, first, I thank the Chair for presiding in my place so that I may speak on the war powers resolution issue.

I join with those who earlier today have urged that the President acknowledge the applicability of the War Powers Act. I commend Senator BYRD of West Virginia for his very learned presentation and historical analysis today. I agree with the conclusions which he has reached from the historical analysis which he has presented on this floor.

My view is that hostilities are present in Lebanon and it is important that the War Powers Act be observed. It is a mandate derived from the constitutional power of the Congress of the United States to declare war.

The Founding Fathers were wise in vesting that responsbility with the Congress because, whatever else may be said about the institutions of the House of Representatives and the Senate, we are closer to the people than any other organ.

During the past recess, my experience, duplicated by virtually all of our colleagues in the Congress, was to return to the home State and to travel, to have open houses and to take the pulse of the people and get the feelings of the people of my State, as the Congress took the feelings of the American people. During the course of many open houses all over my State, I heard great concern about Lebanon, Central America, the War Powers Act, and a wide variety of other subjects.

But there is no question about the appropriate role of the Congress in deciding whether there ought to be a continuing commitment of American troops in Lebanon.

I think Senator BYRD was preeminently correct in saying that the likely result would be to strengthen the President's hand in having greater support for the action which he has taken here. And I would state that my instincts are to support the President in what he has done in Lebanon; that it has been an appropriate balance, with some 1,370 American troops as part of a multinational force drawn also from England, France, and Italy; that he has been correct in denying the request of President Gemayel of Lebanon to increase the number of our troops or to get involved in the mountain fighting; and he has been correct in using American naval forces to bomb mortar installations which had launched shells which caused the death of some U.S. Marines.

I think Senator CHILES speaks with wisdom in wanting to have a full and open debate on the subject before a final decision is made as to our stand there. And I certainly would reserve that final judgment myself. My instinct is to support fully the President in what he has done. But it is the congressional role to declare war and it is the congressional role to make a decision under the War Powers Act.

I want to lend my voice today on the floor of the Senate, because I think there is widespread support for this view on both sides of the aisle, Democratic as well as Republican, so that this debate may be considered by the President and his subordinates in reaching their decisions.

I thank the Chair, and I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

(Mr. SPECTER assumed the chair.)

Mr. BENTSEN. Mr. President, when I first came to the Senate in 1971, the tradition of a maiden speech was a lot stronger than it is today.

I remember my maiden speech very well. I remember how pleased I was that the distinguished senior Senator from the State of Mississippi, the chairman of the Armed Services Committee, of which I was a member at the time, would come and hear me deliver it.

Part of the tradition of the maiden speech for a Senator was that he chose that thing that was of the highest priority to him, something that he thought was of national concern. I chose the War Powers Act as a freshman Senator. I chose that as the subject to work on. I was one of the coauthors of it and I worked with Hubert Humphrey and JOHN STENNIS and Jack Javits, working to assert the congressional constitutional role in situations like the one we face now where American troops have entered into an area of potential combat in Lebanon.

In my opinion, the initial decision to put U.S. troops into Lebanon was wrong. It is a lot easier, though, to get into Lebanon than it is to get out of Lebanon. And the equations have changed now that they are there; the justification and the responsibilities have changed. Those are the things that should be debated before this body.

The democratic government derives its just powers from the consent of the governed, and momentous decisions of war and peace, life and death must be made by the elected representatives of the people.

We do not challenge the authority of the President as Commander in Chief of the military forces. We do not challenge his constitutional right to direct the conduct of war once the decision has been made through the democratic process that we must wage war.

But we would be negligent, indeed we would have been negligent of our own constitutional obligations, if we relegated to one man the decision of

whether or not our sons should go to war. The responsibilities of the President are awesome indeed and no President should welcome or accept the sole responsibility for involving this country in war. He should welcome the fact that he has a partner in that terrible decision. He should insist that the Congress participate in any decision leading in that direction. And Congress, for its part, should demand its rightful role and be equally assertive in sharing that responsibility. We ought to measure up to it.

The people understand and even respect differences in opinion, but they lose that respect and they do not understand when momentous decisions affecting their lives and the lives of their sons are made outside of the representative insititutions which they, by their rights, control.

When they do not participate in such decisions through their representatives, the institutions are weakened and respect for all institutions is lost.

There can and there will be disagreements between the President and the Congress, but there need not be distrust. The public business must be conducted in an atmosphere of mutual respect and confidence that will, in turn, inspire the respect and the confidence of every citizen.

Mr. President, I believe that the War Powers Act is clear. It was designed specifically to prevent the recurrence of situations such as the Vietnam war where some 50,000 Americans lost their lives without a declaration of war or specific congressional authorization. Today U.S. Marines are being shelled, they are being wounded, and they are being killed in Lebanon. They are being authorized to call in air strikes and respond more aggressively to provocations. I can only suggest that if the War Powers Act is not invoked under these kinds of conditions, then it is worthless. It is a scrap of paper and we ought to throw it away and we ought to forget it. We might as well say to the President, "Well, you can send U.S. troops into combat anywhere, any time you want, without congressional approval. Forget the War Powers Act. That was just a hangover from Vietnam."

I do not believe that the U.S. Senate is prepared to abdicate its legal and constitutional prerogatives in an area of such fundamental importance. Today we are worried about the War Powers Act on Lebanon. Sometime in the future we could have a difficult decision in respect to El Salvador or Nicaragua or North Africa.

It is really not clear to me, Mr. President, why the President is so intransigent on the issue of the War Powers Act. My guess is that the Congress would support the presence of U.S. Marines in Beirut as a part of the International Peacekeeping Force. I think the President could probably get approval under the War Powers Act and establish a clear legal and moral basis for that presence. In the process we could hopefully hammer out a clear understanding of why our marines are there, what they can hope to accomplish. Perhaps a potentially divisive situation would be turned into one of broad bipartisan support.

But the intent and the policies of the President and what he seeks to achieve have to be clearly stated, and they have not been to this point.

Mr. President, I will not be a party to the evisceration of the War Powers Act. If the President refuses to invoke the provisions of this act it will be extremely difficult for me to support the continued presence of U.S. forces in an area of combat such as Lebanon. In this instance, I believe the principle is as important as the presence because that principle is the continued role of Congress in decisions regarding war and peace.

I see my friend from Maryland, the squire of Maryland, Senator MATHIAS. I want to congratulate him for his efforts on this issue in trying to protect the integrity of the War Powers Act.

The Senator is correct in pointing out that this is a corporate endeavor, and for that reason I do not think it is sufficient for Congress to start the clock running unilaterally.

Mr. MATHIAS. If the Senator will yield, I thank him for his very generous reference.

Mr. BENTSEN. I thank the Senator.

I believe the administration should acknowledge and fulfill the provisions of the War Powers Act. If they do, then I am prepared to cooperate fully in an effort to bring about a prompt congressional decision on the presence of our forces in Lebanon.

I am not prepared to be a party of the dismantlement of the War Powers Act. I want to make that point just as clear and as forcefully as I know how.

Mr. President, I ask that my colleagues join together in urging this administration to fulfil the responsibilities and requirements of the War Powers Act. I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KASTEN. Mr. President, at this point the situation facing our marines in Lebanon is a very serious one. Since August 29, four U.S. Marines have been killed in Lebanon as a result of hostile fire, and numerous others have been wounded.

However, the continued presence of U.S. forces in Lebanon as part of the Multinational Peacekeeping Force is vital to achieving peace in the Middle East. A strong and independent Lebanon, free from external interference, is vital, not only to U.S. interests, but to the efforts toward world peace.

In view of the critical U.S. interests in securing the stability of Lebanon, and the fact that our marines have been the object of hostile fire—and every indication is that this will continue—I believe the decision to keep our forces in Lebanon should not rest with the President alone.

Therefore, I believe section 4(a)(1) of the war powers resolution should be invoked. Section 4(a)(1) states that—

> In the absence of a declaration of war, in any case in which the United States Armed Forces are introduced . . . into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances. . . .

The continued presence of our forces beyond 60 to 90 days has to be authorized by the Congress.

If the President were to invoke this section of the war powers resolution I believe he would find overwhelming bipartisan support in the Congress for the continued presence of our marines in Lebanon. I am convinced Congress would not vote to pull the marines out of Lebanon. Most Members of Congress realize that to do so would result in increased violence and bloodshed, leading to the probable collapse of the government of President Amin Gemayal. None of us would vote for such an outcome in Lebanon.

If the United States were to withdraw from the Multinational Force, that force would quickly dissolve. Our withdrawal would clear away any obstacle to the Druze militia escalating the fighting in Lebanon. This, in turn, would most likely provoke renewed fighting between Israel and Soviet-backed Syrian troops. In essence, the U.S. presence in Lebanon is vital to preventing another war in this highly volatile and strategically important region of the world.

Mr. President, I strongly believe that by invoking section 4(a)(1) of the war powers resolution, the President would marshal public opinion, through the elected representatives in the Congress, in support of our Government's policies in Lebanon. The timing is right for the President to act. If he does so now, I am confident that he will have bipartisan, bicameral support. If he waits, there is a danger that the American Peacekeeping Force could become a strictly partisan issue. Congress and the President must act in concert. By so doing, the United States will be sending a signal to potential adversaries in the Middle East, and elsewhere, that Congress is more than willing to share the responsibility with the President for the commitment of U.S. Armed Forces in Lebanon—a commitment forged in the belief that only in this way can we hope for peace and stability in the region, and perhaps throughout the world.

Mr. President, I yield the floor.

Mr. EXON. Mr. President, I salute and thank the President for his recent action in granting field commanders in the Beirut area the authority to retaliate by naval and ground fire power against attacks on our marines. To date, they have become all but sitting ducks, handcuffed in their fox holes. We could or should do no less.

The larger question that confronts us, it seems to me, is what do we do now?

It is this Senator's conviction, often stated since the beginning of our direct involvement there, that our ground forces should never have been deployed on Lebanese soil. My concern was and is that a superpower's ground forces serve essentially as a dangerous tripwire which could easily trigger our all-out involvement in a major confrontation. In this case again, we are sinking into a situation over which we could lose control. Quicksand is always dangerous and there is a lot of it in the Middle East today.

The question comes, now that the fat is in or near the fire, what do we do?

It is clear that we cannot immediately cut and run. This term has become a catch phrase by some who seem to be saying that our only alternative is for a long-term commitment of troops now for at least 6 more months, or up to 18 months or longer.

Such is not my view. I suggest we should be planning now to get our ground forces out of Beirut, and not to put more in unless required to protect our present position.

We are about to become exercised about the War Powers Act and a great debate is likely to be waged about the rights and wrongs of invoking this act on the basis of whose turf is tromped on between the executive and legislative branches. That, in my opinion, is not the key issue, as important as it might be to constitutional scholars.

Our first step should be to convince the President that the War Powers Act should obviously be invoked, giving the Congress and the President 60 or a maximum of 90 days under that act to review the difficult situation we find ourselves confronted with. I would hope we could bring diplomatic pressure to bear, combined with economic and military hardware assistance to the Lebanese Government, so as to withdraw our ground forces. If that proves unworkable for any reason, the U.S. ground forces would have to leave Lebanon in 60 to 90 days unless Congress votes to let them stay. As nearly as I can tell, that was the logic behind the War Powers Act requirements. Why are we not insisting it be employed rather than continuing to fly by the seat or our diplomatic and military pants in Beirut?

In my opinion, we should not be making any long-term commitments before we understand all the facts and ramifications, and I warn against what appears to be a rush to enter into another form of a Gulf of Tonkin resolution, this time in the Middle East.

We need some time to reason together. The time provided in the War Powers Act is obviously the best way to proceed at this juncture.

Mr. President, I yield the floor.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, it is clear that we need more time for the presentation of the debate on Lebanon and the War Powers Act. I ask unanimous consent that the time for the transaction of routine morning business be extended to the hour of 5:30 p.m. under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, I can remember being both a country lawyer and Governor of my State during the Vietnam war. I frankly confess that I was not all that opposed to the war until my two sons began to reach draft age. But it was not just because they were reaching draft age that I came to oppose the war; it was because I knew that if they were called upon to go, they at least ought to have the right to know what was involved and why they might be called upon to give the full measure of devotion in Vietnam.

As I agonized over the role that I had to play in explaining to my own sons why they had to go to war, I could not come to any kind of persuasive conclusion that our role in Vietnam was legitimate or in our national interest. So I turned against the war.

The interesting thing about our society as opposed to almost any other society is that it was public opinion in this country that brought that war to an end, but it was late in coming and it was after 55,000 American men died and 250,000 were injured.

Joe Stalin used to say one death is a tragedy; a thousand deaths is a statistic. Having just returned from the Soviet Union, I must say that I am afraid that that is still the Soviet mentality. But it is not ours. We believe in the sanctity of life and we believe that the four marines who have died already in Lebanon and the 55,000 who died in Vietnam, to say nothing of the untold misery and costs in human and economic suffering that was caused there—each one is a matter of great concern to this Nation. It ought to be a matter of great concern to every Member of this body.

So, I simply want to say this afternoon—and unless something is forthcoming soon, I shall say a great deal more, as will many of like mind—that as a country lawyer, I often wondered why Congress did not do a better job of handling the Vietnam war. Why was the President allowed, without any constitutional declaration of war by the Congress, to fight a war in Vietnam which nobody ever understood?

That was another era in the history of this country where it did not pay politically to talk sense—not the first, nor will it be the last.

Mr. President, there were people all across the country who wondered why the Congress did not assert itself and why nothing really meaningful was done here. Well, it was because nobody wanted to leave our men stranded over there; nobody wanted to cut and run because of the perception that such an action might convey to the rest of the world about United States resolve in its fight against communism and Communist governments. But for all of those reasons, none of which is very persuasive, we continued. It was a mammoth tragedy, but in the wake of that tragedy, Congress did something to try to make sure we never got caught in that situation again. That was the passage of the War Powers Act.

Mr. President, we have a very checkered history. It was not just in Vietnam. The Senator from Nebraska knows nobody ever declared war in Korea. President Ford did not declare war during the Mayaguez incident, when we were trying to recover 50 people who had been taken off the Mayaguez by the Cambodians.

There is time after time in our history where the President has introduced troops into hostile situations and has literally waged war, and Congress was simply either a willing conspirator or just lacked the courage to do anything about it.

That was not the intention of the Founding Fathers when they wrote the Constitution. The Founding Fathers of this Nation did give the President the authority to repel attacks.

In 1941, when the Japanese attacked Pearl Harbor, nobody expected Franklin Roosevelt to wait until he could convene Congress and get a declaration of war. It did not take long in coming. It happened immediately. But he had a right to do it. He always has the right to repel attacks.

If you read the Federalist Papers, Alexander Hamilton was very clear on that point. They intended for the President to have that right, and they intended for him to be Commander-in-Chief, much as the kings have been commanders in chief in England. But they specifically said that Congress is the only body that shall have the right to declare war.

There is another Federalist Paper—I think it is No. 69—by Alexander Hamilton in which he goes into great detail about the debate that went on in the Constitutional Convention on that issue. The words originally were: "Con-

gress shall have the right to make war." They found that word faulty, and they changed it from make to declare.

In any event, Congress decided that we ought to start living up to our constitutional responsibilities. Let the President introduce troops where there is an attack, but any time he introduces troops into hostile situations, he ought to at least notify Congress, and we will decide whether it is a matter on which we want to declare war, whether it is a matter we want to tolerate, or whether it is a matter from which we want to withdraw.

It seems to me that the President would welcome with open arms the support of Congress for the troops in Lebanon and our policy there. It is a terrible onus for the President to take that on unilaterally, especially with Congress objecting not to the handling of it but to the President's flouting of the law.

If we are a nation of laws, it surely ought to apply to the President. If it does not apply to the President, it does not apply to anybody. Why should some two-bit white-collar criminal abide by the law, if he sees the President of the United States thumbing his nose at it?

The War Powers Act was a very carefully crafted law. It was debated and debated in committee and on the floors of both Houses before it was passed. It was not something done hastily.

If you read English and you understand the English language, listen to the wording of the War Powers Act.

In section 2(a), Congress sets out the policy behind the act, and here is the stated purpose:

> * * * to fulfill the intent of the framers of the Constitution of the United States and insure that the collective judgment of both the Congress and the President will apply to the introduction of United States Armed Forces into hostilities, or into situations where imminent involvement in hostilities is clearly indicated by the circumstances * * *.

I ask, if you read English, is there anything confusing or ambiguous about that? They said that the purpose is to fulfill the intent of the framers of the Constitution, and that is that the U.S. Congress declare war, and that the President be Commander in Chief.

Section 2(b) of that act recognizes the power of Congress under article I, section 8, of the Constitution to do all those things "necessary and proper" for exercising other powers.

Section 2(c) says that the constitutional powers of the President to introduce Armed Forces into imminent hostilities are to be exercised only pursuant to first, a declaration of war, second, specific statutory authorization, or third, a national emergency created by attack upon the United States, its territories or possessions, or its Armed Forces.

Now, do you read English? There is absolutely nothing confusing or ambiguous about sections 2(a), 2(b), or 2(c).

Section 3 just says that the President, where he can, at least will consult with Congress before introducing U.S. forces into situations where imminent hostilities are anticipated.

Section 4—I hate to get legalistic about this, but how can you discuss this without getting legalistic?—section 4 is a critical section. If you read English and if you understand English, I want you to listen to this very carefully. Section 4 says:

> In the absence of a declaration of war, in any case in which United States Armed Forces are introduced—
>
> (1) into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances;
>
> (2) into the territory, airspace of waters of a foreign nation, while equipped for combat, except for deployments which relate solely to supply, replacement, repair, or training of such forces; or
>
> (3) in numbers which substantially enlarge United States Armed Forces equipped for combat already located in a foreign nation;
>
> the President shall submit within 48 hours to the Speaker of the House of Representatives and to the President pro tempore of the Senate a report, in writing, setting forth—
>
> (A) the circumstances necessitating the introduction of United States Armed Forces;
>
> (B) the constitutional and legislative authority under which such introduction took place; and
>
> (C) the estimated scope and duration of the hostilities or involvement.

First. Is Lebanon a hostile situation? Well, when you have four marines dead and more than a dozen others injured, some seriously; when everybody believes that it is a quagmire likely to escalate and the marines are being subjected to artillery barrages every day, that is not something likely to become hostile—it is hostile.

All the War Powers Act says is that the President will submit a report. We will hear arguments by people on the other side of this issue saying that they believe that, as Commander in Chief, he has the authority to do this. If he does, why does he not submit it in his report and say, "I am submitting this report to you and telling you that I have the privilege and the constitutional right—indeed, the duty—to do what I have done."

So the President is required, under the bill, to report to Congress, within 48 hours, the introduction of troops into "hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances."

Not only have American marines lost their lives, not only are other American marines going to lose their lives, not only have American marines been injured, and not only are more and more American marines going to be injured, but also, the President has said that we are going to retaliate—indeed, we have retaliated—with mortar and artillery, and then some.

We are in a combat situation just as surely as if Congress had declared war on the Druze and the Palestinians and everybody else who is firing at the marines.

I do not think the Supreme Court would touch the first section of this. There is no question that the veto power of Congress has been declared unconstitutional. You can make an argument that the Chada decision does not really render the veto power unconstitutional. I agree with the position of the Supreme Court. I do not think one of the two Houses should be vetoing provisions. The Founding Fathers did not set up anything such as that.

I voted for a lot of those vetoes here. They come in handy, and they can hold the President's feet to the fire. But the Founding Fathers intended Congress to pass bills and the President to sign them.

So I have no quarrel with the Chada decision.

But they did not intend for the President to declare war either. That is the reason they specifically gave that very awesome responsibility to Congress.

Section 5(b) of the War Powers Act says that within 60 days after the report is submitted to Congress by the President or is required to be submitted pursuant to section 4(a)(1), whichever is earlier, the President shall terminate the use of U.S. troops unless one of five things happens.

Here are those five things.

First, Congress declares war;

Second, Congress enacts a specific authorization for such use of U.S. troops, which we may do, and I am inclined to think we would do that; or

Third, that Congress extend by law such 60-day period, and I think we might do that; or

Fourth, the President determines and certifies to Congress that unavoidable military necessity respecting the safety of troops requires continued use of such troops in the course of bringing about a prompt withdrawal of the troops. In this case the 60-day period for removal can be extended for not to exceed another 30 days during which time Congress could extend the time to enact legislation or declare war; and

Fifth, Congress is physically unable to meet because of armed attack.

Mr. President, we have some very distinguished guests here that the distinguished Senator from South Carolina, Senator THURMOND, wishes to introduce. And I certainly want to cooperate.

But I conclude my remarks by saying that no one in this body should underestimate the seriousness of the situation, no one should misunderstand that American lives are on the line and Congress has a role to play.

If the President triggers the War Powers Act, as he is most assuredly required to do under the law, in my opinion he will receive good bipartisan support in Congress.

I opposed sending American marines to Lebanon in the first place. I opposed it because I thought the United States would be the focal point of the hostility of the Druze, the Palestinians, and all the other Arabs in the vicinity.

I would have been happy to pay the expenses of any other nation on Earth to join the peacekeeping force, but what I thought would happen has happened and now we must make the best of it.

I do not want to undermine the President or our policy in the Middle East, but I want the law complied with and in my opinion, if the President will read the War Powers Act and do his constitutional duty by submitting a report to the U.S. Congress, he will be surprised at the bipartisan support he gets just as he might have been surprised at the bipartisan support he got in the method and manner he used in handling the Korean airliner incident, and I supported him strongly on that.

Mr. President, Congress has to face this issue. We are not going to be able to shirk our duty. We cannot ignore it. We have a duty and we have a responsibility. It just depends on the manner in which we are going to face up to it.

The laws are on the book on how we should do it, and I sincerely hope that the President and his legal counsel will do this forthwith because I can tell you it is not going away.

Mr. President, I yield to the majority leader.

Mr. BAKER. Mr. President, I thank the Senator.

Mr. President, the distinguished President pro tempore of the Senate, who is our senior Member on the majority side and presides in the absence of the Vice President, has advised me that he has a delegation of distinguished visiting Parliamentarians.

I yield now to Senator THURMOND so that he may present them to the Senate.

VISIT TO THE SENATE BY BRITISH MEMBERS OF PARLIAMENT

Mr. THURMOND. Mr. President, we are honored today by having nine distinguished members of the British Parliament here, and it is my distinct pleasure at this time to present them to the Senate. When I finish calling their names I will ask them all to rise and be acknowledged by this body.

The members are: John David McWilliam, Labor M.P. for Blaydon; Michael John Martin, Labor M.P. for Springburn, Glasgow; David Mudd, Conservative M.P. for Falmouth and Camborne; Patrick Nicholls, Conservative M.P. for Teignbridge; William Powell, Conservative M.P. for Corby; Martin Redmond, Labor M.P. for Don Valley; Allan Roberts, Labor M.P. for Bootle; Sir Hugh Alexis Louis Rossi, Conservative M.P. for Hornsey and Wood Green; and Jonathan Sayeed, Conservative M.P. for Bristol East.

This group is accompanied by U.S. Escort Officer Mr. James Moffett.

It is my pleasure now to present them and ask them if they will rise and be acknowledged. [Applause.]

RECESS

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now stand in recess for 2 minutes so we may have an opportunity to greet our visiting Parliamentarians.

There being no objection, the Senate, at 4:55 p.m., recessed until 4:57 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. SPECTER).

The PRESIDING OFFICER. Two minutes having elapsed, we are back in session.

The majority leader is recognized.

Mr. BAKER. I thank the Chair.

Mr. President, I have cleared the request I am about to make with the minority leader. I have discussed it with others who are principles of the debate which will occur on the Korean plane resolution. This is done to suit the maximum convenience of the most Members.

Mr. President, I am going to ask the Senate to change the convening hour for tomorrow in the following manner.

ORDERS FOR THURSDAY

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 9:30 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR A PERIOD FOR THE TRANSACTION OF MORNING BUSINESS ON TOMORROW

Mr. BAKER. Mr. President, on tomorrow, after the recognition of the two leaders under the standing order, I ask unanimous consent that there be a period for the transaction of routine morning business from the expiration or yielding back of that time until the hour of 10 a.m. in which Senators may speak for not more than 2 mintues each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO PROCEED TO THE CONSIDERATION OF THE KOREAN AIR LINES RESOLUTION ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate then proceed to the consideration of the Korean plane resolution beginning at 10 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Senators for permitting me to make these arrangements, and I now yield the floor.

THE WAR POWERS ACT

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. SASSER. Mr. President, I rise today to join my colleagues and speak to the importance of the War Powers Resolution attendant to the current conflict in Lebanon.

The continuing conflict in Lebanon is a mushrooming international problem, and this conflict is escalating as far as involvement of American forces are concerned.

We began by evacuating the PLO from Beirut, and that was a successful operation. We then reinserted our marine contingent in Lebanon after successfully taking them out following the evacuating of the PLO, and we are now being gradually committed to defending the Lebanese army under certain circumstances.

Twelve hundred marines have been stationed in Lebanon since September of 1982 as a part of the multinational peacekeeping effort. Several marines have been killed and many have been wounded, and just yesterday 2,000 more marines arrived on station off the coast of Lebanon ready for immediate deployment. And on September 8 a U.S. naval vessel shelled Druze artillery positions that were believed to be endangering positions held by the U.S. Marine Corps.

Mr. President, our fighting men are in a deeply precarious position in Lebanon and they are being asked to keep the peace. They are doing their best to do that, to keep the lid on in Lebanon. But they are being put in combat situations day in day out, and presently do not have full-scale authority to pursue or to destroy their attackers. They are being shot at, they are being killed, they are being wounded. They are on occasion shooting back and they are drawing combat pay.

Now, make no mistake about it, Mr. President, there are factions in the Lebanese conflict that have no desire whatsoever to have the U.S. peacekeeping forces play their rightful role. These forces have no real stake in a peaceful settlement in Lebanon. On the contrary, they wish to prolong the conflict. They most likely would like to see Lebanon dismembered and destroyed as a sovereign nation, and if provocative attacks on U.S. Marines

will help toward that end, they are prepared to undertake such attacks.

Yet despite the growing conflict the President has not moved to invoke the War Powers Resolution and by refusing to acknowledge the need to put the War Powers Resolution into effect the administration is apparently, for some reason known only to itself, refusing to attempt to build a national consensus about the extent of our involvement in the Lebanese crisis.

This is most troublesome and I submit, Mr. President, highly dangerous. U.S. Marines in Lebanon have been described as sitting ducks in this escalating conflict. They are trying to keep the peace in an environment that is anything but peaceful. But no less importantly it appears this administration is totally disregarding the positive value of the war powers resolution.

The War Powers Resolution of 1973 came about as a result of our involvement in Vietnam and is one of the most important foreign policy instruments that we have. Very simply the resolution insures that the collective judgment of the Congress and the President will be used when our Armed Forces are introduced into hostile situations or into situations where hostilities may be imminent.

Now, if the President were to indicate to the Congress that our marines have been engaged in hostilities pursuant to the language of the statute or faced imminent hostilities, the Congress would have 90 days in which to specifically authorize the presence of U.S. marines in Lebanon or they would be withdrawn.

I believe the President should set the War Powers Resolution into motion. When troops are being shot at, when they are returning fire, when troops are being killed and wounded, when troops are drawing combat pay, then I believe, Mr. President, they are engaged in hostilities and certainly hostilities are imminent.

I believe it would be proper and fitting if we should have a national debate about the extent of U.S. involvement in the Lebanese situation. As a nation we remain committed to the course of peace in Lebanon and in all of the Middle East, but that goal should always be discussed and debated in a public forum in a democracy. The War Powers Resolution is the proper vehicle for the debate about the Lebanon situation.

Second, Mr. President, by putting the war powers resolution into effect the administration is bound to make a full report to the Congress on three levels: First, the circumstances necessitating the introduction of our Armed Forces into Lebanon; second, the constitutional and legislative authority under which the introduction of such Armed Forces take place; and, third, the estimated scope and duration of the hostilities or involvement of our Armed Forces.

In short, the war powers resolution will help to provide the American public with the information they need to appraise the nature, scope, duration, and, indeed, worthiness of our involvement in Lebanon.

It goes without saying that the American people have the right to know about the full extent of our involvement in Lebanon. The war powers resolution will provide them with that information.

Finally, the war powers resolution makes the Congress as well as the President accountable for what is happening in Lebanon with regard to forces of the United States of America. It requires the Congress to make a decision within 90 days as to whether our Armed Forces will continue to be stationed in Lebanon.

Now, I have no doubt that there may be strong sentiment for keeping our forces in Lebanon if it can be clearly shown that their presence there will promote the peace. But I also believe firmly that the American people want all of their political leaders, not just the President, to be accountable for that decision, and to bring their collective wisdom to bear.

I have no doubt, Mr. President, that as the debate on the Lebanon situation unfolds, and if the facts warrant, the American people will not shirk from continuing to try to keep the peace in that area even if it means a continued military presence, but only if the facts show after debate that peace can ultimately be promoted by the presence of Armed Forces of the United States of America.

Mr. BIDEN addressed the Chair.

The PRESIDING OFFICER (Mr. KASTEN). The Senator from Delaware.

Mr. BIDEN. Mr. President, I will be relatively brief. Much of what I have to say will be redundant based on what I have heard said thus far this afternoon.

As far as I see it, several things are very clear. First of all, since September 1982, when the marines were sent as part of the multinational force, I believe they were entering into an area of hostilities.

Some disagreed with that assertion of mine back then in the Foreign Relations Committee, but I think they are hostilities. And I think the War Powers Act should have been triggered immediately and have so stated in the past.

But I do not know how anyone can deny since August 28, 1983, about a year later, after they had been there a year and four more marines had been killed, at that time two, and we are sending air strikes, as we should under the circumstances, up into the mountains and we have amassed additional marines off the shore, that we are not in combat hostilities. The fact of the matter is they are required to return this fire. We are not merely a peacekeeping force, although that is the purpose. They are, in fact, in hostilities. They are in a war.

I find it interesting that some of my older colleagues—and the President of the United States is somewhat older—always point out the bravery and heroism, which is true, of those who fought in World War II. Well, one of the things that I find continuingly being denied my generation, whether it was in Vietnam or even now, is the notion that their efforts to kept the peace, in the same sense we have attempted to keep the peace in World War II, the Korean war and Vietnam, that their efforts are not even given the courtesy of acknowledging that they are risking their lives. They are as much in combat as anyone who was in the Battle of the Bulge or anyone who was in any famous battle in which Americans distinguished themselves.

The fact is these guys are in war and we continue to operate under the fiction that they are not in war. And I am wondering what that does to their psyche. Here we are telling these guys, "Don't worry, you are not in war."

A young marine from Delaware, who happens to be over there, sent a letter to his father, who is a gung ho former marine and a very tough, strong fellow and a good friend of mine, essentially said, "Hey, what is going on?"

It was very reminiscent of earlier days, when guys were saying, "We are over here getting killed and back home they are telling us, no, it is a peacekeeping action."

I mean we all pretend that nothing is happening. These guys are getting killed and more of them are going to get killed. It is an awful thing to say, but it is going to happen. We have a President sitting down at the White House and a State Department and a Secretary of Defense who say these are not hostilities.

I do not care; forget the War Powers Act, forget the requirement of having the consensus of the country, forget the requirement of bringing the Congress on board, we have an obligation to those marines who are getting killed to say, "Hey, fellows, you are in a war. We understand it. We support it. We are with you." But not to have that generation put through what my generation was put through—"Well, I am over here and I am fighting and getting killed, but when I get home I am not sure what it means. When I get home they are going to pretend I was not in the war. When I get home they are going to pretend it did not matter. When I get home they are going to deny me at least the respect that should be required of somebody over here defending what his country has found was in the self-interest of his country."

So, No. 1, I realize that is not a very persuasive argument, at the most, and I realize it may not be the legalistic argument, but it seems to me simple, basic commonsense that these marines deserve to have it acknowledged by the American people and thereby implicitly that the American people support them and that their lives are being given for something that is vitally important to the United States of America in a war.

No. 2, the fact of the matter is that only the most tortured logic can bring one to the conclusion that hostilities as defined in the War Powers Act do not exist.

The fact of the matter is, it is clear to me that section 4(a)(1) of the War Powers Resolution has been triggered, has been triggered for some time, but clearly has been triggered since the 28th of August. Second, that that makes it incumbent upon the President of the United States of America to report pursuant to section 4(a)(1) of the War Powers Act. And, third, that he should transmit very, very specifically to the U.S. Congress what he wants, why we are there, and how long he thinks we are going to have to stay there.

I do not understand how this administration and some of my colleagues have failed to understand what I believe to be is the most glaring lesson of Vietnam, and that is, a foreign policy that lacks a voluntary consensus of the majority of the American people cannot be sustained. How do you sustain a foreign policy that the American people have not had explained to them and that the Congress and the country have not signed onto?

So, without taking any more time, because others of my colleagues want to speak, I conclude by saying the War Powers Act has been triggered and the President must face up to this. He must move forward by making his case to us. I believe we in this body should not prejudice our decision on whether or not the troops should stay until he makes his case. I could see one set of circumstances, if he makes his case, where I could support those troops remaining and I can see others, if he were to state it differently, where I could not support it. But we have a right to have explained to us precisely what the President has in mind. And he has an obligation under the law to do it.

I think if the Congress fails to call him to abide by that resolution, we might as well tear it up, we might as well forget about it, because it will have no applicability any time in the future.

I thank the Chair. I yield the floor.

Mr. SARBANES. Mr. President, what is at issue, I think by the discussion which is being conducted here on the floor of the Senate, is who is to participate in the decision to involve the U.S. Armed Forces "into hostilities or in situations where imminent involvement in hostilities is clearly indicated by the circumstances." Now that is the language of the War Powers Act. The War Powers Act was enacted really to insure that the Congress, as well as the Executive, will be involved in making the judgment with respect to any such involvement. It was designed, very simply put, to assure that such an involvement would not occur solely on the basis of the decision of the executive branch of the Government, but would involve as well the legislative branch of the Government.

It seems clear to me under the circumstances that the President is required to come to the Congress under section 4(a)(1) of the War Powers Act and section 5(b) and submit a report. Clearly our men are involved in hostilities, or in a situation where imminent involvement in hostilities is clearly indicated by the circumstances, and the President should submit a report and the Congress should then consider the President's request with respect to the authorization which he seeks from the Congress with respect to this involvement.

Now, failing that, the decision on involvement will be made solely by the executive branch. In my judgment, that is not what our constitutional system is designed to achieve.

It is not what the War Powers Act sought to achieve.

I do not understand why the administration will not simply follow the War Powers Act. We really ought not to be having this difference over the procedures to be followed. The procedures are very, very important. There has been an effort by some to discount them as legalisms. What is really behind these so-called legalisms is how are these very basic and important decisions to be made, and essentially it is the Congress, the House and the Senate, to be involved in making these judgments.

I think, clearly, they should be. I think the people across the country expect us to be. I think our chances of having a more reasoned, coherent, and focused policy would be enhanced by the involvement of the Congress.

It seems to me that the President should move quickly to submit his report and to make his request, enabling the Congress to debate the underlying substantive issues.

The request and the debate to follow would enable us to gain a clearer view, both here and across the country, of the precise mission which it is intended our troops are to accomplish and the terms and conditions under which it is proposed that they be involved. That would provide an opportunity for the Congress and the people to understand and to judge the rationale of the administration's case.

I fail to see any basis whatever on which the administration can continue to deny the application of the War Powers Act, and I urge the administration to recognize that simple fact and to proceed according to the act to present its report and request to the Congress, to then provide the Congress the opportunity to consider that carefully and to reach a judgment on it.

I think the American people are demanding that the Congress carry out its constitutional role in this regard.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Mr. President, let me commend my distinguished colleague from Maryland, Senator SARBANES, for his very lucid and thoughtful remarks on this subject, the War Powers Act, and the tragedy which is going on in Lebanon.

I would also like to commend the other Senator from Maryland, Mr. MATHIAS, for introducing yesterday Senate Joint Resolution 159, a congressional action envisaged by section 5(b) and 6 of the War Powers Resolution of 1973.

At the outset, Mr. President, let me say that I have not made up my mind whether or not I would support the Mathias resolution, because of the time element involved.

There are two issues that are going to be debated. One is obviously the constitutional question involving the War Powers Resolution. The other issue, which we are not yet debating but obviously will have to debate very shortly, is the substantive question of whether or not the U.S. Marines ought to remain in Lebanon. I would like to address primarily the first question, that is, the constitutional issue of the War Powers Resolution, but I would also like to touch the substantive issue of whether or not it is wise for the United States to maintain our U.S. Marines as a peacekeeping force in Lebanon.

Of course, the War Powers Resolution is almost 10 years old, and ever since its enactment, questions have been raised about its constitutionality with respect to Congress' share in the decision over the introduction of U.S. forces into hostile situations.

I do not believe, Mr. President, that every constitutional ambiguity requires immediate resolution. I do believe in accommodation and cooperation as long as the constitutional principles are not compromised.

Congress, however, should not relinquish its constitutional role and, indeed, its duty under the guise of accommodation. Frankly, that is precisely the danger that this institution now faces.

The circumstances of the presence of the U.S. Marines in Beirut have developed to the point where, in my

judgment, they must trigger the application of section 5(b) of the War Powers Resolution. The alternative is to conclude that Congress does not take seriously its own legislation and if we do not take it seriously, who will?

There is certainly no need to recall here the legislative history of the War Powers Resolution. Many of my colleagues have gone into great detail about that this afternoon. There are volumes that have been written about it in the last 10 years.

Very briefly, Mr. President, let me just emphasize that constitutionally there was nothing new in the War Powers Resolution, as historic an act as it was. It extended no new right or duty to either the executive branch or the legislative branch of the Government.

It was based, rather, on the realization that under the new conditions of modern warfare we needed legislation to eliminate any ambiguity about the division of constitutional authority with respect to war and peace. It was not meant to weaken the Presidency. On the contrary, it was meant to liberate the President and Congress from skirmishes, the very kind we are having, over constitutional ambiguities when they should concentrate on working in harmony to defend a significant national interest.

That ought to be the subject, not the constitutionality of the War Powers Act.

Enacting such implementing legislation is one of the most important duties of Congress under the "necessary and proper" clause of article I, section 8 of the Constitution.

To bring about this legislation, Mr. President, Congress had to find the proper modern interpretation of the constitutional right to declare war. We have to remember that at the time of the writing of our Constitution, war was an accepted means of settling international disputes. In that regard, international law prescribed only its formalities, like those of declaring war or of protecting the rights of neutral states. The basic premise could be summed up very simply: War is legal, and these are its formal rules to be followed.

Under modern conditions, however, especially after the establishment of the U.N. system, this basic premise was reversed. The new rule is: War is illegal under any circumstances except in justified self-defense or when it qualifies as enforcement action under the charter of the United Nations.

It is easy to realize that as a side effect of this reversal, the highly formalized rules of starting and engaging in war have largely been abandoned. States now start wars and fight them ferociously without ever declaring war, without ever admitting they are engaged in war. There are secret wars, covert wars, and proxy wars. States send huge armies into the territory of another state without conceding that they have dispatched a single soldier. There are armies of trainers and advisers and, last but not least, peacekeeping forces teetering at the brink of war.

Under these changed international conditions to argue that the constitutional right of Congress to declare war does not mean the right of decision over the introduction of the U.S. Armed Forces into hostilities but is restricted to the formality of the declaration of war makes a mockery of our Constitution.

I remind my colleagues that, despite all the rhetoric about "tying the hands of the President," the War Powers Resolution is a very balanced, reasonable piece of legislation. It respects the constitutional rights of the President; in fact, it is meant to aid him in carrying them out without undue hindrance. It gives him ample opportunity to react quickly to dangers to our national security. It properly gives the right to lead to the President; Congress role is always post facto and follows the President's with a generous timelag. I repeat what I have already said, properly implemented, it will strengthen and aid the Presidency, not weaken it.

I started by complimenting our colleague, the distinguished Senator from Maryland (Mr. MATHIAS) for the statesmanlike gesture of introducing Senate Joint Resolution 159. I add again that this does not mean that I will necessarily support the resolution. I struggle with increasing doubts, as many of my colleagues do, about the wisdom of keeping our Marines in Lebanon.

In fact, I was in that country in July 1982 when the decision was made to send the Marines in in the first place. My first reaction was that it was probably not a bad idea. After spending 24 to 48 hours there—actually, it turned out to be almost a week—I began to get concerned, when I saw the various factions, militias, sects, so many groups it was almost a Rubik's cube. I began to realize that it was going to be a very thorny situation indeed.

However, all of us will recall that the President told us, the redeployment, the September decision, would be only for a very limited period. Press reports at that time said he hoped to have them home by the end of the year 1982. In a more pessimistic vein, the Washington Post reported last October 4 that Government officials were predicting a minimum of 4 to 6 months' stay for the marines. That was almost a year ago, Mr. President, and if there is light at the end of this tunnel, I certainly fail to see it.

As I mentioned, I visited Lebanon in July of last year. I had known about the factionalism rampant in that unfortunate country but what I experienced in the proliferation of armies, militias, sects, and factions was far beyond what I had anticipated. When, in July, the President announced that he was willing to consider a deployment of U.S. Marines in Beirut to assure the orderly departure of the PLO—that was the rationale then—and particularly in September, when he reintroduced the marines for a more extended peacekeeping mission, I became deeply concerned about where we were going.

Having been there just 2 months before, I could not see how the job of restoring order amidst that terribly tragic fragmentation could have any foreseeable termination date. At Foreign Relations Committee hearings, I repeatedly urged representatives of the administration to tell us at least approximately the expected duration, territorial extent, and scope of the marines' mission. All I received and all the committee received were vague assurances about the limited nature of the engagement.

I grant that a year ago, there may have been some doubts whether the marines were introduced into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances—to quote section 4(A)(1) of the War Powers Resolution. This is the provision that is supposed to trigger congressional involvement in the decision on whether continued involvement of U.S. Armed Forces is merited. After the recent fighting, significant marine casualties, and with the decision announced yesterday to extend the role of the marines, to continue to stonewall the application of section 4(A)(1) has become totally untenable. The administration may still regard our marines as a peacekeeping force, but there is no doubt what those numerous forces opposing the Lebanese Army will regard them: They are going to see them as enemies.

You cannot announce you are going to support one faction over there and then maintain your position as a peacekeeper. Our marines are inevitably sliding step by step from a neutral peacekeeping role into the role of a full-fledged fighting force.

I do not want to prejudge the question whether we should continue to keep our marines in Lebanon. As I said, we shall have that debate before us. I harbor very grave doubts, but I continue to keep an open mind about it.

If the vote were held today I would probably oppose the continuing presence of our marines there, because I think it complicates our diplomatic efforts. I continue to keep an open mind about it and I am certainly willing to listen to the administration and others who support its position. I am ready to engage in any kind of debate, hear ar-

guments, or facts that can be presented. But we have to insist that we have arrived at a threshold where the involvement of Congress in the decision is mandated by the War Powers Resolution; in fact, by the Constitution of the United States.

The position of the President in refusing to submit a report to Congress indicating that U.S. Armed Forces are introduced "into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances" is a defiance of the law of the land, it is unwise, and harmful to our constitutional order.

The administration claims to avoid conflict, but instead it exacerbates it. It claims to seek consensus and accommodation with Congress, but, in fact, it obstructs it. Its legal reasoning is badly flawed.

Yesterday, the legal adviser of the Department of State testified before the Foreign Relations Committee on the administration's legal position on the War Powers Resolution. He stated that the administration accepts section 4 of the resolution but has doubts about the constitutionality of section 5.

Accordingly, it refuses to specify whether the report it is submitting on the Lebanon deployment is based on section 4(A)(1)—which would trigger the congressional involvement prescribed by section 5(B)—or if it is based on one of the other two conditions included in section 4(A), which do not have such effect. The administration claims that the resolution does not obligate it to specify the basis of the President's report in fulfillment of section 4(A).

Mr. President, this is the most transparent legal sophistry I have heard in some time. In effect, the administration claims that the War Powers Resolution is the law of the land only insofar as the President chooses to comply with it. It says that Congress has no power to set limits to the President's involving our forces in hostilities on the basis of the War Powers Resolution as long as the President chooses to ignore Congress right to do so.

The administration asserts it accepts section 4 as constitutional. To show the fallacy and the inner contradiction of its legal reasoning, I suggest we consider section 4(B) of the War Powers Resolution which reads:

> The President shall provide such other information as the Congress may request in the fulfillment of its constitutional responsibilities with respect to committing the Nation to war and to the use of United States Armed Forces abroad.

I intend to ask the chairman and the ranking minority member of the Foreign Relations Committee to call on the President, on the basis of section 4(B), to inform Congress if his report on the marine deployment to Lebanon is based on section 4(A)(1) or (2) or (3). If the President indeed accepts section 4, he cannot withhold this information that is crucial to the fulfillment or our constitutional responsibilities.

Mr. President, I again commend our colleague, Senator MATHIAS, for commencing this debate, and urge the Congress to insist upon its legitimate constitutional role and to meet its essential constitutional responsibilities in implementing the War Powers Act.

I yield the floor.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, the time for morning business has expired by over 2 minutes. I am advised that there are two or three additional speakers. I think another 30 minutes or thereabouts will probably cover that requirement.

I ask unanimous consent that the time for the transaction of routine morning business be extended until not later than 6:15 p.m., in which Senators may speak under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I rise to discuss the matter of the War Powers Act, and to be the first one to thank the Senator from Connecticut for his remarks today and the tremendous amount of work he has put in, not only on this subject matter but many others. I thank also the Senator from West Virginia, the minority leader, for his efforts here in bringing this to our attention and; or course, the Senator from Missouri that we shall hear from in a moment for the tremendous amount of time he has devoted to that.

Mr. President, recesses in Congress are used for a number of various things—for factfinding trips, for vacations, for family reunification, R&R, and so on. One of the things all of us participate in is going back to our States and visiting with people.

One of the experiences I had during the last recess, in several visits to my State, was a keen interest in what is going on in the Middle East. Quite frankly, I was not quite sure what, from day to day, the mission of our contingent there in the multinational forces was to be.

I had visited Beirut earlier this year, visited with our marines, and they seemed to have a clear understanding of what their mission was there, and that was to maintain the peace, not to be involved in combat. That was what this Senator felt was the situation when I left there in the early part of this year.

I think it is very clear that things have changed. I believe the people in the State of Arizona realize that there are more than peacekeeping forces there. In fact, I question whether or not there is a peace to be kept. But that will be left for another debate.

What concerns me, and what I hope will be the resolution here from both sides of the aisle, is an earnest effort to have the President of the United States comply with the law, that being the War Powers Act, and submit the valid report specifying exactly the executive and legislative authority for the continuation of combat troops there.

As we know—and it has been pointed out today—they are receiving what is known as combat pay as of August 1, they have exchanged fire defensively and call on offensive weapons now there offshore to assist them, and of course we have had the unfortunate loss of life.

We have to be careful in a time such as this to protect our own national interests. We also have to be sure that if we are in combat, our contingent of military forces have the capability to win whatever the victory may be at the particular time they are attacked. I am not sure they have that mission in mind or know what the victory might be when they are shot at.

For that reason, I support the resolution that I believe will be submitted shortly in regard to requesting the President to comply with the War Powers Act.

The PRESIDING OFFICER (Mr. GORTON). The Senator from Missouri.

Mr. EAGLETON. Mr. President, along with Senators Javits and Stennis, I authored the original Senate version of the War Powers Act.

On July 16, 1982 and on September 23, 1982, I wrote to President Reagan with respect to the War Powers Act and its applicability to the initial sending of the Marines to Lebanon. In this earlier correspondence, I pointed out the possibility of our forces being involved in "hostilities" which term triggers the applicability of Sec. 4(a)(1) of the War Powers Act. (". . . 4(a)(1) into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances;".) Once the act is triggered by the President, the Marines can remain in Lebanon for up to 90 days unless Congress acts to further extend their stay.

The President declined to invoke the act at that time.

Since then, 4 Marines have been killed in Lebanon (two on August 29, 1983 and two on September 6, 1983) and 28 have been wounded. By any rational reading or definition of the word "hostilities," the marines in Lebanon are engaged in same. The Marines have not only been fired upon, but they are returning fire and are authorized to engage in "preemptive" firing. Every day the scope of potential American military activity is increased.

I urge the President to reconsider his opposition to invoking the War

Powers Act as I believe he is clearly obligated to do under the law.

Invoking the act in no way prejudges what position the Congress would take with respect to a continued American peace-keeping presence in Lebanon as part of the multinational force. My belief is that Congress would not precipitously withdraw the forces in Lebanon at the conclusion of the 90 day period triggered by the War Powers Act. Conversely, I should add that, in my opinion, Congress would not authorize an open ended Gulf-of-Tonkin-type blank check for any and all action at any and all length.

Lebanon might become an interminable quagmire. The multitude of forces, both internal and external, at play in Lebanon do not bode well for its peaceful future. While at the present time President Reagan may believe that he benefits from having a "free hand" in Lebanon, I believe that for him to ignore the War Powers Act and Congress role thereunder would be a huge mistake from both a legal and a political point of view. Whatever action is taken in Lebanon should be a shared responsibility of both the President and the Congress. Only in that way can we be sure that we will have the support of the American people behind a truly national policy in Lebanon.

Mr. President, just to give some idea of how the scope of our involvement in Lebanon has expanded, let me quote briefly from two letters that President Reagan sent to Congress with respect to Lebanon.

On August 24, 1982, the President wrote the President pro tempore of the Senate, Senator THURMOND. A portion of that letter reads:

> I want to emphasize that there is no intention or expectation that U.S. Armed Forces will become involved in hostilities.

Then, in a second letter to Senator THURMOND, dated September 29, 1982, the President wrote:

> In carrying out this mission, the American force will not engage in combat.

Later in the same letter he emphasizes:

> . . . our agreement with the Government of Lebanon makes clear that they will be needed only for a limited period to meet the urgent requirements posed by the current situation.

Another quotation from the same letter reads:

> . . . there is no intention or expectation that U.S. Armed Forces will become involved in hostilities.

A final quotation from that letter reiterates:

> . . . our agreement with the Government of Lebanon expressly rules out any combat responsibilities for the U.S. forces.

I am sure the President was well intentioned and well motivated in 1982 when he wrote these two letters; but recent events, in which 4 marines have been killed and 28 have been wounded, show that even the best of intentions can go awry.

Mr. President, I ask unanimous consent that the following items be printed in the RECORD:

First. Letter from the President to Senator THURMOND dated August 24, 1982.

Second. Letter from the President to Senator THURMOND dated September 29, 1982.

Third. Letter from Senator EAGLETON to the President dated July 16, 1982.

Fourth. Letter from Senator EAGLETON to the President dated September 23, 1982.

Fifth. Letter from Senator EAGLETON to the President dated September 13, 1983.

Sixth. Article from the Wall Street Journal dated September 13, 1983 (p. 2).

Seventh. Washington Post editorial dated September 14, 1983.

Eighth. Editorial by Senator EDWARD KENNEDY in the Boston Globe dated September 13, 1983.

Ninth. Editorial in the New York Times dated September 11, 1983.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, August 24, 1982.

HON. STROM THURMOND,
President pro tempore of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: On August 18, 1982, the Government of Lebanon established a plan for the departure from Lebanon of the Palestine Liberation Organization leadership, offices, and combatants in Beirut. This plan has been accepted by the Government of Israel. The Palestine Liberation Organization has informed the Government of Lebanon that it also has accepted the plan. A key element of this plan is the need for a multinational force, including a United States component, to assist the Government of Lebanon in carrying out its responsibilities concerning the withdrawal of these personnel under safe and orderly conditions. This will facilitate the restoration of Lebanese Government sovereignty and authority over the Beirut area.

In response to the formal request of the Government of Lebanon, and in view of the requirement for such a force in order to secure the acceptance by concerned parties of the departure plan, I have authorized the Armed Forces of the United States to participate on a limited and temporary basis. In accordance with my desire that the Congress be fully informed on this matter, and consistent with the War Powers Resolution, I am hereby providing a report on the deployment and mission of these members of the United States Armed Forces.

On August 21, in accordance with the departure plan, approximately 350 French military personnel—the advance elements of the multinational force—were deployed in Beirut together with elements of the Lebanese Armed Forces, and the departure of Palestinian personnel began. To date, Palestinian personnel have departed Lebanon in accordance with the terms of the plan.

On August 25, approximately 800 U.S. Marines began to arrive in Beirut. These troops are equipped with weapons consistent with their non-combat mission, including usual infantry weapons.

Under our agreement with the Government of Lebanon, these U.S. military personnel will assist the Government of Lebanon in carrying out its responsibilities concerning the withdrawal of Palestinian personnel under safe and orderly conditions. The presence of our forces will in this way facilitate the restoration of Lebanese Government sovereignty and authority in the Beirut area. Our forces will operate in close coordination with the Lebanese Armed Forces, which will have 2500–3500 personnel assigned to this operation, as well as with a total of approximately 800 French and 400 Italian military personnel in the multinational force. Transportation of the personnel departing is being carried out by commercial air and sea transport, and by land. According to our agreement with the Government of Lebanon, the United States military personnel will be withdrawn from Lebanon within thirty days.

I want to emphasize that there is no intention or expectation that U.S. Armed Forces will become involved in hostilities. They are in Lebanon at the formal request of the Government of Lebanon. Our agreement with the Government of Lebanon expressly rules out any combat responsibilities for the U.S. forces. All armed elements in the area have given assurances that they will take no action to interfere with the implementation of the departure plan or the activities of the multinational force. (The departure has been underway for some days now, and thus far these assurances have been fulfilled.) Finally, the departure plan makes it clear that in the event of a breakdown in its implementation, the multinational force will be withdrawn. Although we cannot rule out isolated acts of violence, all appropriate precautions have thus been taken to assure the safety of U.S. military personnel during their brief assignment to Lebanon.

This deployment of the United States Armed Forces to Lebanon is being undertaken pursuant to the President's constitutional authority with respect to the conduct of foreign relations and as Commander-in-Chief of the United States Armed Forces.

This step will not, by itself, resolve the situation in Lebanon, let alone the problems which have plagued the region for more than thirty years. But I believe that it will improve the prospects for realizing our objectives in Lebanon:

A permanent cessation of hostilities;

Establishment of a strong, representative central government;

Withdrawal of all foreign forces;

Restoration of control by the Lebanese Government throughout the country; and

Establishment of conditions under which Lebanon no longer can be used as a launching point for attacks against Israel.

I also believe that progress on the Lebanon problem will contribute to an atmosphere in the region necessary for progress towards the establishment of a comprehensive peace in the region under Camp David, based firmly on U.S. Security Council Resolutions 242 and 338.

Sincerely,

RONALD REAGAN.

THE WHITE HOUSE,
Washington, D.C., September 29, 1982.
Hon. STROM THURMOND,
President pro tempore of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: On September 20, 1982, the Government of Lebanon requested the Governments of France, Italy, and the United States to contribute forces to serve as a temporary Multinational Force, the presence of which will facilitate the restoration of Lebanese Government sovereignty and authority, and thereby further the efforts of the Government of Lebanon to assure the safety of persons in the area and bring to an end the violence which has tragically recurred.

In response to this request of the Government of Lebanon, I have authorized the Armed Forces of the United States to participate in this Multinational Force. In accordance with my desire that the Congress be fully informed on this matter, and consistent with the War Powers Resolution, I am hereby providing a report on the deployment and mission of these members of the United States armed forces.

On September 29, approximately 1,200 Marines of a Marine Amphibious Unit began to arrive in Beirut. Their mission is to provide an interposition force at agreed locations and thereby provide the multinational presence requested by the Lebanese Government to assist it and the Lebanese Armed Forces. In carrying out this mission, the American force will not engage in combat. It may, however, exercise the right of self-defense and will be equipped accordingly. These forces will operate in close coordination with the Lebanese Armed Forces, as well as with comparably sized French and Italian military contingents in the Multinational Force. Although it is not possible at this time to predict the precise duration of the presence of U.S. forces in Beirut, our agreement with the Government of Lebanon makes clear that they will be needed only for a limited period to meet the urgent requirements posed by the current situation.

I want to emphasize that, as was the case of the deployment of U.S. forces to Lebanon in August as part of the earlier multinational force, there is no intention or expectation that U.S. Armed Forces will become involved in hostilities. They are in Lebanon at the formal request of the Government of Lebanon, and our agreement with the Government of Lebanon expressly rules out any combat responsibilities for the U.S. forces. All armed elements in the area have given assurances that they will refrain from hostilities and will not interfere with the activities of the Multinational Force. Although isolated acts of violence can never be ruled out, all appropriate precautions have been taken to ensure the safety of U.S. military personnel during their temporary deployment in Lebanon.

This deployment of the United States Armed Forces is being undertaken pursuant to the President's constitutional authority with respect to the conduct of foreign relations and as Commander-in-Chief of the United States Armed Forces.

I believe that this step will support the objective of helping to restore the territorial integrity, sovereignty, and political independence of Lebanon. It is part of the continuing efforts of the United States Government to bring lasting peace to that troubled country, which has too long endured the trials and civil strife and armed conflict.

Sincerely,

RONALD REAGAN.

COMMITTEE ON APPROPRIATIONS,
Washington, D.C., July 16, 1982.
Hon. RONALD REAGAN,
President, The White House,
Washington, D.C.

DEAR MR. PRESIDENT: On July 6th, you announced that the United States had "agreed in principle to contribute a small contingent" of United States troops to a multinational force for "temporary peacekeeping" in Beirut should an acceptable settlement of the current hostilities be reached. I am greatly disturbed that, in the wake of your announcement, reports have circulated that the Administration does not consider the introduction of troops into Lebanon under these conditions as triggering the operative language of Sec. 4(a)(1) of the War Powers Act. ("In the absence of a declaration of war, in any case in which United States Armed Forces are introduced into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances." The Act then goes on to require timely reporting to Congress).

Mr. President, the situation in Lebanon is such that the likelihood of "imminent involvement" must be acknowledged. Any deliberate attempt to downplay the gravity of the situation and the risks facing those troops to be dispatched to Lebanon would violate both the spirit and letter of the law. Further, the "law" of common sense would be violated because the whole world knows that there are inherent and inescapable risks to the introduction of any troops of any nationality, said troops to be placed between Israeli forces and P.L.O. guerrilla forces. For example, even if Mr. Arafat and Prime Minister Begin give the most thorough and well-intended of guarantees of safety, etc., there is a high probability that one or more P.L.O. die-hards will take a pot shot at American troops simply for the martyred glory of doing so.

As one of the three Senate authors (Javits, Stennis, and Eagleton) of the original Senate War Powers Act, I can speak with authority as to the intent of Congress with respect to the phrase "imminent hostilities." In 1971, I testified before the Senate Foreign Relations Committee on the meaning of those words.

"Obviously hostilities include land, air, or naval action taken by the Armed Forces of the United States against other armed forces or the civilian population of any other nation. But Senate Joint Resolution 59 is more specific. It includes the deployment of U.S. forces outside the United States under circumstances where imminent involvement in combat activities is a reasonable possibility."

There was never any doubt in my mind or that of Senator Javits or Senator Stennis as to what our intent was. We described "imminent hostilities" as hostilities which were "reasonably possible."

Mr. President, the decision to send troops to Lebanon is obviously a delicate, sensitive, and grave matter. If it be your considered judgment that American troops should be sent, I trust you will do so in total conformity with the War Powers Act and especially the operative section, Sec. 4(a)(1).

Yours very truly,

THOMAS F. EAGLETON,
U.S. Senator.

U.S. SENATE,
Washington, D.C., September 23, 1982.
Hon. RONALD REAGAN,
President, The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I am constrained once again to write on the use of U.S. troops in Lebanon and, most specifically, the applicability of Sec. 4(a)(1) of the War Powers Act which reads in part as follows:

"In the absence of a declaration of war, in any case in which United States Armed Forces are introduced into hostilities or into situation where imminent involvement in hostilities is clearly indicated by the circumstances."

The Act then goes on to require timely reporting to Congress.

I wrote to you on July 16, 1982 on this subject when it was being contemplated that U.S. troops (along with French and Italian troops) be sent to Lebanon to secure the evacuation of the P.L.O. guerillas. In response, I received a copy of your letter of August 24, 1982, to the President Pro Tempore of the Senate in which you asserted the deployment of troops was taken pursuant to your Constitutional authority as Commander-in-Chief and head of foreign policy. Nowhere did you specifically acknowledge the applicability of the War Powers Act.

Now, in light of the recent tragic and horrible events in West Beirut, U.S. troops are once again being dispatched. This time the mission, because of the violence which has transpired, is enormously more perilous than the earlier mission. Very clearly, to me, this is a situation "where imminent involvement in hostilities is clearly indicated by the circumstances."

Thus, as I read the War Powers Act (which I co-authored with Senators Javits and Stennis), Sec. 4(a)(1) of the Act applies and there is, thus, a 60 day time limit on this deployment (with an additional 30 days extension at your discretion).

If you conclude that Sec. 4(a)(1) does not come into play, may I ask this. If the U.S. troops are fired upon, thus making it crystal clear that hostilities have in fact begun, will you then trigger into effect Sec. 4(a)(1) with the consequent 60 day and 30 day periods as described above?

Yours very truly,

THOMAS F. EAGLETON,
U.S. Senator.

U.S. SENATE,
Washington, D.C., September 13, 1983.
Hon. RONALD REAGAN,
President, The White House,
Washington, D.C.

DEAR MR. PRESIDENT: On July 26, 1982 and on September 23, 1982, I wrote to you with respect to the War Powers Act and its applicability to the initial sending of the Marines to Lebanon. In this earlier correspondence, I pointed out the possibility of our forces being involved in "hostilities" which term triggers the applicability of Sec. 4(a)(1) of the War Powers Act. (". . . 4(a)(1) into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances;".) Once the Act is triggered, the Marines can remain in Lebanon for up to 90 days unless Congress acts to further extend their stay.

You declined to invoke the Act at that time.

Since then, four Marines have been killed in Lebanon (two on August 29, 1983 and two on September 6, 1983) and twenty-eight have been wounded. By any rational reading

or definition of the word "hostilities," the Marines in Lebanon are engaged in same. The Marines have not only been fired upon, but they are returning fire and are authorized to engage in "preemptive" firing.

I urge that you reconsider your opposition to invoking the Act as I believe you are clearly obligated to do under the law.

Invoking the Act in no way prejudges what position the Congress would take with respect to a continued American peace-keeping presence in Lebanon as part of the multi-national force. My belief is that Congress would not precipitously withdraw the forces in Lebanon at the conclusion of the 90 day period triggered by the War Powers Act. Conversely, I should add that, in my opinion, Congress would not authorize an open-ended Gulf of Tonkin type blank check for any and all action at any and all length.

Mr. President, Lebanon might become an interminable quagmire. The multitude of forces, both internal and external, at play in Lebanon do not bode well for its peaceful future. While at the present time you may believe that you benefit from having a "free hand" in Lebanon, I believe that to ignore the War Powers Act and Congress' role thereunder would be a huge mistake from both a legal and a political point of view. Whatever action is taken in Lebanon should be a shared responsibility of both the President and the Congress. Only in that way can we be sure that we will have the support of the American people behind a truly national policy in Lebanon.

Yours very truly,

THOMAS F. EAGLETON,
U.S. Senator.

[From the Wall Street Journal, Sept. 13, 1983]

REAGAN CLEARS PREEMPTIVE FIRE IN BEIRUT AREA

(By Karen Elliott House and Gerald F. Seib)

WASHINGTON.—The Reagan administration has taken another step toward a more active role in fighting around Beirut.

For the first time, U.S. ships off the coast of Beirut will be explicitly authorized to make preemptive strikes against targets that threaten U.S. Marines stationed on shore. Moreover, U.S. officials say a threat to the Lebanese army in some instances may be considered as a threat to the Marines as well. Previouisly, U.S. forces in the area fired only if the 1,200-man Marine contingent at Beirut's airport was fired upon. Caught between escalating fighting in Lebanon and growing questions in Congress about the Marines' role there, the Reagan administration is clinging to a cautious course. After a series of meetings over the weekend, President Reagan decided against increasing the size of the Marine force and decided instead of the less visible increase in the ability of U.S. forces to defend themselves.

Besides expanding the authority of its ships to fire on hostile targets, the U.S. is sending the battleship New Jersey toward the Mediterranean. If the New Jersey is ordered all the way to the Lebanese coast, its long-range guns could be used for firing at the Chouf mountains, where Moslem and Druse militiamen are fighting the Lebanese army to try to topple or at least restructure the government of Lebanon.

With the deaths of four Marines in the past two weeks, the White House has felt compelled to take steps to enhance the Marine's security. They are in Lebanon as part of a multinational peacekeeping force to try to support the government of Lebanon until its army is strong enough to do the job alone.

Under the new instructions from the Pentagon, U.S. ships could fire at hostile forces that threaten certain strategic areas in and around Beirut. U.S. officials decline to identify these areas, saying they don't want to signal Syria and other opponents of President Amin Gemayel's government as to what areas they can take without triggering U.S. firepower.

"The commander will have a limited authority to defend with fire, not ground troops, certain key strategic areas that, if they fell, would endanger the Marines or other Americans in Beirut," says an administration official.

U.S. officials continue to hope a political solution can be worked out to stop the fighting before more potent military steps become necessary. The idea is to achieve a coalition between the Christian-dominated government of Mr. Gemayel and his Druse and Moslem opponents. The danger is that the Druse and Moslems, who with Syria's backing are fighting successfully against the Lebanese army, may overwhelm the Gemayel government before a political solution is reached. That would both endanger the Marines and put the U.S. on the spot, as President Reagan has vowed to support the Gemayel government until it creates stability in Lebanon.

So far, Congress seems willing to give Mr. Reagan and Lebanon more time. There isn't any widespread sentiment yet for pulling out the Marines. House Speaker Thomas P. O'Neill, after a meeting with White House Chief of Staff James Baker, said withdrawing the troops would cause other nations to "lose faith" in the U.S. as a peacemaker.

But lawmakers in both the House and Senate increasingly are demanding to use the War Powers Act to vote on the Marines' stay. Sen. Charles Mathias of Maryland, a Republican on the Senate Foreign Relations Committee, introduced a resolution yesterday to put the act into effect. His proposal would allow the troops to remain in Lebanon for six months but require congressional approval for a longer stay or deeper involvement.

Senate Majority Leader Howard Baker has been considering introducing a resolution that would approve a continued Marine presence in Lebanon without invoking the War Powers Act. But he is holding back on the resolution, and sources indicate he is aware of growing support for putting the War Powers Act into effect. The Reagan administration, particularly Defense Secretary Caspar Weinberger, continue to oppose invoking the act, arguing that such a move would only bolster the confidence of forces opposing the U.S.-backed Lebanese government.

[From the Washington Post, Sept. 14, 1983]

TRYING TO SAVE LEBANON

With American peacekeeping troops being killed in Lebanon and with the country itself threatening to break apart, the Reagan administration faces a severe crisis. It has several parts.

The president is moving to fulfill what must be the first policy requirement as long as the Marines remain exposed: to ensure that they have the resources and orders to defend themselves adequately. Mr. Reagan seems to be under no illusion that anything faintly resembling a military solution is conceivable. His evident hope is that a show of readiness to employ force as necessary will help calm down the military situation and give diplomacy a bit more time to accomplish the main thrust of American policy, to try to save Lebanon as a unified state.

The administration has come to understand it is not enough just to strengthen the Lebanese central government. That government has to be preserved as the single available instrument of Lebanese unity and sovereignty. But it must also be induced to share political power more fairly with the non-Christian, less privileged communities that have, in Syria, a tough patron close at hand.

The Christian-dominated government of Amin Gemayel, shying from redistributing national political power, insists that the latest violence stems primarily from international—Syrian, Palestinian, Iranian—intervention. On this basis it pleads for stronger American support of its "infant army." The Reagan administration takes stern note of the Syrian hand behind the Moslem and Druze militias currently challenging the Christian militias and the Lebanese army itself. Mr. Reagan himself, however, making a crucial and necessary distinction, calls the battling a "civil war" that it is Beirut's own responsibility to handle, militarily and politically.

Certainly it would have been better to get serious internal talks under way before the Druze had rolled over Christian Phalange fighters, and bloodied the Lebanese army, in the Chouf area just evacuated by Israel. But the premise of the diplomacy being conducted by American and Saudi envoys, among others, is that there is still some time. Israel, too, has a role: discreetly, to keep Syria from directly entering the fray.

Congress has been rightly concerned that (1) American policy be prudent and (2) the War Powers Act be respected. On policy, there is a substantial majority that either supports the president's measured approach or chooses not to take responsibility for hemming him in. That consensus seems to be permitting a mutually satisfactory War Powers formula to be worked out. No President likes Congress to inhibit his foreign policy. But if the peacemakers' best efforts fail, Mr. Reagan could yet be glad he had congressional company.

If the worst happens, and Lebanon slides toward dissolution, the United States will need a new policy. That will be time to reconsider the American role, including the role of the Marines.

[From the Boston Globe, Sept. 13, 1983]

PRESIDENT'S DISREGARD OF WAR POWERS ACT

(By Edward M. Kennedy)

When Ronald Reagan took the oath of office in January 1981 as President, he swore to uphold the Constitution and the laws of the United States. Yet each day that the current worsening crisis in Lebanon goes on, the President continues to defy Congress and violate one of the nation's fundamental laws—the War Powers Act.

That historic act, passed by Congress in 1973 over the veto of President Nixon, requires the President to make a written report to Congress within 48 hours whenever military forces of the United States are "introduced into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances.

Once a report is submitted by the President under this provision, the military forces must be withdrawn within 60 days—

or 90 days if necesary for safe withdrawal—unless Congress declares war, extends the period, or enacts specific legislation authorizing the action.

If words have meaning, it is obvious that our Marines and other forces in Lebanon are involved in hostilities. Marines are being shelled and their blood is being shed by Druze artillery, backed up by the Syrians and the PLO. They are receiving "hostile fire" pay. They are returning hostile fire, and they are being killed and wounded.

In retaliation for shelling and for the casualties we have suffered, a frigate of the U.S. Navy standing off the coast has fired on the Druze artillery positions.

Last Friday, the President acknowledged that the fighting in Lebanon has become an "outright civil war." Yet he refuses to recognize that "hostilities" are now involved under the War Powers Act and that the provisions of the act should apply.

Sadly, this situation is just the latest illustration of President Reagan's cavalier disregard of the law in connection with his actions on Lebanon. Last June, the President signed into law a separate statute requiring him to obtain specific authorization from Congress for any "substantial" expansion in the "number or role" of our forces in Lebanon.

Ten days ago, the President ordered an additional 2000 U.S. troops into positions offshore, doubling the size of our forces in the area. Yet he has not sought the required approval of Congress for this expansion.

Unfortunately, these actions of the President on Lebanon are not isolated examples, but fresh episodes of the distressing pattern of Reagan violations of the law with regard to the use of American military forces.

For many months, the Administration has been waging a secret war against the government of Nicaragua, in violation of specific legislation enacted by Congress last December prohibiting such operations. For over a year, the reagan Administration had disingenuously maintained that U.S. aid was being used to interdict the flow of arms into El Salvador, not to overthrow the government of Nicaragua.

Finally, last July an outraged House of Representatives adopted the Boland-Zablocki bill, halting all covert aid from the United States to the rebel forces in Nicaragua: this fund cut-off is awaiting action by the Senate.

I support America's role in Lebanon as part of the multinational peacekeeping force, and I am confident that Congress will authorize all necessary steps to protect our troops there, to achieve a cease-fire as soon as possible, and to enhance the cause of peace in the Mideast.

But there is no justification whatever for President Reagan to defy Congress and deny the proper application of the War Powers Act and other statutory restraints on the use of American military force in Lebanon, Central America, or anywhere else.

The United States and other concerned nations must step up pressure on Syria and the PLO to withdraw completely from Lebanon, permitting Israel to pull back its remaining troops and Lebanon to return to the era of peace and prosperity that prevailed before 1975.

The crisis in the Mideast is already difficult enough without the President's provocation of a needless constitutional confrontation with Congress over the War Powers Act. Admit it, Mr. President, these are hostilities and we must work together to end them in the way our laws require.

[From the New York Times, Sept. 11, 1983]

OUT OF LEBANON, SLOWLY

It is no insult to the Marines to observe that they are squatting in Lebanon like dumb ducks, taking casualties for reasons that no one seems able to articulate. It is no insult to President Reagan to observe that he can't articulate their mission because he can no longer perceive it or be sure about the right moment to end it. The troops and their Commander in Chief are playing for time, hoping that the moment will nominate itself.

Congress could assert its prerogative by invoking the War Powers Act and belatedly share responsibility for the choice. But the legislators should set no rash deadlines that force the President to assert a nonexistent American interest. He is obviously stalling uncomfortably, which is not always the worst policy.

When the Marines and other allied forces went ashore a year ago, their purpose was to assure the safe dispersal of the P.L.O., keep the Israelis out of Moslem Beirut and provide a "peacekeeping" shield for a new Lebanese government. Thinking the job done, they departed—only to see Lebanon's new president killed, the Israelis taking West Beirut and helpless Palestinians massacred by vengeful Phalangist Christians. The American, French, Italian and British forces reappeared, to shield an even weaker regime led by the slain leader's brother, Amin Gemayel.

The hope was that he could form a coalition of Lebanon's feudal sects and build an army to pacify their private militias. That was supposed to make the Israelis secure enough to withdraw from Lebanon on condition that Syria ended its eight-year-old occupation as well. These hopes defied Lebanese history and also up-to-date political analysis. But they justified a low-cost stab at reinventing Lebanon, improving the life of a long-suffering people, blunting Syria's expansion and enhancing America's regional influence.

It hasn't worked out that way and probably never will. And the costs of keeping Western troops in the crossfire are growing daily. Even if massively reinforced and allowed to pursue their challengers, the Marines could not disarm the rival armies or impose a stable order. Indeed, the threat that they will withdraw and leave Lebanon permanently partitioned—dismembered, really—is probably the United States' last good card. The question is when to play it.

President Gemayel, a Christian Maronite, has clearly misplayed his hand. He let his father's Phalangist forces provoke unnecessary battles against assorted Moslem factions and these are now uneasy allies against him. It is an open question whether the Gemayels still can or want to share enough power to preserve a loose but distinct Lebanon. Their only chance is the likelihood that most of Lebanon's Moslems probably prefer a weak but indigenous government to the alternative: the loss of the south to Israel and Syria's domination of most of the rest of the country.

Shielding President Gemayel while he bargains for Lebanon's survivial is the only reason for keeping Marines in Beirut for a few more weeks. Preserving a nominal Lebanon is a sound but modest American objective but not a vital national interest.

If the sectarian forces of centuries finally pull that society apart, the fault should be seen to be strictly local and not a panic in Washington. Let the Marines shoot back when they come under fire, but let no one think that more men or a wider operation will yield anything except more casualties. And if Mr. Gemayel falls, let the Marines depart with him. The dozens of tribes that call themselves Lebanese have to make their own deals of mutual survival or accept national suicide.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I congratulate my colleague from West Virginia, Senator BYRD, for organizing this discussion today. It is important in terms of the immediate policy problems we face in the Middle East. But it is also significant in the context of helping us solve the problem of defining the proper role of Congress in setting foreign policy.

The President does not like the War Powers Act. Neither did Mr. Nixon—over whose veto we passed the act—or Mr. Ford or Mr. Carter. But their attitudes toward the act are not relevant. The act is law. And the law is not being obeyed.

The administration can play semantic games: They can use their time and spend their energy coming up with new and creative terms to describe what is happening to our forces in Lebanon. They may even be able to make speeches and issue press releases which never use the term "combat" or even "hostilities." But no matter how creative they are, the fact remains that our soldiers are under fire. They have the ability to return that fire and have done so. They are authorized to call in air support to deal with attacks on their position. And already four of our men have died.

No manipulation of language, no creative rhetoric can disguise those facts. Nor can they disguise the fact that section 4(a)(1) of the War Powers Act is made operative by the conditions which now exist in Lebanon.

The President should follow the law. He should formally notify Congress that our troops are in a hostile environment and he should seek congressional authorization to keep them in that environment. I believe he would get that authorization.

This Congress at this point is not about to pull our troops out of Lebanon. We know the stakes there. We know how hard Lebanon has struggled, what a price it has paid over the past 10 bloody years, we know how dear this chance for true independence is to them—and we know how important their independence is to our own national interests. We realize that Syrian and Soviet control of Lebanon simply invites an escalation of armed conflict in the Middle East. We realize that if an ally that we have sworn to protect is abandoned now, just when that protection becomes costly, then our commitments will have no value in

the region and our friends will have no faith in our pledges.

And America's constitutional process requires the President to come to the Congress and request our support for his policy.

I must confess that I do not understand why President Reagan is reluctant to do that. Surely, he must know that he has the support he needs to get approval. And surely he knows that his failure to seek that support is the only source of dissension that now surrounds his policy. Beyond that, the President ought to know that no policy—in the Middle East or in Central America—can be sustained without the support of the American people and the Congress. Instead of shying away from consulting with the Congress, the President ought to welcome the opportunity to do so. He ought to welcome an opportunity to demonstrate to Syria and to the Soviets that this country is united in its determination to see a free and independent Lebanon. Following the procedures required by the War Powers Act would accomplish that end.

As important as that end is, Mr. President, it is equally important that the President invoke the War Powers Act as a demonstration of his commitment to obey the constitutional processes and the law of the land. To continue to disguise reality through tortured rhetoric which avoids the operative terms of the War Powers Act is to flout the clear intent of the law. And that is something that no citizen and no President should do or be allowed to do.

THE PRESIDENT'S WAR POWERS AND THE CURRENT SITUATION IN LEBANON

Mr. WALLOP. Mr. President, the war powers resolution is law, and surely a number of interpretations are possible of how this law applies to the current situation. But let us not waste our time with technicalities. If I were the President, I would want the Congress to vote on my deployment of troops anywhere in the world not just once but many times, as often as possible, in order to make clear to anyone who might challenge those troops that they are fully supported by the American people.

Yet all of this is beside the main points: What are those troops in Lebanon there to do? What do they need in order to effectively serve our country's interest? Our troops were sent in the hope that their very presence would lend to the Lebanese Government the margin of power it needs to take control of its own country. But this hope was never realistic. The main obstacles to the Lebanese Government's control of its own territory are the Moslem militia under the control of Syria. Syria, of course is using these militias to overthrow the Lebanese Government and as advance forces in its attempt to conquer Lebanon—or at least that part of it not occupied by Israel. Syria is doing this with the support of and on behalf of the Soviet Union. For this reason, and because of weak American responses in the world in recent years, neither Syria nor the Moslem militias were intimidated in the slightest by the U.S. Marines mere presence. They have shelled the marines and killed them. Their drive to topple the Government and conquer Lebanon continues unimpeded by the marines.

What are we going to do with our troops there? It makes no sense whatever to leave the marines there simply to take fire. The Syrians and the Soviets would enjoy nothing more than to accomplish their conquest while inflicting both more casualties and more humiliation on us. If they succeed, our diplomats in Arab capitals will be wasting their time.

We could withdraw and cut our losses a bit. But then we would have to plan for how to deal with a Syrian and Soviet dominated Mideast.

The other alternative is to recognize that, having been attacked, we should do whatever necessary to force the attackers, the Syrians, to withdraw to their own country.

I think the administration can and should make a good case to the American people for this. I hope these alternatives receive more attention than the secondary question of how we ought to apply the War Powers Act.

Mr. PELL. Mr. President, recent events in Lebanon have demonstrated once again the desperate nature of the situation there. Four U.S. Marines sent to help preserve the peace in Lebanon have been killed, and 39 have been wounded. In recent days, retaliatory air strikes have been necessary to protect our marines and new broader powers to respond to future attacks have been granted to commanders in the area.

In light of these developments, Mr. President, who among us would want to be the one to go tell the marines in Lebanon that they are not now in hostilities or that hostilities are not imminent?

Of course none of us would want to do that. Yet, this administration and, by necessity, we in the Congress are now caught up in a needless dispute about whether there are hostilities while a war rages. Just yesterday the State Department's legal adviser put forward the unique argument that the President could avoid entirely the need to characterize the Lebanon situation as hostile, or not hostile. He could, the witness told the Committee on Foreign Relations, remain silent with respect to any characterization of the situation.

Mr. President, unless the administration can be realistic about the situation in Lebanon and straightforward in its dealings with the Congress and the American people, I fear we will fail at what should be our central task: Deciding jointly what our policies and goals should be in Lebanon and devoting our energies to getting the job done.

What concerns this Senator is the danger of expanding U.S. involvement in an ever widening conflict in Lebanon. A year ago this summer U.S. marines were deployed as part of the multinational forces detailed to protect the orderly evacuation of PLO troops from Beirut. After the successful completion of that mission, the Marines were fully withdrawn from Beirut only to be redeployed again last September following the tragic assassination of the newly elected Lebanese President Beshir Gemayel, and the brutal massacre of refugees in Sabra and Shatila Palestinian refugee camps. Even then, however, the President stressed on his September 29, 1982, letter to the President pro tempore of the Senate that the Marines would be needed "only for a limited period," and that he had "no intention or expectation that U.S. Armed Forces will become involved in hostilities." The President specifically states in his letter, notifying the Senate of the second marine deployment, that

> All armed elements in the area have given assurance that they will refrain from hostilities and will not interfere with the activities of the Multinational Force.

Mr. President, despite the President's best of intentions, the situation has changed considerably in Lebanon since he provided this body with those assurances 1 year ago. Several armed elements have deliberately sought out the French and American troops of the multinational forces as targets. Our response has been to send in air strikes, dispatch an additional 2,000 marines to the waters off Lebanon's coast, and sail the battleship *New Jersey* into the Mediterranean.

My fear, Mr. President, is that this escalation in our response to clearly hostile fire directed at our marines on the ground may yet lead to a wider role for the United States, and the multinational forces, in their peacekeeping mission there. The situation in Lebanon, 1 year after this second deployment of marines, has in many respects, worsened. The Israelis, themselves suffering substantial casualties, have withdrawn to the Awwali River in the South, with more defensible emplacements. The Syrians, despite a full year of importunings from us and fellow Arab States, show no sign of withdrawing from the country. Indeed, there is substantial evidence that the Syrians have reinforced their positions in the Bekaa Valley, and in the northern parts of Lebanon occupied by their troops. Street fighting between Shiite, and Amal militias and Phalangist militias was suppressed 2

weeks ago in West Beirut only after almost 13,000 Lebanese Army troops were deployed in the area. Meanwhile the Druse, reequipped and supplied by the Syrians, seem to have joined with PLO soldiers, and Libyan and Iranian volunteers to create a situation of virtual civil war in the Chouf, and southern mountains adjacent to Beirut. The fighting shows little sign of abating, and without reinforcements, and increased artillery and air support, the multinational forces will be more vulnerable to more attacks from one or more disgruntled armed elements in Lebanon.

Mr. President, I am not one who subscribes to the view that we ought to simply pull up the stakes and run any time we find ourselves in a difficult situation abroad. In fact, I would support the President's request to authorize the marine presence in Lebanon, at this time. But I do not believe that at this most perilous moment our foreign policy can be successful without the full support of the American people. In this regard, I believe that the administration, by engaging in the most semantic of games, and by avoiding the authorization for the marine deployment required by law, is risking the loss of public support. They are snatching dissent from the jaws of consensus.

The war powers resolution was enacted, over a Presidential veto, to insure that the introduction of U.S. military into a hostile situation, or into a situation where imminent hostilities are clearly indicated, would be a shared responsibility—with full public knowledge—between the legislative and executive branches of this Government. It is the law of the land. The war powers resolution cannot be ignored out of convenience, out of concern for its foreign policy implications, and certainly not out of semantic differences that remind one of obscure theological debates.

Our marines are in a hostile situation for which they are receiving special hostile pay; war powers is the law, and I call upon the President, who is sworn to uphold the laws of this land, to abide by all of its provisions.

The President reported to this body a year ago, under the reporting requirements contained in section 4 of the war powers resolution. At that time, in my judgment, he was in compliance with the law. Today, by the very nature of the fast-changing situation in Lebanon, the provisions of section 4(a)(1) must necessarily come into play, because the situation is now indisputedly one in which hostilities, or imminent hostilities, are clearly indicated.

The President must invoke section 4(a)(1) of the war powers resolution. Then, if marines are to be in Lebanon beyond 60 days from the end of last month, that decision will only be made by the administration and the Congress acting in concert. Only by sharing this responsibility can the administration convince Congress and the American public of the wisdom of its policy in Lebanon.

RESOLUTION OF THE DEMOCRATIC CONFERENCE ON SEPTEMBER 14, 1983 ON LEBANON

Mr. BYRD. Mr. President, I ask unanimous consent that a resolution of the Democratic Conference which was adopted unanimously with an ample quorum present today be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION OF THE DEMOCRATIC CONFERENCE ON SEPTEMBER 14, 1983

Whereas United States Armed Forces have been deployed in Lebanon since September 1982 as participants in a Multinational Peacekeeping Force at the request of the Government of Lebanon; and

Whereas since August 28, 1983, United States Armed Forces have been introduced into hostilities and into situations where imminent involvement in hostilities is clearly indicated by the circumstances; and

Whereas, as a result of having been introduced into such hostilities, four United States Marines have been killed and numerous others have been wounded as a result of hostile fire in Lebanon since August 28, 1983; and

Whereas such events have required that United States Armed Forces return hostile fire in Lebanon as a matter of necessary and essential self-defense; and

Whereas on September 13, 1983, the Department of State announced that United States Marines in Lebanon have been authorized to "use firepower—their own and offshore firepower—in defense of the Marines, the other members of the multinational force and the Lebanese armed forces, if they (are) under attack and if that attack would endanger the Marines or the multinational force"; and

Whereas United States Armed Forces in Lebanon are receiving hostile fire pay as a result of the judgment of the area commander that the circumstances so warrant;

Senate Democrats have unanimously concluded that such facts and circumstances have triggered the operative provisions of Section 4(a)(1) of the War Powers Resolution (Public Law 93-148), inasmuch as, beginning on August 28, 1983, and continuing until the present time, United States Armed Forces have been introduced "into hostilities (and) into situations where imminent involvement in hostilities is clearly indicated by the circumstances."

Senate Democrats have unanimously further agreed to call upon the President to:

1. Recognize that the operative provisions of Section 4(a)(1) of the War Powers Resolution have been triggered;

2. Transmit to the Congress a report pursuant to Section 4(a)(1) of the War Powers Resolution; and

3. Transmit to the Congress a specific request for such Congressional authorization as he deems necessary and appropriate, which sets forth with precision the mission of the United States Armed Forces in Lebanon.

THE CALENDAR

Mr. BAKER. Mr. President, there are a handful of matters that look like they can be done by unanimous consent. Would the minority leader be prepared to do these items? I would invite his attention first to two matters on the calendar of business, being 324, Senate Concurrent Resolution 59, and Calendar No. 347, which is S. 1052.

Mr. BYRD. Mr. President, both of those items have been cleared on this side.

Mr. BAKER. I thank the minority leader.

CHANGING ROLE OF THE BOOK IN THE FUTURE

The concurrent resolution (S. Con. Res. 59) to authorize the Librarian of Congress to study the changing role of the book in the future, was considered.

The concurrent resolution was agreed to.

The preamble was agreed to.

The concurrent resolution, and the preamble, are as follows:

S. CON. RES. 59

Whereas the Congress of the United States has built and nurtured a library preeminent in the world;

Whereas this Library beginning as a small collection of books has now grown to over one hundred and eighty million items in all formats encompassing all areas of knowledge;

Whereas eighteen million of these items are conventional books which throughout history have been the most powerful and democratizing learning devices known to mankind;

Whereas the book is now among the least expensive and most widely accessible means to liberty and learning;

Whereas advances in technology over the last two decades have in many ways complemented the book as a learning tool;

Whereas rapidly advancing technologies and electronic printing and publishing are revolutionizing the world of learning and the role of the book in the future; and

Whereas the Congress in 1977 established the Center for the Book in the Library of Congress to study the development of the written record in our society: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That—

(1) a timely study of the changing role of the book in the future is highly desirable;

(2) the Congress authorizes the Librarian of Congress, under the auspices of the Center for the Book of the Library of Congress, to conduct such an inquiry;

(3) in conducting such a study, the Librarian of Congress shall seek the advice and assistance of persons highly knowledgeable about the role of the book in civilization and the influence of new technologies on the future of the book;

(4) such persons should include scholars, authors, educators, publishers, librarians, scientists, and individuals in computer technology, industry, and labor; and

(5) the Librarian of Congress should transmit the results of such a study to the Congress of the United States not later than December 1, 1984.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CHANGES IN ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS

The bill (S. 1052) to make certain changes in the membership and operations of the Advisory Commission on Intergovernmental Relations, was considered.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1052

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 3(a) of the Act entitled "An Act to establish an Advisory Commission on Intergovernmental Relations", approved September 24, 1959 (42 U.S.C. 4273(a)) is amended—

(1) by striking out "twenty-six members" in the matter preceding paragraph (1) and inserting in lieu thereof "twenty-eight members";

(2) by striking out "Governors' Conference" in paragraph (4) and inserting in lieu thereof "National Governors' Association";

(3) by striking out "board of managers of the Council of State Governments" in paragraph (5) and inserting in lieu thereof "National Conference of State Legislatures";

(4) by striking out "and" at the end of paragraph (6);

(5) by striking out the period at the end of paragraph (7) and inserting in lieu thereof a semicolon; and

(6) by inserting after paragraph (7) the following new paragraphs:

"(8) One appointed by the President from a panel of at least two elected officers of a township submitted by the National Association of Towns and Townships;

"(9) One appointed by the President from a panel of at least two elected school board members submitted by the National School Boards Association.".

(b) Section 3 of such Act (42 U.S.C. 4273) is further amended by adding at the end thereof the following new subsection:

"(d) For purposes of subsection (a)(8), the term 'township' means a township as described in the Governmental Organization volume of the 'Census of Governments' publication most recently issued by the Bureau of the Census prior to the date on which an appointment is made under such subsection.".

(c) Section 4(e) of such Act (42 U.S.C. 4274(e)) is amended by striking out "Thirteen" and inserting in lieu thereof "A majority of the".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COMMISSION ON THE BICENTENNIAL OF THE CONSTITUTION

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 118.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 118) entitled "An Act to provide for the establishment of a Commission on the Bicentennial of the Constitution", do pass with the following amendments:

Page 2, lines 16 and 17, strike out "sixteen" and insert: "twenty-three".

Page 2, line 18, strike out "thirteen" and insert: "twenty".

Page 2, line 19, strike out "three" and insert: "four".

Page 2, line 22, strike out "three" and insert "four".

Page 3, line 1, strike out "three" and insert "four".

Page 3, strike out lines 20–22, inclusive, and insert:

"(d) One of the members shall be designated as Chairman by, and shall serve in the position of Chairman at the pleasure of, the President.".

Page 3, line 23, strike out "Eight" and insert: "Twelve".

Page 5, line 2, strike out all after "exceed" down to and including "personnel" in line 12, and insert: "forty staff members".

Mr. SASSER. Mr. President, almost 200 years ago our Founding Fathers met in Philadelphia to revise the Articles of Confederation. What emerged from that Constitutional Convention was not merely a revision but a whole new document.

It embodied concepts of government never before tried in a modern political system. First was the principle expressed in the Declaration of Independence that government power is derived from the consent of the governed. This was a revolutionary idea in the age of kings. Even in countries with an elected assembly, ultimate sovereignty was held to be derived from the monarch. The Constitution advanced the novel idea that the people were the source of authority.

Another innovation was the separation of powers into three coequal branches and the accompanying system of checks and balances. While not new to political philosophy, having been expounded by Montesquieu, it was certainly new to political practice. It was indeed another quantum leap of imagination by the drafters of the Constitution arising out of their experiences with the hereditary and unitary systems of the Old World.

As James Madison stated in the Federalist Papers:

> The accumulation of all powers, legislative, executive, and judiciary, in the same hands, whether of one, a few, or many, and whether hereditary, self-appointed, or elective, may justly be pronounced the very definition of tyranny.

It was a tyranny with which the drafters were all too familiar.

The third great principle embodied in the Constitution was that of federalism, of a system of enumerated and reserved powers, a respect of regional interests.

But a mere mechanical recitation of the provisions of the Constitution runs the risk of losing sight of its true genius. It is not merely a faded historical document to be gawked at by tourists visiting the National Archives. At the risk of overusing another cliche, it is a "living constitution."

As we in Congress wrestle with the intractable problems of our modern society, we are reminded time and again of the flexibility of this marvelous document—adapting, evolving, but always relevant. It has survived wars and depressions. It has survived the industrial revolution and internal revolution. It has survived the change in America's role from a nation exploring its frontiers to a nation exploring the stars.

Only a few years ago we celebrated the bicentennial of the Declaration of Independence, the document which defines the guiding principles of our Republic. It is appropriate that we now establish a commission to honor the bicentennial of the document that implements those principles. It will bring together Federal, State, and local government as well as the private sector and serve as a clearinghouse for bicentennial activities.

It is appropriate and necessary that we commemorate the adoption of the Constitution. And I think that the events should focus on the relevance of the Constitution in our daily political life.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

COMMUNITY VOLUNTEER SERVICE ACT

Mr. BAKER. Mr. President, I would say next to the minority leader that I am cleared on this side to consider Calendar Order No. 287, S. 1129, together with the budget waiver to accompany that measure, which is Calendar Order No. 327, Senate Resolution 176, if the minority leader is similarly cleared.

Mr. BYRD. Mr. President, that matter has been cleared.

Mr. BAKER. I thank the Senator.

BUDGET ACT WAIVER

The resolution (S. Res. 176) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the

consideration of S. 1129, was considered, and agreed to; as follows:

S. RES 176

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1129, a bill to authorize appropriations to provide for revision and extension of the Domestic Volunteer Service Act, and for other purposes. Such waiver is necessary to allow the authorization of an appropriation of $147,993,000 for extension of the Domestic Volunteer Service Act for fiscal year 1984.

The waiver of section 402(a) is necessary to permit congressional consideration of statutory authority to provide resources for programs serving individuals through volunteers.

Compliance with section 402(a) of the Congressional Budget Act of 1974 was not possible by the May 15, 1983, deadline because the May 13, 1983, full committee markup was canceled.

The effect of not considering this authorization would be to deny services provided by volunteers to the recipients of these programs.

The desired authorization will not delay the appropriations process and can be accommodated in a fiscal year 1984 appropriations bill.

COMMUNITY VOLUNTEER SERVICE ACT, 1983

The Senate proceeded to consider the bill (S. 1129) to authorize appropriations for programs under the Domestic Volunteer Service Act of 1973, and for other purposes which had been reported from the Committee on Labor and Human Resources with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Community Volunteer Service Act of 1983".

VOLUNTEERS IN SERVICE TO AMERICA; STATEMENT OF PURPOSE

SEC. 2. Section 101 of the Domestic Volunteer Service Act of 1973 (hereafter in this Act referred to as the "Act") is amended—

(1) by striking out "eliminate" and inserting in lieu thereof "alleviate";

(2) by striking out ", social, and environmental" in the second sentence thereof;

(3) by inserting "low-income individuals," before "elderly" in the second sentence thereof; and

(4) by adding at the end thereof the following new sentence: "It is the further purpose of this part to encourage the commitment of the resources of the private sector and to encourage volunteer service at the local level to carry out the purposes set forth in this section.".

RECRUITMENT

SEC. 3. Section 102 of the Act is amended by inserting "(a)" after the section designation and by adding at the end thereof the following new subsection:

"(b) If any VISTA volunteer who is recruited locally becomes unavailable for service, the recipient of the project grant or contract has the right to replace the volunteer.".

ASSIGNMENT

SEC. 4. (a) Section 103(a) of the Act is amended—

(1) by inserting after "States" in the matter preceding clause (1) the following: "in the local communities in which the volunteers were recruited";

(2) by striking out "and" at the end of clause (2);

(3) by striking out "the Economic Opportunity Act of 1964, as amended (42 U.S.C. chapter 34)" and inserting in lieu thereof "the Community Service Block Grant Act, the Headstart Act, or the Community Economic Development Act of 1981," in clause (3) thereof; and

(4) by redesignating clause (3) as clause (5) and by inserting immediately after clause (2) the following new clauses:

"(3) in addressing the problems of the homeless, the jobless, the hungry, illiterate adults, and low-income youths;

"(4) in addressing the special needs connected with alcohol and drug abuse prevention, education, and related activities, consistent with the purpose of this part; and".

(b)(1) The first sentence of section 103(b) of the Act is amended to read as follows: "The Director shall assign low-income community volunteers in their home communities or in nearby communities and when necessary shall assign nationally recruited specialist volunteers wherever such volunteers are needed.".

(2)(A) The second sentence of section 103(b) of the Act is amended by striking out "shall insure that each such volunteer is provided" and inserting in lieu thereof "may provide that each such volunteer is furnished".

(B) The third sentence of section 103(b) of the Act is amended by striking out "shall insure" and inserting in lieu thereof "may provide".

(C) The fourth sentence of section 103(b) of the Act is amended by striking out "shall" and inserting in lieu thereof "may".

(c) Section 103 of the Act is amended—

(1) by redesignating subsections (c) and (d) as subsections (d) and (e), respectively; and

(2) by inserting after subsection (b) the following new subsection:

"(c) Whenever feasible, the Director, in providing for an individual plan for job advancement or for transition to a situation leading to gainful employment under subsection (b), shall coordinate the activities connected with such plan with an appropriate private industry council established under the Job Training Partnership Act.".

(d) The first sentence of section 103(e) (as redesignated by subsection (c) of this section) is amended by striking out "duties or work in a program or project in any State unless such program or project" and inserting in lieu thereof "work in a program or project in any community unless the application for such program or project contains evidence of local support and".

TERMS AND PERIODS OF SERVICE

SEC. 5. (a) Section 104(a) is amended—

(1) by striking out ", social, and environmental" in the first sentence thereof; and

(2) by striking out "this" in the second sentence thereof and inserting in lieu thereof "the requirement for full-time commitment".

REPEAL OF LIMITATIONS

SEC. 6. (a) Section 108 of the Act is amended—

(1) by striking out in the first sentence of subsection (a) "1977" and inserting in lieu thereof "1984";

(2) by striking out all of the second sentence of subsection (a); and

(3) by striking out ", social, or environmental" in clause (2) of subsection (b) thereof.

SERVICE LEARNING PROGRAMS

SEC. 7. Section 111 of the Act is amended to read as follows:

"STATEMENT OF PURPOSE

"SEC. 111. The purpose of this part is to provide for a program of part-time or short-term service-learning by secondary and post-secondary school students through participation in activities that strengthen and supplement efforts to alleviate poverty and poverty-related human problems.".

REPEAL OF UNIVERSITY YEAR FOR ACTION PROGRAM AND SPECIAL CONDITIONS

SEC. 8. (a) Section 112 of the Act is repealed.

(b) Section 113 of the Act is repealed.

(c)(1) The table of contents of the Act is amended by striking out items "Sec. 112." and "Sec. 113.".

(2) The table of contents of part B of title I of the Act is further amended by striking out "Sec. 114." and inserting in lieu thereof "Sec. 112.".

SPECIAL SERVICE LEARNING PROGRAMS

SEC. 9. (a) Section 114 of the Act is redesignated as section 112.

(b) Section 112(a) of the Act (as redesignated by subsection (a) of this section) is amended by striking out "and on such terms and conditions as described in subsections (a) and (c) of section 103" and inserting in lieu thereof the following: "as described in section 111".

SPECIAL VOLUNTEER PROGRAMS; STATEMENT OF PURPOSE

SEC. 10. Section 121 of the Act is amended—

(1) by striking out ", social, and environmental"; and

(2) by adding at the end thereof the following new sentence: "It is the further purpose of this part to provide technical and financial assistance to encourage voluntary organizations and volunteer efforts at the Federal, State, and local level.".

REQUIREMENT OF EQUITABLE DISTRIBUTION OF ACTIVITIES

SEC. 11. Section 122(a) of the Act is amended—

(1) by redesignating paragraph (2) as paragraph (3); and

(2) by inserting after paragraph (1) the following:

"(2) In carrying out programs authorized by this part, the Director shall establish criteria to make grants and enter into contracts, in each fiscal year, on the basis of merit and of an equitable geographic distribution of programs.".

FOSTER GRANDPARENT PROGRAM

SEC. 12. Section 211(b)(2) of the Act is amended by adding at the end thereof the following new sentence: "If the particular foster grandparent subject to the determination under this paragraph becomes unavailable to serve after such determination is made, the agency or organization may select another foster grandparent.".

SENIOR COMPANION PROJECTS TO ASSIST HOMEBOUND ELDERLY

SEC. 13. Section 213 of the Act is amended by adding at the end thereof the following new subsection:

"(c)(1) The Director is authorized to make grants or contracts for Senior Companion projects to assist homebound elderly to remain in their own homes and to enable in-

stitutionalized elderly to return to home care settings.

"(2)(A) The Director is encouraged to recruit, subject to subparagraph (B), Senior Companion volunteer trainers who on the basis of experience (such as, doctors, nurses, home economists, social workers) will be used to train Senior Companion volunteers to provide initial and continuing needs assessments and appropriate in-home services for Senior Companion volunteer recipients. The needs assessments and in-home services shall be coordinated with and supplement existing community based home health and long-term care systems. The Director may also use Senior Companion volunteer leaders, who on the basis of experience as volunteers, special skills, and demonstrated leadership abilities may spend time in the program (in addition to their regular assignment) to assist newer Senior Companion volunteers in performing their assignments and in coordinating activities of such volunteers.

"(B) Senior Companion volunteer trainers recruited under subparagraph (A) of this paragraph shall not be paid stipends.

"(3) The Director shall conduct an evaluation of the impact of the projects assisted under this subsection based upon a sample survey of projects so assisted. In the third year of such study, the Director shall prepare and submit a report to the Congress. Such evaluation study shall include information on—

"(A) the extent to which costs of providing long-term care are reduced by using volunteers who receive stipends in the provision of long-term care services,

"(B) the effectiveness of the provision of long-term care with the use of volunteers,

"(C) the extent to which health related costs of the Senior Companion volunteers themselves are affected because of their involvement in the project,

"(D) the extent of coordination with other Federal and State efforts aimed at enabling older individuals to receive care in their own homes; and

"(E) the effectiveness of using Senior Companion volunteer leaders and of involving Senior Companion volunteers based on the training of the volunteer leaders and volunteers.".

OLDER AMERICAN VOLUNTEER PROGRAMS; NON-FEDERAL CONTRIBUTIONS

SEC. 14. (a) Part C of title II of the Act is amended by adding at the end thereof the following new section:

"USE OF NON-FEDERAL CONTRIBUTIONS IN OLDER AMERICAN VOLUNTEER PROGRAMS

"SEC. 224. Whenever non-Federal contributions made to volunteer programs for older Americans under this title is in excess of the amount required by the Director, the Director may not restrict the manner in which such contributions are expended if expenditures from non-Federal contributions are consistent with the provisions of this Act.".

(b) The table of contents of part C of title II of the Act is amended by inserting after item "Sec. 223." the following new item:

"Sec. 224. Use of non-Federal contributions in older American volunteer programs.".

ESTABLISHMENT OF AGENCIES

SEC. 15. Section 401 of the Act is amended—

(1) by inserting before the period at the end of the first sentence the following: "in order to provide a focal point for volunteerism at the Federal, State, and local level"; and

(2) by striking out all of such section after the fourth sentence and inserting in lieu thereof the following: "There shall also be in such agency one Associate Director who shall be appointed by the President with the advice and consent of the Senate, and shall be compensated at the rate provided for level 5 of the Executive Schedule under section 5316 of title 5, United States Code. Such Associate Director shall be designated 'Associate Director for Domestic and Anti-Poverty Operations' and shall carry out operational responsibility for all programs authorized under this Act. There shall also be in such agency three Assistant Directors, each of whom shall be appointed by the Director, and who shall report directly to the Associate Director for Domestic and Anti-Poverty Operations. One such Assistant Director shall be primarily responsible for VISTA and other antipoverty programs under title I of this Act, one such Assistant Director shall be primarily responsible for liaison with private voluntary organizations under part C of title I of this Act, and one such Assistant Director shall be primarily responsible for the Older American Volunteer Programs under title II of this Act. In the event of a vacancy in the position of Director, or in the absence or inability to act of the Director, the order of officials who shall act as Director of the ACTION agency shall be, the Deputy Director, the Associate Director for Domestic and Anti-Poverty Operations, the Assistant Director responsible for Older American Volunteer Programs under title II of this Act, the Assistant Director responsible for VISTA and other antipoverty programs under title I of this Act, and the Assistant Director responsible for liaison with private voluntary organizations under title I of this Act.".

SPECIAL LIMITATIONS

SEC. 16. Section 404(f) of the Act is amended—

(1) by striking out "and except as provided in the second of this subsection" in the first sentence thereof, and

(2) by striking out the second sentence thereof.

REPEAL OF THE NATIONAL VOLUNTEER SERVICE ADVISORY COUNCIL

SEC. 17. (a) Effective January 1, 1986, section 405 of the Act is repealed.

(b) Effective January 1, 1986, item "Sec. 405" in the table of contents is repealed.

TECHNICAL AMENDMENT

SEC. 18. Section 417(c)(1) is amended by striking out "and the Peace Corps Act (22 U.S.C. 2501 et seq.)".

ELIGIBILITY FOR OTHER PROJECTS

SEC. 19. Section 418 of the Act is amended by inserting "workers' compensation," after "public assistance,".

REGULATIONS REQUIREMENT

SEC. 20. (a) Section 420(c)(1) of the Act is amended to read as follows:

"(c)(1) Notwithstanding any provision of subchapter II of chapter 5 of title 5, United States Code, relating to administrative procedure, any proposed regulation prescribed pursuant to this Act for the administration of any program under this Act may not take effect unless the public has been afforded 30 calendar days to comment on the proposed regulation prior to its publication in final form in the Federal Register.".

(b) Section 420(c)(2) of the Act is amended—

(1) by striking out "(A)" after "(2)"; and

(2) by striking out paragraph (B).

(c)(1) The second sentence of section 420(d) of the Act is amended by striking out "Except as is provided in the following sentence, no" and inserting in lieu thereof "No".

(2) The third sentence of section 420(d) of the Act is repealed.

NATIONAL VOLUNTEER ANTIPOVERTY PROGRAM AUTHORIZATION

SEC. 21. Section 501 of the Act is amended to read as follows:

"NATIONAL VOLUNTEER ANTIPOVERTY PROGRAM AUTHORIZATION

SEC. 501. (a) There is authorized to be appropriated to carry out part A of title I of this Act $15,000,000 for fiscal year 1984, $17,000,000 for fiscal year 1985, and $19,000,000 for fiscal year 1986.

"(b) There is authorized to be appropriated to carry out part B of title I of this Act $1,800,000 for the fiscal year 1984 and for each of the fiscal years 1985 and 1986.

"(c) There is authorized to be appropriated to carry out the provisions of part C of title I of this Act $1,984,000 for the fiscal year 1984 and for each of the fiscal years 1985 and 1986.".

NATIONAL OLDER AMERICANS VOLUNTEER PROGRAM AUTHORIZATION

SEC. 22. Section 502 of the Act is amended to read as follows:

"NATIONAL OLDER AMERICANS VOLUNTEER PROGRAM AUTHORIZATION

"SEC. 502. (a) There is authorized to be appropriated $27,445,000 for each of the fiscal years 1984, 1985, and 1986, for the purpose of carrying out programs under part A of title II of this act.

"(b) There is authorized to be appropriated $48,400,000 for each of the fiscal years 1984, 1985, and 1986, for the purposes of carrying out programs under part B of title II of this Act.

"(c) There is authorized to be appropriated $24,016,000 for each of the fiscal years 1984, 1985, and 1986, for the purposes of carrying out part C of title II of this act. Of the amount appropriated in each fiscal year $12,000,000 shall be available to carry out section 213(c).".

ADMINISTRATION AND COORDINATION

"SEC. 23. Section 504 of the Act is amended to read as follows:

"ADMINISTRATION AND COORDINATION

"SEC. 504. There is authorized to be appropriated for the administration of this Act, as authorized in title IV of this Act, $29,348,000 for each of the fiscal years 1984, 1985, and 1986.".

Mr. HATCH. Mr. President, the bill we are considering, the Community Volunteer Service Act of 1983 (S. 1129), will authorize appropriations for the Domestic Volunteer Service Act of 1973. The volunteer programs which are facilitated by this act stimulate a cooperative effort to address the needs of the recipients of these programs. S. 1129 continues the worthwhile efforts of the Older American Volunteer programs and the Volunteers In Service to America.

Under the act, both the Foster Grandparent program and the Senior Companion program will continue to provide an opportunity for low-income senior citizens to serve as volunteers.

An important change contained in S. 1129 would significantly increase the number of Senior Companion programs and strengthen the training component for volunteers. Most States currently have only one Senior Companion program which can assist in providing necessary services for the elderly in their home. For example, in my home State of Utah, there is no Senior Companion program which serves Salt Lake City, the major metropolitan area. The provision included in the committee bill will provide the funding to implement such a program.

The committee report also stresses the need to encourage cooperative efforts with existing services for the elderly. I would hope funding within the private sector and the States, in combination with Federal dollars, could be encouraged so as to create a multiplier effect and thus make additional resources available for the programs.

Mr. President, S. 1129 adds a new section 224 to the Domestic Volunteer Service Act providing local control over contributions to the Retired Senior Volunteer programs, Foster Grandparents, and Senior Companion projects when those contributions are in excess of the required local share permitted in the act, provided the expenditure of such contribution is consistent with the purposes of the act. The implementation of section 224 would require the decisions concerning allocation of the excess dollars to be made at the local level and reflected in the proposed grant budget submitted to the ACTION agency. The responsibility of the Federal ACTION agency would be to check that the proposed expenditures were consistent with the purpose of the act. The committee report on S. 1129 also mentions published regulations as a factor to use when reviewing the decisions made at the local level. As chairman, it is my intent that the application of the regulations be more general in nature and not prescriptive to the point of returning to the Federal level the main decisionmaking authority concerning the excess dollars beyond the match. Furthermore, agency guidelines and policy which are referred to in regulations must be published and made readily available to the public and the Congress in order to allow the usual opportunity for comment on their content and thrust.

Section 224 will reduce the need for double budgeting which results in increased costs and provide an accounting for the dollars used in the Older American Volunteer programs. The Federal ACTION agency will also receive a report of the actual expenditures and monitor their consistency with the act and the published regulations as I previously described. Both the Federal and non-Federal dollars should be carefully allocated to most effectively improve the quality of services provided for the elderly.

The Community Volunteer Service Act will maintain the efforts to alleviate poverty and poverty-related human problems through the locally recruited Volunteers In Service to America (VISTA). Evidence of local support for VISTA projects will be provided as part of the application process. Under title 1 of the bill, service learning programs and special volunteer programs will continue to address the needs of individuals and communities through volunteerism.

The value and accomplishments of volunteers in communities have recently been evident during the flooding in Utah. The hundreds of hours donated to prevent more serious damage due to the flooding is an example of true commitment to helping others. The citizens, elected officials, and church leaders of Utah, are to be commended for their example of true volunteerism.

I encourage my colleagues of the Senate to recognize the value of S. 1129 and the volunteer programs it will encourage by supporting this legislation and its prompt implementation.

Mr. DENTON. Mr. President, I rise in strong support of S. 1129, the Community Volunteer Service Act of 1983. As the original cosponsor of the bill, I worked closely with Senator HATCH in developing language that would provide funding and direction for volunteer programs under the ACTION agency. The bill before the Senate represents many weeks of staff and member negotiations and I am pleased that both sides have now agreed to pass the bill by unanimous consent.

The ACTION agency is the sole Federal agency charged with generating volunteer service in local communities. An oversight hearing conducted by the Subcommittee on Family and Human Services, which I chair, demonstrated the impact of volunteer programs, including VISTA, RSVP, Foster Grandparents, Senior Companions, and Young Volunteers in Action, have on their communities. Witnesses presented a clear case for the 3-year reauthorization.

I thank my colleagues in advance for a ringing endorsement of the Federal volunteer programs.

Mr. STAFFORD. Mr. President, I rise today in support of Senate bill 1129, the Community Volunteer Service Act Amendments of 1983. The volunteer programs authorized under this act provide vital community services and job training opportunities around the country.

The VISTA program is the only full-time, stipended, domestic volunteer program that assists low-income Americans in increasing their capacity for self-reliance. Through VISTA, individuals from all walks of life and all age groups work with low-income individuals to improve their economic situation and eliminate poverty-related problems. Volunteers serve throughout the Nation, in both urban and rural areas, in such activities as: Neighborhood revitalization, agricultural cooperatives, youth and adult literacy, food distribution programs, independent living programs with severely handicapped individuals, and senior citizen employment programs.

I encourage my colleagues to vote today in support of S. 1129. I believe that the authorization levels included in these amendments given recognition to the important role volunteer programs can play in addressing the broad range of poverty-related problems that face our Nation; problems such as unemployment, hunger, homelessness, and illiteracy.

Mr. KENNEDY. Mr. President, today we are considering legislation to reauthorize the ACTION agency—the Community Volunteer Service Act of 1983. Despite the small size of this agency or of its funding level, we should not be fooled into believing that this agency or this legislation is insignificant. For those millions of people whose lives have been touched by VISTA volunteers, Foster Grandparents, Senior Companions, or Retired Senior Volunteers, the work of this agency is anything but insignificant. I am pleased that we have been able to come to the floor today with a bill that will permit their efforts to continue.

I am sure it will come as no surprise to my colleagues that, when the Labor and Human Resources Committee began consideration of this reauthorization, there was considerable controversy surrounding the ACTION agency. The Reagan administration had recommended cuts in the funding level for the ACTION agency and had worked to eliminate the VISTA program. Many Members of this body and of the House, myself included, were strongly committed to preserving all the programs in the ACTION agency—including VISTA. Others of our colleagues, while not embracing the position of the administration, nevertheless had their doubts about the structure and operation of the VISTA program in particular and the agency in general. I am pleased to say that thanks to the extremely cooperative efforts of my colleagues on the committee, particularly Senator HATCH as the chairman of the committee and Senators DENTON and DODD, as the chairman and ranking member of of the subcommittee, our negotiations and discussions in committee produced a bill we could all support. It is eloquent testimony to the success of these efforts that the final vote in committee to report this bill was 16 to 2. Senators HATCH, DENTON, and DODD

deserve the highest commendation. I am pleased to have been able to work with them so successfully.

During the committee's consideration of this reauthorization, we were presented with overwhelming evidence of the effectiveness and success of VISTA volunteers, Foster Grandparents, Senior Companions, and Retired Senior Volunteers. VISTA—Volunteers in Service to America—was created in 1965 as a domestic counterpart to the Peace Corps. It encouraged and enabled Americans of all ages from all walks of life to dedicate a year of their life in service to their communities and their fellow citizens. These volunteers have worked to revitalize communities, to promote adult and youth literacy, to alleviate the effects of domestic violence, to distribute food and clothing to the needy, to establish independent living situations for severely handicapped individuals, and to promote employment for senior citizens. This is only a representative sample of a list that could be much longer.

In my own State of Massachusetts, the Massachusetts Association of Older Americans has made a particularly effective use of VISTA volunteers in meeting the particular needs of the elderly poor.

During 1973, over 900 elders throughout the Commonwealth received complete eye testing at a series of clinics organized by MAOA volunteers under the auspices of Beth Israel Hospital. The elders also received examinations for high blood pressure and hypertension from VISTA volunteer Kathleen Dillion, a registered nurse.

Since 1977, MAOA and the Massachusetts Blue Cross/Blue Shield have sponsored quarterly seminars on health issues, particularly on preventive health care for the elderly. The programs have produced a corps of senior volunteers capable of providing accurate health information to needy individuals in their communities.

In 1978, MAOA VISTA volunteers facilitated the smooth transition of all 50 senior residents of the Fidelis Way Project to the new Corey Road Elderly Housing Project in Brighton, while at the same time assisting with their other health and living needs.

The mobilization of community resources, both public and private, by MAOA VISTA volunteer Joseph Riemer proved to be the pivotal factor in getting the 114-unit Cedar Glen Elderly Housing Development in construction in 1979.

These examples are repeated all over the Commonwealth of Massachusetts: Greater Boston Legal Services has provided legal assistance to low-income persons involved in civic law disputes; the Boston Indian Council has provided job placement and day care for urban native Americans; Casa Myrna Vasquez has provided assistance to homeless and battered women and children; New England Small Farms Institute has provided assistance to farmers in central and western Massachusetts and Artisans for Better Living has promoted and marketed crafts made by low-income individuals. At this point, Mr. President, I ask unanimous consent that a letter from this organization describing its accomplishments be placed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ARTISANS BETTERING LIVELIHOOD AND EDUCATION,
Boston, Mass., June 24, 1983.

Representative AUSTIN J. MURPHY,
Chairman, Subcommittee on Select Education, Committee on Education and Labor, House of Representatives, Washington, D.C.

DEAR REPRESENTATIVE MURPHY: Thank you for sending me the materials on the hearings on VISTA. VISTA must be continued and expanded. I support myself as a plumbing contractor and have been an unpaid VISTA supervisor for six years.

I began a handcraft program for poverty people with the help of my hardworking secretary that had its beginnings in a run-down Boston housing project. This program extends now to 2,700 crafters from all over New England. These are the blind, the handicapped, senior citizens, and many others. Over one-half million dollars has gone through my plumbing shop to low-income people and zero dollars has been returned to a professional staff. We have taught unskilled welfare mothers and teenagers from welfare families business skills and introduced them to the world of work.

My entire endeavor would not have been possible without the concerned effort and cooperation of VISTA in Boston. These people have always been one-hundred percent in effort and cooperation to make our own program a success. I believe that VISTA's future direction in working with poverty people should be to carefully align themselves with the expertise of the business community that can guide and teach the skills necessary to bring poverty people into the economic life of our Country.

I have enclosed a list of our accomplishments and news stories on our program. Keep up the good work with VISTA.

Very truly yours,

ALDEN R. WAMBOLT.

ARTISANS BETTERING LIVELIHOOD AND EDUCATION—ABLE'S ACCOMPLISHMENTS

1. A.B.L.E. has an ongoing ceramic workshop and program that serves low-income and elderly people of the South Boston and Dorchester areas.

2. A.B.L.E. has developed a membership of 2,700 that includes artisans and craftspeople who are the elderly, the handicapped, the disabled, the retarded, welfare mothers, the blind, Social Security recipients, prison inmates, etc.

3. A.B.L.E. has developed four store outlets (152 State Street, Boston; American Legion Highway, Roslindale; and Salem Marketplace, Salem, Massachusetts; and at Church and Housatanic Streets, Lenox, Massachusetts).

4. Handcrafts of New England appeared in the newspapers about thirty-five times and on television twelve times.

5. Carole McClure, A.B.L.E.'s volunteer treasurer, was picked by The United Way as Boston's most outstanding volunteer.

6. Many unskilled welfare mothers and youth have entered the work force after being trained at the Handcrafts of New England stores.

7. Hundreds of thousands of meaningful hours of creativity through hard work has helped give hundreds of people integrity and selfworth through the development of their skills.

8. The production and development of the handmade traditional crafts that "Down East" New Englanders are known for is fostered through this program.

9. This non-bureaucratic program has sent back over $512,000 to low-income people while returning zero dollars to a professional staff. A.B.L.E. knows of no other program that can make that statement.

10. VISTA has picked A.B.L.E.'s Handcrafts of New England as one of the best self-help programs in the United States and held VISTA's fifteenth birthday celebration at Handcrafts of New England with actress, Ali MacGraw, attending. Later two of our VISTA workers were honored by Mrs. Carter at the White House VISTA awarded A.B.L.E. three VISTA positions to further develop this program.

11. One VISTA worker has been assigned to the Salem store and one worker is involved in the business aspects (inventory control, accounting, billing, etc.) which is much needed at this time.

12. One VISTA worker is developing our first community store in a mainly black area of Boston where a local church is providing a new building on their property which fronts on the American Legion Highway. This will be our first community-type store. This endeavor will cost A.B.L.E. virtually nothing.

13. A.B.L.E.'s successful Wayland Christmas store was our first store in the suburbs and the acceptance by the public has caused us to study a way to open a fulltime store in the suburbs.

14. A business plan that will help A.B.L.E. down the road to self-sufficiency has been developed and is in effect. Consumable products such as handmade chocolates, fudge, jams, jellies, dips, and maple syrup products will become our "country store" look. Handcrafts of New England also features a needlework corner that will sell yarn supplies and craft kits for the do-it-yourself folks.

Mr. KENNEDY. Such human examples of the effectiveness of the VISTA programs are repeated all over the Commonwealth of Massachusetts and the Nation. For those of my colleagues who like to examine programs in statistical terms, as well as human terms, however, I refer them to the most recent ACTION evaluation of VISTA—in 1979. That evaluation concluded that each VISTA volunteer recruited an average of 15 additional local volunteers to assist in local projects. In addition for an investment of less than $7,000 each volunteer generated an average of $25,000 in public and private resources to benefit the community. Both statistical and anecdotal evidence agree: VISTA has helped millions, effectively and efficiently.

We should not forget that our Nation benefits not only from the services that these volunteers provide, but also because the volunteers benefit in so many ways from their experiences. Since 1965, over 75,000 Americans have volunteered to spend a year of their lives at subsistence living standards to serve the needs of the poor. Thousands of them have been poor themselves and VISTA has given them a chance to pull themselves out of poverty. For thousands of other who are elderly, VISTA has offered them an opportunity to feel useful and valuable that otherwise may not have existed. And for the remainder, particularly many in the early years, VISTA gave them their first experience in the fields of antipoverty service—fields that many choose to pursue as their careers.

Edith Alverio, Peter Frau, Joaquin Ortiz, and Pablo Medina were all locally recruited low-income VISTA volunteers with the Westtown Concerned Citizen Coalition in Chicago working on economic development, housing, and job development. All were hired by the coalition after completing their service.

Victoria Bonberry was a low-income locally recruited VISTA volunteer with the Tribal Sovereignty Project in California. After her service ended, she was hired as a trainer for the project.

Becky Simpson was a mother of six in her midfifties when she was recruited as a low-income VISTA to work for the Kentucky Rivers Coalition. She is now a full-time staff employee of the coalition.

Emily Grippe and Ann Quinn were two low-income locally recruited VISTA volunteers with the community caring conference crime prevention program in Rockford, Ill. They are now on the staff of the conference.

Bill Lindsay went to Ft. Lauderdale as a VISTA volunteer to work on housing issues. He is now the director of the Ft. Lauderdale Housing Authority.

Joe Canapa served in New Mexico as a VISTA volunteer. He is not the director of the New Mexico Land and Water Rights Division.

Mike Runnels also served in new Mexico as a VISTA volunteer. He is now New Mexico's Lieutenant Governor.

Chris Cook went to Alaska as a VISTA volunteer. He stayed on and became a Federal district court judge.

John Sweet went to Atlanta as a VISTA volunteer. He is now a member of the Atlanta City Council.

George Graupera came to Vermont as a VISTA volunteer specializing in architectural work. He stayed on to design low-income housing in that State.

There are many more volunteers and many more stories. I believe they all demonstrate the enormous benefit that participating in this program has meant to so many Americans.

While less controversial, the Older Americans volunteer program have been no less successful. I am pleased that this legislation permits their continued expansion. As in VISTA, these three programs enrich the lives of their participants and benefit the Nation through its services. Since the inception of the three programs—the Foster Grandparent and Retired Senior Volunteers programs in 1969 and the Senior Companions program in 1973—hundreds of thousands of seniors have found their lives to be more meaningful and have improved the lives of millions of their fellow citizens. They have provided assistance in schools, hospitals, homes, and various institutions to those with physical, mental, or social needs. They have helped children and seniors; the poor and the handicapped; the hungry, the homeless, and the sick. They fill the essential staff needs that enable local, public, and private service organizations to do their jobs. It is fair to say that without these programs—VISTA, Foster Grandparents, Retired Senior Volunteers and Senior Companions—this Nation would be a poorer place to live.

Now more than ever we need the services that these programs can provide. The devastating rise in unemployment has forced millions of Americans into poverty. The reduction in Federal and State funds available to alleviate their plight has stretched the resources of local and private organizations to the breaking point. Volunteers from these programs have helped form the link that has kept these programs alive and in many cases has kept these new poor alive. This bill not only preserves these programs, but permits modest expansion. Such expansion is essential if we are to meet the needs of these new poor as well as all the other struggling members of our society. I urge all my colleagues to support this vital legislation.

In closing, let me once more praise the efforts of all the members of the Labor and Human Resources Committee and particularly of Senators HATCH, DENTON, and DODD. Let me also commend Fran Butler who represents the three Older Americans volunteer programs and Mimi Mager who represents the Friends of VISTA. The information and analysis they provided to the members of this committee were invaluable in our efforts to produce this legislation. However, I think all my colleagues will agree with me that the highest praise should go to those many volunteers all over the country. It has been their tireless work that has convinced me and, I am sure, convinced my colleagues, of the value of this agency and its programs. They are the ones who have truly made this legislation a reality.

THE NEED FOR VISTA HAS NEVER BEEN GREATER

Mr. RIEGLE. Mr. President, today we are considering S. 1129, the authorization of the Community Volunteer Service Act, previously known as the Domestic Volunteer Service Act, which includes the VISTA program. I would like to remind my colleagues of the many valuable contributions made by VISTA volunteers throughout the United States.

VISTA is a program that fosters self-help among the poor and disadvantaged. In Michigan, where their efforts are sorely needed, VISTA volunteers are finding shelter for homeless individuals, distributing food to needy persons, assisting senior citizens in cutting their fuel bills, identifying jobs for unemployed individuals, providing essential services for troubled and runaway youth, and aiding victims of domestic violence, to list only a few examples of their hard work.

Despite VISTA volunteers' dedicated service, the program's funding has been drastically reduced during the last 2½ years. The number of VISTA volunteers serving the truly needy in Michigan has plummeted from 99 volunteers at 22 projects in 1981, to its current level of only 38 volunteers at 8 projects. Nationally, the number of VISTA's has dropped from a high of nearly 5,000 in January 1981, to a level of only 1,600 today, the lowest level in VISTA's 18-year history. This has occurred, unfortunately, at a time when the need for the program has never been greater. As a VISTA sponsor in Michigan recently wrote:

> In these difficult times, when the poor are already suffering because of so many governmental cutbacks, the loss of VISTA would truly be disasterous. Everything possible ought to be done to continue and expand the VISTA program.

The bill we are considering today, S. 1129, includes $15 million, $17 million, and $19 million respectively for the VISTA program for fiscal years 1984, 1985, and 1986. While I personally would support a restoration of VISTA's prior funding levels of over $30 million, I recognize that the funding levels included in this bill are a far cry from the President's request of $194,000 in fiscal year 1984 and $0 for fiscal years 1985 and 1986. I urge my colleagues on both sides of the aisle to support the continuation and expansion of the VISTA program and the Older American volunteer programs, and to support wholeheartedly S. 1129 when it is considered by the full Senate today.

Last, I would like to bring to the attention of the Senate a moving editorial published in the Detroit Free Press concerning VISTA. The editorial, entitled "VISTA: It Should Be Spared From the Ax Reagan's People Want

To Drop," examines VISTA's past and future and concludes that without question there is a very real need for VISTA, and that judged by any standards the program has worked. I could not agree more. At this time, I ask that it be printed in the RECORD.

The editorial follows:

[From the Detroit Free Press, Sept. 2, 1982]

VISTA: IT SHOULD BE SPARED FROM THE AX
REAGAN'S PEOPLE WANT TO DROP

The Reagan administration is sharpening its hatchet for Vista, the old domestic program many people assumed already had died on the budget chopping block. But Vista is still around and, although its activist approach is disliked by this administration, the agency deserves to live.

Vista was never one of the razzle-dazzle, high-rolling programs, though it once fielded almost 5,000 volunteers to work with poor people's groups and other neighborhood agencies. And no one could accuse the volunteers of lacking commitment or of joining the program merely to cram their pockets with federal dollars. Volunteers worked for about $400 a month.

Do we really need such a program? Without question. In both cities and rural communities, the poor and powerless must contend with a sea of problems, problems that may be compounded by their confusion about how bureaucracies work, their inability to comprehend or fill out forms, their ignorance about the identities of landlords, their fears of fighting the system.

The Vista volunteers have helped such people get better public services and improve their reading. They have staffed emergency food programs, tutored public school children, worked with groups trying to attract new businesses. Judged by any set of standards, the program has worked.

The White House believes senior citizens and others would provide such services for mere travel expenses. In many cases, though, senior citizens are prime candidates for Vista's services themselves. And as agencies struggle with cutbacks in federal funding and local support, they need to know they can depend on Vista.

What probably has hurt the program most is the administration's suspicion that Vista exists only to foment community activism. But Vista is more than a program: Like its more exotic twin, the Peace Corps, it is an ideal of service, a concept embodying concern. Even for Congress to constrain volunteers from engaging in certain activities disliked by the administration would be better than killing the program outright.

(By request of Mr. BYRD, the following statement was ordered to be printed in the RECORD:)

● Mr. CRANSTON. Mr. President, as the Senate author of the Domestic Volunteer Service Act of 1973, Public Law 93-113, and several laws amending and revising it, I am pleased to support this bipartisan extension of the authorization of appropriations for the important domestic volunteer services programs authorized under the 1973 act. The legislation, S. 1129, before the Senate today provides for a 3-year reauthorization of appropriations for the VISTA program, the Older American volunteer programs—RSVP, Foster Grandparents, and Senior Companions—and the other activities carried out by the ACTION Agency.

I have been closely associated with these programs throughout my service in the U.S. Senate. As the chairman of the authorizing subcommittee from 1971 through 1980, I had the privilege of authoring much of the legislation relating to these programs that came before the Senate during that period. These programs and the volunteers serving in them have always represented the finest instincts of the American people—caring and compassion for those less fortunate and willingness to volunteer to help each other. These volunteers have contributed to their communities and their fellow citizens. They have shared their time, their energy, and their resourcefulness for the betterment of our communities and our society.

Mr. President, some supporters of voluntarism suggest that the private sector alone can stimulate volunteer activities like those sponsored by the ACTION Agency. I disagree. These programs represent the kind of melding of public and private support that is promoted through a partnership between government, both Federal and local, and the private sector. This support is needed, it is important, and should be continued. The moneys spent in these programs represent some of the most cost-effective investments the Federal Government can make in the area of human services.

VISTA REAUTHORIZATION

Mr. President, perhaps the most significant aspect of the bill reported by the Labor and Human Resources Committee involves the provisions reauthorizing appropriations for the VISTA program. The Reagan administration proposed in 1981 to abolish the program; in July of 1981, the Labor and Human Resources Committee reported legislation aimed at phasing VISTA out by the end of 1983. The program nevertheless has survived, supported by its many friends in and out of Congress. Its survival is a testament to those thousands upon thousands of VISTA volunteers, young and old, from every walk of life, who have served in this program and have dedicated a portion of their lives to the principles upon which VISTA was founded—service to America. Today, a bipartisan majority of the Labor and Human Resources Committee has brought before the Senate legislation to reauthorize appropriations for VISTA at $15 million for fiscal year 1984, $17 million for fiscal year 1985, and $19 million for fiscal year 1986. Those figures are, of course, below the appropriations levels provided in fiscal year 1981, but they do envisage steady growth and hold out the promise of one day restoring this program to the strength it once enjoyed.

Mr. President, the VISTA program has provided tens of thousands of our citizens with the opportunity for service to America. It will continue to do so. VISTA volunteers, with their enthusiasm and vigor, have made mistakes. Program sponsors have made mistakes. But it is clear that the resounding success of this program and its message to our society has not gone unnoticed. I strongly believe that programs like VISTA should be expanded and that more opportunities for volunteer service should be available. I have often spoken on the Senate floor of my support for the concept of national voluntary service, and I will continue to do so. But today I share the joy of the many friends and supporters of the VISTA program in its survival and in its brightening future.

OLDER AMERICAN VOLUNTEER PROGRAMS

Mr. President, I would be remiss if I did not also express my very highest regard and strong personal support for the Older American volunteer programs—RSVP, Foster Grandparents, and Senior Companions—which are also included in this legislation. Unlike the VISTA program, however, the future of the Older American volunteer programs has never been in doubt. These programs have always enjoyed incredibly strong and well-deserved support in Congress. Like VISTA, the Older American programs provide both the opportunity for service for the volunteer and help fulfill some of the countless unmet needs in communities throughout the Nation. Those who serve and those who are served benefit enormously from these programs. I am pleased to support the reauthorization of appropriations for these programs and I am proud to have been associated with the Older American volunteer programs throughout my service in the Senate. particularly gratifying to me is the doubling of the authorization for appropriations for the Senior Companions program. I authored in 1973 the legislative authority for the Senior Companions program and its growth has been truly rewarding.

CONCLUSION

Mr. President, let me conclude by congratulating the chairman of the Labor and Human Resources Committee, the Senator from Utah (Mr. HATCH), and the ranking minority member, the Senator from Massachusetts (Mr. KENNEDY), as well as the chairman of the authorizing subcommittee, the Senator from Alabama (Mr. DENTON), and the ranking minority member of that subcommittee, the Senator from Connecticut (Mr. DODD), for their bipartisan work in bringing this measure to the Senate and for their support of these important programs.●

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AID BILL

Mr. PERCY. Mr. Presidents in these times of budget austerity, it is important that we closely scrutinize the way in which each taxpayer's dollar is spent to be certain we accomplish important objectives in a cost-effective way. This is particularly true when it comes to foreign assistance programs, where we try to help friendly developing countries with their efforts to stimulate economic growth and improve the lot of their people. Today, I would like to describe one foreign assistance program which clearly meets that criteria—the International Executive Service Corps, or the IESC.

This organization harnesses the skills of men and women from the American business community, who volunteer 2 to 3 months of their time to go to developing countries to help with specific business undertakings. These Americans, who are often recently retired, bring with them years of experience to bear on such diverse fields as food processing, retailing, transportation services, construction, and banking.

In addition to obtaining such experience on a pro bono basis, IESC embodies several other remarkable features. First, its service is valuable enough that the foreign organization requesting IESC help pays for the expenses of the program, including living expense, transportation, and some overhead costs for IESC. This means both that IESC can conduct more programs with limited donated resources, and, because the developing country client has its own resources at stake, that the help is both appreciated and effectively used.

Second, this program is an effective means of stimulating the kind of private entrepreneurship and self-help that can lead to self-sustained economic growth and job creation in the developing countries. Our aid programs generally assist developing countries with such important requirements as improved health and education services, better agricultural research and extension, improved roads and irrigation. But if these countries are to build an economic base which can take advantage of these services and in turn generate the revenue needed to maintain them, a strong private sector is critical. IESC promotes just that sector.

IESC is a good will program for the United States as well. This is "people to people" program of the best type, in which Americans are clearly seen to be offering their knowledge and experience out of a desire to help others help themselves. This combination of practical business experience, combined with unselfish idealism, symbolizes the best aspects of the American character.

Finally, this program makes economic sense for the United States. In the short run, advice from American experts often leads to the purchase of American-made equipment and supplies. In the longer run, it helps build a bridge of trust and interest in American technology and approach which will pay dividends as small companies grow and flourish in the developing world. Our fastest growing markets are even now in the developing countries, and this trend is certain to continue in the future.

Let me briefly touch on the some of the real-life episodes which make the IESC story so exciting. Not surprisingly, I have selected some projects which involved volunteers from my own State of Illinois.

In Barbados, a small family-owned company needed help to keep a wooden household furniture manufacturing operation going. Clyde Weinberger, a retired furniture company executive from Chicago, volunteered his services. Thanks in part to his help, that company was not only saved but was enabled to grow.

Dr. Thomas Hurst, who had retired from the A. W. Staley Manufacturing Co. in Illinois, went to Ecuador with his wife to assist a manufacturer of cocoa butter to expand his facilities and use his equipment to produce soya milk. Because of his efforts, jobs have been created and Ecuadoreans are better fed.

A Taiwanese department store needed help in the development and implementation of a management training program as well as with other personnel matters. A recent retiree from Willowbrook, Ill., William Hegenbuck, who had spent a lifetime working with large retail chains, was dispatched to Taiwan. He helped set up a training program which will eventually involve hundreds of people in the retail field.

Finally, Darl Fike, who is currently employed by the Illinois State Agricultural Extension Service, has been assigned to a volunteer stint in Ecuador to help a hog-raising cooperative of 50 members. His work will undoubtedly not only affect that cooperative, but the entire feed, machinery, and hog-raising equipment market in that country.

These are just four examples of the kind of down-to-earth, grassroots activities sponsored by IESC. To date, the organization has assisted over 8,000 locally owned businesses with the help of over 5,000 apostles of private enterprise. I strongly believe that this is precisely the kind of program which should be helped by our foreign assistance program, in which a modest expenditure of Government funds can be greatly multiplied through the contribution of time by highly qualified volunteers and the payment of most operating costs by developing country clients.

This month marks a historic occasion in the 20-year relationship between the IESC and the U.S. Government. This partnership in international economic development was ratified for an additional 5 years with the signing on September 12 by IESC President Thomas Carroll and AID Administrator Peter McPherson of a 5-year extension of AID support.

This relationship has been a dynamic one which has changed with the challenges of development over the years. Especially with the inauguration of AID's private enterprise initiative, the roles of IESC in fostering private economic initiative and in catalyzing closer links with U.S. enterprises have assumed new importance. Both IESC and AID are also to be commended for their efforts to concentrate on areas of greatest need by expanding IESC's assistance to smaller enterprises and in poorer countries. IESC has also become an important partner in U.S. development programs in the Caribbean, as IESC is currently establishing a presence in Honduras, Costa Rica, and Jamaica. I heartily encourage even greater efforts in those directions.

In sum, I am impressed that support of IESC has proven to be one of the most consistently effective and productive uses of U.S. aid funds over two decades, and remains so despite dramatic changes in economic development challenges.

Mr. LUGAR. Mr. Chairman, I rise to endorse and support the remarks of the distinguished senior Senator from Illinois about the International Executive Service Corps.

The IESC is one of those rarest of initiatives: one in which everyone wins. In 18 years, some 18,500 foreign firms have been assisted by over 5,000 retired American executives, who have devoted—without pay—their expertise, energy, and humanitarianism to the progress of over 70 developing countries.

This type of assistance works. It should, for the participants, each with a lifetime of experience relevant to the enterprise being assisted, represent this country's most productive asset: our people. Perhaps the surest indicator of the value of their talents to foreign firms is the fact that the foreign organizations which receive IESC help contribute significantly

toward the expenses of the program. Further, some 40 percent of the client firms make a capital investment attributable to the program, often an investment involving an American firm, and fully 20 percent form a business relationship with an American company—hard evidence that this assistance makes hard economic sense.

But the program works for many more than the immediate beneficiaries. For thousands of retired volunteer executives, this opportunity for service is a treasured experience. And for tens of thousands of people abroad, IESC volunteers become effective ambassadors of good will for the United States.

Finally, the IESC's demonstrated ability to earn remuneration from participating foreign organizations and to attract private donations as well provides a degree of leverage too rarely found in U.S. development assistance. In short, the modest support made available from AID, less than half of total IESC funding, is a bargain.

KOREAN AIR LINES FLIGHT 007

Mr. HECHT. Mr. President, I rise today to condemn the horrible actions carried out by the Soviet Union in the destruction of the Korean airliner, flight 007. My only surprise to the blatant murders of 269 passengers and crew of the Korean jet is the surprise of the world. Has the world not believed the horror stories of the past generation? Has the world forgotten the massacre of tens of thousands of Polish officers in a forest near Katyn? Has the world forgotten the machine-gunning of innocent Polish freedom fighters. Has the world forgotten the massacre of Israeli athletes by Russian-trained PLO commandos? Does the world not believe that the Soviets are using poison gas in Afghanistan? Does the world not believe that the Soviet Union perpetrated an attempted assassination against the Pope?

In my service to my country as an intelligence agent behind the Iron Curtain, deaths of innocent men, women, and children were a daily occurrence. In the words of Abraham Lincoln: "Let us resolve that these dead shall not have died in vain."

Let us unite behind our President to make the United States of America the strongest military Nation on Earth. It is not compassion or decency that has stopped the Soviets from attacking us. It is not concern for our children. It is fear of massive retaliation from the American and free world's military might.

The hope of the free world is truly peace through strength.

THE DEATH OF LT. GEN. LEONARD D. HEATON, U.S. ARMY (RETIRED)

Mr. THURMOND. Mr. President, I rise today to pay tribute to a good friend and military leader, Lt. Gen. Leonard D. Heaton, U.S. Army (Retired), who recently passed away. To his lovely wife, Sara, and daughter, Sara Dudley Mayson, I extend my deepest sympathies.

This exceptional soldier and surgeon served for more than 40 years in the Army, reaching the pinnacle of his career as Surgeon General of the Army in 1959, a post he held for 10 years.

General Heaton's career spanned a period which will be remembered as one of the most challenging for the United States of America. Receiving his commission in the Army Medical Corps a year after graduating from the University of Louisville, he immediately immersed himself in the study of medicine at various military hospitals.

General Heaton made a point of being close to the action. On December 7, 1941, he was the acting commander and chief of surgery at North Sector General Hospital, Schofield Barracks, in Hawaii. During the actual attack by the Japanese, which precipitated America's entry into World War II, General Heaton refused to wait until the air raid was over to report for duty, dodging enemy planes to reach his hospital. For his quick and efficient action, which saved many lives, General Heaton was awarded the Legion of Merit.

His surgical skills, on another crucial occasion, were of major importance to the Nation. In 1956, as commanding general at Walter Reed Hospital, he was urgently recalled from a vacation to treat President Dwight D. Eisenhower for an emergency abdominal illness. A short time later, the general's famous patient was resting quietly and out of serious danger. That operation began a long and close friendship, which evenually resulted in General Heaton becoming President Eisenhower's personal physician.

This great surgeon, who was decorated for his wartime service in both the Pacific and European theaters, also treated Secretary of State John Foster Dulles and Generals of the Army George C. Marshall and Douglas MacArthur. He was awarded four Distinguished Service Medals during his career; and before he retired from active duty in 1969, he beame the first Army physician to gain the rank of lieutenant general.

In order to share more about this great military leader and physician, I ask unanious consent that an article from the Washington Post be printed in the RECORD at the conclusion of my remarks.

There being no objective, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 12, 1983]

"LT. GEN. LEONARD D. HEATON, EISENHOWER'S SURGEON, DIES AT 80

Retired Lt. Gen. Leonard D. Heaton, 80, the Army surgeon general from 1959 to 1969 and who gained widespread recognition for his work as the surgeon for notable public figures, including former President Dwight D. Eisenhower, died of cancer Sept. 10 at Walter Reed Army Medical Center.

During his more than 40 years of Army service, Gen. Heaton gained a reputation for calm assurance and was known as a dedicated teacher. Long considered one of the Army's most skilled surgeons, he championed the expansion of the service's medical education programs. He was decorated for his work as both a surgeon and administrator for wartime service in both the Pacific and European theaters.

Perhaps Gen. Heaton's most difficult 24-hour period began on June 8, 1956. Reached at a vacation retreat, Gen. Heaton, then commanding general of Walter Reed, was flown back to Washington. President Eisenhower, who only nine months earlier had suffered a major heart attack, was in Walter Reed with what proved to be regional enteritis with an intestinal obstruction.

At 1 a.m. June 9, Gen. Heaton and his quickly assembled team operated. The abdominal surgery was complicated by anticoagulant drugs that Eisenhower had been taking for his heart condition. These drugs might have prevented the surgeons from controlling the bleeding. Yet, one hour and 54 minutes after entering surgery, the operation was over. Gen. Heaton's job had just begun because he had to brief the media and explain the surgery and its success.

The patient not only recovered but became a close friend. In later years, Gen. Heaton became Eisenhower's personal physician, traveled to Europe with him and treated him in his last days before his death at Walter Reed in 1969. Gen. Heaton's other surgical patients included Secretary of State John Foster Dulles and generals of the Army George C. Marshall and Douglas MacArthur.

Shortly before his death in 1965, MacArthur wrote President Lyndon B. Johnson with a last request. It said in part: "I have seen many units of many countries in action, but I have never seen one to surpass in cohesion and efficiency that which has been administered to me under Gen. Heaton. The doctors, nurses and corpsmen have been magnificent. I shall urge Gen. Wheeler to confer upon Gen. Heaton an oak leaf cluster to his Distinguished Service Medal."

Those words were used in the citation of the Distinguished Service Medal, one of four Gen. Heaton received during his career.

During his later years as surgeon general, he led the expansion and deployment of Army medical services for the war in Southeast Asia. He fought for increased numbers of helicopters for medical evacuation operations, explaining to medical colleagues, the public and Congress how best to save lives. He retired from active duty in 1969, the first Army physician to gain three-star rank.

Gen. Heaton, who lived in Pinehurst, N.C., was a native of Parkersburg, W. Va. He received his medical degree from the University of Louisville in 1926 and received his commission in the Army Medical Corps a year

later. Before World War II, he served and studied at various military hospitals.

Dec. 7, 1941, found him a major and the acting commander and surgery chief at North Sector General Hospital, Schofield Barracks, Hawaii. During the Japanese attack on Pearl Harbor, Gen. Heaton dodged enemy planes and reached his hospital, the largest Army medical facility in Hawaii.

He ordered his staff to prepare for battle casualties. His surgeons performed more than 200 operations. Thanks to Gen. Heaton's orders to add sulfanilamide to both abdominal and surface wounds, patients treated at North Sector did much better than those elsewhere. Gen. Heaton was awarded the Legion of Merit.

Later in the war, he commanded a hospital and then a group of hospitals in Europe. After the war, he was named surgical chief and then commanding general of Letterman General Hospital in San Francisco. In 1953, he was offered the post of commandant of Walter Reed. He took the post when it was agreed that he would be allowed to continue surgery. In 1959, he was named Army surgeon general. He continued to operate and to assist in operations until retiring.

He was a diplomate of the American Board of Surgery, fellow of the American College of Surgeons and member of the American Surgical Association.

Survivors include his wife, the former Sara Hill Richardson of Pinehurst, and a daughter, Sara Dudley Mayson.

THE DEATH OF REPRESENTATIVE LARRY McDONALD OF GEORGIA

Mr. THURMOND. I rise today to pay tribute to a great American and true patriot, Congressman Larry McDonald of Georgia, who was a victim of one of the most dastardly crimes of this century. He was aboard Korean Air Lines flight 007, when it was destroyed as it strayed over Soviet territory on September 1, 1983. To his lovely wife, Kathryn; his son, Tryggvi Paul, who served as an intern in my office; and to his other children, Callie Grace, Mary Elizabeth, Lawrence Patton Jr., and Lauren Aileen, I extend my deepest sympathies.

A native of Atlanta, Congressman McDonald completed pre-medical training at Davidson College, N.C., and earned his doctor of medicine degree from the Emory University School of Medicine. After 4 years as a Navy physician and flight surgeon, he completed his residency and postgraduate training in general surgery at Atlanta's Grady Memorial Hospital. He received his postgraduate training in urology at the University of Michigan at Ann Arbor.

Active in medical and civic affairs, he held memberships in a variety of associations, including the Rotary Club, National Historical Society, and the Atlanta Astronomy Club. His intense interest in public affairs inevitably led him to political life.

Elected by Georgia's Seventh District as a Democrat in 1974, Congressman McDonald was reelected to the U.S. House of Representatives each term thereafter. He was an able and dedicated member of the House Armed Services Committee and recognized as one of the most conservative anti-Communists in Washington. He pursued his convictions about threats to our freedom from Soviet aggression with great courage. His beliefs inspired him to found Western Goals, a private research firm designed to halt the spread of communism.

It is cruelly ironic that Congressman McDonald's death was directly caused by followers of the very ideology against which he so vigorously campaigned. His tragic death should serve as a reminder that only through strength can we maintain peace.

Mr. President, this man was a truly dedicated public servant who cared deeply for his Nation and its democratic philosophy. His words of warning about communism are even more poignant in view of the unprovoked, murderous attack on the Korean airliner.

In order to share more about this outstanding Congressman with my colleagues, I ask unanimous consent that a biography which appeared in the Congressional Directory, and two articles, one from the Washington Times and one from Congressional Quarterly, be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LAWRENCE P. McDONALD, CONGRESSIONAL DIRECTORY, 98TH CONGRESS, 1983-1984

Lawrence P. McDonald, Democrat, of Marietta, Ga.; born in Atlanta Ga., April 1, 1935; graduated from Darlington School, Rome, Ga.; completed premedical training at Davidson College, N.C.; received doctor of medicine degree from Emory University School of Medicine, 1957; served 4 years in the U.S. Navy as physician and flight surgeon; residency, Grady Memorial Hospital; 2 years postgraduate training in general surgery, Grady Memorial Hospital, Atlanta, Ga.; 3 years postgraduate training in Urology, University of Michigan, Ann Arbor, Mich.; member: Independent Methodist Church, various medical associations, Rotary, National Historical Society, Atlanta Astronomy Club, and John Birch Society; member of National Council of the J.B.S.; member of State Medical Education Board, 1969-74; received honorary doctor of letters from Daniel Payne College, Birmingham, Ala.; married to the former Kathryn Jackson, 1976; five children: Tryggvi Paul, Callie Grace, Mary Elizabeth, Lawrence Patton, Jr., and Lauren Aileen; elected to the 94th Congress, November 5, 1974. reelected to each succeeding Congress.

[From the Washington Times, Sept. 2, 1983]

McDONALD, NOTED CONSERVATIVE, DEVOTED LIFE TO ANTI-COMMUNISM

Rep. Larry McDonald, the Georgia Democrat who was aboard the South Korean airliner that was shot down yesterday by a Soviet fighter, often was called the most conservative member of the House of Representatives.

His wife said yesterday that he was "the leading anti-communist in Congress."

First told that the Boeing 747 had landed on an island off the Soviet Union's east coast, Kathy McDonald said: "Him, of all people, being in Russian hands . . . to say it's a little bit odd would be to say the least."

Later, after learning the fate of her husband and the others aboard the plane, Mrs. McDonald called it "a typical action of the communists in the Soviet Union. It was against this type of behavior that my husband spoke out so loudly and for so long."

McDonald, a 48-year-old physician, was described by associates as "very earnest, intense" and as "a very personable man" who was highly regarded and very effective in conservative causes because of his prominence in the vast network of conservative organizations.

Long a conservative political activist, he earlier this year was elected chairman of the John Birch Society—succeeding Robert Welch, the founder and only other chairman of the organization.

In 1972 he lost his first bid for Congress in Georgia's 7th District—an overwhelmingly white area in the northwest part of the state stretching from the suburbs of Atlanta through Marietta and Rome to the suburbs of Chattanooga, Tenn.

However, in 1974 he ousted veteran Democratic Rep. John Davis and, although he faced several close primaries and re-election victories after that, he became so popular in his district that by 1980 he received 68 percent of the votes in both the primary and general elections. In 1982 he got 66 percent in the primary and 61 percent in the general election.

Sen. Barry Goldwater, R-Ariz., once said McDonald had perhaps "contributed more to the Congress than . . . any other freshman who has ever come there."

In 1980 and 1981 readers of Conservative Digest selected him as one of the most admired conservatives in Congress. His voting record in Congress received ratings ranging from 100 percent by the Americans for Constitutional Action to 0 percent from the AFL-CIO.

A director of the National Rifle Association, he was a recipient of its Defender of Individual Rights award.

McDonald also was an official of numerous other conservative organizations, including Movement to Restore Decency, American Life Lobby, National Pro Life Action Committee, Congressional Advisory Board of Conservatives Against Liberal Legislation and Fund to Restore an Educated Electorate.

Among his many other awards were the Most Frugal Member of Congress citation from the National Taxpayers Union and the Distinguished Service Award of the National Reserve Association in 1980. He was a captain in the Naval Reserve.

In 1981 he founded—and at the time of his death was serving as unpaid president and board chairman—Western Goals, a tax-exempt foundation to stop subversion, terrorism and communism in the United States.

McDonald wrote books and numerous articles and he traveled around the country as unoffical "secretary of defense" in a mock cabinet of conservatives to denounce the 1978 Panama Canal treaties. He supported military strongmen in Nicaragua and other Central American nations and opposed normalization of American relations with

China. In 1977 the Chilean government presented him the Bernardo O'Higgins Award.

Lawrence Patton McDonald was born in Atlanta on April 1, 1935. He completed his pre-medical studies at Davidson College in North Carolina and was accepted by Emory University's medical school in Atlanta before his 18th birthday. He received his M.D. from Emory in 1957.

After four years in the Navy—mostly as a physician and overseas flight surgeon—he completed a residency in general surgery at Grady Memorial Hospital in Atlanta.

During his three-year residency in urology at the University of Michigan Hospital in Ann Arbor in the middle 1960's he frequently passed material from the Birch Society to fellow doctors and he headed the chapter of the Birch Society there at a time when that organization was far more outspoken than it is today.

It also was in Ann Arbor that he made his first race for elective office, challenging incumbent Democratic Councilman Leroy Cappaert in a primary. He lost that race when he captured little more than 300 votes.

Returning to Atlanta, he joined his brother and late father, both physicians, as partners in the McDonald Urology Clinic. He later moved to Marietta. According to sources, one of his first patients upon returning to Atlanta was the Rev. Martin Luther King Sr.

According to the "Almanac of American Politics," McDonald's "views on issues are so far out, and his political skill so limited, that he has little impact. His voting record is unremarkable. . . . But, as his Birch membership suggests, McDonald seems to regard his colleagues as something close to communists.

However, the strong support he received in his district proved that his constituents disagreed with charges by opponents that in Washington he was doing the Birch Society's work rather than his district's.

Nevertheless, McDonald's effectiveness in the Democratic Party was limited, especially by his refusal to vote with the Democratic caucus for the re-election for Rep. Thomas O'Neill as speaker of the House. That cost him committee assignments.

He and Kathy McDonald have two children, Larry 2, and Lauren Aileen, born last Christmas. He also has three other children, Tryggvi Paul, Callie Grace and Mary Elizabeth.

[From the Congressional Quarterly, Sept. 3, 1983]

REPRESENTATIVE MCDONALD: FREE-LANCE CONSERVATIVE

Rep. Larry P. McDonald, D-Ga., a passenger aboard the Korean Air Lines jumbo jet shot down by a Soviet fighter plane Sept. 1, was a militant conservative who had made anti-communism the focus of his political career.

After hearing of the Soviet action, his wife Kathryn said, "It was against this type of behavior that my husband spoke out so loudly and so long." Conservative leaders called McDonald a hero who lost his life for his country.

McDonald, 48, a physician specializing in urology, was first elected to Congress in November 1974 and had been returned there ever since by the voters of Georgia's 7th District, which stretches more than 100 miles from the suburbs of Atlanta to those of Chattanooga, Tenn.

Earlier this year, he became chairman of the right-wing John Birch Society—only the second person to hold the post in that organization's 25-year history. In addition, he was a member of the Moral Majority and headed his own private research foundation, Western Goals, whose mandate is "to fight communist-controlled penetrations and subversion" of American society.

Although a nominal Democrat, McDonald was really a free-lance conservative, far outside both political parties in the House.

His membership in the House Democratic Caucus simply indicated how little party labels can mean; in 1982 he voted againt a majority of Democrats 90 percent of the time—more often than all but a few Republicans. When the 98th Congress convened in 1983 he did not even cast the routine party-line vote for Democrat Thomas P. O'Neill, Jr., D-Mass., as Speaker.

The party returned the favor, denying McDonald a seat on the Veterans' Affairs Committee, despite his eight years of seniority. Ten House freshmen were given vacant seats on the panel instead.

Besides being vehemently anti-communist, McDonald was anti-abortion, anti-homosexual and pro-gun.

Although he was a senior Democrat on the House Armed Services Committee, his influence there was limited.

On the House floor, he was noted for rhetorical flourishes and for inserting into the CONGRESSIONAL RECORD long statements and reports by conservatives on various topics.

When he offered floor amendments to pending legislation, they were usually simple and direct. In 1980 he offered one to block funding for any trade between the United States and the Soviet Union. It lost 124–284.

But he fared better in offering repeated floor amendments to bar the use of Legal Services Corporation (LSC) funds to "promote, defend or protect" homosexuality. the 1981 version of McDonald's amendment passed the House easily, 281–123, and the language was retained in later legislation funding the LSC, which provides civil legal services to the poor.

In 1981, McDonald also persuaded the House to cut $70 million in U.S. contributions to the United Nations and other international organizations.

McDonald was one of a handful of members to oppose a Capitol statue for the Rev. Dr. Martin Luther King Jr., a move that made King—a Georgia native—the first black person so honored. McDonald protested in 1981 that "Communist Party members" had aided King's civil rights campaigns.

This year, when the House Aug. 2 voted 338-90 to designate the third Monday in January as a federal holiday in honor of King, McDonald was one of just 13 Democrats voting "nay."

Since his first narrow win in the 1974 Democratic primary, McDonald had to fight more than once for his political survival. Conservatism is popular in small-town Georgia, but McDonald faced a steady supply of determined enemies. Only a loyal band of supporters and effective national fund raising allowed him to keep his seat relatively secure. Last year, he won relection with 61 percent of the vote.

McDonald's wife, Kathryn, has moved to the fore of likely contenders for the seat. Although she had not disclosed any concrete plans as of Sept. 2, an aide to her husband noted the congressman had "told his wife in the recent past that if anything happened to him he would want her to run for the unexpired portion of his term."

The other major contender for the seat is likely to be Democrat George Pullen, a Rome city commissioner. Pullen, who teaches history at Floyd Junior College in Rome, had already announced his intention to challenge Larry McDonald in the 1984 primary.

Although Pullen indicated that McDonald's presumed death had forced a reassessment of his plans, he added, "I do not see that it should change my intention of running."

Democratic Gov. Joe Frank Harris has announced that he will hold off on setting a special election to fill McDonald's seat until McDonald's death has been confirmed.

Georgia's secretary of state, Democrat Max Cleland, has recommended that the state dispense with a primary and hold an open general election, followed by a runoff between the top two vote-getters should no candidate receive more than 50 percent.

WHAT THIS COUNTRY NEEDS IS ONE MORE FEDERAL LAW

Mr. KASTEN. Mr. President, currently, there are different laws in 50 States that set standards for product liability in this country. There are dozens of interpretations of these laws—varying from State to State—and these differences make the manufacture of products for sale nationally difficult and costly. naturally, the costs are passed on to the consumer. For example, almost 20 percent of the price you pay for a stepladder is the cost of product liability insurance the manufacturer must pay.

The explosion in the last 10 years of product liability lawsuits and court decisions have made it impossible for a consumer to know his rights or a manufacturer to know his obligations without expensive legal help. Under current law, it costs an average of 77 cents in legal fees for a consumer to recover 66 cents in damages. Is this justice?

If we had one national standard to apply to product liability cases, we could all save a great deal in direct and passed-on costs.

I have introduced a bill—S. 44—that will replace 50 different standards with one reasonable national standard for product liability. The bill has 21 Senate cosponsors, and is strongly supported by the Reagan administration.

Mr. President, a recent article in the magazine Inc. points out that this country needs one more Federal law—a uniform standard for product liability. I couldn't agree more.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Inc., September 1983]

WHAT THIS COUNTRY NEEDS IS ONE MORE FEDERAL LAW

(By Stanley I. Lehrer)

Imagine the existence of 50 different state laws designed to solve what is fundamentally a federal problem of interstate commerce.

Imagine attorneys shopping among those 50 laws for the one that will give their clients' damage claims the friendliest hearings.

You have just imagined the real world of product liability law. And, more to the point, you have just provided two good reasons for replacing 50 state laws with one rational federal statute, even if you don't usually favor bringing the federal government into a business situation. Product liability merits the exception because it is different from the other kinds of liability law that should remain a state concern.

The laws of negligence, for example, have no federal implications. These are the rules used when your automobile runs over your neighbor's lawn mower or when the sign in front of your warehouse, the one you were going to attach permanently next week, falls on the deliveryman's head. In negligence situations, questions concerning where the neighbor left the lawn mower or how hard the delivery van backed into the building—the issues of comparative and contributory negligence—play a role in reaching a judgment.

Not so with product liability, where the key word is "product." These laws, as they generally apply, provide that once a plaintiff shows that a defective product was placed in the stream of commerce and caused an injury, the rules for determining negligence all change. The greatest change is that liability without any requirement for finding negligence will be held to exist at every point in that stream of commerce—from manufacturer to retailer—no matter how insignificant a role any single player, such as the distributor, may have played in that commerce. This is called the "doctrine of strict liability." It has been around for less than 25 years. Created in New Jersey, it spread like wildfire, right along with the consumer movement.

The doctrine of strict liability holds that fault is not an element in a product liability action. The absence of the need to find fault makes it easy to hold the distributor of a defective product just as liable as the manufacturer that designed and made it. The finding may not be fair, but it is logical: (a) a defective product passed through a stream of commerce; (b) the distributor is part of that stream of commerce; so (c) the distributor is liable for any injury that results.

Illinois courts are among those that have gone a bit further. They have said that there is no need to show that a distributor ever even exercised physical possession of the product. It is enough that he arranged for its sale by one party and for its purchase by another and earned a commission for his trouble. If so, he is just as liable under this interpretation as the manufacturer or the retailer. This kind of judicial thinking holds not just in Illinois, but in most northern and western states, and especially in California.

The South is the only area of the country where the distributor still gets something of a break on product liability. North Carolina and Louisiana, for instance, lean toward requiring the plaintiff to prove at least that a distributor knew or should have known that the product sold was defective. That view can change, however, and even if it doesn't, claimants' lawyers have learned to shop among jurisdictions. When they can, they will bring their actions in a state where the law favors the claimant. Since so many products move through interstate commerce, such shopping trips are easy for the claimants' lawyers but complicate life for you.

What is the answer? Do we eliminate the consumer's right to sue? Of course not. But absolutely no good reason exists why two consumers in different states should have different redress for an injury caused by a product manufactured in still a third state. Nor can I think of any defensible reason for having 50 different laws covering that same legal situation, especially since location has nothing to do with the liability at issue. If a football helmet provides adequate protection in Alabama, it is no less adequate when it is used in Michigan. Finally, is it fair to blame a company, especially a distributor, for product defects that it had no way of detecting? Would you sue the grandmother that gave the gift as well?

The Senate has held hearings and will probably vote this year on a bill that would preempt state product liability laws and mitigate some of the inequity implicit in the strict liability doctrine. If it passes there, the House will probably consider the measure next year.

The opposition has been strong. Claimants' lawyers, who do considerable business because of the laws complexities, have raised consumers' fears that they might lose their rights to recover damages for injuries caused by defective products. That is a false issue. Consumers, in fact, won't lose their right to sue.

Other objections have been raised because the new bill would give to Congress authority now exercised by state legislators. Business, for one, is justifiably skittish of laws that hand over more power to the federal government. Ronald Reagan holds office in part because he promised to get the federal government off the backs of business. But every rule has its exceptions, and product liability is one of them. It is an area of government regulation in which a single federal law will impose a far lighter burden on efficiency and productivity than 50 state laws do.

Product liability is one new federal law we ought to have.

REPORT BY THE NATIONAL SCIENCE BOARD COMMISSION ON PRECOLLEGE EDUCATION IN MATHEMATICS, SCIENCE, AND TECHNOLOGY

Mr. PELL. Mr. President, I am most encouraged by the thrust of the recent report of the National Science Board Commission. This report clearly recognizes the importance of the Federal role in addressing the crisis our country faces in mathematics and science education.

We, on the Senate Subcommittee on Education, have long recognized the seriousness of this problem, and have worked very hard over the past 2 years to develop a sound Federal response to this crisis. We have recently passed, and sent to the floor for consideration by the full Senate, the Education for Economic Security Act, legislation which I originally introduced to address the need to upgrade instruction in the areas of mathematics, science, computer learning, and foreign languages. I am optimistic that the tone of urgency of the report of the National Science Board Commission will encourage the Senate to consider this legislation in the very near future, and am working with the leadership of the Senate to insure that we will soon enact this bill so that action may begin immediately to meet the urgent need to improve education in math and science.

I am particularly pleased that the major recommendations of the National Science Board Commission are already represented in the Education for Economic Security Act. The Commission advises that the Federal Government provide a lasting commitment to quality mathematics, science, and technology education for all students. It calls for major programs to train and retrain teachers, to establish and support exemplary programs in these areas, to begin quality math and science instruction in the very early grades, and to tap into the resources of museums, libraries, and private enterprise. In line with these recommendations, the Education for Economic Security Act establishes programs of teacher training and retraining in mathematics and science as the No. 1 priority for expenditure of funds. Highlighting the need for quality instruction, this legislation establishes a mechanism for identifying and supporting exemplary programs in these areas. It furthermore provides the private sector with incentives to work in partnership with Government at every level, as well as makes provisions for inclusion of the very excellent programs offered by museums and libraries, thus utilizing all available resources in meeting this crisis.

I am glad that the Commission has included the need for a national measurement of student achievement in its list of recommendations. I have been in the process of developing legislation which I hope to introduce in the near future that would establish such a test. This legislation would offer schools the means to compare their educational achievements in mathematics, science, and other educational fields with the achievement of other schools throughout the country.

The report of the Commission significantly emphasizes the pivotal role of the Federal Government in turning the tide of mediocrity toward that of excellence. It reinforces the widespread awareness that a commitment to educating our young must be exhibited in every sector of our society if we are to provide for the economic well-being of our future. I have long recognized the tantamount importance of this commitment. I have worked hard over my past 22 years in the Senate to map out the Federal responsibility in providing quality education for all. Reports such as that of the National Science Board Commission have added credence to the legitimacy of a strong Federal role, as well as have recognized the responsibility of the other sectors of society in maintaining the

quality of our education. I am hopeful that the bold pronouncements of this report, and its recommendations for a serious Federal fiscal commitment to mathematics and science education, will convince the present administration of the need for a strong economic, as well as verbal, response to addressing the crisis at hand.

I hope also that the Commission report will underscore the importance of early action by the Congress on the Education for Economic Security Act which I proposed earlier in this Congress.

FISCAL YEAR 1984 DEFENSE AUTHORIZATIONS—CONFERENCE REPORT

Mr. LEAHY. Mr. President, yesterday I reluctantly voted against the conference report on the fiscal year 1984 defense authorization bill. I did so for the same reason that I voted against the Senate version of the bill last July: To protest the waste of the taxpayer's money on hugely expensive and dangerous programs such as the destabilizing MX missile, which is to be based in vulnerable Minuteman silos, the B-1 "flying Edsel," nerve gas bombs, and obsolete World War II battleships.

Of course, there is much in the conference report that I supported—provision for a much needed military pay raise, force increases for the National Guard and Reserves, improved conventional force combat readiness, and measures to strengthen NATO's front line forces. These programs are essential for a strong defense—although even more is needed—and I will vote the money for them in the defense appropriations bill this fall.

However, so strongly do I feel that this year's defense budget authorization continues to waste our limited defense dollars that I was forced to register a protest against the misguided defense priorities of this administration. Somehow, the message has to get through to President Reagan and Secretary Weinberger that, by taking funds away from conventional force improvements and pouring them into unnecessary and unusable weapons like the MX and nerve gas, they are destroying the fragile consensus of the last 3 years for a prudent increase in defense spending.

The Congress can and should play a role in reshaping our defense policies so that America can have the kind of balanced military force it needs to protect the national interests in a dangerous and troubled world.

Some have cited the brutal Soviet shootdown of the Korean airliner murdering 269 innocent civilians as a reason for supporting this defense authorization, with its MX, B-1, nerve gas, and old battleships. I think this terrible incident underlines what is the true threat to American security—massive Soviet conventional military power. To protect ourselves and our friends in the increasingly unstable and anarchic international situation of the 1980's, we need greater emphasis on mobile, combat-ready general purpose forces with weapons that are workable, affordable, and in adequate numbers, and with men and women in uniform who are well paid, well trained, and highly motivated. We do not have sufficient conventional military forces now, and we are not going to have them as long as we continue to approve overspending on nuclear weapons.

RHODE ISLAND THINKS BIG

Mr. PELL. Mr. President, on August 12, 1983, the New York Times published an excellent article by Dudley Clendinen about the current climate of economic and intellectual ferment in the State of Rhode Island.

As the article correctly notes, Rhode Island's economic renaissance is being conducted against a rich background of history and tradition. Distinguished architectural remnants of the State's past eras of mercantile and industrial supremacy now house the computers and coaxial cables that plot a new future for the State.

A new era appears to be at hand thanks to the efforts of the Rhode Island Strategic Development Commission, which is using the most advanced techniques of economic analysis to map a strategy for change and growth. The compact geography of our city-State is proving to be a distinct advantage in facilitating a comprehensive analysis and also in promoting a consortium of public and private institutions—notably between our universities and research facilities and the business community.

These are exciting developments and I am hopeful that the Rhode Island experience will provide useful precedents for other States. The report of the Strategic Development Commission will be issued in the next few weeks and I will endeavor to keep the Senate apprised of its work. Mr. President, I ask unanimous consent that the article entitled "Little Rhody Thinks Big To Set Economic Policy" from the New York Times of August 12 be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 12, 1983]

LITTLE RHODY THINKS BIG TO SET ECONOMIC POLICY

(By Dudley Clendinen)

PROVIDENCE, R.I., Aug. 5—For perhaps half a century, since its textile mills began to fail, Rhode Island has been in a state of economic drift. Now, convinced that smallness is an advantage and that applied research will show the way, "Little Rhody" is embarked on an ambitious attempt to design an economy for the years of technological change ahead.

"It's a city-state, and it's the most logical city-state in the country," says Gov. J. Joseph Garrahy. "Rhode Island is small enough to be able to put some things together that maybe some large states can't do."

Citing an example of this, Mr. Garrahy said: "I could probably get all the business and labor leaders, the college presidents and others in my office in two hours. Well, in one hour."

The Governor's Strategic Development Commission is making plans to regain the leadership that the state had in the mercantile and industrial eras of the 18th, 19th and early 20th centuries. It was then that the city's merchants and landowners built the handsome homes and buildings that give Providence its distinctive character.

In the years of decline that followed, in which the city's population dropped from 250,000 in the 1920's to 156,000 today, few additional buildings went up. The result was to freeze the city, architecturally, a half century ago.

Colonial and Victorian houses fell into disrepair and became slums, and offices turned into abandoned buildings. Then, under the influence of Antoinette Downing, an architectural historian and chairman of the State Historical Preservation Commission, a restoration effort began about 30 years ago near Brown University. Gradually, spurred by Federal tax incentives, the restoration spread down College Hill into the city, through office and poor neighborhoods alike.

The visual effect is striking. The look, as workmen peel away grime, paint and newer facades, is a history book of urban architecture ranging from 1760 to 1930, from Colonial brick to Art Deco. And now the Governor's planners are trying to do for the economy what the restoration projects have done for the buildings.

Every day here in this old state capital, a scattered group of people go to work in buildings 100 and 200 years old, using computers and up-to-date programs of business analysis in the quiet struggle to draw an economic strategy for the future.

The volunteer architect and leader of this group is Ira Magaziner, a New Yorker who, as a student at Brown, redesigned the university's curriculum before going off to Oxford in 1969 to study politics, philosophy and economics on a Rhodes Scholarship.

"A lot of states are groping for an active economic policy," Mr. Magaziner said. "The states are really laboratories for national economic policies."

From the top floor of a renovated, century-old downtown building that was abandoned only three years ago, Mr. Magaziner, who is a corporate strategy consultant, has directed what he describes as "the most thorough study of a state's economy that has ever been done.

To identify the economic influences at work in Rhode Island, he said, he and members of his research group analyzed 23,000 corporate tax returns in terms of jobs and "studied every company with more than 50 employees that went out of business or left the state in the last 10 years." Rhode Island, Mr. Magaziner noted, lost 40,000 manufacturing jobs in those years, more than it gained in new jobs.

The research group of 32 teams also interviewed the officers of 90 percent of the companies that export goods and services from

Rhode Island, he said. They traced the development of 4,000 small businesses formed in a two-year period in the mid-1970's.

Then, in search of marketable ideas for the future, "We identified every major research activity in the state and talked to the managers," Mr. Magaziner said. "What we're looking for is where there is research going on that can be made to be pre-eminent."

REPORT DUE NEXT MONTH

The staff's report and strategy recommendations are expected to be made public in mid-September. They are just beginning to be distributed to the Governor's commission, which can reject them or accept them. The commission has the job of selling the Legislature on tax incentive changes and a new venture capital structure of combined private and public money.

Until then, the details of the strategy evolved from all this work are private. But part of the thinking is to connect quickly with commercially valuable research being conducted in Rhode Island. Governor Garrahy mentioned the medical research going on at Brown.

From its campus on the crest of College Hill, Brown University overlooks the banking towers of the city's commercial center and the marble Statehouse on a facing hill. It is easy to imagine a consortium of government and private interests, drawing ideas from Brown to create new jobs in the city and nearby towns.

Dr. Howard R. Swearer, the president of Brown, said the university had recently created the position of president of the Research Foundation, whose major role "is to work with the faculty, to see if he can help them if they have research ideas which might be commercially valuable one way or another."

RESEARCH STARTS TO PAY OFF

"We have created some research teams here because we think they're going to be important to the future," Dr. Swearer continued. "We're going hell for leather now in computing, distributive computing and graphics, and we're putting money into research geology because we think that's going to be important."

The university also has a major geriatrics program, and the research is beginning to pay off. "We've just concluded a major collaborative effort with I.B.M. of $15 million," Dr. Swearer said. "We're going to begin to get some spinoff in pharmaceuticals and bioengineering."

The pace of exchange is quickening. "It's happening so fast, these developing business contacts," Dr. Swearer said. "It's really been just in the last year or 18 months."

"This is delicate," he continued. "On the one hand, there is a faster technology transfer and the attraction of funds to campus. On the other hand, we have to be careful of conflict of interest."

The quick stroke to advantage is as old in Rhode Island as the family line of John Brown, the 18-century merchant whose name the university carries and whose young clerk, Thomas Ives, married the boss's daughter, according to William H. D. Goddard, a partner in Brown & Ives, the investment firm that still manages the family money.

OFFICES IN 1774 BUILDING

Mr. Goddard's ancestors lost out to Benjamin Franklin for the establishment of the nation's first postal service and then joined the Brown-Ives line in the 1820's.

Mr. Goddard, who is 40 years old, and the buildings where he has his offices are representative of what is happening to the economic stalemate that have existed in Rhode Island for so long.

His offices are a series of plain rooms at the back of a brick building next to the Old Stone Bank. John Brown made his fortune in shipping. The family built the brick building in 1774, and the golden-domed bank in 1819.

From the front, they look now as they did then. In the outer office of Brown & Ives, a standing bookkeeper's desk similar to the kind that Bob Cratchet might have worked at for Ebenezer Scrooge, rests against one wall.

But the rest of the building has been renovated. Coaxial cables for computer and telephone systems nestle in the woodwork. Glass doors and partitions make new space without chopping up the symmetry of the interior lines. The office of John Nicholas Brown, the family's late patriarch, is being painted, to be rented out.

Mr. Goddard himself has rented separate space in a second building, a rehabilitated former jewelry factory, to start a small new high-technology company of his own. "There is a great deal of ossified capital here," he said, "and one of the main components in freeing it up is a technological success story."

PARENTS "CAME OFF THE BOAT"

Mr. Goddard's new landlord is James R. Winoker, a jewelry manufacturer who is president of the Chamber of Commerce and whose parents, as he likes to say, "came off the boat."

Such is the cultural diversity and convergence of Rhode Island, the smallest of the 50 states (1,214 square miles). Its population, 947,154 in the 1980 census, is a rich mixture of English, Irish, Italian, French Canadian, Portuguese and, more recently, South Asian.

For all its smallness, Rhode Island is blissfully eccentric, parochial and patrician, with a sense of scale all its own.

The police chief of one Rhode Island town, asked how he came to be there, said he had felt a sense of wanderlust as a young man, a desire for far horizons. So he decided to settle in that town, all of 15 miles from his birthplace.

Such familiarity, such distance at close quarters, can make consensus difficult. The state's political affairs are conducted by an outsized Legislature of 150 members. It is perceived to be dominated by ethnic, blue-collar interests and by organized labor.

But there are signs of restiveness and change. In a 50-member State Senate election brought about by a redistricting fight in June, the voters astonished the old Democratic structure by increasing the number of Republican seats from 7 to 21.

Edward J. McElroy Jr., president of the state chapter of the American Federation of Labor and Congress of Industrial Organizations, which represents 100,000 of Rhode Island's 400,000 jobs, speaks of bridging a long-standing adversarial relationship between business and labor in this state, a relationship that is regarded as an obstacle to economic growth. "The labor movement is changing," he says, "and it has to; it's either changing or dead."

Mr. McElroy, a member of the Governor's commission, has high hopes for the evolving new strategy. "We have never made decisions on a data basis before," he said. "We have guessed at things. For the first time, I think we can make some intelligent decisions based on information."

He is philosophical about the union's share of new technological or manufacturing jobs. "Some of them will be ours and some of them won't be," he said. "That's our responsibility."

And for the forces of historic restoration, which have been gradually revitalizing the fact, if not the economic body, of Rhode Island, the commission's work offers the hope of new vigor in an old house. Business, government and residents at all levels have made a great investment in renovating houses, offices and factory buildings in Rhode Island.

"Now we're praying for the miracle," says Mrs. Downing, "the thing that will make it all work."

POWELL A. MOORE

Mr. TOWER. Mr. President, I want to bring to the attention of my colleagues the departure from Government service recently of a man who has been of great assistance to this body, down through the years, in his numerous positions in both the legislative and executive branches.

The Assistant Secretary of State for Legislative and Intergovernmental Affairs, Mr. Powell A. Moore, has resigned his position to take up responsibilities in the private sector here in Washington with a major aerospace company.

It is fitting on this occasion that we in the Senate take note of his distinguished Government career, which began here in 1966 on the staff of the late Senator Richard B. Russell of Georgia. Mr. Moore subsequently served in senior positions at the Department of Justice and the White House under Presidents Nixon and Ford and was more recently in charge of Senate liaison for President Reagan during the first 2 years of his administration.

As Assistant Secretary of State, Mr. Moore has performed exceptional service to both Secretaries Haig and Shultz, and as he departs the Government, the Senate will lose the benefit of the knowledge, experience, and dedication that one of his unique background has been able to bring to his very substantial responsibilities.

I know that Senators on both sides of the aisle have come to know Powell Moore as a diligent and an exceptionally capable individual. He has been a friend to this body, and we wish him only the success and happiness he deserves in all of his future undertakings.

SENATOR DANIEL J. EVANS

Mr GORTON. Mr. President, this occasion provides me with a special mixture of honor and pleasure as to remain always a special moment. Even a varied and challenging career offers few such moments.

Today, it is my deep personal privilege to introduce and commend to my colleagues the newest Member of the U.S. Senate, one of my closest friends, DAN EVANS. The distinguished new Senator from Washington State joins us with such a contribution of character, diligence, and experience as to enhance the dignity, effectiveness, and breadth of this institution.

Our professional and personal association extends back to the very roots of our public careers. DAN was elected to the Washington State House of Representatives in 1956, 2 years before my own first election to that body. He helped me immeasurably in my first campaign. He, now Congressman JOEL PRITCHARD, and our friend Chuck Moriarty lived together in Olympia during the legislature's 1959 session. We served there together for the next 6 years.

I was not alone in my recognition of DAN's abilities. His Republican colleagues named him their leader in the house after only 4 years of his service in that body, and the people of Washington State then elected him as their Governor in 1964.

During 2 years of his first term as Governor, I was privileged to serve as majority leader of the State House of Representatives, and to work closely with him, helping to bring to fruition many of his broad ranging and thoughtful initiatives for the betterment of our State.

We must have done something right, for the people returned DAN to the Governor's mansion twice, the only Governor in Washington State's history to be elected to three consecutive terms. Time magazine characterized feelings in the State about DAN as follows: "Washingtonians have come to regard their handsome Governor as a sort of natural resource, like Mount Rainier * * *." DAN retired from that office in 1977. During his last two terms, I served as the State's attorney general. As a member of his administration, I observed from the closest possible point his sound and sure leadership qualities.

DAN led Washington State's government into a new era, challenging his colleagues to consider new ideas, and to set higher standards of service. He worked effectively with public officials of both parties. His record demonstrates a commitment to the wise use and protection of our environment and resources, both as Governor, and more recently as the chairman of the Northwest Power Planning Council. He is acutely aware of the necessity to reconcile conflicts between demands for abundant and cheap energy supplies, and for an enduring and clean environment. In this respect, he is a worthy successor to Senator JACKSON, whose leadership in this area was so effective here in the Senate.

DAN established the State department of ecology, and a sitting-review council for major energy projects. He fought to preserve the remaining wild stretch of the Snake River for future generations. He proposed and guided to fruition numerous reforms in local governmental structure and powers, enchancing the ability of individual citizens to influence the decisions which most immediately affect them.

A hallmark of DAN's service to our State has been his longstanding commitment to education. During his term as Governor, he helped elevate our traditional State higher education system to one of national rank. For the past 6 years, DAN has been president of the Evergreen State College, preserving and strengthening a threatened but vital institution. DAN was a tower of strength and courage during disturbances of the early 1970's.

For a quarter of a century, DAN EVANS and I have worked together on behalf of the people of Washington State. Now we are given the opportunity to continue that teamwork here. To be together again as a team will enhance the ability of each of us to work for the State and Nation. Mr. President, my pleasure in the selection of Senator EVANS is obvious. As my colleagues come to know him better, I believe that pleasure will be shared universally. It is my deep honor to commend him to the U.S. Senate.

EULOGY FOR H. W. CLOSE

Mr. HOLLINGS. Mr. President, Hugh William Close, chairman of Springs Industries Inc., was more than a giant of South Carolina's textile industry. He was a giant of a man and a true civic leader. His death last month, August 17, hit South Carolinians from every walk of life especially hard.

Our Governor, the Honorable Richard Riley, perhaps put it best when he said, "Bill Close epitomized the finest attributes of a citizen, a public servant, and a business leader. His life will stand as a model for us all." Much beloved by all those who knew and worked with him, Bill Close's legacy and the example he set will live beyond him.

Bill was a modest man. Typically, he always said his business was the only thing in life he was good at. His work at Springs Industries was hardly the only thing he did well, but thrive Springs did under Bill's steady stewardship.

Under his leadership, Springs went through the most intensive growth of its 96-year history. After succeeding his father-in-law, the late Col. Elliot White Springs, in 1959, Bill Close plunged Springs into a modernization and expansion program that made it one of the Nation's largest textile companies. Springs went from a firm with 8 plants, 12,000 employees, and sales of $186 million, to a company with 29 plants, nearly 20,000 employees, and sales that today run at almost $1 billion a year.

Bill consolidated Springs' sales and manufacturing divisions into one company and gained a listing for it on the New York Stock Exchange. Under his presidency, Springs became one of the pillars of South Carolina's effort to revitalize herself by bringing in new industry, trade, and jobs.

In 1963 he was named by the New York Board of Trade the "Textile Man of the Year." In 1973 he served a 1-year term as president of the American Textile Manufacturers Institute, and in 1978-79 he served as honorary president of the South Carolina Textile Manufacturers Association.

But Bill Close was more than just a businessman. He was a true civic leader. He was a strong advocate and firm believer in the role business had to play in safeguarding the consumer, the environment, and the health of its own employees.

He was also one of the new breed of American business leaders who saw the role of business and government not as adversarial, but rather as a partnership of Americans in the international economic competition.

He foresaw better than most the important role education would play in that competition. He was a trustee of the Sirrine Foundation at Clemson University and a chairman of the University of South Carolina's National Advisory Council, and played an active role in promoting business education in both of those capacities.

His strong conviction in the value of business education came from personal experience. As a young man, he went to business school at the Wharton School in Pennsylvania. After graduating in 1942, he went on to serve as a lieutenant in the U.S. Navy in World War II and saw action in the Pacific theater.

In 1982, Bill was awarded South Carolina's highest honor, "The Order of the Palmetto," for his prodigious and very successful efforts promoting tourism as an appointee to the State's Parks, Recreation and Tourism Commission, and for his other contributions to South Carolina.

When his many friends think of Bill Close they think of his character and drive and all his many accomplishments. But they think of his charm and humor and the engaging warmth of the friendship he shared so abundantly. His was an absolutely unique blend of iron determination on the one hand on gentle humor and humanity on the other. He accomplished great things; and he did it all with grace and charm. I am proud to have had him as a dear friend.

His wife, Anne, his eight children, and all the rest of us will miss him

greatly. And, always, we will treasure the years we had with him.

UNIVERSITY OF ARKANSAS FOR MEDICAL SCIENCES CLINICAL PROGRAMS

PROBLEMS ASSOCIATED WITH INDIGENT CARE FUNDING

Mr. BUMPERS. Mr. President, in addition to serving as the primary teaching hospital for the University of Arkansas for medical sciences, the University Hospital has provided medical care to individuals throughout the State of Arkansas regardless of their ability to pay. Since the University Hospital serves as base of last resort for the poor, its patient population is disproportionately composed of individuals who are either provided assistance under the State's medicaid program or who have no resources to pay their medical bills.

During the past 2 years, the University Hospital and Ambulatory Care Center have experienced a steadily increasing problem associated with the funding of indigent care. For a number of years, the Arkansas State medicaid plan provided unlimited inpatient days and outpatient visits at UAMS, while limiting coverage at other Arkansas institutions. This exemption for UAMS was determined to represent provider discrimination by the Federal Government and was removed in 1981. At this same time, the Arkansas medicaid program started to experience funding problems. This started a series of steps to reduce medicaid expenditures which in turn have had an increasing financial impact upon UAMS.

At the present time, the Arkansas medicaid program is paying on the average for only 75 percent of a patient's care in the hospital and limiting a client's total outpatient and emergency visits to 12 per year. During the current fiscal year, the Arkansas medicaid program has also reduced the number of clients on the rolls which has resulted in many of these patients coming to UAMS without any source of payment for their care.

In addition, the difficult economic times have resulted in an increased burden upon the poor and unemployed in the State of Arkansas, who have in increasing numbers turned to UAMS for care.

The significant shifts in patient mix are shown in attachment A. Gross revenue from medicaid has decreased from 26.1 percent of total revenue to 20.5 percent and the percent of uninsured patients has increased from 23.6 to 35.8 percent of the total patients. In anticipation of the severe funding problems facing UAMS in 1983–85, a request was made during the last legislative session to provide a special appropriation for indigent care. This request was based upon the projected increase in unreimbursed indigent care during fiscal 1983–85 (see attachment B). The request was for $5,086,149 in 1983–84 and an additional $2,440,951 in 1984–85.

Although a special appropriation was granted by the legislature, the full request was not funded. Based upon projected current levels of funding for 1983–84, it is estimated that the University Hospital will receive $2,166,667 in 1983–84, and an additional $166,667 in 1984–85 (see attachment C). This level of funding does not replace the lost medicaid funding for 1983–84 and does nothing to fund the increased level of care provided to the increased number of uninsured patients (see attachment D).

In addition, it is generally understood that the Arkansas State medicaid program is having current funding problems and will probably be forced to initiate additional funding reductions during 1983–84. Since the 1983–84 request for special indigent care funding and the 1983–84 budget for the university hospital were based upon no further reductions in medicaid funding, another reduction by the medicaid program could result in several millions of dollars of additional unanticipated lost revenue during 1983–84.

Faced with the above noted funding problems and a continual increasing level of indigent care, the UAMS administration presented the problem to the University of Arkansas Board of Trustees at their May 24, 1983, meeting at which time the board of trustees adopted a policy regarding "indigent and uncompensated patient care" (see attachment E).

At the present time, the University of Arkansas for Medical Sciences is faced with a need to maintain the quality of its educational, service, and research programs. A reduction in our service level will have a significant impact upon our educational programs and health care in Arkansas. However, we are also faced with the need to insure both short-term and long-range financial viability and would welcome any additional support that can be provided by the Governor and the legislature.

30TH ANNIVERSARY OF AMERICAN POLITICAL SCIENCE ASSOCIATION CONGRESSIONAL FELLOWSHIP PROGRAM

Mr. BUMPERS. Mr. President, I would like to take this opportunity to praise the American Political Science Association's Congressional Fellowship Program on the occasion of its 30th anniversary. The program has succeeded in its goal of giving mid-career professionals a deeper understanding of the legislative process. More than 1,000 scholars, journalists, Federal executives, and professionals from other nations have spent a year as congressional fellows and have carried away a keener appreciation of how Congress actually functions. At the same time, these fellows, who must undergo a highly competitive selection process, have served with distinction in the many offices, both Democratic and Republican, where they have worked.

The prestige and diversity of the program is reflected in its Advisory Committee. Among those who are members of that body are journalists David Broder of the Washington Post, Elizabeth Drew of the New Yorker, Albert Hunt of the Wall Street Journal, Wayne Kelley of the Congressional Quarterly, and Peter Clark of the Detroit News. The academic community is represented by Nelson Polsby of the University of California, David Mayhew of Yale University, and Philip Meyer of the University of North Carolina. The politicians are Representatives RICHARD CHENEY of Wyoming and THOMAS FOLEY of Washington, Senators PETE DOMENICI of New Mexico and CHRISTOPHER DODD of Connecticut, and Eugene Eidenberg of the Democratic National Committee. Other prominent Americans include Mark Siegel of Siegel and Associates, Charls Walker of Charls Walker Associates, Inc., David Gergen from the White House, and the distinguished former Congressman from North Carolina, Richardson Preyer.

Alumni of the program have gone on to excel in a variety of fields. Some are university presidents, others newspaper and magazine editors, still others have achieved super-grade and assistant secretary-level positions in the Federal bureaucracy. A fair share have chosen to stay in Capitol Hill as Members of Congress or in staff positions. In just about every case former congressional fellows have described their sojourns in Congress as immensely broadening personal experiences that have offered enduring insights into the realities of Washington politics.

In short, I am convinced that the American Political Science Association program, and others like it, perform an important function in the American political process. A number of congressional fellows have served on my staff over the years and have made valuable contributions. I salute the program on its 30th anniversary and hope it continues to prosper.

U.S. CIVIL RIGHTS COMMISSION

Mr. DOMENICI. Mr. President, it is very important that the Senate soon consider the reauthorization of the U.S. Civil Rights Commission. It occurs to me that in extending the life of this body, we will be doing much more than performing what is a routine matter of business for the Senate. At the heart of this reauthorization is

a renewal of this Congress commitment to the defense and protection of the civil rights of all Americans. Indeed, this was the initial intent expressed in 1957 when the Commission was first created under the provisions of the Civil Rights Act.

The Commission's mandate to gage the effectiveness of current civil rights policies, to recommend how these policies may be improved, and to expose instances where individual civil liberties are being violated is achieved in an unusual manner, for the Commission has neither enforcement authority nor the ability to prosecute. The Commission's power is, therefore, one of persuasion, and is enhanced by the receptivity of the Congress and executive branch to its findings and recommendations. As such, it is essential that the 98th Congress demonstrate, in no uncertain terms, its ongoing support of the Commission and its invaluable service to American minorities.

It is worth noting that despite the absence of any tangible power to reprimand or repudiate offenders of civil rights, the Commission has been eminently successful in ushering into law many important civil rights policies. During the last session of Congress, the Voting Rights Act was extended an additional 10 years. Many statements in support of the act and the crucial role it has played in protecting the fundamental rights Americans have to select their legislators were presented here in this Chamber. While it is widely held that intrinsic to the act's enforcement is the appointment of Federal examiners to monitor elections in areas where minority citizens are believed to have difficulty registering, few acknowledge that it was the U.S. Civil Rights Commission which initially endorsed the creation of such an oversight body. Later, in 1970, the Commission was successful in eliminating literacy tests from voter registration procedures.

The Commission has been equally active in the field of education. Recommendations made in the Commission's infancy laid the groundwork for the addition of title VI to the Civil Rights Act of 1964. Included in the provisions of title VI—and fundamental to its purposes—was the Commission's suggestion that Federal assistance be withheld from institutions which have discriminating policies.

Other noteworthy accomplishments of the Commission include the adoption of equal employment requirements for Federal agencies and contractors, equal opportunity statutes applying to the Armed Forces Reserves and National Guard, and the prohibition of discriminatory practices in employment supported by Federal grants. In fact, of the 19 employment recommendations put forward by the Commission, 15 have been acted on either through legislation, regulation or executive directive.

I realize that there has been a good deal of controversy surrounding the Commission in recent months. Questions regarding the ability of the Commission to retain an independent status, the role that our Chief Executive should play in the appointment of commissioners, and possible conflicts arising from these two distinct, yet integrated issues have been discussed at length among ourselves and the committee members reviewing the candidates nominated by the President. While these are very important matters to address, the first step toward a satisfactory resolution is the reaffirmation of a congressional belief in the past success of the Commission and a strengthened commitment to support this entity which has been charged with protecting the rights that all the world's people yearn for, yet few are guaranteed. In this regard, we Americans are truly fortunate. And it is, therefore, in the interest of carrying on this tradition that we all should join in support of the U.S. Civil Rights Commission and its defense of American civil liberties.

WHY WE SHOULD NOT SUSPEND THE ARMS TALKS

Mr. PROXMIRE. Mr. President, on Tuesday, the Wall Street Journal called on our Federal Government to suspend the arms talks. Many Americans will agree with the Journal. To date, President Reagan—to his credit—has resisted this course. What is more natural when our Government is negotiating with another government and that government commits such a vicious, murderous act and when it lies about that crime and its foreign minister says it would commit the same crime again under similar circumstances—what is more natural than to stop any negotiations designed to arrive at a treaty which both sides promise to keep? It would be natural for us to stop negotiations. And it would be wrong.

If there were any lingering doubt about trusting the Russians before this episode—and there should not have been—those doubts should be exploded by their murderous action and especially by their brazen announcement that what they did is in full conformance with their settled, deliberate national policy. The Journal's editorial argues that we should walk away from further arms talks and "rely for the moment on the balance of military power to secure deterrence, and come back to arms negotiations at a more opportune time."

And when would that be? The Journal's answer: "When perhaps with a change in the Kremlin leadership, there is some reason to believe the Soviets are ready to turn serious."

Mr. President, I submit that what the Wall Street Journal is proposing is obviously that we should walk away from arms control talks with the Soviet Union forever.

In the very next column in the Journal, that paper runs a series of excerpts from other editorials written since June of 1969 by Robert Bartley, the editor of the Journal. Mr. Bartley and the Journal have been marvelously consistent over these 14 years. They have had one theme: Arms control agreements limit the United States. They do not limit the Russians. And they do not limit the Russians because the Russians simply will not agree to a treaty unless they are convinced the treaty gives them a military advantage. As time goes on, if they believe it does not, they just cheat. So negotiating—in this view—appears to be an easy and inevitable formula for the United States losing and the Russians winning.

And yet the editorial does concede that we do live on the same planet as the Russians and "need to keep open the long run possibility of reaching arms agreements with them." Mr. President, this view expressed by the Journal is held by millions of our fellow Americans. Why is it wrong, dangerously, fatally wrong?

First, those of us who believe in arms control in this body have recognized for many years that the Soviet leaders will lie and cheat and push for onesided treaties that will strengthen their military position and weaken ours. Furthermore most of us accept the fact that this has been true since the advent to power more than 65 years ago of Communist leaders who lived by the ruthless doctrine that the end justifies the means—any means no matter how cruel or inhumane. And there is every likelihood that this Soviet superpower will follow the same amoral path for the next 65 years, unless a nuclear war destroys civilization in the meantime.

We not only live on the same planet as the Russians. We and the Russians alone possess the power to destroy civilization utterly, and to destroy each other in the process. With each passing decade, as the nucelar arms race has speeded ahead, both the United States and the Soviet Union have found ways to refine and magnify that lethal power. We have done this not by building more nuclear warheads, or by increasing the throwweight or the megatonnage, but by refining the accuracy, reliability, and invulnerability of our arsenals. Indeed, in some respects our nuclear arsenal is actually smaller now than it was 15 years ago. Some may have deluded themselves into thinking that each improvement in nuclear arms builds a safer world. We know it has not. We either have developed or are on the verge of devel-

oping in the present or in the near future the electronic magnetic pulse, the satellite killer, the hard-target penetrators.

Both sides have steadily increased their capability to render the enemy deaf, dumb, and blind. The arsenals of both countries have never been more deadly. In both countries technology reaches for that capability that will enable one or the other to destroy the other side so swiftly and finally that no significant nuclear response would be possible. And, of course, every day as this arms race goes on one side or the other could utterly destroy us both.

Yes, indeed, we know we cannot trust the Russians. We never have been able to trust them. Negotiations and treaties are not a matter of trust. The Russians will, as they certainly have, violate any treaty that fails to include an effective compliance provision. Unless we can promptly expose cheating, they will cheat. This is precisely why they have violated the biological warfare treaty, and why the administration should comply with the terms of the Proxmire resolution, which has passed the Senate and which would have us renounce that treaty and renegotiate an effective compliance provision. It is why, according to the best information from this and previous administrations, the Soviets have not violated the Test Ban Treaty of 1974 although we have never ratified it. Why have they not violated that treaty. Because they know we have the scientific capabilities to monitor explosions by the U.S.S.R. that exceed 150 kilotons—the maximum level permitted by the treaty.

We must continue to talk with the Soviet Union about arms control. We must press for strict, enforceable verification and compliance provisions. The Korean jet episode reminds us once again that we cannot and never should trust the Soviets to keep their word. So what do we do? Walk away? No. We can and must work to provide effective verification procedures and insist on their adoption. Why is verification so critical? Because it will make trust unnecessary.

Mr. President, I ask unanimous consent that a copy of the Wall Street Journal editorial to which I have referred, together with the Wall Street Journal's excerpts of writings by its editor, Robert L. Bartley, on the subject—from the Tuesday, September 13, issue—be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUSPEND THE ARMS TALKS

In the wake of the Soviet murder of 269 people on the Korean airliner, something approaching an official consensus holds (a) we need to find some stronger way to react and (b) we shouldn't let the incident interfere with arms-control negotiations. This is the first clue that the one proper reaction is to suspend the arms talks.

Now of course, the president was quite right not to do anything so dramatic in his first reaction to the incident; this is something to be done with due deliberation rather than an instant response. And of course, we do have to learn to live on the same planet with the Russians, and need to keep open the long-run possibility of reaching arms agreements with them. But in trying to accomplish any such ends, the absolute key is finding some way to induce the Soviets to modify the belligerent and deceitful behavior so vividly demonstrated in the airliner incident, and so often repeated in the arms negotiations themselves. It is no service to the eventual prospects of arms control to suggest that we are willing to tolerate this kind of conduct.

Consider for a moment the range of Soviet actions concerning Flight 007: First the barbaric decision to shoot down the airliner because it intruded on Soviet airspace. Then a flood of lies and denials. Then the bluster that they, not the 269 dead, were the wronged party. Finally an admission that yes, they did "end" the Korean flight. Then a briefing by their top general putting the blame on the U.S.—no doubt to be followed by forgeries to support the wholly implausible accusation that the U.S. would send a civilian airliner on an intelligence mission. Finally a declaration by their foreign minister, at a conference supposedly devoted to human rights, that given a chance they would do the whole thing over again.

Now consider that these are the same people we are negotiating with over the nuclear balance.

And in fact, if you review the history of these negotiations (see alongside) you find a pattern of behavior entirely consistent with that displayed in the airliner atrocity. By now it has become quite clear that the Soviet purpose in arms control talks is anything but codifying strategic parity and nuclear stability. From the first they have used arms talks for one purpose and one purpose only: inhibiting U.S. weapons development while leaving their own unfettered. They have been remarkably successful at reaching treaties that foreclose technologies in which the U.S. had an advantage; they stopped the antiballistic missile in SALT-I, and ever since we have been trying to cope with the problem of Minuteman vulnerability. They have been equally successful in creating loopholes and ambiguities concerning their own advantages; for example by refusing to define a "heavy" missile in SALT-I, or by handing President Carter an unsigned slip of paper promising not to give their Backfire bomber intercontinental capabilities it already had.

When ambiguities have not sufficed, finally, the Soviets have simply violated the treaties with the same equanimity they display in shooting down airliners. Indeed, in one way the national uproar over the Korean airliner leaves a bitter taste in our mouths. The State Department has estimated that through 1981, more than 6,000 people died in Laos alone from "yellow rain" or other biological or chemical agents used in violation of the Geneva protocol and biological weapons convention. Where was the uproar then, except in these columns? Why now is it everywhere, over so far fewer casualties? Our moralists are not concerned with stoneaged Hmong in the Phou Bia mountains, but they do ride in 747s.

After seeing what it is like to talk to the Soviets about downed airliners, finally, consider what it is like to talk to them about their compliance with arms treaties. Space satellite photos recently revealed a new large phased-array radar near the Siberian village of Abalakovo, capable of ABM battle management and near Soviet intercontinental missile fields. This is clearly a violation of specific and detailed provisions of the SALT-I treaty. When we protested, the Soviets blandly replied that it is a space-tracking station. From the radar's orientation, our analysts consider this implausible. The Soviet response is a lie like those told in the airliner episode, but what are we to do?

Let us offer our own prediction about the much-promised Soviet response to the impending deployment of Pershing missiles in Europe. They will haul out the ABM interceptors to match this and other ABM radars, and tell us their ABM does not violate SALT-I because they only intend to use it if attacked by theater missiles, not intercontinental ones. What will we do then?

The arms-control negotiations, like air-traffic regulations, have been distorted by fundamental asymmetries. We are an open society and the Soviets are a closed one. We seek the rule of law, while their official morality, as proclaimed by their venerated Lenin, is that what is moral is whatever serves the interest of the class struggle. A lie about an airliner or a radar is not a necessary breach of ethics, it is the one moral course of action.

Under these circumstances, we have undertaken to police the compliance of both sides of arms-control treaties. We are of course expected to abide by their provisions, and if the Soviets cheat we are expected to catch them. This is a burden we cannot sustain in the face of the lies and bluster the world has witnessed this last week. The meaningful reaction to the airliner atrocity is to step back to assess the entire range of our relations with the Soviets, to educate the public and our allies on how the same attitudes and behavior have tainted the arms-control talks. We should say that these negotiations cannot be serious until there is a change in Soviet attitudes and Soviet behavior, and we should bring our negotiators home until the Soviets show some evidence of moderating the brazenness that is now so clear to the world.

Yes, we know, if the taboo about interfering with arms control is breached the allies will yowl. The politicos in the White House will have to give up the notion of a summit to grab the peace issue by next November. Some scribbler will call President Reagan a cowboy. Those are the prices of leadership. For our own part, we have enough faith in democracy, both here and in Europe, to believe that the electorates will understand that however desirable arms negotiations may be, they require good faith on both sides.

Tolerating the kind of Soviet behavior displayed in both the airliner shooting and the ongoing negotiations will not produce meaningful treaties to control arms. It is precisely because we want real agreements that we need to break this pattern, to rely for the moment on the balance of military power to secure deterrence, and to come back to arms negotiations at a more opportune time. That is when perhaps with a change in the Kremlin leadership, there is some reason to believe the Soviets are ready to turn serious.

ARMS CONTROL: A VIEW EVOLVES

The following are excerpts from articles or editorials on arms control by Robert L. Bartley, editor of the Journal, who has written extensively on the subject starting in 1969. A related editorial appears today.

June 18, 1969: The great missile debate of 1969 has been a debate about the wrong missile . . . Prospects of avoiding a nuclear exchange between the United States and the Soviet Union are not directly menaced by defensive anti-ballistic missiles. From the standpoint of avoiding this holocaust a far more serious threat arises from the offensive multiple warhead missiles both sides apparently are developing . . .

With MIRV each rocket launcher would have, say, three warheads. Thus it could attack three of the enemy's launchers. In other words, one missile with three warheads could take out three missiles with nine warheads. Theoretically, two sides with equal numbers of missiles could wipe out the other's retaliatory missiles with only a third of its own force. Whoever fired first would win.

In practice, to give thanks for small favors, a first strike is scarcely so simple. . . .

The effects of ABM on stability are far less clear-cut. . . . An ABM can . . . be considered stabilizing if it protects missile forces, as the current Safeguard is supposed to do. . . . The ABM may be a technical flop and an enormous waste of money, as its opponents contend. But in promoting stability in the nuclear arms race, the ABM does not matter nearly as much as the intensity of the debate has suggested. What does matter is MIRV.

June 17, 1971: With good luck American and Soviet negotiators will agree on strategic arms limitation sometime this year, writing the doctrine of "mutual deterrence" and "assured destruction" into a formal agreement. Despite the general jubilation that will result, some experts will be deeply worried. For a dissenting school of strategic thinkers believes these doctrines add up to a "genocide pact."

The doctrine of "assured destruction" became the bedrock of U.S. strategic posture during Robert McNamara's tenure as Secretary of Defense. . . . When each power can retaliate to obliterate the other, the theory continues, the result is a "mutual deterrence" that makes nuclear war unthinkable. . . . Obviously mutual deterrence means no rational man would deliberately start a war, but who ever said war is likely to be started by the deliberate plan of rational men? Yet for the purpose of deterring rationally planned war, the current nuclear posture insures that war starting from any cause will automatically result in the slaughter of the majority of the population in both the U.S. and the Soviet Union. . . .

Unless the world has in fact reached the point where the only sanity is madness there simply must be something fundamentally wrong with our national thinking.

June 20, 1972 (on the conclusion of SALT I): As the strategic arms agreements were concludled, the United States formally stated that unless further limitations were reached within five years its "supreme national interests could be jeopardized" and it would feel free to abrogate the agreements entirely. . . .

At the start of the five-year life of the agreements on offensive weapons, there is no question that the U.S. position is quite comfortable. Our lead in multiple-warhead technology gives us a lead in warhead numbers despite the Soviet lead in launchers. . . . By the end of the five-year period, though, the picture could be quite reversed. The Soviets have not only more launchers but far larger ones, capable of carrying many more multiple warheads once they develop that technology.

Aug. 24, 1973 (on the detection of the first tests of Soviet multiple warheads): The Soviet missile force can lift a total weight about four times as large as the American missile force can. . . . With MIRV on both sides, the throw-weight advantage means that the Soviet force will in effect be four times as large as the American one. The type of weapons the Soviets are developing, moreover, are suited to a first strike wiping out land-based missiles.

Dec. 2, 1974 (on conclusion of the Vladivostok agreement between President Ford and Chairman Brezhnev): On the way to Peking, Secretary Kissinger told the accompanying press, "The throw-weight problem in my judgment, and on a deep background basis, is a bit of a phony." . . . Yet if the Vladivostok agreement is finally incorporated into a treaty, it will stand or fall on the question of whether the throwweight problem is a phony, whether it matters that the Soviets have a 3-1 advantage.

Dec. 19, 1975 (on Secretary Kissinger's press conference on verification and compliance issues): Legalistic minds can quibble over whether the Soviets have "violated" the strategic arms treaty, but they have come close enough to make clear that the U.S. has contracted with shysters. . . . The alleged violations cover a dozen or so more complex and technical issues. . . .

The compliance issue that most directly affects the strategic balance arises from a clause in the treaty saying "the parties undertake not to convert land-based launchers for light ICBMs . . . into launchers for heavy ICBMs." [The Soviets] have been replacing their "light" SS-11 missiles with the new SS-19, about 50 percent larger.

When the agreement was negotiated, typically, the Soviets declined to define the term "heavy." . . . the American delegation issued a unilateral statement stating that it considered a "heavy" missile to be any missile significantly larger than the largest current "light" missile, which was the SS-11. . . . back in 1972 the United States government was clear in its own mind about what a heavy missile was. Now the United States government says that there have been no violations of the agreements. Whether there have been violations is ambiguous; what is totally unambiguous is that there has been a change in the position of the U.S. government on what constitutes a violation.

June 15, 1979: The agreements have not slowed the Soviet build-up in any perceptible way; certainly they have not been able to find a negotiated solution to Minuteman vulnerability. By contrast, there is plenty of reason to believe the SALT process has subtly but effectively curtailed American strategic programs. The dynamic is this: arms control mutilates the best options, and the Budget Bureau moves in to kill off the cripples.

U.S. planners are trying to square the circle with a mobile [MX] missile that (1) can be concealed to avoid attack, (2) can be seen to permit verification and (3) will pass budget muster. Not surprisingly, the options look like something from Rube Goldberg.

Sept. 11, 1979 (on the Senate debate on SALT-II, still unratified today): It is no accident that the unparalleled Soviet military gains coincide with the era of arms negotiation. . . . The dynamics of the process—the attempt to reach a treaty more than the ultimate provisions—have curtailed American military programs. There is no more cogent statement of this than the melancholy testimony of Henry Kissinger [to the Senate Foreign Relations Committee, considering the new pact]: Note well that Mr. Kissinger concludes that on the record the arms control process has restrained the U.S. without restraining the Soviet Union.

Nov. 19, 1980: Were it not for SALT-I, . . . MX would not be needed; our Minuteman missiles would today be protected by an anti-missile defense, probably much improved over the early ABM design approved in 1969 but hamstrung by the arms treaty.

Dec. 30, 1981: As another year draws to a close, we find ourselves pondering what psychologists call "denial," the neurotic refusal to admit reality precisely because it is so threatening. . . . The yellow rain accounts, to which we have tried to bring public attention these last few months, are the year's most gnawing case. . . . [Walter] Laqueur remarks in his book that as the reports of killings emerged from Nazi Germany, details were in dispute but the key point was that "there had been a decision at the highest level to kill all Jews." So with yellow rain—there has been a decision at the highest level of the Soviet government to develop and use biological toxins in clear violation of recently negotiated arms control agreements.

June 11, 1982: Why can't simple truths be uttered? The prospect for meaningful agreement with the Soviets is slim to negligible. It's time for our attention to shift from how to achieve an arms agreement to how to build a viable military deterrent. The true outrage to morality is not inanimate lumps of steel and plutonium buried in Montana, but the sordid deaths of Hmong tribesmen and Afghan freedom fighters in Asia.

Our politicians, including Mr. Reagan, shrink from these truths because they fear the public does not want to hear them. They should stop underestimating democracy.

Dec. 28, 1982: What does the yellow rain experience tell us about the character of the Soviet leadership? Clearly these are men who have no moral scruple about developing and using weapons considered too atrocious and barbaric to use even in total war like World War II. . . .

Beyond that, what does yellow rain say about the prospects of arms control with the Soviet Union? Just as the Soviet leadership was signing the 1972 Biological Weapons Convention, it was developing and producing the bio-chemical weapons we now see in Asia. Clearly their motive had nothing to do with peace, and everything to do with using arms agreements to prevent the West from matching their developments. Any clear-thinking person is forced to assume the same motive permeates their approach to current negotiations. . . .

If you accept the fact of yellow rain, it seems to us, you have to ask whether we have anything to talk to these people about.

GOLDEN FLEECE AWARD TO U.S. DISTRICT COURT IN ATLANTA

Mr. PROXMIRE. Mr. President, during the recess, I gave my Golden Fleece Award for August to the U.S. district court judges of Atlanta, Ga. for fixing the jury on design and con-

struction at the Richard B. Russell Federal Building and U.S. Courthouse and then serving the taxpayers with their bill for an extra $7 million. The Atlanta judges really flipped their wigs on this one, forcing the General Services Administration (GSA) to make hundreds of last minute design changes to suit their whims. I rule the Atlanta court totally out of order.

The $47 million Atlanta courthouse project was originally designed in the 1960's. But in 1977, a good 2 years into the actual construction, the Federal judges started making their demands. The list of changes included building a total of six jury rooms to serve just four courtrooms. Another change provided for an oversized, but seldom used chamber for ceremonial occasions. Their list of injudicious changes also included orders to install extra wood paneling behind each judge's chair and to trade in all the stainless steel rails and chair bases for more elegant brass fittings.

But the real loser in this "Let-The-Judges-Design-It" contest was the building's poor 22d floor. It had already been finished, or so the GSA thought, when the judges decided to completely revamp the clerk of the court's filing system. They wanted to install a new mechanized system that was so heavy, the entire concrete slab floor had to be gutted, the building cross-supports replaced, and the exterior building skin replaced. The judges' caprice created a gaping hole in the building for 3 months.

The GSA has sometimes been the defendant in the past fleeces concerning construction cost overruns. But not this time. The record shows that GSA tried its best to keep the project within budget and on time. But the Atlanta judges decided to bend the rules. They took unfair advantage of the traditional separation of powers between the judicial and legislative branches.

Congress is responsible for providing the courts with the funds necessary to run their own show. In Atlanta, the judges decided to go for the gold, prolonging the project by a year and adding 11 percent to the original contract price. GSA says normally it is able to hold change costs to just 1 percent of the original project estimates.

In all, there were a total of 230 change orders submitted, most of them to satisfy the court's many demands. And to cover the added costs, the local Atlanta contractor sued the Government for $18 million. After negotiations with GSA, the company reduced its claim to $7 million. But so far, the bill still has not been paid.

In his court brief, GSA's legal counsel had to admit that the contractor's claims were valid. He wrote that—

The Government issued a plethora of change orders turning the project into a design as you build exercise. Work was interrupted because many times it was unclear whether a change order would be issued or what the scope of the change order would be . . .

Unfortunately, Atlanta is not an isolated case. Despite a 1977 agreement between GSA and Chief Justice Warren Burger that limits the size of Federal courtrooms to 1,800 square feet, judges routinely demand—and get—exceptions over GSA's objections. Last year, the Chief Justice approved a 3,200-square-foot ceremonial courtroom for Norfolk, Va. On the drawing boards for Pasadena, Calif. are two oversized chambers, one 3,120, the other 2,170 square feet. In addition, judges in North Dakota and Ohio have had the gall to issue court orders that force the GSA to set building air-conditioning levels to the court's liking, in defiance of Federal energy conservation rules.

Who judges the judges when they break the rules and make Uncle Sam pay for it? Clearly, no one outside the judiciary can do the whole job. But at least these judges ought to be sentenced to embarrassment for life without hope of parole for holding the American taxpayer in such contempt.

THE SOVIET UNION AND HUMAN RIGHTS

Mr. PROXMIRE. Mr. President, recently I was reminded once again of the valiant Swedish diplomat Raoul Wallenberg who saved so many Jews fleeing Nazi persecution in the final days of World War II. He then disappeared after the war. He was feared dead. Subsequently it was revealed that he had been a prisoner in a Soviet camp where he died in 1947. But it now appears that Wallenberg could be alive. If so, the Soviets have committed a terrible injustice.

This great man who has saved so many others may now be imprisoned himself, having his rights denied him. To have a personal symbol of human rights and freedom to be thus treated would be the ultimate denigration of Soviet character. The Soviets would be showing again their true intentions regarding human rights. Not only is it abominable that an individual be denied his rights, but by imprisoning Wallenberg the Soviets will have also symbolically imprisoned that for which Wallenberg stands. This would demonstrate the Soviets' utter disregard for human rights.

This would not be new. The Soviets have consistently demonstrated their disregard for human rights. Ironically, while fighting the tyrannical Nazis during World War II, they seemingly had no qualms about utilizing similarly brutal mechanisms to establish their own tyranny. Late in the war, in their quest to gain suzerainty of East Europe, they suppressed all possible angles from which dissent might come, before and after the territories were under military control. At Katyn Forest, the Russians wiped out leaders of the Polish military who could have asserted themselves against Russian desires for Poland after the war.

It is suspected that the brutal Nazi repression of the Warsaw Ghetto uprising was tacitly approved by the Soviets in order that potential opposition to future Russian domination be eliminated. They could have stepped in to prevent the Nazi actions, if they wished. This, in addition to the fact that Eastern European countries have never had the free elections that were promised by the Soviets in the Yalta agreements, give a true picture of the Soviet attitude toward human rights. The incarceration of Raoul Wallenberg fits right in with this Russian oppression of peoples under their domination.

As I have stated in the past, it is very unfortunate that this disregard for human rights is quite common in the world today.

Under such conditions, genocide has been, presently is, and can be a fatal logical step in the campaigns against human rights across the world. Nazi and Soviet mistreatment of Jews and other nationalities are only outstanding examples of a now large growing problem.

We, the Senate of the United States, can take a step in helping to curb this problem. By 1948 the Genocide Convention had been drawn up, signed, and subsequently ratified by over 90 nations in an effort to help solve this problem. Unfortunately, our great body has failed to ratify this agreement. We must ratify now before there are any more innocent victims.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-375. A resolution adopted by the board of governors of the State bar of the

State of California relating to the immigration laws; to the Committee on the Judiciary.

POM-376. A concurrent resolution adopted by the Legislature of the State of West Virginia; to the Committee on Finance:

"SENATE CONCURRENT RESOLUTION NO. 7

"Whereas, Social Security disability insurance benefits have been terminated to several thousand residents of West Virginia since 1981, even though most of those recipients continue to suffer totally disabling impairments; and

"Whereas, Appeals to administrative impairments courts are costly, time consuming and emotionally burdensome and compound the original disability, though the majority of cases end favorably for the recipient, overturning the initial wrongful termination of benefits; and

"Whereas, Various Federal courts have ruled that medical improvement should be a guiding factor in disability determinations, and that ruling has led to the high reversal rate and greater justice for recipients by administrative law judges; and

"Whereas, The Legislature of West Virginia, through its Joint Committee on Government and Finance, has considered the problem to be of such severity as to investigate the state disability determination program and has held public hearings to gather evidence and disclose the serious problems with the current system; and

"Whereas, The Governor of West Virginia has issued an executive order directing the state disability determination program to use the standards of Federal court decisions most favorable to beneficiaries in all future determinations of disability; and

"Whereas, The Governor of West Virginia has requested authority and funds from the Social Security Administration to review all cases of benefits terminated in the six-month period ending August 12, 1983, and to apply the criterion of medical improvement to such cases; and

"Whereas, The Governor of West Virginia also has requested authority and funds from the Social Security Administration for face-to-face interviews between the beneficiary and disability determiner prior to any decision to terminate benefits; and

"Whereas, Legislation has been introduced in Congress to address the problems in the current system, primarily by requiring proof of medical improvement before benefits may be terminated; therefore, be it

"Resolved by the Legislature of West Virginia, That the Congress of the United States be requested to enact legislation that will ensure the rights of disabled persons who have been wrongfully denied Social Security disability benefits; and, be it

"Resolved further, That copies of this resolution be transmitted to the President of the United States, the presiding officer of each House of Congress and the members thereof from the State of West Virginia, and the Secretary of Health and Human Services."

POM-377. A resolution adopted by the House of Representatives of the Commonwealth of Massachusetts; to the Committee on Foreign Relations:

"RESOLUTION

"Whereas, the Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights guarantee to all persons the right to freedom of religion, the right to hold opinions without interference, the right to freedom from expulsion, and the right to emigrate; and

"Whereas, Ethiopian Jews are among the oldest continuous Jewish communities in existence, their history extending back for three thousand years; and

"Whereas, this community once numbered several hundred thousand persons, but the scourge of wars, pestilence, persescution, and famine over the years has reduced it to some twenty-five thousand people; and

"Whereas, the American people are becoming increasingly aware of the difficulties facing Ethiopian Jews and are seeking ways to assist them; and

"Whereas, the plight of Ethiopian Jews demands that the American people and all people of good will do everything possible to alleviate their suffering; therefore be it

"Resolved, That the Massachusetts House of Representatives hereby urges the Congress and the President of the United States to express to relevant foreign governments the United States concern for the welfare of Ethiopian Jews, in particular their right to emigrate; to seek ways to assist Ethiopian Jews through every available means so that they may be able to emigrate freely; and to express the concern of the American people for the welfare of the Ethiopian Jewish community in every appropriate forum; and be it further

"Resolved, That copies of these resolutions be forwarded by the Clerk of the House of Representatives to the President and the Presiding Officers of the Congress and the members thereof from this commonwealth."

POM-378. A resolution adopted by the Kentucky American Legion urging Congress to call upon the Socialist Republic of Vietnam and the Lao People's Democratic Republic, to end the years of uncertainty for American POW/MIA families by releasing all U.S. prisoners still being held; to the Committee on Foreign Relations.

POM-379. Joint resolution adopted by the Legislature of the State of Oregon; to the Committee on Foreign Relations:

"HOUSE JOINT MEMORIAL 15

"We, your memorialists, the Sixty-second Legislative Assemply of the State of Oregon, in legislative session assembled, respectfully represent as follows:

"Whereas unemployment has idled the productive capacity and imposed intolerable suffering on over 12 million Americans, including over 160,000 Oregonians; and

"Whereas military spending distorts employment patterns and causes the loss of potential jobs by being less employment-intensive than nonmilitary spending; and

"Whereas in 1980 military spending cost Oregon taxpayers $1.2058 billion, or $458 for each person in the state and resulted in the loss of 44,000 potential jobs for Oregonians, according to Employment Research Associates; and

"Whereas the proposed 1984 federal budget would increase military spending by $29.7 billion from 1983 levels to $238.6 billion, an increase of $103.6 billion since 1980; and

"Whereas that level of military spending will contribute to the projected 1984 federal budget deficit of $188.8 billion, resulting in high interest rates and unacceptably high unemployment in Oregon; and

"Whereas increased military spending diverts resources from social programs that are most needed in these times of economic distress; and

"Whereas the exorbitant military budget accelerates nuclear weapons proliferation and the creations of weapons with first strike capability that decrease national security by increasing international tension and the probability of war; and

"Whereas the United States of America and the Union of Soviet Socialist Republics have nuclear weapons arsenals equivalent to four tons of TNT for every person on the planet, capable of destroying every major city at least 10 times; and

"Whereas over 100 million fatalities and the destruction of much of the progress of civilization would occur in the event of nuclear warfare; and

"Whereas as custodians of our fragile globe and even more fragile civilization we must do everything possible to thwart the threat of nuclear disaster and direct our resources into productive pursuits that will enhance the lives of our people; and

"Whereas 12 million Americans and a majority of Oregon voters have voted for a mutual freeze of the testing, production and deployment of nuclear weapons by the United States of America and the Union of Soviet Socialist Republics; now, therefore,

"Be It Resolved by the Legislative Assembly of the State of Oregon:

"(1) It is the sense of the Legislative Assembly of the State of Oregon that expenditures for first strike nuclear weapons systems are wasteful, diminish true national security and are morally reprehensible.

"(2) Expenditures for such weapons systems should be redirected to serve the true needs of the people of Oregon and the United States of America for justice, employment, food, shelter, clear air and water and the other essentials that are the foundation of both a decent standard of living and realistic national defense.

"(3) The Congress of the United States should change national budgetary priorities from increasing the military budget to adequately funding programs and functions that enhance human life and provide employment opportunities.

"(4) The Congress of the United States should seek reductions in the military spending portions of the 1984 federal budget instead of reducing appropriations for human and social needs and should conduct an investigation of the employment impact of military spending.

"(5) A mutual verifiable freeze in the testing, production and deployment of nuclear weapons by the United States of America and the Union of Soviet Socialist Republics must be a high priority for the Congress of the United States in its deliberations and for the President of the United States in the conduct of foreign affairs.

"(6) A copy of this memorial shall be sent to the President of the United States, each member of the Senate and the House of Representatives in Congress, and the Director of the Office of Management and Budget."

POM-380. A resolution adopted by the General Assembly of the State of Illinois; to the Committee on Energy and Natural Resources:

"SENATE RESOLUTION NO. 259

"Whereas current federal and State regulatory schemes include secondary coal recovery operations in the definition of surface mining activities causing all the surface mine permitting provisions and performance standards of the State and federal programs to be applied to secondary coal recovery operations; and

"Whereas the application of these program requirements has caused approximate-

ly 20 secondary coal recovery operations in Illinois to cease operations and potential operations to not begin due to a lack of the fiscal resources and technical staff or expertise for compliance; and

"Whereas program requirements have had a much greater and more devastating impact on secondary coal recovery operations than regular, small surface mine operators since secondary coal recovery operators do business in a limited market place where their product sells for only $5 to $6 per ton; and

"Whereas it is virtually impossible to generate the resources to gather all the data and prepare all the engineering studies required to obtain a permit under the existing program and to subsequently comply with the performance standards of the existing program as the result of receiving a permit; and

"Whereas secondary coal recovery operations recover coal from abandoned coal waste piles (coarse refuse or gob) and slurry ponds and will be given high priority for reclamation under the Abandoned Mine Reclamation program authorized by Title IV of P.L. 95-87; and

"Whereas if an affordable permitting and environmental control provision can be developed and implemented for secondary coal recovery operators, many of the abandoned mine problem sites in the coal producing regions of the State can be reclaimed by private enterprise, resulting in Title IV funds not being spent to reclaim those sites but being used to reclaim other priority sites; and

"Whereas the Abandoned Mine Reclamation program under Title IV can be bolstered by secondary coal operators paying the 35¢ per ton of coal produced reclamation fee into the reclamation fund, a fiscal resource lost if the coal had been covered and revegetated under the Title IV program; and

"Whereas in addition to reclaiming abandoned sites and paying into the reclamation fund, continuance of secondary coal recovery operations will directly provide several hundred jobs, thousands of dollars in federal, State and local taxes and several hundred jobs in associated industries; and

"Whereas the utilization and conservation of the coal resource as mandated by Section 515(b)(1) of the Federal Act will be maximized by an increase in the number of secondary carbon recovery operations, without which much of this coal resource will be rendered unrecoverable under current economic conditions; and

"Whereas there are no valid or logical reasons why these operations should be forced out of business and there are numerous reasons for taking action to allow these operators the opportunity to continue to operate; and

"Whereas the Illinois General Assembly, representing all the citizens of the State of Illinois cannot unilaterally legislate a solution without federal executive branch approval; and

"Whereas the Illinois Department of Mines and Minerals is seeking stopgap administrative assistance; therefore, be it

"Resolved, by the Senate of the Eighty-third General Assembly of the State of Illinois, That we hereby request the United States Congress and the United States Department of the Interior assist and support the efforts of the State of Illinois to arrive at a solution which will repair existing environmental damage, conserve Abandoned Mine Reclamation Funds and create additional jobs and revenue; and be it further

"Resolved, That a copy of this resolution be transmitted by the Secretary of State of Illinois to the President of the United States, the Secretary of the Senate of the United States, the Clerk of the House of Representatives of the United States, the Secretary of the Department of the Interior and to each member of the Congress from this State."

POM-381. Joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources:

"ASSEMBLY JOINT RESOLUTION No. 32

"Whereas the State of California maintains a longstanding commitment to a quality postsecondary educational system; and

"Whereas the State of California maintains a longstanding commitment to an open and accessible postsecondary educational system for all its citizens; and

"Whereas the cost of attending postsecondary educational institutions in California continues to rise; and

"Whereas over one-third of all students in the State of California rely on financial aid to complete their education; and

"Whereas funding for federal student financial aid has decreased each year since fiscal year 1980; and

"Whereas a continued decline in funding for federal student financial aid will exclude many citizens from attaining a postsecondary education; and

"Whereas this can adversely impact the future welfare of our state and our nation; now therefore, be it

"Resolved by the Assembly and Senate of the State of California (jointly), That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to maintain federal student financial aid as a priority, to work to stop further reductions in student aid funding, and to work to ensure adequate student financial aid; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, without amendment:

S. Res. 213. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1714; referred to the Committee on the Budget.

By Mr. ANDREWS, from the Select Committee on Indian Affairs, without amendment:

S. 1499. A bill to settle certain claims of the Mashantucket Pequot Indians (Rept. No. 98-222).

By Mr. ANDREWS, from the Select Committee on Indian Affairs, without amendment:

S. Res. 214. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1499, referred to the Committee on the Budget.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. Res. 215. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 53; referred to the Committee on the Budget.

S. Res. 216. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 668; referred to the Committee on the Budget.

S. Res. 217. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 948; referred to the Committee on the Budget.

S. Res. 218. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1762; referred to the Committee on the Budget.

By Mr. THURMOND, from the Committee on the Judiciary:

Report to accompany the bill (S. 668) to reform Federal criminal sentencing procedures (Rept. No. 98-223).

Report to accompany the bill (S. 948) to reform Federal criminal and civil forefeiture (Rept. No. 98-224).

Report to accompany the bill (S. 1762) entitled the "Comprehensive Crime Control Act of 1983" (Rept. No. 98-225).

Report to accompany the bill (S. 1763) to reform procedures for collateral review of criminal judgments, and for other purposes (Rept. No. 98-226).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HATCH (for himself, Mr. DENTON, Mr. GRASSLEY, Mrs. HAWKINS, and Mr. QUAYLE):

S. 1838. A bill to amend the Legal Services Corporation Act to provide authorization of appropriations for additional fiscal years, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. GRASSLEY:

S. 1839. A bill to provide for an equitable reduction of liability of contractors with the United States in certain cases, to provide a comprehensive system for indemnification by the United States of its contractors for liability in excess of reasonably available financial protection, and for other purposes: to the Committee on the Judiciary.

By Mr. BENTSEN:

S. 1840. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for dividends paid by certain small businesses, to provide simplification in accounting rules related to inventory, to reduce the capital gain tax rates for individuals who hold new issues of stock at least 5 years, and to remove the limitation on the amount of used property for which the investment tax credit is allowable; to the Committee on Finance.

By Mr. THURMOND (by request):

S. 1841. A bill to promote research and development, encourage innovation, stimulate trade, and make necessary and appropriate amendments to the antitrust, patent, and copyright laws; to the Committee on the Judiciary.

By Mr. ARMSTRONG (for himself, Mr. HATCH, Mr. GARN, Mr. WILSON, and Mr. GOLDWATER):

S. 1842. A bill to amend the Colorado River Basin Salinity Control Act to authorize the Secretary of Agriculture to develop and implement a coordinated agricultural program in the Colorado River Basin; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. SASSER (for himself, Mr. HOLLINGS, Mr. BOREN, Mr. BRADLEY, Mr. MOYNIHAN, Mr. PRYOR, Mr. MITCHELL, Mr. MATSUNAGA, and Mr. DIXON):

S. 1843. A bill to extend by 3 months the cutoff date for social security disability determinations which will be subject to the provisions allowing continued payment of disability benefits during appeal; to the Committee on Finance.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

S. Res. 213. Resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1714; to the Committee on the Budget.

By Mr. ANDREWS, from the Select Committee on Indian Affairs:

S. Res. 214. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1499; from the Select Committee on Indian Affairs; to the Committee on the Budget.

By Mr. THURMOND, from the Committee on the Judiciary:

S. Res. 215. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 53; to the Committee on the Budget.

S. Res. 216. Resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 668; to the Committee on the Budget.

S. Res. 217. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 948; to the Committee on the Budget.

S. Res. 218. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1762; to the Committee on the Budget.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HATCH (for himself, Mr. DENTON, Mr. GRASSLEY, Mrs. HAWKINS, and Mr. QUAYLE):

S. 1838. A bill to amend the Legal Services Corporation Act to provide authorization of appropriations for additional fiscal years, and for other purposes; to the Committee on Labor and Human Resources.

LEGAL SERVICES CORPORATION AMENDMENTS OF 1983

Mr. HATCH. Mr. President, today Senators DENTON, GRASSLEY, HAWKINS, QUAYLE, and I are introducing the Legal Services Corporation Act of 1983, a bill which provides the basis for an effective, productive Federal provision of legal services to the poor.

The Legal Services Corporation was created to insure that this country's poor were not barred from our courts simply because of their economic status. It has been and always should be a virtue of our legal system that all citizens should have access to our judicial system. No one among us would dispute the importance to such access.

Recently, however, we have learned that the limited resources available to the Corporation have been diverted to further the political agendas of its staff, that the congressional prohibitions that Congress has installed to prevent such abuse have been ignored, and the Corporation has operated as if it is beyond the purview of Congress.

In the past, the Corporation and its grantees have been overprotected. Some programs have routinely broken both the spirit and letter of the law. If caught, they are at most told to stop, but few have been punished. It is little wonder that the Congressional prohibitions are viewed with such disdain in the field.

The bill we are introducing today can reverse this trend. It keeps the Corporation intact. It keeps intact the current delivery system, with its emphasis on the use of staff attorneys. It insures that Federal funds are directed at helping the poor with their legal needs, and are not being squandered on political propagandizing, on the purchase of real estate, on the unnecessary institution of costly class action suits, and on staff memberships in private organizations. And, if violations are found, specific sanctions are included to insure that the violations stop and violators will be punished.

The bill also encourages experimentation with new approaches to providing legal services and includes a provision for increasing private bar involvement.

The hearings that have been held in the Senate Labor and Human Resources Committee have provided adequate documentation of past abuses. They have also provided repeated evidence of the positive contribution on effective, dedicated local legal services program can have on the people it serves. It is time that these good programs are encouraged and the bad ones are remedied or removed.

By ignoring legal services, as we have done in the past, we are doing a disservice to this country's poor. By revitalizing this program in a manner which keeps the existing structure intact, but specifically corrects the abuse that has occurred, we can make good on our promise of equal access for all citizens to our judicial system.

● Mr. GRASSLEY. Mr. President, I do not believe that there is anyone among us who would dispute the notion that access to justice is a treasured value. There is no one among us who would question the right of the poor to be represented within our judicial system—no one among us who would dispute the value of participating in the judicial process.

Nevertheless, in order to make this concept of equal access a reality, I believe we must openly face the fact that we need to improve a Legal Services Corporation that has many weaknesses.

I attended all three hearings that were held on the Legal Services Corporation in July. I chaired one having to do with legal access and the elderly. For those of you who have not heard of these hearings I will simply tell you that they exposed serious misuse of Legal Services funds.

None of the bills have been offered or considered so far, in my opinion, even begin to address the misuse of these funds. And the ultimate losers if a reauthorization bill is enacted which does not address these abuses will not be those of us who which to reform Legal Services.

The ultimate losers will be the poor, from whom our limited resources have been diverted for blatantly political ends. And that recognition—that it is the poor who are being hurt—is the reason I feel that the bill being introduced today by Senator HATCH is worthy of consideration.

The question addressed by this bill, which I join in cosponsoring, is this: How do we insure that legal assistance is delivered to the poor in a direct and efficient manner? I submit to you that Congress has attempted to answer this question several times by inserting restrictions on lobbying and political activity under the Legal Services Corporation Act.

Still, as the latest set of revelations about Corporation activity makes irrefutably clear, moneys were diverted into fund balances so large that in the words of one grantee's official, interest was being earned as fast as they could spend it, into real estate and equipment, into political training and media advocacy, even into political campaigns such as the campaign in California on behalf of proposition 9. In addition, money was diverted into shell corporations expressly set up to avoid congressionally mandated restrictions.

To divert moneys from the purpose for which they are mandated is to subvert the right of the poor to be included in this Nation's legal system. No matter what is written or said about our intent in tightening up operation of legal services, doing nothing would guarantee that fewer resources would be available for the persons who most need them.

Senator HATCH's bill will not resolve the basic misconceptions of some Corporation officials as to the intent of Legal Services which have plagued the

Corporation since its inception. But it will put into place some very praiseworthy and workable restrictions on Legal Services recipients, and meaningful sanctions on errant officials.●

● Mr. DENTON. Mr. President, I am today joining Senator HATCH in introducing a bill to reform and reauthorize the Legal Services Corporation for the next 3 fiscal years.

Hearings held by the Committee on Labor and Human Resources in July produced evidence that substantial amounts of money appropriated for legal services to poor people were not used for that purpose. Rather, this money was illegally diverted for use in various lobbying and so-called training activities designed to influence legislation at the local, State, and National level. Some of the activities advocated were unethical and in some cases illegal in themselves. The instances were not isolated; they were pervasive and deliberate. Many of the grantees that were involved in these activities are still receiving legal services funds.

It has been clear to many in this body that the Legal Services Corporation has become a highly politicized organization. Much of this political activity has come at the expense of providing the routine legal services that thousands of poor clients require. The bill Senator HATCH and I are introducing today will go far to depoliticize the Corporation and redirect its activities back toward providing routine legal services to indigent clients.

At a July 15 hearing that I chaired, the current leadership of the Corporation pledged to abide by the restrictions placed on their activities by the Congress. This was not always the case in the past. I am confident that this bill provides the necessary tools to clean up the LSC and insure that the taxpayers' money is being used for the intended purpose—legal services for the poor.●

By Mr. GRASSLEY:

S. 1839. A bill to provide for an equitable reduction of liability of contractors with the United States in certain cases, to provide a comprehensive system for indemnification by the United States of its contractors for liability in excess of reasonably available financial protection, and for other purposes; to the Committee on the Judiciary.

CONTRACTOR LIABILITY AND INDEMNIFICATION ACT

● Mr. GRASSLEY. Mr. President, in my capacity as chairman of the Subcommittee on Administrative Practice and Procedure, I have conducted three hearings in the last year on the allocation of third-party liability between the U.S. Government and its contractors. The bill that I am introducing today responds to many of the concerns raised at the hearings.

A number of distinguished witnesses offered their perspectives on the current liability scheme confronting the Government contractor. Most of the witnesses noted two major problems regarding third-party liability. First, court decisions in recent years have established that injuries arising from Government contract product defects are not compensable through contribution or indemnity in a third-party action against the Government. Nevertheless, a contractor may be held liable for full payment of liability to Government employees, even though the Government was partially or wholly at fault in causing the harm to the employees. Second, a Government contractor may very well face risks that far exceed the typical risks accompanying a commercial contract. Military research and development programs often require a contractor to push well beyond the state of the art into massive risks that cannot be calculated in advance.

While the Government presently does possess statutory authority to indemnify its contractors for excessive liability, the power is rarely used. The result is that conscientious and perhaps the most safety conscious contractors are deterred from participating in essential Government programs.

This bill is intended to both redress the lack of fairness resulting from court decisions which allow the Government to avoid contributing to payment of liability by its contractors when the Government is partly or wholly at fault in causing harm to Government employees and address the possibility of catastrophic liability arising out of products or services supplies pursuant to contract with the United States.

I do not anticipate that this will be a draft that sails through the Senate unaltered. But I do believe that this legislation is a good point from which to start redressing a situation that from a fairness perspective simply must be altered. The interests that we balanced in coming up with this proposal are by no means easy to weigh. We are talking about contractors who have diligently followed Government specifications, military employees who have suffered injuries on the job, and the U.S. Treasury. I am not altogether certain that we have come up with a proper balancing of these interests, but I am sure that the current system offers no real balance at all.

As a means of providing some of the background as to the Government fault problem, I cite to you the 1977 Supreme Court case of Stencel Aero Engineering Corporation against United States. Stencel, a Government contractor, sought to obtain indemnification from the Government for liability incurred as a result of a personal injury suit brought by a military officer who had been injured when the ejection system of his fighter aircraft malfunctioned. The Government had specified the design of the system, and Stencel contended that the defects in the specifications about which he had complained to the Government to no avail, had caused the injuries to occur. The court nevertheless held that the subcontractor could not obtain indemnity from the Government for claims made against it by military personnel. The upshot of the Stencel case is that contractors doing business with the Government end up bearing all risks of liability to military employees even though the Government is equally, or wholly, at fault in causing their harm.

In addition to the Government fault problem, section 5 of the bill addresses the possibility of catastrophic liability arising out of products or services supplied pursuant to a contract with the U.S. Government. As one of our witnesses ably noted:

> If a catastrophic accident or series of events results from a government project, the liability, and even the defense costs alone, arising from the ensuing lawsuits against the contractors who supply the products or services for the project could easily exceed both the available insurance and the net worth of those contractors. This would, of course, spell financial disaster not only for the contractors involved, but also for victims who would be unable to obtain compensation from the contractors. Although the government presently possesses statutory authority to indemnify its contractors for excessive and unreasonable liability in some situations, the authority is not comprehensive, and its use is not mandatory. The government has not been consistent in using the authority. As a result, conscientious contractors increasingly are deterred from participating in essential procurements involving potential catastrophic risks.

This statement accentuates the need to have legislation establishing a comprehensive program.

On October 18, I will hold another hearing to solicit the views of interested parties on the legislation which follows. I ask unanimous consent that the bill be printed in its entirety.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1839

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This act may be cited as the "Contractor Liability and Indemnification Act."

DECLARATION OF PURPOSE

SEC. 2. It is the purpose of this Act to establish fair and equitable apportionment of liability incurred by contractors with the United States by (i) providing for an equitable reduction of liability in cases in which acts or omissions of employees of the United States are wholly or partially the cause of a contractor's liability to a government employee, and (ii) providing a comprehensive system of complete indemnity for contrac-

tors against liability in excess of reasonably available financial protection.

DEFINITIONS

SEC. 3. As used in this Act—

(1) the term "contractor" means any person who has contracted with the United States to supply a product or service and such person's subcontractors and suppliers at any tier for such purpose;

(2) the term "person" means any individual, corporation (excluding a wholly owned corporation of the United States), company, foundation, association, organization, firm, partnership, society, charitable institution, or State or local unit of government;

(3) the term "claimant" means any person who asserts a claim which gives rise or may give rise to liability;

(4) the term "State" Includes the District of Columbia and all territories or possessions of the United States;

(5) the term "United States" and "contracting agency" means the federal executive agencies and departments, the federal military departments (including any unit or part of the National Guard of any State), independent establishments of the United States, and corporations primarily acting as instrumentalities or agencies of the United States;

(6) the term "liability" means the legally binding obligation to compensate for harm as provided for in final judgments of courts of law, settlements, or arbitration decisions;

(7) the term "harm" means (a) damage to or loss of use of property; (b) personal physical injury, illness, or death; (c) mental anquish or emotional distress resulting from an occurrence of personal physical injury, illness, or death; and/or (d) financial detriment, including loss of revenue or profits or other economic loss; and

(8) the term "fault" means acts or omissions that are in any measure negligent or wrongful with regard to the harm incurred by a claimant.

EQUITABLE REDUCTION OR LIABILITY

SEC. 4. (a) In any civil action brought by an employee of the United States or by the employee's legal representative, estate, spouse, dependent, survivor, or relative in any state court or in any district court of the United States alleging liability of any contractor for harm concerning which the employee or the employee's legal representative, estate, spouse, dependent, survivor, or relative is or has been entitled to receive worker compensation benefits from the United States, upon request of any party the court shall make findings of fact as to the proportion that the fault of the United States bears to the total fault of all persons and the United States in causing harm which gives rise to the claim of liability. The court shall reduce any judgment for liability rendered against the contractor by the proportion of fault of the United States found by the court. The amount the United States is entitled by law to obtain through right of subrogation or subrogation lien arising from worker compensation payments for harm concerning which contractors are or may be held liable shall be reduced by the proportion of fault of the United States in causing the harm.

(b) A contractor against whom a civil action alleging liability is brought shall give written notice to the Attorney General of the United States, within 90 days of the filing of the civil action, if the contractor intends to seek an equitable reduction of liability pursuant to subsection (a) of this section. Except as otherwise directed, the contractor shall promptly furnish to the Attorney General a copy of all pertinent papers received or filed with respect to such civil action. The United States shall have the right, for a period of 90 days following receipt of any such notice, to intervene as a party in any such civil action. Any such civil action commenced in a state court in which the United States has intervened may be removed, at the election of the United States, along with any related pending action by a claimant, without bond at any time before a trial on the merits, to the district court of the United States for the district and division embracing the place wherein the state court action is pending. Should a United States district court determine, pursuant to an evidentiary hearing on a motion to remand held before the trial on the merits, that there is no substantial evidence of any fault on the part of the United States in causing harm to the employee of the government, such civil action shall be remanded to the state court.

(c) In determining the proportion of fault of the United States pursuant to subsection (a) of this section, the court shall consider such evidence of fault as may be introduced by the parties in accordance with the rules of evidence and shall consider, among other relevant factors, the following:

(1) the nature of contract provisions or specifications associated with acts or omissions contributing to the harm, the relative responsibility of the United States and the contractor for the existence of such provisions or specifications, and the relative degree of knowledge, skill and expertise of the contractor and the United States as to potential harm which might be associated with contract performance or non-performance under such provisions or specifications;

(2) the existence of officially promulgated standards of the United States which are associated with acts or omissions contributing to the harm;

(3) the degree to which products or services furnished by the United States to the contractor under the contract are associated with acts or omissions contributing to the harm, and the relative degree of knowledge, skill, and expertise of the contractor and the United States as to potential harm which might be associated with use of such products and services;

(4) acts or omissions in performance of the contract by employees of the contractor or the United States which contribute to the harm and the relative responsibility of the contractor and the United States for the occurrence of such acts or omissions; and

(5) the degree of control or care exercised by the United States in the use, application, and maintenance of products or services after delivery by the contractor.

(d) The provisions of this section supercede any state law regarding matters covered by this section.

INDEMNIFICATION OF CONTRACTORS

SEC. 5. (a) The United States shall include in any contract hereafter made, and may include by amendment or modification in any contract heretofore made, a provision that the United States will hold harmless and indemnify the contractor against any of the claims or losses set forth in subsection (b), whether resulting from the negligence or wrongful act or omission of the contractor or otherwise, except as provided in subsection (b)(2), provided that such provision shall apply only to claims for losses arising out of or resulting from risks that the contract defines as (1) unusually hazardous or nuclear in nature or (2) giving rise to the possibility of liability against which the contractor cannot reasonably protect through private insurance or self-insurance, and provided further that no such provision shall be included in any contract for procurement of goods or services which are sold by the contractor to non-governmental purchasers for uses or applications identical in nature, magnitude, and scope to the uses or applications made or to be made of the goods and services by the United States. A determination of whether the conditions contained in the preceding sentence have been met shall be made in advance by the head of the contracting agency or his designee (who shall be an official at a level not below that of an assistant to the head of the contracting agency). A contractual provision for indemnification may require each contractor so indemnified to provide and maintain financial protection of such type and in such amounts as is determined by the head of the contracting agency or his designee to be appropriate under the circumstances. In determining whether conditions for the use of an indemnification provision have been met and in determining the amount of financial protection to be provided and maintained by the financial protection to be provided and maintained by the indemnified contractor, the appropriate official shall take into account such factors as the availability, cost, and terms of private insurance, self-insurance, other proof of financial responsibility, and worker compensation insurance. The determination of the head of the contracting agency or his designee as to whether conditions for use of a contractual provision for indemnification have been met shall be final for purposes of the judicial review specified in subsection (c).

(b)(1) Subsection (a) of this section shall apply to claims, including reasonable expenses of litigation and settlement, or losses not compensated by insurance or otherwise, of the following types:

(A) claims by third persons, including of the contractor, for death, personal injury, or loss of, damage to, or loss of use of properties;

(B) loss of, damage to, or loss of use of property of the contractor;

(C) loss of, damage to, or loss of use of property of the government; and

(D) claims arising (1) from indemnification agreements between the contractor and a subcontractor or subcontractors, or (ii) from such arrangements and further indemnification arrangements between subcontractors at any tier, provided that all such arrangements were entered into pursuant to procedures prescribed or approved by the contracting agency.

(2) Indemnification and hold harmless agreements entered into pursuant to this section, whether between the United States and a contractor, or between a contractor and a subcontractor, or between two subcontractors, shall not cover claims or losses caused by the willful misconduct or lack of good faith on the part of any of the contractor's or subcontractor's directors or officers or principal officials. For purposes of this subsection, the term "principal officials" means any of the contractor's managers, superintendents or other equivalent representatives who have supervision or direction of (A) all or substantially all of the contractor's business, (B) all or substantially all of the contractor's operations at any one plant or separate location in which a contract is being performed, or (C) a separate and complete major industrial operation in connection with the performance of a contract.

(3) The United States may discharge its obligation under the contractual provision authorized by subsection (a) of this section by making payments directly to contractors or subcontractors or to third persons to whom a contractor or subcontractor may be liable.

(c) A contractual provision under subsection (a) of this section which provides for indemnification must also provide for—

(1) notice to the United States of any claim or action against, or any loss by, the contractor or subcontractor covered by such contractual provision; and

(2) control or assistance by the United States, at its election, in the settlement or defense of any such claim or action.

(d) Upon application by a contractor or subcontractor, each contracting agency shall determine, or upon its own initiative, eash contracting agency may determine, after opportunity for a hearing (in accordance with Section 553 of Title 5, United States Code), whether any past, present, or future contract or class or category of contracts involves risks of the type set forth in subsection (a) of this section.

(e) Any contractor or subcontractor aggrieved by any decision or determination of the contracting agency pursuant to subsection (a) or subsection (d) of this section may, within sixty days of such decision or determination, petition the United States Court of Appeals for the Federal Circuit to review such decision or determination. The decision or determination of the contracting agency with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive.

(f) The provisions of Sections 1431-1436, Title 50, United States Code, shall not apply to indemnification of contractors as provided in this section. The provisions of Section 2354, Title 10, United States Code, are hereby repealed. Section 241(a)(7), Title 42, United States Code, is hereby amended to delete the reference to Section 2354, Title 10, United States Code. The provisions of this section shall not apply to any risks against which indemnification may be obtained pursuant to Section 2210, Title 42, United States Code.

(g)(1) Notwithstanding the provisions of Section 665, Title 31 or Section 11, Title 41, United States Code, contracting agencies are hereby authorized to make indemnification payments pursuant to any indemnification provisions of their contracts from (A) funds obligated for the performance of the contract from which the contractor's liability arises; (B) funds currently available for contracts of the nature of the contract from which the contractor's liability arises, and not otherwise obligated; (C) funds specifically appropriated for such payments; and/or (D) funds appropriated pursuant to Section 724(a), Title 31, United States Code.

(2) The Supplemental Appropriations Act, Section 724(a), Title 31, United States Code, is hereby amended by adding the words "and Section 5 of the Contractor Liability and Indemnification Act" after the words "or 2677 of Title 28."

EFFECTIVE DATE

SEC. 6. This Act shall be effective as of the date it is signed into law by the President.●

By Mr. BENTSEN:

S. 1840. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for dividends paid by certain small businesses, to provide simplification in accounting rules related to inventory, to reduce the capital gain tax rates for individuals who hold new issues of stock at least 5 years, and to remove the limitation on the amount of used property for which the investment tax credit is allowable; to the Committee on Finance.

SMALL BUSINESS CAPITAL FORMATION AND INVENTORY SIMPLIFICATION TAX ACT OF 1983

Mr. BENTSEN. Mr. President, today I am introducing a program targeted at the most important sector of our economy—the small business community. Small business accounts for almost half of our gross national product and creates 60 percent of the new jobs for American workers. My bill today addresses the fundamental problems confronting the continued strong economic growth of small business: Capital formation, inventory reform, and equipment obsolescence. These issues have become a primary concern of the independent business community.

My bill will allow a business to deduct the first $250,000 of a dividend distribution. This provision will enable small business to attract new capital. By permitting a deduction for dividend distributions the investor is encouraged to take an equity interest in the business rather than a debt interest. This will help prevent undercapitalization of corporations and strengthen the debt-to-equity ratio of newly formed corporations. In addition, this provision will allow small business the benefit of being organized in corporate form while being taxed on the first $250,000 of earnings in the same manner as a sole proprietorship or partnership.

Mr. President, the current economic climate is not a good one for small business. Projected budget deficits threaten to absorb a higher and higher percentage of net private saving available for investment. Current high interest rates make the cost of borrowing money too high for many firms. Companies that rely on external sources of funds, such as bank loans or the capital markets, for investment and expansion, need relief.

Inventory accounting reform is one method of relief for a company in this financial position. My bill fosters capital formation by increasing the internal cash flow and retained earnings of a business.

The impacts of inventory accounting reform appear in increased cash flows and improved profits, especially in the reduction in income under LIFO accounting. Inventory, especially wholesale and retail, has been steadily increasing as a percentage of total assets. Furthermore, inventory-intensive industries have increased in employment by more than 5 million since 1970. This suggests that inventory accumulation and distribution is playing an increasingly larger role in the economy. Consequently, the tax and accounting provisions regarding inventory will have substantial economic impact.

Corporate cash flows have increased steadily since 1961. The marginal increase has been dramatic, however, since 1974, as more and more companies have adopted LIFO—last in, first out—accounting. More recently, constant dollar cash flows, which stood at $147.9 billion in January 1979, increased to $155.2 billion a year later, an increase of 4.9 percent. During the same period, output grew only 2.7 percent. Hence, new inventory accounting has made the business industry more liquid.

However, as of 1976, less than 4 percent of manufacturers used LIFO; less than 2 percent of retailers used it. Why is this? In a study by the National Association of Wholesaler-Distributers, the most frequent responses were: "Too complex and too costly." Let me give a short explanation that will illustrate the point.

Tax regulations provide that a taxpayer must keep inventories in which the production, purchase, or sale of merchandise is an income-producing factor. There are two accrual methods for determining the cost of items in the closing inventory: FIFO—first in, first out, and LIFO—last in, first out. The preferred method, in times of inflation, is LIFO because it more realistically relates cost plus inflation to income. However, for tax purposes, LIFO has extensive and detailed accounting and recordkeeping requirements. For example, indexing:

The determination of an individual index is not only complex, it is also burdensome. The double-extension method of determining an individual index requires the inventory to be priced out on a unit basis twice; once to determine the base-year unit cost, and a second time, to determine the end-of-year unit cost. The end-of-year cost is then divided by the base-year cost to determine the index number which, in turn, determines the amount of the LIFO reserve.

In an inventory of 10,000 items—relatively common of wholesaler-distributors—such calculations are overwhelming.

Pooling is another example of LIFO complexity. Present LIFO income tax regulations require the creation of pools, each pool containing products similar in nature. The pools are then used to determine the increase or decrease in the LIFO inventory.

In fact the Department of Treasury has in the past acknowledged the complexity, and on one appearance before Congress, former Deputy Assistant Treasury Secretary for Tax Policy, Dan Halperin stated:

Small business has a legitimate complaint that the current complexity in the use of

LIFO effectively denies them its benefits. The administration supports the need to simplify the LIFO rules for small businesses to make them more available.

Inventory reform is one way of easing the capital formation burdens placed on small business.

In recognition of the need to foster business capital formation, the following provisions of the tax law on accounting for inventory are particularly burdensome and, therefore, should be revised. My bill would accomplish those objectives as follows:

First. Repeal the LIFO conformity requirement. Under the current law, a business using LIFO must keep its financial statements and its tax statements the same. In other words, it cannot use LIFO for financial purposes and, at the same time, use FIFO for tax purposes.

Second. Alleviating the initial penalty associated with the LIFO election. If a business wants to elect LIFO, it is required to restore to cost inventory write-downs taken in prior years. Thus, a business that restores inventory write-downs to costs due to its desire to elect LIFO, has a larger bill due and payable over the next 3 years. To alleviate the severe drain on a business when it elects LIFO, it would be permitted to restore inventory write-downs to income over a 10-year period.

Third. Simplification of inventory pooling requirements. The current LIFO pooling requirements are a regulatory burden on wholesalers and retailers. These businesses are forced to keep complex records based on the pooling requirement to group items of inventory by major classes of goods. Manufacturers, on the other hand, use a natural business unit—one pool. In a massive simplification of the law, small businesses with less than $4 million in gross receipts would be permitted to use one pool for LIFO. Wholesalers and retailers would be permitted to pool their goods according to the general expenditure categories of consumer goods described in the CPI detailed report or the 15 major PPI commodity categories listed in the PPI detailed report.

Fourth. Permitting businesses to use regularly published Government price indexes. Developing an internal price index is costly and complex.

Fifth. Permitting businesses to use certain internal indexes, without being forced to show that other methods are unsuitable or impractical. Current tax regulations place certain limitations on the type of internal price index a business may use for LIFO. For businesses wanting to continue to use internal price indexes under LIFO, this bill would broaden the choice of internal indexes.

Six. Repeal of 403(b) of the crude oil windfall profit tax of 1980. This provision requires a corporation to recapture its LIFO benefit as ordinary income in certain specified situations. In general this recapture occurs when a corporation distributes its LIFO inventory in a partial or complete liquidation of the business.

Seventh. Cash receipts and disbursements method, cash method of accounting. A business may elect the cash method if its gross receipts are less than $1.5 million and if it meets the active participant test. In general, an active participant is someone who is actively involved in management and whose principal business activity is such trade or business.

Economic growth in our Nation depends upon the availability of a sufficient supply of capital for the risk-takers and the entrepreneurs who have the initiative to start new businesses and to develop imaginative new ideas. My bill, today, also includes a provision that will promote the steady and constant availability of new capital for investment and expansion by the small business community. My provision entitles a taxpayer to a reduced capital gains tax, at a maximum effective rate of 10 percent, upon the sale or exchange of stock in a company if such stock was held for at least 5 years, and acquired through an initial or principal stock offering.

Current law regarding the taxation of long-term capital gains requires that an investment be held for more than a year before the investor qualifies for lower tax rates on his profits from investment. In the general explanation of the Tax Reform Act of 1976, which increased the holding period from 6 months to 1 year, the Joint Tax Committee noted that there should be special tax treatment for gains on assets held for investment, and not speculative profit. My bill would promote investment in new small businesses since the realization of gains from venture capital investments would require an extended holding period, in this case, 5 years. Under this provision, since investors would have a greater incentive to realize long-term capital gains than current income, businesses would be encouraged to plow back earnings to achieve greater growth rather than disbursing their earnings to pay dividends.

We must encourage the continued growth of our small businesses. These small, high-growth businesses are essential for the continued economic recovery. In 1982, I requested a study by the General Accounting Office titled, "Government-Industry Cooperation Can Enhance the Venture Capital Process." This study identified the benefits generated by high-growth companies, which include creation of thousands of new high-quality jobs, increases in Federal, State, and local tax receipts, stimulation of supplier and allied firms, augmentation of R&D expenditures, and generation of higher export earnings.

My bill also addresses an issue that faces many small businesses; the problems of equipment obsolescense and the current investment tax credit limitation on used machinery and equipment.

Many small businesses acquire amounts of used property, particularly small manufacturers. Traditionally, used machinery and equipment is acquired from large manufacturers and resold to small manufacturers who cannot afford the high price of new capital equipment. A small manufacturer can increase his output by purchasing additional used machinery and increase his productivity by purchasing newer models of used machinery. My proposal will eliminate the limitation on the investment tax credit which is available to purchasers of used machinery and equipment. This will provide a tax incentive to the small businessman to replace current equipment with used machines that are either more sophisticated or more appropriate for his operation. This measure will insure that small businesses make the capital investments necessary to remain competitive during this economic resurgence.

Under current law, there is a $125,000 limitation on the amounts of used equipment eligible for the investment tax credit, but there is no limitation on the investment tax credit available for new equipment. This ceiling will increase to $150,000 in 1985. Similarly, the same carryback/carryforward provisions available for new equipment are not allowed to purchasers of used equipment. This means that purchasers of used equipment may not carryback or carryforward tax credits on investment over the limitation amount.

Since the original $50,000 ceiling was established in 1962, the cost of basic, unsophisticated used equipment has increased by over 500 percent. It would cost over $600,000 to start a small machine shop which employs 10 people. If a large company purchased $600,000 of new equipment, it would receive an investment tax credit of $60,000—10 percent of $600,000. If a small firm bought $600,000 of used equipment, it would receive an investment tax credit of $12,500—10 percent of $125,000.

In addition, a purchaser of new equipment would be able to carryback 3 years and carryforward 15 years the part of the investment tax credit on the $600,000 purchase which it cannot use in the year of purchase. The small business, on the other hand, which purchased used equipment, would be able to carryback and carryforward only the $12,500 which is allowed as a result of the limitation. The $475,000 in excess of the limit would receive no investment tax credit in any year. This

example clearly illustrates the discriminatory impact this limitation has on small business.

Furthermore, an established manufacturer will hardly have begun to retool before he realizes that the $125,000 ceiling offers him very little assistance at all. The original arbitrary and inadequate limit of $50,000 was merely a token gesture to small business and, in light of inflation, doubling the limit to $100,000 13 years later, and to $125,000, 6 years after that, has perpetuated the injustice.

This discriminatory tax treatment impacts directly and primarily upon small businesses which are already hindered by their inability to externally or internally generate the capital necessary to buy equipment. Since small businesses cannot generally afford new machinery, they require the quick passage of tax incentives which will enable them to buy the used equipment they need for the expansion of their current business, or the creation of a new enterprise.

We cannot maintain a healthy, competitive and growing economy unless there is enough capital available for the risktakers and the entrepreneurs who want to expand their ideas into businesses. We must also insure that these small businesses receive equitable tax treatment. These businesses represent the backbone of the American economy. The key building block for the emerging small businesses is capital. Without adequate incentives for capital formation and investment, the ongoing function of nurturing new and existing small businesses will cease. My bill provides those incentives.

I urge my colleagues to cosponor this bill, and Congress to act quickly on this legislation.

Mr. President, I ask unanimous consent that the bill be printed immediately following my statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows;

S. 1840

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Small Business Capital Formation and Inventory Simplification Tax Act of 1983".

SEC. 2. DIVIDENDS PAID DEDUCTIONS.

(a) IN GENERAL.—Part VIII of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to special deductions for corporations) is amended by adding at the end thereof the following new section:

"SEC. 251. DEDUCTION FOR DIVIDENDS PAID BY CERTAIN SMALL BUSINESSES.

"(a) IN GENERAL.—In the case of a qualified small business corporation, there shall be allowed as a deduction an amount equal to the lesser of—

"(1) the amount of dividends paid by such corporation during the taxable year, or

"(2) $250,000.

"(b) DIVIDENDS TAKEN INTO ACCOUNT.—

"(1) REQUIREMENTS.—A dividend shall be taken into account under this section only if—

"(A) it is paid in cash (or is a consent dividend meeting requirements similar to those of section 565),

(B) it is pro rata, with no preference to any share of stock as compared with other shares of the same class, and with no preference to 1 class of stock as compared with another class except to the extent that the former is entitled (without reference to waivers of their rights by shareholders) to such preference, and

"(C) it is not in redemption or in partial or complete liquidation.

"(2) DIVIDENDS PAID AFTER CLOSE OF TAXABLE YEAR.—For purposes of this section, a dividend paid after the close of any taxable year and on or before the 15th day of the 3d month following the close of such taxable year shall, to the extent the corporation elects in its return for the taxable year, be considered as paid during such taxable year.

"(3) EXCEPTION FOR DIVIDENDS ON CERTAIN PREFERRED STOCK.—For purposes of this section, the term 'dividend' includes a distribution with respect to stock of a class which is not common stock only if—

"(A) the corporation first issued stock in that class after the date of the enactment of this section, and

"(B) the corporation makes an election to have stock of that class taken into account under this section.

"(c) QUALIFIED SMALL BUSINESS CORPORATION.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified small business corporation' means, with respect to any taxable year, a domestic corporation the average annual gross receipts of which do not exceed $5,000,000 for the 3-taxable-year period ending with the taxable year.

"(2) CERTAIN CORPORATIONS EXCLUDED.—The term 'qualified small business corporation' shall not include any corporation which is—

"(A) an insurance company subject to tax under subchapter L,

"(B) a corporation subject to tax imposed by subchapter M (relating to regulated investment companies and real estate trusts),

"(C) a corporation to which an election under section 936 applies,

"(D) a DISC or former DISC, or

"(E) an organization to which part I of subchapter T (relating to tax treatment of cooperatives) applies.

"(3) SERVICE CORPORATIONS NOT ELIGIBLE.—The term 'small business corporation' shall not include any corporation the principal function of which is the performance of services in the field of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting.

"(d) SPECIAL RULES.—

"(1) CONTROLLED GROUPS.—In the case of a taxpayer which is a member of a controlled group (within the meaning of section 52(a)), all persons which are component members of such groups at any time during the calendar year shall be treated as one taxpayer for such year for purposes of determining the gross receipts of, and dividends paid by, the taxpayer.

"(2) SPECIAL RULE WHERE 20 PERCENT OR MORE OF DIVIDENDS IS PAID TO TAX-EXEMPTS OR ACCUMULATION TRUSTS.—A corporation shall not be treated as a small business corporation for any taxable year during which 20 percent or more of the dividends paid by the corporation are paid (directly or indirectly) to one or more of the following:

"(A) persons which are exempt from tax under section 501, or

"(B) any trust unless, under the terms of the trust, all of its income is required to be distributed currently.

"(3) TREATMENT OF DIVIDENDS.—

"(A) IN GENERAL.—The deductible portion of any dividend paid by a qualified small business corporation during any taxable year shall not be treated as a dividend for purposes of sections 116 and 243.

"(B) DEDUCTIBLE PORTION.—For purposes of subparagraph (A), the deductible portion of any dividend is an amount equal to such dividend multiplied by a fraction—

"(i) the numerator of which is the amount allowed as a deduction under subsection (a), and

"(ii) the denominator of which is the aggregate amount of the dividends paid by the corporation during the taxable year.".

(b) CONFORMING AMENDMENTS.—

(1) Section 243 of such Code (relating to deduction for dividends received by corporations) is amended by adding at the end thereof the following new subsection:

"(e) CROSS REFERENCE.—

"For adjustment to deduction where dividends paid deduction allowed under section 251, see section 251(d)(3).".

(2) Section 116 of such Code (relating to partial exclusion of dividends received by individuals) is amended by adding at the end thereof the following new subsection:

"(d) CROSS REFERENCE.—

"For adjustment to exclusion where dividends paid deduction allowed under section 251, see section 251(d)(3).".

(c) CLERICAL AMENDMENT.—The table of sections for part VIII of subchapter B of chapter 1 of such Code is amended by adding at the end thereof the following new item:

"Sec. 251. Deduction for dividends paid by certain small businesses.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1983.

SEC. 3. REPEAL OF REQUIREMENT THAT THE LIFO METHOD USED FOR TAX PURPOSES CONFORM TO THE ACCOUNTING METHOD USED FOR FINANCIAL PURPOSES.

Section 472 of the Internal Revenue Code of 1954 (relating to last-in, first-out inventories) is amended by striking out subsections (c) and (e) and by redesignating subsections (d) and (f) as subsections (c) and (d), respectively.

SEC. 4. 10-YEAR AVERAGING PERMITTED FOR INCREASES IN INVENTORY VALUE REQUIRED FOR ADOPTION OF LIFO METHOD.

Subsection (b) of section 472 of the Internal Revenue Code of 1954 (relating to last-in, first-out inventories) is amended by adding at the end thereof the following new sentence: "In the case of a taxpayer who changes its method of accounting by reason of an election under this subsection, under regulations prescribed by the Secretary, the net amount of adjustments required by section 481(a)(2) to be taken into account by the taxpayer in computing taxable income shall be so taken into account in each of the 10 taxable years beginning with the year of change.".

SEC. 5. INVENTORY POOLING REQUIREMENTS.

(a) SMALL BUSINESSES ELIGIBLE TO USE ONE INVENTORY POOL.—Subsection (b) of section 474 of the Internal Revenue Code of 1954 (defining eligible small business) is amended by striking out "$2,000,000" and inserting in lieu thereof "$4,000,000".

(b) SIMPLIFICATION OF INVENTORY POOLING REQUIREMENTS FOR WHOLESALERS AND RETAILERS.—Section 472 of the Internal Revenue Code of 1954 (relating to last-in, first-out inventories), as amended by section 3, is amended by adding after subsection (d) the following new subsection:

"(e) USE OF GOVERNMENT PRICE INDEX CATEGORIES IN DETERMINING INVENTORY POOLS.—

"(1) IN GENERAL.—Any taxpayer—

"(A) who is a wholesaler or retailer in any trade or business, and

"(B) who uses the dollar value method of pricing inventories under the method provided by section 472(b),

may elect to use inventory pools in such trade or business based on the applicable Government price index categories for all items of inventory of the taxpayer in such trade or business.

"(2) DEFINITIONS.—For purposes of this subsection—

"(A) WHOLESALER AND RETAILER.—The terms 'wholesaler' and 'retailer' mean any taxpayer who purchases goods for resale in the ordinary course of his trade or business, without any further manufacturing or processing of such goods.

"(B) APPLICABLE GOVERNMENT PRICE INDEX CATEGORY.—The term 'applicable Government price index category' means any category—

"(i) which is one of the general expenditure categories of consumer goods described in the CPI detailed report, or the 15 major commodity categories listed in the PPI detailed report.

"(ii) which includes the items of inventory being pooled, and

"(iii) which is selected by the taxpayer.

"(C) CPI OR PPI DETAILED REPORT.—The term 'CPI or PPI detailed report' means the reports so named published by the Bureau of Labor Statistics.

"(3) ELECTION.—

"(A) IN GENERAL.—The election under this subsection, and the selection of applicable government price index categories—

"(i) shall apply to the taxable year for which made and to all subsequent taxable years,

"(ii) once made, may be revoked only with the consent of the Secretary, and

"(iii) shall be made at such time and in such manner as the Secretary shall by regulations prescribe.

"(B) TRANSITIONAL RULES.—The rules of section 474(c)(3) shall apply to an election under this subsection and to the cessation of such election.".

(c) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1983.

SEC. 6. METHOD OF COMPUTING LIFO VALUE OF DOLLAR-VALUE POOL MAY BE USED WITHOUT SHOWING OTHER METHODS ARE UNSUITABLE OR IMPRACTICAL

Section 472 of the Internal Revenue Code of 1954 (relating to last-in, first-out inventories), as amended by sections 3 and 5, is amended by adding at the end thereof the following new subsection:

"(f) USE OF LINK-CHAIN METHOD, ETC., PERMITTED WITHOUT SHOWING OTHER METHODS ARE UNSUITABLE OR IMPRACTICAL.—Any taxpayer may elect to use a link chain or index method of computing the LIFO value of any dollar-value pool without any showing that any other such method is unsuitable or impractical.".

SEC. 7. REPEAL OF LIFO BENEFIT RECAPTURE WHERE PARTIAL OR COMPLETE LIQUIDATION.

(a) AMENDMENT OF SECTION 336.—

(1) IN GENERAL.—Subsection (b) of section 336 of the Internal Revenue Code of 1954 (relating to distributions of property in liquidation) is hereby repealed.

(2) TECHNICAL ADMENDMENT.—Subsection (a) of section 336 of such Code is amended by striking out "(a) GENERAL RULE.—Except as provided in subsection (b) of this section and" and inserting in lieu thereof the following: "Except as provided".

(b) SECTION 337 LIQUIDATIONS.—

(1) IN GENERAL.—Subsection (f) of section 337 of such Code (relating to special rules for LIFO inventories) is hereby repealed.

(2) CONFORMING AMENDMENT.—The last sentence of section 453B(d)(2) of such Code (relating to liquidations to which section 337 applies) is hereby repealed.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to distributions and dispositions pursuant to plans of liquidation adopted after December 31, 1983.

SEC. 8. CERTAIN SMALL BUSINESSES PERMITTED USE OF CASH RECEIPTS AND DISBURSEMENTS METHOD OF ACCOUNTING WITHOUT REGARD TO INVENTORIES

(a) IN GENERAL.—Section 471 of the Internal Revenue Code of 1954 (relating to general rule for inventories) is amended by adding at the end thereof the following:

"(b) ELECTION BY CERTAIN SMALL BUSINESSES TO USE CASH RECEIPTS AND DISBURSEMENTS METHOD OF ACCOUNTING.—

"(1) IN GENERAL.—A taxpayer may elect for the taxable year the cash receipts and disbursements method of accounting for a trade or business of the taxpayer without regard to any requirement to use inventories if—

"(A) the average annual gross receipts of the taxpayer do not exceed $1,500,000 for the 3 taxable years ending with the taxable year, and

"(B) such taxpayer is a qualified small business for each of such 3 taxable years.

"(2) QUALIFIED SMALL BUSINESS DEFINED.—For purposes of this subsection, the term 'qualified small business' means a person engaged in a trade or business if, at all times during the taxable year, active participants in such trade or business own—

"(A) in the case of trade or business other than a corporation, at least 50 percent of the capital and profits interests in such trade or business, and

"(B) in the case of a corporation—

"(i) stock possession at least 50 percent of the total combined voting power of all classes of stock of the corporation entitled to vote, and

"(ii) at least 50 percent of the total value of shares of all other classes of stock of the corporation.

"(3) ACTIVE PARTICIPANT.—For purposes of this subsection, the term 'active participant' means an individual—

"(A) who is actively involved in the management of the trade or business, and

"(B) whose principal business activity is such trade or business.

"(4) SPECIAL RULES.—For purposes of this subsection—

"(A) CONTROLLED GROUPS.—

"(i) IN GENERAL.—In the case of a taxpayer which is a member of a controlled group, all persons which are component members of such group at any time during the calendar year shall be treated as 1 taxpayer for such year for purposes of determining the gross receipts of the taxpayer.

"(ii) CONTROLLED GROUP DEFINED.—Persons shall be treated as being members of a controlled group if such persons would be treated as a single employer under the regulations prescribed under section 52.

"(B) COORDINATION WITH SECTION 481.—In the case of a taxpayer who changes its method of accounting by reason of an election under this subsection, under regulations prescribed by the Secretary, the net amount of adjustments required by section 481(a)(2) to be taken into account by the taxpayer in computing taxable income shall be so taken into account in each of the 10 taxable years beginning with the year of change.

"(C) ELECTION.—

"(i) IN GENERAL.—The election under this subsection may be made without the consent of the Secretary and shall be made at such time and in such manner as the Secretary may by regulations prescribe.

"(ii) PERIOD TO WHICH ELECTION APPLIES.—The election under this subsection shall apply—

"(I) to the taxable year for which it is made, and

"(II) for all subsequent taxable years for which the taxpayer is a qualified small business and meets the requirements of subparagraphs (A) and (B) of paragraph (1),

unless the taxpayer secures the consent of the Secretary to the revocation of such election."

(b) TECHNICAL AMENDMENT.—Section 471 of such Code is amended by striking out "Whenever in the opinion" and inserting in lieu thereof the following:

"(a) GENERAL RULE.—Except as provided in subsection (b), whenever in the opinion".

SEC. 9. EFFECTIVE DATE.

Except as otherwise provided in this Act, the amendments made by this Act shall apply to taxable years beginning after the date of the enactment of this Act.

SEC. 10. 80 PERCENT CAPITAL GAINS DEDUCTIONS ATTRIBUTABLE TO NEW ISSUES OF STOCK HELD AT LEAST 5 YEARS.

(a) IN GENERAL.—Section 1202 of the Internal Revenue Code of 1954 (relating to deduction for capital gains) is amended—

(1) by amending subsection (a) to read as follows:

"(1) IN GENERAL.—If for any taxable year a taxpayer other than a corporation has net capital gain, there shall be allowed as a deduction from gross income an amount equal to the sum of—

"(A) 80 percent of the lesser of—

"(i) the net capital gain, or

"(ii) the qualified net capital gain, plus

"(B) 60 percent of the excess (if any) of—

"(i) the net capital gain, over

"(ii) the amount of the qualified net capital gain taken into account under subparagraph (A).", and

(2) by inserting after subsection (c) the following new section:

"(d) QUALIFIED NET CAPITAL GAIN.—

"(1) IN GENERAL.—For purposes of subsection (a), the term 'qualified net capital gain' means the amount of net capital gain which would be computed for any taxable year if, in determining net long-term capital gain for such taxable year, only qualified issues of stock held by the taxpayer for at least 5 years at the time of the sale or exchange were taken into account.

"(2) QUALIFIED ISSUES OF STOCK.—For purposes of subsection (d), the term 'qualified issues of stock' means issues of stock which—

"(A) are publicly or privately offered through an initial stock offering by any corporation,

"(B) are purchased from the initial offeror, underwriter, broker, or agent and

"(C) represent contributions to capital or paid-in surplus of such corporation.".

SEC. 11. EFFECTIVE DATE.

The amendments made by section 10 of this Act shall apply to sales or exchanges after December 31, 1983.

SEC. 12. REMOVE THE LIMITATION ON THE AMOUNT OF USED PROPERTY FOR WHICH THE INVESTMENT TAX CREDIT IS ALLOWABLE.

(a) subsection (c) of section 48 of the Internal Revenue Code of 1954 (relating to used section 38 property) is amended by striking out paragraph (2) and by redesignating paragraph (3) as paragraph (2).

(b) The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1983.

By Mr. THURMOND (by request):

S. 1841. A bill to promote research and development, encourage innovation, stimulate trade, and make necessary and appropriate amendments to the antitrust, patent, and copyright laws; to the Committee on the Judiciary.

NATIONAL PRODUCTIVITY AND INNOVATION ACT OF 1983

Mr. THURMOND. Mr. President, at the request of the President, I am today introducing the National Productivity and Innovation Act of 1983. Designed to promote research and development, encourage innovation, and stimulate trade, this bill amends our Federal antitrust, patent, and copyright laws. As chairman of the Committee on the Judiciary, I welcome the opportunity to study this bill, and promise that it will receive full and fair consideration by the committee. Our first hearing on the administration's proposal will be held on October 3 of this year.

Mr. President, I ask unanimous consent that the bill, as well as a section-by-section analysis prepared by the administration be printed in the administration be printed in the CONGRESSIONAL RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1841

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—SHORT TITLE

SEC. 101. This Act may be cited as the "National Productivity and Innovation Act of 1983".

TITLE II—JOINT RESEARCH AND DEVELOPMENT VENTURES

SEC. 201. For purposes of this Title—

(1) the term "joint research and development program" means—

(A) theoretical analysis, exploration, or experimentation, or

(B) the extension of investigative findings and theories of a scientific or technical nature into practical application, including the experimental production and testing of models, devices, equipment, materials, and processes;

to be carried out by two or more independent persons; *Provided*, That for purposes of this Title, such a program may include the establishment of facilities for the conduct of research, the collecting and exchange of research information, the conduct of research on a protected and proprietary basis, the prosecution of applications for patents, the granting of licenses, and any other conduct reasonably necessary and appropriate to such program;

(2) the term "antitrust laws" has the meaning given it in Section 1 of the Clayton Act (15 U.S.C. § 12), except the term shall also include Section 5 of the Federal Trade Commission Act (15 U.S.C. § 45) to the extent that said Section 5 applies to unfair methods of competition;

(3) the term "Attorney General" means the Attorney General of the United States; and

(4) the term "Commission" means the Federal Trade Commission.

SEC. 202. No joint research and development programs shall be deemed illegal per se in any action under the antitrust laws.

SEC. 203. (a) Notwithstanding the provisions of Section 4 of the Clayton Act (15 U.S.C. § 15), any person entitled to recovery in an action under said Section 4 based on conduct that is part of a research and development program and that is engaged in after a notification disclosing such conduct has been filed with the Attorney General and the Commission pursuant to Section 204 shall recover the actual damages by him sustained, interest calculated in accordance with the provisions of Section 1961 of Title 28, United States Code, on such actual damages for the period beginning on the date of service of such person's pleading setting forth a claim under the antitrust laws and ending on the date of judgment, such interest to be adjusted by the court if it finds that the award of all or part of such interest is unjust in the circumstances, and the cost of suit, including a reasonable attorney's fee.

(b) Notwithstanding the provisions of Section 4C of the Clayton Act (15 U.S.C. § 15c), and State entitled to monetary relief in an action under said Section 4C based on conduct that is part of a research and development program and that is engaged in after a notification disclosing such conduct has been filed with the Attorney General and the Commission pursuant to Section 204 shall be awarded as monetary relief the total damage sustained as described in paragraph (1) of subsection (a) of said Section 4C, interest calculated in accordance with the provisions of Section 1961 of Title 28, United States Code, on such total damage for the period beginning on the date of service of such State's pleading setting forth a claim under the antitrust laws and ending on the date of judgment, such interest to be adjusted by the court if it finds that the award of all or part of such interest is unjust in the circumstances, and the cost of suit, including a reasonable attorney's fee.

SEC. 204. (a) Any person participating in a joint research and development program may file with the Attorney General and the Commission a notification disclosing such program. Such notificatior shall specify the identity of the parties participating in the program, the nature, scope and duration of the program, and any and all ancillary agreements or understandings. Only conduct specified in a notification filed pursuant to this section shall be entitled to the protections of Section 203.

(b)(1) Except as provided in subsection (d), within 30 days of the filing of any notification pursuant to this section, the Commission shall cause to be published in the Federal Register notice of such notification, describing in general terms the participants, the program, and its objectives.

(2) Except as provided in subsections (c) and (d), all information and documentary material submitted as part of a notification filed pursuant to this section shall be available to the public upon request within 30 days after their submission to the Attorney General and the Commission.

(c) Any person filing a notification pursuant to this section may request that information or documentary material submitted as part of such notification not be made public. Any such request shall specify precisely what information or documentary material should not be made public, state the minimum period of time during which nondisclosure to the public is considered necessary, and justify the request for nondisclosure to the public both as to content and time. The Attorney General and the Commission shall consult with one another with respect to any such request, and each in its sole discretion shall make a final determination as to whether good cause for nondisclosure to the public has been shown. Any information or documentary material that is withheld from disclosure to the public pursuant to this subsection shall be exempt from disclosure under Section 552 of Title 5, United States Code.

(d) Any person who has filed a notification pursuant to this section may withdraw such notification prior to the time at which notice of such notification is published in the Federal Register and information and documentary material submitted as part of such notification is made publicly available pursuant to subsection (b). Any notification so withdrawn shall have no force or effect, notice of such notification shall not be published in the Federal Register, and no information or documentary material submitted as part of such notification shall be made publicly available.

(e) Actions taken or not taken by the Attorney General or Commission in response to or with respect to notifications filed pursuant to this section, including without limitation determinations regarding the content of notices published or to be published in the Federal Register pursuant to subsection (b), the withholding from public disclosure of information or documentary material pursuant to subsection (c), and whether to institute antitrust or other investigations or enforcement actions shall not be subject to judicial review.

TITLE III—INTELLECTUAL PROPERTY LICENSING UNDER THE ANTITRUST LAWS

SEC. 301. The Clayton Act, as amended (15 U.S.C. § 12 et seq.), is amended by renumbering Section 27 as Section 28 and by adding the following new Section 27:

"SEC. 27. (a) Agreements to convey rights to use, practice, or sublicense patented inventions, copyrights, trade secrets, trademarks, know-how, or other intellectual property shall not be deemed illegal per se in actions under the antitrust laws.

"(b)(i) Notwithstanding the provisions of Section 4 of this Act, any person entitled to recovery in an action under said Section 4 based on an agreement described in subsection (a) of this section shall recover the actual damages by him sustained, interest calculated in accordance with the provisions of Section 1961 of Title 28, United States Code, on such actual damages for the period

beginning on the date of service of such person's pleading setting forth a claim under the antitrust laws and ending on the date of judgment, such interest to be adjusted by the court if it finds that the award of all or part of such interest is unjust in the circumstances, and the cost of suit, including a reasonable attorney's fee.

(ii) Notwithstanding the provisions of Section 4C of this Act, any State entitled to monetary relief in an action under said Section 4C based on an agreement described in subsection (a) of this section shall be awarded as monetary relief the total damage sustained as described in paragraph (1) of subsection (a) of said Section 4C, interest calculated in accordance with the provisions of Section 1961 of title 28, United States Code, on such total damage for the period beginning on the date of service of such State's pleading setting forth a claim under the antitrust laws and ending on the date of judgment, such interest to be adjusted by the court if it finds that the award of all or part of such interest is unjust in the circumstances, and the cost of suit, including a reasonable attorney's fee.".

TITLE IV—PATENT AND COPYRIGHT MISUSE

SEC. 401. Section 271 of Title 35, United States Code, is amended—

(a) by redesignating subsection (c) as paragraph (c)(1);

(b) by redesignating subsection (d) as paragraph (c)(2); and

(c) by adding the following new subsection (d):

"(d) No patent owner otherwise entitled to relief for infringement or contributory infringement of a patent shall be denied relief or deemed guilty of misuse or illegal extension of the patent right by reason of his having done one or more of the following, unless such conduct, in view of the circumstances in which it is employed, violates the antitrust laws: (1) licensed the patent under terms that affect commerce outside the scope of the patent's claims, (2) restricted a licensee of the patent in the sale of the patented product or in the sale of a product made by the patented process, (3) obligated a licensee of the patent to pay royalties that differ from those paid by another licensee or that are allegedly excessive, (4) obligated a licensee of the patent to pay royalties in amounts not related to the licensee's sales of the patented product or a product made by the patented process, (5) refused to license the patent to any person, or (6) otherwise used the patent allegedly to suppress competition.".

SEC. 402. Subsection (a) of Section 501 of Title 17, United States Code, is amended by adding at the end thereof the following:

"No copyright owner otherwise entitled to relief for infringement of a copyright under this Title shall be denied relief or deemed guilty of misuse or illegal extension of the copyright by reason of his having done one or more of the following, unless such conduct, in view of the circumstances in which it is employed, violates the antiturst laws: (1) licensed the copyright under terms that affect commerce outside the scope of the copyright, (2) restricted a licensee of the copyright in the sale of the copyrighted work, (3) obligated a licensee of the copyright to pay royalties that differ from those paid by another licensee or that are allegedly excessive, (4) obligated a licensee of the copyright to pay royalties in amounts not related to the licensee's sales or use of the copyrighted work, (5) refused to license the copyright to any person, or (6) otherwise used the copyright allegedly to suppress competition.".

TITLE V—PROCESS PATENTS

SEC. 501. Section 154 of Title 35, United States Code, is amended by inserting after "invention" the second time it appears the words ", and if the invention is a process of the right to exclude others from using or selling products produced thereby.".

SEC. 502. Section 271 of Title 35, United States Code, is amended—

(a) by redesignating subsection (a) as paragraph (a)(1); and

(b) by inserting the following new paragraph (a)(2):

"(a)(2) If the patented invention is a process, whoever without authority uses or sells in the United States during the term of the patent therefore a product produced by such process infringes the patent.".

SEC. 503. Title 35, United States Code, is amended by adding the following new Section 295:

"§ 295. Presumption: Product Produced by Patented Process.

"In actions alleging infringement of a process patent based on use or sale of a product produced by the patented process, if the court finds (1) that a substantial likelihood exists that the product was produced by the patented process and (2) that the claimant has exhausted all reasonably available means through discovery or otherwise to determine the process actually used in the production of the product and was unable so to determine, the product shall be presumed to have been so produced, and the burden of establishing that the product was not produced by the process shall be on the party asserting that it was not so produced.".

[Section-by-Section Analysis]

NATIONAL PRODUCTIVITY AND INNOVATION ACT OF 1983

TITLE I—SHORT TITLE

Title I provides that the Act may be cited as the "National Productivity and Innovation Act of 1983."

TITLE II—JOINT RESEARCH AND DEVELOPMENT VENTURES

Title II is designed to promote research and development ("R&D") by clarifying the antitrust standard applicable to joint R&D ventures, and by giving participants in joint R&D programs the option of filing a notification disclosing their conduct with the Attorney General and the Federal Trade Commission, thereby limiting their exposure to possible liability for antitrust damages to actual, rather than treble, damages.

Section 201 defines key terms. A "joint research and development program" is defined to mean theoretical analysis, exploration or experimentation, or the extension of basic scientific knowledge into practical application, including prototype development. Such programs specifically may include the establishment of research facilities, the collection and exchange of research information, the conduct of research on a proprietary basis, the prosecution of patent applications, and the granting of licenses. In order to provide necessary flexibility, a research and development program also may include "any other conduct reasonably necessary and appropriate to such program." Only research and development programs carried out jointly—"by two or more independent persons"—are covered by the title. "Independent persons" refers to separate firms, and not to subsidiaries of the same corporate family or natural persons associated with the same firm.

Section 201 also defines the "antitrust laws" to match the definition of those laws in the Clayton Act (primarily the Sherman and Clayton Acts), and adds to that definition Section 5 of the FTC Act insofar as it applies to unfair methods of competition. Finally, the terms "Attorney General" and "Commission" are appropriately defined.

Section 202 states clearly and unequivocally that joint research and development programs are not to be considered illegal "per se" under the antitrust laws. Section 202 thus assures consideration of the actual competitive effects of such programs under the antitrust "rule of reason." Under this standard courts must make legally and economically realistic evaluations of the competitive effects of any challenged joint R&D ventures. Section 202 does not create new law: rather, it clarifies existing legal standards and so eliminates any misconception that present law imposes sweeping and categorical rules against R&D programs conducted jointly by competitors.

Nevertheless, here as in other contexts, applicability of the "rule of reason" shall not be taken to imply that the courts must take into account each and every aspect and idiosyncracy of the individual arrangement and the surrounding circumstances. Rather, the courts may, to the extent they find them useful and persuasive, adopt rules or presumptions based on general characteristics of arrangements, including, without limitation, scale economies associated with the project, the percentage of firms in the market or markets with which the participants are identified that is included within the project, the level of concentration in those markets, and so forth.

Section 203 of the proposed legislation recognizes that assurance as to the antitrust standard applicable to joint R&D program may not by itself adequately foster such programs because of the possibility of treble damage liability should a court later disagree with the parties' assessment of likely competitive effects. Current law requires the trebling of damages in all cases brought by private parties under Section 4 of the Clayton Act or by states as parens patriae under Section 4C of that Act. Section 203 limits possible liability in any such case based on conduct that is part of a joint R&D program to actual damages only (plus interest on such actual damages in order to provide a more fully compensatory actual damage remedy) as long as adequate disclosure of such conduct is made to the antitrust enforcement agencies prior to its inception. Such disclosure should enable those agencies to investigate any program with potential anticompetitive effects and challenge it before any harm can occur. Under the provisions of Section 204, to be discussed infra, disclosure to the antitrust enforcement agencies will trigger public awareness of the program as well, thus assuring that private parties will be in a position to inform the enforcement agencies of behavior that would be unlawful and harmful to their interests. Of course, nothing in Section 203's limitation on damages affects antitrust actions by the Attorney General or the FTC, or private actions seeking injunctive relief.

The limitation in Section 203 on recovery of monetary damages allegedly sustained as the result of R&D programs should largely eliminate the perceived antitrust deterrent to beneficial joint R&D. While Section 203 is a serious step given the important incen-

tives and disincentives that treble damage actions generally are intended to create on the part of injured parties and potential antitrust violators respectively. This limitation has inherent safeguards that make it acceptable in these circumstances. Notification directly to the antitrust enforcement agencies and indirectly to interest private parties has been noted above. Equally important is the fact that the other carefully preserved public and private enforcement remedies will be sufficient to avoid or provide fair compensation for injury that joint R&D that is, on balance, anticompetitive might cause. It is important to note that, unlike the immediate harm caused by straightforward price fixing or market allocation, any harm stemming from allegedly anticompetitive joint R&D generally will not develop immediately, and should be avoidable with adequate notice.

Moreover, as Section 202 expressly recognizes, joint R&D is not one of the classic cartel activities, such as price fixing or bid rigging, that have been deemed illegal "per se" by the courts, and deterrence of which is unambiguously beneficial. Rather, joint R&D can contribute importantly to the ability of American industries to develop new goods and services, to produce goods and services more efficiently, to speed their adjustment to changing markets and demands, and to keep pace with overseas competition. Thus, the deterrence that the trebling of antitrust damages provides generally is unnecessary and inappropriate with respect to such conduct.

Section 204 sets out the manner in which participants in joint R&D may disclose their program to the antitrust enforcement agencies and thereby avoid treble damages. Subsection 204(a) makes clear that only conduct specified in such a disclosure is entitled to such protection.

Subsection 204(b) directs the FTC to publish a general notice of any program that is disclosed within 30 days, and provides that information and documentary materials be submitted as part of a disclosure shall be publicly available. Thus, private parties will have the opportunity to protect their rights.

Subsection 204(c) provides those who wish to disclose an R&D program with an opportunity to seek confidential treatment of information or documentary materials submitted as part of their disclosure. Such confidential treatment may be necessary and appropriate where the particulars of such a program are competitively or commercially sensitive. Materials afforded such treatment also will be exempt from disclosure under the Freedom of Information Act.

Subsection 204(d) allows any person who has filed a notification disclosing a research and development program to withdraw that notification prior to the time at which notice is published in the Federal Register and information and documentary materials are made available to the public. The practical effect of this subsection is to give a person who has filed a notification the opportunity to withdraw it if no agreement can be reached with the Attorney General and the FTC regarding the public availability of supporting information and documentary material. Of course, withdrawing the notification forfeits any treble-damage protection that it otherwise would have afforded, and will not preclude or otherwise affect further investigation or enforcement action by the agencies.

Subsection 204(e) assures that the Title will not be misconstrued as any sort of Federal regulation of joint R&D, or become the basis for extensive litigation, particularly that which might be employed as a tactic to force the disclosure of details of competitively sensitive American joint R&D. The purpose of the Title is simple and limited: to remove the possibility that a penalty in the form of the trebling of antitrust damages might be assessed against the participants in joint R&D, in return for notice to the enforcement agencies of the program. No one is required by the Title to disclose R&D activities; joint R&D, which carries in any event little antitrust risk, can be conducted freely without filing a notification and obtaining the protection of Section 203, at the option of the participants. The Title does not contemplate government approval or disapproval of joint R&D programs or notifications; the investigatory and enforcement powers and responsibilities of the Attorney General and the Commission with respect to noticed programs continue to rest on the Sherman Act, the Federal Trade Commission Act, and other laws.

TITLE III—INTELLECTUAL PROPERTY LICENSING UNDER THE ANTITRUST LAWS

Section 301 adds a new Section 27 to the Clayton Act, providing that "[a]greements to convey rights to use, practice, or sublicense patented inventions, copyrights, trade secrets, know-how, or other intellectual property shall not be deemed illegal per se in actions under the antitrust laws." This assures that intellectual property licensing arrangements will be evaluated under the "rule of reason" in antitrust cases, which requires a realistic economic analysis of the actual competitive effects of a challenged practice. Courts will not be able to condemn arrangements involving new technology under the antitrust laws without considering their business justifications and procompetitive aspects.

It should be stressed that new Section 27 will not allow anticompetitive behavior to escape condemnation under the antitrust laws. Proscription of a per se approach merely obliges the courts to hear evidence on the probable economic effects of a challenged practice before ruling upon the antitrust legality of the practice. Truly anticompetitive conduct will remain illegal.

New Section 27 also recognizes that the current requirement in Sections 4 and 4C of the Clayton Act that plaintiffs' damages be trebled in all actions brought under those sections is inappropriate when applied to intellectual property licensing arrangements. The trebling of damages provides a strong deterrent to anticompetitive behavior. However, it may well overdeter procompetitive licensing arrangements that allow American firms to realize fully their investments in innovative research and development. Subsection (b) of new Section 27 solves this problem by limiting damages in antitrust cases based on intellectual property licensing arrangements to actual damages only (plus interest on such actual damages in order to preserve a more fully compensatory actual damage remedy). All other public and private antitrust enforcement remedies are, of course, unaffected by this section.

TITLE IV—PATENT AND COPYRIGHT MISUSE

Title IV is a modest but significant reform of the doctrines of patent and copyright misuse, which can be invoked to deprive a patentee or copyright holder of his rights under the patent or copyright. Section 401 amends Section 271 of Title 35 by redesignating subsections (c) and (d) as new subsections (c)(1) and (c)(2), respectively. Existing subsection (c) defines contributory infringement; existing subsection (d) lists three activities that patentees may engage in, primarily to combat contributory infringement, without being found guilty of patent misuse or illegal extension of a patent.[1] Redesignation will leave these provisions intact, and thus leave unchanged existing law regarding the extent to which and manner in which a patentee may prohibit the sale by others of commodities that have no substantial use other than those that would infringe his patent.[2]

Section 401 also replaces the redesignated subsection (d) with a new subsection (d), which lists several patent licensing practices that cannot provide the basis for a finding of misuse or illegal extension of a patent unless such practices, in the circumstances in which they are employed, violate the antitrust laws. These practices include the following:

(1) licensing the patent under terms that affect commerce outside the scope of the patent's claims (e.g., requiring a licensee to purchase unpatented materials from the licensor, requiring a licensee to assign to the patentee a patent that may be issued to the licensee after the licensing arrangement is executed, restricting a licensee's freedom to deal in products or services outside the scope of the patent, requiring the licensee to become a licensee of a second patent):

(2) restricting a licensee of the patent in the sale of the patented product or in the sale of an unpatented product made by the patented process;

(3) obligating a licensee of the patent to pay royalties that differ from those paid by another licensee or that are allegedly excessive;

(4) obligating a licensee of the patent to pay royalties in amounts that are not related to the licensee's sales of the patented product or an unpatended product made by the patented process;

(5) refusing to license the patent to any person; or

(6) otherwise using the patent in a manner that allegedly suppresses competition.

New subsection 271(d) carefully limits the patent misuse doctrine but does not eliminate it. Courts will still have the discretion to refuse to enforce a valid, infringed patent on competitive grounds whenever the challenged conduct violates the antitrust laws, as well as on grounds not related to competition (e.g., fraud on the Patent Office). This will give patentees greater flexibility in realizing the full benefits of their patents and thereby encourage investment in research and development.

Section 402 amends 17 U.S.C. § 501(a) to do for copyright law what new subsection 271(d) of Title 35 does for patent law. Thus, under the amended Section 501(a) copyright owners will have greater flexibility in licensing their copyrights, and further development of literary and artistic works will be encouraged.

TITLE V—PROCESS PATENTS

Sections 501 and 502 amend 35 U.S.C. §§ 154 and 271 to, in effect, extend the ex-

---

[1] These activities are (1) deriving revenue from acts which if performed by another without his consent would constitute contributory infringement, (2) licensing or authorizing another to perform such acts, and (3) seeking to enforce his patent rights against infringement or contributory infringement.

[2] *See generally* Dawson Chemical Co. v. Rohm & Haas Co., 448 U.S. 176 (1980).

clusive rights of the holder of a process patent to products made by the patented process. The amendment to § 154 grants to process patentees the right to exclude others from using or selling such products; the complementary amendment to § 271 makes the use or sale of such products infringement. This general approach to the scope of process patents has been adopted in many foreign countries.

Under these amendments, use or sale of products made by patented processes will constitute infringement regardless of where such products were made. However, because a process patentee can prevent the use of his patented process by domestic manufacturers directly, their primary effect will be on foreign manufacturing. The amendments will not prevent foreign manufacturers from using patented processes abroad, so long as the products they make thereby are sold and used abroad. But the amendments will prevent circumvention of a U.S. process patentee's rights through manufacture abroad and subsequent importation into the United States of products made by his patented process.

Providing process patentees with infringement remedies against users or sellers of products made by their patented processes may not, however, be sufficient to protect their rights against the threat of foreign manufacture and importation. Proof of infringement will require proof that the patented process was actually used in the manufacture of the product in question, and a patentee may be unable to provide such proof where the foreign manufacturer is not subject to service of process in the United States. To remedy this problem. Section 503 adds a new § 295 to Title 35, to establish, in carefully defined circumstances, a rebuttable presumption that a product that could have been made by use of a patented process was in fact so made. The burden of overcoming this presumption will be on the defendant in an infringement suit, regardless of whether it is a foreign manufacturer, an importer, or a subsequent purchaser. While the defendant may not necessarily have in its possession the means necessary to rebut the presumption, it is likely to be in a far better position than the patentee to obtain them. Importers, for example, because of their relationships with foreign manufacturers, may be able to exert pressure on such manufacturers to produce the necessary information. Purchasers from importers may in turn be able to exert similar pressure on those importers, which would be transmitted to foreign manufacturers. Of course, purchasers also would possess whatever rights to indemnification they may have under applicable state law.

Presumptions of manufacture by a patented process, however, should not be casually established. Importers and subsequent purchasers may be unable to obtain the information needed to overcome such presumptions, even where the products in question were in fact not made by patented processes. At a minimum, the presumption will subject any party who uses or sells any product that might have been made by a patented process to increased litigation risks. Indeed, there is some risk that the presumption might induce frivolous litigation intended to discourage firms from carrying products that compete with the patentee's product. To minimize these possibilities, new § 295 requires two conditions to be satisfied before a product will be presumed to have been made by a patented process.

First, the patentee must demonstrate on the basis of the evidence that is available that a "substantial likelihood" exists that the product was made by the patented process. Such evidence could include indications or "marks" on the product itself, as well as expert testimony regarding known methods of production at costs that would justify sale of the product at the prices being charged. Exactly how much evidence will be needed in particular situations to satisfy the "substantial likelihood" condition will develop in case law. A patentee's burden obviously should be somewhat less than that of proving successfully at trial that a product in question was in fact made by his patented process. On the other hand, a patentee will have to establish more than a slight, even if reasonable, possibility that the product was so made. Second, the patentee must show that he has exhausted "all reasonably available means" through discovery and otherwise to determine what process was used in the manufacture of the product in question and was unable to do so. Thus, patentees must make initial, good-faith efforts to prove this key element in their infringement cases. Patentees will have to use normal discovery channels, as well as other good-faith methods, as courts deem appropriate. This burden should eliminate frivolous or unsound suits.

By Mr. SASSER (for himself, Mr. HOLLINGS, Mr. BOREN, Mr. BRADLEY, Mr. MOYNIHAN, Mr. PRYOR, Mr. MITCHELL, Mr. MATSUNAGA, and Mr. DIXON):

S. 1843. A bill to extend by 3 months the cutoff date for social security disability determinations which will be subject to the provision allowing continued payment of disability benefits during appeal; to the Committee on Finance.

DISABILITY CONTINUATION OF BENEFITS EXTENSION

Mr. SASSER. Mr. President, I rise today to address a problem which has attracted considerable attention over the past 2 years: The problem involves the administration of the social security disability program.

The problem became acute starting in March 1981 with the administration's decision to accelerate by 9 months the process known as continuing disability investigations. The number and severity of problems encountered by the various State disability determination agencies are by now well documented and need no further enumeration here.

Last year, I worked with several of my colleagues to fashion corrective legislation which would temporarily put a stop to some of the blatant inequities and gross injustices then occurring in the disability system. These inequities resulted in the wanton and wholesale purge of thousands of eligible disabled individuals from the social security disability rolls.

The provisions contained in H.R. 7093 during the waning hours of the lameduck session in December and signed into law by the President in early January temporarily halted the appalling rate of erroneous terminations which were occurring on a daily basis. But these changes were only temporary and the need for permanent reform of the disability program was clearly recognized by all involved.

One of the most significant and crucial changes enacted as a result of this corrective legislation provided for the continuation of benefit payments through the administrative-law-judge level of appeal, which brings me to the reason I am offering this legislation today. When H.R. 7093 was passed, it contained a stipulation that the continuation of these benefit payments would expire on October 1, 1983. The legislation I am offering today would merely extend this deadline 3 months to January 1, 1984. Currently, the House Ways and Means Committee is completing action on a comprehensive disability measure which makes permanent this provision. I am confident that this measure will meet with expeditious passage in the House of Representatives.

I am also confident that quick passage will be secured in the Senate. Whether action will occur on or before October 1, however, is the question. It is my sincere hope that this extension will not be needed, but in the event that it is, I believe that Congress should be prepared to authorize such an extension.

Extending the deadline by 3 months, as envisioned in my bill, would do two things: One, it would alleviate any unnecessary confusion in the minds of disability recipients as to the extent of protection afforded them under disability law; and two, it would further serve to strengthen and clarify Congress intention to make this provision a permanent part of the disability process.

I therefore urge my colleagues to join me in supporting this much-needed legislation.

Mr. President, at this time I would like to add the following cosponsors: Mr. HOLLINGS, Mr. BOREN, Mr. BRADLEY, Mr. MOYNIHAN, Mr. PRYOR, Mr. MITCHELL, Mr. MATSUNAGA, and Mr. DIXON.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1843

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 223(g)(3)(B) of the Social Security Act is amended by striking out "October 1, 1983" and inserting in lieu thereof "January 1, 1984".

(b) The amendment made by subsection (a) shall apply with respect to determinations which are made prior to January 1, 1984.

● Mr. HOLLINGS. Mr. President, 2 years ago the administration started one of the saddest episodes in the history of the social security disability

program by implementing a hasty and ill-conceived disability review process. Literally thousands of legitimately disabled people were thrown out of the program without ever seeing a doctor and with only the barest of protections during the appeals process. Lives were disrupted and families were wiped out as benefits—often the only income for the disabled—were arbitrarily cut off in the pellmell rush of the administration to reduce the caseload.

Fortunately, however, Congress did react to this tragedy and last year passed H.R. 7093. This disability bill reduced the rate of case reviews, improved the appeals process, and provided that benefits and medical care would continue during the appeals process. It was our hope, when the bill was drafted, that Congress, with the immediate pressure for action now eliminated, would use 1983 to pass a thorough and comprehensive disability bill—one that would prevent this administration, or any other, from abusing the rights of the disabled. Thus, an expiration date of this October 1, was put on the provisions of H.R. 7093.

It is now clear that Congress will not be able to meet that deadline. While the House Ways and Means Committee is moving quickly on new legislation, it is doubtful that such a bill will be adopted by both Houses before October 1. Thus, the legislation that Senator SASSER and I have introduced will extend the deadline until January 1, 1984, in order to give both Houses time to thoroughly consider comprehensive reform.

Mr. President, I am well aware that there are many in this body who would like to see this problem go away. Many believe the administration line about "administratively" remedying the problem. But for those of us who looked into this during our recess, it is abundantly clear that no remedy has been worked. The States are just as overworked, the caseloads are just as high, and the careless termination of benefits is still going on. We need reform and we need it now. But more importantly, we need time and that is what this bill gives us. It is my hope that the Senate will quickly pass this bill. If that is not the case, then I hope that we will be able to find an appropriate piece of legislation on which to add this badly needed extension.

Nobody wants to see the disability rolls explode again. But to insure that event does not occur, Congress must take the lead. We must strike the balance between needs and costs in order to protect the legitimately disabled and their families. That is a difficult order to fill, but I am confident that we will accomplish it.●

● Mr. PRYOR. Mr. President, I want to express my full support for the legislation the Senator from Tennessee introduced today which provides an extension of the provision of Public Law 97-455 which allows the receipt of social security disability benefits through the ALJ level for individuals appealing benefit terminations.

For more than 2 years we have known that there are some serious problems associated with the manner in which the continuing disability investigations are being handled in the States and at the Federal level. There is not a single Member of Congress who has not been deluged with case after appalling case of wrongful terminations. Unfortunately, it has taken pain and suffering on the part of thousands of individuals to create an awareness that something is terribly wrong with the disability program.

In the closing days of the last Congress we were finally successful in legislating a temporary, stopgap measure which gave disability beneficiaries a faint glimmer of hope in the form of secured benefits through an appeal at the administrative law judge level. This legislation, though, will expire on October 1 of this year.

In one respect I feel that it is most unfortunate that the legislation which is being introduced today is necessary. It is my firm belief that it is the responsibility of the Congress to work toward comprehensive reform of the disability system.

I do not believe that we can afford to let another session pass without addressing this most important and pressing problem. But to do so we must have the flexibility to embark on a full-scale investigation into exactly what the problems are and to decide upon the best possible solutions. The present October 1 deadline makes the achievement of that goal extremely difficult.

I would very much like to see the Congress and the President turn their attention in the coming weeks to full-fledged disability reform. In the meantime, extension of Public Law 97-455 to January 1, 1984, may be an absolute necessity.●

ADDITIONAL COSPONSORS

S. 606

At the request of Mr. PROXMIRE, the name of the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 606, a bill to prohibit the owners and operators of federally assisted rental housing for the elderly or handicapped from restricting the ownership of pets by the tenants of such housing.

S. 663

At the request of Mr. ARMSTRONG, the name of the Senator from South Dakota (Mr. ABDNOR) was added as a cosponsor of S. 663, a bill to prohibit the payment of certain agriculture incentives to persons who produce certain agricultural commodities on highly erodible land.

S. 752

At the request of Mr. ARMSTRONG, the name of the Senator from Nevada (Mr. HECHT) the Senator from California (Mr. CRANSTON), the Senator from Arizona (Mr. DECONCINI), the Senator from New Mexico (Mr. DOMENICI), and the Senator from New Mexico (Mr. BINGAMAN) were added as cosponsors of S. 752, a bill to authorize certain additional measures to assure accomplishment of the objectives of title II of the Colorado River Basin Salinity Control Act, and for other purposes.

S. 837

At the request of Mr. GORTON, the name of the Senator from Washington (Mr. EVANS) was added as a cosponsor of S. 837, a bill to designate certain national forest system lands in the State of Washington for inclusion in the National Wilderness Preservation System, and for other purposes.

S. 1080

At the request of Mr. GRASSLEY, the name of the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 1080, a bill to amend the Administrative Procedure Act to require Federal agencies to analyze the effects of rules to improve their effectiveness and to decrease their compliance costs, to provide for a periodic review of regulations, and for other purposes.

S. 1276

At the request of Mr. MITCHELL, the name of the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of S. 1276, a bill to provide that the pensions received by retired judges who are assigned to active duty shall not be treated as wages for purposes of the Social Security Act.

S. 1475

At the request of Mr. WALLOP, the names of the Senator from Kentucky (Mr. FORD), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of S. 1475, A bill to amend the Internal Revenue Code of 1954 to repeal the highway use tax on heavy trucks and to increase the tax on diesel fuel used in the United States.

S. 1570

At the request of Mr. MITCHELL, the name of the Senator from Rhode Island (Mr. PELL), was added as a cosponsor of S. 1570, A bill to amend the Internal Revenue Code of 1954 to provide simplification in accounting rules related to inventory.

S. 1644

At the request of Mr. ARMSTRONG, the name of the Senator from Alaska (Mr. STEVENS), was added as a cosponsor of S. 1644, A bill to improve Federal criminal sentencing by imprisoning dangerous and violent offenders and by diverting nonviolent offenders from

imprisonment to restitution or community service programs.

S. 1691

At the request of Mr. ARMSTRONG, the name of the Senator from Montana (Mr. MELCHER), was added as a cosponsor of S. 1691, A bill to amend the Social Security Act to recognize effective program administration in the financing of State programs of child support enforcement, to improve the ability of States to collect child support for non-AFDC families, and otherwise strengthen and improve such programs and for other purposes.

S. 1734

At the request of Mr. ZORINSKY, the name of the Senator from Nevada (Mr. HECHT) was added as a cosponsor of S. 1734, A bill to amend title 17 of the United States Code with respect to public performances of nondramatic musical works by means of coin-operated phonorecord players, and for other purposes.

SENATE JOINT RESOLUTION 50

At the request of Mr. LEVIN, the names of the Senator from Minnesota (Mr. DURENBERGER), the Senator from Pennsylvania (Mr. SPECTER), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of Senate Joint Resolution 50, a joint resolution designating the week beginning September 25, 1983, as National Adult Day Care Center Week.

SENATE JOINT RESOLUTION 54

At the request of Mr. NICKLES, the names of the Senator from Connecticut (Mr. WEICKER), the Senator from Maine (Mr. MITCHELL), the Senator from Maryland (Mr. SARBANES), and the Senator from Iowa (Mr. JEPSEN) were added as cosponsors of Senate Joint Resolution 54, a joint resolution to authorize and request the President to designate the month of January 1984 as National Eye Health Care Month.

SENATE JOINT RESOLUTION 113

At the request of Mr. WILSON, the name of the Senator from Illinois (Mr. PERCY) was added as a cosponsor of Senate Joint Resolution 113, a joint resolution to provide for the designation of the week beginning June 3 through June 9, 1984, as National Theater Week.

SENATE JOINT RESOLUTION 132

At the request of Mr. RIEGLE, the names of the Senator from Kansas (Mr. DOLE), the Senator from New York (Mr. MOYNIHAN), and the Senator from Iowa (Mr. JEPSEN) were added as cosponsors of Senate Joint Resolution 132, a joint resolution to designate the week beginning August 7, 1983, as National Correctional Officers Week.

SENATE JOINT RESOLUTION 140

At the request of Mr. METZENBAUM, the names of the Senator from Connecticut (Mr. WEICKER), the Senator from North Dakota (Mr. BURDICK), the Senator from Maryland (Mr. MATHIAS), the Senator from South Dakota (Mr. ABDNOR), the Senator from Alabama (Mr. DENTON), the Senator from New Jersey (Mr. LAUTENBERG), the Senator from Maryland (Mr. SARBANES), the Senator from California (Mr. WILSON), and the Senator from Alabama (Mr. HEFLIN) were added as cosponsors of Senate Joint Resolution 140, a joint resolution to provide for the designation of the week of October 2 through October 8, 1983, a Myasthenia Gravis Awareness Week

SENATE JOINT RESOLUTION 146

At the request of Mr. HEINZ, the name of the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of Senate Joint Resolution 146, a joint resolution to designate March 23, 1984, as National Energy Education Day.

SENATE JOINT RESOLUTION 158

At the request of Mr. BAKER, the names of the Senator from South Dakota (Mr. ABDNOR), the Senator from New Hampshire (Mr. RUDMAN), and the Senator from New Jersey (Mr. BRADLEY) were added as cosponsors of Senate Joint Resolution 158, a joint resolution condemning the brutal behavior of the Government of the Union of Soviet Socialist Republics for the destruction of Korean Air Lines flight 007 with the loss of 269 innocent lives.

At the request of Mr. HOLLINGS, his name was added as a cosponsor of Senate Joint Resolution 158, supra.

At the request of Mr. NICKLES, his name was added as a cosponsor of Senate Joint Resolution 158, supra.

At the request of Mr. BYRD, the names of the Senator from Arkansas (Mr. BUMPERS), and the Senator from New Jersey (Mr. LAUTENBERG) were added as cosponsors of Senate Joint Resolution 158, supra.

SENATOR CONCURRENT RESOLUTION 40

At the request of Mr. LEVIN, the names of the Senator from Florida (Mr. CHILES), and the Senator from Vermont (Mr. LEAHY) were added as cosponsors of Senate Concurrent Resolution 40, a concurrent resolution expressing the sense of the Congress that a uniform State act should be developed and adopted which provides grandparents with adequate rights to petition State courts for privileges to visit their grandchildren following the dissolution—because of divorce, separation, or death—of the marriage of such grandchildren's parents, and for other purposes.

SENATE CONCURRENT RESOLUTION 62

At the request of Mr. MATTINGLY, the names of the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from Pennsylvania (Mr. SPECTER) were added as cosponsors of Senate Concurrent Resolution 62, a concurrent resolution to direct the Commissioner of Social Security and the Secretary of Health and Human Services to develop a plan outlining the steps which might be taken to correct the social security benefit disparity known at the notch problem.

SENATE RESOLUTION 72

At the request of Mr. KENNEDY, the name of the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of Senate Resolution 72, a resolution to assure Israel's security, to oppose advance arms sales to Jordan, and to further peace in the Middle East.

SENATE RESOLUTION 191

At the request of Mr. LEAHY, the names of the Senator from Louisiana (Mr. JOHNSTON), the Senator from Arkansas (Mr. BUMPERS), the Senator from Vermont (Mr. STAFFORD), the Senator from New Mexico (Mr. BINGHAM), the Senator from Rhode Island (Mr. PELL), the Senator from Montana (Mr. BAUCUS), the Senator from Arkansas (Mr. PRYOR), the Senator from Illinois (Mr. PERCY), the Senator from Michigan (Mr. LEVIN), the Senator from Maryland (Mr. SARBANES), the Senator from Massachusetts (Mr. KENNEDY), the Senator from North Dakota (Mr. ANDREWS), and the Senator from California (Mr. CRANSTON), were added as cosponsors of Senate Resolution 191, a resolution relating to justice in the case of the slain American churchwomen in El Salvador.

SENATE RESOLUTION 201

At the request of Mr. PRESSLER, the name of the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of Senate Resolution 201, a resolution expressing the sense of the Senate concerning the use and/or provision of chemical warfare agents by the Soviet Union.

SENATE RESOLUTION 213—BUDGET WAIVER RELATING TO S. 1714

Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 213

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1714. Such waiver is necessary because S. 1714 authorizes the enactment of new budget authority which would first become available in fiscal year 1984 and such bill was not reported on or before May 15, 1983, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations. S. 1714 would authorize not to exceed $69,900,000 for fiscal year 1984 for activities of the Federal Trade Commission.

The Committee on Commerce, Science, and Transportation delayed consideration in 1983 of a bill to provide authorization of ap-

propriations for activities of the Federal Trade Commission in order to study a controversial compromise by the Commission and the American Medical Association concerning the Commission's jurisdiction over State-regulated professionals. This compromise was developed after the Committee had held hearings regarding the Commission in March 1983. In addition, the Committee delayed consideration of such a bill in order to await guidance from the Supreme Court on the constitutionality of the legislative veto, guidance which recently came in the *Immigration and Naturalization Service* v. *Chadha et al.* and *Consumers Union* v. *Federal Trade Commission* cases.

The authorizations contained in S. 1714 are necessary to ensure that sufficient funds are available for the Federal Trade Commission to carry out its activities. The Appropriations Committees of the Senate and the House of Representatives have made provision for the Commission in their appropriations bills. Thus, congressional consideration of this authorization will in no way interfere with or delay the appropriations process.

SENATE RESOLUTION 214—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. ANDREWS, from the Select Committee on Indian Affairs, reported to the following original resolution; which was referred to the Committee on the Budget:

S. RES. 214

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1499. Such waiver is necessary because S. 1499 authorizes the exercise of new budget authority which would become available in fiscal year 1984 and such bill was not reported on or before May 15, 1983, as required in section 402(a) of the Congressional Budget Act of 1974, for such authorizations.

The waiver of section 402(a) is necessary to provide for the settlement of Indian Claims in the town of Ledyard, Connecticut.

S. 1499 provides an authorization of $900,000 for a fund to be known as the Mashantucket Pequot Settlement Fund which will be administered by the Secretary of the Interior in accordance with the Settlement Act.

S. 1499 is a successor bill to S. 366 which was vetoed on April 5, 1983. The Senate Appropriations Subcommittee on Interior has included funds in its fiscal 1984 markup for implementing the settlement authorized by S. 1499. The Appropriations Committees of the Senate and the House of Representatives have, therefore, had adequate notice of this authorization. Thus, Congressional consideration of this authorization will in no way interfere with or delay the appropriations process.

SENATE RESOLUTION 215—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. THURMOND, from the Committee on the Judiciary, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 215

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of S. 53. Such waiver is necessary because S. 53, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1984, and such bill was not reported on or before May 15, 1983, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The budget waiver will allow Senate consideration of S. 53 which, among other things, provides for (1) the establishment of an Office of Justice Assistance to replace the Law Enforcement Assistance Administration and the Office of Justice Assistance, Research and Statistics, (2) public safety officers death benefits and (3) Federal law enforcement assistance to the states and localities under block grant, discretionary and emergency programs. It also authorizes grants and bond interest subsidies to assist the states in prison construction.

The current authorization for programs providing law enforcement assistance to the states and localities under the Justice System Improvement Act of 1979 (P.L. 96-157) expires on September 30, 1983. If S. 53 is not passed, the authorization for such popular and worthwhile programs as FBI training for local law enforcement official at Quantico, Virginia, public safety officers' death benefits, STING, arson, and victim/witness assistance programs, will expire.

S. 53 provides an authorization of $25,000,000 for the Office of Criminal Justice Facilities and prison construction assistance for each of fiscal years 1984, 1985, 1986, and 1987. It also authorizes the appropriation of "such sums as may be necessary" for the remaining programs. Notice of the latter authorization was included in the President's budget request for Fiscal Year 1984 and in S. 829, the President's Comprehensive Crime Control Act of 1983. In addition, funds for law enforcement assistance to the States and localities were included in the Fiscal Year 1984 budget passed by the Senate. As a result, the Committee does not believe that this measure will interfere with or delay either the budgetary or appropriation process of the Senate.

SENATE RESOLUTION 216—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. THURMOND, from the Committee on the Judiciary, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 216

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of S. 668. Such waiver is necessary because S. 668, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1984, and such bill was not reported on or before May 15, 1983, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations. Although this bill was originally introduced as separate legislation, the Senate Committee on the Judiciary felt that because S. 668 related so closely to the provisions of the Comprehensive Crime Control Act that was presented by the Administration, it made sense to consider the two together. The package from the Administration did not come before the Committee until March 23, 1983. Due to the volume of the proposals, the Committee could not hold hearings and take responsible action prior to the deadline.

The budget waiver will allow Senate consideration of S. 668 which provides for the establishment of a United States Sentencing Commission as an independent commission within the Judicial Branch. The Commission is to establish sentencing policies for the criminal justice system and to develop methods for measuring the effectiveness of alternate sentencing practices. The bill also raises the maximum fines which may be imposed on individuals and organizations, increases the cap on prisoner allotment payments from $100 to $500 and amends those sections of the United States Code and the Rules of Criminal Procedure dealing with the preparation of presentence reports.

The estimated cost to the Federal government for S. 668 is $5 million for Fiscal Year 1984, $8 million for each of the Fiscal Years 1985, 1986 and 1987 and $9 million for Fiscal Year 1988.

SENATE RESOLUTION 217—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. THURMOND, from the Committee on the Judiciary, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 217

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of S. 948. Such waiver is necessary because S. 948, as reported, authorizes the enactment of new budget authority which would first become available in Fiscal Year 1984, and such bill was not reported on or before May 15, 1983, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations. Although this bill was originally introduced as separate legislation, the Senate Committee on the Judiciary felt that because S. 948 related so closely to the provisions of the Comprehensive Crime Control Act that was presented by the Administration, it made sense to consider the two together. The package from the Administration did not come before the Committee until March 23, 1983. Due to the volume of the proposals, the Committee could not hold hearings and take responsible action prior to the deadline.

The budget waiver will allow Senate consideration for S. 948 which provides for the establishment of a four-year trial program to deposit proceeds from the forfeiture of drug profits and drug-related assets in a Drug Assets Forfeiture Fund. To offset the cost of processing forfeitures, $10 million is appropriated for Fiscal Year 1984, $15 million for Fiscal Year 1985, and $20 million for each Fiscal Year 1986 and 1987. The appropriation is to come from the proceeds in the Fund. Any excess amounts in the Fund are to revert to the general fund of the United States Treasury. The bill will also create a

Customs Forfeiture Fund which will be set up and operate the same as the Drug Assets Forfeiture Fund. To offset the cost of processing these forfeitures, the identical figures are to be appropriated as listed for the Drug Assets. These funds are to be taken from the Customs Forfeiture Fund.

SENATE RESOLUTION 218—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. THURMOND, from the Committee on the Judiciary, reported the following original resolution; which was referred to the Committee on to the Budget:

S. RES. 218

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of S. 1762. Such waiver is necessary because S. 1762, as reported, authorizes the enactment of new budget authority which would first become available in Fiscal Year 1984, and such bill was not reported on or before May 15, 1983, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations. Further, the package was not presented by the Administration to the Senate Committee on the Judiciary for consideration until March 23, 1983. Due to the volume of the proposals, the Committee could not hold hearings and take responsible action prior to the deadline.

The budget waiver will allow Senate consideration of S. 1762 which amends Title 18 of the United States Code by revising Federal criminal laws, reorganizing administrative procedures and civil proceedings and changing terms of imprisonments and fines. Some new offense categories are specified and certain existing offenses are redefined. The bill also allows the detention of defendants believed to present a danger to the community and requires additional prison time for individuals who commit offenses while on release. In addition, a United States Sentencing Commission is created for the purpose of establishing sentencing policy guidelines. Authorizations are also provided for a number of new and existing programs within the Office of Justice Assistance.

The estimated cost to the Federal government for S. 1762 is $96 million for Fiscal Year 1984, $126 million for Fiscal Year 1985, $137 million for Fiscal Year 1986, $146 million for Fiscal Year 1987 and $84 million for Fiscal Year 1988.

AMENDMENTS SUBMITTED

DESTRUCTION OF KOREAN AIR LINES FLIGHT 007

HUDDLESTON (AND OTHERS) AMENDMENT NO. 2134

(Ordered to lie on the table.)

Mr. HUDDLESTON (for himself, Mr. GOLDWATER, and Mr. LEAHY) submitted an amendment intended to be proposed by them to the joint resolution (S.J. Res. 158) condemning the brutal behavior of the Government of the Union of Soviet Socialist Republics for the destruction of Korean Air Lines flight 007 with the loss of 269 innocent lives; as follows:

At the end of the resolution, add the following:

"(9) declares its intent to reduce substantially the Soviet official presence within the United States in order to establish real equivalence with the official United States presence in the Soviet Union."

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON INTERNATIONAL FINANCE AND MONETARY POLICY

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on International Finance and Monetary Policy of the Committee on Banking, Housing and Urban Affairs be authorized to meet during the session of the Senate on Wednesday, September 14, to hold an oversight hearing on the Export-Import Banks proposals for line of credit for Brazil and Mexico.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SECURITY AND TERRORISM

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Security and Terrorism, of the Committee on the Judiciary, be authorized to meet during the session of the Senate on Wednesday, September 14, to receive testimony.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON WATER AND POWER

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Water and Power of the Committee on Energy and Natural Resources, be authorized to meet during the session of the Senate on Thursday, September 15, at 10 a.m., to hold a hearing to consider S. 752, a bill to authorize certain additional measures to assure accomplishment of the objectives of title II of the Colorado River Basin Salinity Control Act, and for other purposes; S. 1027, a bill to amend Public Law 96-162; and S. 483, a bill to provide for the relief of water users deprived of winter stock water on Willow Creek, Idaho, below the Ririe Dam and Reservoir.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Thursday, September 15, in order to consider and act on pending nominations, commemorative resolutions, and the following bills:

Title XIII of S. 829—Federal Tort Claims Act amendments.

S. 1059—Equal Access Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND GOVERNMENT PROCESSES

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Energy, Nuclear Proliferation and Government Processes of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, September 15, to hold a joint oversight hearing with the Committee on Foreign Relations, to consider nuclear nonproliferation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, September 15, at 10 a.m., to consider trade reorganization legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

CHINA SCHOLAR SEES NO END IN SIGHT TO REPRESSION IN COMMUNIST CHINA

● Mr. GOLDWATER. Mr. President, Ross Terrill, who has written several books about China, recently made a return visit to the mainland. He writes of his findings in an article in the July 1983 issue of the Atlantic.

The essence of his article is captured in the following quotation:

Yet, for the billion who live there, as distinct from the foreign tourist, businessman or journalist, China is first and foremost a repressive regime. The unchanging key to all Peking's policies is that the nation is ruled by a Leninist dictatorship that intends to remain such.

Mr. Terrill puts his conclusion into a historical context when comparing the great democratic and economic progress in Taiwan with the continued outlook for a repression of all liberties by the Communist dictatorship on the mainland. He writes:

Even more important, Taiwan's economic success has been a capitalist economic success; the decline of repression has taken place within the environment of free enterprise. So it was, too, in European history. The institutions of a free society—Parliament, press, political parties, constitutions—came with capitalism. By contrast, these institutions have never sprouted and flourished under a Leninist dictatorship. I do not see China as an exception.

Mr. Terrill's observation is echoed by Paul Johnson, the British writer, who states in Modern Times, a history of the world from the twenties to the eighties, that:

Economic and political liberty were inseparably linked. Freedom of the market inevitably led to erosion of political restraints: that was the lesson of Thailand, Taiwan and South Korea.

Now, I do not endorse every last word written by Mr. Terrill; in particular, I disagree with his implied assumption that there is virtually no severe conflict of interest between Communist China and the United States, except Taiwan. I believe that Peking's support of the Palestine Liberation Front and opposition to American policy in Central America, to mention just two strategically important matters, present areas of serious divergence of interest between us. Moreover, I am not confident that the Communist regime on the mainland will follow peaceful policies once it acquires a modern industrial and technological base.

On balance, however, I am impressed at Mr. Terrill's recognition of the inherent and unchanging failings of any government which founds itself on the Leninist system and I commend his article to the attention of my colleagues.

Mr. President, I ask that the article may appear in the RECORD.

The article follows:

PEKING TRYING TO MAKE CHINA WORK

(By Ross Terrill)

"We can't be fifteen minutes away from the heart of Peking," said the California rancher's wife in disbelief. She gazed at the donkeys, the low, shabby mud houses scattered across vegetable fields, the dirty, weatherbeaten faces staring into our car window, while we bumped our way along a country road (the main "highway" from the port city of Tianjin to China's capital) through a permanent cloud of dust. "Isn't this supposed to be one of their fancy big towns, this 'Beijing?' "

I thought of the city that lay ahead of us. I knew that I would no longer be able to come to China's defense; my own optimism about the Middle Kingdom had waned. I was already bracing myself for official lies, depressing signs that China's goals may elude it, pleas by bright but downcast young people to help them come to the West—"for study."

A decade of Sino-American entente has been good for U.S. policies in Asia, for America's allies, for the West's strategic balance with Russia, and for the many Americans and Chinese who have been able to satisfy their curiosity about each other's countries. But I could not help asking myself, that cold, still afternoon, if the best of the affair between America and China wasn't over. As China and the U.S. have drawn closer, interlocked in a thousand ways (eighty Chinese delegations a month visited the U.S. last year, and 100,000 Americans visited China), differences in culture and values have come to the fore.

As we drove into Peking, I realized that even the city proper is a letdown for the new visitor, and increasingly ugly to an old hand. The remaining wonderful monuments and palaces and the graceful streets of traditional houses in gray brick with red pillars, are being choked by overpasses and oblong housing blocks with no trace of Chinese character. Inner-city chimneys belch out smoke. Buildings are poorly maintained. Except for a tiny elite, the people in the streets and shops lack flair in dress or manner.

Japanese cities hum and sparkle; Singapore takes on the feel of a European city; Taipei turns middle-class—but Chinese cities, even vaunted Peking, are left behind. They are backwaters of semi-industrialization, where neither beauty nor prosperity can be found. They are the strangled fiefdoms of a political and military elite, in which the role of the citizenry is to gaze up dumbly and humbly at the one thing that glitters—the Leviathan, the edifice of state power.

It is a small mercy that a recent courtesy drive in the name of "social public morality" has made Peking less dirty and crude. People don't spit in the street as much. One's chances of getting on a bus at peak hour without being knocked down have improved. Shop assistants occasionally remember not to be surly.

In Wang Fu Jing, Peking's main shopping street, a knot of people carrying plastic bags of purchases gathered around a tall young factory worker one afternoon last November. He looked harassed. Someone had seen him spit on the sidewalk. Social pressure rose against him. With a friend of mine, also a factory worker, I watched from a distance. Two female public-health officials broke through the knot of pedestrians, pulling out their receipt books, brisk and self-satisfied like American meter-maids.

The factory worker, remonstrating that his act was a tiny slip, never to be repeated, in a tone that grew less assertive as the crowd swelled, lost the argument. "Five mao" (about a quarter), snapped one of the hygiene-maids, as she wrote out a receipt for the fine. He handed over five grubby one-mao notes with a restrained curse. The crowd dispersed, murmuring its satisfaction.

The courtesy drive is based on that old set of values that communism was supposed to have swept into the rubbish bin of history: Confucianism. Since it became clear that the warm glow of Communist enthusiasm has vanished from the Chinese body social, the government has begun to inject Confucian moral rules (forget self, do everything for the common good, treat the elderly with kindness) in order to improve social moral health.

Whether or not Confucianism can take fresh root, there is no doubt that a vacuum of ideals exists. No one talks about ideology anymore. The decline of Marxist belief has gone far beyond the state of affairs in the first three years after Mao's death. From late 1976 until 1979, there was a pushing off of the mask of ideology, a busy denunciation of the evils and stupidities of late Maoism, and an exhilaration at looking at the world on its own terms rather than in terms of class analysis. In 1983, one sees on all sides boredom, cynicism, and escapism.

Students care only about their careers, and they early set about pleasing the teachers and administrators who control their future. (Jobs are "distributed"—there is virtually no individual choice.) Corruption spreads as relatives and friends help each other avoid playing by the rules, laughing at their success against a system that has made many people bitter and depressed. When the managers of a factory order component parts from another factory, they do not merely wait for the order to be fulfilled; they must arrange banquets for the second factory, and bestow gifts on the family members of its managers.

All of this seems to make China less exotic. It is as if the Chinese have joined the rest of the human race—and disappointed those who judged China morally special. Cynicism, self-interest, and corruption are less remarkable, less "Chinese," than the ideological fanaticism that used to intrigue the visitor. China is less ennobling, and a bit less inscrutable, than in Mao's day. But we are in no position to blame the Chinese for their loss of political faith and their new concern for individual self-protection. Under Mao, the Chinese nation "stood up"; now the individual seeks to stand up and gain his inch of space in the sun.

Communist officials feel that young people in particular have to be stretched across some framework of civic-mindedness. Hence the revival of Confucianism (though it is not called that) to promote hierarchy, filiality, care for the common good, and above all *obedience.*

"Two things we in the States ought to learn from this place," said a southern conservative on a cruise ship that had just visited several Chinese ports. "Their principle 'If you don't work, you don't eat,' and their idea that if a person commits a capital crime, instead of messing around with the courts, you shoot him straightaway." These are not the sort of lessons Americans used to extract from China, but the southern conservative, regardless of whether or not one agrees with his values, had a correct impression of China. It is a tough, cut-throat society: ruthless laws cow the individual; sentiment counts for little.

The southerner was looking not to China as an abstraction, as virtually all American observers were a decade and more ago, but to aspects of the real face of China.

Instead of politics, people talk about prices, wages, and bonuses. When I first started visiting China, "Serve the people" was an admonition to selfless work for the public good. Now it's a commercial slogan, like Avis's "We try harder" (to get your dollar). Serve the People and do well for yourself. The slogan means keep the shops open longer hours, smile at the customer so he'll praise you in the suggestion book and you'll get a bonus, start a tea stall in the street that will bring you a profit.

China is a wonderful country to visit—art, cuisine, history, geographic diversity, sheer organizational gigantism, all have their appeal—but many Western tourists do not like China's new commercialism. "I took this trip because China is supposed to be different from Europe," a Danish woman complained last November, as she gazed at the "Marco Polo" souvenir and photo shops that dot the beautiful Temple of Heaven like a rash.

The Japanese tourist industry has not thrown away all dignity like this. Nor have those of Burma and Thailand, among Asia's less-developed countries. It is not China's abrupt swing from politics to economics in itself that is troubling but the crudeness with which the new goals are pursued.

China as a nation grows fromidable, even economically. It has the world's sixth-largest GNP, and the annual rate of GNP growth is a respectable 4 to 5 percent. The villages in particular are doing better than they have for years, thanks to a partial dismantling of collectivism. The country is rich in oil, coal, and an array of valuable minerals. Yet the expectations of the individual are growing faster than the capacity of the system to meet them. We in the West have known for years that Taiwan, with 17 million people, has more telephones than China, which has sixty times more people; that a two-block swath of Manhattan contains more Telex machines than the whole of China. But now many of the Chinese people know these things. They resent the

contrast, and expect the gap to be speedily bridged.

Per capita income is now about $350. The government is aiming—ambitiously—for $1,000 by the year 2000. By then, even that figure will be but a fraction of the per capita income of Taiwan or Singapore. The problem is that there are almost twice as many people in China as there were in 1949. Despite the growth of the Chinese economy, per capita GNP only inches ahead. In a nation where 80 percent of the people are in villages, land use per capita has gone *down* nearly one half since 1949.

A decade ago, when China's stated goals were abstract ("Carry revolution to the end . . ."), who could say whether they were attainable or not? Maoism could still seem new and different; from outside the world of its values (as I was), it was very difficult to assess its chances of doing what it said it would do. Now that Peking has set a concrete goal of catching up with other countries economically, it becomes less impossible to assess China's prospects—and clearer, alas, that a gulf will yawn between hope and performance.

The regime has learned the flaws of central planning, but cannot opt for a market economy. The bureaucrats speak of "economic autonomy," but there is no such thing in a system where, for example, the central ministries insist on fixing prices. "Market forces" are invoked. But the Communists cannot sit back and watch the small but successful free segment of the economy eclipse the large, lagging planned segment—their political power might not survive the severe cutting back of state ownership.

"One in ten may defect," Deng Xiaoping, China's senior leader, said several years ago when defending a new plan to send students to study in the U.S. "That doesn't matter." Late in 1982, the thousandth Chinese seeking to stay on in the U.S. sent his application to the State Department. Now Deng worries. He is less confident of the students than he used to be. Urban young people are not as a group convinced that Deng's reforms will really make China "modern" and "democratic."

"Why is there such a lack of ability in East Europe?" Zhou Enlai asked some Australian visitors in the summer of 1971. He gave his own answer: "Because the minds of the East Europeans are not their own, they're not independent, they're controlled by Russia." Zhou had a point; but what about China?

University graduates in scientific and technical jobs in Shanghai were recently given an exam, at high school level, with time to prepare, in their own subjects; 68 percent failed in math, 70 percent failed in physics, 76 percent failed in chemistry. No one familiar with Chinese industrial and bureaucratic performance would be much surprised at these figures. "Sackings in Tianjin," shouted the headline in People's Daily last fall. Could it be that the criteria of ability and performance are making a timid appearance in Chinese organizations? No. The big story was built on a small foundation: two workers (in a city of 7.8 million) were fired after it had been painstakingly established that they had not reported to work for eighteen months.

Performance lags because motivation is lacking. The aging Chinese leaders are losing the fruits of the young people's talents by failing to provide incentives, give young people room to shape their own lives, and allow them to make their own mistakes and learn from them.

I was one of the Australians to whom Zhou gave his dim view of Eastern Europe. Like my companions, including Gough Whitlam, later the prime minister of Australia, I thought the Chinese premier had a good point; yet I did not apply it to China. It wasn't only Zhou's charm that made us suspend judgment about China's authoritarianism. In 1971, we knew much less about conditions in China than we do today. We were just discovering the simple shape of Chinese society, after two decades of ignorance. Gathering material for my book *800,000,000,* I had many interesting and even candid talks with officials, but I had very few substantial talks with people who were not dealing with me as officials. By contrast, much of my time in China in recent years has been spent listening to unofficial voices—speaking at length, in Chinese, on repeated occasions, and without being monitored by the authorities. The result is a picture of conditions that makes even the frank words of official China—and they are franker than they used to be—seem only a small part of the truth.

That evening with Zhou Enlai, too, one tended to suspend critical judgment, because the "China issue" was then one not of social philosophy but of peace and war. Fighting raged in Vietnam, Peking was not in the United Nations, Kissinger had not made his first secret trip to see Zhou, China had not been "recognized," and fear was widespread that the U.S. and China might fight a war over Indochina. We focused on Peking's view of Russia and Taiwan rather than on its view of human rights; on China-Vietnam relations more than on relations between the Chinese government and the Chinese people.

Today, we take it for granted that the U.S. is at peace in the Far East. We laugh at the idea that China could be a threat to us, and we know that the Chinese do not fear us.

In Shanghai, a poster keeps turning up in offices, restaurants, homes: an artist's impression (done under political guidance) of Shanghai's future. It looks like a cross between an ad for a sciencefiction movie and an ideal city as drawn by a child with a bent for engineering. Planes, spaceships, helicopters, swarm overhead. Ingenious vehicles fill the numerous freeways (one sees no parking lots). Bridges and overpasses truss the place. Skyscrapers stretch into a sky that unaccountably remains a brilliant blue. The people—the few people visible amid the man-made wonders—all smile.

In Peking's attractive Sun Yat-sen Park, I watched a Sunday crowd of citizens lining up for the privilege of having their photos taken against a Toyota as backdrop. The park authority, which means the government, provides the car, together with a display of suggested poses on or near this trophy of Japanese modernity. A fee is charged to cover the park photographer's work and recoup the investment in the Toyota. A car that has never been driven an inch inspires the dreams of a million Chinese.

I left Sun Yat-sen Park wondering what Mao would make of the Toyota-worship, and sat on a balustrade of the Gate of Heavenly Peace with a copy of the *Peking Evening News.* There was a cartoon about a Chinese woman and a Japanese man who meet in a Chinese port. In the first frame she is shown in a T-shirt bearing the huge English words "Kiss Me." The Japanese man wears a T-shirt made out of a bag that had held chemical fertilizer (a product China imports from Japan). In the second frame, the Japanese jumps on the Chinese woman as if to rape her. She cries out in resistance. "But look at what's written on your T-shirt," says the Japanese.

The Toyota and the cartoon are symbols of two clashing forces within the Chinese psyche at present. One is left with the impression that China doesn't know what it really wants, now that so many past goals and values have been rejected. Influential Chinese seems embarrassed about their yearning for prosperity. They fear they may look silly if they fail to bring it off. They prepare an avenue of retreat—to the quagmire of culturalistic nationalism.

"Make the past serve the present, make foreign things serve China," it was said during Mao's ideological dictatorship and it is still said during Deng Xiaoping's pragmatic dictatorship. A ton of concepts, an ounce of action. The repetition of the slogan seems to betray an inability to effect these syntheses. The Chinese mock their past as feudal refuse; the next moment they boast that no other nation has such a long and brilliant past. A balance eludes them. The same with "foreign things": they go head over heels for them; later they curse what they adored. It is the Japanese who—without preaching about the concept—quietly make "the past serve the present" (Buddhism, the kimono) and "foreign things serve Japan" (Christmas, the U.S. nuclear umbrella). China can't do it, but talks about it.

It is a welcome improvement that China has opened its doors a bit to the outside world. When I went to China in 1964, you could count the visitors to most Chinese cities each month on the fingers of one hand. Last year, more than one million tourists came. U.S., Japanese, and European banks and firms have opened offices and even plants in Peking and Shanghai. China borrows money abroad, accepts foreign advertising, and has set up export zones in which the usual industrial rules are disregarded in order to accommodate the foreign entrepreneur. Some $3 billion worth of joint ventures between Chinese and foreign firms are in process.

Foreign books, languages, films, and TV are making a modest impact. "The main thing that's happened since your last visit is the American film festival," said a young friend in Tianjin. She remembered the english names of the movies as if they were the names of adored foreign boyfriends: *Snow White and the Seven Dwarfs, Shane, Singin' in the Rain, Black Stallion, Guess Who's Coming to Dinner?* "The dancing in *Singin' in the Rain* just drove us crazy." China, "the model" for others, has become a China shopping around for ideas from others.

All this foreign influence is making the Chinese cities socially and culturally less monotone. The reverse process, as Chinese students and delegations fan out across the U.S., is heavily responsible for a demystification of China among us. Nothing has done more since 1980 to fuel my doubts about China's prospects of meeting its chosen goals than my constant contact with young Chinese in Boston and in cities around the U.S. where I go to lecture.

Despite the new intensity of traffic between China and the rest of the world, the Chinese, especially Communist officials, are still awkward or uneasy in many of their dealings with non-Chinese. "Fang Fang" was not a good name for the export line of lipstick that Shanghai began with a flourish to try to market in the West. Nor was

"White Elephant" a shrewd choice for batteries, or "Pansy" for men's underwear. Chinese Communist business gaucherie (the capitalist Chinese of Southeast Asia, by contrast, know the Western markets quite well) is not limited to trifles. Foreign businessmen are driven mad by the Chinese bureaucracy. Lately, Chinese avarice has also infuriated many traders.

The Police Ministry views every foreign resident in China as an embryonic spy. Ordinary Chinese are routinely harassed if they have sustained contact with a foreigner. In their hearts, many Chinese oscillate between the unhealthy extremes of disdain for the foreigner and near-worship of him. Facing the West today, the Chinese are well aware that they are the weaker, backward side. But deep down they consider this a shocking, unnatural, and temporary state of affairs. The near-worship is a panicky response; the tranquil smiles are a tactic to hide the disdain.

The suspicion of the foreigner, in an era when Americans have with high hopes begun to have more contact with the Chinese than since the 1940s, is responsible for some of the current disenchantment with China. The foreign researcher is met with barely concealed anxiety when he starts asking questions. Friendship between a Chinese and a Westerner is generally assumed to proceed from an ulterior motive.

Compared with the expectations of solidarity that were common during the "days of discovery of China," in the early 1970s, the mood today among the businessmen, diplomats, and intellectuals who deal closely with the Chinese is tinged with reluctant acknowledgment of the realism in Kipling's line "East is East, and West is West. . . ."

The return of Confucianism and the intensification of nationalism (in each case labeled socialism) are linked. They both replace Communist faith. And they are both called into service by China's urgent efforts to become prosperous. Confucianism is intended to strengthen industrial and social discipline. Nationalism could provide the music, sets, and costumes for China's fallback scenario if prosperity should fail to come. Being poor would be no obstacle to shouting for the return of Taiwan and Hong Kong to the breast of the proprietorial, if bankrupt, motherland.

But aren't Confucianism and nationalism the creeds of Taiwan? And hasn't Taiwan, a place of terrible repression in the early 1950s, been rendered substantially freer by twenty-five years of impressive economic growth? Yes, and the Peking leaders have pounced upon the lessons. But the GNP of China, a huge country, cannot grow at the speed of Taiwan's. Even more important, Taiwan's economic success has been a capitalist economic success; the decline of repression has taken place within the environment of free enterprise. So it was, too, in European history. The institutions of a free society—parliament, press, political parties, constitutions—came with capitalism. By contrast, these institutions have never sprouted and flourished under a Leninist dictatorship. I do not see China as an exception.

Implicitly, I used to presume that China could be one. Its culture seemed capable of digesting Marxism and moving on; the enmity between China and Russia made me think China might irrevocably reject Stalinism; I felt that Chinese ingenuity might somehow push through the straitjacket of a Communist political system.

My two most recent books, *The Future of China* and *Mao*, speak of the immovability of the Leninist system, and yet it is curious that people tenaciously go on reading *800,000,000*, eleven years after it was written, and embarrass me by liking it. I think this is because Americans are interested in the culture of China, not its political system. Few people want you to tell them about the repressiveness of Communist dictatorship; that is not the China that intrigues them. As I write these lines, the president of Pepsi-Cola pleads on the *New York Times* op-ed page for less-restricted trade with the Russians. No one has to argue for acceptance of trade with China. That is not because China is less repressive than Russia; it is because China does not threaten us, and because Americans think of China as a culture (exotic) rather than as a polity (dictatorial).

Yet, for the billion who live there, as distinct from the foreign tourist, businessman, or journalist, China is first and foremost a repressive regime. The unchanging key to all Peking's policies is that the nation is ruled by a Leninist dictatorship that intends to remain such.

Words from the end of John Stuart Mill's On Liberty have haunted me during my four most recent trips to China. "The worth of a State, in the long run, is the worth of the individuals composing it. . . ." Many Chinese feel themselves to be cogs in a machine of Communist power that grinds on for its own purposes. They assume an immense gulf between state and people. "A State which dwarfs its men," Mill goes on, "in order that they may be more docile instruments in its hands even for beneficial purposes, will find that with small men no great thing can really be accomplished. . . ."

To be fair, the problem of governing an overpopulated China gripped by higher expectations than ever before in its history would be all but insoluble to any regime, Communist or not. The Nationalists have found it enormously easier to look good in ruling Taiwan than they did in ruling the mainland from 1928 to 1949. Most close students of China would probably agree that a form of authoritarianism is unavoidable in the present phase of Chinese history (one notes that of the other three Chinese societies in the world—Taiwan, Singapore, and Hong Kong—two are under one-party rule and the third is run by the British police). Still, there is a difference between an authoritarianism in which those many things that are not forbidden are permitted (Taiwan) and a totalitarianism where those few things that are not forbidden are compulsory (China).

Nice words float around Peking like balloons at a festival—democracy, rule of law, socialist morality—yet they do not touch the real issue (which events in Poland have also raised). The alternative to the Leninist system, the only goal of true political reform, in China as in Poland, is pluralism.

Political pluralism—which would mean an acknowledgment that conflict is endemic to political life, and should be allowed institutionally, and which would bring an end to the Communist Party's monopoly of power—is further away in China than in Poland, and hardly closer than in the Mao era.

These past six years, the postmortem on China's intermittent troubles since the late 1950s has moved its target from Mao's widow and her three Shanghai associates (Gang of Four) to the role of Mao in the Gang's ultra-leftism (Gang of Five?) to the system that Mao built (Leninist dictatorship of the proletariat). But the Peking leaders will abort this third stage of the probe, however logical it may be. Very few people saw off the branch they sit upon; no ruling Communist Party has ever done so. It is one thing to say (as Peking does) that "the Party has made mistakes." It is another thing to say, as many Chinese say privately but no official would say publicly, that "the Leninist system is no good."

It is safe, now, to lambaste the "leftism" of the Gang of Four. But it touches the Peking Communists' nerve to write, as I did after the Gang fell, "As long as the Gang of Four are made to carry the weight of all China's evils and conflicts, Chinese politics will not be free from its feudal overtones, its Peking opera unreality." Politics is still theater in post-Mao China, and it will remain theater as long as there is no freedom to form an opposition, publish dissenting magazines, or even put up a wall poster denouncing Deng Xiaoping.

One guesses that China under its Leninist party will lumber on, doing well enough to avoid the collapse of its system while being unable to satisfy the people's full economic aspirations because of the rigidities of the system. The post-Mao regime has shrewdly conciliated the farmers by giving them more economic freedom and paying them higher prices for their goods (at a cost of 6.5 percent of GNP in subsidies), and one must admit that this does more for China's short-term stability than any number of liberal reforms would do. But pluralism will have to wait for another century. As a result, comprehensive modernization, which Mao wanted but did not know how to achieve, and which his successors now urgently summon, may not come for Deng much more than it came for Mao.

If the picture is fairly bleak, this doesn't mean that China and the U.S. need become enemies again. One reason why the American public has been indulgent with the Peking regime—more so than with the Warsaw regime—is guilt about the excessive anti-Chinese feelings prior to 1970. Another is that Americans tend, more than most foreigners, to take Chinese theater as Chinese reality. The Chinese craftily try to hide as much as possible about their society from the foreign eye, and the tools they use (good food in an atmosphere of ritual; paternalistic hospitality; a stress upon cultural wonders as a diversion) are disarming and widely effective. Americans have also given china the benefit of many doubts because it does not threaten us as Russia does—it has virtually no severe conflict of interest with us (except over Taiwan)—and because a stable, strong China is more in American interests than a crumbling, failed China.

These truths, which Nixon grasped in 1970, are still true, and China's shabbiness as a society does not make them less so. For some time to come, we may have to accept that China is fairly stable and repressive, useful to the U.S. and an arena of human frustration. Another bout of extreme hostility and pessimism about China would serve us ill.

In Shanghai, I went to see my friend Wang, a construction worker. I like to talk with him about life in Shanghai, and about Hong Kong, where he has relatives. Climbing the tiny wooden stairs to his apartment, I found only his parents, with whom Wang and his two sisters live in one and a half decrepit rooms, sharing a kitchen and a bathroom with two other families. The father said he would tell Wang I was in town. "Come back tomorrow at noon, for our son

will certainly take the day off to see you." I drank a cup of tea, resting it on a gasping radio, 1950s vintage, then left.

The next day, Wang was waiting for me, and we went off to lunch. To take the day off, he rose at 6 a.m. and took a bus at 6:30 for the ninety-minute ride to his plant. It took an hour in the plant office to apply in person for the leave, as one must do. He caught the 10:30 bus for the return trip, and got home just in time to change and keep our appointment. Had I let him pay for our outing, as he wished to do, the cost would have been more than half his monthly wage of thirty-eight yuan (about $22).

After lunch, we went swimming at a pool in the former French Club. "As for Hong Kong," Wang said in the privacy of the locker room, "if China ever gets control of it, the world will see the horror and chaos of another 'Saigon 1975.'" I fell silent. Not because I doubted him. Recalling the buoyancy and prosperity of Hong Kong, I was lost in contemplating how sad it would be if the regime that grinds down Wang and millions like him should presume to reclaim Hong Kong.●

OUTDOOR RECREATION RESOURCES REVIEW COMMISSION

● Mr. SASSER. Mr. President, my State of Tennessee is unusually blessed with a wealth of natural wonders—parks, rivers, lakes, and other outdoor recreational facilities. Tennesseans cherish this outdoor cornucopia. And they gladly share it with visitors from all over our Nation—indeed, from all over the world—who contribute to Tennessee's second largest industry: tourism.

It should be no surprise that we Tennesseans are vitally concerned with the concepts which have culminated in the introduction of S. 1090, a bill to establish the Outdoor Recreation Resources Review Commission, and to the principles which will be embodied in its eventual enactment.

My Senate colleagues doubtless are familiar with the Federal developments which have now led to the introduction of S. 1090. In 1958, President Eisenhower established an Outdoor Recreation Resources Review Commission which submitted in 1962 a landmark report and recommendations after a comprehensive review and evaluation of outdoor recreation resources and demands. The Congress implemented these recommendations in the next several years with the passage of the land and water conservation fund, the Wild and Scenic Rivers System, the National Trails System, the Wilderness Preservation System, and programs of technical assistance and recreational research.

In the last several years, there has been increasing concern that growth and changes in our Nation, population increases and geographic shifts, together with a continually increasing demand for and use of outdoor recreational facilities, require a new look, a careful evaluation, and a thoughtful consideration both of our outdoor resources and of our planning for the future in Tennessee and throughout the Nation our citizens wish not only to have accessible outdoor recreation but to pass on to future generations a heritage of faithful stewardship of these blessings. The role of the Federal Government in effectuating these goals should likewise be a subject of careful consideration.

In Tennessee in 1982 travel-generated revenues brought $3.2 billion into Tennessee's economy and $115.1 million in tax revenues to the Tennessee State government. A substantial part of these receipts is attributable to jobs and income growing out of Tennessee's outdoor recreational facilities. Our stewardship of them brings us direct economic benefits.

I understand that the committee report accompanying S. 1090 specifically includes the TVA, in its role as a quasi-Federal agency which has traditionally contributed to our Nation's outdoor recreation opportunities, among agencies which will name a liaison to the Commission. I know that TVA, from its history and its mission, will lend an important voice to Commission deliberations.

I feel further that it is important that the Commission incorporate into its thinking the views of for-profit and nonprofit elements of the private sector and those of knowledgeable individual citizens. This kind of nonpartisan examination of our resources and our needs for the future can identify trends and problems and, we all hope, the farsighted recommendations for which its predecessor commission is justly and widely respected.

Today's environmental and recreational concerns call for a new review commission. S. 1090 gives us the opportunity to create one. Our vast heritage of outdoor recreational resources deserves no less, and I, for one, think the time has come to grapple with these problems anew.●

FOR POOR KIDS, COMPUTERS ARE THE NEWEST DISADVANTAGE

● Mr. LAUTENBERG. Mr. President, the information age is moving into schools with a great deal of fanfare. The press almost daily is covering stories of innovative classroom activities involving computers. The motivation and interest generated in the schools is most impressive and the potential for major changes in the way children are taught through the use of computers is truly exciting. But in the midst of all the activity, it is important not to lose sight of the fact that the benefits of computer education are not being evenly distributed among all children. Schools in less affluent areas are much less likely than schools in affluent areas to have computers. A study of computer learning in schools conducted by the University of Minnesota for the National Science Foundation has found what it calls ominous inequities among schools based on such factors as social status, gender and geographic location.

This disparity between the rich and poor schools has concerned me. I will be introducing a bill this week which would establish a pilot program of Federal assistance to schools for computer equipment, software, and teacher training. To address the special needs of less affluent students, this bill would target half the funding on areas with poverty-level children. While a program to help reduce the disparities in computer education offered to children from different socioeconomic backgrounds can help poor children, it cannot substitute for a strong commitment to teaching basic skills. But it can help keep poor children from falling further behind.

An article in Monday's Washington Post describes some of the recent research on the equity in computers issue. I hope that my colleagues will take a minute to review this article The article follows:

[From the Washington Post, Sept. 12, 1983]

FOR POOR KIDS, COMPUTERS ARE THE NEWEST DISADVANTAGE

(By Vivian Aplin-Brownlee)

In the headlong national race to computerize classrooms, a complex high-technology version of an ageless social problem is emerging. Poor kids are being left behind.

The number of microcomputers in U.S. public schools tripled last year. It is expected to reach 500,000 by next June and surge to 2 million by June 1988. A University of Minnesota study projects that 85 percent of the nation's school districts will have computers available to pupils this year, up from 58 percent last year.

But the Minnesota study, done for the National Science Foundation, said youngsters in the nation's 12,000 most affluent school districts are four times more likely than students in the 12,000 poorest districts to have access to a computer.

The Johns Hopkins University Center for Social Organization of Schools reported in April that "whereas two-thirds of public schools in the better-off districts have microcomputers, only 41 percent of the schools in the least wealthy districts have any."

Sociologist Ronald E. Anderson, director of the University of Minnesota's Center for Social Research, said, "To the extent computer literacy and computer expertise are necessary for success in getting and keeping jobs, computer inequity is a serious problem. It threatens to separate groups and communities by giving some people more effective tools for living in the computer age."

The congressional Office of Technology Assessment issued a similiar warning last fall, stating that "if the technologies are primarily designed for and made available to middle-class families, they could increase rather than diminish the gap between the educationally advantaged and disadvantaged."

Alvin Toffler, author of "Future Shock" and the "The Third Wave," wrote last year

that "kids who know how to use them [computers] will have an edge over those who don't, and this means that, unless conscious steps are taken, white middle-class children will start out, once more, with an edge that the less affluent lack."

The problem is not just availability of computers, but how they tend to be used.

Commenting on the remedial drill-and-practice that tends to be done on computers in poorer schools as opposed to program writing and problem-solving in more affluent schools, Ruth Cossey of the University of California's Lawrence Hall of Science said, "One group tells the computer what to do; the other sees it as a taskmaster. The group that has the power will get ahead."

And some educators see still a third problem—partly remediable, and having to do with equity—with the rush to computerize. They say computers are impeding the back-to-basics movement.

As A. Daniel Peck, education professor at San Francisco State University and founder of the Committee of Basic Skills Education, said:

"We're in a computer religion explosion to the detriment of basic-skills education . . . the best we can hope for is some degree of sanity."

Minnesota has distinguished itself in the fight against institutionalized inequity. As the result of a state-wide commitment, 63.4 percent of its schools last year had at least one microcomputer, the personal computer commonly used in homes and offices.

The Minnesota Educational Computer Consortium, a nonprofit, state-run organization, guides the state's efforts and designs its own software, or course material. It is considered a model for educators.

Executive Director Kenneth Brumbaugh estimates that a million copies of its materials are distributed each year to education systems, not only in the Unites States but in countries as diverse as Kenya, Australia and Saudi Arabia.

The socio-economic differences between wealthy and poor schools are illustrated in how they obtain microcomputers. Poor schools must usually depend on the district's revenues or the largesse of computer companies' donations, which some observers speculate are less likely to go to poor schools because they do not represent as rich a potential market for subsequent purchases, by schools or parents, as wealthier districts.

More affluent districts tend to have richer budgets for buying computers, are thought to be more attractive to corporations in the selection of gift sites and can rely on parents, community associations and teacher-parent organizations to make contributions.

But while computer equity might be the crux of the problem, keeping up with the computer explosion while focusing on basics is no less troublesome to educators.

Teachers who are slow to adjust to the computer keyboard are another factor in the computer equation. They run the risk of being less effective in the electronic classroom than they are in traditional ones.

Educators are entangled in an electronic thicket. The computer, hailed as an electronic wizard honing the abstract reasoning skills of a new generation of problem solvers, is unfamiliar and even frightening to some teachers who view it as a disrupter of proven conventional methods.

But faced with legions of anxious parents, teachers and administrators find themselves hard-pressed to resist computers.

Critics complain that the current emphasis placed on putting computers in the hands of American children is driving educators to distraction, not only from teaching basic skills, but as they try to become comfortable with the machines.

Computer anxiety, a fairly common adult malady outside the teaching profession as well, ranks high on the list of distractions. "High Technology" magazine reported last spring that "Although teachers' colleges are gearing up as fast as they can to produce computer-literate teachers, this won't affect schools for years.

"Most teachers have found themselves totally unequipped to teach about or with computers and are scrambling to catch up with their computer-wise students."

Some teachers blame their school systems for exacerbating the problem. At the National Educational Computing Conference in June, "Technology Illustrated" magazine reported, some teachers "complained of school systems that spent thousands of dollars on microcomputers but provided no training and no software, with the predictable result that teachers became hostile to the computers and refused to use them."

The National Education Association took a comprehensive look at computers in its members' classrooms in June. "In just a year or two," NEA Today reported, "the whole picture has changed. Few teachers still assert that computers are just another passing fad in education. . . ."

Those teachers who have become proficient using computers have become big fans of them. "In fact," the NEA reported, "a very common complaint has become, 'We don't have enough of them.'

"A 1982 NEA survey showed that 70 percent of teachers who reported computers' effects on students said the machines improve interest, motivation, attention span, self-confidence and cognitive learning. Half the teacher surveyed said computer learning would become common and be considered basic."

To help, the NEA is starting a computer service this fall to offer computers, their accessories and software at discount prices to members and to provide exact descriptions of how it all works.

Clearly the highly touted man-made wonders are creating as many problems as they are solving in education. Educators, having decided that computers are the answer, now want to work out the solutions for themselves.

"Where will it end?" NEA Today asked in June. "Nobody knows. But in school—as in industry and daily life—computer use is clearly taking root and growing fast.

"Teachers are not about to leave to others the important decisions about that growth—how to use computers, and how to offer all students the benefits of that use."

S. 1513—NATIONAL HISTORICAL PUBLICATIONS AND RECORDS COMMISSION APPROPRIATIONS EXTENSION

● Mr. SASSER. Mr. President, I rise today as a cosponsor of S. 1513, a bill to extend for 5 years the authorization of appropriations for the National Historical Publications and Records Commission.

The Commission's annual appropriations are modest indeed—4 million for fiscal 1984 and fiscal 1985 and 5 million for the 3 succeeding fiscal years—when one considers the irreplaceable work it performs. And 100 percent of its appropriations are devoted by the Commission to the funding of projects.

The list of Commission projects is long. Since its founding nearly 50 years ago, it has collected, edited, and published the papers of the Founding Fathers and other outstanding Americans. it has made an enormous contribution in the research and publication of documentary histories of our earliest institutions, including the first U.S. Congress, the Supreme Court and the ratification of the U.S. Constitution.

Nine years ago, the Commission underwent a name change to include its newly assumed functions of assisting and advising both public and private institutions interested in developing archival systems.

The Commission embodies a worthwhile concept of partnership between public and private institutions. it does not supply more than half of the funds for any of the projects which it undertakes, serving to challenge and help many more institutions and citizens than it could possibly support alone. it performs other preservation work vital to the nurture of our American heritage, including the establishing of standards for preserving documentary paper and for microfilm publication. It has established a superior standard of editorial training.

Through its half century of existence, the Commission has insured the continuing effort to locate and suitably preserve and reproduce the precious catalog of our important national papers and has vastly increased the resources of students and scholars and citizens alike.

In Tennessee, the work of the NHPRC has provided book editions of the papers of William Cullen Bryant, Andrew Jackson, Andrew Johnson, and James K. Polk—three of these illustrious Tennesseans have served as President of the United States. Commission funds have supported other Tennessee research projects in universities, libraries, and research centers. We Tennesseans are both proud and grateful for this body of important work.

In the 2 fiscal years following the election of President Reagan, the NHPRC was virtually starved for funds, surviving primarily through emergency legislation. S. 1513 is far from extravagant—it is modest by any standards. But it will nonetheless provide at least the essential support for a Commission engaged in priceless work for the next 5 years.

While we are all concerned with valid budget restraint, we should not deny this modest funding to the NHPRC. I hope that we will all give the Commission our enthusiastic sup-

port for its irreplaceable work by enacting the authorizations in S. 1513.●

BUDGET

● Mr. SYMMS. Mr. President, an article appeared today in the Wall Street Journal which addresses Congress inability to control the budget. Furthermore, the article correctly states that Congress problem in dealing with the budget is not that we are not raising enough taxes but that we are spending too much.

If Congress tax and spend record were examined historically, it is plainly obvious that Congress historical problem has been that it has spent too much, not that it has not raised enough taxes.

It seems obvious to me that despite the fact that we are spending too much, Congress is not likely to make any serious attempt to control the upward spiral in Government spending in this Congress. So, if Congress does not have the fortitude or the will to be fiscally responsible, I suggest that we might let the President take a stab at it by allowing the President to veto budget-busting items on a line-item basis. Just because Congress has shirked its responsibilities by default does not mean that we should force the President to do so as well. The general impotence that seems to pervade this town is stifling the creative, entrepreneurial, and productive capabilities of everyone that lives outside of the Washington metropolitan area.

I submit for the RECORD the article to which I referred.

The article follows:

BUDGET SOLUTION

The days and nights of the living dead have returned: The Congress of the United States is back in Washington, where it must again confront the budget nightmare. Congress's wailing and howling over the dread budget deficit causes quite enough discomfort across the land, so we're reluctant to arouse them further. Alas, we present some simple truths about the deficit—and a proposal to free Congress from the curse of the budget process.

Recent history has taught us a few things about what a budget deficit does and does not do. Deficits do not prevent a recovery. We currently have a $200 billion deficit. We currently have a recovery.

It's widely argued that if the government has to finance a deficit of $100 billion to $300 billion, interest rates will skyrocket again, perhaps to 17 percent, crushing the recovery (and the Reagan presidency). We have come to doubt the validity of this argument, which depends in large part on the assumption that government borrowing—and its impact—is limited to the securities market, which in 1982 was thought to have an available savings flow of about $350 billion.

It seems more plausible, as John Rutledge argued on this page last month ("The 'Structural-Deficit' Myth," Aug. 4), that government borrowing to finance a deficit should be viewed in the larger context of the economy's total asset holdings, currently about $20 trillion. Placed against $20 trillion, a large government borrowing may cause some rise in interest rates, but nothing as large or destructive as the Armageddon generally predicted.

We've been pooh-poohing these concerns (much to the discomfort of many traditional allies) and making the point that a lot of the deficit talk is merely an excuse to get more revenues to increase spending. But we've also been saying privately that two years from now—when recovery came despite deficits—we will be the only people in the land worried about deficits. For the plain and undeniable truth is—and here we rejoin the ranks of our worried allies—deficits do crowd out resources.

But let's get something straight about this. As Norman Ture makes plain in a nearby article today, deficits crowd out resources only to the extent that they serve their imperial master—government spending. We can raise taxes to close the deficit; we can borrow from the private sector to close the deficit. Either way, the money raised becomes government spending. Government spending is the first cause of crowding usable resources out of the private sector.

The choice is as clear as it can be: If we want America to have primarily a public economy, we should quit whining about the deficit and let congressional policies proceed toward that goal. If instead we want primarily a private economy, we simply have to cut spending.

And that means we've got a very big problem: The best political minds in Washington say that all the king's horses and all the king's men will never be able to cut government spending again. That is the implicit assumption behind much of the deficit talk and the counterproductive solutions in the air. We're not so ready, however, to throw in the towel on prudent economic management. What's really happened is that the terms of the political game in Washington have changed in a way that has eroded the traditional restraints on spending imposed by Congress's internal discipline and the external pressure applied by the Executive.

The erosion began with the House committee reforms of the 1970s, which undermined the authority of the House leadership. Next, Congress perverted the principle of entitlements.

Providing basic support for citizens who fell into deep poverty was properly regarded in the 1960s as an appropriate commitment by a successful nation, and Congress, with clear public support, made the commitment. But it erred in not foreseeing (or in willfully refusing to see) that the payment formulas—primarily indexing payments to inflation—would create a claim on the nation's wealth large enough to undermine the health of the larger economy.

The last brick in the dam gave way with passage of the Congressional Budget and Impoundment Control Act of 1974. This mistake had the unintended effect of opening the spending spigot without ever finding the proper tools to shut if off (see the accompanying graph).

Forget the phrase, "budget control." No one takes that seriously anymore. The key words in the act are "impoundment control." In the early 1970s, Congress became petulant over Richard Nixon's attempts to reduce spending by using the president's power to withhold, or impound, funds appropriated by Congress. By effectively eliminating the president's impoundment powers in the 1974 act, Congress grievously damaged the balance of power. The president can still veto appropriations bills, but the bills have become so huge and inclusive that the big veto is no longer managerially or politically useful.

The fact is, this issue has gone quite beyond the question of conservative vs. liberal social philosophies. Congress can't hold down the upward growth in spending, and the president has no effective counterweight to pose against Congress. In short, the ship of state, in its current upward spending stream, is on automatic pilot, with the government laying claim to an ever larger share of whatever the economy produces.

The solution to this problem requires two things: Reimposing discipline on the politics of spending and restoring the balance of power between Congress and the presidency. And as is often suggested, the solution requires two other things: the support of the House speaker and the president. Well, we know the speaker's position: The economy be damaged; this conservative president must be jettisoned from the Oval Office no matter what the costs. Resolution of the budget crisis clearly lies with the president, and we know of one proven mechanism for getting the job done. Ronald Reagan should do the following:

He should send a constitutional amendment up to Congress, exhorting it to give the president a line-item veto over the budget. Ed Meese has been floating the item-veto idea for some time, citing in support Mr. Reagan's experience with it in California. The governor of every major state in the Union has line-item veto power, which permits the Executive to veto individual items in the legislature's budget. Nearly every president since Ulysses S. Grant—Democrat and Republican—has requested it. (Yes, indeed, that includes FDR.)

Mr. Reagan should make the line-item veto the centerpiece of his reelection campaign, and he shouldn't flinch from claiming it as the Republican answer to the deficit issue. There is no way Mr. Reagan can avoid having the Democrats fling the deficit in his face, but there's no way the Democrats can hide the intellectual exhaustion of their own ideas. Moreover, it's likely that the prospect of a line-item veto would unify the supply-side and conventional wings of the Republican party.

The usual argument against the line-item veto—that it would unfairly expand the president's power—is clearly fatuous. Congress in 1974 arrogated to itself responsibility for spending; it has clearly failed. Politics in America most effectively performs its proper role—arbitrating among the competing interests of a huge population of free and informed people—when power is real but rarely used. It's most likely that once a president held the power to veto individual spending items, Congress would sort out for itself what is justifiable spending and what isn't, just as it did before the "budget control act." And if, as now, Congress declined to exercise prudence in managing the people's tax payments, that national constituency that elects a president would surely expect him to use the item veto to restore prudence, regardless of the highly publicized screams of Congress' many constituencies.

That is how the balance of power was intended to work. When it is damaged, as it is now, the American system suffers. The presidential power created by the line-item veto will restore the balance. And by forcing legitimate political horse-trading to take place again on Capitol Hill, it would allow Con-

gress to regain its self-respect. Most important, it would show that Washington is truly serious about solving the deficit problem.●

THE AMERICAN PREDICAMENT

● Mr. GOLDWATER. Mr. President, the history of the world records, very vividly and plainly, that great governments like ours, when they have fallen, have not been caused by armed forces.

But, rather they have fallen because of the disintegration of the urge to remain free and to retain the kind of government that will guarantee freedom.

Lately, many people in the United States have begun worrying about the direction in which the United States has been heading, in my opinion, for too long a time. We see signs of weakness. We hear constant speeches, constant discussions of total disarmament, of giving up the expense of maintaining a military force to guarantee the preservation of our freedom. We forget that the most important service that a government can do for its people is to keep them alive and free and, to do this, unfortunately, it takes money. It takes the expenditure of effort, it takes the dedication of all people living in our country.

For the many, many Americans who have become worried about the direction in which we have been traveling, Mr. A. G. B. Metcalf has contributed an editorial in the summer issue of Strategic Review that I recommend be read by all people who receive the CONGRESSIONAL RECORD, and it should be published by all editors who read the same. He does not mince any words; he is not easy on the press or media; he is not easy on some of our academic friends; but I think in his words we can find, as countries throughout history have found, things to be considered as we continue the direction in which we have been traveling.

I ask that the editorial entitled, "The American Predicament," be printed in the RECORD.

The editorial follows:

THE AMERICAN PREDICAMENT

Americans live in a land as fair and fertile as any on this earth. Blessed by peace and plenty, it has nourished an industrious and bountiful people. Their generous contribution to the human enterprise is a source of pride and satisfaction, but their greatest attribute by far is what has come to be known as the American spirit: a dauntless approach to life, whose crowning jewel is a special understanding of liberty and a dedication to fulfillment in human achievement of the bright promise of freedom.

In freedom's name Americans have given of their blood and treasure in wars around the world. And in freedom's name they have given generously of their substance to bind up the wounds of a war-torn civilization. No nation in history has demonstrated on so large a scale the compassion and selflessness of the American people to its friends and foes alike.

With so much that is good in their way of life and worth preserving, it would be expected that Americans should be the last to waver in exhibiting that pride, instinct for survival and sense of the promise of the future which has brought them to where they now stand.

But there is abundant evidence that these precious qualities are deteriorating to an extent which is affecting our lives and may be foreclosing our national future.

Not so long ago the survival of our country could be assessed as a certainty, not just some measure of probability measured against the fortunes of war. The American people were secure beyond any measure of enemy hostility or the amount of military power amassed by totalitarian states dedicated to the extinguishment of Western civilization.

Within the span of no more than fifteen years, all this has changed. And, as the Soviets tell us, "irreversibly." Now, in terms of the massive buildup in Soviet military power, the survival of the United States and the lives and freedom of its people—rejecting the alternatives of surrender or submission to blackmail—hang upon the fortunes of war with the Soviet Union and its satellites. In such a war—nuclear or conventional—we would, from the outset, be outmanned and outgunned on land, at sea and in the air.

Aleksnadr Solzhenitsyn, at the 1978 Harvard commencement, asked: "Facing such danger, with such historical values in your past, at such a high level of realization of freedom and apparently of devotion to freedom, how is it possible to lose to such an extent the will to defend oneself?

How indeed? How did we arrive at this state of affairs? How did we become victims of the wan love affair with oblivion which enthralls the intellectual elites of the nations of the Free World? How can we excuse that the military capability of the United States has been allowed steadily to decline, with our nation's resources increasingly allocated to purposes secondary—as what is not?—to the national survival? How can the Congress, knowing what it does about the strength of the Soviet Union, respond to "politics as usual" and seek to reduce the defense budget, which is stigmatized and must compete at a disadvantage with ever-mounting and more popular welfare and social outlays. This despite the stark realities of which Sir John Slessor reminded us:

"It is customary in democratic countries to deplore expeditures on armaments as conflicting with the requirements of the social services. There is a tendency to forget that the most important social service that a government can do for its people is to keep them alive and free."

One answer to the puzzling question of how our priorities have come into disarray is found in an informal, albeit powerful, alliance between elements of the news media and the intellectual community. It is a mischievous alliance: it has brought us to the brink of catastrophe. Even though it may not defend the system under which our adversaries live, it constantly works to curtail every act of military preparedness addressed to our survival, while pressing for arms control agreements with the Soviets, regardless of whether such agreements are to our advantage or not.

The citizens of most of the free democracies continue to demonstrate by their votes a clear awareness of the dangers posed by the communist threat. The most recent evidence of this was the stinging defeat administered to the Labor Party in Britain, which had adopted unilateral disarmament as its official policy. Even so, we find the intellectual elites often allied with the liberal press on both sides of the Atlantic, continuing to do everything they can to turn public opinion away from every expression of national power and resolve and to subvert every attempt to provide the defense arrangements which could be their only passport to the future.

In opposing every aspect of defense preparations and working continually to influence foreign policy counter to Western interests, the liberal intellectual community has chosen its arena and its targets. The erosion of public support essential for an effective national policy is their goal: virtual control of the mass media is their instrument. While this alliance between the intellectual world and the liberal press has been with us for some time in the United States, the present level of hostility to all conservative policies of our government is at the highest level in the American experience. And the stakes are high, too: nothing less than the national substance. But it is an important truth that our survival may readily be assured if we are allowed to take the necessary steps to provide for the national safety. By every measure of national power—with the single exception of military power—the resources of Western civilization dwarf the combined economic assets of all the communist states. Indeed, extreme per capita poverty is the universal concomitant of communism even in states richly endowed with natural resources—and there is no indication that the situation is likely to change.

If the Soviet Union with its steady buldup of arms did not menace the survival of the Western world, the technological know-how of the West combined with its vast productive superiority would, in the normal course of world trade, be directed toward making life in that bleak, ideologically warped prisonhouse bloom like a garden. The Soviet military budget could provide the means; the goods and technology of the West would provide the substance.

The alliance between the liberal intellectuals and the communications media has been greatly strengthened by the advent of electronic communications, particularly television, which, through repetition and the union of sight and sound, possesses a hypnotic capability to mold public opinion. Currently, this force is vigorously directed against the present Administration, the only one since the early 1960s which has not been a prisoner of those same intellectual elites and which has faced up to the true nature and the awesome dimensions of the Soviet threat to our way of life.

Each morning sees the credibiity of our government and the authority of the United States under attack by a steady drumbeat of television interviews with spokesmen for views hostile to American interests and all we stand for. American diplomatic initiatives and American involvements where our vital interests are concerned are openly assaulted, even to the point of questioning the integrity of our motives. Recognized adversaries of U.S. policies are carefully milked for negative buzz words designed to seduce public opinion and to erode that public support which is essential in a democratic society to the conduct of foreign policy. The excesses of TV are clearly serving to reveal the antipathy of this medium of communication

to every expression of American power and policy even to the point of questioning the legitimacy of American interests and purposes.

On the world scene, spokesmen for foreign governments antagonistic to us appear on daily TV programs, via satellite, promptly to contradict Presidential pronouncements on matters of the greatest import to the survival of the United States. U.S. foreign policy, as a matter of course, is preempted on daily TV talk shows on which representatives of foreign nations are quizzed, with U.S. Governmental positions interpolated by showbiz TV hirelings who are ignorant of the sensitivity and import of their questions.

Police-state dictators, known for their assaults upon freedom and world peace, are invited to tell the American television audience what they think of us, our institutions, our political leadership and its policies. In the process, officials of our Government are systematically slandered, giving powerful meaning to Senator Moynihan's comment: "The press grows more and more influenced by attitudes genuinely hostile to American society and American government." And, it could be added, were these hostile attitudes to prevail, the very first casualty would be the free press.

The behavior of this communications alliance which challenges the foundations of our survival is rationalized in terms of fourteen words from the First Amendment to the Constitution: "Congress shall make no law . . . abridging the freedom of speech or of the press. . . ." The Amendment, unchanged since the day it was written, clear in its intent, was meant to strengthen, not degrade our society. Not by words nor by implication is there anything in the Amendment that frees a citizen from responsibility for his acts or protects him from their consequences. The media, however politicized, must come to distinguish between views which undermine American policy and those which are intended merely to undermine an incumbent administration as a matter of domestic politics.

In a free democracy where every act, every appointment, every policy is subject to public questioning and public pressure, the mass media have a special responsibility for not impairing, in the name of free speech, the credibility of its duly elected leadership upon whose success in a dangerous world the maintenance of that freedom depends. If America is to survive, it must be governable. This imperative cannot be abridged by those whose right to do so rests on no more authority than the mercantile fact of ownership of a newspaper or a TV station. This is a matter which—in the name of the First Amendment—has gotten completely out of hand, with no elective official or political appointee likely to blow the whistle. Yet the whistle must be blown if our democracy is to survive.

These are some of the grave disabilities (and there are others) which weaken every agency of national power. They have two common denominators: they are self-inflicted and they are the result, over time, of the attitudes of intellectual elites—at home and abroad—toward national power and military force.

However we may strive to rationalize these actions; self-destructiveness, alienation, self-hatred, fear, the consequences are plain. Our society has little hope of surviving when those who are in a position to influence policy manipulate public opinion under the presumed Constitutional protection of freedom of speech, not to advance the national interest but to diminish U.S. national power and our authority in the world.

David Lichtenstein summed it all up more than ten years ago:

"It may be that no democratic society can survive the experiment of allowing an alienated intellectual elite to determine its values, poison the channels of public opinion and cow into submission its normal political leaders . . . Outside the crumbling barriers of Western civilization the leaders of the Communist Empire lie in wait, with infinite patience and considerable cunning, and with vast hordes under their total control. Driven by ideological passion to destroy the last bastions of freedom and democracy the totalitarians may yet succeed in overrunning what remains of a civilization critically weakened by the machinations of its own radical intellectual class."

His unassailable conclusion:

"Should that day come, and should mankind survive the dark age of totalitarian oppression which will follow, historians of the distant future, seeking to analyze the twentieth century murder of Western civilization, will be forced to conclude that the crime was 'an inside job.' "

JOHN SMITHERMAN DEAD OF RADIATION EXPOSURE

● Mr. SASSER. Mr. President, this past Sunday, a Tennessee veteran who proudly served his country passed away. His death was caused by his exposure to radiation in atomic tests after World War II. The tragedy of his death lay in the failure of the Veterans' Administration to acknowledge that his condition was service connected, thereby denying him his just compensation. I had introduced legislation, S. 332, to provide for disability compensation for John Smitherman.

Yesterday, I appeared before the Veterans' Administration Appeal Board on behalf of John Smitherman. This is the seventh time that the VA has considered his plight and I would like to introduce into the record my statement before the Board.

The statement follows:

STATEMENT OF SENATOR SASSER

The circumstances under which this hearing is being held today are truly tragic.

John Smitherman's fight to obtain service-connected disability compensation first came to my attention in 1977. He has fought quietly and with persistence to gain the assistance he earned and so desperately needed.

He wasn't just concerned about his own plight. He was trying to win just treatment for others who suffered from exposure to radiation in atomic tests following World War II.

It was often a lonely battle, but he never waivered in fighting for what he thought was fair and just.

In recent months, he knew that his time was short. But his thoughts were not of himself. His regret was that we would leave a widow with no means of support. He regretted that he had failed to make a breakthrough on behalf of others suffering from radiation-caused cancer and other crippling diseases.

Now, John Smitherman is gone. It's too late for him.

And that, gentlemen, is a tragedy for which the Veterans' Administration and the Government should be ashamed. Here we are, seven years after John Smitherman first began making his appeals to the VA and two days after his death, and his case still has not been resolved.

But it's not too late to help Mr. Smitherman's widow, Rose Smitherman. It's not too late to tell the people who fight for their country that their country won't shirk its responsibilities to them.

Members of the Board, has the Veterans' Administration become so mired in governmental processes and bureaucratic procedures that it cannot see, hear, or understand that the responsibility we have for the care of our veterans is far more important than the administration of arbitrary rules of procedure.

The plea I make to you today is that you remember John Smitherman with action that is just and fair.

Already, the Government has officially recognized that it has responsibility for the care of citizens of the Micronesian Islands who were victims of atomic testing. I don't argue with that recognition." But should we treat those citizens better than the men and women who sacrificed so much for their Nation during World War II? Shouldn't we at least give equal recognition to those who risked their lives for their Nation?

I hope that each of you will search your conscience and render a fair decision in this case. It has been far too long in coming. There is no way to erase the pain and suffering of John Smitherman and the insensitivity that his Government showed toward that suffering while he was alive.

But, please, help his family and demonstrate that justice will be achieved at least after his death.●

S. 1830 AND S. 1831—UNIVERSAL TELEPHONE SERVICE BILLS

● Mrs. HAWKINS. Mr. President, I ask to have printed in the RECORD copies of the Universal Telephone Service Act (S. 1831) and the Access Charge Moratorium Act (S. 1830).

The text of the bills follows:

S. 1830

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled,

STATEMENT OF FINDING AND PURPOSES

SECTION 1. (a) The Congress finds that—

(1) the fifty-year effort to bring affordable and universally available telephone service to the public has served the Nation well;

(2) universal telephone service has contributed to the Nation's economic, social, and political integration and development;

(3) the public benefits from universal telephone service because each telephone subscriber receives a more valuable service when virtually anyone else in the country can be called;

(4) significant rate increases will threaten universal service be forcing many Americans, especially the poor, the elderly, the handicapped, and those living in high-cost areas, to discontinue their telephone service; and

(5) the national interest demands telephone service that continues to be universally available at affordable rates.

(b) The purposes of this Act are—

(1) to assure that Congress has adequate time to consider proposals to reduce the impact of the divestiture of the American Telephone and Telegraph Company and recent decisions of the Federal Communications Commission on local telephone service rates;

(2) to assure the availability to the people of the United States, affordable, reliable, efficient communication services which are essential to full participation in the Nation's economic, political, and social life;

(3) to assure that the costs of maintaining such availability of services are equitably allocated among all users and providers of communication services who benefit from the availability of such services;

(4) to assure that the States have sufficient regulatory authority to maintain universally available and affordable telephone service; and

(5) to assure that the economy, general welfare, and national security of the United States will benefit from continuing improvements in telecommunications technology and the continued development of a competitive telecommunications industry.

DELAY OF EFFECT OF FEDERAL COMMUNICATIONS COMMISSION ORDER

SEC. 2. The decision and orders of the Federal Communications Commission in FCC docket numbered 78-72 (adopted December 22, 1982) shall not have any force or effect during the period commencing on the date of enactment of this Act and ending on December 31, 1984. During such period, applicable rules and procedures in effect, with respect to matters within the purview of such decision and orders, immediately prior to the effective date of such decision and order, as established by the Federal Communications Commission, shall apply.

S. 1831

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; TABLE OF CONTENTS

Section 1. (a) This Act may be cited as the "Universal Telephone Service Preservation Act of 1983".

(b) The table of contents for this Act is as follows:

TABLE OF CONTENTS

Sec. 1. Short title; table of contents.
Sec. 2. Statement of findings and purposes.
Sec. 3. Definitions.
Sec. 4. Access charges.
Sec. 5. Universal Service Fund.
Sec. 6. Universal Service Board.
Sec. 7. Depreciation.
Sec. 8. Primary telephone instrument.
Sec. 9. Lifeline telephone service.
Sec. 10. Prohibition against cross subsidy.
Sec. 11. Interexchange providers.
Sec. 12. Emergency call number.
Sec. 13. Effective date.

STATEMENT OF FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds that—

(1) the fifty-year effort to bring affordable and universally available telephone service to the public has served the Nation well;

(2) universal telephone service has contributed to the Nation's economic, social, and political integration and development;

(3) the public benefits from universal telephone service because each telephone subscriber receives a more valuable service when virtually anyone else in the country can be called;

(4) significant rate increases will threaten universal service by forcing many Americans, especially the poor, the elderly, the handicapped, and those living in high-cost areas, to discontinue their telephone service; and

(5) the national interest demands telephone service that continues to be universally available at affordable rates.

(b) The purposes of this Act are—

(1) to assure the availability to the people of the United States, affordable, reliable, efficient communication services which are essential to full participation in the Nation's economic, political, and social life;

(2) to assure that the costs of maintaining such availability of services are equitably allocated among all users and providers of communication services who benefit from the availability of such services;

(3) to assure that the States have sufficient regulatory authority to maintain universally available and affordable telephone service; and

(4) to assure that the economy, general welfare, and national security of the United States will benefit from continuing improvements in telecommunications technology and the continued development of a competitive telecommunications industry.

DEFINITIONS

SEC. 3. Section 3 of the Communications Act of 1934 is amended by adding at the end thereof the following:

"(hh) 'Interexchange access' means the provision of facilities, services, or other related functions by an exchange common carrier, to provide end use subscribers with access to an interexchange carrier or other person providing interexchange service, for the origination or termination of interexchange communications.

"(ii) 'Direct interconnection' means the provision of interexchange access through facilities specifically designated for such purpose by the exchange carrier involved.

"(jj) 'Indirect interconnection' means the obtaining of interexchange access from an exchange carrier by any means other than direct connection.

"(kk) 'Exchange area' means the area within which telephone exchange service is provided, except that (i) an exchange area may not include an entire State, and (ii) an exchange area that includes any part or all of any standard metropolitan statistical area may not include any substantial part of any other standard metropolitan statistical area.

"(ll) 'Exchange carrier' and 'exchange common carrier' means a carrier authorized by the State commission to provide telephone exchange service on a universal basis.

"(mm) 'Exchange service' means communication services provided among points within one exchange.

"(nn) 'Interexchange carrier' means a carrier that provides interexchange service.

"(oo) 'Interexchange service' means communication services provided among points in more than one exchange area.".

ACCESS CHARGES

SEC. 4. (a) Effective on the date of the enactment of this Act, the decision and orders of the Federal Communications Commission in C.C. docket numbered 78-72 (adopted December 22, 1982) shall cease to have effect. On and after such date of enactment and prior to the effective date of the system of access charges established under the amendment made by subsection (b), the applicable rules and procedures in effect immediately prior to the effective date of such decision and order shall apply.

(b) Section 221 of the Communications Act of 1934 is amended by adding at the end thereof the following new subsection:

"(e)(1) Each State commission shall establish a system of charges to compensate exchange common carriers for interexchange access. The purposes of such system of charges shall be—

"(A) to compensate exchange common carriers for all costs associated with providing or making available interexchange access;

"(B) to achieve equitable treatment of all interexchange carriers and other persons who benefit from the services and facilities of each exchange common carrier through direct or indirect interconnection for interexchange access, and to prevent any contributions between exchange services or functions and interexchange services or functions of such carriers, except as provided in this section and section 225;

"(C) to ensure the continued universal availability of communications service provided by exchange common carriers at reasonable and affordable charges;

"(D) to assure that payments and assignments of costs relating to interexchange access are carried out in a manner which ensures accountability and is open to public examination; and

"(E) to encourage efficient investment decisions and technological development.

"(2) The system of charges established by each State commission shall be designed to ensure the achievement of the Federal telecommunication goals in this section.

"(3)(A) The system established under paragraph (1) shall provide that an exchange common carrier shall file with each State commission a tariff for interexchange access for each of its exchange areas, including each service, facility, and any other supporting function provided by such carrier to interexchange carriers that directly interconnect with the facilities of such carrier. A carrier may file, or a State commission may require a carrier to file, a joint tariff for interexchange access for all of its exchange areas within a single State until January 1, 1988, or such later date as the State commission may, by rule, provide. If more than one exchange common carrier serves an exchange area, such carriers shall submit a joint tariff for interexchange access unless the State commission determines that submission of a joint tariff would not serve the purposes of this title, and shall divide revenues in a manner approved by the State commission. A State commission may authorize or require the filing of uniform statewide tariffs for interexchange access within the State. A State commission may authorize or require exchange common carriers within the State to divide revenues received from charges for interexchange access.

"(B) Each tariff under subparagraph (A) shall specify separate charges for each type of interexchange access on an element-by-element basis. The charges for each type of interexchange access shall be justified by costs. No exchange common carrier shall charge any person for types or elements of interexchange access which such person does not request and obtain.

"(C) Each tariff under subparagraph (A) for access to switched facilities and associated services shall include a minimum of six charges to be recovered from interexchange carriers or customers. Five of the charges shall encompass all costs associated with interexchange access to switched facilities and associated services and one shall be the sur-

charge established and maintained under section 225. The charges of such tariff which encompass all costs associated with interexchange access shall specifically identify separate charges for the relevant portions of—

"(i) the transmission facilities from the subscribers premise to the subscriber's serving end office switch;

"(ii) the switching facilities used to provide services and routing related to the interexchange communication within the exchange area;

"(iii) the transmission facilities from the subscribers serving end office switch to the switch where the interexchange communication enters or leaves the exchange network;

"(iv) the transmission facilities from the interexchange carriers' point of presence to the first exchange switching facility;

"(v) the ancillary services or facilities; and

"(vi) the surcharge established and maintained under section 225.

"(D) Each tariff under subparagraph (A) for facilities entering the exchange area but not accessing switched facilities and associated services shall specifically identify separate charges for the relevant portions of—

"(i) costs incurred by the exchange carrier for facilities and services provided;

"(ii) a per channel or equivalent channel charge to contribute to the recovery of costs associated with the transmission facility from the subscriber's premise to the subscriber's serving and office; and

"(iii) the surcharge established and maintained under section 225.

"(6)(A) Such system shall provide that an exchange common carrier shall submit to the State commission a tariff for interexchange access available from such carrier for interexchange carriers or other persons who indirectly interconnect with the facilities of such exchange carrier.

"(B) Each tariff under subparagraph (A) shall include—

"(i) a charge for the direct costs of any services, facilities, or other factors required solely for the provision of such interconnection,

"(ii) a charge reflecting an appropriate portion of the cost of services, facilities, and other factors which are used jointly or in common to provide exchange service and interexchange access, as ascertained and apportioned under this Act,

"(iii) a charge reflecting the availability of the facilities of the exchange carrier for interexchange access as an alternative for indirectly interconnecting interexchange carriers and interexchange customers to the extent such facilities are not used for interexchange access by such carriers and customers, and

"(iv) the surcharge established under section 225.

"(7)(A) Such system shall provide that an exchange common carrier shall submit to the State commission a tariff under which any interexchange carrier or other person who, without direct or indirect connection to such carrier and for commercial purposes, makes available facilities, services, or related functions for interexchange access, comparable to those available from an exchange carrier for interexchange access, shall pay a charge reflecting the availability of the exchange carrier's facilities for interexchange access as an alternative for the facilities of such person.

"(B) Subparagraph (A) shall not apply with respect to any person who demonstrates to the State commission that comparable facilities, services, or related functions are not available from the exchange carrier involved.

"(8)(A) Provision of interexchange access, and payment therefor, shall be solely in accordance with the applicable tariff, and all costs and payments associated with the provision of exchange access shall be recovered solely through such tariffs in accordance with this subsection.

"(B) The charges under paragraphs (5)(C), (5)(D), (6)(B), and (7)(A) shall be established so that the aggregate amount estimated to be collected under such charges are sufficient to recover the costs allocated to interexchange access under this Act.

"(C) Nothing in this subsection shall be construed to restrict the ability ot State commissions to adopt appropriate tariffing and ratemaking methodologies necessary to preserve universal telephone service under this Act.

"(9)(A) Effective beginning 90 days after the effective date of this subsection, any person who owns or operates facilities to originate or terminate interexchange communication other than through direct interconnection shall notify the appropriate exchange carriers, the Commission, and the appropriate State commissions. Such notification shall be made by means of a summary form which the Commission shall prescribe by rule.

"(B) Any person who fails to comply with subparagraph (A) shall forfeit to the Universal Service Fund the sum of $100,000. The Commission, a State commission or their designees may bring an action in an appropriate judicial forum to enforce this provision.

"(10)(A) The Universal Service Board established under section 410(d) shall establish practices and methods to ascertain and fully apportion the cost of services, facilities, and other factors used jointly or in common to provide exchange services and interexchange access.

"(B) The Universal Service Board shall establish the forms for records, accounts, and memoranda to be kept by carriers providing interexchange access in order to facilitate processing tariffs of such carriers. The authority to establish practices and methods under this subsection shall be exercised in a manner which reflects differences in the size and relevant characteristics of carriers.

"(11)(A) Nothing in this subsection shall be construed to require an exchange common carrier to allow joint ownership of its switching facilities or to require such carrier to allow location on its premises of equipment owned by other persons.

"(B) Nothing in this subsection shall require an exchange common carrier to bill customers of interexchange services, provided that no cost associated with such billing is included in the applicable tariff. Nothing in this subsection shall preclude an exchange common carrier from offering to bill customers of interexchange services, provided that the costs of such billing constitute an element in the applicable tariff.

"(C) Each State commission may permit exchange common carriers which serve not more than fifty thousand customer access lines to use statistical cost data representative of such class of carriers to support tariffs for interexchange access in lieu of individual cost studies.

"(12) Any interexchange carrier or exchange carrier which alleges a violation of paragraph (5)(B), (6), or (7) may petition the Commission for review of the relevant portions of any tariff filed with the State commission, whether or not such carrier or exchange carrier was a party to the tariff proceeding before the State commission involved. Any carrier filing such a petition concurrently shall submit a copy of the petition to the State commission. The commission may proceed to review the relevant portions of the tariff only if the State commission renders an adverse decision or fails to render a final decision with respect to such alleged violations before the end of the 120-day period following the submission of such petition to the Commission. The State commission, in connection with rendering a decision, may conduct such hearings, and accept or require the submission of such testimony and other information, as the State commission considers necessary or appropriate. The Commission may review any such decision of a State commission in the same manner as a decision made pursuant to section 557 of title 5, United States Code.

"(13)(A) The initial tariffs for interexchange access for each State shall be filed no later than 210 days and take effect no later than 364 days from the effective date of this Act.

"(B) During the transitional period, which shall terminate when the system of access charges under this subsection goes into effect, common carriers shall continue to participate in the system of jurisdictional separations of carrier property and expenses in effect on July 1, 1983. The subscriber plant factors, and the rate element corresponding to separations and settlements in any agreement to provide interexchange access, shall be in accordance with the most recent Commission decisions as of July 1, 1983, and thereafter shall not be subject to modification during the remainder of the transitional period. During such transitional period, persons obtaining interexchange access directly from an exchange carrier for purposes of resale shall pay an amount equal to the amount paid carriers pursuant to any agreement to provide interexchange access covered by this paragraph for similar services and related functions, except that, if the rate which a reseller pays for any service to be resold indirectly covers payments made for exchange access, than the reseller shall not be required to pay any additional amount for the interexchange access for which payments already have been made. The Commission, State commissions, and the Universal Service Board shall permit the aggregation of costs and the division of revenues until the Universal Service Fund has been established and funded. To the extent a State commission implements access charges prior to the 364-day period specified in subparagraph (A), the cost and investment associated with the carriers operations in the State, shall be removed from the jurisdictional separations process.

"(C) The initial tariffs specified in subparagraph (A) may provide for adjustments during a 3-year period or such other mechanism to ensure that all interexchange services and customers made an orderly transition from the level of reimbursements made as of the date before the date on which tariffs for interexchange access first take effect to the level of reimbursements made as of the date before the date on which tariffs for interexchange access first take effect to the level of reimbursement which will be paid under this section and section 225.".

UNIVERSAL SERVICE FUND

SEC. 5. Title II of the Communications Act of 1934 is amended by adding at the end thereof the following:

"UNIVERSAL SERVICE FUND

"SEC. 225. (a) To assure the continued availability of universal transmission services, including service in rural or remote areas, at reasonable and affordable charges, there is hereby established the Universal Service Fund. On an annual basis, the Universal Service Board may determine uniform surcharges on the amounts collected by exchange common carriers under paragraphs (5), (6), and (7) of section 221(e), such that the Fund is sufficient to make the payments under this section.

"(b)(1) An exchange carrier is entitled to receive payments from the Universal Service Fund if the relevant State commission is unable to meet the exchange carrier's revenue needs within the State and certifies to the Universal Service Board that—

"(A) the statewide average access charge for the recovery of costs under section (5)(c)(i) is in excess of 115 percent of the national average;

"(B) the residual statewide average local loop cost is in excess of 125 percent of the national average; and

"(C) the local exchange revenue requirement per subscriber access line for such exchange carrier is in excess of 125 percent of the national average.

"(2) The amount of payments under paragraph (1) in the case of any eligible exchange carrier shall be determined by the Universal Service Board under section 410. The percentage of the costs for which payments are made to any carrier under this section shall vary to the extent such costs vary as compared to the national average.

"(c)(1) The Universal Service Board shall establish and oversee an interexchange access board (consisting of representatives of exchange common carriers, interexchange carriers, and other customers directly obtaining exchange access) to administer the accounts of the Universal Service Fund. The interexchange access board shall administer the accounts of the Universal Service Fund in a manner which expedites the disbursement of funds to exchange carriers through the use of rules and procedures which eliminate burdens of delays in the certification or application process to the maximum extent practicable, and which permit disbursement decisions to be made on the basis of uniform, general, simplified standards of eligibility, as set forth by the Universal Service Board.

"(2) Payments from the accounts of the Universal Service Fund to individual exchange carriers shall be subject to audit and adjustment by the Universal Service Board to ensure that—

"(A) any certification or application is valid and based upon proper allocation of costs in accordance with guidelines established by the Universal Service Board under section 410;

"(B) such payments are used to maintain reasonable rates or charges;

"(C) such payments do not remove incentives for the efficient provision of exchange service, except that any adjustment based upon the factor established in this subparagraph shall be effective only on a prospective basis; and

"(D) such payments do not unreasonably impede the entry and operation of competitive suppliers of exchange service.".

UNIVERSAL SERVICE BOARD

SEC. 6. Section 410 of the Communications Act of 1934 is amended by adding at the end thereof the following:

"(d)(1) Not later than 30 days after the effective date of this section, the Commission shall establish a Universal Service Board pursuant to subsections (c) and (e) for the purpose of—

"(A) ensuring equitable and efficient economic treatment of users of common carrier services and exchange services and carriers providing such services;

"(B) providing for an orderly transition to the system of charges for interexchange access established under section 221(e); and

"(C) achieving cooperation between the Federal Government and the States in carrying out the purposes of this title.

"(2) In accordance with subsection (c), the Universal Service Board—

"(A) shall establish and maintain formulas consistent with the purposes of section 225 for defining and comparing national average costs and charges and uniform practices for determining the payments required by the Universal Service Fund, and shall oversee the distribution of funds from the Universal Service Fund by the interexchange access board in accordance with section 225;

"(B) shall make such changes and modifications in the system of jurisdictional separation of carrier property and expenses in force on the effective date of this section as may be necessary or appropriate for the orderly transition to the system of charges for interexchange access established under section 221 (e);

"(C) shall determine at regular intervals the relative assignment by exchange common carriers of the cost of factors of production which are used jointly or in common to provide exchange service and exchange access; and

"(D) shall be required to conduct a biannual study to determine the demand for local exchange service and the measure of market penetration by exchange carriers.

"(3) In making the determination specified in paragraph (2)(C), the Universal Service Board shall—

"(A) encourage reliance upon exchange common carriers as distributors of interexchange transmissions, and promote continued universal availability of transmission services provided by exchange common carriers at reasonable and affordable rates; and

"(B) take into account, consistent with section 221(e)(1)—

"(i) the cost of capacity or special characteristics required for exchange service and exchange access;

"(ii) investment and associated costs (including depreciation and maintenance) needed to provide plant availability to meet demand (including peak demand) for exchange service and exchange access; and

"(iii) the use of exchange facilities for exchange service and exchange access.

"(4) The Universal Service Board may, in accordance with title 5, United States Code, appoint such staff as it considers necessary to carry out its functions under this Act.

"(e) Notwithstanding subsection (c), the Board shall consist of five Commissioners of the Commission, and of four commissioners nominated by the national organization of the State commissions (referred to in subsection (c)), and approved by the Commission.".

DEPRECIATION

SEC. 7. Section 220 of the Communications Act of 1934 is amended by redesignating subsection (b) as subsection (b)(1) and by inserting after subsection (b)(1) (as redesignated) the following new paragraph:

"(2)(A) State commissions shall have authority (i) to establish classifications for exchange facilities and the portion of facilities used jointly for exchange and interexchange services assigned to the States by the Universal Service Board under section 410, and (ii) to prescribe the methods by which exchange carriers shall recover investments in such facilities.

"(B) Such methods shall provide for recovery of investments in such classes of facilities, over the useful life of such facilities, in a manner which promotes the economic viability of the exchange carriers involved.".

PRIMARY TELEPHONE INSTRUMENT

SEC. 8. The Communications Act of 1934 is amended by inserting after section 226 (as added by this Act) the following new section:

"STATE AUTHORITY TO REQUIRE BASIC ONE-LINE TELEPHONE

"SEC. 227. (a) A State commission may require any exchange common carrier to lease and maintain on request a single basic one-line telephone instrument, and associated inside wiring, to any subscriber (or group of subscribers at a single premise) within such State on the basis of a tariff that includes all costs of providing and maintaining such instrument and wiring.

"(b) For purposes of this section, the term 'basic one-line telephone instrument' means the type of basic two-way switched telephone instrument which the State commission determines to be generally available to the public and in use on the date of the enactment of this section, or which the Commission determines by rule to be generally recognized as essential for basic participation in nationwide telecommunications. In making any such determination, the Commission may not reduce the quality of the type of basic one-line telephone instrument available on the effective date of this section.".

LIFELINE TELEPHONE SERVICE

SEC. 9. Section 201 of the Communications Act is amended by adding at the end thereof the following new subsection:

"(c) Each State commission shall establish rules or tariffs for the provision of lifeline telephone service by exchange carriers which consists of providing minimum telephone exchange service at a discounted rate to encourage universal telephone service.".

PROHIBITION AGAINST CROSS SUBSIDY

SEC. 10. Section 201 of the Communications Act of 1934 (as amended by this Act) is amended by adding at the end thereof the following:

"(d)(1) No carrier or exchange carrier may use revenues from regulated communications services to defray any costs associated with its entry into or engaging in commercial activities the prices for which are not regulated by the Commission or any State commissions.

"(2) Neither the Commission nor any State commission may consider the revenues or profits derived from the offering of any unregulated products or services (other than printed directory advertisements, cellular mobile radio services or other local telephone services provided under tariff) by any carrier or exchange carrier in determining the revenue requirements of any common carrier service of such carrier.".

INTEREXCHANGE PROVIDERS

SEC. 11. The Communications Act of 1934 is amended by inserting after section 227 (as added by this Act) the following new section:

"STATE AUTHORITY TO REQUIRE INTEREXCHANGE PROVIDER OF LAST RESORT

"SEC. 228. (a) Each State commission is authorized to designate one or more carriers that operate within that commission's jurisdiction as the provider of last resort for long distance service.

"(b) Each State commission is authorized to designate the minimum contiguous geographical area or areas within each State in which an interexchange carrier shall provide service provided that no such area may encompass a larger territory than that served by an existing interexchange switching facility.".

EMERGENCY CALL NUMBER

SEC. 12. The Communications Act of 1934 is amended by inserting after section 228 the following new section:

"EMERGENCY CALL NUMBER

"SEC. 229. (a) The Congress finds that—

"(1) the nationwide development of universal telephone service has been indispensable to the creation of local health, fire, and law enforcement emergency response services;

"(2) public access to such emergency response services is essential to effective lifesaving, firefighting, and other emergency response activities;

"(3) establishment of a uniform 911 emergency number in local exchange across the Nation is necessary to prevent confusion among our increasingly mobile population as to how emergency response teams can be contacted in different parts of this Nation; and

"(4) establishment of such a nationally uniform emergency access number is appropriate at this time in light of current efforts to restructure our national telephone network to be consistent with today's changing telecommunications market.

"(b) The Federal Communications Commission shall, as soon as practicable following the date of the enactment of this Act, issue such regulations as may be necessary to require each State public utility commission that has not previously acted to require telephone companies serving the local exchanges within their jurisdiction to make available the three digit number '911' for use as an emergency access number.".

EFFECTIVE DATE

SEC. 13. The amendments made by this Act shall take effect on the date of the enactment of this Act.

FLORIDA WATER RESOURCES

● Mr. CHILES. Mr. President, I should like to bring to the attention of my colleagues the newly designated Carl S. Swisher Endowed Chair in Water Resources at the University of Florida. Water resources are vital to the survival and prosperity of any State and because we, in my State, have experienced some serious water problems, learning about these resources becomes that much more important. This chair will help supply the information necessary to solving these problems.

Florida is one of the fastest growing States in the Union. If you combine rapid population growth and the resulting need for more water with an expansive irrigation system for agricultural production, then you can see why our water resources have become so precious. Not only do we have to deal with this increased demand for water but we also must cope with a decrease in the quality of our water. Industrial and agricultural prosperity in Florida along with urbanization have not come without a price. Our surface and ground water systems have become polluted and thus there has been a reduction in the amount of safe, drinkable water. The south Florida aquifer, the vital water supply for millions of people, has been jeopardized by the building of various water projects.

Now more than ever, we must be conscious of our water problems and I applaud the generosity of the Swisher Foundation in donating this $1 million endowed chair to the University of Florida's School of Forest Resources and Conservation. It is through this chair that the university hopes to create the leadership to discover the basic knowledge about the chemical, physical, and biological characteristics of Florida's water resources. Right now, there is not sufficient information available to allow Federal, State, and local officials to make the best decisions possible. I believe this chair marks an important beginning in providing this critical knowledge. I want to commend the Swisher Foundation and the University of Florida and its School of Forest Resources and Conservation for their farsighted approach to one of Florida's most pressing problems. Understanding our water resources will not only help us to maintain the quality of life we now enjoy, but will allow us to look forward to a better Florida in the future.●

THE WARNING SIGNS OF YOUTH DRUG ABUSE

● Mrs. HAWKINS. Mr. President, one of the questions asked increasingly by parents is: How can I tell if my child is using drugs? This is a most difficult question when signs and symptoms associated with behavior are used as a basis for judgment. It is difficult to separate typical adolescent behavior from drug-induced behavior, but the pharmacists against drug abuse campaign has identified eight ways that parents can tell if a child is using drugs.

First. Does the child seem to be changing? Is the child becoming: More irritable, secretive, unpredictable, hostile, depressed, uncooperative, apathetic, withdrawn, and/or sullen? Is the child less affectionate; easily provoked; oversensitive?

Second. Is the child becoming less responsible? Is the child: Not doing chores; late coming home; tardy at school; forgetful of family occasions (birthdays, and so forth); not cutting the grass; allowing his room to be untidy; not completing homework?

Third. Is the child changing friends, dress code, or interests? Has the child: Adopted a new group of friends, their language and hair styles; switched clothing styles; become reluctant to talk about new friends; become very interested in rock music and concerts; become less interested in school, sports, and academic hobbies; refused to talk about parents of new friends; started insisting on more privacy; demanded permission to stay out later than usual?

Fourth. Is the child more difficult to communicate with? Does the child: Refuse to talk about details of friendship group activities; refuse to discuss drug issues; become defensive when negative effects of drug use are discussed; strongly defend occasional or experimental use of drugs by peers; insist that adults hassle their children about drugs; begin to defend rights of youth; prefer to talk about bad habits of adults?

Fifth. Is the child beginning to show physical and/or mental deterioration? Does the child show: Disordered thinking or ideas and thought patterns that seem out of order; heightened sensitivity to touch, smell, and taste; increased appetite from marijuana smoking (known as the munchies); loss of ability to blush; decreased ability in rapid-thought processes; the amotivational syndrome; weight loss?

Behavioral changes may occur a period of a few months, a summer, or over a year or more. These behavioral patterns should be monitored closely by the parent. More blatant behavior will begin if the child can manipulate his way through the aforementioned examples, and more obvious drug-use behavior will begin to occur.

Sixth. Is the child's behavior becoming more intolerable to the parent? Does the child: Demand his right to drink alcohol; refuse to spend additional time on studies even though grades are down; insist that teachers are unfair; become extremely irritable; refuse to do chores; use bad language; come home late with alcohol on breath; claim people are telling lies about him; claim never to have smoked pot; prefer not to eat with or spend time with the family; act very secretive on the phone?

After behavioral clues to drug use are apparent, there usually comes the telltale physical evidence which is difficult to deny. The child will usually lie or give half-truths to parents, when caught.

Seventh. Is the child becoming careless in his drug use? Does the child:

Forget to replace the liquor stolen from parents' cabinet; put the bottle between mattress and boxspring; leave the roach in a flower pot, the bathroom, or in a car ashtray; forget who vomited in the family car; insist that marihuana found in a car or room belongs to someone else?

Eighth. Is the child becoming drug-dependent? Does the child: Take money from his parents, brothers, or sisters; steal objects from home that are easily converted into cash; lie chronically; drop out of school?

Is the child: Caught shoplifting; charged with burglary; charged with prostitution; arrested for drug use or a delinquent act?

Does the child attempt suicide?

Our Nation's drug abuse crisis demands immediate and aggressive action. I ask that my colleagues join me in promoting legislative and administrative initiatives to stop this threat.●

CLINCH RIVER'S COST AND DATE OF COMPLETION—CONSTANTLY MOVING TARGETS

● Mr. HUMPHREY. Mr. President, supporters of the Clinch River breeder reactor project and of the proposed off-budget Government guaranteed project financing plan insist that the Department of Energy's (DOE's) March 1983 estimates of how much time and money it will take to complete the project—6.6 years and $2.5 billion—are certain and final.

Ironically, in a sense they are right. According to a recent Congressional Research Service study, the project has always been 7 or more years and $2.1 billion or more—in constant 1983 dollars—away from completion. In fact, this has been the case at least as far back as 1974—before the declared slowdown of 1977—when only $61 million—in constant 1983 dollars—had been spent on the project and in 1975 when no more than $190 million—in constant 1983 dollars—cumulative had been spent on the project.

Nearly 10 years later with the project's design 92-percent complete, 71 percent of its components on order, its licensing on a fast track, and $1.5 billion spent DOE is still estimating that it will take additional $2.5 billion—in constant 1983 dollars—and another approximate 7 years to complete.

Of course, last March DOE projected that the project's completion schedule could be compressed down to 6.6 years but just recently DOE admitted that these March estimates were probably wrong, that an additional 15 months could be required to complete the reactor. Right now DOE is claiming that this additional 15-month slippage would add $123 million to the project's total cost but it is difficult to believe that after 9 years of constant drift, the completion cost or date will be final with this.

The project's backers, of course, do not like talking about how constant this cost drift has been. They would rather impress us with confidence; DOE estimates are sound, according to them. The plant might turn a profit. In light of the project's past history this might sound silly.

Yet, these people are not crazy. Ask them to assume a portion of the responsibility for further project cost overruns and they immediately turn the discussion away from surplus revenues and how firm DOE estimates are to just how risky the project is and how despite its budget justification label as an industrialization project, it really is more like fundamental research and development.

Apparently, these people know the project's past estimated completion date and cost trend lines. Certainly, they are all emphatic that any project cost overruns or unforeseen operation cost overruns should be picked up by the Federal Government. Indeed, reading their suggested plan carefully, one gets the impression that they are less concerned about the project's costs—and assuming any of them—than they are in securing guaranteed revenues and tax benefits.

In this they are clever but perhaps too much so, for their behavior raises a question. If they are so clever, why do they assume that the Senate and the Congress are so stupid as to approve of their plan?

Mr. President, it is these kinds of questions that need and would get fair airing if the Senate held hearings on the Clinch River plan in the appropriate authorizing committees. In the hope that such hearings would be held if more basic information about the project and the financing plan were shared, I ask that the full text of the Congressional Research Service study, "DOE Estimates of the Cost and Time To Complete CRBR" be printed in the RECORD.

The study follows:

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, D.C., September 13, 1983.

To: Honorable Gordon Humphrey, Attention: Henry Sokolski.

From: Robert Civiak, Analyst in Energy Technology, Science Policy Research Division.

Subject: DOE Estimates of the Cost and Time To Complete CRBR.

In response to your request, enclosed is a summary of past estimates made by the Department of Energy (DOE) and its predecessors of the time and cost to complete the Clinch River Breeder Reactor (CRBR).

In 1972, the Atomic Energy Commission estimated that it would cost $699 million in year of expenditure (YOE) dollars to build a demonstration breeder reactor and operate it for 5 years. However, the first cost estimate based on the design for the Clinch River Breeder Reactor Plant now under construction was not made until August 1974. Since then, the Atomic Energy Commission (AEC), the Energy Research and Development Administration (ERDA) and the Department of Energy (DOE) have released four major revisions of the cost estimate to complete the project.

The five official total cost estimates for the CRBR project made since 1974 are listed in table 1 in year of expenditure (YOE) dollars. The total estimated cost in 1974 and 1983 dollars is also shown in table 1, as well as the projected date for the reactor to achieve criticality.

The estimates presented in table 1 may not be strictly comparable, since there have been many changes in the project since 1974. In addition, the March 1983 estimate does not include operating costs and revenues during the 5-year demonstration period, which is included in the earlier estimates.[1] Nevertheless, the estimates do reflect the increasing cost of the project.

In response to your specific request for a summary of changes in the estimated cost to complete CRBR in constant dollars, we have subtracted the prior spending on the project in constant dollars from each of the total cost estimates. The results are given in table 2.

For completeness, the annual spending figures which were used in calculating the prior project spending are shown in table 3.

We hope this information meets your needs. Please call if we can be of further assistance (287-7055).

TABLE 1.—CRBR COST ESTIMATES

[In millions]

Date of estimate	Total cost— YOE dollars	Total cost— 1974 dollars	Total cost— 1983 dollars	Estimated criticality
August 1974	1,736	1,240	2,508	July 1982.
August 1975	1,950	1,316	2,662	October 1983.
April 1977	2,194	1,454	2,941	June 1984.
December 1980	3,197	1,729	3,497	February 1990.
March 1983	4,003	2,055	4,157	November 1989.

Sources: August 1974 to December 1980 estimates: DOE materials reprinted in U.S. Congress. House. Committee on Energy and Commerce. Subcommittee on Oversight and Investigations. Clinch River Breeder Reactor. Hearing, 97th Congress, 1st Session, July 20, 1981. Washington, U.S. Govt. Print. Off., 1981. 462 p.

March 1983 estimate: U.S. Department of Energy. Report to the Congress on Alternative Financing of the Clinch River Breeder Reactor Plant Project. March 1983. DOE/NE-0050 p. 29.

TABLE 2.—ESTIMATED COST TO COMPLETE CRBR

[In millions]

Date of estimate	Prior outlays [1] 1974 dollars	Prior outlays [1] 1983 dollars	Remaining cost 1974 dollars	Remaining cost 1983 dollars
August 1974	30	61	1,210	2,447
August 1975	94	190	1,222	2,472
April 1977	289	585	1,165	2,356
December 1980	629	1,272	1,100	2,225
March 1983	991	2,005	1,064	2,152

[1] Calculated to the date of the estimate, by interpolation from cumulative yearly outlays given in table 3.

[1] In December 1980 DOE estimated that operating costs for the demonstration period would be $145 million (1974 dollars) and revenues would be $151 million (1974 dollars).

TABLE 3.—CRBR PROJECT SPENDING

[In millions][1]

Fiscal year	Annual outlays		Cumulative outlays	
	YOE dollars[2]	1974 dollars[3]	1974 dollars	1983 dollars
1974	29.9	29.9	29.9	60.5
1975	70.1	63.9	93.8	189.7
1976[4]	140.2	120.7	214.5	433.9
1977	184.4	148.4	362.9	734.0
1978	166.2	124.7	487.6	986.2
1979	175.1	122.1	609.7	1,233.2
1980	189.4	117.5	727.2	1,470.9
1981	192.9	106.9	834.1	1,687.1
1982	194.1	100.6	934.7	1,890.6
1983[5]	275.7	136.3	1,071.0	2,166.2

[1] Outlays include funds provided from Federal and private sources.
[2] YOE outlays provided by Joe Bartell, Department of Energy.
[3] Conversion to 1974 dollars based upon the implicit price deflators for U.S. Government purchases of goods and services listed in Congressional Research Service Report No. 83-45 C, Selected Economic Statistics, p. 11.
[4] Plus transitional quarter.
[5] Projected.●

RADIO MARTI

● Mr. HELMS. Mr. President, I am gratified by yesterday's Senate unanimous approval of Radio Marti, and take this occasion to commend the distinguished Senator from Florida (Mrs. HAWKINS) for her able leadership in bringing these endless months of debate to an end.

I am heartened by the efforts of the Senator from Florida, Mr. President, because she has brought to fruition a program which has been many years in the making. There are many who have worked hard to bring this about in cooperation with the distinguished Senator. I myself some time ago proposed the creation of a Radio Free Cuba under the VOA. As I recall, it was passed by the Senate, but the underlying legislation never was completed by the Congress. So it is appropriate today that the final form of Radio Marti is still encompassed within VOA in the legislation we have passed.

There is a deep yearning among the oppressed people of Cuba, people who are virtual slave laborers for the Soviet Union, to hear the truth about the actions of their dictator, Fidel Castro. They want to have the truth about the sufferings which Castro is still imposing upon the Cuban people. I am therefore pleased that the measure approved unanimously by this body yesterday contains the explicit finding that such reporting should constitute the content of the broadcasts of Radio Marti.

Mr. President, we will long commemorate the resolve with which we have decided that freedom-loving Cubans need the truth, long for it, and can now rely on us to get it to them. It is highly appropriate that the name of José Marti has been chosen for these broadcasts to Cuba.

He was a Cuban poet and political philosopher who lived in the United States for 15 years while he organized the Cuban war for independence.

He wrote for Central American, South American, and U.S. newspapers where he presented to his readers a comprehensive view of life and customs in the United States. Shortly after arriving in the United States he wrote:

I am, at last, in a country where everyone looks like his own master. One can breathe freely. Freedom being here the foundation, the shield, the essence of life. One can be proud of his species. Everyone works, everyone reads . . . I am deeply obliged to this country where the friendless find always a friend and a kind hand is always found by those who look honestly for work.

Marti, being a journalist, made use of the freedoms available in American society. Just like many of our editorials and commentaries in the media today, he could, on the one hand, write admiringly of Emerson, Whitman, the Brooklyn Bridge, the American spirit and, at the same time, express criticism of U.S. foreign policy, particularly its expansionist character at the turn of the century.

Jose Marti is part of the Americas' heritage of freedom. With Jefferson, Washington, Lincoln, and Bolivar, he has a place in the heart of the freedom-loving people of this hemisphere.

"Respect for the freedom and ideas of others, of even the most wretched being," he wrote, "is my fanaticism. If I die, or am killed, it will be because of that."

Mr. President, the foundation of Radio Marti is the love of freedom. Cuban people who have come to our own shores can testify how important that freedom can be. I would like especially to commend the efforts of the Cuban-American Foundation, of Washington, D.C., for its untiring efforts to see the beacon of freedom directed to their fellow Cubans under Communist captivity in Cuba. Mr. Jorge Mas and Mr. Frank Calzon should be commended by all who cherish freedom for the oppressed of the world. They and their colleagues have spent long hours bringing the truth of the Cuban experience to the attention of many of our Members who, for whatever reason, did not esteem the cause of Radio Free Cuba. Without them, I am sure, the issue would still be festering today on some back burner.

I conclude, Mr. President, with this thought by Jose Marti. It should be the motto of Radio Marti, and a guiding principle for us all when considering the nations dominated by Communist tyrants anywhere in the world. Mr. Marti addressed the cause of winning freedom from tyranny, and said: "The sufferings endured for the sake of winning freedom make us love it the more." Mr. President, let us all renew our love for freedom. May Radio Marti make the Cuban love for freedom burn all the stronger.●

TAXING EMPLOYER-PROVIDED HEALTH BENEFITS—S. 640

● Mr. PACKWOOD. Mr. President, on June 22, 1983 the Senate Finance Committee held hearings on the administration's proposal to tax employer-provided health benefits, S. 640. Testifying for the administration were Assistant Secretary John Chapoton, Department of Treasury, and Assistant Secretary Bob Rubin, Department of Health and Human Services. In addition, panelists from business groups, health providers, labor organizations, and professional groups testified on both sides of this issue.

Mr. President, I am opposed to S. 640 because a tax on employee health benefit plans would be discriminatory and unfair to workers; and because it would be ineffective as an answer to health care inflation. A tax on health benefits would hurt older workers, women, workers in high risk occupations, and workers who live in areas with relatively high living costs. It may force many workers to give up employer-provided health benefits, which would threaten the overall health of our work force.

The Finance Committee hearing examined at length the issue of taxing employee health benefits. I have selected a number of questions and answers from the transcripts of the hearings which I think best highlight the basic problems of the proposal.

Mr. President, I ask that the questions and answers I have selected from the hearings be included in the RECORD following my remarks.

The material follows:

QUESTIONS AND ANSWERS

Senator PACKWOOD. We are starting hearings this morning on the Administration's proposal on the Health Cap and general testimony on fringe benefits in general.

Our first two witnesses today are Buck Chapoton, the Assistant Secretary for Tax Policy, and Dr. Rubin, the Assistant Secretary for Planning and Evaluation.

Buck, I know you've got to meet with the President at 11:00, so if you want to start with your statement, abbreviate it if you feel you would like to, and I think we will have a few questions and will try to get you out as soon as possible.

* * * * * *

Senator PACKWOOD. Buck, can you tell me how you have estimated the revenue to the Treasury that will be gained if the cap is enacted?

Mr. CHAPOTON. Senator Packwood, there is an assumption that in the long run there will be a shift to more cash compensation and less medical insurance.

Initially, though, we just look at the plans that would be over the cap and that are projected to be over the cap in 1984 and beyond. In other words, there is an estimate, then obviously you are picking up taxable income.

Senator PACKWOOD. So, Treasury in this case has followed its normal revenue projection on a static basis. They just looked at the benefit plans that are over the cap and

assumed they would be kept at that level, or lowered down to the cap, or one of the two. I'm not quite sure, exactly, what assumptions you have used.

Mr. CHAPOTON. Well, they will tend to reduce the benefits under the cap; but I think we would assume that would be replaced possibly in part with other tax-free benefits, and that is built into the revenue estimates as well. In other words, the compensation alternative might be another tax-free benefit not subject to a cap, or at least under the cap if that benefit has its own cap, and partially as taxable compensation.

Senator PACKWOOD. Would you send to me a letter very specifically laying out your assumptions? Because I don't think you are going to collect as much money as you think, and I would like to know what your assumptions are.

Mr. CHAPOTON. Yes; I would be happy to.

* * * * *

Senator PACKWOOD. Is the administration going to have any position on the statutory fringe benefits that now exist? Any position on limiting those other fringe benefits?

Mr. CHAPOTON. No, sir. We have not made a proposal, and I know of no reason we would be taking a position on that at any time this year.

Senator PACKWOOD. The reason I ask that, every now and then the ghosts of Stanley Surrey appear before this committee and want to tax all fringe benefits, because they feel the only purpose of the Tax Code is to collect money, not to provide social benefits.

I have said this to you, and I would say it to the administration: I think the one reason we do not have any significant demand for national health insurance in this country among those who are employed is because their employers are paying for their benefits, by and large. And we will never go to the situation we have in Great Britain so long as that system exists, and I hate to see us nibble away at it for fear you are going to have the demand that the Federal Government take over and provide the benefits that would otherwise be lost. And I hope the administration is considering that downside.

Mr. CHAPOTON. I think that question has been discussed in consideration of this proposal, which is basically cost containment.

* * * * *

Note: The Committee then received testimony from Dr. Bob Rubin, Assistant Secretary of Health and Human Services for Planning and Evaluation.

* * * * *

Senator PACKWOOD. Doctor Rubin on the bottom of page 8 and the start of page 9 of your testimony I think you reveal what you hope will happen if the cap is created. You put on a cap, and the natural inclination of the employer and of the union bargaining agent will be to try to come down to that cap and perhaps do it by increasing deductibles or coinsurance. Do I presume that is what you think is going to happen? You list a variety of options, but that is the one you seem to give the most preference and hope to.

Dr. RUBIN. Well, that is certainly what history seems to teach us. I think we have just completed a survey, or a survey was done for us by the Haye Associates. What they found is that about 13 percent of surveyed firms have recently increased their deductibles, and about another 21 percent were considering such an increase. Roughly 16 percent had also increased their coinsurance or were considering an increase in their coinsurance.

So certainly that is one effect. I think that there are other plans, though—other companies—that have looked very carefully at restructuring their plans to provide more catastrophic and so-called back end insurance and less first dollar sort of no-questions-asked comprehensive coverage. We would hope that both factors would be at work there.

Senator PACKWOOD. And you presume further that if the employer drops their health insurance payments to $175 a month, that there will be no way they can avoid paying the difference in increased wages? They won't be able to simply reduce their costs by that amount, is that correct?

Dr. RUBIN. Either wages or other forms of nonwage compensation, yes.

Senator PACKWOOD. Well, let me ask you this: If they do it in the form of other nonwage compensation or if they shift it over into other nontaxable fringe benefits, which they have a fair amount of room to do, then how does the Government gain any revenue from this?

Dr. RUBIN. I think that was the nub of your question to Mr. Chapoton asking for the assumptions based in our cost estimates. And as I think he indicated, there are certainly some assumptions about shifting in the long run into cash wages. There is also a smaller percentage that is built into the assumptions in terms of a shift into nontaxable fringe benefits, and as he indicated the Treasury Department will be providing those figures to you.

Senator PACKWOOD. Now, to the extent that the cap works as you hope—let's assume you reduce it to the $175 and you increase the deductibles so that the employee is going to have to pay more of the first dollar cost, or first $100, or first $500 of cost—does not that indeed unfairly impinge on the lower wage employees?

You expressed a concern in your statement earlier about the bias of health plans toward high-wage employees. Doesn't a flat deductible discriminate against lower wage employees?

Dr. RUBIN. Well, certainly a flat deductible may well do that. But what we have seen and the experience that our private sector survey has indicated that some companies are not doing that, that they are linking their deductibility or the coinsurance to some sort of income determination by category within the company. Under that circumstance, clearly that would not be the case.

Senator PACKWOOD. That is true, although as I say, 5 years ago I did not have the votes to get rid of that discrimination.

But what you are saying then is that employer provided benefits would on the average be lowered to the $175 cap. And as a result, the $50,000 employee may have $1,000 deductible, and the $15,000 employee may have a $100 deductible.

Dr. RUBIN. As a hypothetical, sure.

Senator PACKWOOD. But you won't be able to have that if you get rid of the discriminatory provisions.

It seems to me you've got a Hobson's Choice. If you get rid of the discriminatory provisions, the deductible discriminates against the low-wage employee. If you don't get rid of the discriminatory provisions, then the whole plan tilts toward the high-income employee.

Dr. RUBIN. Well, the other piece of that, of course, is that there are other alternatives that we know are cost effective ways of delivering health care that in general don't have deductibles or coinsurance.

For example, in northern California, the Kaiser program, which is a health maintenance organization, as you know, for about $170 will provide comprehensive hospital coverage, comprehensive medical coverage, with a maximum coinsurance of $1 for an office visit; it will provide preventive health services, mental health benefits, et cetera.

Senator PACKWOOD. But now you are talking about a whole different subject, and that is the relative cost of an HMO delivering services versus a non-HMO.

Dr. RUBIN. No. I think what we are talking about here is making employees and employers aware of the full range of options, and that by providing the most cost-effective benefit programs for their employees they can maintain the full level of benefits and still come in under the cap, regardless of their salary level.

Senator PACKWOOD. I am very, very familiar with the Kaiser plan—they are a large plan in Oregon. Henry Kaiser came in during World War II at the shipyards and covered his employees. And today, believe it or not, in the State of Oregon the Kaiser health plan is the eighth biggest employer in the State of Oregon, which gives you an idea of the magnitude of its coverage.

I have visited their hospitals and their plants. I have a high regard for them. But I think you are talking about two different subjects, because they have proven that they can provide a certain kind of health care to the satisfaction of employees. That, I find, is a different subject from the health cap.

* * * * *

Note: Senator Bradley questioned Dr. Rubin about the impact of S. 640 on different types of industries.

* * * * *

Senator PACKWOOD. Well, let me pursue what Senator Bradley was saying.

You are not suggesting, Doctor, that this discriminatory cap, as I call it, is going to fall equally on all segments of industry, are you?

Again I will go back to my labor relations days. There were unions that had on the average older employees than other unions. And my hunch is that you will still find this in industry today—whether it is geopraphic or whether it is by industry—that certain employers simply have on the average older employees than other employers do.

Dr. RUBIN. That may well be. I think that what you would find if you would take a look at which industries are affected, I think you will see that they may not have very much to do with either the age of the workers or the danger involved in those particular occupations.

Senator PACKWOOD. It isn't danger so much in the sense of workers compensation and injuring yourself; it's that as you get older, on the average you have higher health costs.

Dr. RUBIN. Well, that's certainly costs.

Senator PACKWOOD. So if you've got an employer that on the average has an older work force, that employer, if they have a $175 cap, is going to find it a lot rougher on his or her employees than one that has a younger age category in their employ.

Dr. RUBIN. Senator, at first you used the distinction of industries in talking about age. There, I think that is a lot more difficult point to make than to say that clearly

certain employers within individual industries may well have a different age distribution among their employees. And certainly if, in point of fact, they have higher expenses and are experience-rated, they certainly will have a higher premium, and they will impact against the cap.

Senator PACKWOOD. I think I heard what you said. Say that again.

Dr. RUBIN. I said that I think you need to draw two distinctions. Your first comments spoke to industrywide. You said something to the effect that industries may age in a disproportionate way.

Senator PACKWOOD. Then let me rephrase it.

There are certain industries in this country that on the average will have higher age workers than other industries. I am not talking about within the industries. I don't know if Bethlehem Steel has on the average older or younger employees than United States Steel. But there are certain industries that have demographically higher age groups working than others.

My hunch would be—I don't know; I've never looked at it—that the average age of McDonald's employees is younger than the average age of United States Steel's employees. [Laughter.]

Dr. RUBIN. That's probably true. And I think that the question really goes to whether or not——

Senator BRADLEY. Don't go out on a limb on that. [Laughter.]

Dr. RUBIN. I would probably say that—I'll take your advice. Thank you. [Laughter.]

There is no question that that is correct.

Senator PACKWOOD. OK. So we've got discrimination.

Dr. RUBIN. No, not exactly, Senator.

But then let me ask the following question of you: If we have a higher concentration of McDonald's hamburger places in southern California, which is a high-cost area, then that whole business about their having a preference because they're younger may be ameliorated to some extent.

Senator PACKWOOD. I was going to come to that next. You've got no distinction in this bill between high cost and low cost medical service areas. You've got the same cap in a town of 3,000 that you have got in a town of 3 million.

Dr. RUBIN. We also have the same general tax rates; that's true.

Senator PACKWOOD. I understand that. So we are going to discriminate on age and we are going to discriminate on high-cost versus low-cost areas. At the moment there is no discrimination in those areas, to the extent that you have a health plan that has the same deductible in a town of 3,000 as a town of 3 million.

Dr. RUBIN. Well, I'm not sure that that's correct based on the cost experiences.

Senator PACKWOOD. I am talking about the employee. Granted, the employer may be paying more for health insurance premiums in New York City than they may be paying in Newport, Oreg.

Dr. RUBIN. Right.

Senator PACKWOOD. I am talking about the employee, assuming that you have the same benefit structure, that they don't have to worry about whether they are discriminated against because they come from a small town or a large town.

Dr. RUBIN. Well, I would point out that clearly the general Internal Revenue Code does not take into account, or to use your word "discriminates," against people who live in high-cost areas such as New York or Washington or Boston, versus people who live in towns of 3,000. Presumably, and certainly the economists that you have later on today will probably tell you that, those living in those high-cost areas are taken into account in their total compensation package. But, not being an economist, I wouldn't want to posit that.

Senator PACKWOOD. You may be right. I have often thought that the lawyer who has the best living in this country is one who lives in a town of about 50,000 who is able to make $125,000 to $150,000 a year, as opposed to a Manhattan lawyer doubling that salary but having to live in Manhattan.

Dr. RUBIN. It is generally true for physicians in that situation. [Laughter.]

Senator PACKWOOD. I have no further questions.

* * * * *

Note: The Committee later received testimony from Dr. Burton Press, President, American Dental Association; Mr. Bernard Tresnowski, President, Blue Cross and Blue Shield; and Mr. John Troy, Jr, Travelers Insurance, on behalf of the Health Insurance Association of America.

* * * * *

Senator PACKWOOD. Dr. Press, you and Mr. Tresnowski and Mr. Troy all, in one form or another in your testimony, indicate that the natural tendency of things if this bill passes will be to drop dental care, secondary care, tertiary care, in preference to keeping hospital care, probably because of the fear of the cost of hospitalization. Do I state it right, Dr. Press?

Dr. PRESS. I think so.

Senator PACKWOOD. And I think you are probably right. It would seem to me logical that if somebody has a fear in the back of their mind it is for example the fear of breaking their back, spending 9 months in a hospital, and being wiped out. And while indeed they know they should treat their children's teeth, or they know that they should see an ophthalmologist, those are once a month costs or twice a year costs, and if they have to make a choice between the two, even though the ultimate cost of not taking care of your teeth may cost a lot down the road, the fear of hospitalization seems relatively more important. And I think human nature is aiming in exactly the direction you said.

But, Mr. Troy, I want to ask you specifically—you comment as follows:

"Mr. Chairman, all of those in the private sector who have the most to gain from effective hospital cost containment—the employers, the unions, the insurers, in essence all of those in the private sector on the paying side of the equation say the employee health tax will be ineffective in curbing rising costs and are opposed to its enactment. On the other hand, those who have the most to gain by its failure to work, that is, the health providers, say it will work to de-escalate hospital inflation."

Do you think that the hospital associations, both public and proprietary hospitals, and to somewhat lesser an extent the American Medical Association, have reached their position out of a fear that we are going to try to enact some kind of medical cost-containment, and better it adversely affect you than them?

Mr. TROY. I would say that, in terms of the hospitals lobbying against the application of prospective reimbursement on an all payor basis, the hospitals want it limited to medicare so that if the medicare squeezes the DRG's the hospitals will have the option of raising prices to the rest of the third-party payors. They find an all-payer proposal to be much more troublesome than this proposal, which is certainly the lesser of the evils in their minds.

On the other hand, since we think the all-payor DRG or any kind of an all-payor prospective reimbursement system would do more for health cost-containment, particularly hospital cost-containment, we favor that proposal over this proposal.●

THE CLINCH RIVER FINANCING PLAN—TIME FOR A SENATE HEARING

● Mr. HUMPHREY. Mr. President, in the beginning of August an attempt was made to attach an amendment to the Interior bill that would enable the Bonneville Power Administration (BPA) to help bail out the financing of the Washington public power supply system (WPPSS) reactor units 2 and 3.

This attempt was made at the last minute without the benefit of a full and open hearing. The Senate rightly protested and a hearing was hastily put together just before the Senate recessed. Even in this last-minute hearing much was learned and I believe many more of my colleagues now are more skeptical of approving such a bailout.

Having the appropriate authorizing committees hold hearings on significant legislation before this legislation comes to the floor is general Senate practice and makes sense. Holding such hearings helps get the facts out in advance. The hearings raise and frequently resolve crucial questions, which in turn, reduces the amount of floor debate when and if the legislation in question is brought there for consideration.

Yet, despite these advantages, both the proponents of legislation to bail out WPPSS and those anxious to get the Federal Government to guarantee off-budget financing of Clinch River seem less than willing to submit to the usual hearing and legislative markup procedure.

Are they frightened that crucial questions will be raised? Are they leery of permitting the House a clear chance to vote on the issues as well? Indeed, is their real intention simply to limit debate on their proposals and to force a last-minute Senate vote that can be approved by the conferees without the measured consideration of the full House, which might otherwise be expected to reject such legislation?

The coming week will tell. It certainly is not too late to hold hearings on the Clinch River alternative financing plan and to mark up separate legislation if the plan's proponents wish to do so. Indeed, today Senators BUMPERS, BOSCHWITZ, HART, and myself requested such hearings of the Senate Energy and Natural Resources Committee and have circulated a "Dear Colleague" letter asking others to join in our request.

Mr. President, I understand that the Department of Energy (DOE) had legislation ready for submittal before our recent recess but chose to ignore the request Senator BUMPERS and I made back in July to bring such legislation to the Congress as soon as possible. I now have learned that DOE has chosen not to submit any legislation on Clinch River, preferring instead to have some Member of the Senate introduce it.

If this is so, it is all the more important that the supporters of the Clinch River financing plan come forward now with such legislation and hold Senate hearings before such legislation comes to the floor. Certainly, it would make no sense for the Senate to repeat the confusion and delay that occurred with the Interior bill in August when it became necessary to debate the proposed WPPSS bailout legislation on the floor simply to get the basic facts.

In hopes of avoiding such an outcome, I ask that the full text of the letters to the chairman of the Energy and Natural Resource Committee and to my Senate colleagues be printed in the RECORD along with a brief comparison of WPPSS and the Clinch River financing plan prepared by my staff.

The material follows:

U.S. SENATE,
Washington, D.C., September 14, 1983.

Dear Colleague:

We are writing to ask that you join us in requesting that the Energy and Natural Resources Committee hold full hearings on proposed legislation for alternative financing for the Clinch River Breeder Reactor Project before it is considered on the Senate floor. We are making this request because we believe this legislation will involve a major multi-year obligation of funds to the project and has too many important ramifications not to receive full committee review.

Certainly, it would be a mistake to rush through such legislation on the continuing resolution. Indeed, it was partly to avoid such last-minute procedures and to assure a vote in both the House and Senate that both bodies agreed two months ago in the Fiscal Year 1984 Energy and Water Appropriations Conference not to provide any further funding for the project until or unless a substantial cost sharing plan passed both Houses and was enacted.

Given the controversy surrounding this project and the proposed industry plan to have the government guarantee its financing and to obligate $1.5 billion to the project on one vote, it is essential that the Senate adhere to its normal legislative procedures.

We have already requested full Energy and Natural Resources Committee hearings. We are anxious that these be held immediately. Certainly, if such important and complex legislation is brought to the floor without these hearings, time consuming debate and discussion will be required. However, we welcome this legislation's expeditious consideration as separate legislation.

With warm regards, we are.

Sincerely,

GORDON J. HUMPHREY.
RUDY BOSCHWITZ.
DALE BUMPERS.
GARY HART.

U.S. SENATE,
Washington, D.C., September 13, 1983.

Senator JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, Senate Dirksen Office Building, U.S. Senate, Washington, D.C.

DEAR JIM: We are writing to ask that you hold hearings on proposed legislation to provide alternative financing for the Clinch River Breeder Reactor Project before this legislation is considered on the Senate floor. We are making this request because we believe that this legislation has too many important ramifications not to receive full committee review.

Indeed, if such important and complicated legislation is brought to the floor, time consuming debate and discussion will be required. Certainly, it would be a mistake to rush through such legislation on the continuing resolution. In fact, it was partly to avoid such last-minute procedures and to assure a vote in both the House and Senate that both bodies agreed in June not to provide any further funding for the project until a substantial cost sharing plan was passed and enacted.

We believe that the Senate should be cooperative in this process and we welcome this legislation's expeditious consideration as separate legislation.

With warmest regards.

Sincerely,

GORDEN J. HUMPHREY,
RUDY BOSCHWITZ,
DALE BUMPERS,
GARY HART.

WPPSS AND THE CLINCH PLAN—SOME UGLY SIMILARITIES

Both WPPSS federal bailout supporters and backers of the Clinch River alternative financing plan have been anxious to avoid holding Senate hearings and fully debating these schemes' merits. This is no accident. Indeed, in at least 5 respects both schemes are disturbingly similar:

1. Like WPPSS, the Clinch financing plan depends on Government agency guaranteed bonds that otherwise would not sell or not sell very well in financial markets. WPPSS Units 1, 2, 3 bonds are backed by the Bonneville Power Administration (BPA), a federal entity. The Clinch financing plan depends on direct federal guarantees covering $1 billion in bonds.

2. Like WPPSS, the success of the Clinch financing plan depends on the validity of several risky assumptions that (1) the plant will not experience any further cost overruns, (2) its completion date will slip no further, (3) the electricity it will produce will be needed and bought at prices high enough to repay those who financed the plant's construction. These assumptions proved to be unsound in the case of WPPSS and as a result, WPPSS defaulted on 2 of the system's 5 reactor units. The assumptions are no sounder in the case of Clinch. The only difference with the Clinch plan is that instead of having the bondholders or the region's rate payers pay for default, federal taxpayers get stuck with the tab.

3. Like the supporters of WPPSS, Clinch supporters are inattentive to the danger that the project's financing cannot be covered by the revenues the reactor might produce. And in both cases the reason why is the same—the projects' supporters believe their projects are so costly and so involve the public that they can force government to pick up the tab no matter how poor an investment these projects turn out to be.

4. Both WPPSS and the Clinch plan wrongly assume nonexistent local electricity demand. Unlike the backers of the Clinch Plan, though, the WPPSS commissioners can claim their original investment decisions were based on the best estimates of the time. DOE cannot claim this since TVA itself admits that it has no need for additional power through 1995 and just cancelled five nuclear power plants at considerable cost. In addition, the Congressional Research Service projects a significant surplus of capacity in the regions that might be served by Clinch River.

5. In both cases—WPPSS and the Clinch Plan—the key beneficiaries of the bailouts are investment brokers and private contractors who make money whether the projects prove to be economically sound or not. Thus, Westinghouse itself stands to gain at least $50 million on just one fixed fee contract (this for work on the reactor's troubled steam generator). In addition, Westinghouse is the prime contractor for the reactor's steam supply system. Westinghouse refuses to reduce the amount of guaranteed fee or profit it will make on these contracts. As for WPPSS, in 1981 Merrill Lynch underwrote an additional $750 million in WPPSS bonds and earned a $22.5 million commission—the largest in the firm's history. It is not surprising, then that Merrill Lynch is willing to sell government backed Clinch River bonds and shares.●

THE EVERGLADES ENVIRONMENT

● Mrs. HAWKINS. Mr. President, I submit for the RECORD a copy of a description of the Everglades environment prepared by the Dade County Planning Department, to help my colleagues better understand the problems that we are facing in maintaining the Everglades National Park.

The document follows:

THE EVERGLADES ENVIRONMENT

Before 1900 south Florida was a vast wilderness of bays, marshes, swamps, hammocks, pine forests, and flatlands. Each of these natural features was defined by physical and chemical conditions of the land, by climate, and by representative plants, animals, and microorganisms, which together constituted an ecosystem. Each ecosystem was dependent on nearby ecosystems for its sustenance. Freshwater runoff, for example, nourished the interior marshes and carried needed nutrients to the bays. Each of the inter-dependent ecosystems was a subsystem of the regional ecosystem. In south Florida, warm weather and abundant freshwater and sunlight over the last few thousand years allowed relatively stable and biologically productive ecosystems to develop. The waters of the region abounded with fish and other aquatic animals, and these in turn supported large numbers of reptiles, birds, and mammals.

After 1900 people came in increasing numbers to south Florida and began to modify the ecosystem. Areas were drained for farming and urban development, submerged land was filled, and trees were removed. The south Florida ecosystem that had developed over thousands of years gave way to a new three-part ecosystem which incorporated an agricultural component, an urban component, and a component of the natural eco-

system that remains largely undeveloped but affected by human activities. These components are interrelated through the sustaining flow of energy and resources. Today's agricultural and urban systems rely on the remaining natural systems to provide for the commodities and services of land, water, and oxygen production and for recycling nutrients, dispersing and detoxifying pollutants, retaining biological diversity, and producing fish and wildlife. If the natural systems are reduced, the benefits they once provided must be compensated for by the expenditure of additional energy, which is often costly to the system using the benefits. For example, the anticipated water shortages occurring as a result of areawide drainage in the East Everglades would require expensive modifications to our water supply system (such as desalinization or backpumping) in order to compensate for the loss of water from the natural system.

The waters of south Florida are a key environmental factor in the region's environment. Aquatic and terrestrial systems including human social and economic activities are controlled, to some degree, by the moisture in the soil, or by the duration and depth of inundation. These factors in turn are determined by the amounts and frequency of rainfall, the infiltration capacity of the soil and underlying rock formations, and by land elevations. Coastal systems are dependent on currents, tides, waves and some freshwater runoff to circulate and transport salts, nutrients, and other essential products. The region's waters also affect other controlling environmental factors such as fire, soil, temperature, and storm systems.

WATER RESOURCES

The people of south Florida, like most living things are dependent upon the region's fresh water supplies. The water resource is a major link between the physiographic provinces and between the agricultural, urban, and natural ecosystems. Great energy has been devoted to management of the region's freshwater resources since the urban and agricultural systems emerged in south Florida.

SURFACE WATER

Local rainfall is the source of all of south Florida's freshwater. Over time rainfall is removed from the land by evapotranspiration, runoff, or seepage into the ground. Evapotranspiration rates tend to be highest in undeveloped areas where accumulated water is used and transpired by plants. Runoff is highest in urban areas where impermeable paved surfaces prevent infiltration and speed runoff to stormwater drainage devices designed to remove water from the surface.

The effect of surface water on south Florida's landscape is enormous. Three of the largest physiographic provinces described above—the Everglades, the Big Cypress Swamp, and the mangrove and coastal marshes—are wetlands. Because the land slope is gentle, natural drainage is slow and rainfall accumulates in these great wetlands. In the Big Cypress, water moves through broad strands and sloughs, often miles wide and inches deep. Seasonal rainfall combined with sluggish drainage inundates as much as 90 percent of the sloughs for as long as 4 months each year. With the onset of the dry season, water remains only in the deeper ponds and sloughs, which comprise only about 10 percent of the natural areas. Free-flowing streams in well-defined channels are rare in south Florida. During the wet season, most of the surface flow forms a sheet over the land surface, a phenomenon recognized in the naming the hundred mile long and forty mile wide expanse of the Everglades a "river of grass."

In its natural state, flow in the Everglades began in the lakes of the upper Kissimmee River north of Lake Okeechobee, and slowly meandered southward through the river's floodplain into the lake. In wet years the lake overflowed its southern rim and drained southward through the sawgrass Everglades, adding to the Everglades' shallow sheet flow produced by rainfall. However, much rainfall and sheet flow were and still are converted to seepage and evapotranspiration. Major watercourses within the Everglades are the Shark River Slough, which flows through the south end of the Everglades and through the National Park, and Taylor Slough, which drains about 40 square miles, including agricultural land west of Homestead. Before development of the region, flow from the Everglades also reached the ocean through shallow sloughs called transverse glades, which cut through the Atlantic coastal ridge. Canals have been built through most of these transverse glades to provide flood protection and water supply for agricultural and urban development.

GROUNDWATER

The surface and groundwater systems of the region are closely connected by the extremely porous limestone strata that underlie south Florida at or near the land surface. Figure 2 depicts the relationship of the underlying formations to each other and to the land surface in a cross-section of Dade County. The upper 3,000 feet of subsurface formation is composed chiefly of limestone, sand, clay and shells. Water from the surface filters down into these rock formations, recharging the groundwater system. Groundwater flows downgradient through the rock formations toward the coast.

AQUIFERS

The water bearing rock formations, or aquifers, of south Florida are composed chiefly of limestone and are a crucial component of the groundwater system. The aquifers which are used for urban and agricultural needs are the Biscayne Aquifer underlying Dade and Broward Counties, the shallow aquifer underlying the lower Gulf Coast, and the coastal aquifer underlying Palm Beach and Martin Counties. The general characteristics of these three aquifers are similar. The Biscayne Aquifer will be the focus of discussion here, because it is a part of the freshwater system of the East Everglades Study Area.

The Biscayne Aquifer is a highly permeable wedge-shaped formation that is more than 200 feet thick in coastal Broward County and thins to a feather edge 35 to 40 miles inland. The Aquifer provides water for all municipal water supply systems from Palm Beach southward, and for agricultural irrigation in Dade and Broward counties.

Over much of its extent, the limestone of the Aquifer is covered by only a few inches of soil. In some areas, such as the rockland areas of Dade County, the rock which emerges at the land surface is the upper surface of the Aquifer. Because there are no natural impermeable formations between the Aquifer and the surface, surface water infiltrates directly into the groundwater system. This relatively rapid infiltration allows the groundwater supply to be replenished quickly by precipitation and allows the groundwater level to rise freely. The Biscayne Aquifer is about 20% porous, which means that about 20% of the total volume of the rock formation can contain water. Consequently, one inch of rainfall measured at the surface, will raise the groundwater table 5 inches. In times of heavy rainfall the aquifer simply fills up and the water table rises above the land surface. This phenomenon contributes to the seasonal inundation patterns throughout the region.

In addition to being one of the most porous aquifers in the world, the Biscayne is also one of the most productive. High yields are obtained from wells penetrating solution riddled sections of the aquifer. For exampe, large diameter wells in Miami's municipal system are capable of yielding 7,000 gallons per minute (10 million gallons par day) while drawing down the water table less than 10 feet under normal conditions. The direct connection between the surface water systems does make the Aquifer susceptible to pollution and disruption from activities at the land surface. Many contaminants are rapidly diluted in the large volumes of water contained in the aquifer, and the porous limestone acts as a filter. However, high concentrations of pollutants can overload and incapacitate the natural cleansing action. Because of its importance to the urban and agricultural ecosystems of south Florida as well as its sensitivity to the activities of these systems, the Biscayne Aquifer has recently been designated a "sole source" aquifer by the U.S. Environmental Protection Agency.

WATER MANAGEMENT

Unlike the natural ecosystems of south Florida, the urban and agricultural systems cannot operate efficiently under conditions of seasonal flooding and slow drainage. Both of these systems require that water levels be maintained at least a few feet below ground surface, and that excess water be removed quickly from large land areas. Consequently, almost from the moment that Florida entered the union, efforts began to drain and reclaim its wetlands.

The effectiveness of most early efforts was limited by an incomplete understanding of the components and functions of the freshwater system and the forces acting on it. For example, in 1851 the State contracted with entrepreneur Hamilton Disston to drain areas north of Lake Okeechobee in exchange for half the land he drained. Upon completion of the project the estimates of the reclaimed land depended on whether they were made in a wet year when 50,000 acres remained dry, or in a dry year when 2,500,000 were flood free.

Many drainage canals in south Florida were completed in the 1930's, and provided rapid removal of storm water to the ocean, but because the flow to and through the canals was not controlled, they continued to drain the aquifer during dry seasons. The drought of 1943-45 brought into focus one significant problem created by uncontrolled rapid drainage of land without regard for the replenishment of the freshwater: As freshwater levels were lowered sea water intruded into both the canals and the aquifer, and fresh water supplies were contaminated by salt. The uniqueness of the south Florida water system often required a trial and error approach to water management. The single-purpose nature (drainage) of earlier projects created problems such as salt intrusion that present-day water managers are resolving. The science and art of water managment in south Florida has evolved into a

highly sophisticated system that benefits from much knowledge gained from past experience.

SALT INTRUSION

A 1976 report by the U.S. Geological Survey comments:

Residents of south Florida are becoming increasingly aware that protection of fresh water supplies from contamination by sea water has high priority * * * sea water intrudes silently, persistently. In its unseen spread, it can and does contaminate domestic wells, destroy city water supplies, kill crops, and render soil unusable for agriculture. Seawater intrusion has affected south Florida's water resources chiefly in Dade and Broward Counties over the past several decades.

The fresh and salt waters of the region come into contact along the coast. When streamflow and water tables are high, sea water is prevented from moving inland; when streamflow and water levels are low, sea water moves up tidal streams and into adjacent aquifers. Uncontrolled canals constructed from inland areas to the ocean lower freshwater levels, and reduce the freshwater's opposition to the inland movement of salt water. Under these conditions, the canals provide channels to convey sea water inland. Most canals now have control structures to hold a freshwater head and to thus prevent the canal from conveying salt water.

The position of the fresh/salt water contact can also be affected when large volumes of fresh water are pumped from wells in an aquifer. As the wells are pumped, ground water moves toward the pumping area. If the wells are near the coast, salt water moves toward the wells also. If an uncontrolled tidal canal is nearby, the combined effect of the pumping and the proximity of the canal causes sea water from the canal to move toward the well field. Some municipal well fields were abandoned in 1945 and in earlier Miami history for this reason. One of Miami's wellfields was threatened by salt intrusion during the 1971 drought.

Past water management experience with the salt intrusion problem has led to corrective measures such as the control structures mentioned earlier. The salt intrusion problem is a constant threat in south Florida. The inland movement of the salt front has been halted by the south Florida Water Management District, but the District is fully aware of the need to closely manage water resources to prevent further encroachment of the salt front.

EXISTING WATER MANAGEMENT SYSTEM

As mentioned earlier, much has been learned about water management since the first efforts to drain south Florida were undertaken, the first regional plan for flood control was developed by the Corps of Engineers in 1947. A regional agency, the Central and Southern Florida Flood Control District, now the South Florida Water Management District, was created to operate and maintain water supply and drainage works. Since that time, the purposes of the drainage system have been expanded to include not only regional drainage and flood control, but also development of water supplies, conservation of natural resources, and the protection of environmental quality.

The present system is a highly sophisticated network of flood gates, pumping stations, canals, levees, and impoundment areas (see Map 4). Impoundment or "conservation areas" are used to store water to supplement urban and agricultural supplies in the dry season, to retain flood waters, to serve as wildlife management areas and serve recreation purposes. Water held in the conservation areas helps to prevent salt intrusion.

The South Florida Water Management District is meeting the expanded purposes of the water system by modifications to a network that was constructed largely for the purpose of drainage and flood control. Many of the ongoing District projects are directed at correcting problems that were created by earlier more narrowly focused projects.

For example, Everglades National Park has been affected by rapid releases of large volumes of water from the conservation areas. These releases, on occasion, drowned established alligator and bird nests and otherwise disrupted the breeding and feeding patterns of the Park's wildlife. Means of redistributing surface water flows to Everglades Park are now both in progress in the ground and under study. In Dade County, the South Dade Conveyance System is being built to enable the movement of the larger volumes of water south in order to supplement water supplies for wellfields and irrigation, for surface flow to the eastern sections of Everglades National Park, and to prevent salt intrusion along the vulnerable southeastern coast. A means of redistributing excess flows across the historic width of Shark Slough to reduce abnormal flows into Everglades National Park is being evaluated.●

PROGRAM

Mr. BAKER. Mr. President, on tomorrow when the Senate convenes it will do so at 9:30 a.m.

After the recognition of the two leaders under the standing order, there will be a brief period for the transaction of routine morning business to fill the remainder of the time before 10 a.m. in which Senators may speak for not more than 2 minutes each.

At 10 a.m. the Senate will turn to the consideration of the Korean plane resolution. I expect that we will be on that for a while tomorrow. But it is my hope and expectation that at some time tomorrow we can reach and, perhaps, even dispose of the Interior appropriations bill. I hope to be able to give a further appraisal of the situation for Friday during the day tomorrow.

Mr. President, I have no further business to bring before the Senate. I gather from the response of the minority leader that he does not as well, is that correct?

Mr. BYRD. Mr. President, I do not have anything further to bring before the Senate. I wish to thank the majority leader for his courtesy in extending the time today and making possible in the schedule a time for discussion of the War Powers Act and also the time that was set aside for the expression of eulogies in connection with the passing of Senator JACKSON.

Mr. BAKER. I thank the minority leader.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I move, in accordance with the order previously entered, that the Senate now stand in recess until the hour of 9:30 a.m. tomorrow.

The motion was agreed to; and at 6:11 p.m., the Senate recessed until Thursday, September 15, 1983, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate September 14, 1983:

THE JUDICIARY

Maryanne Trump Barry, of New Jersey, to be U.S. district judge for the district of New Jersey, vice H. Curtis Meanor, resigned.

DEPARTMENT OF THE TREASURY

Katherine D. Ortega, of New Mexico, to be Treasurer of the United States, vice Angela M. Buchanan, resigned.

FEDERAL TRADE COMMISSION

Terry Calvani, of Tennessee, to be a Federal Trade Commissioner for the term of 7 years, from September 26, 1983, vice David A. Clanton, term expiring.

CORPORATION FOR PUBLIC BROADCASTING

William Lee Hanley, Jr., of Connecticut, to be a member of the Board of Directors of the Corporation for Public Broadcasting for a term expiring March 1, 1984, vice Gillian Martin Sorensen, term expired, to which position he was appointed during the last recess of the Senate.

HOUSE OF REPRESENTATIVES—*Wednesday, September 14, 1983*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We acknowledge, O God, the dangers of our world and the continuing crisis of conflict that brings tragedy to innocent people. We long for the day when acts of justice and compassion will mark our societies and where people will understand the common bonds they share. Where there is pain, give people healing, where there is conflict, give hope, and where there is anxiety, give peace. Amen.

The SPEAKER. The Chair, having recognized a former Member and minority leader of the House for whom we had the greatest esteem and with whom we had many a philosophical debate, almost called him up to be the chaplain of the day.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 675) entitled "An act to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes."

The message also announced that the Senate amends the title of the above-entitled bill so as to read: "An act to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, and for other purposes."

ANNOUNCEMENT OF APPOINTMENT OF RAYMOND W. SMOCK AS HISTORIAN, OFFICE FOR THE BICENTENNIAL OF THE HOUSE OF REPRESENTATIVES

The SPEAKER. The Chair desires to announce that he has appointed Raymond W. Smock of Lanham, Md., as historian to direct the Office for the Bicentennial of the House of Representatives, effective October 1, 1983.

HISPANIC HERITAGE WEEK

(Mr. GARCIA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GARCIA. Mr. Speaker, as many of you know this is Hispanic Heritage Week. It is a time for Hispanics to join together and evaluate our present status within this great Nation of ours.

Over the past few months the President has been courting Hispanic voters. He has made speeches to a few Hispanic groups, and Vice President Bush attended the Hispanic Voter Registration Conference in Texas. It seems as if the President has suddenly become aware of the political potential of our community. It is too little, too late.

The high unemployment rate of Hispanics, the lack of respect shown Hispanics by individuals connected with this administration, and the lack of sensitivity shown for civil rights issues are the real indication of how Hispanics are viewed by the White House.

The situation is further compounded by the administration's faulty Central American policy which has had the effect of worsening the problems and increasing the level of violence for that region. In addition, White House support for certain immigration reform proposals that are potentially discriminatory toward Hispanics has added to the list of legitimate complaints we have for the President.

Hispanics will not be won over by public displays of affection. We are not a shallow community. We run deep, and our support must be won through programs and policies that benefit our community. That is our message to the White House during Hispanic Heritage Week.

A TRIBUTE TO MAYOR MARVIN ANDING

(Mr. ROEMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROEMER. Mr. Speaker, I was deeply saddened to learn of the death of Marvin Anding, mayor of my hometown of Bossier City, La., since 1977.

Mayor Anding guided Bossier during a very challenging period in the city's history. He presided over the successful transition to a new form of city government in 1977. When a tornado smashed through our town back in 1978, he calmly and effectively led emergency operations, and then oversaw the rebuilding effort. The mayor also played a large part in realizing a new municipal office complex now under construction.

City government was a second career for Marvin Anding. He had retired from the Air Force in 1971 after 31 years of distinguished service marked by a number of awards and important assignments.

Mayor Anding was a fine man who served his country and his community well. I will miss him; my hometown will miss him.

PERMISSION FOR SUBCOMMITTEE ON ENERGY RESEARCH AND PRODUCTION OF COMMITTEE ON SCIENCE AND TECHNOLOGY TO SIT DURING 5-MINUTE RULE ON THURSDAY, SEPTEMBER 15, 1983

Mrs. LLOYD. Mr. Speaker, I ask unanimous consent that the Subcommittee on Energy Research and Production of the Committee on Science and Technology be permitted to sit while the House is reading for amendment under the 5-minute rule on Thursday, September 15, 1983.

The minority has been advised of this request and it is my understanding that they have no objection.

The SPEAKER. Is there objection to the request of the gentlewoman from Tennessee?

There was no objection.

HOUSE JOINT RESOLUTION 353—CONDEMNING THE SOVIET UNION

(Mrs. LLOYD asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. LLOYD. Mr. Speaker, I rise in strong support of House Joint Resolution 353 that we will be considering today condemning the Soviet Union for its wanton destruction of a South Korean commercial airliner and for the massacre of 269 innocent civilians. I would also like to take this opportunity to pay tribute to our former colleague Larry McDonald who devoted his political career to fighting communism. It is a bitter irony that he was one of the innocent victims aboard KAL 007.

I believe that passage of this resolution should be just one of a long list of worldwide efforts to secure an apology, an explanation, and reparations from the Soviet Union. If any other nation on the face of this Earth had shown such highhanded and utter disregard for human life, there would be a stampede to cut off trade, credit, commerce, and other normal international contacts. Perhaps we have become too complacent toward human rights violations by the Soviet Union as have occurred in Poland, Afghanistan, and Czechoslovakia, but we have an opportunity now to create an international response to Soviet terrorism. The United States has always been a leader in human rights protection, and I hope now we will show the same in a coordinated, multinational response to this unconscionable Soviet act. I urge a unanimous vote on House Joint Resolution 353.

OCEAN AND COASTAL RESOURCES MANAGEMENT AND DEVELOPMENT BLOCK GRANT ACT

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 206 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 206

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5) to establish an Ocean and Coastal Resources Management and Development Fund from which coastal States shall receive block grants, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Merchant Marine and Fisheries now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and each section of said substitute shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER. The gentleman from Michigan (Mr. BONIOR) is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN) for purposes of debate only, and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 206 is completely open, providing for the consideration of the bill H.R. 5, a bill to establish a coastal and resource management and development fund from which coastal States shall receive block grant funds.

The resolution provides, as the Clerk has indicated, 1 hour of general debate which will be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries.

House Resolution 206 provides for consideration of the committee amendment in the nature of a substitute as an original bill for the purpose of amendment.

This is a straightforward, open rule allowing any germane amendment to be offered under the 5-minute rule. There are no waivers of points of order.

Upon conclusion of consideration of the bill, one motion to recommit with or without instructions would be in order.

Mr. Speaker, this legislation is substantially similar to H.R. 5543 which passed this House last year by a vote of 260 to 134, a nearly 2-to-1 margin. Unfortunately, the press of other business during the closing days of the 97th Congress precluded final action on similar legislation in the Senate.

□ 1015

H.R. 5 establishes an ocean and coastal resource management development fund from which a modest portion of future increases in Federal revenue deprived from leasing mineral-rich Outer Continental Shelf lands will be allocated to coastal States toward the management and development of renewable and ocean coastal resources.

Mr. Speaker, the block grant fund would be financed by taking 10 percent of growth in the Outer Continental Shelf revenues from a base year, the year 1982, up to a maximum of $300 million annually. Disbursements from the fund would be subject to the normal appropriations process. The national sea grant college program would receive 10 to 20 percent of the amount appropriated from the fund. The Secretary of Commerce could then use the fund to make block grants to coastal States based upon a formula which considers coastal county population, shoreline mileage, leasing activity, and coastal-related energy activities. States could use this grant money only for eligible activities listed under five block categories outlined in the bill.

Mr. Speaker, it is important that we maintain our commitment and support of ocean and coastal programs, including coastal zone management, the sea grant program, and marine research programs. We must continue to preserve and protect our valuable ocean coastal resources by facilitating good management of offshore oil and mineral leasing.

This bill is a step in that direction and endorses the partnership of the States and the Federal Government in managing these very terribly important resources.

Mr. Speaker, it is in the national interest that we continue our support of those States which share the responsibility for the development of our offshore oil and mineral resources. H.R. 5 has broad support.

Mr. Speaker, I know of no opposition to this rule, and I urge the adoption of House Resolution 206 so that we may proceed to the consideration of this important legislation.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, the provisions of the rule have been ably explained. We all know that the bill is controversial, and that the administration opposes certain portions of it, but I see no objection to debating it on the floor of the House.

This is an open rule. The bill can be amended. I think the House should get down to the business of trying to wind up major legislation such as the appropriation bills and other significant matters facing this country of ours.

This bill is important. We know that the program is a costly one.

So, Mr. Speaker, I support the rule, and I urge its adoption.

Mr. Speaker, I have no requests for time, and I reserve the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, I yield myself such time as I may consume, and I yield to the gentleman from New Hampshire (Mr. D'AMOURS) for the purpose of debate only.

Mr. D'AMOURS. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in strong support of House Resolution 206, granting a rule on H.R. 5. H.R. 5 is a bill that has

been carefully fashioned over a period of 2 years by the Committee on Merchant Marine and Fisheries.

Last year, this House passed almost an identical bill by close to a 2-to-1 margin. This year, working closely with our minority members, we have developed a sound bill that has 118 cosponsors and strong bipartisan support.

The resolution provides for an open rule and 1 hour of general debate. I thank the Rules Committee and the gentleman from Michigan for bringing this rule to the floor today. The time has come for the House to once again express itself on a bill that will strengthen our offshore energy efforts and protect our important coastal resources.

Mr. BONIOR of Michigan. Mr. Speaker, I want to commend my colleague, the gentleman from New Hampshire (Mr. D'AMOURS), for his active participation in this most important piece of legislation which protects one of our most important natural resources.

Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. Pursuant to House Resolution 206 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 5.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5), to establish an ocean and coastal resources management and development fund from which coastal States shall receive block grants, with Mr. GARCIA in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New Hampshire (Mr. D'AMOURS) will be recognized for 30 minutes, and the gentleman from Washington (Mr. PRITCHARD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New Hampshire (Mr. D'AMOURS).

Mr. D'AMOURS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 5 establishes an ocean and coastal resources block grant program. Similar legislation was first introduced in September 1981. Since then, we have thoroughly considered this measure in a fully bipartisan and cooperative manner. We have made important changes to strengthen and improve the bill. It is now ready to be enacted into law. This was shown most recently when the Committee on Merchant Marine and Fisheries favorably reported the bill by a vote of 37 to 2.

Mr. Chairman, the RECORD contains many statements supporting this measure and its simple logic.

We have shown that it is a fair bill. It will provide coastal States with Federal assistance similar to that given to States affected by the leasing of interior Federal lands.

We have shown that current policies of the administration are counterproductive; that they have led to unprecedented conflict between the Federal and State Governments, and that they are actually constraining OCS development. We have shown that H.R. 5 will promote partnership instead of conflict.

We have shown that the bill conforms to the President's program of New Federalism by increasing State responsibilities and decreasing Federal bureaucratic restrictions.

We have shown that support for this idea is broad, and that it crosses the lines between the majority and the minority, between government and industry, and between resource use and environmental quality.

Finally, and perhaps most importantly, we have shown that this rather modest investment can result in manyfold returns to the U.S. Treasury, through reduced Federal-State conflict and enhanced OCS leasing revenues.

Mr. Chairman, our committee has had many days of hearings on this measure. We have heard many witnesses. We have made many refinements. H.R. 5 is a timely and thoroughly considered bill. It has proven support and the cosponsorship of 118 Members of the House. It will help insure broadened development of a major domestic energy resource—the OCS—and it will do this in a way that provides the necessary mechanism for protection of important environmental resources. I urge final passage.

Mr. Chairman, I would like to briefly touch on two additional points.

The first is equity, one of the basic premises of H.R. 5 and one of the reasons this legislation has received such strong inland State support.

As you know, there is presently a serious inequity in the way we handle the receipt of revenues generated by energy activity on Federal lands. Under the Mineral Leasing Act, the Federal Government turns over 50 percent of all revenues to the States when the Federal lands in question are within a State's borders. Inland States reap more than $1 billion a year from Federal leasing activity to help them offset the negative impact of such development.

On the other hand, coastal States with energy activities off their coasts are accorded none of these revenue sources. Yet the coastal impacts from these activities are well documented and the pace of OCS activities are likely to be vastly accelerated in the next few years.

Some have insisted that no inequity exists because onshore leasing occurs within the boundaries of a State—while OCS leasing takes place entirely outside of the State's territorial sea. Such an argument is fallacious. Federal lands are held in trust by the Federal Government as the natural heritage of all Americans. The fact that a particular tract of Federal land is situated within one State does not provide that State with any unique interest in, or claim to, that land except as its use or development bear upon the State. The extraction of national resources from Federal lands—whether such lands are onshore or offshore—should involve the equitable treatment of affected States. The provisions of H.R. 5 will help correct the serious inequities in existing policy.

The second issue I would like to mention is how much money the Federal Treasury will continue to lose if revenue sharing is not enacted.

One of the primary financial justifications for approving H.R. 5 is that revenue sharing would help to establish a working partnership between State governments and the Federal Government with regard to OCS development. The clear failure to establish such a relationship in the past has delayed the landing of vital domestic oil and gas supplies, caused a significant loss of revenues to the Federal Treasury, and hampered effective coastal zone management.

There is good reason to believe that these problems could get worse. As you may be aware, the current administration has repeatedly targeted State coastal management programs for elimination. Without alternative funding schemes, like revenue sharing, the coastal States organization has testified that the State staffs necessary to discharge existing statutory review responsibilities for OCS activities and other related coastal development will be lost. Further testimony before my Subcommittee on Oceanography has indicated that, if this capacity is lost, States will resort to whatever delaying tactics are at their disposal until they can adequately assess the impacts of OCS exploration, development, and production plans.

No one should doubt that States and localities have the capacity to effectively delay OCS development. The Department of the Interior, in an unreleased study prepared last year for the Cabinet Council on Natural Resources' Working Group on Revenue Sharing, estimated that State and local opposition costs the Federal Treasury $1 billion a year. The report

goes on to state that this is an extremely conservative estimate and that a number of factors which will likely raise the cost considerably were not used in the calculation due to the difficulty in quantifying them.

The final and concluding paragraph of this Interior study finds that, and again I quote:

The only apparent solution to reducing the costs of opposition to the OCS program is to provide States and localities with an incentive to support leasing which is perceived by the States and localities as sufficient to counterbalance their perception of the potential harm and risk to which they are subject. OCS revenue sharing is the best incentive available to achieve that counterbalance.

On this I concur. H.R. 5 is not going to mitigate all opposition or reduce all the costs to the U.S. Treasury. But it will for the first time give States a direct, visible, monetary interest in the growth and health of the OCS oil and gas leasing program and it will insure that States have the manpower necessary to be full partners in the process. Without it, distrust between the States and the Federal Government will continue to grow and everyone will lose.

I strongly urge the adoption of this vital legislation. Mr. Chairman, I yield back the balance of my time.

Mr. PRITCHARD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the Ocean and Coastal Resources Management and Development Block Grants Act (H.R. 5).

This bill will insure continued funding for important ocean and coastal development activities including coastal zone management, living marine resource programs, and the National Sea Grant College program.

I want to reemphasize that coastal States are facing the prospect of locating funding for many important coastal zone programs from other than Federal sources. At the same time, the Department of the Interior is proceeding on a significantly accelerated 5-year oil and gas leasing program. The pressures on coastal communities to maintain existing programs and the need for locating a source of funding that would not place additional burdens on either the Federal budget or on individual taxpayers have never been greater.

This legislation is very similar to H.R. 5543, which passed the House last year by nearly a 2-to-1 margin. However, I want to point out that this year, the Committee on Merchant Marine and Fisheries was able to work out a bipartisan compromise which addresses the concerns of those who were opposed to the earmarking of moneys but favored a local pass-through of State funds to local governments. I am pleased to be part of this bipartisan effort to insure continued funding of our important ocean and coastal development activities and to achieve equity for coastal States with inland States in terms of long-term equitable compensation for the effects of federally generated resource exploration and development.

The development of this bill was influenced by several guiding principles. First, a portion of Federal revenues from the extraction of nonrenewable OCS mineral resources should be applied toward continued improvement and development of renewable ocean and coastal resources; second, in accordance with current initiatives to expand OCS mineral leasing, emphasis should be placed on providing funds for State management efforts, block grants, and State decision flexbility—this facilitates the development of a partnership on OCS development versus the traditional adversarial roles between the States and the Federal Government; and third, support of certain ocean and coastal programs should be maintained in the block grant concept, including coastal zone management and sea grant, as well as living and nonliving marine research programs.

The State of Washington, my State, the first State with an approved coastal zone management program, has a deep and a longstanding interest in programs which would receive funding under this bill. The coastal zone management program and the sea grant program, as well as other living and nonliving resource development programs, are all activities which will significantly contribute to the quality of life and the enhancement of the economy of the Nation and the State of Washington.

Mr. YATES. Mr. Chairman, will the gentleman yield for a question?

Mr. PRITCHARD. I am happy to yield to the gentleman from Illinois.

Mr. YATES. Mr. Chairman, the report of the committee indicates that the administration is opposed to this bill. Is that a correct statement?

Mr. PRITCHARD. Well, there are some in the administration who at this point are not supporting it.

Mr. YATES. But let me ask, are those in the administration who support the bill included in this report?

The only evidence I see of the administration's position is a statement that appears on page 90 of the report. That is a statement by the representative of the National Oceanic and Atmospheric Administration, and he says the administration opposes the bill.

Can the gentleman tell us who in the administration favors the bill?

Mr. PRITCHARD. Mr. Chairman, the bipartisan effort that we talked about is one that is congressional in nature. As far as the administration is concerned, they will speak for themselves. I think they are going to have a spokesman in the debate today that will tell us in what ways the administration is not totally satisfied with the bill.

I would not want to pull the wool over the gentleman's eyes and say that somehow the administration favors this legislation. I never said that. I did say it was a bipartisan effort by those of us in Congress who have the responsibility for producing and working up the legislation, but at no time did I say the administration favored it.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from New York.

Mr. LENT. Mr. Chairman, I thank the gentleman for yielding.

First of all, I would like to identify with the remarks of the gentleman from Washington (Mr. PRITCHARD) and also commend him for the leadership that he has displayed.

I want to join in supporting this bill because it represents an important new approach to existing States and local governments to deal with the environmental impact of offshore activities.

I would remind the gentleman from Illinois that revenue sharing as a concept is a Republican concept that originated with a Republican President not too many years ago, and I am hopeful that we will be able to convince all of the doubting Thomases in the current administration that this is something they ought to embrace.

Mr. Chairman, as a cosponsor of H.R. 5, I rise in strong support of this legislation to establish an OCS revenue sharing program. The bill, known as the Ocean and Coastal Resources Management and Development Block Grant Act, represents an important new approach to assisting States and local governments to deal with the environmental impact of offshore drilling activities.

I supported similar legislation which passed the House last year, and want to commend the distinguished Chairman of the Merchant Marine and Fisheries Committee, the Honorable WALTER JONES, for his unflagging leadership and diligence in seeking ways to further improve the bill.

I also want to commend the distinguished ranking minority member, my good friend ED FORSYTHE, for his leadership in resolving a number of concerns which had been raised last year.

As a result of this committed, bipartisan effort, the bill before us provides for State flexibility and local government coordination in managing ocean and coastal resources.

The legislation establishes a special fund in the U.S. Treasury to be fed by 10 percent of the growth in future revenues from Federal offshore oil and gas activities. coastal States would be eligible for a share of the fund in accordance with the formula which in-

cludes actual and planned OCS leasing, coastal related energy facilities including coal, and for States, including New York, with approved coastal zone management plans, shoreline mileage and coastal county population will also be considered.

Under this formula, New York State is slated to receive 4.6 percent of future OCS revenues. It is estimated that under H.R. 5, New York will receive $13.9 million to use in a wide range of coastal management activities to deal with the impact of energy development of coastal areas and on our vital fishery resources, including $1.8 million to fund the sea grant program which has been so important to New York's environmental and conservation efforts.

The bill also supports activities under the Coastal Zone Management Act by requiring that at least 25 percent of the State's grant be spent on activities authorized by the CZMA. This assures that New York's recently approved coastal zone management plan will continue to provide needed protection for coastal areas impacted by offshore oil and gas activities.

In addition, H.R. 5 requires that States allocate at least 35 percent of their block grant to local governments to assist in their ocean and coastal management efforts. Last year I pushed for providing local governments more flexibility in meeting their needs, and I am pleased to see this 35-percent passthrough included in the bill before us today.

Passage of this legislation is important for Long Islanders. With our precious coast lined with miles of beaches, fragile wetlands, inlets, and estuaries, proper management of these important resources is vital both to our economy and to maintain our unique environment. Additionally, with continued support for New York's coastal zone management plan, Long Islanders will be assured a participatory role in Federal OCS decisionmaking.

With an accelerated offshore leasing program underway, it is essential that this program be in place at the earliest possible date. I commend my colleagues on the committee for the statesmanship which has gone into the development of this legislation and I urge my colleagues to vote for passage of H.R. 5. Thank you.

□ 1030

Mr. YATES. Mr. Chairman, will the gentleman yield further for a question?

Mr. PRITCHARD. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Chairman, the gentleman from New York spoke about revenue sharing. Does this bill propose to share the revenues with the people who live in Iowa, for example, or Colorado or Wyoming or Montana?

Mr. PRITCHARD. Well, its main focus is sharing some money with those States which bear the responsibility of handling not only the costs of the extraction of these minerals from the offshore, but also the responsibility of maintaining and developing ocean resources, sea grant programs, and other fisheries programs.

Mr. YATES. Mr. Chairman, would the gentleman yield further?

Mr. PRITCHARD. I yield to the gentleman.

Mr. YATES. Do not the coastal States now enjoy the total revenues from the lands which are within 3 miles off their coastlines?

Mr. PRITCHARD. Within 3 miles. But, of course, this goes out——

Mr. YATES. We are talking about the area within the 3-mile coastline, the so-called tidelands?

Mr. PRITCHARD. That is right.

Mr. YATES. The bill aims at something beyond that. The question I should like to ask is why should this formula be used. At the present time the revenues that accrue from oil leasing go to all the people of the country. For the people who live in those States which do not have coastlines, as well as those which do. And those funds are now being used in part for the land and water conservation fund in which I am sure the gentleman is interested, coming as he does from a State that has such wonderful natural resources.

The question in my mind is, is this not a discriminatory bill? Does this not favor the people who live in the coastal area States to an unfair proportion over those who do not?

Mr. PRITCHARD. We do not believe so. Of course, some of these costs are being borne by the taxpayers today, like sea grant and some of these other ocean and coastal programs. This would allow some relief from the general taxpayer and allow that revenue to flow directly into those programs that are related to oceans.

The chairman of the committee would like to be recognized.

Mr. JONES of North Carolina. Mr Chairman, will the gentleman yield?

Mr. PRITCHARD. I yield to the chairman of the committee from North Carolina.

Mr. JONES of North Carolina. I thank the gentleman for yielding.

Mr. Chairman, I would like to attempt to reply to my good friend's question.

In the question of the Midwestern States you referred to with no coastlines, they are now enjoying 50 percent of the mineral rights, the timber rights, under entitlement. This bill contains no entitlement. There is no guarantee at all. In fact, when you come back to the mechanics of this bill, which I will explain in a few minutes, it has to be moneys appropriated each and every year, whereas the States to which you show some concern are living under an entitlement of 50 percent, guaranteed income.

This bill does not do that.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from Illinois.

Mr. YATES. I thank the gentleman.

Well, this may be true. But those bills were passed at another time when the Treasury was not in the condition that it is today.

You have $200 billion deficits in prospect, not only for this year, but for succeeding years. This bill would take away a significant portion of the funds that now go into the Treasury, and assign it for specfic purposes, would it not?

Mr. JONES of North Carolina. I would say to the gentleman, getting back to your problem about the Midwestern States, that they do not have the coastal problems that the coastal States have, that have erosion and destruction. And that is what we are trying to approach here.

Mr. D'AMOURS. Mr. Chairman, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from New Hampshire.

Mr. D'AMOURS. I thank the gentleman for yielding.

If I may attempt to address the gentleman's inquiry further, the gentleman has just indicated that we would be taking moneys that now go into the Treasury. That is not the case. These funds are based on a projected growth, an increase in revenues brought in by the leasing of offshore lands. The base year is 1982. So, there are no moneys now going into the Treasury which would be removed from the Treasury. The formula is based on a small percentage of the growth in such revenues.

Furthermore, without this legislation there is good reason to believe, and there is an Interior Department study to back us on this, there is good reason to believe that without this bill, we will lose perhaps as much as $1 billion a year because of the road blocking that the States are going to do in bringing litigation and using any other means they can to delay and untrack attempts to lease oil lands off our shores.

So I will make two points in answering the gentleman's question: One, no moneys now going into the Federal Treasury are going to be removed and, two, without this legislation we can fully anticipate that the Federal Government will in fact come out behind in its attempt to garner new revenues from offshore oil leasing.

Mr. YATES. If the gentleman will yield further for a question, in response to what the gentleman has said, this bill contemplates the accelerated leasing program that is being un-

dertaken by the present Secretary of the Interior and the funds presumably will come from that accelerated leasing program.

Those funds, however, without this bill, would go into the Treasury, except for deductions now for the land and water conservation funds and one or two other purposes. What this does is take from the revenues which would flow from the accelerated leasing program and allocate them in grant measure for the coastal States.

Mr. D'AMOURS. Mr. Chairman, will the gentleman yield to me?

Mr. PRITCHARD. I yield to the gentleman from New Hampshire.

Mr. D'AMOURS. I thank the gentleman for yielding.

As the Department of the Interior's offshore oil leasing is accelerating, so are the suits being brought by the States to block these leases accelerating. And in point of fact, very little so far is being accomplished. And this is slowing down the influx of revenues to the State from the leasing program.

We want to break that log jam, and we believe that the passage of this bill, and the coastal States have agreed with us on this, will result in a lessening of such dilatory suits by the States and a net increase in moneys to the Federal Government.

Mr. YATES. If the gentleman would yield further, I can understand that. The coastal States would be obtaining so great a return from passage of this bill they would no longer be interested in trying to stop the leasing program.

But that is not the point. The point is that those revenues would still accrue to all the people of the country. I take it that the gentleman's State of New Hampshire would not receive any funds under this program, would it?

Mr. PRITCHARD. Would the gentleman allow me to answer this.

It is true. We are going to take the increased revenues that come from offshore leasing and we are going to take 10 percent of it and apply it to the coastal activities outlined in this bill, some of which are being carried by the taxpayers today, such as sea grant, fish hatchery, as well as other ocean programs that are being carried today.

So, we are reaching out and taking the increase in OCS revenues and we are going to take 10 percent of that up to a cap of $300 million and put that into the coastal activities instead of going to the general taxpayer. So I do not think it is an out-of-line program. It also allows a partnership so that we can get these coastal States to work together with the Federal Government in these leasing programs instead of being a block, and they are a block today.

Mr. YATES. Mr. Chairman, would the gentleman yield further?

Mr. PRITCHARD. I yield to the gentleman from Illinois.

Mr. YATES. I thank the gentleman.

Do you not have the opportunity and the privilege at the present time under the coastal zone management program, to work out that kind of a partnership between the Federal Government and the States, in laying out coastal zone management programs, which would include the leasing programs? Is not the only purpose of this bill to provide not only the kind of partnership you speak of, but to bring to the coastal States revenues which they do not reserve today which now would go into the Federal Treasury for the benefit of all the people of the United States?

Mr. PRITCHARD. Obviously, if you are going to have a partnership with the States, you are going to have to get them in on some of the resources as far as money so they can meet some of these needs. And, so, it is true, this is a way to get the States out of a blocking position and get them to be a partnership. And remember, we are not touching any of the present revenue, and we are going to take 10 percent of the growth in revenues.

I think it is a fair program. Obviously, we have a disagreement.

Mr. YATES. I thank the gentleman for the opportunity of exchanging these views with him.

Mr. TAUZIN. Mr. Chairman, will the gentleman yield to me?

Mr. PRITCHARD. I yield to the gentleman from Louisiana.

Mr. TAUZIN. I thank the gentleman for yielding.

Mr. Chairman, it is important, I think, to address the gentleman's concerns about discrimination. The bill, in fact, allocates moneys derived from the coastal resources of our country, at least a portion of it, 10 percent of the gross receipts, to the general States. And the question, is that not discrimination against interior States? The chairman of our committee has already pointed out that current Federal law provides that 50 percent sharing with interior States of the revenues produced for this country from the production of minerals on lands of the Federal Government located within an interior State.

Now, I think it is important at this point to look at the figure that is being derived for those interior States under the current leasing programs conducted on interior State lands.

Currently today, under that 50 percent sharing formula, interior States will get in this fiscal year approximately $1 billion of revenue shared from the Federal Treasury, with those interior states who permit and encourage the development of resources from Federal lands located within those interior States.

Now, coastal States on the other hand receive zero funds, zero, as opposed to 1 billion dollars worth of funds from the development of those Federal lands located and which impact severely upon those coastal States. The gentleman is correct. If coastal States are going to be in a position, No. 1, of encouraging the development of resources that our country needs from those Federal lands offshore, just as interior States are encouraged to permit the development of the resources located on Federal lands in interior States, then we need to change the law, we need to establish some fairness in the allocation of funds.

And, second, if the enormous impacts of coastal development are not somehow addressed, then it follows almost as the night the day that interior States are going to object to the development of the Federal lands located off their coast unless there is some protection, some guarantee in effect that those adverse impacts are going to be addressed with Federal dollars.

This is a way to do it, not nearly in the same fair way, because if you wanted to be fair to coastal States it ought to be 50 percent, just as we provide to interior States. But here we are providing at least 10 percent. And, by the way, part of that 10 percent as the gentleman knows goes to funding those coastal zone management programs that are vital to protect the environment of coastal States where energy development occurs.

I thank the gentleman.

Mr. PRITCHARD. I thank the gentleman from Louisiana.

Mr. PRITCHARD. Mr. Chairman, I yield 8 minutes to the gentleman from Texas (Mr. FIELDS).

Mr. FIELDS. I thank the gentleman for yielding.

Mr. Chairman, although I have the highest regard for the distinguished chairman of the Merchant Marine and Fisheries Committee, I must in good conscience oppose the passage of H.R. 5.

The concept of sharing Outer Continental Shelf revenues with coastal States is neither new nor is it a radical idea. While one can question the wisdom of creating a new, permanent, $300 million a year Federal program, I believe OCS revenue sharing is a worthy concept.

In my judgment, the authors of this legislation have persuasively argued that there is a need to compensate States and local communities who are impacted by Federal OCS activity off their shores.

Regrettably, however, the authors of H.R. 5 completely ignore this most basic principle by establishing an unfair and highly discriminatory formula for distribution of funds.

As currently written, H.R. 5 denies just compensation to hundreds of af-

fected communities by only paying lip service to actual OCS leasing, exploration, development, and production. It instead places its primary emphasis for disbursement of funds on population, length of a coastline and the number of energy facilities located in the coastal zone area.

As a result of this formula, States that have no Federal OCS program receive in many instances more money than States that will have a great deal of activity. In fact, several Great Lake States will receive considerably more money under this legislation, even though they have no Federal OCS program, than 15 coastal States that will have significant OCS activity will receive.

While I have no quarrel with Michigan, Ohio or any other Great Lake State, I feel it is wrong and inappropriate to provide Federal OCS revenue sharing funds to a State whose territorial waters are not even adjacent to the Federal OCS, and which have never contributed even 1 dime in OCS revenues.

Mr. Chairman, if we adopt this formula, then I believe we must in fairness immediately amend such laws as the 1920 Mineral Leasing Act, the Taylor Grazing Act and the national forest fund. If there is to be little or no relationship between actual activity and the sharing of money based on that activity, then why not transfer money from the national forest fund to our Nation's inner cities. Why not change the Mineral Leasing Act to give money to States which have no mineral development. Because that is exactly what the authors of this bill are doing with Federal OCS revenues under this proposal. Like modern day Robin Hoods they are taking revenues from areas like Texas, Louisiana, and California that have the heaviest OCS exploration, development and production and giving a significant part of that money to States with none.

Mr. Chairman, I believe a workable and equitable OCS revenue sharing plan can be established by rejecting this formula and by adopting instead a formula which provides funds based on actual leasing and production located in the OCS adjacent to a State's territorial waters.

It is well known, that now and historically the vast majority of OCS oil and gas production has come from the Gulf of Mexico, specifically off the coast of Texas and Louisiana. Our region contributes more than 96 percent of OCS oil and virtually all OCS natural gas production.

As a result of this energy production, the Federal Government has received in excess of $34 billion in OCS revenues or nearly 80 percent of the total revenues collected to date.

Yet, under this legislation, the State of Texas is heavily and unfairly penalized for not yet having a federally approved coastal zone management plan.

If we are to accept the basic premise, the very heart of this legislation which states that coastal communities should be compensated for having OCS development off their shores, then it should make absolutely no difference whether a State has or does not have a federally approved CZM plan.

There is a need for a strong, equitable and viable OCS revenue sharing plan. I believe we can achieve that goal by adopting a formula that allocates grants to States based on the amount of OCS activity, and which does not penalize a State for not having an approved CZM plan.

Mr. Chairman, at the appropriate time, I will offer several amendments to provide some semblance of fairness and equity to H.R. 5. I am hopeful my colleagues will support me in these efforts.

□ 1045

At this time I would like to point out that many States, many interior States, are not receiving any money whatsoever under this particular plan. We are talking about $300 million going to the States that are coastal States.

While I can understand the logic of this OCS program, I want to make sure that everyone is aware in this body what that exactly means. It means that Arizona, Arkansas, Colorado, Idaho, Iowa, Kansas, Kentucky, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wyoming will receive no money whatsoever. Their taxpayers are going to be penalized by this particular $300 million plan.

Also I think there is logic in questioning the timeliness of this particular proposal. While it has some merit, I wonder if this is the particular time to implement what will be an entitlement type program. We have a tremendous budget deficit at this particular time in our country and we are going to be taking $300 million out of our Federal Treasury.

On September 6, 1983, I received, along with several other people, a letter from the Executive Office of the President signed by David Stockman.

His letter states as follows:

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., September 6, 1983.

Hon. EDWIN B. FORSYTHE,
Committee on Merchant Marine and Fisheries, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN FORSYTHE: I am writing to advise you of the Administration's strong opposition to enactment of H.R. 5, the "Ocean and Coastal Resources Management and Development Block Grant Act," which the House may consider in the near future.

The Outer Continental Shelf beyond the three-mile limit is strictly a Federal responsibility. The legal situation on this issue is clear and it would be most unwise to open it for debate, even implicitly, by entertaining the sharing of Federal OCS receipts. To do so would introduce the possibility not only of protracted disputes, but also of the eventual loss of substantial Federal revenues.

H.R. 5 would earmark up to $300 million a year, in perpetuity, of Federal revenues from Outer Continental Shelf oil and gas leasing and royalty receipts to fund a new block grant program. Such earmarking is highly objectionable because it limits the flexibility of the Congress, the President, and State and local governments in meeting changing requirements in future years.

This new block grant program would support—at funding levels far in excess of current levels—the Coastal Zone Management Program, the Coastal Energy Impact Program (CEIP), the Sea Grant Program, and other related programs. These are all programs that the Administration has proposed to terminate or phase down because they can be funded by the States without further Federal assistance or are no longer needed to meet their original purposes. The authorized appropriations could amount to as much as $3 billion over the next 10 years—i.e., add $3 billion more to the Federal deficit.

H.R. 5 would also require the establishment of a management structure to administer the imposition of significant regulatory and reporting requirements on the States. This is directly contrary to the Administation's efforts to reduce such Federally imposed burdens.

The provisions of the Outer Continental Shelf Lands Act were carefully designed to provide adequate protection for, and appropriate compensation to, coastal areas that might be affected adversely by oil pollution from OCS activities. Furthermore, studies show that the onshore OCS-related activities and resident OCS employees that impose costs on non-Federal coastal governments are a highly superior source of tax revenues and provide more benefits than costs to those governments. In this context, H.R. 5 cannot be justified because it would duplicate existing programs and would inefficiently reward States at little or no risk of experiencing significant adverse effects.

An additional Federal outlay of $300 million per year would be inconsistent with sound budget policy, and is not provided for in the President's budget. Moreover, from a longer term perspective, Federal acceptance of the principle of sharing OCS receipts would encourage the States to press for an ever-larger share of the economic rent generated by the OCS program.

In light of these considerations, the President's other senior advisers and I will not be able to recommend approval of H.R. 5, or anything like it, should such legislation be presented for the President's action.

Sincerely,

DAVID A. STOCKMAN,
Director.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. FIELDS. I will be glad to yield to the gentleman from Illinois.

Mr. YATES. As does the gentleman, I, too, favor the sea coastal zone management program now on the books,

the sea grant program which is now on the books, the other programs which would be phased out by passage of this bill.

The problem is that the administration has refused to make funds available for those programs and looks to phasing them out and putting the responsibility on the States. That is a policy decision by this administration.

As I understand the purpose of this bill, it is to provide funds which would supplant the decision of the administration to deprive these programs of those funds. Yet I asked the gentleman, suppose the administration, in view of its opposition as expressed in this report, suppose the administration refused to recommend funding for the new coastal zone management program or for the land grant colleges?

This bill makes those programs subject to appropriations, future appropriations, and suppose the administration refuses to recommend funding, as it does now? Why would not, in that instance, the same opposition be present?

Mr. FIELDS. Reclaiming my time——

The CHAIRMAN. The time of the gentleman from Texas (Mr. FIELDS) has expired.

Mr. YATES. I would hope that somebody would answer that question.

Mr. PRITCHARD. Mr. Chairman, I yield myself such time as I may consume.

Let me attempt to respond.

The gentleman is right. We have a situation in which a number of these coastal programs are being phased out or attempted to be phased out.

Mr. YATES. Will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from Illinois.

Mr. YATES. Through a lack of appropriations.

Mr. PRITCHARD. With respect to the administration, they are saying here let the States do it and so the State says, well, we are having this increased activity on our coast and it only makes sense for us to get a portion of that new revenue. After all, if you are in Wyoming you get 50 percent of that leasing money. We are only asking for 10 percent for the coastal States, so I think that it is just a logical thing to follow.

I think the gentleman would agree if the administration is going to tighten down here and say all right, States, you pick this responsibility up, then of course where you have new leasing programs I do not think it is out of line to let the States get 10 percent to pick up the responsibility.

I think the gentleman stated it was an entitlement program. It is not.

Mr. YATES. That is right. You are not referring to this gentleman saying that?

Mr. PRITCHARD. No. It is only if the money comes in. I agree. So you sort of have two things.

First, you have the philosophy against it and, second, you have the question of whether you have a fair formula.

Let me just address the fair formula.

Mr. YATES. Will the gentleman yield further before he addresses the fair formula?

Mr. PRITCHARD. I yield to the gentleman.

Mr. YATES. I do not think the gentleman has responded to my question. One of the primary concerns for passage of this bill is the fact the administration seeks to phase out existing programs that the gentleman and I agree are good programs that now permit the States to really have some kind of voice in the determination of how their coastline should be treated.

The administration has not recommended funding for those programs.

Mr. PRITCHARD. That is correct.

Mr. YATES. This bill provides for appropriations to be determined by the Congress.

The administration will then have the responsibility again, of recommending, as it does now, funding for these programs. If the administration is opposed to this bill, as the report indicates, what is there to prevent the administration from refusing to provide or to recommend the funds for programs that are authorized for this bill?

Mr. PRITCHARD. There is probably nothing to stop them from doing that.

Mr. YATES. Will the gentleman state that again?

Mr. PRITCHARD. The gentleman says what is to keep the administration from doing that?

Mr. YATES. Yes.

Mr. PRITCHARD. There is nothing to keep them except if we go through this program and then that money is going to flow to the States no matter what.

Mr. YATES. On the contrary. If the gentleman will yield, that is not true, if I understand the program, because it would be subject to appropriations by the Congress. The whole budget process must still be pursued and the administration will make its recommendations to the Congress for the programs created by this bill as it does now under the present program.

Mr. PRITCHARD. I agree. But I just believe most all of us agree that if we get 10 percent allocated and it is passed into law, why, then, I think Congress will be responsive. I do not see how the administration can block that.

Mr. YATES. It is doing it. It is opposed to this program. It has blocked the appropriations for many programs to which it has been opposed.

Mr. PRITCHARD. I think this is a sounder basis to make that fight on.

Mr. FIELDS. Will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from Texas.

Mr. FIELDS. I would just make the point if Congress wants to fund this program it certainly can. It can do so in the budgetary process.

But to me a major argument is why create a program that is going to be an entitlement, ongoing program? It is $300 million now, but the estimates in the administration's letter are that it could be as much as $300 billion over the next 10 years.

Also you are going to be creating a management structure to administer the imposition of significant regulatory and reporting requirements on the States. Then you add in addition to that the unfairness of what I think the formula bespeaks.

I think there are a number of reasons why this is fundamentally flawed and if we want to deal with some of the problems the gentleman has, why do we not go back and deal with the problems specifically here on the floor instead of taking this backdoor approach to funding these programs, diminishing the size of our Treasury, and exacerbating our deficit, and particularly the people from the interior States where their taxpayers certainly are impacted by this particular type of legislation?

Mr. PRITCHARD. I would say to the gentleman when they do some leasing in Wyoming, then 50 percent of that goes to the State. So we are launched into this type of an approach.

I just think it makes eminently good sense and I think to take 10 percent of it is not unreasonable. There is a cap. We can only go up to $300 million. There is a cap and it is new growth money. I think it is a logical answer.

I agree that there are different ways to meet these needs but I think it is a logical answer and I think it makes it a little more certain that we will fund these programs, in my opinion.

Mr. JONES of North Carolina. Mr. Chairman, I yield 3 minutes to the gentleman from New Jersey (Mr. FORSYTHE).

Mr. FORSYTHE. Mr. Chairman, I rise in support of H.R. 5, the Ocean and Coastal Resources Management and Development Block Grant Act. This historic legislation has a dual purpose—to preserve and protect our valuable ocean coastal resources, while at the same time providing an incentive for coastal States to cooperate with expanded OCS oil and gas activity. H.R. 5 has strong bipartisan support among the members of the Merchant Marine and Fisheries Committee.

While the legislation now before us is very similar to the bill that passed the House last year, several critical

changes have been made—changes which I strongly advocated and which address many of the concerns of those who have opposed the legislation in the past. With these changes, H.R. 5 now gives States much greater spending flexibility, and also guarantees the participation of local governments in the block grant program.

In contrast to earlier proposals, this bill contains no percentage earmarking requirements on how the States must spend their funds—with the exception that at least 25 percent of the State's grant must be spent on activities authorized by the Coastal Zone Management Act. Most importantly, the remaining 75 percent can be spent at the discretion of each State for ocean and coastal management efforts—including coastal energy impact, living marine resource, and natural resource-oriented activities.

H.R. 5 would also require that each State allocate at least 35 percent of its block grant to local governments and that States consult and coordinate with local governments in determining the allocation of their block grant funds. Both of these concerns—optimum State flexibility and local government participation in the program—were raised by a number of witnesses at the hearings including the administration.

Finally, there are several key elements of H.R. 5 which I believe are important to emphasize—and which enhance the appeal of this piece of legislation:

First, the bill does not create an entitlement program. No moneys may be withdrawn from the fund except by appropriations acts.

Second, the size of the fund created is based solely on the amount of growth in OCS revenues. The fund will not affect current levels of income to the Treasury.

Third, a full 60 percent of the allocation formula is energy related.

Fourth, the block grant program reduces Federal administrative burdens and requirements. Although the administration has proposed termination of some of the ocean and coastal activities addressed in the legislation—such as sea grant and coastal zone management—Congress has seen fit to consistently support and fund these programs.

And, finally, it is anticipated that strong oceans and coastal programs will allow States to address OCS lease sales in a rational and studied manner—leading to reduced conflict and greater predictability over the OCS leasing program.

Mr. Chairman, I support adoption of H.R. 5 and urge the support of my colleagues.

Mr. JONES of North Carolina. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 5 establishes an ocean and coastal resource management and development fund. Annually, beginning in fiscal year 1983, the Secretary of Treasury is directed to deposit into that fund the lesser of the following: $300 million or 10 percent of the difference between Outer Continental Shelf (OCS) oil and gas leasing receipts received in that year and each succeeding year and OCS leasing revenues received in 1982.

The bill provides that no money shall be removed from the fund except by appropriations acts. From 10 to 20 percent of annual appropriations will be used for the national sea grant college program; the remaining 80 to 90 percent will be used to provide coastal and Great Lakes States and U.S. territories with block grants for the management and enhancement of renewable ocean and coastal resources. The first block grants will be awarded in fiscal year 1984.

Block grants are allocated by a formula which includes five criteria: actual OCS leasing activity; planned OCS lease sales; coastal related energy facilities; and for those States with approved coastal management programs and those making satisfactory progress toward such approval, shoreline mileage and coastal county population. No State with an approved coastal zone management program shall receive less than one-half of 1 percent of the amount available for the block grants.

Prior to receipt of annual block grants, States must submit a pregrant report to the Secretary which specifies the intended allocation of funds among the following eligible activities: coastal zone management activities; coastal energy impact activities; living marine resource management; and natural resource management. Finally, the bill requires each coastal State to provide the Secretary with an independent audit of annual expenditures of block grant funds and provides authority for the Secretary to enforce compliance with the act.

Mr. Chairman, at this point in my statement, I would like to raise an issue that I have discussed with the chairman of the Interior Committee. It involves a jurisdictional issue between the Interior Committee and the Merchant Marine Committee regarding the proper interpretation of section 3 of the bill.

The Merchant Marine and Fisheries Committee has no jurisdiction over the administration of leasing on the OCS or the revenues derived from it. The legislative jurisdiction over these matters is exercised by the committee which Mr. UDALL chairs—the Committee on Interior and Insular Affairs—while the Merchant Marine and Fisheries Committee has jurisdiction over the OCS by reason of its authority over oceanography, fisheries, and wildlife, and the environment, and environmental policy. H.R. 5 is not intended to invade the Interior Committee's jurisdiction in any way nor is it intended to allocate OCS revenues.

Section 3 is merely a method for determining what the authorization level may be in any given year. It is simply a way of indexing the level of funding with accelerated leasing. I anticipate a large injection of new moneys into the general fund in the immediate years ahead. These increased revenues are not relevant to future appropriations under this bill. We refer to such revenues only for the purpose of indexing our authorizations. After enactment of H.R. 5 moneys in the general fund may be appropriated by the Congress for any authorized purpose.

Nothing in this bill is intended to imply that these specific new OCS moneys are to be used directly for this ocean and coastal resources management and development fund.

Instead, section 3 of H.R. 5 provides that up to $300 million shall be transferred from the general fund into this new special fund for grants to impacted coastal States and territories. If, as is now projected, the accelerated program does not produce as much new revenue as we once anticipated, then the amount transferred to the special fund would be less than $300 million. This occurs when 10 percent of the increased OCS revenues, over 1982 as the base year, is less than $300 million.

There is no earmarking of OCS revenues. This is simply a method to determine how much money should be transferred from the general fund to the ocean and coastal fund. We do not intend to earmark OCS revenues and we concede that would be a matter within the jurisdiction of the Interior Committee. Certainly, we do not believe that the use of increased OCS receipts as an index in any way implies that these OCS revenues are earmarked for the purposes of implementing H.R. 5. Nor do we believe that the enactment of H.R. 5, in its present form, would interfere with the jurisdiction of the Interior Committee with respect to the allocation of such funds.

Mr. UDALL has indicated that, on behalf of his committee, he wants to guard against direct allocations of OCS receipts because this is a most important aspect of the jurisdiction of his committee and because it could seriously impact on some of the important programs—such as the land and water conservation fund and historic preservation fund—presently in place. He has no objection to using the increased OCS revenues as a guide or index for the authorization as long as he has my assurance that this in no way attempts to allocate OCS revenues. He has my assurance on that.

I also want to make clear that the other body may have a different ap-

proach on this issue. If the bill goes to conference and the comparable provision in the Senate bill contains language which could be construed as specifically allocating OCS revenues, I have agreed with Mr. UDALL that the interests of the Interior and Insular Affairs Committee should be represented in the conference.

If the Senate bill were to contain a provision allocating or earmarking OCS revenues, I would personally have no objection if the Speaker selected some Interior Committee members to serve on the conference committee on this issue. I hasten to add, however, that if we go to conference—or even if we do not—I have given my personal assurances to the gentleman from Arizona that I will press strongly for the House language on this provision so that the interests of the Interior Committee will be protected.

□ 1100

Mr. JONES of North Carolina. I thank the Chair.

Mr. FIELDS. Mr. Chairman, will the Chairman yield so I might make a point?

Mr. JONES of North Carolina. Mr. Chairman, I yield for one question only.

Mr. FIELDS. I thank the gentleman for yielding.

The question is how many States participate and how many territories?

Mr. JONES of North Carolina. Thirty-five.

Mr. FIELDS. No; how many States specifically participate? I do not think it is 35 States.

Mr. JONES of North Carolina. I said "and territories." It is 30 or 31 States.

Mr. FIELDS. And five territories?

Mr. JONES of North Carolina. Yes; we have to look at them, too, sir.

Mr. Chairman, I yield 2 minutes to the gentleman from South Carolina (Mr. TALLON).

Mr. TALLON. Mr. Chairman, I rise today in support of this important legislation which would establish a block grant program to fund various coastal and ocean resource activities from a percentage of Outer Continental Shelf oil and gas revenues.

This bill implements the principle that a modest portion of future increases in Federal revenues from the extraction of public owned, nonrenewable, ocean energy resources should be allocated to coastal States for the continued sound management of, and research on, renewable ocean and coastal resources.

Second, it recognizes that States will continue to be asked to address, perhaps more intensely than in the past, the impacts of energy development and other development in the coastal areas.

Third, the bill recognizes that to reduce Federal-State conflict, coordinate the acceleration of offshore lease sales and State management capacity and, thus, establish a critical Federal-State partnership required for maintenance of the national interest, it is necessary to build on the progress made in State coastal management and living marine resource activities by continuing Federal financial involvement.

Fourth, it acknowledges the valuable role played in nationally-directed oceanographic and coastal research by the National Sea Grant College program and asserts that this type of Federal-State partnership in university-conducted research will continue to be critically important.

Fifth, it rectifies a serious imbalance between States that receive substantial funds from the leasing of Federal lands within their boundaries and coastal States that receive no revenues from the leasing of OCS tracts off their coasts.

Lastly, it recognizes the need to address the size of the Federal budget deficit by basing the block grants on an increase in future Federal OCS revenues and not on the present level of such revenues. An improvement of the Federal-State partnership cooperation in attaining a more predictable OCS leasing schedule and, thus, increase OCS bonus revenues to the Federal Government.

Outer Continental Shelf mineral development is the only exception to a longstanding Federal policy of sharing with affected States a significant portion of receipts from resource development activities and Federal lands.

Currently, we turn over to inland States a full 50 percent of all revenues derived from on-land mineral resource development. In fiscal 1981, close to $1 billion in payments were made to these States.

That same year, the OCS oil and gas leasing program generated over $10 billion in revenue for the Federal Government, but not one penny went to coastal States.

This is wrong. H.R. 5 still falls short of providing equal treatment to coastal States, but it is an important step in the right direction.

I urge my colleagues to support this measure.

Mr. JONES of North Carolina. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. CARNEY).

Mr. CARNEY. Mr. Chairman, I rise in strong support of this legislation to establish an OCS revenue sharing program and want to commend the distinguished chairman of the Merchant Marine and Fisheries Committee, WALTER JONES, and our ranking minority member, ED FORSYTHE, for their persistent efforts to develop this proposal.

As one who strongly believes that State and local governments should be permitted to deal with the effects of offshore drilling activities in their areas, I am especially gratified that the bill before us guarantees local participation by requiring States to allocate at least 35 percent of the block grant to local governments.

It also should be stressed that the source of funding for this new block grant program will be provided by 10 percent of the growth in future Federal OCS revenues. Thus, the new Fund established in the Treasury from which States will receive block grants will not affect current Treasury income levels.

As Representative of the First Congressional District of New York which encompasses the easternmost points of Long Island, I am well aware of the potential effects of offshore energy activities.

Under the bill's formula, New York State is estimated to receive almost $14 million for use in a wide range of coastal management activities geared to the preservation and protection of our valuable coastal and ocean resources, including fisheries.

The bill merits this body's support and I urge my colleagues to vote for its passage.

Mr. JONES of North Carolina. Mr. Chairman, I yield 4 minutes to the gentleman from Louisiana (Mr. TAUZIN).

Mr. TAUZIN. I thank the chairman for this time.

Mr. Chairman, I rise in strong support of this legislation. Louisiana is a very interesting State. It gets a lot of visitors each year. They come to the French Quarter in New Orleans, to our superdome and enjoy many of the historic antebellum mansions along the river. We also get a lot of visitors who come for one specific purpose, who come to see what is going on offshore Louisiana. They come because Louisiana represents 90 percent or better of all of the offshore development that this country has seen. Over 90 percent of all the wells drilled offshore of this country are drilled offshore of the coast of Louisiana. Many visitors come to see exactly the consequences and the benefits of that particular type of development.

We in Louisiana have welcomed that development, we continue to welcome it. We have had some great new lease sales off the coast of Louisiana just recently sponsored by the Department of the Interior. But we have also learned some valuable lessons in the process of that development.

Fish and Wildlife Service of the Federal Government has recently estimated that Louisiana is losing 40 square miles a year of coastline to coastline erosion; invaluable coastal barrier islands, invaluable estuaries for fish and wildlife, to the tune of 40 square miles per year are being lost.

One parish or county in my own district called Terrebonne Parish, which ironically means "good earth," by the way, in English, it is losing 8 square miles a year, 8 square miles in a single county per year lost forever because of coastal erosion.

The Fish and Wildlife Service and many environmental groups have attributed much of this coastal erosion directly to the use of Louisiana's coastline for offshore development.

That is an impact that is not now being addressed, that cannot be addressed with current State funding and that will not be addressed unless a bill of this nature is passed.

Now, when visitors from New Jersey and from New York and from Washington State or California and other coastal States, who do not have as much coastal development as Louisiana has, come to our State to look at that offshore development, we proudly point to the fact that our fisheries remain intact, and the oil and gas industry and fisheries industry work compatibly together.

But we also shamefully admit we are losing 40 square miles of our State and nobody is addressing the problem, nobody, because the funds are not available.

Mr. Chairman, a bill of this nature means several things; it means that a State like Louisiana, losing that valuable resource, will have a chance to do something about it. It means other States, who look forward to OCS development, who are attempting today to block it in court, will look at the experience in Louisiana, with the loss of this coastline and are going to say, "Wait a minute, the Federal Government does care, it has provided some source of revenue to address those serious impacts during the boom years."

Yes, let us talk about that, the boom and bust syndrome.

We have seen it in Louisiana. We have been in the boom periods, when the State and the people of our State recognized the economy of an active oil and gas development offshore. We are in the bust period right now; 15, 17, 20 percent unemployment in some of our areas.

We have had 1,700 new claims for unemployment insurance per month in offices that formerly had 350 at the most, because we are in that bust period right now.

We have seen the boom, we have seen the bust. Now, we get no State or local tax revenues, zero revenues from all of the Federal offshore development. Ironically, Louisiana, in an attempt to encourage the development of those resources, has even granted a sales tax exemption to the goods and services that flow offshore to develop the Federal regime.

Does it not make some sense, is it not some degree of fairness to say to coastal States such as Louisiana and others who are going to become oil and gas development coastal States, that "Look, with the great wealth and revenue flowing into the Federal Treasury from that development, if you are willing and able to open your shores up to allow that revenue to flow to the Federal Treasury, we are going to be willing to share some small measure of those funds with you to address some of those types of impacts such as Louisiana's serious coastal erosion problems."

I thank the Chairman.

Mr. JONES of North Carolina. Mr. Chairman, I yield 3 minutes to the gentleman from Louisiana (Mr. BREAUX).

Mr. BREAUX. I thank the chairman for yielding.

Mr. Chairman, I totally agree with the remarks of our chairman and also those of the previous speaker, my colleague from Louisiana (Mr. TAUZIN).

I would like to point out some things that I think should be obvious. We have an OCS leasing program that is generating somewhere between $11 and $15 billion per year. What this legislation does is very small. It takes 10 percent of any future increases from OCS revenues and shares them with coastal States. We would only draw from any potential increase. If we do not have an increase in OCS revenues, nothing will ever flow to any State. We are only talking about an increase over the base year of 1982 fiscal year. Then however small that increase might be, we are talking about only 10 percent of that increase being set aside for something like 30 or 35 potential States that may need some of those funds.

Why do they need them? We have a coastal zone management program which is being phased out. States are trying to address coastal problems, coastal zone problems, through the coastal zone management program. If we do not have any money for that coastal zone management program, how are they going to do the actions that are going to be required?

Without this legislation, they would have to fold up shop and go home and just continue to suffer the potential adverse effects of OCS leasing.

This is a very small step in saying, "We still want States to participate, we still want to encourage you to provide the rest of the Nation the oil and gas and we are going to give you a very small amount of the revenues being generated off of your own coastline to address those problems."

It is a small amount considering a program that has a potential to generate $15 billion to the National Treasury. The coastal States are not getting very much out of it.

The last thing I will mention is an amendment that I will be offering which basically would say that any State that has had their boundaries litigated by the U.S. Supreme Court and that that U.S. Supreme Court has made a definitive decision spelling out where your coast line is actually located, that that will in fact be the permanent boundary of your State.

Mr. TAUZIN and I will be offering that amendment together. It has a direct effect on Louisiana, but it affects any other State that could be similarly situated.

We have gotten approval by the State Department, we have no objections to this amendment by the Justice Department, and I think Mr. FORSYTHE has cleared the amendment on behalf of the minority.

I think it is a good amendment. It will be beneficial to all the States involved. We have tried to pass a bill such as this for years. I think it is high time this Congress accepts the responsibility that the Nation has for energy development offshore.

This is a small step in the right direction. I would encourage a favorable vote.

□ 1115

Mr. JONES of North Carolina. Mr. Chairman, I yield 2 minutes to the gentleman from Delaware (Mr. CARPER).

Mr. CARPER. Mr. Chairman, I rise in strong support of H.R. 5, the Outer Continental Shelf revenue sharing bill. I would like to take this opportunity to commend the chairman of the Subcommittee on Oceanography, Mr. D'AMOURS, the full Merchant Marine and Fisheries Committee chairman, Mr. WALTER JONES, as well as Mr. FORSYTHE, for the exemplary job that they and others have done in ushering this much-needed legislation to the floor today.

This is not a novel appearance for this bill on the floor of the House. Similar legislation was adopted last year by a vote of 260 to 134, and for good reason.

Development of offshore oil and gas resources is critical to this country's well-being, but such development has its costs.

This country has embarked on a headlong rush to stimulate the production of these nonrenewable energy resources without adequate consideration of the impact their development might have on the coastal zone activities of coastal States and on the sound management of renewable ocean resources. This policy has met with great opposition. Several States have been forced to seek protection in court, because of the insensitivity of this administration to their concerns.

Accelerated development of offshore oil and gas resources in the national interest cannot take place without consideration for and the cooperation of coastal States. This bill would provide the funding, through the sharing

of Federal OCS lease sale revenues, for States to assume a meaningful role in the rational management of all our ocean and coastal resources.

This bill also recognizes the value of the coastal zone management and the sea grant college programs in paving the way to a better understanding of our coastal resources and how best to use them.

Furthermore, this legislation would provide this critical assistance to States without increasing an already overwhelming Federal budget deficit. By basin block grants on an increase in future OCS revenues rather than on the present level of such revenues, unacceptable growth in the deficit can be avoided.

The time has come for us to put our bickering behind us, and to attack our energy problems together. I urge my colleagues to support H.R. 5 as a step toward cooperative development of our invaluable offshore energy resources.

Mr. JONES of North Carolina. Mr. Chairman, I yield 2 minutes to the delegate from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I commend the gentleman for bringing this bill to the floor of the House.

Mr. Chairman, I rise in strong support of H.R. 5, the Ocean and Coastal Resources Management and Development Block Grant Act, which establishes a fund from revenues of the Outer Continental Shelf leasing program for the conservation and best management of our marine resources.

I welcome this initiative because I believe to be particularly fitting that OCS revenues be used to rescue our Nation's marine resources protection and development activities from inadequate funding. The OCS development poses a threat to our environment, especially to our Nation's coastal and marine resources and therefore is only fair play that money raised from these activities be used to offset the impacts ancillary to the offshore development.

Now more than ever we need to intensify our national effort to preserve marine resources. Our ecosystems as well as the economy would suffer a severe blow if our ocean and coastal resources are ever found depleted.

The continued funding of ocean and coastal development activities is of great concern to the people and the Government of Puerto Rico. Puerto Rico as well as other coastal States has taken a very active role in a broad range of ocean, fishery, and coastal programs, including the national sea grant program. These activities are particularly important because of Puerto Rico's condition as a tropical island. Almost 72 percent of the island's 3.2-million people live in coastal municipalities. The central mountain range is steep and inhibits development, as a result of which most new activity is in the coastal areas.

Mr. Chairman, this bill is a sound and sorely needed piece of legislation which merits our approval. It was envisioned and designed in the national interest for the proper development of the Nation's invaluable and irreplaceable marine resources. the constant interaction between human activity and nature urgently require a continuing program of monitoring, evaluation, and protection, such as would be possible under the proposed program.

I urge my colleagues to vote for the passage of this highly important program.

Mr. JONES of North Carolina. Mr. Chairman, I yield 4½ minutes to the gentleman from Massachusetts (Mr. STUDDS).

Mr. STUDDS. Mr. Chairman, I rise in very strong support of this bill and, in lieu of a prepared statement, I would like to respond to a couple of questions that have been raised in the course of this debate and to some statements which I think demonstrate some uncertainty as to the true nature of the legislation before us.

This is not essentially a new program. It is not an attempt to reach out and find new Federal dollars to achieve new purposes hitherto unaddressed by Federal programs.

This is an attempt essentially, having some of the verbiage stripped from it, to salvage three existing, modest, and very successful Federal programs.

The administration has sought to abolish the coastal zone management program, the sea grant program, and the coastal energy impact program, which is, in fact, part of the CZM program itself.

These programs have been enormously successful in their operation over a number of years. Absent the legislation before us now, if the trend in declining appropriations were to continue at the administration's request and insistence, we would find ourselves in 1 or 2 or 3 years at the most essentially without any of these programs. And they meet, I suggest, a very, very important need on the part of the coastal States of the Nation.

The coastal zone management program's authorization expires in 1985. The sea grant program's authorization expires this year, in 1983. And the coastal energy impact program expires in 1988. Take, for example, the sea grant program, a very small, a very modest program. No Member of this institution needs to be reminded about the importance and the historical significance of our land grant colleges and the extraordinary role they have played in the assistance of our land-based agriculture in the history of the United States, going back more than a century.

The sea grant program is a recent and extremely modest attempt to lend that kind of expertise and support to the development of our marine-based resources, particularly the fisheries of the Nation. It has been funded at a very small level and it has been very successful.

The coastal zone management program, if there is a program on the books of this land that ought to appeal to this administration it is the CZM program. It is federalism incarnate. It recognizes the shared responsibilities of both the Federal and State governments with respect to decisionmaking having to do with the production of energy in the waters of this Nation. It is not a Federal decision that has to be made; it is not a State decision that has to be made; it is a genuinely shared responsibility. And this is a very finely tuned, very carefully balanced approach to what is in fact and what ought to remain a shared responsibility.

To those Members who somehow have conjured fears of a vast new Federal program being created by this legislation or vast new Federal dollars being sought by its authors, you can put those fears to rest. The simplest way, I think, to express that is that the three programs which we essentially seek to save in this bill are authorized under current law, in the current fiscal year, for a total of $364 million.

If this bill instead were law, those three programs would have an authorization of only $300 million.

So in terms of the authorization itself, this actually constitutes a reduction in the authorized Federal commitment for the programs about which we are concerned.

The bottom line of course and the need for this legislation stems not from those authorizing numbers, but from what has happened to the actual appropriated dollars in the past few years.

In 1978, these programs were appropriated to the tune of $197.7 million. In the current fiscal year that has gone down to $43.4 million and it will go directly to zero, very promptly, in a year or two or three, absent this legislation.

That is why it is important, that is why it is crucial, and that is why it seems to me it ought to appeal to all Members of this House.

I urge its adoption.

Mr. Chairman, I rise in strong support of H.R. 5, the Ocean and Coastal Resources Management and Development Block Grant Act.

This bill has widespread support among Members of Congress from coastal districts because it has as its central purpose the preservation of two Federal Government programs which have clearly proven their value to all those who live near, or who derive their livelihood from the resources of, the sea.

During the 96th Congress, I served as chairman of the Subcommittee on Oceanography. We undertook an extensive series of oversight hearings prior to considering legislation to reauthorize the coastal zone management programs originally created in 1972. I embarked on that process genuinely skeptical about the value of coastal zone management. I had the suspicion that perhaps this was a program—like many others—that was treasured only by the State and Federal bureaucrats employed by it, and that the public at large would be indifferent at best to its continuation.

But I was wrong. Our subcommittee developed thousands of pages of testimony from town officials, from fishermen, from those dependent on the tourist industry, from beachfront property owners, from environmentalists and from many others who were convinced that coastal zone management had served—and could continue to serve—precisely the purpose for which it was created; that is, to provide for the balanced, prudent use of the coastal areas of our Nation.

The sea grant program, whose future is equally entwined with the fate of the bill we are considering today, has for a decade been generating—at very little cost—the kind of scientific expertise which our Nation must have to understand and to utilize with confidence the resources of the marine environment.

The Reagan administration has opposed funding for these programs from the first day it took office. During that period, Interior Secretary James Watt has attempted to turn his Department from the legally appointed guardian of our Nation's natural resources into their most aggressive salesman. In doing so, he has sought not only to sell the public's resources as rapidly and as cheaply as possible, but—in alliance with OMB—he has attempted to deprive State and local governments and the scientific community of the means to fight back.

These policies have not worked. By seeking to eliminate or to ignore the procedural requirements of our offshore leasing statutes, the administration has forced State governments to rely more and more on the courts to guarantee the protection of their rights. The coastal zone management program is designed to permit State governments to work in partnership—both with the Federal Government and with their own town and local governments—not to block coastal development, or to prevent oil leasing on the OCS, but to pursue a coordinated and balanced program, combining development with conservation and appropriate safeguards in a manner as satisfactory as possible to all.

The bill we are considering today, H.R. 5, seeks to achieve the same goal. If it is accurate to generalize about this bill, at all, I would characterize it as legislation designed to protect the right of State governments to have a say in what the Federal Government does in coastal areas within or adjacent to their territory. It is as simple—and it should be as noncontroversial—as that. This bill is fully consistent with the Federalist traditions which this administration claims to support; it would guarantee the continuation of programs which have been carefully scrutinized by the Congress, and which have proven their value to the public; it has the support of a bipartisan and geographically diverse coalition of Members who are dedicated to serving coastal areas throughout our country; and I urge the House to follow the lead of the gentleman from North Carolina (Mr. JONES), and the gentleman from New Hampshire (Mr. D'AMOURS), and approve this bill by an overwhelming margin.

● Mr. LIPINSKI. Mr. Chairman, I rise in strong support of H.R. 5, the Ocean and Coastal Resources Management and Development Block Grant Act.

H.R. 5 was reported out of the Merchant Marine and Fisheries Committee, on which I serve, on April 27. This legislation would establish an ocean and coastal resources management and development fund, with moneys derived from Outer Continental Shelf (OCS) oil and gas lease sales.

To be eligible to receive funds under this program all coastal States, which include Great Lakes States, must have either OCS leasing activity going on, or coastal related energy facilities, or an approved coastal management program. My home State of Illinois has a very active coastal zone management program and would be eligible to receive $1.2 million annually. There are 60 miles of Lake Michigan shoreline in Illinois, that have a great need for shoreline improvements. The city of Chicago is gearing up to hold the 1992 World's Fair on the shores of Lake Michigan. H.R. 5 could provide the city funding for planning, design, and environmental studies for the World's Fair. In addition the city could use these block grant funds for technical studies, limited capital improvement projects for shoreline stabilization, port development, industrial and commercial redevelopment, water quality improvement and recreational facilities.

I urge all of my colleagues to support this measure, sponsored by my friend from North Carolina (Mr. JONES), the distinguished chairman of the Merchant Marine and Fisheries Committee.●

● Mr. HUGHES. Mr. Chairman, I rise in support of H.R. 5, and urge my colleagues to join with me in approving this important legislation.

As you know, H.R. 5 would establish an ocean and coastal resources management and development fund, which would be financed by revenues collected from offshore oil and gas lease sales. Moneys from the fund would be used to carry out the national sea grant program and to provide a block grant to the coastal States for activities authorized by the Coastal Zone Management Act as well as other activities for the enhancement and management of marine and natural resources.

As a member of the Merchant Marine and Fisheries Committee, and as the Representative from New Jersey's largest coastal district, I am well aware of the important role that Outer Continental Shelf oil and gas development plays in the Nation's energy future. At the same time, however, it has become clear that our important coastal and fisheries resources are coming under tremendous development pressures from a number of sources.

Despite its tremendous importance to America's energy independence, Outer Continental Shelf oil and gas development is not risk free. OCS development often places both subtle and not-so-subtle pressures on coastal areas.

Over the past decade, we have witnessed the development of a number of important State programs that address the need for comprehensive coastal planning. This planning process, spurred mostly as a result of the Coastal Zone Management Act and the Nation's growing awareness of the importance of its coastal resources, has successfully provided a much-needed balance between resource protection and exploitation.

H.R. 5 addresses the critical need to provide coastal States with the financial resources they need to properly plan for OCS leasing activities and to wisely manage their coastal and fishery resources. Although there is little doubt that a workable OCS leasing program is in the public's best interest, we too often lose sight of the need to properly manage and protect our renewable resources—such as recreation and commercial fisheries—while we extract nonrenewable oil and gas from underneath our oceans.

State coastal planning should legitimately play an integral role in the OCS process. Coastal States, which will have to live with the impacts resulting from accelerated oil and gas development off their shores, should also receive the resources necessary to cope with OCS development. Without the assistance provided by this legislation, many of our coastal areas will be unable to take the necessary actions to adequately cope with offshore oil and gas development.

As all of us know, the pace of OCS leasing and development is rapidly increasing. The Secretary of the Interior

has proposed to offer almost a billion acres—nearly the entire Outer Continental Shelf—within the next 5 years. Clearly, a small portion of the revenue that the Federal Government collects as a result of this leasing process should be set aside for the States to use in planning for OCS activities, managing and enhancing their fisheries and coastal resources, and mitigating possible harmful impacts.

I believe that enactment of this legislation is critical to insure the orderly development of our OCS resources and to discourage costly lawsuits to enjoin OCS leasing activities. I urge my colleagues to support H.R. 5.●

● Mr. FAZIO. Mr. Chairman, I rise in support of H.R. 5, to establish a national ocean and coastal resource management development fund.

Coastal States are facing tremendous financial pressures due to the acceleration of Outer Continental Shelf (OCS) leasing, exploration, and development. It is vital that we realize and plan for the relationship between the expansion of OCS leasing activities and the capability of coastal States to bear the costs associated with such development.

While speeding up OCS development under the 5-year plan, it is unfortunate that at the same time the administration has reduced Federal support for State programs in ocean and coastal management. These contradictory policies serve to place unnecessary limits on environmentally sound OCS development.

H.R. 5 offers a rational alternative to present policies by allocating a portion of Federal revenues from offshore oil and gas leasing for block grant funding for State programs in renewable ocean and coastal resource management. This measure has the support of the Coastal States Organization as well as oil exploration companies. Furthermore, while noncoastal States do not directly benefit from H.R. 5, the National Governors' Association, with the support of a substantial majority of inland States, has also endorsed this vital bill.

In California, we anticipate 8.36 percent of the total funding under the ocean and coastal resources development block grant. The method used to determine funding is based on a fair and balanced formula which includes shoreline mileage, coastal county population, coastal energy estimates, and OCS activity. This last item includes three factors: Activity resulting from Interior's 5-year plan; an estimate of acres leased; and a retroactive estimate of production—to give a boost to States such as Alaska and Texas with long running programs.

Using this formula and the assumption of $300 million in total annual receipts, then taking $35 million off the top of that for sea grant, the subcommittee estimated that California's share would be $25 million.

Given the increasingly stringent State fiscal picture, this amount could go a long way toward preserving an active and effective State coastal program in California. Our Governor has unwisely, in my opinion, eliminated all Federal funding for our coastal commission, but I cannot believe that legislative efforts, led by State Senator Bob Presley, to redress this error will not prevail.●

● Mr. YOUNG of Alaska. Mr. Chairman, I want to thank the chairman and ranking minority member of the committee for the opportunity to comment on the bill before us today.

Mr. Chairman, I strongly support the concept embodied in this bill, that of allowing coastal States and local communities to receive a share of the revenues generated from offshore oil and gas exploration and development. I think it especially important that local communities receive a share, as it is these areas that are most directly affected by OCS activity. When an offshore lease goes into production, it is the local community—not the State—that must supply housing, education, fire protection, and water and sewer service. With the help of the committee leadership, H.R. 5 has been amended to reflect this reality and I think that the amendment makes this a better bill.

At the same time, I would be remiss if I did not point to certain deficiencies in the legislation. A major one involves the formula by which revenues are shared. To be truly responsive to the impacts felt by coastal States and local communities, the revenue sharing formula should be based on just one factor—the amount of impact felt by those areas. This, of course, can be measured in a number of ways. However, there are certain extraneous factors included in H.R. 5 that I believe detract from the good intentions of the committee in passing the bill. Electric generating plants, coal storage facilities, and ocean thermal energy conversion projects will all have effects on local communities; that does not mean that the communities should be compensated from OCS revenues because these facilities exist. Neither should shoreline mileage nor coastal population be used as criteria in determining how much money is to be made available. We are talking about compensation for OCS impacts, not for accidents of history or geography.

I am also concerned about continued attempts to use OCS funds as a backdoor method to provide money for certain programs such as those found in the Coastal Zone Management Act and the National Sea Grant College Program Act. The good and bad points of these acts should not be debated here. More important, these acts should stand on their own and funding for them should be decided through the normal process, not through passage of legislation dealing with the impacts of OCS development on coastal areas.

Finally, on a matter that is very important to me and my State, I want to compliment the committee leadership on recognizing the importance of the U.S. fishing industry by providing that OCS revenues can be used for the enhancement and management of natural resources. OCS development is needed and should be pursued vigorously; at the same time, we all know that the day will come when the oil runs out. When that happens, the fishing industry, which depends on the harvest of a renewable resource, will increase its existing importance as an economic factor in coastal States' economies. By allowing OCS funds to be used now, we will insure the continued viability of the U.S. fishing industry.

Mr. Chairman, I look forward to seeing the final product of our action today and future action in conference with the Senate.●

● Mr. GEJDENSON. Mr. Chairman, I rise in support of H.R. 5, the Ocean and Coastal Resources Management and Development Block Grant Act. As a cosponsor of this legislation, I am pleased that the House of Representatives is considering this vital bill today. This legislative proposal addresses the important role that the development of the Outer Continental Shelf will play in contributing to America's energy security and in providing coastal States, such as Connecticut, the necessary funds to mitigate any impacts from OCS development.

This bill proposes that the development of the Outer Continental Shelf ought not to occur in a rushed and careless fashion that put at risk those other resources of the Outer Continental Shelf which, if properly managed and protected, are perpetually renewable and literally priceless. This legislation is based on the proposition that a modest portion of future increases in Federal revenues from the extraction of publicly owned, nonrenewable energy resources should be allocated to coastal States for the continuation of, and research on, renewable ocean and coastal resources.

This bill complies with the block grant concept advocated by the Reagan administration. H.R. 5 provides maximum flexibility and adequate funding to meet each coastal State's unique problems. Each coastal State will receive its share of the block grant based on a formula originating from 97th Congress H.R. 5543. For Connecticut, this formula equals 1.2 percent of the total block grant trust fund, or approximately $3.6 million. These funds will be used according to broad categories of State activities:

Coastal zone management, siting of energy facilities, land acquisition, management of fisheries, energy impact programs, and the obtainment of a balanced coastal ecology.

Mr. Chairman, this legislation is a resounding rebuttal to an administration that has argued that coastal assistance programs serve State and local interests and not the national interest. This administration has tried to eliminate funding for coastal zone management programs, fishery conservation programs, energy impact assistance and the sea grant program while at the same time accelerating development of the Federal OCS.

Clearly, if we are to develop at a reasonable pace our Outer Continental Shelf leasing activities, we must minimize potential dangers with a commitment to the management of our priceless coastal and ocean resources.●

● Mr. SNYDER. Mr. Chairman, I rise in opposition to H.R. 5. The legislation before us today is very similar to H.R. 5543, which the House considered in the 97th Congress.

This bill diverts $300 million per year from the income the U.S. Treasury receives from the Outer Continential Shelf energy revenues. It orders the States to use the funds to continue programs that both the Reagan and the Carter administrations have reduced or eliminated. In order to fit the new times, the committee has hired a wordsmith to describe this legislation as a block grant and revenue sharing.

H.R. 5 is simply a method by which proponents of these programs are attempting to mislead the budgets and appropriations committees. Why? Because these programs cannot hold their own in the process of competing for Federal dollars. The OCS program is one of the few that generates funds for the Federal Treasury. To now take $300 million per year from these revenues is going to mean that other important programs will not have the financial resources available to them that would otherwise be there.

I would urge my colleagues to take a very close look at the rhetoric which is being bantered about by proponents. I would point out to the Members that the proponents talk in terms of this legislation being $300 million. That is accurate for the first fiscal year. But the bill goes on forever, and for the next 10 fiscal years the price tag that goes with the bill is estimated to be between $1.5 to $3 billion. So remember, you are not voting today on taking $300 million from other programs; you are taking $3 billion—and that is real money—money that will no longer be available to other programs unless we borrow the money or eliminate other programs.●

● Mr. PANETTA. Mr. Chairman, with the announcement last year of its 5-year Outer Continental Shelf oil and gas leasing schedule, the administration evidenced its commitment to extensive offshore oil and gas leasing. Under this program, almost the entire Outer Continental Shelf (OCS) of the Nation—almost 1 billion acres of offshore territory—will be offered for leasing in the next 5 years. Nearly 21 times as much OCS land will be considered for lease in the 5 years during which the plan is implemented as have been leased in the past 28 years.

While this unprecedented increase in leasing activities may generate considerable revenues for the Federal Treasury, it is also certain to incur costs for coastal States. While the Federal revenue estimated to result from OCS leasing has been subject to significant fluctuation during the past year—the administration initially indicated it might gain as much as $18 billion in revenue annually from leasing, and has subsequently revised its estimate downward to $8 billion for fiscal year 1983—the costs of accelerated OCS leasing to coastal States remains high. OCS oil and gas leasing is expected to have a significant impact upon coastal States' industries in fisheries and tourism. In addition, OCS leasing is expected to increase demands upon local zoning and land-use planning efforts through the construction of onshore refining and transportation facilities, and habitats for rare whales, seals, aquatic birds, and endangered species—as well as managed marine protection areas—will be affected by this increase in leasing activity.

While the benefits of OCS leasing would be shared widely by inland and coastal States alike, the environmental and economic risks involved in realizing those benefits would be concentrated heavily—if not exclusively—upon coastal States. In return for their shouldering these burdens of OCS development, fairness alone would dictate that coastal States should be entitled to compensation for impacts felt along their coasts.

In fact, Congress has recognized the need for insuring protection of the unique habitats and industries of coastal States in passing legislation intended to provide assistance to affected coastal States through loans, bond guarantees, or grants. Measures such as the coastal energy impact fund established by the Coastal Zone Management Act, the Fisheries Conservation and Management Act of 1976, the Commercial Fisheries Research and Development Act of 1964, and the Anadromous Fish Conservation Act all attest to a strong congressional commitment to aiding coastal States.

However, against a background of an unprecedented increase in offshore oil and gas leasing activity, the administration has proposed termination of Federal support for the coastal energy impact program, the coastal zone management program, and the national sea grant college program, and has sought major reductions in appropriations under the Commercial Fisheries Research and Development Act and the Anadromous Fish Conservation Act. At precisely the time when coastal States are expected to shoulder a staggering greater burden of the impact of federally sanctioned offshore development, the administration has proposed a significant reduction in the Federal commitment to enabling coastal States to handle the burden. In contrast, inland States already receive considerable funding—$900 million in fiscal year 1983—to offset the disruptive effect of mining activity on Federal lands within their borders; coastal States are not currently able to share directly in Federal revenues from oil and gas development on the OCS.

For this reason, I rise today in support of H.R. 5, the Ocean and Coastal Resources Management and Development Block Grant Act. This legislation would seek to restore a Federal commitment to the Nation's 34 coastal States, many of which will experience oil and gas exploration and development off their shores in the near future.

This legislation directs the Commerce Department to place up to $300 million—or 10 percent of all OCS revenues in excess of those collected in 1982—in a block grant fund. In fact, full funding of H.R. 5 would represent only 2 percent of the total estimated Federal OCS revenues collected in fiscal year 1983.

Further, since activities covered under the block grant format and programs under the National Sea Grant College Act are authorized in fiscal year 1982 at a level of $410.5 million, the $300 million ceiling included in H.R. 5 is actually a reduction in funding for these programs.

Finally, it is important to note that fully 40 percent of the funding which would previously have been stipulated under categorical grants is discretionary under H.R. 5. The bill would give affected States a considerable amount of latitude within which to disburse funds. In short, the bill seeks to establish a close Federal/State partnership in mitigating the impacts of OCS development. The bill would permit coastal States to share in both the benefits and responsibilities of OCS development; maintaining a Federal commitment to certain essential coastal management programs, while providing States with increased discretion in formulating responses to the challenges and opportunities provided by increased OCS development.

I urge my colleagues to support this important measure.●

Mr. DYSON. Mr. Chairman, I rise today in strong support of H.R. 5, the Ocean and Coastal Resources Manage-

ment and Development Block Grant Act.

As a cosponsor of this bill, I believe that it represents a responsible means by which coastal States can continue the sound management of, and research on, renewable ocean and coastal resources. This legislation will be of particular benefit to my own State of Maryland and the residents of its First Congressional District whom I represent.

H.R. 5, as reported by the Merchant Marine and Fisheries Committee, serves several key principles:

First, the bill implements the principle that a modest portion of future increases in Federal revenues from the extraction of publicly owned, nonrenewable, ocean energy resources should be allocated to coastal States for the continued sound management of, and research on, renewable ocean and coastal resources.

Second, it recognizes that States will continue to be asked to address, perhaps more intensely than in the past, the impacts of energy development in the coastal areas.

Third, the bill recognizes that to reduce Federal-State conflict, coordinate the acceleration of offshore lease sales and State management capacity, it is necessary to build on the progress made in State coastal management and living marine resource activities by continuing Federal financial involvement. This establishes a critical Federal-State partnership required for a strong maintenance of marine resources that serves the national interest.

Fourth, it acknowledges the valuable role played in nationally directed oceanographic and coastal research by the National Sea Grant College program and asserts that this type of Federal-State partnership in university-conducted research will continue to be critically important.

Fifth, it corrects a serious imbalance between States that receive substantial funds from the leasing of Federal lands within their boundaries and coastal States that receive no revenues from the leasing of Outer Continental Shelf (OCS) tracts off their coasts.

Finally, H.R. 5 recognizes the need to address the size of the Federal deficit. It does this by basing the block grants to States on an increase in future Federal OCS revenues and not on the present level of such revenues. By improving the Federal-State relationship in managing ocean and coastal resources, this bill encourages cooperation in attaining a more predictable OCS leasing schedule. As a result, OCS bonus revenues will be increased to the Federal Government.

This legislation significantly enhances the work being done in the State of Maryland to manage and develop marine resources. Once adopted, H.R. 5 will give the State almost $9 million. This is particularly important to my constituents in the First District who live on both the Atlantic Ocean and the Chesapeake Bay. Almost $7.9 million would be available to Maryland for coastal zone management activities, coastal energy impact activities, fisheries enhancement and management, and natural resources enhancement and management. These are vital programs that make a significant contribution to enhancing the productivity of the Chesapeake Bay, the Nation's largest estuary.

In addition, H.R. 5 will give over $900,000 to the Maryland sea grant program, which has conducted some of the most ambitious and creative research on the Chesapeake Bay. Unless we continue to fund it, key questions about the bay's aquatic habitat will go unresolved. The money in this bill before us will enable Maryland sea grant to develop new ideas on how we can replenish and protect marine life in the bay.

Mr. Chairman, I supported H.R. 5 when we considered it in the Merchant Marine and Fisheries Committee because it restores equity in resource management to coastal States and guarantees that important coastal programs will continue to function. It is a revenue sharing bill that is good for Maryland and of major help to the preservation of the Chesapeake Bay. I strongly urge my colleagues to support it.

I am including for the record, a telegram sent to me today by the Honorable Harry Hughes, Governor of the State of Mayland, emphasizing the importance of the Outer Continental Shelf revenue sharing bill to the State of Maryland.

Representative ROY DYSON,
Capitol One, DC 20515.

H.R. 5, the Outer Continental Shelf revenue sharing bill, is scheduled for floor vote this Wednesday, September 14. I strongly urge your support of this bill. The legislation provides 300 million dollars block grant assistance to coastal States and territories for coastal zone management, and coastal energy impact activities and fisheries and natural resources and management. Maryland would receive 7.8 million dollars annually as well as $900,000 annually for a sea grant program. This legislation, along with funding from NOAA and EPA, would enable the States of Maryland, Virginia and Pennsylvania to implement programs that will have a positive effect on the Cheaspeake Bay. Strongly urge your support of H.R. 5.

Sincerely,

HARRY HUGHES,
Governor of the State of Maryland.

● Mrs. JOHNSON. Mr. Chairman, as an early and strong supporter of H.R. 5, the Ocean and Coastal Management and Development Block Grant Act, I commend this House for considering this measure today.

This bill will insure that at long last coastal States will receive a fair share of the receipts gained from Outer Continental Shelf (OCS) leasing and production, just as inland States, who received $900 million last year, will receive one half of all receipts from minerals leasing on Federal land in their States next year. These funds will go toward such critical programs as the national sea grant and the coastal zone management programs, which are critical to my State and other coastal States as well.

It is no secret that the promise of Federal funding was, and is a major incentive to encourage States to enter and to remain in the business of coastal management. Since 1980, Congress has expressed its support for funding coastal management activities through fiscal year 1985. Progress along this Federal-State partnership has progressed over the years, so that presently 28 coastal States and territories have obtained Federal approval of their coastal management programs, including Connecticut's which was approved in 1980. OCS revenue sharing would enable these States to continue to address the future and build upon the record of the past.

Recent data from a number of Government sources reveals that Federal revenues received from Outer Continental Shelf oil and gas exploration and development activities represents the second largest source of income to the U.S. Treasury, next to Internal Revenue Service income taxes. This bill would provide for a modest share of those revenues to help assure a productive and well-managed development of the OCS.

I know from my experience as a State senator, that a source of funds is essential to continue our valuable coastal management programs. Having helped develop Connecticut's original legislation and seen the benefits it has brought to the management and development process, I know how important continuation of our coastal programs is to all citizens and future generations as well and consider this provision of a specific funding source a significant step forward.

I would also like to share with my colleagues the comments of the Director of Planning for the Connecticut Department of Environmental Protection Arthur J. Rocque about the need for this measure:

I can assure you that the vast majority of states want to continue . . . the state-federal partnership. It is unrealistic to assume that the issues which spawned the need for the partnership will go away merely because federal funding is withdrawn. The resources with which coastal states are involved, such as OCS oil and gas, are national resources; however, the negative impacts of their development, exploitation and utilization generally center at the state and local level. Coastal states do not want unplanned exploitation of our shoreline areas. In order to prevent these dual consequences, federal funding of the partnership is imperative. Otherwise, delay, through litigation or

through the lag caused by poor planning and bad choices, will result.

H.R. 5 goes far to strengthen intergovernmental partnerships for ocean and coastal resource management and offshore oil and gas development, rectify a serious inequity between States with onshore resources and States with adjoining OCS lands, and provides an alternative funding mechanism that is not only fiscally responsible but revenue enhancing, and I urge my colleagues to support it.●

● Mr. HUBBARD. Mr. Chairman, as the chairman of the Subcommittee on Panama Canal/Outer Continental Shelf of the Merchant Marine and Fisheries Committee, I wish to place on record my support for H.R. 5, the Ocean and Coastal Resources Management and Development Block Grant Act, which I cosponsored. I would like to commend Congressman WALTER B. JONES, chairman of the Merchant Marine and Fisheries Committee, Congressman ED FORSYTHE, ranking minority member of the committee, and Congressman NORM D'AMOURS, chairman of the Oceanography Subcommittee, for their efforts on behalf of this bill.

H.R. 5 is indeed a culmination of many years of labor. Hearings were held in the 97th Congress on similar measures, and much work has gone into working out this compromise measure that would secure bipartisan support.

It is only fair that coastal States receive at least a portion of the revenues contributed to the U.S. Treasury as a result of development of oil and gas on our Outer Continental Shelf. Many inland States receive as much as 50 percent or more of the Federal revenues generated by onshore mineral development. Out of the estimated $10 billion in Federal revenues received from OCS leases in fiscal year 1983, H.R. 5 would allocate approximately $300 million to the fund established in its provisions.

I realize that certain reservations have been raised concerning the method of calculating the disbursement of grants to the States. For example, some questions have been asked about the fact that some States having no OCS activity off their shores, because they are not adjacent to an ocean, would receive more money than States that have a great deal of OCS activity. Yet despite these reservations, H.R. 5 is a bill whose time has come, and I am hopeful that the reservations made to this bill can be surmounted. This measure already represents a compromise, and I believe that H.R. 5 is the best possible choice that we have at this time for OCS revenue sharing.●

Mr. JONES of North Carolina. Mr. Chairman, I would like to close with one or two remarks.

This is not new legislation. This almost identical bill was before this House on September 29, 1982.

Now, since that time, we like to think that we have come up with an improved bill. There has been some give and take, some compromising between this side and that side. And we feel like we even have a better bill.

As a matter of fact, a vote in last September of 1982 was almost a 2-to-1 margin, 260 to 134. So we have before us today for consideration the same bill that we had a year ago, with some improvements, and hopefully, we will obtain perhaps equally as good or better margin.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the substitute committee amendment in the nature of a substitute recommended by the Committee on Merchant Marine and Fisheries, now printed in the reported bill, shall be considered as an original bill for the purpose of amendment and each section shall be considered as having been read.

The Clerk will designate section 1.

The text of section 1 is as follows:

SHORT TITLE

SECTION 1. This Act may be cited as the "Ocean and Coastal Resources Management and Development Block Grant Act".

The CHAIRMAN. Are there any amendments to section 1? If not, the Clerk will designate section 2.

The text of section 2 is as follows:

DEFINITIONS

SEC. 2. For purposes of this Act—

(1) the term "coastal State" means any State of the United States in, or bordering on, the Atlantic Ocean, the Pacific Ocean, the Arctic Ocean, the Gulf of Mexico, Long Island Sound, or one or more of the Great Lakes, and includes the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and American Samoa;

(2) the term "outer Continental Shelf" means all submerged lands lying seaward and outside of the area of "lands beneath navigable waters" as that term is defined in section 2(a) of the Submerged Lands Act (43 U.S.C. 1301(a)), and of which the subsoil and seabed appertain to the United States and are subject to its jurisdiction and control;

(3) the term "Secretary" means the Secretary of Commerce; and

(4) the term "coastal related energy facilities" means any equipment or facility which, (A) is or will be used primarily in the exploration for, or the development, production, conversion, storage, transfer processing, or transportation of, any energy resource or for the manufacture, production, or assembly of equipment, machinery, products, or devices which are involved in any such energy-resource activity, and (B) is, or is likely to be, sited, constructed, expanded, or operated in or in close proximity to, the coastal zone of any coastal State because of technical requirements.

The term includes, but is not limited to (i) electric generating plants; (ii) facilities associated with the transportation, transfer, or storage of coal; (iii) petroleum refineries and associated facilities; (iv) gasification plants; (v) facilities associated with the transportation, conversion, treatment, transfer, or storage of liquefied natural gas; (vi) oil and gas facilities, including platforms, assembly plants, storage depots, tank farms, crew and supply bases, and refining complexes; (vii) facilities, including deepwater ports, for the transfer of petroleum; (viii) facilities used for alternative ocean energy activities, including those associated with ocean thermal energy conversion; and (ix) pipelines, transmission facilities, and terminals which are associated with any of the foregoing.

For the purposes of this paragraph, the siting, construction, expansion, or operation of any coastal related energy facilities shall not be "in close proximity to the coastal zone of any coastal State" if such siting, construction, expansion, or operation has, or is likely to have, a significant effect on such coastal zone.

The CHAIRMAN. Are there any amendments to section 2?

AMENDMENTS OFFERED BY MR. BREAUX

Mr. BREAUX. Mr. Chairman, I offer amendments, and I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. BREAUX: On page 12, line 7, delete the semicolon and insert in lieu thereof the following: ", but whenever the extent of the rights acquired by a State under the Submerged Lands Act and the Outer Continental Shelf Lands Act has been determined by a final decree of the United States Supreme Court and fixed by coordinates, the line so fixed is immobilized as described in said decree and shall not be ambulatory in determining the seaward extent of the rights acquired by said State under the Submerged Lands Act and the landward extent of the rights acquired by the United States under the Outer Continental Shelf Lands Act;".

At the end of the bill on page 21, add the following new section following line 20:

DEFINITION OF BOUNDARY

SEC. 9. Section 2(b) of the Submerged Lands Act (43 U.S.C. 1301(b)) is amended by inserting ", except that any boundary between a State and the United States under this Act which has been fixed by coordinates under a final decree of the United States Supreme Court shall, for the purposes of this Act and the Outer Continental Shelf Lands Act, remain immobilized at the coordinates provided under such decree and shall not be ambulatory" before the semicolon.

Mr. BREAUX (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BREAUX. Mr. Chairman, the amendments that I have before the

Members at this point address a situation which, while it potentially affects all of the States along our coastline, it basically has a direct affect on my own State of Louisiana.

The amendments address the question of the permanency of a coastal State's baseline if a final decree about such a baseline has been handed down by the Supreme Court.

The baseline of a State is drawn along a coast from which the territorial sea, which is 3 miles of such State as measured.

Louisiana in 1981, after some 35 years of litigation in all of the various Federal courts, the District Court the Court of Appeals, and also and finally the U.S. Supreme Court, had our boundary defined by a court decree. The Supreme Court at that time set out some specific coordinates which were to constitute Louisiana's baseline and they said for all periods past and present. The determination, however, left the line ambulatory and therefore, subject to change due to fiscal modifications.

However, the Supreme Court also said in that decree that nothing that they had said in that opinion would prevent the parties from agreeing what the permanent baseline should be.

Now, we have run the amendment by the State Department, as I have indicated, and they have said that they have no problems with it. It would not in any way affect our international boundaries, international negotiations.

In addition, we have asked the Justice Department for their opinion on the amendment and they have no objection to it. They were going to try and as I understand it address it by a broader amendment, but they have no objection to the approach that we are offering here.

The gentleman from Louisiana (Mr. TAUZIN), my colleague on the committee, who also represents the coastline of Lousisiana, has been working with me on this amendment and is joining me in offering the amendment.

I would say it particularly affects Louisiana at this time because we have been litigating our boundary for some 35 years, but it would also be totally and completely applicable to any coastal State, whether it be from Maine all the way down to Florida or on the west coast. Any State that has litigated their boundaries and has received a final decree, under this amendment, would have that final decree establishing their boundary and then in fact made permanent.

So I think it is a good amendment. We have worked very closely with the administration on it. It certainly does not change their position on the legislation in any way. It does not enter into their decision on how they are going to operate as far as this particular OCS revenue-sharing bill is concerned.

□ 1130

I think this is a proper forum to offer it, to this legislation, and I think it is something that should be adopted.

Mr. FORSYTHE. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to my colleague, the gentleman from New Jersey.

Mr. FORSYTHE. Mr. Chairman, so far as the minority is concerned, we think this is a very sound amendment, and we have no objection.

Mr. BREAUX. I thank the gentleman for his support.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the chairman of the committee.

Mr. JONES of North Carolina. Mr. Chairman, having considered the amendment, I agree with the gentleman from New Jersey (Mr. FORSYTHE). This side of the aisle accepts the gentleman's amendment.

Mr. BREAUX. I thank the gentleman.

Mr. TAUZIN. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Louisiana.

Mr. TAUZIN. Mr. Chairman, I rise in support of the amendment.

Mr. BREAUX. I thank my colleague from Louisiana for his work in helping us get this amendment before the committee.

Mr. Chairman, I would ask for a favorable vote on the amendment.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Louisiana (Mr. BREAUX).

The amendments were agreed to.

The CHAIRMAN. For what purpose does the gentleman from Texas (Mr. FIELDS) rise?

Mr. FIELDS. Mr. Chairman, I have two amendments that I plan to offer en bloc. One is to section 2, and the other is to section 4. I would be inclined to wait until section 4 comes up, if that is proper, or offer those amendments at this time.

The CHAIRMAN. Is there objection to the request to offer amendments en bloc when section 4 is read?

There was no objection.

The CHAIRMAN. Are there further amendments to section 2? If not, the Clerk will designate section 3.

The text of section 3 is as follows:

OCEAN AND COASTAL RESOURCES MANAGEMENT AND DEVELOPMENT FUND

SEC. 3. (a) There is established in the Treasury of the United States a fund to be known as the Ocean and Coastal Resources Management and Development Fund (hereafter in this Act referred to as the "Fund").

(b) Beginning in fiscal year 1983, the Secretary of the Treasury shall pay into the Fund not later than the end of each fiscal year the lesser of $300,000,000 or an amount equal to 10 per centum of the amount by which all sums deposited in the Treasury of the United States pursuant to section 9 of the Outer Continental Shelf Lands Act (43 U.S.C. 1338) during each fiscal year exceed all sums deposited in the Treasury of the United States pursuant to such section during fiscal year 1982.

(c)(1) As provided in advance by appropriation Acts, the Secretary shall use for fiscal year 1984, and for each subsequent fiscal year, an amount equal to not less than 10 per centum and not more than 20 per centum of the total amount appropriated from the Fund for the purposes of this Act to carry out the National Sea Grant College Program Act (33 U.S.C. 1121–1131).

(2) As provided in advance by appropriation Acts, the Secretary shall use the total amount of any sums paid into the Fund during each fiscal year which are not used to carry out the National Sea Grant College Program Act to provide block grants pursuant to section 4.

The CHAIRMAN. Are there any amendments to section 3? If not, the Clerk will designate section 4.

The text of section 4 is as follows:

NATIONAL OCEAN AND COASTAL RESOURCES MANAGEMENT AND DEVELOPMENT BLOCK GRANTS

SEC. 4. (a) Subject to subsections (b), (c), and (d), for fiscal year 1984 and for each subsequent fiscal year, the Secretary shall provide to each coastal State a national ocean and coastal resources management and development block grant (hereafter in this Act referred to as a "block grant") from sums paid into the Fund during the prior fiscal year pursuant to section 3(b).

(b)(1) No coastal State may receive a block grant for fiscal year unless such coastal State has submitted to the Secretary a report for such fiscal year which—

(A) specifies the allocation by such coastal State of the block grant among coastal zone management activities, coastal energy impact activities, living marine resource activities, and natural resources enhancement and management activities pursuant to section 5(a), and

(B) describes each activity receiving funds provided by the block grant.

(2) Before submitting each report required under paragraph (1), each coastal State shall provide opportunities for the public to review and comment on the report and shall hold at least one public hearing on such report.

(c) The amount of each block grant provided under subsection (a) for a fiscal year to a coastal State shall be determined by the Secretary under a formula established by the Secretary which gives equal consideration to each of the following criteria:

(1) For each coastal State, the equal combination of—

(A) the amount of actual leasing with respect to oil and gas which is carried out under the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) during the previous fiscal year which occurs within the Outer Continental Shelf planning area to which such coastal State is adjacent; and

(B) the volume of oil and gas produced from Outer Continental Shelf acreage leased by the Federal Government which is first landed in such coastal State during the previous fiscal year.

(2) For each coastal State, any proposed oil and gas lease sales which are specified by the Outer Continental Shelf leasing program prepared pursuant to section 18(a) of

the Outer Continental Shelf Lands Act (43 U.S.C. 1344(a)) and which are scheduled to occur within the Outer Continental Shelf planning area to which such coastal State is adjacent.

(3) The coastal related energy facilities (including coal facilities) located within each coastal State during the previous fiscal year.

(4) The shoreline mileage of each coastal State for which the Secretary has approved a management program under section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455).

(5) The coastal population of each coastal State for which the Secretary has approved a management program under section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455).

(d) No coastal State for which the Secretary has approved a management program under section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455) shall receive less than one-half of 1 per centum of the total amount available for block grants pursuant to subsection (a) during any fiscal year.

(e) For the purposes of paragraphs (4) and (5) of subsection (c), the Secretary shall be presumed to have approved the management program of any coastal State if the Secretary determines that, in any fiscal year, such State is making satisfactory progress toward the development of a management program which will be approvable pursuant to section 306 of the Coastal Zone Management Act. Such presumption may be extended only once and for a period not to exceed one additional fiscal year if the Secretary makes such determination under this subsection for such additional fiscal year.

AMENDMENTS OFFERED BY MR. FIELDS

Mr. FIELDS. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. FIELDS: Page 11, line 20, strike out all after the comma following the word "Sound" down through and including the comma in line 21.

Page 14, line 23, insert "with Outer Continental Shelf-related energy or mineral leasing, exploration, development or production within 250 miles of such State's territorial waters" immediately after "each coastal State".

Mr. FIELDS. Mr. Chairman, as I expressed earlier, I have grave reservations about taking $300 million out of the Treasury at this particular time.

Mr. Chairman, this simple, straightforward amendment is designed to provide some semblance of fairness to this bill by limiting OCS revenue sharing funds to those States which have OCS leasing, exploration, development, or production within 250 miles of their territorial waters.

While one would assume that H.R. 5 would already include such a requirement, the simple fact is that H.R. 5 provides money to States whose territorial waters are not part of the Federal OCS program which have never contributed one dime in Federal OCS revenues and which, in fact, are not even adjacent to an ocean.

In short, H.R. 5 plays only lip service to actual OCS activity. It instead places primary emphasis for disbursement of grant funds on such totally unrelated factors as population, length of a coastline, and the number of energy facilities located in the coastal zone area.

As a result of this formula, States like Michigan, which has no Federal OCS, receives 10.1 million, which is more than 15 coastal States that will have significant OCS activity will receive. Ohio, another non-OCS participant, receives 6.9 million which is more than 8 coastal States that will have OCS activity will receive. In fact, under this bill, over $25 million is allocated to States which never have nor ever will be part of the Federal OCS program unless, of course, the authors of this bill feel they are going to use this money to create a new ocean off of their shores.

Mr. Chairman, while I believe that the funding formula in H.R. 5 is inequitable and highly discriminatory, this amendment does not address that issue.

It will simply restore commonsense to this bill by limiting the money to those States which have OCS leasing: exploration, development, or production off of their shores.

Mr. Chairman, I personally believe that this Nation needs a strong, equitable OCS revenue-sharing proposal. I share the sentiments of the proponents of this bill who argue quite articulately that we should compensate those communities affected by OCS activity.

I do not, however, believe there is any justification or reason whatsoever to compensate States or local communities who have not nor will ever be affected by the Federal OCS program.

Mr. Chairman, I believe we can improve this bill and can remove a major reason for vetoing this proposal by adopting this amendment.

I urge its adoption.

Mr. JONES of North Carolina. Mr. Chairman, I rise in opposition to the amendment.

This amendment would restrict block grant eligibility to only those States with OCS leasing, exploration, and development off their shores. I strongly oppose the amendment due to its impact on many other States and on several important objectives of the legislation.

At the very least, this amendment would eliminate funding for all Great Lakes States, all U.S. territories, and for Washington and Oregon.

Mr. Chairman, the idea of eliminating these States and territories from funding under this bill is simply unthinkable. It is correct that the Great Lakes States have never and will never experience OCS impacts; and it is correct that Washington, Oregon, and the territories have had no leasing off their shores; but it is incorrect to assume that OCS activity is the only meaningful factor in determining a State's eligibility in this program. H.R. 5 is intended to serve other important goals in managing renewable ocean and coastal resources, and so, it was the position of the committee that some non-OCS impacts should be the basis for awarding block grants under the program.

Assisting States affected by OCS development is a major purpose of this bill. In fact, well over 50 percent of the block grant funds provided under this bill will go to 7 States adjoining the major producing and frontier areas of the OCS—the States of California, Alaska, and those bordering the Gulf of Mexico. Over 50 percent to only 7 States.

However, H.R. 5 is designed to serve many other national objectives, such as increased use and export of U.S. coal resources. Such an increase will require an expanded transportation network and the Great Lakes are a crucial link in this network. For such reasons, the other 28 coastal States, including the 8 Great Lakes States, will share the remaining funds.

Mr. Chairman, the bottom line is that H.R. 5 is more than fair to the OCS-impacted States. This bill, and in particular this provision, have been thoroughly considered and delicately balanced. The gentleman's amendment would upset this balance and I strongly oppose its passage.

Mr. FORSYTHE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I support the statements made by the chairman of our committee. This bill, as I said in my brief opening remarks, is a piece of legislation that has been under consideration for many, many years, fine tuned in order to get the maximum support. Initially, in some areas, it was called the Louisiana bailout legislation, but it has been removed from that category. Changing it into a Texas bailout will not help very much at all.

This legislation does have a very broad purpose. If it is going to get support across this country and in the Congress and if the proposal is to be fully implemented it is important that we include those broad purposes and fund the programs eligible under there broad measures.

It is very significant that earlier in this debate we were stressing that now is not the time to take $300 million from the U.S. Treasury when it was going for the broad purpose but it is a

right if that purpose is narrowed very significantly.

I hope that this amendment is defeated and that we can make sure that we do keep the intent of the legislation, which I do think is very fair. The legislation maintains some very valuable programs to mitigate the impacts of our Outer Continental Shelf activity.

Mr. FIELDS. Mr. Chairman, will the distinguished minority leader yield?

Mr. FORSYTHE. I yield to the gentleman from Texas.

Mr. FIELDS. Mr. Chairman, let me say that I respect our distinguished minority leader very much. I guess I am a little bit in a quandary, because I would like it defined for me what the purpose of this particular legislation is. I thought originally it was to help States that did have active OCS exploration and production offshore States that were impacted by such activity. It seems to me that perhaps that purpose has shifted, and I want to be told if I am right or wrong. It seems that perhaps the primary purpose at this particular point is to take $300 million out of our Treasury and continue funding three programs that have either been phased down or eliminated in both the Carter and the Reagan administration. It also seems that perhaps we have forgotten the original intent of those three programs. As I understood the original intent, it was to provide some startup money for those programs and the States would take over those particular programs.

So I guess I am in a quandary wondering what the real purpose of this bill is.

□ 1140

Mr. FORSYTHE. I thought we were clear in that it does go beyond grants to those States which have development on the OCS and covering the associated impacts. It is a debatable subject, and always has been, as to what is the impact of all the wealth that flows to a State, even though there is no direct revenue. What is clear is the intent to cover very significant programs, such as sea grant which has been a very valued program.

It is true that the CZM Act did have the intention of mitigating developmental impacts on the coastal zone. However, we still do not have all the States under CZM, your State among them. We hope that you will come aboard and participate in this program. But the ongoing maintenance and operation of the coastal management program I think has clearly demanded some continued Federal support, so that, too, is here. H.R. 5 is a compromise that was tuned to get the broadest support possible. If we start to narrow it, we are going to lose support, and we will not have any program.

Mr. FIELDS. If the gentleman will yield further, just one last question.

I do not mean to be sarcastic in saying this, but in what we have been saying and in reading the legislation and the remarks of the different people who spoke to this particular subject, it appears that in essence this is a backdoor approach to funding three programs that have either been eliminated or phased down in the course of two administrations.

Am I right or wrong in saying this, instead of going through the ordinary budgetary process?

Mr. FORSYTHE. Each to his own characterization. But our committee is certainly concerned about these programs, which are being cut at the administration level.

Mr. BREAUX. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I guess the argument that the gentleman from Texas makes is that if you do not have any offshore leasing and drilling and production off your coastline, then you should not share in this fund that is being paid for out of those revenues.

I guess at first glance that does make some sense, but it is not the purpose for which this bill is written. The bill is a national bill. The bill is designed to try and take into account the concerns of coastal States, whether they be in Maine or whether they be in Louisiana or in Texas. We all have unique problems and unique concerns that are not now being addressed as they should be.

It looks as though in the future—if funding continues, or lack of funding continues in the manner in which it looks like it is moving—there will not be any Federal funds going to these States to address coastal problems that they happen to have. There are a whole slew of coastal problems. Some of them are caused by energy activities; some of them are caused by nature through erosion, and what have you.

All of those concerns should be addressed and they are legitimate national concerns, whether you have drilling rigs off your coast or not. So I think it is perfectly acceptable that we set aside a very small percentage of this fund for use by States who happen today, maybe, not to have any OCS energy-related activities, but hopefully they will in the future.

Suppose we have a State that very aggressively wants drilling off their coast and is fighting to get it but they just do not have any oil and gas? Are we somehow going to fault that State from participating in a national program because geography and creation provided them no oil and gas?

The answer is: Of course not. Their national problems are as much our concern as any other State's, and we should address those problems.

So what this bill does is take a very small percentage of these funds and say we are going to set them aside. If they have oil and gas, then we will increase their percentage. If they do not, they should have something to be taken care of. Even Kentucky, for instance, if they could somehow be included as a coastal State, perhaps should receive a minimal amount.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I would be glad to yield to the gentleman from Kentucky.

Mr. SNYDER. I thank the gentleman for yielding.

Mr. Chairman, I just want to say that the gentleman says the Great Lakes States, and so forth, and some coastal States who do not have exploration ought not to be discriminated against because they do not have any oil production, but there is discrimination. When you take $300 million out of the general revenues that do go to all the States and divert it over to the States that are helped in the bill, you do discriminate against those States, such as Kentucky, which the gentleman has mentioned.

Mr. BREAUX. I would say in response to my good friend and colleague with whom we worked together on so many problems of helping Kentucky and the river States, what we are doing is actually reducing the amount that is now coming out of the whole General Treasury to take care of problems in the coastal States.

I think the gentleman from Massachusetts pointed out that the authorization out of the General Treasury right now is $360 million. We are talking about substantially less than that being taken out of what would go into the Treasury to be used for these States' problems. So actually this approach eliminates some of the discrimination that is presently embodied in existing law.

Mr. FIELDS. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I would be glad to yield to the gentleman from Texas.

Mr. FIELDS. I thank the gentleman for yielding.

Mr. Chairman, I recognize the gentleman as an articulate spokesman and very knowledgeable.

Mr. BREAUX. I try to count well, too, I would say to the gentleman from Texas.

Mr. FIELDS. The gentleman expressed a very broad subject when he said that there are national concerns, there is a national purpose, and we need to look beyond just what happens off of a State's coastline, but my concern is, and I think it is a fundamental concern in this piece of legislation, it is $300 million now. What is to

keep that amount from growing next year or the year after or the year after that as we find new national concerns, new national purposes?

A letter from the Executive Office of the President, David Stockman, says it could be as much as $3 billion over the next 10 years, that there is going to be some new type of management structure to administer the imposition of significant regulatory and reporting requirements from the States. So it is $300 million now. What is going to stop it from growing astronomically?

Mr. BREAUX. It can only grow by any degree to the extent that the increase in OCS revenues grows. It is not like we are taking money out of the sky. This would only be provided if, in fact, the revenues are there because of additional energy that is being found off of our coasts. So the money would be there.

I think that is the answer to that. If new concerns that are legitimate are found, then legitimate concerns should, in fact, be taken care of.

Mr. PRITCHARD. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I would be glad to yield to the gentleman from Washington.

Mr. PRITCHARD. I thank the gentleman for yielding.

Mr. Chairman, if I am not mistaken, it is my impression that there is an absolute cap of $300 million. It cannot grow above that, so it is not a matter of what it will be next year or the year after. There is a $300 million cap on this.

Mr. BREAUX. The gentleman from Washington is absolutely correct.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. BREAUX) has expired.

(On request of Mr. FIELDS and by unanimous consent, Mr. BREAUX was allowed to proceed for 1 additional minute.)

Mr. FIELDS. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Texas.

Mr. FIELDS. I thank the gentleman for yielding.

Just one last question: Of course, it can change if there is some kind of legislative action, but what is the amount in the Senate bill at this particular time?

Mr. BREAUX. I have no idea what the other body is doing.

Mr. FIELDS. Is it $600 million?

Mr. BREAUX. I think I would respond to the gentleman that no matter what figure we are dealing with that there would be a cap placed, whatever figure it would be. There would be a cap that would prevent it from increasing astronomically.

Mr. FIELDS. If my memory serves me correctly, it is $600 million, and when we go into conference I would just assume that $300 million is going to grow.

Mr. BREAUX. The Senate has yielded to the House in the past and perhaps they would see the wisdom again.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Texas (Mr. FIELDS).

The question was taken; and on a division (demanded by Mr. FIELDS) there were—ayes 1, noes 9.

Mr. FIELDS. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to the provisions of clause 2 of rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1200

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Texas (Mr. FIELDS) for a recorded vote.

A recorded vote was refused.

So the amendments were rejected.

The CHAIRMAN. Are there any other amendments to section 4?

AMENDMENT OFFERED BY MR. FIELDS

Mr. FIELDS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FIELDS: Page 15, line 23, strike out all down through and including line 4 on page 17, and insert in lieu thereof the following:

"(1) The amount of actual leasing with respect to oil and gas and other energy resources which is carried out under the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) during the previous fiscal year which occurs within 250 miles of a State's coastline.

"(2) The volume of oil and gas produced from Outer Continental Shelf acreage leased by the Federal Government which is first landed in such coastal States during the previous fiscal year.

"(3) For each coastal State, any proposed oil and gas lease sales which are specified by the Outer Continental Shelf leasing program prepared pursuant to section 18(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1344(a)) and which are scheduled to occur within the Outer Continental Shelf planning area to which such coastal State is adjacent.

"(4) The coastal related energy facilities located within each coastal State during the previous fiscal year.

"(5) The shoreline mileage of each coastal State.

"(6) The coastal population of each coastal State."

Strike all of subsections (d) and (e) and insert in lieu thereof the following new subsection (d):

"(d) If a tract located on the Outer Continental Shelf, for the purposes of paragraph (1) of this subsection, is located within 200 miles of more than one State, equal consideration shall be given to each such State when calculating the amount of block grant as if said tract was located within the planning area the affected State is located."

Mr. FIELDS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request to the gentleman from Texas?

There was no objection.

Mr. FIELDS. Mr. Chairman, in my judgment, this amendment is the most critical and important for it addresses the very heart and soul of this legislation, the funding formula criteria.

While I believe a strong case can be made to establish a formula based solely on actual leasing, exploration, development, and production, I have decided not to pursue that approach.

I have instead opted to offer this amendment which I believe is a well balanced and refined version of the language contained within H.R. 5.

In fact, my amendment, like the proponents bill, provides money to States based on their ability to satisfy the following criteria. Like H.R. 5, my amendment rewards States on the amount of actual leasing, the volume of oil and gas produced, the number of proposed oil and gas lease sales, the number of coastal related energy facilities, the shoreline mileage of each coastal State and the coastal population of each coastal State.

Unlike H.R. 5, my amendment does not arbitrarily and capriciously penalize a State for not yet having a Federally approved coastal zone management program.

For example, under H.R. 5, my own State of Texas, which does not yet have a CZM, is treated for purposes of receiving block grant money as if the State had zero shoreline and zero coastal population.

Mr. Chairman, obviously that is absurd. It is unfair and highly discriminatory to the State of Texas or any other State that does not yet have a CZM.

It is, in fact, even contrary to the stated goals of the authors of this bill who have argued that the purpose and need for this legislation is to compensate local communities affected by OCS activity adjacent to their shores.

Mr. Chairman, I would say to my colleagues that unless we adopt this amendment, then I frankly see no need or justification for this legislation. If we are not going to compen-

sate those very communities, like those on the Texas coast, who have in the past and will in the future experience the heaviest amount of OCS activity, then I believe the best course of action is to defeat this legislation.

While Texas may not have a federally approved CZM, it is absolutely wrong to assume that we have no environmental or natural resource protection laws. In fact, I believe our State laws are far superior to the protection provided under a CZM and that they show much greater sensitivity for the protection of our precious natural resources.

To highlight just a few, our State environmental and natural resource protection laws include: The Open Beach Act, the Dune Protection Act, the Coastal Public Lands Management Act, the Texas Coastal Waterway Act, the Texas Disaster Act, the Coastal Wetlands Acquisition Act, the Dredge Materials Act, and the Coastal Coordination Act.

In addition to these examples, the State has enacted a number of additional natural resource protection laws which have been incorporated within the Texas Natural Resources Code, the Texas Parks and Wildlife Code, and the Texas Water Code.

Despite what you may have heard, all knowledge is not limited exclusively to our Nation's Capitol and just because a program is federally approved that does not mean it is automatically better. In fact, overwhelming evidence suggests that States and not the Federal Government has a much greater appreciation for the protection of their coastal environment.

Mr. Chairman, to repeat what I have said throughout this debate, if the proponents of this bill want a viable OCS revenue-sharing program, then I believe this amendment must be adopted.

Without this amendment, this bill is blatantly unfair to hundreds of communities and frankly not worth adding another $300 million to our yearly deficits which are already the highest in our Nation's history.

If you want a sound and viable OCS revenue-sharing plan, then vote aye on this amendment.

□ 1210

Mr. JONES of North Carolina. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I must caution against any attempt to change the thrust of the allocation formula in H.R. 5. This formula has been carefully designed to produce a fair distribution and to provide States with funds to carry out several important activities.

Mitigation of coastal energy impacts is a major goal of this measure. The allocation formula reflects this goal; 60 percent of the formula is tied to energy activity, with a full 40 percent emphasizing OCS activity exclusively. No other bill currently before the Congress places more emphasis on energy activity. Therefore, States next to producing and frontier regions of the OCS will receive the largest grants.

The funds provided by H.R. 5 will serve other important purposes as well. Thus, in designing this formula, we struck a delicate balance between important energy and nonenergy factors. A formula overly dominated by energy factors would bias the distribution of funds in favor of a very few States.

The five-part formula of H.R. 5 results in an evenhanded distribution. It considers national objectives other than OCS development, but insures that States affected by OCS activity receive the largest shares of the fund. This formula is fair and workable and I would strongly resist changes at this late stage.

Furthermore, the amendment would strike CZM funding incentives, the committee amended the bill this year to allow States to get full credit in the formula simply by making "satisfactory progress" toward the approval of a CZM program. In other words, even if a State does not have an approved program but is making an effort to get one—like Virginia—it will be eligible for all of the criteria in the formula just like States that have approved programs.

Second, the bill recognizes that States that have approved CZM programs have additional responsibilities under the Federal law and that these responsibilities need to be funded through the provisions of H.R. 5. In 1980, for example, Congress authorized a number of new programs for CZM, including urban waterfront and port redevelopment, but these efforts have never been funded. The extra credit given to CZM States recognizes that these are legitimate purposes for the use of H.R. 5 funds and compensation in the formula is necessary to allow States to carry out these purposes.

Third, it should be noted that some States that are heavily involved in offshore oil and gas development, like the State of Texas, do very well under the formula even without an approved CZM program. Under our calculations, Texas is the fifth ranking State in receiving funds under H.R. 5—even without its participation in the CZM program. It is also my understanding that, under its new Governor, Texas may reconsider getting back into the CZM program. If it does, and if it shows it is making "satisfactory progress," it would be eligible for all the criteria in the formula and would receive extra funds for this effort.

Consequently, we view the emphasis on CZM in H.R. 5 as a reward to States that have made the difficult effort to receive approval from the Secretary of Commerce and as necessary compensation for their obligations required by Federal law. We have added additional flexibility in this year's bill and we make certain that the formula provides funds to all States—regardless of whether they have approved CZM programs, or not.

Mr. FORSYTHE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I fully support the statement by Chairman JONES. This again is a part of a really finely tuned package to see that we do get the broad support that we will need for enactment.

As Chairman JONES has pointed out, of the seven States that receive over 50 percent of these funds, Texas will still rank No. 5, even though it does not have an approved CZM program.

The adoption of an approved CZM program is a matter of choice for the State. If it wants to move toward an approved CZM plan and shows that it is making satisfactory progress toward such approval, the State can then gain the added bonus. It is a substantial sum.

The purpose of this bill is broader than just mitigating the onshore effects of offshore activity. The purpose of the bill also is to protect and improve the management of other coastal, natural, and renewable resources—other problems that we find in our coastal areas. This objective addresses the concerns of all of the coastal States, including the Great Lakes States. We think this is an important part of the package.

The amendment should be defeated and I yield back the balance of my time.

Mr. BREAUX. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Just briefly, I would say while under the gentleman from Texas' amendment my own State increases their share of funding from $42 million a year to $67 million a year, my philosophy is that I would rather have a little bit of something than a whole lot of nothing.

I say that in all seriousness because what we have here without the Fields amendment is a coalition of support that will give us the opportunity to have this type of a bill adopted and ultimately signed into law by the President.

I have a great deal of respect for what the gentleman from Texas is attempting to do. It is certainly in the interest of his State, and I dare say I would be doing the same thing if I represented his State.

But one of the things this formula that the bill has considers is a State's coastal zone management plan. There is a feeling in this country which I think is very important that States that have coastal zones that are affected and that are going to receive Federal assistance financially should have a coastal zone management plan to handle those programs on a local level.

The bill emphasizes that. The Fields amendment eliminates that.

The other thing that the Fields amendment does is to say you can only count the production within 250 miles of your area to determine whether you get funding or it sets up a zone of 250 miles of production.

□ 1220

Let me ask the gentleman from Texas a question. I want to make sure I am stating it correctly. How does the gentleman handle the 250-mile question?

Mr. FIELDS. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Texas.

Mr. FIELDS. I thank the gentleman for yielding. The 250-mile question was settled in the last amendment.

But if the gentleman would continue to yield, I tried to enunciate just a moment ago that the State of Texas while not having a coastal zone management program as approved by the Federal Government, has gone far with the environmental protection laws within our State. But what is not compensated for, what is not taken into consideration in the formula as it is currently worded, and this is according to NOAA, Texas should be credited if it had a CZM plan with 3,359 shoreline miles. Nationwide the figure is 95,429 coastal miles. We have a coastal population of 3,870,000 people. Nationwide that figure is 95,226,195 people in coastal States.

The purpose of this particular amendment is to restore some equity and fairness so that we do get fair consideration in this particular funding formula. We do not. That is the purpose of the amendment.

I am not sure it is proper for the Federal Government to come in and question why we do or do not have a CZM program, because we think we have adequately taken care of our own problem.

Mr. BREAUX. I thank the gentleman from Texas for his explanation.

What the gentleman's amendment clearly does is to say that we should be treated as every other State that has a CZM or coastal zone management plan. I think it is the philosophy of the House and of this committee, certainly, to say that if the Federal Government is going to participate in granting direct grants to States, that those States should be participating in coastal zone management plan. The other point which I will close with is that this would drastically reduce the share of revenues that many other States would be receiving under the committee bill. I think that support is essential. I think that the program providing them the funds is fair and therefore the amendment should not be agreed to.

Mr. SAM B. HALL, JR. Mr. Chairman, I move to strike the requisite number of words.

I would like to ask the gentleman from Texas, the sponsor of this amendment, a question. I notice in the information that I have received, that if his amendment is passed, Texas will receive an allocation of $25 million, whereas under H.R. 5, we receive $14 million. Is that a correct figure?

Mr. FIELDS. If the gentleman would yield.

Mr. SAM B. HALL, JR. I yield to the gentleman.

Mr. FIELDS. That is a correct statement.

Mr. SAM B. HALL, JR. All right.

I also have been given information in the last few minutes that unless Texas adopts a coastal zone management program, that Texas will not receive the $25 million.

Mr. FIELDS. If the gentleman will yield further, that is correct.

I would point out further to the gentleman I tried to enunciate in my remarks that Texas has gone very far environmentally to protect ourselves. We have Coastal Public Lands Management Act of 1973, the Dune Protection Act of 1973, the Open Beach Act of 1959, the Coastal Wetlands Acquisition Act of 1979, the Dredge Materials Act of 1977, the Texas Coastal Waterway Act of 1975, the Texas Disaster Act of 1975, the Coastal Coordination Act of 1977. I would be glad to submit these to the record, to the gentleman, to anyone who is interested in substantiation that Texas has gone very far in doing things environmentally that protect us and protect our environment.

Mr. SAM B. HALL, JR. But is Texas going to be required to adopt a coastal zone management program in order to get any additional moneys that we would get under the Fields amendment?

Mr. FIELDS. If the gentleman would yield further, under our amendment we do not mandate the creation of the coastal zone management program. But to get additional moneys as per this formula, Texas would have to have a coastal zone management program that is federally approved.

Mr. SAM B. HALL, JR. I understand that Texas has already, on two occasions in the past, concluded that the federally approved program would cause additional expense, increase Federal control and unnecessary delays in offshore drilling, and that Texas is one of the few coastal States which has been able to keep its own coastal management process and achieve conservation without unnecessary delays and unacceptable developments.

Is it a fair statement to say that regardless of what we have done in the past in Texas, in not going along with a zone management program, that we must do that in the future in order to get any moneys under this bill?

Mr. FIELDS. No, that is not a fair statement. It is fair to say that to get additional moneys we would have to have a coastal zone management program. The basic thrust of this argument is that Texas has done basically what a coastal zone management program would do. We have taken care of our own problems and we are trying to recognize that we have a sensitive environment and we have a great deal of Outer Continental Shelf exploration production and all the attendant things off of our shores.

Mr. SAM B. HALL, JR. All right. If the gentleman's amendment does not pass, then Texas will continue to get $14 million.

Mr. FIELDS. That is true.

Mr. SAM B. HALL, JR. If the gentleman's amendment passes, in order to get the $25 million Texas must adopt the Coastal Zone Management Act.

Mr. FIELDS. No. If this amendment were to pass, the basic things that would be recognized are that we do have 3,359 shoreline miles and also a coastal population of 3,870,000 people. That would be plugged into the formula and we would receive credit even though we do not have a coastal zone management program, taking into consideration that we have dealt with our problems.

Mr. SAM. B. HALL, JR. All right. Then Texas would get $25 million under the gentleman's amendment whether we adopted a coastal zone management program or not.

Mr. FIELDS. That is right, that is true.

Mr. SAM B. HALL, JR. I yield back the balance of my time.

Mr. STUDDS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I just want to take this moment briefly to congratulate the gentleman from Louisiana (Mr. BREAUX) whose statemanship has grown yearly since I have served in this institution.

Many Members will remember our first attempt at the formulation of the coastal energy impact program formula as part of the CZM amendments. The gentleman from Louisiana was cast in this extraordinary position in the House of having to defend a formula allocating those funds drafted in the Senate by some very senior Senators from the State of Louisiana.

When some of us did a little bit of homework and read the fine print, it turned out that notwithstanding a three- or four-page definition of this formula, 100 percent of the money went to Louisiana. That was termed at the time the "Louisiana Repurchase Agreement."

The gentleman from Louisiana, statesman that he is, recognized the futility of attempting to defend that proposition before the House.

And what he just did a moment ago in his speech in opposition to this amendment again reflected that statesmanship.

As he pointed out, under the amendment offered by the gentleman from Texas, Louisiana gains approximately 50 percent in the amount of money it would receive under this bill. The problem, as the gentleman also correctly pointed out, with that is that there would be no bill in that event because if you are opposed to this bill or if you are from Texas, this is an absolutely wonderful amendment. It dramatically increases the money for Texas, it dramatically increases the money for Louisiana, but it detracts and subtracts from almost every other State, coastal State and Great Lakes State in the Nation.

It is an amendment which on the face of it it seems to me ought to be rejected.

I urge that the House do that and do so in recognition of the extraordinary breadth of mind of the gentleman from Louisiana.

Mr. FIELDS. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman.

Mr. FIELDS. I thank the gentleman for yielding.

I hope that my statesmanship goes up in the eyes of the gentleman, because I am going to vote against the bill.

My interest thus far has been to try to provide equity and fairness in the bill, and Texas, even if this bill does pass, will receive $14 million. I said earlier I think the timing of this, taking $300 million out of the Treasury at this point is unwise. So I hope at the conclusion of this particular legislative act that my respect is going to go up in the gentleman's eyes.

Mr. STUDDS. I appreciate the gentleman saying that. I had a feeling he was going to vote against the bill.

I yield back the balance of my time.

Mr. YATES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am one of the few opposing this bill which kind of surprises me because I think there ought to be much more opposition to it. I think it discriminates unfairly in favor of certain coastal States by dipping into prospective OCS leasing revenues, giving them special benefits to the detriment of most of the States in this country.

I must say I am surprised about the lack of opposition on the minority side because the administration is so strongly opposed to this bill, as is indicated by the statement of the administration's representative that appears in the report.

I do not happen to be a strong supporter of the administration's policies but in this instance I think it is right.

Now, the reasons advanced for this bill, as I have listened to them today, are that, one, this bill is supposed to protect certain laws from extinction. These are the coastal zone management program, the sea grant college program, and, third, the coastal zone energy impact program.

Now, I favor these programs and I would not want them rescinded. Admittedly they are in danger not because of any congressional intention to rescind the programs, but because of the refusal or failure of the administration to make appropriations needed to administer these programs in its budgets.

□ 1230

That same situation could prevail even with passage of this bill. There would not be the correction that is sought by the proponents of this bill because this is not an entitlement program. It is a program that is subject to appropriations. The programs would be subject to the same kind of administration opposition in budgeting as they face now. And those who favor this bill would be forced to rely as they do now on congressional approval of appropriations in excess of the amounts recommended by the administration.

So the first reason, that this bill will remove that danger, is not a valid one.

Second, it is argued the coastal States should receive special allocations from leasing because certain inland States now receive Federal funds from mineral receipts and from timber cutting from Federal lands.

Well, those laws are based upon two justifications. One is that there should be payments in lieu of taxes for the Federal lands in those States which pay no taxes now; and second, the resources of those States are being depleted as a result of the Federal Government's leasing activity.

Those reasons are not present in this case. This bill deals with offshore leasing programs that have no comparable reasons for special benefits. These oil-bearing lands under the oceans belong to all the people of this country. Revenues from oil leases belong to all the people. The resources of coastal States are not being depleted.

Now, the gentleman from Texas has objected to the formula. Well, he has a right to that objection because the formula is subject to a great deal of correction. I look at it and I notice that the State of Louisiana—and the gentleman from Louisiana (Mr. BREAUX) received such compliments a few moments ago because he did not move for a greater share—is still the No. 1 recipient of the revenues under this program. It will receive $42 million. The State of Florida will receive $20 million; the State of California, $25 million; Alaska will receive $39 million; New York will receive $13 million; and Texas, approximately $14 million.

But it is interesting, I do not understand, for example, and perhaps somebody can tell me, why the State of Illinois, for example, will receive less money than American Samoa, or the Northern Marianas, or the Virgin Islands. The State of Illinois has a coastal area, possibly not as great as that of the three territories, but still I wonder about how the formula works in that respect. I notice that the State of Ohio will receive $7 million, and its sister State next to it, Indiana, will receive approximately $53,000 only. How does this formula work? What is the quality of the formula that permits this kind of discriminatory allocation to certain States and this kind of back-of-the-hand treatment for so many of the other States?

The CHAIRMAN. The time of the gentleman from Illinois (Mr. YATES) has expired.

(By unanimous consent, Mr. YATES was allowed to proceed for 1 additional minute.)

Mr. YATES. The gentleman from Louisiana (Mr. TAUZIN) talked about the fact that the State of Louisiana is losing—I forget—I think it was 42 square miles of its land, its coastal land, every year.

Well, there is nothing in this bill that can prevent that from happening. The State of Louisiana is still subject to the forces of the weather and it is one of the most oil productive States in the Union. It has enough money to take care of any losses from its coastline. And it will still seek funding through the Army Corps of Engineers if its coastline can be protected, not from this program.

These funds belong to all the people of this country.

For these reasons, Mr. Chairman, I oppose the program and I will vote against it.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Massachusetts.

Mr. STUDDS. I thank the gentleman for yielding.

Very briefly, in response to the question the gentleman asked regarding the funding for the State of Illinois, why it was less than some of the territories.

Mr. YATES. I would be glad to hear the gentleman's response.

Mr. STUDDS. The reason for that is that the State of Illinois does not yet have an approved coastal zone management program as the other entities to which the gentleman referred do.

If it were to get one and it was close a couple of years ago to having one, and we hope that it will again, and incidentally, the committee has on file a strong letter of support from the mayor of the gentleman's city, then the funding for the State of Illinois would be substantially more than the entities to which the gentleman referred in his question. And it ought to be.

Mr. YATES. How much money would it receive under those circumstances?

Mr. STUDDS. It would be approximately $4 million.

Mr. YATES. I see. That still does not justify this program.

The CHAIRMAN pro tempore (Mr. DE LA GARZA). The question is on the amendment offered by the gentleman from Texas (Mr. FIELDS).

The amendment was rejected.

The CHAIRMAN pro tempore. Are there any other amendments to section 4? If not, the Clerk will designate section 5.

The text of section 5 is as follows:

REQUIREMENTS ON THE USE OF BLOCK GRANTS

SEC. 5. Block grants provided to a coastal State pursuant to section 4(a) shall be used for the enhancement and management of renewable ocean and coastal resources and for the amelioration of any adverse impacts that result from coastal energy activity with respect to the development of nonrenewable resources.

(a) Such block grants shall be used for each of the following activities:

(1) Activities of such coastal State authorized by the Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.).

(2) Activities of such coastal State pursuant to the coastal energy impact program administered under section 308 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1457).

(3) Activities of such coastal State for the enhancement and management of living marine resources.

(4) Activities of such coastal State for the enhancement and management of its natural resources.

(b) The Secretary shall insure that any coastal State receiving a block grant under section 4(a) will use at least 25 per centum of the amount of each block grant for eligible activities authorized by paragraph (1) of subsection (a), excluding activities administered under section 308 of the Coastal Zone Management Act.

(c) Any coastal State which the Secretary determines uses any funds provided by a block grant under section 4(a) for an activity not specified in subsection (a), in an amount less than specified in subsection (b), or in any other manner inconsistent with this Act, shall repay such funds to the Fund. If a coastal State does not repay any funds required to be repaid under this subsection, the Secretary may reduce the amount of any future block grant or grants provided under section 4(a) by the amount of such required repayment.

(d) Nothing in this Act shall be construed to repeal or modify, by implication or otherwise, section 312 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1461): Provided, however, That the Secretary shall reduce any block grant, provided under this Act to a coastal State that has an approved program under section 306 of the Coastal Zone Management Act (16 U.S.C. 1455), by no more than 30 per centum of the amount of such State's block grant, which is attributable to sections 4(c) (4) and (5) of this Act, if the Secretary makes the determination provided in section 312(c) of the Coastal Zone Management Act.

The CHAIRMAN pro tempore. Are there any amendments to section 5? If not, the Clerk will designate section 6.

The text of section 6 is as follows:

LOCAL GOVERNMENTS

SEC. 6. (a) Each State receiving a block grant in any fiscal year pursuant to section 4(a)—

(1) shall establish an effective mechanism for consultation and coordination with its local governments with respect to the allocation of such block grant within the State, and

(2) shall provide to its local governments allocations from such block grant commensurate with the responsibilities of the local governments in carrying out activities pursuant to section 5(a).

(b) In carrying out its responsibilities pursuant to subsection (a)(2) of this section, the State shall give particular emphasis to the activities of local governments in—

(1) providing public services and public facilities which are required as a result of coastal energy activity, and

(2) preventing, reducing, or ameliorating any unavoidable loss of valuable environmental or recreational resources if such loss results from coastal energy activity.

(c) In carrying out its responsibilities pursuant to this section, each State shall provide no less than 35 per centum of each such block grant to its local governments.

The CHAIRMAN pro tempore. Are there any amendments to section 6? If not, the Clerk will designate section 7.

The text of section 7 is as follows:

ASSESSMENT AND AUDIT

SEC. 7. (a) Any coastal State receiving a block grant for a fiscal year under section 4(a) must submit to the Secretary assessment of the expenditure of funds provided by the block grant.

(b) Each assessment submitted by a coastal State for a fiscal year under subsection (a) shall contain a statement of all funds provided by the block grant received by such coastal State for such fiscal year and shall include an assessment of all financial assistance provided to such State's local governments pursuant to section 6.

(1) Such statement shall have been audited by an entity which is independent of any agency or offical administering or using funds provided by such block grant.

(2) The audit shall be conducted in accordance with the financial and compliance element of the standards for audit of governmental organizations, activities, and functions established by the Comptroller General of the United States.

The CHAIRMAN pro tempore. Are there any amendments to section 7? If not, the Clerk will designate section 8.

The text of section 8 is as follows:

RULES AND REGULATIONS

SEC. 8. The Secretary shall promulgate, pursuant to section 553 of title 5, United States Code, after notice and opportunity for full participation by relevent Federal agencies, State agencies, local governments, regional organizations, port authorities, and other interested parties, both public and private, such rules and regulations as may be necessary to carry out the provisions of the Act.

The CHAIRMAN pro tempore. Are there any amendments to section 8?

Mr. FIELDS. Mr. Chairman, I move to strike the last word.

The CHAIRMAN pro tempore. The gentleman from Texas (Mr. FIELDS) is recognized.

Mr. FIELDS. Mr. Chairman, I sit on the Merchant Marine and Fisheries Committee. I admire my chairman, I admire my minority leader, but I strenuously disagree with this bill the way it has been created. I think it is unfair, it is inequitable. I think it is worked and has been drawn to benefit certain States. In fact, seven States receive over $10 million in allocation. My State is one. I think that is unfair; $300 million, at this particular time, is being taken out of Federal Treasury. I think that is inopportune.

I just want to address some of the arguments that have been made today, particularly about three programs that would be funded under this particular piece of legislation.

I had thought that the original intent was to benefit those States that were negatively impacted by OCS development and I find that, really, the purpose is to fund three programs that were either being dissipated or eliminated altogether by both the Carter and the Reagan administrations. And it was my understanding that the three programs in question were originally created and were designed to receive startup money from the Federal Government and then the States would actually take over the funding of those particular programs. So there is no compelling need, or no reason to continue funding for those particular programs.

Also, I want to point out that I had read earlier a statement from David Stockman that we are in all likelihood not talking only about $300 million. I know Members have talked about a cap. The Senate has a bill that has a much higher cap. So automatically we are going to be talking about more money, more than $300 million.

In the last sentence of paragraph 4 of a letter dated September 6, 1983, from the Office of Management and Budget, the last sentence says:

The authorized appropriations could amount to as much as $3 billion over the next 10 years.

And he goes on to say, "* * * that is add $3 billion more to the Federal deficit."

In paragraph 5, he says:

H.R. 5 would also require the establishment of a management structure to administer the imposition of significant regulatory and reporting requirements on the state. This is directly contrary to the administration's effort to reduce such federally imposed burdens.

And I maintain that what is pointed out in this particular letter is accurate, that there is a likelihood that this particular expenditure is going to increase year after year.

I also want to point out and include in the RECORD a letter from the Deputy Secretary of the Treasury, dated June 17, 1983, signed by Mr. R. T. McNamar, on page 2, he says:

This Department strongly opposes the whole concept of sharing OCS receipts with the states, and particularly the earmarking and distribution provisions in H.R. 5 and similar proposals. In fact, if H.R. 5 were to pass the Congress, Treasury would recommend that it be vetoed by the President.

The letter follows:

THE DEPUTY SECRETARY OF THE TREASURY,
Washington, D.C., June 17, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: This is to advise you of the intense concerns of the Department of the Treasury regarding the proposed sharing of Outer Continental Shelf (OCS) receipts with the States, as would be provided by H.R. 5, the "Ocean and Coastal Resources Management and Development Block Grant Act." I understand that this bill will be voted on by the House in the near future. Though we were not asked to testify on this subject, Treasury did comment to Chairman Jones through Deputy General Counsel Margery Waxman on May 5, 1983. I want to emphasize that Treasury remains fundamentally opposed to sharing OCS receipts in any form with the States. Our opposition is based on several grounds.

(1) The Outer Continental Shelf beyond the three-mile limit is strictly a Federal responsibility. The legal situation on this issue is clear and it would be most unwise to reopen it, even implicitly, by entertaining the sharing of Federal OCS receipts. This would introduce the possibility not only of protracted disputes, but also of the eventual loss of substantial Federal revenues.

(2) H.R. 5 would effectively earmark funds for activities that the Administration has sought to reduce drastically or eliminate. In a number of cases the Congress has agreed. Thus the proposal introduces an objectionable budgetary technique—earmarking of revenues—in what is clearly an effort to circumvent established decisions. Such earmarking limits the flexibility of the President and the Congress in matching program funding to current priorities and national goals. It also protects those activities—even if carried out by the States—from the normal competition for resources, and undermines the budget process at all levels of government.

(3) The only justification Treasury can see for transferring OCS revenues, which now benefit the entire nation, to State and local governments serving coastal areas would be as a means of compensating those areas for the otherwise uncompensated, or external, costs of OCS leasing. However, a block-grant or a categorical grant approach is not the appropriate mechanism for dealing with the issue of external costs. While some of the resistance to OCS activities apparently is rooted in concerns that they will give rise to costs that will not be compensated, it is our understanding that the provisions of the Outer Continental Shelf Lands Act were carefully designed to provide adequate protection for, and appropriate compensation to, coastal areas that are at risk of being affected adversely by any oil spills from OCS activities.

(4) Other impacts on coastal jurisdictions may occur due to OCS-related onshore facilities or due to resident OCS employees. Such employees or facilities are fully taxable by such coastal jurisdictions and are superior sources of tax revenues compared to most economic activities because they are high wage and capital intensive. Studies have shown that the financial benefits of OCS activities to State/local government outweigh the costs.

(5) The proposal would be inefficient and inequitable in that a number of unaffected States would be rewarded and some affected States would receive large gains—some would argue, windfall gains. For example, the Great Lake States, Hawaii, and Pennsylvania and the territories are unaffected by OCS production. Washington, Maine, New Hampshire, Connecticut, and Oregon are likely to be affected only slightly if at all. Texas and Louisiana, which have had many years to adjust to OCS effects, would receive the bulk of the funds—along with California, Mississippi, Alabama, and Alaska. Many argue that several of these States are in relatively better positions financially than the U.S. Government with respect to budgetary deficits. Several of these States either reduced various taxes in fiscal year 1981, have no individual State income taxes, or, in the case of Alaska, have negative individual State income taxes, or show other signs of relative fiscal well-being.

(6) An additional Federal outlay of $300 million would be inconsistent with sound budget policy. Most important, Federal acceptance of the principle of sharing OCS receipts would virtually invite the States to press for an ever larger share of the economic rent generated by the OCS program. The obvious question would always be: why $300 or $500 million, why not $3 billion or $5 billion?

(7) A convincing case has not been made that this approach would facilitate OCS leasing. Many groups and jurisdictions simply are not likely to be persuaded by financial inducements to abandon their opposition to this leasing—and suits and delays will result regardless of any sharing of the revenues. Further, the argument that sharing of OCS receipts is necessary to facilitate leasing is refuted by the unexpectedly strong bidding in the last two lease-sales—sales that took place in an environment of declining world prices for petroleum products, not rising prices.

For these reasons, this Department strongly opposes the whole concept of sharing OCS receipts with the States, and particularly the earmarking and distribution provisions in H.R. 5 and similar proposals. In fact, if H.R. 5 were to pass the Congress, Treasury would recommend that it be vetoed by the President.

The Office of Management and Budget has advised that there is no objection from the standpoint of the Administration's program to the submission of this letter to you.

Sincerely,

R. T. MCNAMAR.

□ 1240

I think the reasons are obvious—$300 million at this particular budgetary time.

I further want to point out something that I have done earlier, but hopefully other people will take cognizance of this:

Twenty-one States would receive no funding under this particular bill. Seven States would receive over $10 million. My State is one; $300 million is being taken out of the Federal Treasury. Those States that would receive no money are Arizona, Arkansas, Colorado, Florida, Idaho, Iowa, Kansas, Kentucky, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wyoming.

Mr. Chairman, I think that this type of bill is highly unfair. We are asking the taxpayers of those interior States to basically feel the pressures that are going to be created because of this particular deficit problem, and I think this bill should be defeated.

The CHAIRMAN pro tempore. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of substitute, as amended, was agreed to.

The CHAIRMAN pro tempore. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DE LA GARZA, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5) to establish an ocean and coastal resources management and development fund from which coastal States shall receive block grants, pursuant to House Resolution 206, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. FIELDS. Mr. Speaker, I object to the vote on the ground that a

quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 301, nays 93, not voting 39, as follows:

□ 1250

Mr. RITTER changed his vote from "yea" to "nay."

Mrs. KENNELLY and Messrs. ROEMER, LOWERY of California, PACKARD, WILLIAMS of Ohio, and MOORE changed their votes from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1300

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. (Mr. RATCHFORD). Is there objection to the request of the gentleman from North Carolina?

There was no objection.

PERMISSION FOR SUBCOMMITTEE ON CIVIL AND CONSTITUTIONAL RIGHTS OF COMMITTEE ON THE JUDICIARY TO MEET TODAY DURING THE 5-MINUTE RULE

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that the Subcommittee on Civil and Constitutional Rights of the Committee on the Judiciary be given permission to sit while the House is under the 5-minute rule this afternoon.

We will be hearing testimony on House Joint Resolution 1, the equal rights amendment.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. SENSENBRENNER. Mr. Speaker, reserving the right to object, I take this time to inform the membership that the minority has no objection to the gentleman's request. I hope that the gentleman will make a similar request during the 2 days of minority hearings on House Joint Resolution 1 that the gentleman promised us this morning.

Mr. EDWARDS of California. Mr. Speaker, if the gentleman will yield, the gentleman has my word on that.

Mr. SENSENBRENNER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

TRADE ACT OF 1974 AMENDMENTS

The SPEAKER pro tempore. Pursuant to House Resolution 299 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3391.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3391) to improve worker training under the Trade Act of 1974, and for other purposes, with Mr. KILDEE in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Monday, September 12, 1983, all time for general debate had expired.

Pursuant to the rule, the bill is considered as having been read for amendment under the 5-minute rule. No amendments to the bill are in order except the following amendments: First, amendments recommended by the Committee on Ways and Means, which shall not be subject to amendment except the amendment printed in the CONGRESSIONAL RECORD of September 12, 1983, by, and if offered by, Representative FRENZEL, which shall be debatable for not to exceed 30 minutes, to be equally divided and controlled by Representative FRENZEL and a Member opposed thereto; and second, the amendments printed in the CONGRESSIONAL RECORD of September 12, 1983, by, and if offered by, Representative FRENZEL, and said amendments shall not be subject to amendment, but each amendment shall be debatable for not to exceed 30 minutes, to be equally divided and controlled by Representative FRENZEL and a Member opposed thereto.

The text of H.R. 3391 is as follows:

H.R. 3391

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. GROUP ELIGIBILITY REQUIREMENTS.

Section 222 of the Trade Act of 1974 (19 U.S.C. 2272) is amended to read as follows:

"SEC. 222. GROUP ELIGIBILITY REQUIREMENTS.

"The Secretary shall certify a group of workers as eligible to apply for adjustment assistance under this part if he determines—

"(1) that—

"(A) a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

"(B) sales or production, or both, of such firm or subdivision have decreased absolutely, and

"(C) increases of imports of articles like or directly competitive with articles—

"(i) which are produced by such workers' firm or appropriate subdivision thereof, or

"(ii) to which such workers' firm or appropriate subdivision thereof provides essential parts or essential services,

contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production; or

"(2) that a significant number or proportion of the workers in such workers' firm (if the firm has no subdivision) or subdivision of a firm have become totally or partially separated, or are threatened to become totally or partially separated, by reason of the relocation of the production functions of that firm or subdivision to a foreign country or instrumentality.

For purposes of paragraph (1)(C), the term 'contributed importantly' means a cause which is important but not necessarily more important than any other cause.".

SEC. 2. QUALIFYING REQUIREMENTS.

The last sentence of section 231(a)(2) of the Trade Act of 1974 (19 U.S.C. 2291(a)(2)) is amended—

(1) by inserting in subparagraph (B) thereof ", or because of being laid off for any reason, if the worker later receives back pay for the week of layoff" immediately before ", or"; and

(2) by striking out all that follows after subparagraph (C) and inserting in lieu thereof "shall be treated as a week of employment at wages of $30 or more, but not more than 7 weeks, in case of weeks described in paragraph (A) or (C), or both, may be treated as weeks of employment under this sentence.".

SEC. 3. LIMITATIONS ON TRADE READJUSTMENT ALLOWANCES.

The first sentence of section 233(a)(3) of the Trade Act of 1974 (19 U.S.C. 2293(a)(3)) is amended to read as follows: "Notwithstanding paragraph (1), in order to assist the adversely affected worker to complete training approved for him under section 236, and in accordance with regulations prescribed by the Secretary, payments may be made as trade readjustment allowances for up to 26 additional weeks in the 26-week period that—

"(A) follows the last week of entitlement to trade readjustment allowances otherwise payable under this chapter; or

"(B) begins with the first week of such training, if such training is approved after the last week described in subparagraph (A).".

SEC. 4. WORKER TRAINING.

Section 236 of the Trade Act of 1974 (19 U.S.C. 2296) is amended—

(1) by striking out "may approve"in the first sentence of subsection (a)(1) and inserting in lieu thereof "shall approve";

(2) by inserting immediately after the second sentence thereof the following new sentence: "If the funds necessary to pay such costs have not been appropriated at the time the training is entered, such costs shall be paid for as soon as possible from the next appropriation of funds to carry out the purposes of this section.";

(3) by adding at the end of subsection (a)(1) the following new sentence: "For purposes of applying subparagraph (C), a reasonable expectation of employment does not require that employment opportunities for a worker may be available, or offered, immediately upon his completing training under this section."; and

(4) by adding at the end thereof the following new subsection:

"(d) The Secretary shall pay to any worker who—

"(1) begins approved training under this section after the date of the enactment of this subsection; and

"(2) is not eligible for trade readjustment allowances during any or all of the period of such training;

a supplemental assistance benefit of $15 for each day during which the worker participates in such training but for which he is not eligible for such allowances.

SEC. 5. TRAINING VOUCHERS.

(a) Section 236 of the Trade Act of 1974 (19 U.S.C. 2296) (as amended by section 3) is further amended as follows:

(1) Subsection (a)(2) is amended by striking out "paragraph (1)" each place it appears and inserting in lieu thereof "paragraph (1) or subsection (c)".

(2) Subsection (b) is amended by inserting "under paragraph (1) or subsection (c)" immediately after "training".

(3) Subsections (c) and (d) are redesignated as subsections (d) and (e).

(4) The following new subsection is inserted immediately after subsection (b):

"(c)(1) A worker eligible for training under subsection (a) may, in lieu of obtaining training in accordance with that subsection, elect to obtain training under the voucher system provided for under this subsection. If an election is made by a worker to obtain training under this subsection or subsection (a), the worker is eligible for training only in accordance with that election, unless for reasons beyond the control of the worker training is no longer available in accordance with such election.

"(2) If a worker finds training (which may include training on the job) that he considers appropriate (whether or not services described in section 235 were utilized in finding that training), he may apply to the Secretary for a voucher to cover the costs of such training, which costs, in the case of training on the job, are limited to costs directly incurred by the provider solely for training purposes.

"(3) If the Secretary—

"(A) approves the course of training for which application is made under paragraph (2); and

"(B) finds that—

"(i) suitable employment for the worker is not available,

"(ii) the worker is not already qualified for the job for which training is sought, and

"(iii) there is a reasonable expectation of permanent employment with the provider after completion of the training,

the Secretary shall issue a voucher which obligates the United States to pay to the provider of the training the costs thereof subject to the following conditions:

"(A) Payment of the training costs shall be made on a quarterly basis subject to—

"(i) the provider of training certifying to the Secretary with respect to each quarter that the worker's attendance and progress regarding the training has been satisfactory; and

"(ii) the worker certifying to the Secretary regarding his actual training and employment, with the provider during each quarter.

"(B) Payment of the training costs shall not be made to a provider of training on the job unless the provider certifies to the Secretary, on such periodic basis as the Secretary may require, that the worker's training will not result in—

"(i) the displacement of currently employed workers (including partial displacement such as reduction in the hours of nonovertime work or in wages or employment benefits); or

"(ii) the hiring of the trainee to fill a job opening created by the action of the employer in laying off or terminating the employment of any regular employee.".

(b) Section 235(a)(3) of such Act is amended

(1) by striking out "training approved for the worker under section 236" and inserting in lieu thereof "training approved or provided for by voucher under section 236"; and

(2) by striking out "236(c)" and inserting in lieu thereof "236(d)".

SEC. 6. JOB SEARCH AND RELOCATION ALLOWANCES.

(a) Section 237(a)(1) of the Trade Act of 1974 (19 U.S.C. 2297(a)(1)) is amended by striking out "$600" and inserting in lieu thereof "$800".

(b) Section 238(d)(2) of the Trade Act of 1974 (19 U.S.C. 2298(d)(2)) is amended by striking out "$600" and inserting in lieu thereof "$800".

SEC. 7. SPECIAL ACCOUNT FOR ADJUSTMENT ASSISTANCE.

(a) Section 245 of the Trade Act of 1974 (19 U.S.C. 2317) is amended to read as follows:

"SEC. 245. SPECIAL ACCOUNT FOR ADJUSTMENT ASSISTANCE.

"(a) There is established in the Treasury of the United States a special account to be known as the Special Account for Adjustment Assistance (hereafter in this section referred to as the 'special account') consisting of such funds as may be appropriated to it as provided in this section.

"(b)(1) For purposes of making the expenditures referred to in subsection (c), there is appropriated to the special account—

"(A) for fiscal year 1984, amounts equivalent to 2.1 percent of the customs duties collected during fiscal year 1983, of which $109,000,000 shall be available for training, services, and allowances under parts II and III of subchapter B, and $27,500,000 shall be available for adjustment assistance to firms under chapter 3; and

"(B) for fiscal year 1985, amounts equivalent to 1.4 percent of the customs duties collected during fiscal year 1984, of which $52,000,000 shall be available for training, services, and allowances under parts II and III of subchapter B, and $27,500,000 shall be available for adjustment assistance to firms under chapter 3.

If additional sums are necessary for such purposes during any fiscal year, there are appropriated to the special account additional sums equivalent to such percent of the customs duties collected in the preceding fiscal year as may be required.

"(c) Amounts in the special account shall be available as provided by appropriation acts, only for making expenditures to carry out the provisions of this chapter and chapter 3 (including any administrative costs for such chapters not paid for out of trust funds).

"(d) The Secretary of the Treasury shall pay into the general fund of the Treasury all amounts remaining in the special account after the close of each fiscal year that are not needed for making the expenditures referred to in subsection (c).

"(e) The Secretary of the Treasury shall report to the Congress not later than March 1 of each year on the operation and status of the special account during the preceding fiscal year.".

(b) The item in the table of contents to the Trade Act of 1974 that refers to section 245 is amended to read as follows:

"Sec. 245. Special account for adjustment assistance.".

SEC. 8. ASSISTANCE TO INDUSTRY.

Section 265 of the Trade Act of 1974 (19 U.S.C. 2355) is amended—

(1) by amending subsection (a)—

(A) by inserting "or workers" immediately after "substantial number of firms", and

(B) by inserting "223 or" immediately before "251"; and

(2) by striking out "$2,000,000" in subsection (b) and inserting in lieu thereof "$10,000,000".

SEC. 9. ACCOUNT FOR FIRM ASSISTANCE.

Section 257 of the Trade Act of 1974 (19 U.S.C. 2345) is amended by amending subsection (c) to read as follows:

"(c) All repayments of loans, payments of interest, and other receipts arising out of transactions entered into by the Secretary pursuant to this chapter, shall be paid into a separate account established for that purpose to be administered by the International Trade Administration in the Department of Commerce. Such repayments, payments and receipts shall be expended for future loans, loan guarantees, technical assistance or other functions performed under this chapter, including administrative expenses in connection with such functions.".

SEC. 10. EXTENSION OF ADJUSTMENT ASSISTANCE FOR WORKERS AND FIRMS.

Section 284 of the Trade Act of 1974 (19 U.S.C. 2394) is amended by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1985".

SEC. 11. EFFECTIVE DATES.

(a) The amendments made by sections 1 and 2 shall apply with respect to all petitions filed under section 221 of the Trade Act of 1974 on or after the effective date of this Act.

(b) The amendments made by section 2 shall apply with respect to all petitions for certification filed under such section 221 after September 30, 1982.

(c) The amendments made by section 4 shall apply with respect to workers covered under certifications issued under section 222 of such Act of 1974 after September 30, 1982. The provisions of section 236 of such Act of 1974, as in effect without regard to such amendments, shall continue to apply in the case of workers covered under certifications issued on or before such date.

(d) The amendments made by sections 3, 5, 6, 7, 8, and 9 shall take effect on the date of the enactment of this Act.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: Page 4, lines 1 and 2, strike out "for him" and insert "or provided for by voucher".

Mr. GIBBONS (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The text of the remaining committee amendments is as follows:

Committee amendments: Page 5, line 14 insert a quotation mark after "allowances.".

Page 5, line 17, strike out. "(3)" and insert "(4)".

Page 7, lines 5 and 6, strike out "permanent" and "with the provider".

Page 7, line 18 after "employment" insert ", If any,".

Page 8, strike out lines 9 through 15, inclusive, and insert the following:

(b) The second sentence of section 233(a)(3) of such Act 2 is amended by striking out "236(c)" and inserting in lieu 3 thereof "236(d)".

Page 9, line 14, strike out "2.1" and insert "2.6".

Page 9, line 15, strike out "109," and insert "111,".

Page 9, line 21, strike out "1.4" and insert "1.8".

Page 9, line 22, strike out "52," and insert "56,".

Page 11, line 10, insert a quotation mark before "(c)".

Page 11, line 19, insert a quotation mark after "tions.".

Page 11, strike out line 22 and insert "Section 285 of the Trade Act of 1974 (19 U.S.C. note preceding 2271)".

Page 12, line 4, strike out "effective".

Page 12, line 5, after "of" insert "the enactment of".

Page 12, strike out lines 6, 7, and 8.

Page 12, line 9, strike out "(c)" and insert "(b)".

Page 12, line 16, strike out "(d)" and insert "(c)".

The CHAIRMAN. The gentleman from Florida (Mr. GIBBONS) may proceed.

Mr. GIBBONS. Mr. Chairman, these committee amendments are merely technical in nature. In themselves they are not controversial. I understand that the gentleman from Minnesota (Mr. FRENZEL) may have some amendments to the committee amendments and so, without further ado, I will reserve the balance of my time on the committee amendments.

The CHAIRMAN. The Chair will inquire, does the gentleman from Florida (Mr. GIBBONS) wish each committee amendment to be taken separately, or does he wish to have them considered en bloc?

Mr. GIBBONS. Mr. Chairman, let me ask the gentleman from Minnesota (Mr. FRENZEL) what does he think about that.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I am glad to yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, the committee amendments, I think, can be considered en bloc. One of my amendments made in order under the rule is to the committee amendments, and at the proper time, I want to raise it. And then I have three other amendments.

In my judgment, the description of the gentleman from Florida (Mr. GIBBONS) is correct. The amendments are changes in the bill, but we have described them in the schedule of debate on Monday. If I have some time, I will take some résumé time on the committee amendments themselves, and then it would be my intention to raise my amendments.

The CHAIRMAN. Without objection, the committee amendments will be considered en bloc.

There was no objection.

The CHAIRMAN. The Chair will state that the gentleman from Minnesota (Mr. FRENZEL) should offer his amendment to the committee amendments at this time.

PARLIAMENTARY INQUIRIES

Mr. FRENZEL. I have a parliamentary inquiry, Mr. Chairman.

Is there time allotted under the rule for the discussion of the committee amendments?

The CHAIRMAN. The allotted time is 30 minutes.

Mr. FRENZEL. Mr. Chairman, I have a further parliamentary inquiry.

Am I allowed 15 minutes on the committee amendments?

The CHAIRMAN. The Chair corrects himself and will clarify the situation.

There will be 5 minutes in favor and 5 minutes in opposition allowed on the committee amendments and 30 minutes equally divided, on any amendment that the gentleman may offer.

Mr. FRENZEL. Mr. Chairman, may I be recognized for 5 minutes on the committee amendments?

The CHAIRMAN. The gentleman from Minnesota (Mr. FRENZEL) will be recognized for 5 minutes on the committee amendments.

Mr. GIBBONS. Mr. Chairman, may I reserve the balance of any part of the 5 minutes that I may have had on the committee amendments?

The CHAIRMAN. The gentleman from Florida (Mr. GIBBONS) reserves his time.

Mr. FRENZEL. Mr. Chairman, I take this time simply to refresh the memory of the members of this committee about the debate on H.R. 3391 which took place on Monday.

We are talking here about a reauthorization of the trade adjustment assistance program. As to the program itself, the authorization expires on September 30 of this year, and so if we intend to have TAA, it is appropriate that we move forward promptly. Despite my lack of affection for this bill, I do think we should have a TAA program.

What strikes me as inappropriate in the bill before us, H.R. 3391, is that we are expanding what the courts have already told us is at least partially an entitlement program. In the pending bill, we are creating an element called a special account which is, in effect, another Federal trust fund. To me, it is more accurately described as a direct dip into the Treasury.

Finally, Mr. Chairman, we are talking about a bill which more than doubles, according to June CBO estimates, the outlays which have occurred under TAA in the current fiscal year. I thought on Monday that we were a little more than doubling our expenses. I now find today, after a telephone discussion with the Department of Labor, that recent certifications now lead the Department, using CBO's model, to suggest that the cost of this bill will not be $217 million in fiscal year 1984 but somewhere in the neighborhood of $500 million, which is about five times the amount in our 1983 budget. The figure for fiscal year 1985, I am told, will be in the neighborhood of $225 million, which is, of course, about a 40-percent increase from the figure in the bill, with the estimate for the bill of $163 million.

Whichever estimate is correct, we will be increasing this program by a quantum leap, not by a modest adjustment. The budget resolution will be cut to pieces in either case.

Finally, Mr. Chairman, I want to invite the attention of the members of the committee to the Washington Post editorial of this morning which notes, as I have suggested, that this bill is unworthy of approval or of enactment by this body, and that the bill cannot do the retraining that its purports to do.

H.R. 3391 neither buys off protection nor does it guarantee any kind of special guarantee of a new job. In fact, it is a duplication. Redundancy is a point which often eludes the Post editorialists, but apparently they understand this bill very well. I commend the article to my colleagues attention:

[From the Washington Post, Sept. 14, 1983]

BUYING OFF PROTECTIONISM

As Congress gets down to business, Democratic representatives are expected to make an effort to extend and expand the expiring Trade Adjustment Assistance program. The program is meant to compensate workers hurt by foreign competition and thereby to reduce labor pressure for protectionist measures. Bargains of this sort are expensive. They also raise serious questions of unfairness to other groups of displaced workers who are, by any honest accounting, no less deserving of help than those who benefit from the trade adjustment program.

The current program is, thanks to Reagan administration cutbacks, a shadow of its former swollen self. Under earlier administrations the program had been progressively liberalized with strong emphasis on the "assistance" aspect and very little on the "adjustment." While claimants were supposed to demonstrate that foreign imports had directly destroyed their jobs, studies showed that more than 70 percent of workers ultimately returned to those same jobs. Only 3 percent enrolled in retraining and less than half of those completed it. The program simply provided much higher unemployment benefits for a longer time.

None of the bills now being pushed in Congress would restore the higher benefits terminated two years ago—workers now receive additional weeks of benefits but at the same level as regular unemployment. But the bills would make it easier for workers to claim their unemployment was related to foreign trade, soften work requirements, lengthen benefit periods and create an entitlement for retraining and additional stipends.

Money aside, all of this might be sound social policy if it were available to every U.S. worker permanently displaced. But why should trade-affected workers be so favored? If experience is any guide, they are more likely to be recalled to their former jobs than others among the long-term unemployed. And why should a worker be helped if his job moves overseas but not if it moves to another state?

No claim for special government responsibility for the trade-affected can be supported. Government did not create imports, and it has no obligation to create tariff barriers to them. If there is one group of unemployed workers who could legitimately claim reparations, it would be workers in export industries whose jobs have been lost by the inflated value of the dollar on foreign exchanges.

In opposing extension of trade adjustment benefits the administration points to the fact that it has requested over $200 million next year for job search help and retraining for all permanently displaced workers, not just a favored few. Perhaps that's not enough money, but the approach is the right one.

□ 1310

Mr. Chairman, I have taken advantage of the time. I think this recapitulates the position of those opposed to the bill and those who wish to make changes in it.

I yield back the balance of my time.

The CHAIRMAN. Does the gentleman from Florida (Mr. GIBBONS) wish to speak on the committee amendment?

Mr. GIBBONS. Yes, Mr. Chairman, I want to speak in opposition to Mr. FRENZEL's amendment, if I may be recognized for that.

The CHAIRMAN. Right now the gentleman from Minnesota has used his time for the committee amendments. He has not yet offered his amendment to the committee amendments.

Mr. GIBBONS. I do not want to speak any more, then, Mr. Chairman. I want to speak in opposition to the Frenzel amendment.

The CHAIRMAN. Does the gentleman from Minnesota wish at this time to present his amendment?

Mr. FRENZEL. Mr. Chairman, I have an amendment at the desk entitled "No. 1." I want to offer that amendment.

The CHAIRMAN. The Chair will ask the gentleman, is this an amendment to the committee amendment?

Mr. FRENZEL. It is an amendment to the committee amendment, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment.

AMENDMENT OFFERED BY MR. FRENZEL TO THE COMMITTEE AMENDMENTS

Mr. FRENZEL. Mr. Chairman, I offer an amendment to the committee amendments.

The Clerk read as follows:

Amendment offered by Mr. FRENZEL to the committee amendments: On page 9, line 14, strike "2.6 percent" and insert in lieu thereof "1.6 percent".

On page 9, line 15, strike "$111,000,000" and insert in lieu thereof "$61,500,000".

On page 9, line 21, strike "1.8 percent" and insert in lieu thereof "1.47 percent".

On page 9, line 22, strike "$56,000,000" and insert in lieu thereof "$61,500,000".

On page 10, strike line 1 through line 4.

Mr. FRENZEL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. FRENZEL. Mr. Chairman, I yield myself 6 minutes.

Mr. Chairman, this amendment is one of a series of four amendments which I have been permitted to offer under the rule. The idea of the series of four amendments is to point out a number of the flaws within the bill and to try to correct some of them.

I cannot say, even if the most severe of these amendments were adopted, that this bill would still be in shape for enactment. But if they were, the House could at least hold its head up and say that it is trying to carry out the precepts of its own budget resolution, and of good fiscal sense.

This particular amendment maintains the trade adjustment assistance special account which I think is a mistake, but one of my future amendments will try to get at that problem. It provides for a lowering of the percentage of customs duties which are set aside for trade adjustment assistance to conform with the amounts of money which were estimated by CBO to be the cost of the bill.

It provides, therefore, slightly more than $134 million for this year and for next year for trade adjustment assistance. That is a 50-percent increase over the amounts that were available last year.

It does, however, reduce the funds allowed in the bill from infinity to $134 million. It is important that the membership understand which spending elements are intended by the author to be eliminated.

Most importantly, the amendment strikes the vague authorization that provides for such additional sums as may be necessary for that special account to cover any add-all cost overruns. I have already indicated the Labor Department finding those overruns. Under the bill as it is written, those overruns would be appproved by this authorization, whether they were $20 billion or several hundred million as indicated a moment ago.

Further, this amendment intends to eliminate the funding to cover what I call secondary workers; that is, those employees of organizations who are deemed to be immediate suppliers of firms who are judged to have trade dislocations.

In total, my amendment would reduce the amount of moneys available under this particular bill from $217 million as contemplated by CBO, on as much as one-half million dollars as suggested by the Department of Labor, down to $134 million, which would conform to our budget resolution.

As Members who have followed this issue will recall, this bill needed a waiver from the Budget Act because it, absolutely and totally, violates that Budget Act. The first budget resolution provided $42 million for the extention of existing TAA entitlements. However certain, unspecified mysterious add-ons are supposed to give us an additional $92 million. My amendment will accommodate that total of $134 million, even though it clearly violates the spirit of the Budget Act.

However, if my amendment is not passed, we will violate the Budget Act by another many millions of dollars, the difference between 217 and 134, roughly $80 billion. Therefore, my amendment is needed if we, as a House, believe that we should support our budget resolution and support fiscal sanity.

Mr. Chairman, this particular amendment is offered simply to restore fiscal sanity and to prevent expansion of the current program to a position which violates the budget which we all agreed on.

In my judgment, that budget is hopelessly profligate and openhanded to begin with. If we follow this bill and continue to allow funds well in excess of the budget, we are simply going to exceed even that openhanded amount, we will not have the $100 billion-plus deficit forecast by our budget resolution for next year, but a much larger one. Therefore, it is my fervent hope that some of these amendments, and in particular this particular one, will be accepted.

I might state in conclusion that this amendment provides the same amount of money for prospective training benefits as the bill before us. What it does do is it eliminates the retrospective training amounts, it eliminates the secondary workers, and it eliminates whatever may come down the pike that could not be forecast when CBO made its prediction based on records which were available only through the end of last year.

If you believe in fiscal sobriety, fiscal sanity, and if you believe in the budget process, I think that this amendment is perhaps the least restrictive of the ones that I will offer. I hope that it will be accepted.

I reserve the balance of my time.

The CHAIRMAN. The Chair now recognizes the gentleman from Florida (Mr. GIBBONS) for 15 minutes.

Mr. GIBBONS. Mr. Chairman, I am going to yield most of my time to Mr. PEASE. But I want to say a few things in opposition to Mr. FRENZEL'S amendment No. 1.

In saying that, I think I ought to try to put this whole debate in perspective.

This is a training bill. We are training people to make a living, people who, through no fault of their own, have found that they cannot get a job in the area in which they have been working. If they do not need retraining, and if they cannot get a job, then they will not get the training and it will not cost a thing. I might even go further and say if conditions are as good as they are predicted to be, this bill will not cost anything, because we will not have to train anybody.

People will just be able to go out and get jobs. No one is going to take one of these training programs if they can get a job. So, I hope they do get a job.

But unfortunately, the history of our program has not always been that way. Let me trace the history of this just a little.

Twenty-one years ago the Congress enacted a trade adjustment assistance program. They tied the bundle so tight, the cords on it so tight, that the program did not work, and nothing ever happened. No one was ever retrained, no one ever received any benefits after having lost their job, even though people lost their jobs due to imports during that time.

In the early 1970's, in the Nixon administration, we broadened the criteria by which people could be judged eligible to receive retraining and benefits under the program.

Unfortunately, at that time we did not pay enough attention to the retraining part of it, and most of the money in this program was siphoned off in merely benefits. There was some retraining done, and it worked.

Now the benefit part of the program is practically nil. This is a training program we are talking about. We are giving you an opportunity after you have lost your job and lost your job because of international trade impact upon you and your industry, and you have not been able to find a job, and the Secretary of Labor has judged you eligible for this program because you can receive the training and because there is training available, and because there is an opportunity for you to get another job, we are taking you on this one trip through life that you make and giving you a new opportunity, or helping give you a new opportunity. That is all this is.

□ 1320

The amendment offered by the gentleman from Minnesota, (Mr. FRENZEL), is highly motivated and I applaud his motivation but, unfortunately, in effect he is reducing the amount of training money that is available and he is reducing it substantially.

As I say, if events are as good as predicted to be in this bill it will not cost the Treasury one penny because everybody will be able to go out and get jobs and they will not need this program. But there just have not been those jobs.

His amendment reduces the amount of money that is available for training. It reduces it, so the staff tells me, by the amount of $49 million to $50 million. That is an awful lot of training

and that is an awful lot of Americans who need help, who deserve help, who are capable of putting that help to good use and becoming productive, taxpaying citizens again. They will be denied if the Frenzel amendment is adopted.

As Chairman JONES said the other day during general debate on this bill, the provisions for worker training do not create an entitlement under the Budget Act for Budget Act purposes, so the authorization levels in this bill do not violate the budget resolution or the Budget Act.

I hope that we will defeat this well-intended amendment by the gentleman from Minnesota (Mr. FRENZEL). I do not think it is wise to adopt it.

I reserve the balance of my time.

Mr. FRENZEL. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Illinois, (Mr. MICHEL).

Mr. MICHEL. Mr. Chairman, I regret I was not here during the time taken for general debate on this subject and I have to resort to the amendment stage to make several comments that I feel are appropriate.

The trade adjustment assistance program is one with which I am well familiar because I served on the Appropriations Committee at the time when its cost zoomed from $300 million to $2 billion in just a 1-year period of time.

I initially offered the amendment which later served as the basis for the action we took as part of the reconciliation in tightening up this program and I thus find it rather exceedingly disappointing and regrettable that this bill reverses several of those changes that we made in reconciliation.

Prior to reconciliation people were certified as eligible for the program if imports simply contributed importantly to their job. Under the way this was being interpreted, imports only had to be one small element of many as a cause of the unemployment. Eighty percent of the reason for the unemployment could be due to other factors, but such persons were still certified as eligible for these special benefits.

So we changed the basis for certification from "contributed importantly" to "a substantial cause of."

Now, under this bill, we would be going back to the old, extremely loose standard, which simply does not make sense.

Mr. PEASE. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I will be glad to yield.

Mr. PEASE. I appreciate the gentleman yielding. His description of what the language change is, is correct. but it is not in this bill. That change was made about 9 months ago.

This bill does not affect that one way or another.

Mr. MICHEL. I appreciate the gentleman clearing up the record in that regard. But this bill expands the eligibility for the program by extending coverage to those laid off in industries that supply parts and services to the originally impacted firm. This proposal has been rejected in the past because of excessive costs.

In 1980 the CBO estimated the cost extension at nearly $700 million. I suspect the current CBO estimate of that provision in this bill substantially understates the true cost.

The bill establishes a special entitlement trust fund for training, ostensibly because sufficient funds have not been made available for training. Let me remind you, my friends, that when we caused a GAO study to be made of the operation of this program in the past, only 2 percent of the workers affected availed themselves of retraining, 2 percent.

As I recall, under the moving expenses that we also provided under the old version, only 1 percent of the workers took advantage of that provision.

It really kind of suggests to me that frankly, in any kind of retraining program or dealing with this problem of structural unemployment throughout our country, once a family is situated, once they have been building houses, owning a home, have children in school and all of the rest, it is hard to take them out and say that we are going to send you to some other section of the country.

That does not necessarily answer the problem.

I would suggest, therefore, that it is not because of a shortage of funds that these individuals are not receiving retraining.

We have substantially expanded training opportunities under the job training bill enacted in 1981. The displaced workers program in particular is aimed at precisely the workers covered in this bill. Its funding level in 1984 will be double the current amount, about $200 million.

We have the programs in place. Let us concentrate on using these programs and making them work rather than continuing to fragment the training efforts.

The Washington Post in 1980 called the trade adjustment program "inherently unfair." It said there was no reason to provide more generous assistance to those laid off workers claiming some connection to imports than to those equally needy who are not affected by trade.

I fully concur in that judgment.

Unemployment today is caused by many different factors. It is unfair to treat one group of unemployed better than the others.

Tell me why you are going to such extremes to help a laid off worker in Detroit but you are ignoring the plight of a laid-off Caterpillar worker in Peoria. They have been out of work for the same time. They face the same hardships and face the same unknown future. They have the same needs. They have the same families, homes, and ties to their communities. They even have the same union.

But the auto workers get favored treatment. The Cat workers do not.

Ask someone who has been out of work for 6 months if there is a difference between being out of work because of imports or being out of work because of exports.

I think we are playing politics with people's lives here today and we are not doing a very good job of it.

As I mentioned before, trade adjustment assistance is a program proven to be a waste of money and a waste of effort. It does not help as much as it deceives people into believing they are being helped.

On behalf of the thousands of Illinoisans out of work in my district and throughout the State, I am going to vote no on this legislation.

Mr. GIBBONS. Mr. Chairman, I yield myself such time as I may consume.

I was not planning to take any time but I feel I ought to answer some of the criticisms that the minority leader has made.

We changed this program in 1973 and 1974 during the Nixon administration. The huge costs that resulted from it mainly were from the changes that were made at that time.

I regret that the costs went up. I do not have a single auto worker in my district. I am not looking after the people in Detroit. But I am looking after poor, unemployed people who cannot find a job anyplace. They do not have to be in my district.

I have a great deal of compassion for them. I think they are an undeveloped American asset, and we must develop all of our assets. We cannot afford to squander anyone's life by not giving them the simple opportunity to get training particularly after the Secretary of Labor has found that there is training available, that the worker needs training, that the worker can profit from the training, and that the worker can get a job after he has been retrained.

Those are all of the affirmative determinations that must be taken before training is approved.

My fine friend, the minority leader, castigated this program. But this is not the program that we are talking about that needs castigating. We have changed the program. The costs of this program have dropped from $1.6 billion a few years ago down to $65 million.

We have made drastic changes. This is a training program to train your hands and your mind so that you can do good productive work in the three

score and 10 that most of us have here. That is all it is.

□ 1330

Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. Mr. Chairman, before addressing this particular amendment, I want to talk a bit about H.R. 3391 in general, since it has been a couple of days since we had the general debate.

What is H.R. 3391? It is a 2-year reauthorization of an existing program that was first enacted in 1962, strengthened in 1974, and then tightened up a lot in 1981.

It is, second, a nuts and bolts, practical, commonsense improvement in the way the program operates.

The program has not been perfect in the past. We examined those imperfections. We have made improvements to correct them.

Third, it reorients the TAA program from income maintenance to retraining.

We are not in this bill passing out a lot of money for weekly benefits. We are training laid-off workers.

Fourth, it reauthorizes a program which is fully consistent with free trade. As I mentioned during general debate on Monday, I believe in the principle of free trade. Our trade policy should promote the free flow of goods and services among nations but not, I would submit, at the unmitigated expense of thousands of jobs and markets for American workers and American businesses.

The Trade Expansion Act of 1962 and the Trade Act of 1974 included provisions to assist firms and workers adversely affected by increased imports. Presidents Kennedy, Johnson, Nixon, Ford, Carter, all understood that pursuing trade liberalization in the national interest necessarily requires that some of our industries and workers risk their markets and jobs to imports. That is why Federal assistance has been available throughout the last 20 years to help trade-sensitive firms to get technical assistance and loans to adjust to increased foreign competition.

That is why America's labor leaders accepted free trade policies in exchange for what they thought at the time was a solid commitment by the Federal Government to provide adequate compensation, training opportunities, job search and relocation to manufacturing workers thrown out of work by imports.

That is why it is important for us to reauthorize an improved TAA bill and to do it now.

Let me turn to the amendment offered by my friend from Minnesota (Mr. FRENZEL). This is a very ambitious amendment. It lumps all of Mr. FRENZEL's changes into one amendment. And if anything can be called a ripper amendment, I believe this could.

In essence, if this amendment is adopted, it emasculates this bill, and I urge Members to oppose it.

We are told there are already enough moneys for retraining and this bill is not necessary. With unemployment remaining at its highest level since the Great Depression, outlays for general employment and training programs will be cut more than 37 percent in fiscal year 1984 and 38 percent in fiscal year 1985 by the Reagan program, according to the CBO.

We have heard about the Jobs Training Partnership Act as a substitute for this program. That bill cannot begin to meet the need for retraining among many unemployed Americans who have lost their jobs due to imports. The Reagan request for title III of the Jobs Training Partnership Act will provide at the most training for 68,000 workers, when CBO and ITC within the Department of Commerce estimate there will be as many as 2.2 million workers dislocated who will be eligible and perhaps eager to receive retraining for other occupations.

So we are talking, at the maximum, with a request from the Reagan administration, about being able to make training available to maybe 4 percent of the dislocated workers who have lost their jobs in our economy.

I would point out that Republican Members of the other body in key positions, Senator HEINZ and Senator DANFORTH, both have expressed amazement at the position of this administration regarding trade adjustment assistance retraining benefits.

Senator DANFORTH said, for example, at a hearing:

> I just really think that the position that the administration is taking with respect to trade adjustment assistance is contrary to its trade philosophy, cannot be supported alongside its trade policy, and is also contrary to the whole thrust of the President's state of the Union message.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GIBBONS. Mr. Chairman, I yield an additional minute to the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. I thank the gentleman for yielding this additional time.

I would also mention that Jobs Training Partnership Act funds are contingent upon a very substantial State matching requirement, so that many States will not be in a position to offer this retraining at all.

Trade policies are set by the Federal Government. It is our policies which lead to a lot of American workers being thrown out of work due to no fault of their own. Those free trade policies in general are good, but when victims are created by those policies, it should be Federal policy to help the workers get retraining, to find other jobs, so that they can provide food, clothing, and shelter for their families.

I urge opposition to this amendment.

Mr. FRENZEL. Mr. Chairman, I yield 1 minute to the gentleman from Michigan (Mr. PURSELL) so that he may address a question to the gentleman from Ohio (Mr. PEASE).

Mr. PURSELL. I thank the gentleman for yielding. Many of us have supported amendments to utilize trade adjustment funds for retraining purposes. However, I have had difficulty in my research to find good retraining programs.

Could the gentleman from Ohio cite a case or two of demonstrated and effective retraining programs?

Mr. PEASE. Mr. Chairman, will the gentleman yield?

Mr. PURSELL. I yield to the gentleman.

Mr. PEASE. I thank the gentleman for yielding.

Yes; I would say at the outset that the retraining is defined by each State bureau of employment services.

Under this legislation, existing legislation, which would be continued, it is necessary for the worker to go to his local employment services office and ordinarily the local employment services office says what training is available which will lead to a job that that worker can fill. So it is not training just in general.

Mr. GIBBONS. Mr. Chairman, I yield 2 minutes, the balance of my time, to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. I thank the gentleman for yielding.

Mr. Chairman, I rise to express my firm support of H.R. 3391 and my strong opposition to the Frenzel amendment.

In listening to the debate that has gone on here, I am struck by how many people are out of work that are entirely missed by all benefit systems we have presently in place at the Federal level.

Over half of the workers in this country who are out of work are not covered by unemployment compensation.

The distinguished gentleman from Lorain, Ohio, pointed out, very few of them will be covered by any of the jobs programs that we presently have in place.

The Trade Adjustment Assistance Act is a tried and true program that has been on the books for several years. We have had an opportunity to work out some of its difficulties.

The funding has been substantially moderated since the program's inception.

Now, people are out of work for different reasons. The gentleman from Illinois (Mr. MICHEL) suggested that Caterpillar workers would not be covered by this, as opposed to auto work-

ers from places like Detroit or Toledo, which I represent.

But I might point out that the people in his district are out of work not because of import problems such as the auto industry is facing, but because of a rather unenlightened embargo on grain that this administration imposed which has adversely and substantially affected the agricultural economy of the entire Nation.

Thus, some other sort of economic initiative is needed to promote recovery in that arena.

This bill is aimed at retraining an important segment of the work force that is out of work due to imports. No matter where you travel in my part of the country in the Midwest, or go out to the west coast where there are lumber import problems, this bill is particularly aimed at those workers who have been adversely affected by the imbalance in trade policies, nation to nation, and are very deserving of our support.

□ 1340

I also wanted to say that the bill makes certain modifications to broaden eligibility. For example, under current law, a worker who makes television parts for a firm that sells television sets can be eligible for assistance. Yet an auto parts supplier adversely affected by imports cannot.

The CHAIRMAN. The time of the gentlewoman from Ohio (Ms. KAPTUR) has expired.

Mr. FRENZEL. Mr. Chairman, has all time expired for the majority?

The CHAIRMAN. All time has expired.

Mr. FRENZEL. Mr. Chairman, I yield 30 seconds to the gentlewoman from Ohio (Ms. KAPTUR) to summarize.

Ms. KAPTUR. I thank the gentleman for yielding.

Mr. Chairman, I just wanted to point out that the trade adjustment assistance should be dependent on what a worker does and not on who owns the plant. And some of the modifications that are included in this new bill would provide that certain auto parts workers in my district, for example, would get coverage as opposed to the existing law which prevents that.

I can attest to the need for the trade adjustment.

Mr. FRENZEL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, we have heard a good deal of debate on my amendment. A good deal of it, it seems to me, does not cover the amendment.

What my amendment tries to do is to restrain the House today from exceeding its own budget resolution by calling for limits on this bill so that we will not go over the amount specified in the budget resolution, which the majority of this House voted for.

I think there is no other simple way that I can explain the amendment other than that.

I do want to comment, however, on some statements made earlier in the debate.

The gentleman from Ohio said that the trade adjustment assistance is something that is given to employee groups for their acceptance of free trade policy. I think the Washington Post editorial of the morning makes it quite clear that that policy has not been accepted. And so if there was some attempt to make an arrangement, that arrangement was never successful.

Also, the gentleman suggested that cuts were being made in training in the future. I think it is also fair to note that unemployment is declining and if we intend to run the same kind of program, it seems to me reasonable that the cost of retraining should decline.

But here the critical point to remember is that we already have a program for dislocated workers. It applies, as the gentleman from Illinois said, to all workers across the board. The auto worker is no more unemployed than the caterpillar worker or the watch maker or the butcher or the baker or the candlestick maker when they are out of work. We do not need a redundant program with greater benefits and a whole different administrative burden for this kind of work. My amendment tries to restrain such redundancy.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. I thank the gentleman for yielding.

I would like to ask my good friend a question that he has repeated several times that the primary reason that he has submitted his amendment is because he did not want to break the budget for want of more fancy language.

I would like to ask my colleague, was not that approval many months prior and have not circumstances changed, and is a budget provision so inviolate that we have such suffering in the country—particularly in my area—that we should not reasonably consider some change in those budget limitations?

Mr. FRENZEL. I thank the gentleman for his contribution. Everything we do here is subject to change. Emergencies always require consideration. However since the budget was passed, the news on the economy and on unemployment has been good. The conditions under which our budget was passed have improved.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from Minnesota (Mr. FRENZEL) to the committee amendments.

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. FRENZEL. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1400

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Minnesota (Mr. FRENZEL) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 176, noes 234, not voting 23, as follows:

□ 1410

The Clerk announced the following pairs:

On this vote:

Mr. Pashayan for, with Mr. Dellums against.

Mr. Craig for, with Mr. Florio against.

Messrs. ROWLAND, LEVITAS, and SAWYER changed their votes from "no" to "aye."

Mr. BOEHLERT and Mr. O'BRIEN changed their votes from "aye" to "no."

So the amendment to the committee amendments was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the committee amendments.

The committee amendments were agreed to.

□ 1420

AMENDMENT OFFERED BY MR. FRENZEL

Mr. FRENZEL. Mr. Chairman, I have an amendment at the desk entitled No. 2, and I offer that amendment.

The Clerk read as follows:

Amendment offered by Mr. FRENZEL: On page 2, strike lines 15 through 20 and insert after the word "articles" on line 14 the following: "which are produced by such workers' firms or appropriate subdivision thereof,".

Mr. FRENZEL. Mr. Chairman, I yield myself 7 minutes.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Georgia.

(By unanimous consent, Mr. LEVITAS was allowed to speak out of order.)

ANNOUNCEMENT OF SPECIAL ORDER IN TRIBUTE TO THE LATE HONORABLE LARRY M'DONALD OF GEORGIA

Mr. LEVITAS. Mr. Chairman, I take this time to inform the Members of the House that on Monday, after the close of business, as the dean of the Georgia delegation, I have taken a 1-hour special order in order that Members may participate in the special order with respect to the death of our former colleague, Congressman Larry McDonald.

It will be on Monday afternoon, following the close of business. In the event there are votes on Monday, which have been announced, any Member who chooses to participate will be presenting the special order and will certainly yield to any Member who so desires.

Mr. Chairman, I thank the gentleman from Minnesota for yielding.

Mr. FRENZEL. Mr. Chairman, the amendment which has been offered and just read is one that strikes the provisions of H.R. 3319 which extend eligibility to workers in firms or appropriate subdivisions thereof that provide essential parts or essential services if imports have contributed importantly to that worker's employment.

As we discussed when we have talked about this bill and the previous amendments thereto, there are many people who are unemployed in this country of ours, and the reasons are various. And, yet, for some reason, we have created one program to take care of all unemployed, and another specific program for those whose unemployment is caused by imports.

Now we are expanding, if we follow the lines of the bill, that concept so that companies that supply parts or services to companies whose employment has been hurt by import-related activities may also qualify. There is no limit to which we can go in following this concept. For instance, now it will be secondary suppliers. Tomorrow it will be tertiary suppliers. Eventually, we can include everybody in the world.

The services involved could be custodial services, could be insurance services, could be transportation services, or could be any of the range of services and parts that exist today.

On the other hand, we have not included those employees who are dislocated because of the loss of markets offshore as was pointed out by the gentleman from Illinois (Mr. MICHEL). That is, if your unemployment is plain old garden variety unemployment you get one standard of benefits. But if you have some kind of an association with import-related unemployment, even though it is a secondary relationship, you are now going to be covered under the bill. That is not fair.

My amendment gives people a chance to vote against the expansion of that trade adjustment assistance to these secondary employees.

The cost of the bill without my amendment, according to the old CBO estimate, is $44 million extra in 1984 and about the same amount in 1985. That estimate was based on last year's figures. The DOL/OMB updated estimate will probably be about $100 million.

Those numbers will be much higher because CBO and Labor are estimating this bill to cost more than twice as much as CBO said it would. We will have, I think, more exact figures to work with in the future. For now, let it suffice to say there is a large amount of money involved.

I do not believe anyone can justify one employee who is laid off for a certain reason or a certain relationship with a secondary firm, can justify that employee getting more or a different standard of benefits than another em-

ployee who is laid off only because there is no business.

CBO estimates that these benefits will flow to about two-thirds of the number of people who would qualify under the regular trade adjustment assistance program. With the new qualifications it will certainly be a lot of money.

Now, Mr. Chairman, one of the reasons I object to this whole program is that it is duplicative. We already have a Partnership Job Training Act.

□ 1430

The administration has asked for $223 million for dislocated workers. That applies to all employees, whether their work is affected by imports or exports or recession or whatever. When you are out of work that partnership training law says you are out of work and qualified for retraining benefits. That law should apply to everyone.

I am trying to prevent in this particular amendment, a little stretching of the current bill. Part of the trade adjustment assistance has been a longstanding requirement, and this is really the basic concept, that import competition be a direct, major causal factor in qualifying for trade adjustment benefits. It will be abandoned when we cast this first stone into the brook. Where the ripples will reach I do not know. It is hard for me to determine under the language of the bill whether a secondary or tertiary or a supplier of a supplier may eventually qualify. It is hard for me to see that we should qualify secondary employees if we cannot qualify tertiary employees or even farther beyond.

I think the safest course for this committee to take is to accept my amendment and apply the same limitations as have governed this program in the past.

Mr. Chairman, CBO says that trade assistance benefits for secondary workers will increase the cost of weekly allowances and training even these old figures that it used by two-thirds over existing law if TAA is extended in the form that is in H.R. 3391.

Cost overruns that occur by virtue of this particular thing are a very large risk and they are part of the figures that caused OMB and Labor to expect that this bill may ultimately cost us more than $1½ billion in fiscal 1984.

I would like to invite the attention of members of the committee also to the fact that the numbers that we are talking about are just enormous. In the last fiscal year this Congress itself, not the administration, not the President, was responsible for reducing the cost of TAA training benefits to $25 million. So it has not been the administration that is trying to restrict this. It has been the Congress itself.

If we would concentrate our legislative cunning on the Partnership Training Act that would cover all employees, we would do far better than to make a dangerous extension of the benefits to suppliers. Once we take this step there is no reason not to taken further steps and expand this duplicative program to one that will perhaps ultimately be larger than the Partnership Training Act itself.

If you want to save at least $44 million, that will not quite take us down to our budget amount but it will be a big savings and I, therefore, urge the adoption of my amendment and reserve the balance of my time.

Mr. GIBBONS. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. PEASE), the Member chiefly responsible for this fine piece of legislation.

Mr. PEASE. Mr. Chairman, I rise in opposition to this amendment, as I did to the last one. This amendment would strike from the bill a provision which would extend the coverage, the opportunity to be retrained, to those workers who work in firms which are major suppliers to firms affected by imports.

Let me give you a couple of examples of what I am talking about. Under the current law if General Motors Co. makes its own spark plugs and if General Motors Co. is affected by imports, nearly 2 million cars from Japan, for example, then the workers who are laid off as a result from those imports are able to be retrained under this law.

However, if the same spark plugs are made not by GM workers but by Champion Spark Plug Co. workers, those Champion employees are not eligible for retraining even though GM and Ford may be almost exclusive customers of Champion.

Or if a company makes heels for shoes and the firm that sells the shoes is impacted by cheap foreign shoes from the Far East, the employees who work for the shoe company can be retrained into other lines of work but the people who work for the company that makes the heels, without which you cannot have shoes, are not eligible.

That simply does not make sense.

I think my colleague from Minnesota made mention of the example of taconite. He has an unconscionably high unemployment rate in Minnesota among the iron ore areas of his State. There is no place for that taconite to go except into the steel mills of Indiana and Illinois and Ohio. Yet his workers, under the current law, are not eligible.

We merely with this bill extend coverage in an entirely practical and logical way to people who lose their jobs because of imports.

We have heard some words from the gentleman from Minnesota about not knowing where the ripples will reach. The committee report, if Members will read it, starting on page 8, is very clear that this language in the bill is to be construed as narrowly as possible. We are not making a wide open expansion of this program.

It is going only to workers who are directly impacted by imports, although they may work for another firm rather than GM or Ford or United States Steel or a major shoe company or whatever.

I would point out finally that this provision of the bill was included in legislation already passed by the House in the 96th Congress. That issue has been dealt with by the House before. The House has decided to extend that coverage.

I think we ought to be consistent and extend it again.

Mr. HERTEL of Michigan. Will the gentleman yield?

Mr. PEASE. I yield to the gentleman from Michigan.

Mr. HERTEL of Michigan. I would like to associate myself with the gentleman from Ohio and the excellent job he has done.

Really what the gentleman is talking about, as he explained the bill in opposition to this particular amendment, is fairness, that if one man, one person works on spark plugs and making those, and works for General Motors and is covered if he becomes unemployed, if another person becomes unemployed in an independent spark plug company that he or she would not be covered by the same training program.

I know from meeting with constituents it is awfully hard to explain that kind of inequality because it simply is unfair and really indefensible.

I am glad to see that the bill will treat all of those people making the same items that have been hurt by imports in the very same way.

I think it would be wrong, really, if the bill did not state it that way, to protect all people that are in the same class.

Mr. PEASE. I thank the gentleman very much for his contribution.

I would just add that in the Midwest especially, but also in the Northeast and in the Far West and elsewhere we have literally hundreds of small companies whose primary, sometimes whose exclusive, customers are big companies in auto and steel and other industries. The employees of those companies, when the purchaser of their parts is affected, are affected just as directly as any employee of the primary companies.

Mr. FRENZEL. Mr. Chairman, I yield myself 2 additional minutes.

I do so to respond to some of the conversation that has been taking place here. In the first instance, one of the speakers questioned whether it was fair to cover a primary producer and not cover the supplier of that particular producer. The answer is, if that

is fair, then is it also fair to cover the supplier of the supplier?

A further question would be if it is fair to cover someone who has been dislocated by imports is it not also fair to cover someone who has been dislocated by virtue of the loss of an export market, or for any other reason? The answer is, of course, all of our unemployment should be treated in the same way.

1440

That is, it should be handled under our major training act, the Jobs Partnership Act.

Each unemployed person is as unemployed as any other. Each should be given the same kinds of training benefits and unemployment compensation benefits. There is no particular additional merit that I can see in one form of unemployment over another. Any form of unemployment is a disaster.

With respect to this particular program I think it is fair to say that the retraining phase of it has been highly unsuccessful. At times have had a limited number of applicants. At other times, we have had programs that have not been startlingly successful. It would be my fondest hope that whatever we do in this particular bill works perfectly and that those employees are retrained and become productive members of our society and are able to provide for themselves and their families, if they have any.

Based on the record, however, we have a long way to go before we can expect that. But in general any worker who is unemployed should have the same treatment as any other. When we expand this particular bill, we are taking another larger slice off of the baloney, we are taking the first step toward a larger expansion of the program that ought to be phased out in favor of a truely national program.

I reserve the balance of my time.

Mr. GIBBONS. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania (Mr. GAYDOS).

Mr. GAYDOS. Mr. Chairman, I would like to respond to the maker of the amendment's basic argument that somehow through some interpretation that the unemployed resulting from imports are getting special treatment. I think the argument is very realistic which I am going to make, which I am going to submit, and that is that yes, there is a distinction, a difference, because primarily and fundamentally an unemployed steelworker, auto worker, any unemployed individual, male or female, in this country, is unemployed because of foreign imports, you have your direct, obvious connection between the Government in this country not taking proper, sufficient steps. It is because of a lack of legislation.

I am very happy to say that the Committee on Ways and Means has right now concluded hearings and is in the process of changing, making some fundamental changes in some of our laws. I think it is long overdue. I am looking with great expectation to those changes.

To get back to the point I was trying to make, that man is basically, fundamentally, primarily unemployed because of an inadequate and bad governmental policy.

Let me give you some examples. Any country, as this country does, that allows itself to be penetrated by 50 percent imports as far as shoes are concerned, something is wrong, not in Denmark, but here in this country.

When we allow, other countries have never accepted that type of a percentage of imports, and we further allow in this country, under good or bad times, a penetration of 25, 28, 30 percent of steel, all types of steel into this country, something is wrong.

We can trace back the cause of that unemployed steelworker, auto worker, what have you, being traced back down directly and tied in directly with an inadequate Government policy as far as foreign trade is concerned.

Let us take a look at the special treatment here, people that are unemployed because of foreign imports being classified specially or differently than a person generally unemployed for some other reason, say a normal exodus of a particular corporate activity, whereby there is a cache of unemployed. There is no difference. If a man is unemployed, he is unemployed. If he is unemployed primarily, if he is employed secondarily, he is still unemployed. Reason dictates that you cannot make that distinction.

Why would there be a distinction made? I think it is the old ploy again: Argue here that you have distinction in unemployment and then when the legislation comes before us on this floor, talking about another segment of the unemployed, then you go ahead and make your arguments there. Cut a slice of the baloney, if I may use my good friend's term, cut it here, cut it there, you just get it in pieces, and when you put all the pieces together, you really cut the whole baloney up, so to speak—and in Pittsburgh baloney is very important, for many, many different reasons.

But there is no distinction between unemployed, there should not be any distinction. This bill does not make a distinction. I am trying to explain fundamentally that this distinction, if there is one, is a reasonable one and it is traced back to bad government policy.

Let us take a look at some of the arguments made here involving the possibility of almost unlimited amounts of people qualifying. I can tell you personally that I went to a range meeting in Pittsburgh, Pa., where we had 3,000 people. This occurred just a few short weeks ago, There were 3,000 people looking for some training funds, some place to go to get retrained. They were told in an unadulterated fashion that there are no funds in the State of Pennsylvania upon which you can embark hopefully to retrain yourself or get another job, there just are not any funds.

Now, with this legislation presenting itself, there is going to be a surplus of funds, that we do not need the funds. That is the argument I heard from the minority leader, we do not need the funds, there are other programs in place. That is not true in my area. I venture to say there are other areas, in Michigan, places in Chicago, New York, other places, even throughout the Deep South where that is not true; there are not sufficient funds for training and this is needed.

Why should there be a distinction made down the line whether secondary, tertiary, whatever you call it, you name it, that is it; why should there be a distinction made? If a person is unemployed he is unemployed and basically it is the obligation of this country to help him.

I want my good friend, BOB MICHEL, who I served with to know that what is happening in Pittsburgh that is going to happen over there in other areas, yes, in Fresno.

Mr. FRENZEL. Mr. Chairman, I yield myself 3 additional minutes.

Mr. Chairman, the previous speaker indicated that the bill made no distinction between certain classes of workers out of work because of imports. I would submit it does make a fine distinction. It distinguishes between secondary and tertiary effects. Only if you are a prime supplier, a firstline supplier, are you covered under this bill. You may be just as unemployed if you are a supplier of a supplier and yet this bill does not do that. That is one of my objections to this.

All along we have said in trade adjustment assistance, since 1962 when this program was invented, that you had to have a primary relationship. And now we are extending that to a secondary relationship and I cannot predict where that extension will ultimately lead us.

Second, Mr. Chairman, it has been suggested that the Government is at fault because of its trade policies and therefore we have to give special attention to these special kinds of workers.

Imports have something to do with the unemployment. In fact, under the law, they have to be an important cause of unemployment, before these unemployed people are certified.

Nevertheless, imports are certainly not the only cause of unemployment, nor do they necessarily have to be a major cause. The cause could be corporate mistakes. It could be the fact that in some of these industries the wage

levels are twice the average wage rate in manufacturing.

There are a number of things that cause people to be laid off. Imports may result from them rather than they resulting from imports.

Finally, I would say that the Government is also responsible for unemployment that results from our own deficits causing high interest rates and an overvalued dollar. That overvalue makes it impossible for American companies to compete abroad. We are therefore suffering high unemployment because of the profligate nature of our operation here. We have no specific program to take care of those unemployed people.

The point I am making is that we do have a general program. It is the jobs partnership training program, and that is where we should spend our money to make sure we have a good program.

□ 1450

It has also been said here in some previous conversations that the States have no money to do any retraining or to match money for the Jobs Partnership Act. I would like to point out that in the State of Pennsylvania that act did receive $10.1 million and only $6 million was required for a State match. I realize that some of the States are down on their luck, but let us take a State like Michigan. They get $11 million and there is no match required because they are down on their luck. Ohio gets $11½ million for which it must put up $4.6 million. It probably should be easy for Ohio. It raised its taxes 90 percent in the last year.

But the important thing to remember is that 50 percent of the regular State unemployment compensation benefits count. In-kind contributions also count. And the States, in my judgment, should have a pretty simple time meeting the requirement of the Partnership Training Act. If they did not have to contribute something it certainly would not be a partnership.

Mr. Chairman, I reserve the balance of my time.

Mr. GIBBONS. Mr. Chairman, I yield 3 minutes to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Chairman, I want to compliment the chairman on the splendid job that he has done in shaping this legislation and bringing it to the House floor, and also want to compliment the gentleman from Ohio (Mr. PEASE) for his constructive role in developing several key provisions of the bill.

This legislation, particularly these provisions now under attack, proceed from a very clear and simple premise: That there has been a change in the trade agreements of the United States with its trading partners which has opened wider the doors of exchange with foreign governments, putting domestic firms and domestic workers in a more vulnerable position. If job losses result from those changes in trade laws, there should be special compensation paid to those who have lost their jobs because of that policy decision of the Federal Government. There is a very basic and simple equity that is being done through this legislation.

Now, this legislation does not automatically award funds, unemployment compensation, or training to any worker who has lost a job because of changes in our trade agreements. The company, the workers, must go in and prove that they have been disadvantaged by that change in trade law.

So this is not an entitlement program, it does not open wider the doors of benefit or assistance to those who have been disadvantaged. It simply proceeds on a basis of equity that if you can demonstrate that you have, as an industry or as a worker in an industry, been disadvantaged, then you are entitled to a special kind of compensation.

This is what the European Economic Community has done to rebuild the European coal and steel industries in the aftermath of World War II. They went systematically through their steel industry, decided which firms were marginal and should be closed, which ones had the prospect for success and should be encouraged; government credits were then given to those that had good prospect for success, others were closed. The workers were given retraining assistance, they were given relocation assistance, covering the cost of moving to a new job, they were given housing assistance, and help in finding that new job.

Now that was done over 30 years ago. Europe rebuilt its coal and steel industries to the $50 billion rival it is today of the U.S. steel industry.

We should do no less for a whole range of industries that are affected by imports allowed into this country because we have removed trade barriers to industries that are either owned or supported by foreign governments. That is simply fairness in trade. And that is what this legislation is all about.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. OBERSTAR) has expired.

Mr. FRENZEL. Mr. Chairman, I would yield 1 minute to my distinguished colleague from Minnesota so that the may complete his splendid presentation.

Mr. OBERSTAR. I thank the gentleman for yielding.

An important thrust of this legislation is to encourage respect for trade laws. In the long run, that is what the effect of this legislation will be. If our Government recognizes that people have been disadvantaged because the Government has decided to change its trade agreements and allow wider competition and no protection against unfair competition, and if workers have the understanding that they will be given an opportunity for training, relocation, to find a new job, there will be respect for the trade laws.

But if we do not provide this kind of assistance, then we will see a retreat into protectionism, a retreat into barriers against foreign trade, and we will see a general decline in our international trade relations.

I think that this legislation makes good sense. It is a major step in the right direction.

Mr. HERTEL of Michigan. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Michigan.

Mr. HERTEL of Michigan. I thank the gentleman for yielding.

Mr. Chairman, I would like to associate myself with the gentleman's remarks.

The fact is we should not worry about too many people being covered by it, we should expand it as far as possible.

Mr. FRENZEL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, in summary I want to say that this amendment eliminates the features of H.R. 3391 which would extend new coverage to secondary workers who are suppliers of firms whose employees have been certified as having been import disrupted and would qualify them for TAA benefits.

The extra amounts predicted by the CBO for this provision are $44 million in each of the coming fiscal years of 1984 and 1985. However, since those predictions were made, the Department of Labor and the OMB are now suggesting that the bill suggested originally to cost $217 million, will cost $521 million. So you can probably escalate the $44 million by a factor of 2½. The true figure may be closer to $100 million.

I think it is a bad precedent. I hope that my amendment will be accepted.

Finally, I might say, Mr. Chairman, if I thought this kind of expenditure would buy a free trade policy, I would spend it gladly and willingly. It obviously has not. We have not stemmed the protectionist tide, we may not for some time. That will be a matter for this country and this body to contemplate in the future. But for the moment that agreement has not been made.

So my amendment ought to be passed just to have a little mercy on the taxpayers. This amendment will not take us down to the budget level, but it will take us at least $44 million closer and maybe $100 million closer.

Mr. GIBBONS. Mr. Chairman, I yield 1 minute to the gentleman from Hawaii (Mr. AKAKA).

Mr. AKAKA. Mr. Chairman, I rise in support of H.R. 3391, the Worker and Firm Trade Adjustment Assistance Act. In addition, I want to oppose any amendment that will deny trade adjustment assistance eligibility to workers of independent suppliers of parts and services. Under the current law, this particular class of workers is ineligible to participate in this program. Yet these workers who supply essential parts and services to trade-impacted industries face the very same threat of loss of employment and markets due to competition from imports.

H.R. 3391 seeks to cure this inequity by extending coverage of the trade adjustment assistance program to include parts and service workers. They are victims no different from currently eligible workers who lose their jobs because of our trade policies. In designing a program which will emphasize training and job relocation, the expansion of trade adjustment assistance to independent suppliers of parts and services would strengthen the legislative purpose and commitment of this program by providing an equal opportunity for a similarly situated class of workers to seek training for new jobs.

Many unemployed Americans can no longer expect to return to the jobs they once had. For the unemployed who have lost their jobs because of liberalized trade policies, the Trade Act represents a promise that they may look to our Federal Government for help in locating and training for new employment. I urge my colleagues to support the passage of H.R. 3391 and to oppose the amendment to deny trade adjustment assistance eligibility to parts and service workers.

Mr. GIBBONS. Mr. Chairman, I yield 1 minute to the gentleman from Ohio (Mr. PEASE).

□ 1500

Mr. PEASE. Mr. Chairman, I take this minute simply to summarize the discussion on our side and to emphasize that the language in this bill which would provide coverage for workers in secondary businesses is not a major change. It logically and fairly includes workers who can prove—and I underline "prove"—they have lost their jobs due in large part to imports. It is not an expensive addition to the bill.

We have heard some figures quoted by my friend, the gentleman from Minnesota, coming from the Department of Labor and OMB. We have all had experience in this Chamber with figures coming from those two agencies when they are opposed to legislation. We have been in touch with CBO. CBO largely stands by its original figures. This is not an expensive bill.

Furthermore, as I mentioned earlier, the Jobs Training Partnership Act, which has been cited, is simply not a sufficient or adequate substitute for this legislation.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. FRENZEL).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. FRENZEL. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 154, noes 255, not voting 24, as follows:

[Roll No. 336]

□ 1520

The Clerk announced the following pair:

On this vote:

Mr. Pashayan for, with Mr. Young of Missouri against.

Mr. BRYANT changed his vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

● Mr. LONG of Maryland. Mr. Chairman, I rise in support of H.R. 3391, to reauthorize and improve the trade adjustment assistance (TAA) program.

This bill is crucial to thousands of steel, auto, shipbuilding, and other workers in my district whose jobs are threatened by imports. Unless it is approved, the TAA program—which provides cash, retraining and job search aid to help these workers adjust to the economic dislocations caused by imports—will expire on September 30, 1983. No funds to maintain the program have been requested in the President's fiscal 1984 budget.

I know firsthand how important the TAA program has been in easing the terrible hardship on workers who were laid off because of imports. I have helped many steelworkers at Bethlehem Steel's Sparrows Point plant, railroad workers at the Patapsco and Back River Railroad Co., shipyard workers at Sparrows Point and others obtain Labor Department certification of eligibility for benefits.

Trade adjustment assistance for workers and firms have never been needed more than now. Increased imports of steel and other products, much of which is heavily subsidized by foreign governments and even by U.S. foreign aid, continue to take a larger share of the U.S. market—stealing American jobs. Estimates of jobs that will be lost to imports range as high as 2 million in 1983. No other program can meet the demand for training and other types of assistance needed by laid off workers.

I urge my colleagues to join me in voting for this important measure.●

● Mr. RICHARDSON. Mr. Chairman, I rise in strong support of H.R. 3391, the Worker and Firm Trade Adjustment Assistance Act which reauthorizes and expands the existing program to retrain workers who are displaced due to imports and help firms compete with foreign companies.

The Congressional Budget Office has estimated that by early 1983, approximately 750,000 workers had lost their jobs as a result of imports. Last year the domestic copper industry suffered a terrible blow in its efforts to remain viable. The impact of falling prices, high production costs and increased imports has yielded tragic results. Nationally almost 60 percent of the work force has been laid off. In my home State of New Mexico, more than 2,300 workers lost their jobs. Unemployment in towns such as Chino and Silver City stands at roughly 25 percent.

In particular, the potash industry and the copper industry in New Mexico has suffered greatly as a result of cheap, subsidized Mexican copper and potash.

Mr. Chairman, roughly 70 percent of all American products face foreign competition. Much of this competition is unfair and comes from companies that are subsidized by foreign governments. If the Federal Government is going to adopt policies that allow foreign companies to flood our markets with subsidized, inexpensive goods, then the Federal Government has a responsibility to assist those who are damaged by these policies. This legislation is a substantial effort toward helping workers and industries that have suffered as a result of displacement by imported products.

H.R. 3391 contains important provisions to expand the Trade Assistance Act by providing assistance to laid off-workers in firms that supply essential parts to industries affected by imports and it strengthens provisions that help American industries develop new products to effectively compete with foreign companies and to expand their export capability. The bill also mandates that the Secretary of Labor approve applications for assistance if the applicant meets the five statutory conditions for eligibility. In the past, the Secretary of Labor has had discretionary authority to not approve training, although a worker may meet all of the eligibility requirements.

Mr. Chairman, this is a modest piece of legislation that reauthorizes the Trade Assistance Act at $217 million in fiscal year 1984 and $163 million in fiscal year 1985. This is a relatively small price to pay to assist workers and firms that are negatively affected by imports and to lessen the need to enact new and restrictive trade barriers.

I urge my colleagues to vote for this much needed legislation and to reject the amendments as offered by the gentleman from Minnesota (Mr. FRENZEL).●

● Mr. GAYDOS. Mr. Chairman, this bill to provide $222 million in assistance to workers made jobless in the current trade war over the next 2 years is something the Congress should have put in places much sooner.

The trade war is going to get worse, not better.

In the Pittsburgh area, seat of the steel industry, unemployment in the industry still is running between 50 percent and 55 percent, according to the United Steelworkers of America.

And remember, there are two or three support jobs lost for every job lost in basic steel.

Meanwhile, in my hometown of McKeesport, unemployment plummeted to 18.2 percent in July—which still is in the stratosphere. It fell from a high of nearly 23 percent of a few months earlier.

Steel imports during this time took up to 25 percent of the American market; and these are steel imports that for the most part have been found to be dumped and subsidized in violation of trade law and trade agreements.

There is a direct connection between major portions of our unemployment and unfair trade. And there should be a direct connection between the damage done by unfair trade and the response of the Government of the United States.

This bill provides trade adjustment assistance for the first time to workers in downstream support industries. This is a step forward. They previously have been ignored although the injury to them was as real as any injury.

At a time when TAA is running out, it provides a boost.

One feature I like is that it earmarks some customs collections for TAA. If this Government would enforce the laws against dumped and subsidized goods, and make those collections, we could have a fund much larger; maybe we would have a fund that is two or three times as large. This would be a just and fair application of the user fee concept.

Furthermore, this measure extends the time for training and guarantees training by removing certain limitations. This too is an improvement.

This bill is a good bill. My only objection to it is that it does not do more. I urge its passage.●

● Mr. BROWN of California. Mr. Chairman, over the years many people have had legitimate complaints about the trade adjustment assistance (TAA) program. Some complain that far too few workers have taken advantage of the retraining programs; others, such as myself, have struggled—often unsuccessfully—with the bureaucracy to obtain assistance for legitimately displaced workers. In our consideration today of H.R. 3391, the Worker and Firm Trade Adjustment Assistance Act, we have the opportunity to correct some of the problems inherent in the old program.

The most important new change, I believe, is an emphasis on worker training. In the past, most of the workers which qualified for TAA benefits were rehired by their firms. Thus many of them did not take advantage of the retraining programs which were offered. But many of the jobs which were lost during this recession will not be recovered. The steel and auto industries are not likely to ever regain their economic dominance.

In my district, a major steel factory has laid off thousands of workers who will never regain their old jobs. Many of these people have qualified for TAA training programs but have been unable to take advantage of them due to program funding limitations. Instead of using transfer payments to maintain subsistence living standards for these unemployed laborers, where the Government receives no returns,

these proud men and women can be retrained to again serve productive functions.

We must make every attempt to move our skilled and able workers into new employment areas which will be growth industries in the years ahead. In my own State of California, we have the need for thousands of new workers in the electronics and computer fields in the coming years. There is no reason why a displaced steelworker cannot be retrained, using the programs outlined in this bill, to take advantage of these job opportunities. This legislation would focus the employment training program on skills shown to be in demand.

Moneys for the trade adjustment assistance would be provided via a special account for adjustment assistance. The account would be funded, appropriately, from a percentage of custom duties. Funds from the special account would be available only for expenditures to carry out worker and firm TAA programs, but would still be provided through appropriation action.

I am aware of the criticisms of the old program. I have supported and defended it as the best option available. But now we have an improved proposal, and I urge my colleagues to support this legislation which has been crafted to meet both the demand for job training and the restricted budgets under which we must live.●

● Mr. FORD of Michigan. Mr. Chairman, I rise in support of H.R. 3391, a bill to reauthorize and improve the trade adjustment assistance program. The need for this bill and the justice of this bill are clear and simple. Congress liberalized our Nation's trade laws in the early 1960's knowing full well that most of the Nation would benefit from freer trade but that millions of blue-collar workers in manufacturing industries would be hurt. Congress knew that shoe and textile workers, and many others in labor intensive industries, would lose their jobs as the direct result of competition with companies paying low wages in foreign countries. So Congress struck a deal with the representatives of those workers and their families. To win their support for our new free trade policies, we said that the victims of import competition would be helped to adjust to the loss of their livelihoods. We pledged that the Government would retrain these workers, help them find new jobs, and pay them special benefits as compensation for the loss of their income, the loss of health and life insurance coverage, and the loss of an adequate pension.

Well, "free trade" became the law of the land, and imports came flooding in. That flood of imports has helped keep the price of a shirt low and made television sets affordable for most Americans, but it also washed away millions of jobs. And import competition has gone far beyond what Congress envisioned in 1962. Robert Reich has described the vast penetration of imports into the American economy:

> America's relative decline has been rooted in changes in the world market. Prior to the mid-1960's, foreign trade did not figure significantly in our economy. Only a small proportion of American-made goods were traded internationally; an equally small amount of foreign production entered the United States. This situation changed dramatically. * * * The most telling statistic is this: By 1980, more than 70 percent of all the goods produced in the United States were actively competing with foreign-made goods * * *.
>
> American producers have not fared well in this new contest. Beginning in the mid-1960's, foreign imports have claimed an increasing share of the American market. By 1981, the United States was importing almost 26 percent of its cars, 17 percent of its steel, 60 percent of its televisions, radios, tape recorders, and phonographs, 43 percent of its calculators, 27 percent of its metal-forming machine tools, 35 percent of its textile machinery, and 53 percent of its computerized machine tools. Twenty years before, imports had accounted for less than 10 percent of the American market for each of these products.

American workers kept their end of the bargain. They supported free trade, and many of them lost their jobs.

But the Government has never kept its part of the bargain. For almost 20 years, virtually no one was retrained under the trade program, and the Labor Department made only token efforts to help workers find new jobs or relocate. When import-impacted workers realized they could receive weekly benefits if they found training on their own, and began making use of this provision of the law, the Reagan administration slashed the budget for TRA and illegally refused to release money available for training.

During a brief period in the late 1970's, a large number of workers did receive substantial financial assistance under the Trade Act. But even then, tens of thousands, perhaps hundreds of thousands of other victims of import competition were denied benefits because of bizarre regulations and court rulings which narrowed eligibility for TRA unfairly.

H.R. 3391 will correct these inequities and help to fulfill the promises we made to America's industrial workers in 1962 and again in 1974. Current law excludes workers in independent parts plants from coverage if they lose their job because of competition with an imported end product rather than direct competition with an imported part. Thus, an American company which produces and sells hubcaps to General Motors for inclusion in General Motors cars is not covered under TRA if its sales drop because increasing auto imports depress General Motors sales and cause General Motors to stop buying hubcaps. The American company would be covered, however, if General Motors simply stopped buying American hubcaps and began importing hubcaps from Italy or Japan. H.R. 3391 will eliminate this absurd distinction and employ a realistic test: A worker will be covered by TRA under H.R. 3391 if increased imports of articles like or directly competitive with articles produced by his firm or to which his firm provides essential parts or services contributed importantly to his layoff and to declines in his firm's production or sales.

H.R. 3391 makes a second major change in current law. The bill eliminates the discretion of the Secretary of Labor to deny training benefits to workers who meet all of the eligibility criteria of the law. Thus, the administration will not be able to deny training to import-impacted workers on the basis of lack of funds, a situation which has recurred over and over at the expense of thousands of workers.

I would like to salute the wisdom of Mr. PEASE, Mr. GIBBONS, and a majority of the Ways and Means Committee, who have found an ideal method to pay for these benefits. The revenues for this program will not be raised from income or payroll taxes; rather, they will be raised from custom duties. Thus, imports, which cause the layoffs and business failures which H.R. 3391 seeks to remedy, will pay for the costs of the program.

I would also like to praise the committee for its support of the firm adjustment program. The record of the program is truly remarkable. Largely through the provision of technical assistance, such as marketing studies, engineering assistance, and strategic planning, the various trade adjustment assistance centers have helped over 1,100 trade-impacted firms and saved or created thousands of jobs. The firm assistance program deserves to be preserved and expanded.

Critics of H.R. 3391 have said that TRA is unnecessary because it duplicates the adjustment assistance provided by the Job Training Partnership Act (JTPA). But no one familiar with JTPA could say with a straight face that it is adequate to meet the adjustment needs of even one-tenth of this Nation's displaced workers. Even if H.R. 3391 did duplicate JTPA's displaced worker title it would still leave millions of people unserved, and would leave all of them underserved.

As a matter of fact, however, the training scheme envisioned by H.R. 3391 is far superior to that in the Job Training Partnership Act and does not "duplicate" its provisions.

JTPA provides no stipend for displaced workers. Instead, it unrealistically expects them to feed their families and pay the rent without any income while spending all day in a training program learning new skills. By contrasts, the long-term unem-

ployed worker covered by TRA receives unemployment benefits during the course of his training. Moreover, if the area he lives in has not established a JTPA program, a dislocated worker has no recourse; he simply will not find subsidized training. Under TRA, on the other hand, a trade-impacted worker would have the opportunity to self-finance his own training if funds were not available—while receiving 26 weeks of extra unemployment benefits to help defray the cost—and to find his own training program if the State and the Department of Labor did not make one available.

In summary, Mr. Chairman, I urge my colleagues to defeat each of the minority's amendments to H.R. 3391 and to vote favorably on final passage. The TRA program, despite its many past problems, has been vital to the survival of hundreds of communities and businesses and hundreds of thousands of people victimized by our Government's trade policies. We owe it to them to reauthorize and improve this program.●

● Mr. KOLTER. Mr. Chairman, today I rise in support of H.R. 3391, which reauthorizes the trade adjustment assistance program for another 2 years.

Over the past several years record Federal budget deficits and an unfair allocation of scarce economic resources have contributed to high interest rates. The same two factors have also driven the dollar's value to lofty heights. The musclebound dollar has raised the price of U.S. exports, making it much more difficult for domestic firms to participate in international trade. This disequilibrium has caused lower priced foreign imports to inundate our domestic markets. As a result of this increase of imported goods, the U.S. merchandise trade deficit in 1982 reached a record $47.8 billion. Even more alarming is that the estimated deficit for 1983 stands at $65 billion.

These record deficits have had a devastating impact on U.S. workers in an array of industries. More than 70 percent of all goods produced in the United States are forced to compete against foreign manufactured products. This is an inherent consequence of the market-based system. Another result is pockets of concentrated unemployment in certain import sensitive industries. Since February 1982, national unemployment has remained high. For the first time since the 1930's, many areas of the country faced unemployment rates greater than 20 percent. Only now some of those workers are coming to grips with the reality that they will not be returning to their old jobs when the economy improves in their locality.

While the benefits of liberalized trade accrue to all members of society in the form of less expensive goods, the costs are borne by a small group of workers and firms in industries that lack an international comparative advantage. In 1962 Congress made a commitment to help those who suffered injury at the hands of imports. The Trade Expansion Act contained a provision to provide adjustment, or better yet, a cushion for those touched by imports. The Trade Act of 1974 contained a further commitment to providing adjustment assistance. Today we consider H.R. 3391, a bill that further affirms and refines that commitment the Congress made to American workers and firms over 20 years ago.

The concept of trade adjustment assistance is one of the costs of freer trade. The program was designed to provide a period of transition for those who lose their jobs due to imports. Funds help workers retrain for new jobs and assist firms in challenging foreign competitors. H.R. 3391 enhances the program by assisting workers and firms in industries that supply components to firms suffering injury from imports. One of the few problems I have with this bill is that it does not go far enough.

Some would argue that this bill is unnecessary and that the Jobs Training Partnership Act enacted last year will serve as a suitable replacement. This sounds reasonable at first glance, but upon closer examination, the numbers just do not add up. The Congressional Budget Office esimates that by early 1983, approximately 750,000 workers had lost their jobs because of imports. Others rate that figure even higher. The Jobs Partnership Training Act is expected to aid only about 31,500 workers in fiscal year 1983, and according to the most optimistic scenario, only 170,000 would be helped in fiscal year 1984. The reason the Jobs Training Partnership Act can not achieve more is because it is inadequately funded and planned. While the $167 million commitment we are making for the next 2 fiscal years is inadequate, it is a step in the proper direction.

In conclusion, let me address a final concern of some of this program's critics. According to the Labor Department's Employment and Training Administration, trade adjustment assistance system, over 1.3 million workers have received trade readjustment assistance between April 1975 and July 1983. During the same period 1.085 million have been denied TRA. This point clearly illustrates that TRA is a worthwhile program. It is not a mere extension of unemployment benefits for everyone. Those who received benefits were certified as being eligible by the Secretary of Labor. The fact that almost as many were denied TRA as granted TRA, seems to indicate that it is carefully administered.

I want to reiterate that trade adjustment assistance is a cost of liberalized trade. Congress committed itself to helping those who have suffered displacement. Are we to help them, or turn our backs on them? I urge my colleagues to reaffirm the commitment to free trade by supporting H.R. 3391 as reported to the House by the Ways and Means Committee.

Thank you.●

● Mr. DAVIS. Mr. Chairman, I wholeheartedly endorse H.R. 3391, worker and firm trade adjustment assistance. I am particularly pleased with the portion of this bill which extends trade adjustment assistance and training to workers in independent firms which supply component parts to industries adversely impacted by foreign imports.

Under existing law only those firms which produce articles that are "like or directly competitive" with imported articles are eligible for trade adjustment assistance. Those firms who produce component parts or supply services for industries adversely impacted by imports cannot be certified according to the court's interpretation of "like or directly competitive." However, if a firm that has demonstrated that it is import-impacted has an affiliate which makes the component part or provides the service, those workers may be certified. Therefore, there are instances where certification is given to some workers but not to others in the same industry simply because they have different employees.

This situation exists in my district. The largest employer in northern Michigan is an iron ore mining company. Thousands of iron ore miners have been laid off in my district in recent years because declining domestic steel production due to imports. Iron ore is a primary component of steel, but because there are no significant imports of "like or directly competitive" iron ore articles, these miners who are employed by an independent company have been unable to receive certification for trade adjustment assistance. However, iron ore miners who work for a subsidiary of a steel producer may be certified because their parent company qualifies.

The inequity is clear. If it has been clearly demonstrated that iron ore mining is suffering because of imported steel, trade adjustment assistance for the miners should not be determined by who their employer happens to be.

I am pleased that this inequity has been addressed in H.R. 3391. Its passage does not alter the requirement that a firm or worker must demonstrate that imports "contributed importantly" to layoffs and the decline of sales or production. This is not a broad entitlement program, but an effort to assist those workers who can prove their jobs were lost due to domestic trade policies. Trade adjustment assistance fulfills the promise made to American workers during the

multinational trade negotiations which culminated in the Trade Agreement Act of 1979. I urge my colleagues to support this bill and to reject any efforts to remove the provisions which extend eligibility to independent component parts producers.●

Mr. GIBBONS. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. KILDEE, Chairman of the Committee of the Whole House on the State of the Union reported that that Committee, having had under consideration the bill (H.R. 3391) to improve worker training under the Trade Act of 1974, and for other purposes, had come to no resolution thereon.

CONDEMNING THE SOVIET CRIMINAL DESTRUCTION OF THE KOREAN CIVILIAN AIRLINER

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs be discharged from further consideration of the joint resolution (H.J. Res. 353) condemning the Soviet criminal destruction of the Korean civilian airliner, and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

Mr. KASTENMEIER. Mr. Speaker, reserving the right to object, and I shall not object, I would like to make the point that, as in similar cases in the past—the Gulf of Tonkin resolution and other matters which are of highest importance, matters emanating from the Committee on Foreign Affairs which should have either been subject to hearings or at least subject to orderly processes in terms of notice to the body and in terms of either a rule or suspension—we are required to address this matter under unanimous consent.

I would hope that, even though we approach this grave question today perhaps somewhat prematurely in terms of sober congressional consideration of it, nonetheless other questions will subsequently be asked, and perhaps even answered, which have not been asked to date concerning this tragic affair.

Mr. Speaker, I will not object today except to say that I would hope that hereinafter, under other processes or parliamentary procedures, we would have a greater ability to deal with matters of such substance as the question we have before us today.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin (Mr. ZABLOCKI)?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 353

Whereas the United States joins with the world community in expressing its outrage over the actions of the Soviet Government on August 31, 1983, which caused the destruction of Korean Air Lines flight 7 with the loss of two hundred and sixty-nine innocent lives;

Whereas on August 31, 1983, Korean Air Lines flight 7 inadvertently entered Soviet airspace;

Whereas Soviet authorities tracked Korean Air Lines flight 7 for more than two hours, but did not adhere to all the internationally recognized procedures necessary to warn the aircraft that it was off course and to protect its passengers;

Whereas a Soviet Air Force fighter fired air-to-air missiles at Korean Air Lines flight 7 and destroyed the unarmed, clearly marked civilian airliner with two hundred and sixty-nine innocent men, women, and children from fourteen nations abroad, including sixty-one of our fellow citizens;

Whereas among the victims was a distinguished Member of Congress, the Honorable Larry P. McDonald;

Whereas the highest levels of the Soviet Government have lied in an attempt to justify this unconscionable act and have continued to deny access to the area where the airplane went down;

Whereas the Soviet Government has publicly proclaimed its intention to repeat its murderous act if another airliner wanders inadvertently into Soviet airspace; and

Whereas this cold-blooded barbarous attack on a commercial airliner straying off course is one of the most infamous and reprehensible acts in history: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States hereby—

(1) condemns the Soviet crime of destroying Korean Air Lines flight 7 and murdering the two hundred and sixty-nine innocent people onboard;

(2) calls for a full and frank explanation from the Soviet Union for this brutal massacre;

(3) extends its deepest sympathies to the familes who lost loved ones, and supports their rights to obtain reparations from the Soviet Union;

(4) calls on the Soviet Union to assist international efforts to recover the remains of the victims;

(5) calls for an international investigation by the International Civil Aviation Organization into this heinous incident;

(6) declares its intention to work with the international community in demanding that the Soviet Union modify its air defense procedures and practices to assure the safe passage of commercial airliners;

(7) finds that this tragic incident, and the Soviet Government's refusal to acknowledge responsibility for its wanton conduct, will make it more difficult for the United States and other nations to accept the Soviet Union as a responsible member of the international community; and

(8) urges our allies and other nations to cooperate with the United States in continuing to demand that the Soviet Government unequivocally apologize for its actions, fully compensate the families of the innocent victims, and agree to abide by internationally recognized and established procedures which are purposefully designed to prevent the occurrence of such tragedies.

The SPEAKER. The gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 1 hour.

Mr. ZABLOCKI. Mr. Speaker, because of the interest in this matter, I ask unanimous consent that the time for debate on this joint resolution be extended by 1 hour to permit sufficient time for interested Members to speak, and I ask that the time be equally divided between myself and the gentleman from Michigan (Mr. BROOMFIELD).

The SPEAKER. Is the Chair correct in understanding that the gentleman asks for an additional hour?

Mr. ZABLOCKI. Yes, Mr. Speaker, an additional hour.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER. The time will be equally divided between the gentleman from Wisconsin (Mr. ZABLOCKI) and the gentleman from Michigan (Mr. BROOMFIELD).

The gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 1 hour.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the joint resolution presently under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Joint Resolution 353 condemning the Soviet criminal destruction of the Korean civilian airliner, and the massacre of 269 innocent men, women, and children.

Mr. Speaker, the Soviet attack against KAL-007 is, as the resolution states, one of the most infamous and reprehensible acts in history. There is absolutely no justification under international law or any other test of international behavior for this despicable act.

What is most distrubing about this horrible act is that the Soviets have bluntly defied the civilized world by its refusal to apologize and to provide compensation for the families of the victims. In my view, this joint resolution of condemnation, which has been requested by the President, is the least that the Congress can do to express its outrage.

Mr. Speaker, House Joint Resolution 353 establishes eight elements for U.S. policy. They include: A condemnation of the Soviet crime calling for a full and frank Soviet explanation for its action; extending deepest sympathy to the victims' families and support for their rights to compensation; calling on the Soviet Union to assist in recovering remains of the victims; calling for an international investigation of the tragedy; demanding revision of Soviet air defense procedures to assure safe passage of commercial airliners that have strayed into Soviet territory; stating that the Soviet action makes relations with the Soviet Union more difficult; and urging our allies and other nations to join the United States in continuing to demand that the Soviet Union provide an unequivocal apology, fully compensate victims of the tragedy, and establish procedures to keep it from happening again.

The sense of outrage of this Congress and the American people is shared by our friends and allies throughout the world. The Korean and Japanese Parliaments have already passed strong resolutions—with the full support of the political parties—condemning the Soviet action and behavior. Also Canada and several other countries have suspended flights to and from the Soviet Union.

I should also emphasize that the public uncovering of this incident—which the Soviet authorities would themselves cover up—was only made possible by the exceptional cooperation of Japan. We should properly express our gratitude for the contribution that they have made.

Mr. Speaker, it is my hope that this joint resolution will contribute to the international effort initiated by the President to hold the Soviet Union responsible for this criminal act as well as develop improvements in civil aviation procedures to prevent its recurrence. I urge adoption of House Joint Resolution 353.

□ 1530

The SPEAKER. The Chair recognizes the gentleman from Michigan (Mr. BROOMFIELD).

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support this resolution; however in view of the Soviets' reaction to date, I am convinced that the administration should even go further.

Specifically, I would propose that our Government expel 269 Soviet KGB agents, one for each of the victims of the Korean Air Lines flight 007. I think it would be a symbolic act that would also have a practical impact on the Soviets' worldwide espionage operation. It would demonstrate our dismay and disgust at the Soviets' casual disregard for the lives of 269 human beings and our shock at the Soviets' unwillingness to show contrition for their actions or pay reparations to the families of the victims.

If the Socialist government of France can expel half of the Soviet agents in their country on far less provocative grounds, we certainly can afford to do no less.

I have felt for a long time that our Government has been lax in not taking steps to eliminate the acknowledged large numbers of Soviet agents who roam our country with relative freedom collecting military and industrial intelligence. The time to act will never be more opportune than it is now in the wake of this terrible disaster and the Soviets' defiant reaction to world opinion.

Let me briefly talk about my perception of the Soviet Union and the importance of this resolution.

The myth of the Soviet Union has been created over the years by the Kremlin propaganda experts. The myth has been used to sell communism and the Soviet model to the unsuspecting nations of the world. The myth says that the Soviet leaders are peace-loving people who respect life and want a stable and open relationship with other nations. The mythmakers disclaim any expansionist intentions or any bellicose tendencies. They eagerly sign international agreements on a whole range of subjects. They pat themselves on the back for being a nation that respects accords with other nations.

Yet, when Secretary of State Shultz met with Soviet Foreign Minister Gromyko in Madrid recently, Gromyko initially refused to even discuss this incident. Secretary Shultz insisted the issue be reviewed. Gromyko's response was aggressive. He shifted the responsibility to the U.S. authorities. He later brazenly threatened to kill more men, women, and children should another civilian aircraft make the same mistake.

In recent days, Soviet authorities have attempted to rearrange available evidence concerning the tragedy. They are trying to somehow justify their callous behavior. Recently the free world was treated to a rare press conference. Soviet Chief of Staff, Marshall Nikolai V. Ogarkov, gave the Soviets' distorted view of the atrocity. The fighter pilot who downed the aircraft also added his side of the story. In essence, the Soviets have refused to apologize to the world for this terrible, unjustified massacre of the innocent. In recent days, they have positioned military units near the spot where the aircraft crashed and will certainly shoot at any intruders.

In order to reestablish itself as a member of the civilized international community, the Soviet Union must accept the responsibility and fully explain this senseless massacre, assist in international efforts to recover the remains of the victims, permit an international investigation of this incident, compensate the families of the victims and apologize for the incident. Although we must somehow coexist with the Soviet regime, we must also hold Moscow accountable for any blood on its hands.

The SPEAKER pro tempore (Mr. MINISH). The Chair recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from New Jersey (Mr. RODINO).

Mr. RODINO. Mr. Speaker, like all Americans, like all civilized men and women everywhere, I am outraged by the latest example of Soviet barbarity. The brutality of shooting down a defenseless civilian airliner with 269 innocent persons aboard has been compounded by the demonstrable deceit by Soviet officials.

This tragedy is brought to more human terms by the realization that four of my own constituents were slaughtered by the Soviets. Edgardo and Frisca Cruz of Irvington, Eusebio Bolante, and Maria N. Bolante of East Orange were aboard flight 007.

The lying; the insolent disregard for human life; the lack of compassion for the grieving families; the refusal to let other nations join in the search for the victims of this massacre—all of this has shocked the world community.

This tragic episode demonstrates once again the fear, suspicion, and mistrust that haunts Soviet leaders in their relations with the rest of the world. It demonstrates once again the peril in which the world lives, where a single mistake or miscalculation invites disaster. It shows once again the skewed values of Soviet society—that its obsession with the security of its borders reduces to nothingness all other values, even life itself.

The unrepentant Soviet response to the world's wrath indicates that any plane that wanders into Soviet air space might meet the same fate as Korean Air Lines flight 007.

Mr. Speaker, I urge that all of us in Congress add our voices to the worldwide condemnation of the Soviet Union and vote for this resolution. We must send the Soviet Union a message that, while we may have our differences over a nuclear freeze and the MX missile, we are united in this censure of this brutal act for which there can be no justification.

At the same time, Mr. Speaker, I would caution against trying to use this tragedy to undercut arms-control efforts or to promote deployment of the MX. These two issues should not be linked with the catastrophe of KAL 007. But the Soviet Union must be on notice of this: For the last several

months the Soviets have been carrying out a worldwide peace offensive. Now, they will no longer be able to wage peace with mere words. In the aftermath of this wanton destruction of human life, they must offer more.

Mr. BROOMFIELD. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Speaker, I rise in strong support of House Joint Resolution 353 denouncing the Soviet destruction of Korean Air Lines flight 007. I deplore and condemn the Soviets' unspeakable, heinous behavior.

The Soviets' total disregard for the value of innocent lives should make us stop and consider how we should conduct our relations with that nation.

When there is discussion of a nuclear freeze or arms control or curbing defense spending, I think we must consider those actions in terms of what we know Soviet behavior to be, not what we wish it would be.

From their attack on the Korean airliner, we know their actions are barbaric. The policies we choose to protect our Nation must therefore take into account the Soviets' complete lack of humanity and good will.

It serves little purpose to condemn the Soviet actions today if we ignore the implications of what they have done. It is now obvious that any decision on arms reduction or freezing nuclear armaments cannot rely on Soviet good intentions to be implemented. We will have to insure that any agreement we develop must contain the provisions for verification and confirmation of action that do not depend merely on the Soviets' word.

Of all the callous actions of the Soviets in attacking the Korean airliner, nothing is more telling of Soviet intentions, I believe, than the realization that Soviets acted knowing the aircraft would be out of Soviet airspace in a matter of minutes. The Soviets acted when they knew the aircraft posed no threat to them.

Until we have a mutually balanced, verifiable arms control agreement, we cannot permit our defense posture to remain inferior to the Soviets and expect our security to be maintained merely by relying on Soviet restraint. No longer can we believe that if we set the example of arms reductions the Soviets will follow. If there were ever any doubt before, it is obvious now the Soviets do not think the way we do; they do not value human life as we do.

Let us keep the memory of the loss of 269 lives, including our friend and colleague, Larry McDonald, as a guide to our actions in the coming months and years. Let us meet Soviet strength with U.S. strength, meet Soviet determination with U.S. determination. Let us demonstrate to the Soviets we have the will to protect our security interests throughout the world and will not retreat in the face of Soviet barbarity. Let us not forget.

Mr. SILJANDER. Mr. Speaker, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from Michigan.

Mr. SILJANDER. Mr. Speaker, I stand in support of the resolution.

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from Arizona.

Mr. RUDD. I thank my colleague for yielding.

Mr. Speaker, I support the resolution and support the fact that we should refocus our priorities into the Western Hemisphere first.

The shooting down of an unarmed, defenseless South Korean commercial airliner by the Soviet Union that took the lives of 269 innocent men, women, and children, including one of our own colleagues, Congressman Larry McDonald, was nothing less than cold-blooded murder.

There was, as we all know, no justification for such a deplorable act of terrorism and barbarism, in essence, an act of war.

As a result of this massacre—and the massive coverup and shocking lies that the Soviets flaunted in the face of the world immediately afterward—we must reassess our priorities and, for once, stand up to this great test of the American will.

Our priority, however, should not be placed on Sakhalin Island, where this murder in the sky took place, or on Southeast Asia, where most of the victims of this tragedy lived. Nor should it be on the Middle East, Africa, or even Europe.

Instead, Mr. Speaker, we should focus on the Western Hemisphere and set our priorities on halting the military advances the Soviets are making in our own part of the world.

We should respond to this inhumane act perpetrated by the Soviets by increasing our military and economic support to the Government of El Salvador so it can turn back the Communists guerrillas who are trying to overthrow the legally and rightfully elected leaders of that nation.

And we should increase our assistance, Mr. Speaker, to the Contras in Nicaragua, who are fighting to regain their nation from the Moscow- and Cuban-supported Sandinistas.

Not only would this provide us with a high degree of peace and security to our people and to our neighbors in the Americas, but it also would afford us a much better bargaining position from which to take a long, hard look at the Soviet activity in the rest of the world.

The lesson we should learn from the cowardly shooting down of a commercial airline by the Soviets is that the Soviets cannot be trusted to operate in the world community. They simply are not restrained by the moral laws that we accept and live by.

And the sooner we expel them from our own hemisphere, the better it will be for the entire world.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Connecticut (Mr. RATCHFORD).

□ 1540

Mr. RATCHFORD. Mr. Speaker, all over the world, and here in Congress, people have struggled to find words to adequately express the horror and shock they feel at the downing of Korean Air Lines flight 007. The Soviet action is an outrage on so many levels; 269 innocent people are dead; 269 families and countless friends are grieving. Two of my own constituents have perished, one a mother whose death has made orphans of her two small children. The action is an outrage against civil aviation, it is an outrage against international law, and it is an outrage against all of the unwritten codes of human decency and morality.

Perhaps most frightening is that on September 1, the world became a much more dangerous place. Our system of international laws is like a forest. Cutting down trees can create a horrible wind, a potentially uncontrollable wind. Just such a wind has sprung up as a result of the downing of the Korean airliner. I am speaking of the winds of war. In spite of our grief for the victims, and our anger at the perpetrators, we must rebuild and strengthen our shelter. I urge my colleagues and this administration: In the midst of your anger and fear, remember one very simple point. The attack on the Korean airliner heightens, rather than diminishes, the need for continued arms control negotiations. It also adds urgency to the need for a mutual, verifiable freeze between our two countries. Arms limitations efforts are not a favor to the Soviet Union. They are in our own selfish interests. I can think of no more meaningful way to honor my two constituents, to give some measure of meaning to their deaths, than by seizing this moment to redouble our efforts to insure stability and peace.

Mr. BROOMFIELD. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. HYDE) for purposes of debate only.

Mr. HYDE. Mr. Speaker, this is probably a useful thing, although this resolution is, as we would say in my old neighborhood, all windup and no pitch. It views with alarm and it condemns and it deplores but it really does not do anything. It will not hurt, I suppose, and it does extend sympathy to the families who lost loved ones, and in that regard I suppose it is important to support it.

I notice it talks about our joining with the world community. Well, not quite. Nicaragua, that bastion of free-

dom and democracy, that progressive new state in Central America with a new government, could not quite bring itself to join the world community to condemn the shooting down of citizens of 14 different countries in 60 seconds from getting to the Sea of Japan and out of Soviet air space.

Zimbabwe, one of the great progressive countries, who looks to us for aid and whose Prime Minister is here these very days seeking aid, could not bring itself to join the world community to condemn this massacre of innocent human life. Zimbabwe, which votes with us 12 percent of the time in the United Nations, and the Soviet Union votes with us 20 percent of the time.

Another new ally that we have found and in whom we have such confidence, the People's Republic of China, could not quite bring itself to join the U.N. world community in condemning this action.

Cuba, of course, the less said the better.

But as the chairman of our Foreign Affairs Committee has said, this is the least we can do. And as the chairman of the Judiciary Committee said, this is the least we can do.

Of course I concur in those assessments.

Bad as what the Soviets did over in the Sea of Japan, this happens every day in Afghanistan. We have learned to live with that. We have learned to tolerate that.

We have forgotten the invasion of Hungary in 1956, rolling into Czechoslovakia in 1968. Poland concerns us intermittently. And this, too, this, too, shall pass away.

This indeed is the least we can do.

Now, if we really want to do something, if we really want to send a signal to the Soviet Union that we are serious about what they have done and we want to do something, I suggest to the leadership of this House, I suggest to the chairman of the Foreign Affairs Committee, I suggest to the chairman of the Judiciary Committee, I suggest to the distinguished majority leader, I would call upon the distinguished and, in this case, hard line leadership of the majority party to call up immediately by unanimous consent today, and if that would be unavailing, then tomorrow, which is the first day it can be called up, the defense authorization conference report which passed the other body today by a vote of 83 to 8. I think a speedy disposition of that would indicate that we indeed want to do something instead of just flail our arms and view with alarm and use words and language rather than action.

I have heard a rumor to which I give no credit that there are those that want to defer consideration of the defense authorization bill, to wait for the anti-MX people and that sort of thing to get into gear and to start lobbying against that bill. As I say, I give no credit to that rumor and I would hope and expect that the Democratic leadership will hasten to call up that defense authorization bill and send the same signal to the Soviet Union that the ladies and gentlemen of the other body did.

That indeed would be something worthwhile in this very tragic situation. And I yield back the balance of my time.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from Connecticut (Mr. MORRISON).

Mr. MORRISON of Connecticut. Mr. Speaker, I rise in strong support of this resolution. I think it is important that the House pause and take this action.

Obviously resolutions cannot bring back the people who have been lost, but they can show our seriousness of purpose and our outrage at what has occurred.

I urge the House to adopt this resolution and I urge the President to continue to seek collective action by the nations of the world to impose a cost on the Soviet Union and to make its leaders feel the consequences of their irresponsible and unforgivable actions.

But I also urge the Members of this House to keep in mind that our concern for arms control is not based on our respect or love for the Soviet Union but for a decent respect for the interests of the people of the world and the interests of the people of the United States. If we hold firm to our commitment to arms control we can hold the Soviet Union accountable for its actions and yet still advance our own national interests by reducing the terrible threat of nuclear war.

Certainly trigger-happy pilots and trigger-happy commanders are not the kind of people we want to see developing first-strike weapons. We should do everything in our power to see to it that they do not have those tools.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. GILMAN) for purposes of debate only.

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding and request permission to revise and extend my remarks.

I commend our distinguished chairman, the gentleman from Wisconsin (Mr. ZABLOCKI), and the ranking member, the gentleman from Michigan (Mr. BROOMFIELD), for so expeditiously bringing to the floor this measure which I am pleased to have cosponsored.

Mr. Speaker, I rise in strong support of House Joint Resolution 353, condemning the Soviet's aggressive, criminal act in destroying KAL flight 007, a Korean civilian airliner.

Our Nation and the entire world has been shocked by this reprehensible, blatant disregard for international law, for human rights, for human life, for 269 lives including those of 61 Americans.

The impact of this savage attack on innocent civilians was brought home fully to my congressional district in New York State which is still mourning the loss of a young father, William Oren of Middletown, N.Y., who was engaged in a business trip to Korea when, in the middle of the night, he was shot down over the sea of Japan.

What is so unbelievable about this tragic event, is the Soviets' callousness and their utter lack of remorse in placing the sanctity of airspace above any regard for human life.

The Soviets' barbaric acts, their unrelenting response and total disregard for human rights is a stark reminder for us in this body of the need to review and revise our future policies toward the Soviet Union. In our future relationships with the Soviets, let us not forget the tragedy of KAL flight 007.

Accordingly, I urge my colleagues to support this resolution of condemnation of the Soviet Union and let us hope that our allies—and all nations—will join with us in demanding reparations and a greater respect for human life.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. MURPHY).

Mr. MURPHY. Mr. Speaker, I have heard the words of my fellow members concerning the unfortunate and tragic destruction of the Korean Airlines jet by the Soviet Union, and I share and echo their sentiments. The action by the Soviets shows clearly the low value put on human life by them, but we should not be surprised. The victims of the shooting down of that aircraft are merely added to the list of innocent victims who have already been casualties of the brutal and ruthless Soviet regime. In an effort to surpress speech, thought, religion, and political expression hundreds of thousands of Ukrainians, Latvians, Lithuanians, Estonians, Soviet Jews, Afgans, Czechs, Hungarians, Vietnamese, Cambodians, Libyans, Cubans, and Nicaraguans were killed. It is little wonder then that the Soviets show no remorse for 269 passengers on the Korean airliner.

Mr. Speaker, it is difficult to find the words to capture the outrage that I feel because of the Soviet action, or to express the sorrow that I feel for the victims and their families. At times like these words are inadequate to capture the simmering anger that we all feel. I am angry that American technology sold to the Soviets was the basis of the guidance system, the radar, and the computers used by the Soviet plane. I am angry that our re-

sponse has been confined to shutting down two Aeroflot offices, temporary suspension of landing rights at U.S. airports, and volumes of rhetoric. Other than that, it seems to be business as usual with the Soviets.

I come from the soft coal fields, steel mills, and glass factories of western Pennsylvania. It is an area where the people are as strong as the steel they make, and where they are a people of action, not words. As a product of this heritage, it seemed more appropriate to examine action that the Congress could take that would, in most eloquent terms, tell the Soviets that the shooting down of a regularly scheduled passenger airline and the murder of 269 innocent civilians is unacceptable; that we draw the line here; and that this action will have serious consequences.

I am planning to introduce a bill that will provide a greater penalty to the Soviets than the slap on the wrist that is being proposed by the administration. For too long now, the citizens of the United States have paid more than their fair share to support the United Nations, where the Soviets have three votes in the General Assembly and the United States has one, where the United States pays over 2¼ times per capita in dues than the Soviet Union pays. I am proposing that the United States reduces its allocation to the United Nations to an amount that would be equal with all other members on a per capita basis. If the other nations are not willing to bear their share of the costs we must question the continued existence of that organization.

Although the U.S. imports from the Soviet Union do not equal the dollar amount of our imports from Japan, Canada, or other western trading partners, it is nonetheless an important source of foreign exchange for the Soviets. I am proposing that an import levy equal to half the value on vodka, caviar, and sable pelts be instituted immediately, and that the revenues generated by such a tax be put in a fund that will be used to compensate the families of American citizens who were killed on the Korean airliner. In addition, I will propose that the grain sale to the Soviets be canceled, or that the terms of the sale be altered so that the Russians will have to pay for the grain at current market rates at the time of purchase plus a 50-percent surcharge. In addition, I will further propose that the payments be made in gold. I would further advocate that any high technology sale to the Russians be suspended for 2 years, and that the surcharges be in effect for 5 years.

I further propose that until the Soviet Union makes reparations to the victims, no Soviet vessels be allowed entry into American ports.

I know that the families of the victims find comfort in our words today, but justice and fairness seem to dictate that, as a Nation, we do more than offer comforting words, and realize that words have little effect on Russia. They are not motivated by compassion, human decency, or any other expression of high human values. They understand strength and resolve; they understand action. Words without action can be forgotten tomorrow; my proposal would be a constant reminder for 5 years that the people of the United States are firm in their resolve that the Soviets must bear the responsibility for this atrocity. They must never question the commitment of the American people to maintain a world of civilized societies with basic standards of decency; and future unacceptable Soviet behavior will not be tolerated.

□ 1550

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute to the gentleman from Washington (Mr. PRITCHARD) for debate only.

Mr. PRITCHARD. Mr. Speaker, I rise in strong support of this resolution. This incident reminds me of a conversation I had with Anwar Sadat who talked about how rude the Russians were, how thoughtless and how willing they were to lie, that when you knew they were lying and they knew they were lying, and yet they were perfectly willing to look you right in the eye.

This was just after he had tossed them out of Egypt.

Now, I was in Japan when this incident happened and I can tell you that many of us have been concerned, but we have been heartened by the direction the Japanese have taken as far as picking up their security in that area.

Nothing could have had a greater effect on the Japanese and on their government than this incident.

So I think Russia is and will pay a heavy price for this action, one which is so thoughtless and so crude and so typical of their actions, and it shows to the world why they are like they are and why they should be isolated.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from Guam (Mr. WON PAT) for debate purposes only.

Mr. WON PAT. Mr. Speaker, I rise in support of House Joint Resolution 353.

Our colleagues, Congressman CLEMENT ZABLOCKI, chairman of the Committee on Foreign Affairs, and Congressman WILLIAM S. BROOMFIELD, the ranking minority member, deserve our deep appreciation for bringing to the floor the resolution condemning the Soviet destruction of Korean Air Lines flight 007 with the loss of 269 innocent lives on August 31, 1983.

On behalf of the people of Guam, I join with them today to add my support for the resolution and urge that it be passed overwhelmingly to send a message to Moscow that the civilized peoples of the world will not tolerate wanton murder of our people and attacks on civilian airliners.

The Soviet rulers must be brought before the bar of world justice and made to understand that their behavior is contrary to every standard of a civilized nation. These are no reasons acceptable for shooting down flight 007 and the Soviet claim that they were only protecting their air space against an unwarranted intrusion is blatantly insulting to our intelligence.

If the Soviet really want to prove to the world that they did not commit coldblooded murder then why have they not let American, Japanese, or Korean forces join in on the search? What are they hiding? A plane riddled with bullets? The remains of men, women, and children torn apart by Communist missiles?

What irony that our colleague, Larry McDonald, should have died in such an incident. His warning that the Soviets were barbarians rings truer now than ever before. Everywhere we hear the Soviets talk about peace, but in countless situations we see not a friendly nation, but a nation intent on using brutal force to achieve its goals at any pretext.

America, our allies and all other nations must impose sanctions now against these men to let them know our anger and frustration. Words will not do the job against this senseless form of terrorism any more than words stopped Hitler, Stalin, or even the PLO. I urge this Nation to act immediately to impose hard economic and political sanctions that will show Moscow once and for all that mindless murder is contrary to their own best interests and mankind. Thank you.

Mr. BROOMFIELD. Mr. Speaker, I yield 5 minutes to the distinguished minority leader the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, so much has been said about the barbaric behavior of the Soviet Union that there is little I can add. The resolution accurately portrays the Soviet Government and its actions.

But I do want to bring to your attention a few things in connection with this tragedy.

First, this tragedy demonstrates once more the need this country has for the best international broadcasting facilities in the world.

But when the Voice of America expanded its broadcasts to tell the truth about this event, they found that they had to take precious time usually planned for maintenance of their outmoded equipment.

Our ancient transmitters are not strong enough to overcome Soviet electronic jamming.

So if you want to do something to hurt the Soviet Union, support an expansion of Voice of America, Radio Free Europe, and Radio Liberty.

Let us not lapse back into our usual state of amnesia once this furor has died down. We need steady, assured, long-range funding for VOA, not sudden bursts of added funds.

The next thing we can do is stop treating Soviet officials as if they were simply a Russian version of our own governmental officials.

A few months ago I received a delegation of Soviet officials who were here on what was called an interparliamentary meeting. They came over cooing like doves right in the middle of our debate on the freeze.

It occurred to me that some of them, given their probable ages, began their careers in the Communist party when Stalin was killing millions of their own people. A couple of them were undoubtedly KGB types. Some parliamentarians.

Why do we continue the fiction that these are truly parliamentarians?

To call them parliamentarians is to debase an ancient and noble term.

So I would like to propose that we in the House refuse to enter into any bilateral meeting with members of the Soviet Government under the guise of it being a meeting between parliamentarians.

I am not saying we cut off any and all contact with them. All I am saying is that we stop engaging in this fiction.

Finally, a word of warning. The past week has seen a barrage of criticism directed against the Soviet Union by our Nation and by other civilized nations.

The Soviet Union has been called every name under the Sun.

But beneath all that name-calling on the part of many nations is something else: fear.

The savage brutality with which the Soviet Union acted is like every act of terrorism. It shocks. It horrifies. But it also instills fear.

We better realize that. There are a lot of nations throughout the world today who, while condemning the Soviet Union, are in awe of the brutal display of power.

The Soviet rulers know this. They know they can weather the storm of abuse. They know that many nations are looking over their shoulders and wondering: Am I next? What is to stop the Soviet Union from doing to me what they did to the 269 innocent people?

The only answer to that is that the Soviet Union's rulers, like all brutal people, fear opposing power. That is all. Not words. Not rhetoric. Just power.

So the eyes of world are going to be on us for the next few months. Those who fear Soviet power will be looking to us to see if we will back up our tough words with the ability to give those words meaning.

I urge all our colleagues to join with me in voting for this resolution. It is only a beginning. But it cannot, must not, be the end of our efforts to show the world our attitude toward the Soviet Union.

I would certainly endorse that call of my good colleague, Mr. HYDE, a few moments ago, that one of the best ways to demonstrate that is to bring up that conference report on the Defense Department authorization. We have the time to do it right tomorrow. My view would be, coming on the heels of this resolution, that is the way to send a real message. I would like to see that brought to the House tomorrow.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. WEISS) for debate purposes only.

Mr. WEISS. Mr. Speaker, the shooting down of Korean Air Line flight 007 by the Soviet Union on September 1 warrants the outrage and condemnation of all of those in Congress and in the international community who work constantly to promote human rights and peace. I share the anger and grief of the families of the 269 passengers whose deaths represent a tragedy for all of us.

As the events of the KAL downing have unfolded in the past 2 weeks, the personal tragedy of the 269 felled by the Soviets has become an international tragedy as well.

It is a tragedy for the millions of people in the United States and the rest of the world who have hungered for peace and worked hard and long for disarmament and arms reduction.

It is a tragedy for those committed to the survival of the planet, for the true lessons taught us by this event have been lost in the bluster of rhetoric expressed in response to the incident. It should be disturbing to all of us that after the expressions of certainty by our leaders as to how the tragedy occurred, contradictory information has had to be announced by them.

I commend the President for the restraint he has shown in leveling sanctions against the Soviet Union, but I vigorously object to his use of the KAL incident as leverage to win support for higher defense budgets and the production of what much of the world sees as first strike nuclear weaponry. I will vote for this resolution but with strong reservations and exceptions to the rhetorical excesses it contains which can only exacerbate world tensions.

The 9,000 nuclear warheads now at our disposal did not prevent the pilot of the Soviet SU-15 jet from firing the missile that downed the Korean airliner, nor did it deter the local air defense commander from deciding to destroy the plane.

Can we really believe that 100 MX missiles added to those 9,000 nuclear warheads would have changed this decision?

I do not think so.

We should further be concerned not only that the Soviets made this irrational decision in the first place, but they did so after having 2½ hours to make it.

Frankly, I am seriously concerned about the prospect of the Soviet chief of staff having only 10 minutes to respond to a report of an enemy aircraft entering Russian territory.

Ten minutes. that is the amount of time it would take for one of the Pershing II missiles—about to be deployed in Europe—to hit the Soviet Union.

If the response time were lengthened to 30 minutes, I would not feel any more secure.

That is the number of minutes it would take for an MX missile to travel from the United States to the Soviet Union.

In each of these cases, the missile fired from the Soviet Union would not be carrying a conventional warhead; it would be nuclear.

And the number of innocent people would not be in the hundreds, but in the millions, most likely in the tens or maybe hundreds of millions.

Contrary to the recommendation of our President, we should be building down, not up, our nuclear arsenal.

Finally, we should learn that the Russians are not barbaric, subhuman, agents of aggression and deceit whom we suddenly can no longer trust or work with in the future negotiations.

Rather, the Soviet's response to a commercial airliner overflying its territory reflected the defensiveness and paranoia of a nation desperately afraid that the world might perceive it as a second-rate power.

The actions of September 1 were not the actions of a confident and secure world power.

The harsh rhetoric of the past 2 weeks can only heighten the Soviets' state of paranoia and isolation, and reduce even further the already slim chances for arms reduction.

President Reagan's demand for the approval of the MX and an even greater defense buildup than the one presently underway seems more and more illogical.

By improving our first-strike capabilities, we are pushing the Soviets further and further into a corner.

The hard-line response to the Korean airliner incident pushed by the President will make the Soviets less willing to engage in arms control agreements and more likely to intensify their own military buildup.

The end result is an even more serious tragedy than the one we suffer now: Following up the anti-Soviet rhetoric of the past 2 weeks with increased defense appropriations will only strengthen the hand of military hardliners in both Russia and the United States and make the goal of world peace even more remote than it appears today.

In this present period of international tensions, when the world seems perilously close to war in several regions around the globe, harsh rhetoric and higher budgets will only bring us closer to the brink of nuclear destruction.

Acts of revenge and retaliation will not restore the lives of the 269 passengers on KAL flight 007. The task before us here today is to prevent any future loss not just of 269 innocent victims, but possibly of 269 million, who might die because of another, even more serious irrational and thoughtless act.

Our task today is to insure conditions for the reduction of tensions leading to worldwide peace.

□ 1600

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from Maryland (Mr. DYSON).

Mr. DYSON. Mr. Speaker, I believe I reflect the frustrations of many of my own constituents in that the United States did not take a stronger stand or reaction to the Korean Air Lines incident.

Also, at the same time, I just returned from a trip with the Armed Services Committee in which we traveled the same airspace that the Korean Air Lines traveled. And I feel that same kind of tension which is evident throughout this country; the United States does not seem to be giving a strong enough response to this crime.

I only wish that as Members of Congress we could do more than just pass this joint resolution; something that would show the tremendous resolve we see amongst our constituencies that we have not seen with this Government.

Something needs to be done to prevent such a heinous crime from happening ever again. That we cannot trust the Russians to follow the standards of conduct that the rest of the world accepts should come as no surprise to us, and yet the senseless violence of this act understandably stunned the world.

As we struggle to comprehend the dimensions of this crime, we need to strive for a balanced and rational perspective. We must remain reasonable in the face of outrage, but reason demands a truthful explanation. So far we have met with lies and evasion; the Russians have combined injury with insults. Their response has been one absurd fabrication warranting nothing more than scorn from every civilized nation.

The Soviet's brutality, and their malicious justifications, point out one inescapable lesson for the rest of the world: The Soviets do not share the same basic morality common to the West and therefore cannot be trusted. Moreover, they cannot be expected to engage in rational, honest discourse. This calls into question the very foundation of the treaties we are negotiating with the Soviet Union, which require the very standards of behavior the Soviets have so blatantly repudiated.

Our responsibility to our constituents demands that we in Congress reaffirm our national commitment to the belief in humane treatment and honest discussion. This joint resolution expresses our Nation's outrage, and serves notice that we as a nation will accept nothing less than respect for basic human rights. This must be the basis for international relations in a civilized world, and it is with this hope that I give my strongest possible support to this resolution.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. VENTO), for the purposes of debate only.

Mr. VENTO. Mr. Speaker, I commend the gentleman from Wisconsin and his committee for promptly acting to bring this response of the Soviets fatal attack on the helpless Korean Air Lines flight 007 to the floor.

I, of course, rise in strong support of the resolution. The language of the resolution is strong in condemning the Soviet Union's ruthless action reflecting accurately the views of our constituents and, indeed, world opinion with regard to this particular matter.

There are many questions regarding this matter. Can we improve the navigation systems in our commercial aircraft to prevent this type of tragedy and similar incidents in terms of the flight paths, whether it is the New Zealand DC-10 flight tragedy that occurred in 1979 when a misprogrammed I.N.S. system led that aircraft into an Antarctic mountain. Surely we can and must address that particular navigational question.

But I know the deep concern that is in the minds of most Americans, most Members in this body, in the final analysis is the unwillingness of the Soviet Union to accept the responsibility for their deplorable action. It raises serious questions of the competence of their command system. Indeed, this is not just the irresponsibility of a world nation. It is rather, the irresponsibility and ineptness of a superpower who carry the very welfare of this world in the palm of its nuclear hands.

When we raise questions with regard to command system and what happened in this tragic incident, certainly that question must come to mind.

I think, one certain task is to create a world environment in which we can work together to resolve these problems so we will not have this deplorable type of actions by any power in the world with regard to commercial flights.

What is the appropriate United States and world response—the MX, more arms, more bombs? I think not. The most crying need is not with navigation or our military capabilities or future economic sanctions. Rather, the answers must come from the Soviets themselves. We must do all that we can to prevent this type of future event and hopefully other world nations, small and large, will be willing to cooperate in that endeavor.

Mr. ZABLOCKI. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois (Mr. ANNUNZIO) for debate purposes only.

Mr. ANNUNZIO. Mr. Speaker, I support the resolution before the House today, but only as a first step in dealing with the Soviet Union.

President Reagan has said that the minor sanctions he has evoked against the Soviet Union are the strongest actions he can take, short of an armed conflict. I do not buy that explanation. Nor, do I believe, does a large majority of the American people. The public has been outraged by the shooting down of the Korean jetliner and the loss of 269 innocent victims, including a Member of this body. The public wants more than minor sanctions and resolutions. The American people demand strong action against the Soviet Union. There are many ways that our Government can take such action short of armed conflict.

I suggest that all travel of U.S. citizens to the Soviet Union be banned, and that, effective immediately, no Member of the House of Representatives travel to the Soviet Union for any purpose. All trade with the Soviet Union should be stopped, including the grain shipments. In order to ease the burden of American farmers, the grain embargo would not be put in place until the end of the year so that farmers would be aware that they will not be able to sell next year's crop to Russia. All cultural, scientific, and athletic exchange programs with the Soviet Union should be eliminated immediately.

The Soviet Union has had a long history of barbarous actions. It tries to mask its record of aggression by sending its ballets, its circuses, and its athletic teams around the world as goodwill ambassadors. But underneath that facade there is a country whose government is a murderous government which cares nothing about human lives.

Many American universities have already announced that they will not allow Russian athletic teams to visit their campuses. Along that same line, there has been a great deal of concern that Russia might choose to boycott the 1984 Olympic games in Los Angeles. The United States has gone to great efforts to persuade the Russians to come to the 1984 games. Rather than persuade them to come, this country should ban the Russians from the 1984 games. And if this cannot be done through the Olympic committees, then we should deny visas to Russian athletes.

Mr. Speaker, our Government tends to underestimate the Russians. We are lulled into a feeling that the Russian Government is honest and willing to abide by international rules. In reality, the Russians are liars, bullies, and worse, murderers. They should be exiled from the international community. And instead of our Government seeking to pacify the Russians, we should punish them, and punish them hard.

Given the Russian attitude, how can our arms negotiators sit at the negotiating table and believe one word of what the Russians say?

Mr. Speaker, in the coming days I will be suggesting even more nonviolent actions that can be taken against the Russians. The question is, is the Reagan administration willing to follow through, or will it continue its policy of wrist slapping.

The American people want strong, firm, and quick action. If they cannot get it from the administration, then this body should take the lead. For if there is no strong action, you can be certain that incidents such as the downing of the Korean jetliner will be repeated. And more lives will be lost because no one was willing to stand up to Russia.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. Mr. Speaker, I have to respectfully disagree with my colleagues who criticize the President's actions, who call this resolution a hollow resolution.

I think, Mr. Speaker, that it is important to note that the President has focused the most powerful force on Earth on this problem and that force is public opinion.

Public opinion may not be very important in a totalitarian state like the Soviet Union, but it is a powerful force on this floor, it is a powerful force in this country, and it is a powerful force around the world.

By this resolution we show a unity, a bipartisan unity in our outrage against the atrocity committed by the Soviet Union. and in further focusing world opinion, we make it possible that we might act on a multilateral basis to undertake those actions that impose cost on the Soviet Union.

We acted unilaterally in response to the invasion of Afghanistan.

□ 1610

We cut off grain exports. But the Soviet Union, through the world market, got the grain and we only hurt the American farmer. We cut off technological sales unilaterally to Europe, but the Soviet Union got the technology from our trading partners in Europe. We created dissension in the Western alliance, and the Soviet pipeline from Siberia to Western Europe ended up being built, as we were forced to embarrassingly back down.

I think it is important, Mr. Speaker, that we here today focus public opinion on this problem, that we join our President in his claim but firm resolve, and that we note that public opinion will affect debate.

Who in this Congress will now stand on the floor, as some did during the nuclear freeze debate, and say that the Soviet Union and the United States are equally responsible for world tension? Who will stand in front of the Capitol, in front of rallies and make similar statements today? I submit that those statements will not be made because they would not be well received.

We are going to have plenty of opportunities to tell the Soviet Union whether we have resolve. If our European and Asian allies will join us in boycotts concerning commercial aviation or concerning trade or concerning representation in terms of ambassadors and consulates, then we should act. But we should act with a multilateral front. I think we will have an action that can be taken in the area of defense, in the area of foreign policy, and the atrocity committed by the Soviet Union will affect those debates and will induce this Congress and this country to present a more unified and determined front in strengthening our defense and in resisting Communist aggression around the world. That is the action that is going to affect the Soviet Union. We join in this action today by passing this resolution.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from New Jersey (Mr. MINISH).

Mr. MINISH. Mr. Speaker, we in the House have an important and solemn duty before us now. I thank my distinguished colleague and good friend, the gentleman from Wisconsin (Mr. ZABLOCKI) for bringing this measure to the floor swiftly, so the House can register our collective revulsion and disgust over this barbarous act.

I am proud to be a cosponsor of this resolution which rightly uses the strongest possible condemnation for the inexcusable Soviet act of shooting down an unarmed civilian aircraft.

In the last 2 weeks we have heard much about this tragic and atrocious incident. The outcries and furor it has generated are more than justified. The downing of a commercial passenger aircraft is an act which civilized society cannot tolerate, not only is it barbaric and repulsive—it literally threatens civilized air travel as we know it. I fervently hope and state today, that as time passes on, and we get farther and farther away from the August 31 incident, we do not allow ourselves to forget this episode or the Soviet's reaction to it.

For in the aftermath of this incident, the Kremlin is revealing much of its dark side. The Soviets are continuing to offend the free world with lies and coverups. First it took Moscow days to even acknowledge that the plane was shot down, there has been little coverage of the human suffering—that 269 innocent people perished aboard the flight—in the Soviet press, and now the Soviets are blaming the whole incident on the West and even suggest that it could happen again.

We have been generous to the Soviets recently, by negotiating the grain agreement with them. For we know that the U.S.S.R. desperately needs to import grain, as their collectivized farming techniques are a disaster. I feel we would do well to at least reexamine that grain arrangement in the wake of the August 31 crime.

Mr. Speaker, I commend my colleagues on the Foreign Affairs Committee for their skillful work on this resolution. Of course, I wholeheartedly support this measure and urge all my colleagues to do so as well—the House must send Moscow a message that Americans do not approve of the murder of innocent people.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes, for debate purposes only, to the gentleman from Alabama (Mr. BEVILL).

(Mr. BEVILL asked and was given permission to revise and extend his remarks.)

Mr. BEVILL. Mr. Speaker, the world has been presented with a horrifying and vivid example of the astonishingly low value which the Soviet Government places on human life.

The Soviet's callous and brazen act of shooting down an unarmed Korean Air Lines passenger plane, killing 269 innocent people from nations around the world, has removed any doubt as to whether or not we can trust the Communists. The sad truth is that the leaders of the Soviet Union cannot be trusted.

During the congressional recess I held more than 20 town meetings, in addition to office hours in my Cullman, Jasper, and Gadsden, Ala., district offices, at which I spoke with hundreds of constituents. To a person, they were outraged, dismayed, and

sickened by the brutal air attack which took the lives of innocent civilians, including our colleague Congressman Larry McDonald.

Larry's Georgia district borders mine, and we shared many common concerns. I shall miss his presence in this body. His life, along with those of the other 268 people on board flight 007, was cut short by the paranoia, the savagery, and the lack of compassion of the Soviet regime which fired the missile which struck down this jetliner.

This is the latest manifestation of Soviet aggression. Their vicious attack on Afghanistan continues to this day. Their intimidation of Soviet Jews goes on despite the protests of humanitarians around the world. And an unknown number of Soviet citizens are hidden away in Siberian camps, working as slaves because they dared to disagree with their oppressive government. And yet, at the same time, the Russians are meeting with our arms control negotiators in Switzerland, for the purported purpose of seeking an end to the arms race.

Do they honestly expect us to place blind faith in anything they agree to on paper when they have acted with such brazen disregard to the value of human life? And even more importantly, will we be so foolish as to place our trust in them? I sincerely hope not.

I share the feelings of bitterness, despair, and anger toward the Soviets, which has been so eloquently expressed by my constituents. The people I represent have voiced their deepest emotions in the wake of this tragedy. And they have spoken with resolve.

I strongly support the resolution before the House today to condemn the Soviet Union for their action in shooting down this airplane and their denial of responsibility.

The following measures, called for in this resolution, are justifiable and should be complied with by the Soviet Government:

The Soviets should immediately make a full explanation of the events leading to the attack;

They should make payment of reparations for relatives of the victims;

Soviet assistance should be forthcoming to aid in recovering the bodies of the victims;

There should be a thorough investigation of this matter conducted by the International Civil Aviation Organization;

And there should be an immediate change in Soviet air defense procedures to insure safety for all airliners.

All nations of the world should join us in this condemnation and put the Soviet Union on notice that no longer will their brutality be tolerated.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes, for debate purposes only, to the gentleman from Texas (Mr. SAM B. HALL, JR.).

Mr. SAM B. HALL, JR. Mr. Speaker, I would also like to congratulate the gentleman from Wisconsin (Mr. ZABLOCKI) and members of his committee for bringing this forward for a vote today, which I hope will be unanimous. I am sure it will.

I think that the first thing that we should do in discussing and thinking about something of this nature is to think about the nature of the beast that is on the other side of this picture. The nature of the beast here is a murderer and a liar and a thug. Now, you can dress them up, you can put them before a camera and you can have them sitting down and talking about peaceful means; but you must keep in mind that you are dealing with murderers, thugs, and crooks. In my part of the country, you desire to deal with those people in a way that we cannot deal with them today, but we certainly would deal with them in a way differently in many respects from what we are hearing.

We have to do what the President says. We all have ideas about what we should do and what we can do and what we could do, but I do not believe that we can go off someplace half-cocked and do something that we might regret in the future. I believe that one thing comes out of this that I have not seen in a long, long time, and that is that it has galvanized public opinion against the Soviets more than any one single incident since I have been a Member of Congress.

I was in my district of east Texas for the last 15 to 20 days, and that is all people are talking about. They are mad, they are furious, they want us to do something, and they want us to know that they stand behind what this Congress does 100 percent. I think that if we can galvanize that kind of public opinion against these thugs, murderers, and outlaws, something good could come out of this. Now, I do not believe that anyone who has reached the age of accountability can come before this Congress, and say that we do not have to have sufficient strength in order to combat what they have, because people who do what those people did, raises the question—what will the second time around bring to the American people?

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes, for debate purposes only, to the distinguished gentleman from Pennsylvania (Mr. WALKER).

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I rise in strong support of House Joint Resolution 353, a resolution condemning the Soviet criminal destruction of the Korean airliner.

I want to join my colleagues to express my outrage at the shooting down of an unarmed civilian airliner by Russian fighters. There is no doubt in my mind that this heinous act was nothing less than premeditated murder on the part of the Soviet Government. The tapes released by the National Security Agency conclusively prove the cold-blooded and barbarous nature of the attack. Soviet military command knew that such an aircraft posed no threat to the national security of the U.S.S.R. They were well aware of the frequent commercial airline routes in this area.

Despite the convincing evidence incriminating the Soviet Government, their leaders continue an attempt to confuse the issue. The chief of staff for the Soviet military misrepresented the facts surrounding the incident. The Soviet Foreign Minister—arrogantly and without compassion—pledged to repeat the same course of action under similar circumstances. This arrogant denial came after days of silence and lies about their role. In light of this behavior, the United States and the rest of the civilized world cannot accept such a government as a responsible member of the international community. They are outlaws—common criminals with little regard for life.

Mr. Speaker, I applaud the President's calculated and realistic response on the behalf of the United States. His call for appropriate sanctions, restitution for the victims families, and a full Soviet explanation and apology was the correct response. I am also pleased that the President chose to continue the important arms negotiations now in progress in Geneva. In no way does this diminish our outrage but instead reaffirms our resolve to prevent this occurance from happening again. The people of the United States will never forget this crime.

As a cosponsor, I urge my colleagues to support this resolution. It is vitally important that the Congress speak with one voice in condemning this crime.

Mr. WALKER. Mr. Speaker, over the last several weeks we have engaged in a number of important debates that have included discussions about our beliefs about Soviet intentions in the world.

This resolution says plainly that we now know what those intentions are. The incident which precipitated this resolution, the cold-blooded murder of 269 innocent people on Korean Air Lines flight 007, is the real face of the Soviet version of international responsibility.

That incident tells us much that should be considered in all of our future national debates.

When we are told that the Soviets want the same things we do in the

world, we should never forget that they ruthlessly murdered innocent people. When we are told that you can trust the Soviets, we should never forget how they lied without apology. When we are told that you can arrive at verifiable agreements with the Soviets, we should never forget that they would not even allow international cooperation in a search for the victims—a simple humanitarian act.

This resolution will mean nothing if we do not learn from the horrors it deplores. If we do learn, the resolution will deserve the unanimous support that I hope it receives.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute, for purposes of debate only, to the gentleman from Oregon (Mr. AUCOIN).

Mr. AUCOIN. Mr. Speaker, I rise today, with colleagues from both sides of the aisle, to express my outrage over the act of incredible barbarism by the Soviet Union, which took the lives of 269 men, women, and children.

Through this appalling, provocative act by the Soviet Government, the world can see clearly the values of the Soviet leaders and no amount of lying by Foreign Minister Gromyko or General Ogarkov can change that.

What can change that, Mr. Speaker, what can reduce the tensions that have been created by this murderous act, is a full explanation by the Soviet Union, an apology to the world, an offer to make restitution to the relatives of the victims, and assurances that steps will be taken to keep something like this from ever happening again.

Failing that, Mr. Speaker, the repercussions of this tragic event, coupled with the repulsive, repugnant, unyielding statements the Soviets have made, will be felt for years to come.

I strongly support the resolution of condemnation which this House is about to consider. It cannot bring back the lives that were lost. But I hope that in combination with other actions by our Government and other nations of the world that it will cause the Soviets to realize that it is in their interest to reassess their policies, to atone for this catastrophe, and to abide in the future by a standard of human decency, held by the rest of the world, which says that an error in navigation by a commercial airliner is not punishable by death.

□ 1620

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from New Jersey (Mr. RINALDO) for purposes of debate only.

Mr. RINALDO. I thank the gentleman for yielding this time to me.

Mr. Speaker, the cruel act by the Soviet Union in ordering the murder of 269 innocent civilians was barbaric.

Using the most advanced weapons of war, such as a heat-seeking missile, to shoot down a fragile, defenseless passenger airliner is an act of a crazed system.

Mr. Speaker, three deaths among the victims of this act of aggression touched me personally.

One was our colleague, Larry McDonald, who knew perfectly well the Soviets were capable of committing such acts.

The second and third were Ray Petroski, a constituent and one of Dunellen, New Jersey's most popular citizens, and his good friend, Jim Bierne.

Ray was about as peaceful and decent a man as you could find.

He was a good neighbor.

People in my district loved and respected him for his kindness and good heart.

Decent men like Ray and Jim could hardly have imagined they would be the victims of an act of inhumanity that has stunned the world's conscience.

They would have been incredulous to hear the Soviet spokesman, Mr. Gromyko, announce to the world with no shame that his Government's atrocity was not wrong, but under the same circumstances they would do it again.

Obviously we must swiftly and unanimously pass this resolution condemning the Soviet Government for their fiendish act.

Let the President tell the Soviet Government that Congress and the American people want an explanation, an apology, and compensation for the victims' families.

Let the President tell them this will be the agenda in every forum everywhere Soviet delegates sit, until we have a satisfactory response to these demands.

And let the President tell the Soviets, in the memorable words of Adlai Stevenson, that we are prepared to wait for their answer "until hell freezes over."

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentlewoman from New York (Ms. FERRARO) for purposes of debate only.

Ms. FERRARO. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of the resolution.

In the 2 weeks since Korean Air Lines flight 007 was shot down, the Soviet actions has been described by newspapers, speakers, and millions of angered and disbelieving Americans in the strongest possible terms. "Outrageous, brutal, barbaric, murderous." All these are accurate, yet clearly they are not adequate to describe the horror and revulsion we feel at the shooting down of an unarmed commercial airliner carrying 269 innocent men, women, and children.

There are those who have called for strong retaliatory measures on our part. It has been suggested that we cancel the grain deal, break off strategic arms control talks, and discontinue cultural, scientific, and educational exchanges.

It is perfectly understandable reaction. The Soviet action in shooting the plane, and their attitude since, have violated every dictate of decency.

As the resolution before us states, the Soviets attack is "one of the most infamous and reprehensible acts in history." The Soviet pilots made inadequate efforts to warn a clearly marked commercial airliner it was off course. The Soviet Government lied repeatedly, both to their own people and to an outraged world community, about their actions. And they announced their intention to repeat their murderous act if another airliner should stray into Soviet airspace.

The total lack of remorse or guilt, the failure to offer apologies and compensation to the families of the victims, and the sheer arrogance of their attempt to blame the United States for their crime defies belief.

In constructing a response to the Soviet action, we must seek measures that will be effective. Frankly, it is unclear what would be accomplished by some of the harsher actions that have been suggested. Certainly they appeal to a natural wish we all feel for vengeance on those who commit despicable crimes.

But we have tried versions of these proposals before, with no success in altering the Soviets' behavior. Especially with respect to the idea of halting arms talks, the solution is dangerously unsuited to the problem. It is precisely because the Soviets are capable of such brutal and unpredictable acts that we must pursue arms control and arms reductions.

And none of these proposals will bring the 269 victims back.

There are some things we can and should do. Joining in worldwide condemnation of the shooting is critical, and can achieve some good results. The Soviets have finally admitted their actions, owing largely to the continuing pressure from the world community. The Europeans will view Soviet actions in the arms control area with greater skepticism than may have been the case, which could lead to more productive negotiations.

Furthermore, restrictions on Soviet travel to the West are an important sanction. One of the greatest pleasures available to the Russian people is the opportunity to travel outside the U.S.S.R., especially to the West. Denying that opportunity is a most effective means of communicating our revulsion at the Soviet Government's action.

Finally, we must join with other nations in putting pressure on the Soviets to force them to cooperate with an investigation by the International

Civil Aviation Organization into this tragedy. At the same time, we must demand that the Soviets modify their air defense procedures to assure the safe passage of commercial airliners. Basic regard for human life demands nothing less.

The shooting down of KAL 007 is a major international outrage, with global geopolitical consequences. But within the enormity of the total tragedy, there is the human story of 269 individual tragedies.

I am sure many of my colleagues have stories of people they knew, constituents perhaps, or friends, who were on flight 007. I would like to take just a moment to share with you one of the personal tragedies in this awful event that touched my life.

On board flight 007 was Dr. Michael Truppin and his wife Jan. Dr. Truppin was my doctor of 23 years. He delivered my three children. Jan was very much an active partner in his work.

Dr. Truppin was, simply, a marvelous human being. In an age in which the personal touch is too often lost, he retained the basic virtues of humanity and goodness. He cared for his patients with consummate medical skill, but more than that, he cared about his patients as people.

He was a leader, a pioneer, in the use of laser beam research and other advanced procedures to find a cure for cancer and sexually communicated diseases. But his greatest innovation was in having an office in which the foremost idea was to provide the best personal care for his patients. He was more than a doctor—he was a friend.

As I said, Jan was a full partner in developing the "total care" concept which guided the office. Her medical and personal management skills created a system in which Dr. Truppin could most efficiently and humanely serve his patients. As his partner, Dr. Rebecca Nachamie put it at a memorial service for Jan and Dr. Truppin, "They were two people married to the project of establishing the best facility for total care of the female patient."

In addition to his professional skill and energy, Dr. Truppin was a man of widespread and enthusiastic interests. He loved the ballet, and his passion for music and the arts was great.

Michael Truppin was only 57 years old when he met his death on flight 007. He had many productive years ahead of him, and the further contributions he would have made in those years will be missed by his friends, his profession, and his patients. How tragic that the Soviet pilot who shot down flight 007 did not consider the human dimension of his actions.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. LUNGREN) for purposes of debate only.

Mr. LUNGREN. I thank the gentleman for yielding this time to me.

Mr. Speaker, I, like many of the Members here, have just returned from my district. I had a number of town hall meetings, and obviously this was one of the No. 1 issues confronting me in those meetings. Although most of the people who attended those meetings supported the President's effort thus far, there were those who criticized use for not having a strong enough response and wanted us to do more.

I had to counsel them at that time, as many have stated in this Chamber, that we have to deal with the world as it is and we must deal with the Soviet Union. We cannot isolate ourselves from relationships totally with the Soviet Union.

Nonetheless, we have to be aware of the intentions of the Soviet Union, and we have to be aware of the value system that has produced the leaders who reign in the Kremlin at the present time. On that point, Mr. Speaker, I think I would be remiss if I did not put this in the context of debates we have had here on this floor in recent memory where we have discussed what the proper relationship between the United States and the Soviet Union ought to be in accordance with our negotiating stance.

I would just suggest that when we were dealing with the issue, and I have been confronted with this in my district on many occasions, of support of a nuclear freeze, there was always emphasis on an immediate and verifiable freeze. I would just suggest that we ought to look very closely at the question of the possibility of verification agreed to by a government which will not even allow us to verify the findings they have made with respect to a commercial airliner that they shot down, a government that has refused to even allow us to assist, No. 1, in a rescue mission, and No. 2, in the recovery of the bodies of those people after rescue became an impossibility.

Oftentimes as we have discussed this issue in my own district, I have had to tell many of those who advocated the freeze position that I do not believe that the people of the Soviet Union want war any more than we do, but we are not dealing with the average Soviet citizen, we are dealing with their leadership, and we have to deal with them in reality.

Mr. ZABLOCKI. Mr. Speaker, I yield 1½ minutes to the gentleman from Florida (Mr. BENNETT) for purposes of debate only.

Mr. BENNETT. I thank the gentleman for yielding this time to me.

Mr. Speaker, I congratulate the committee on bringing this resolution out. It is certainly a sad thing to contemplate the depravity of a nation through its leaders, such as Russia, that has done this dastardly act, this murderous act.

I have several reactions to it. One of them is one that has just been expressed by the speaker just before me that puts in question whether or not verification is possible with a nation of this nature that does not live by the ordinary mores of humankind and considers murder of innocent people to be something that is just something to be accepted and is inevitable from time to time.

It really makes one sit up and look at the situation as it is internationally when one sees something like that occurring.

Another thing that goes through my mind is the trigger-happy attitude of a schizophrenic country that has so little confidence in its own ability and its own character and its own leadership. It makes me wonder how we are going to plan our national defense, as a member of the Committee on Armed Services, to see to it that we have a structure which will preserve peace in the world, because if we have a nation which is as trigger happy as they are, it means that we have to take extra precaution.

Mr. Speaker, I deplore the acts that occurred. I urge the passage of this resolution and urge that it bring to us whatever knowledge it can as to how we should conduct ourselves in the future.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentlewoman from Nebraska (Mrs. SMITH).

Mrs. SMITH of Nebraska. I thank the gentleman for yielding this time to me.

I rise in support of this resolution condemning the Soviet criminal destruction of the Korean civilian airliner.

This outrageous and inexcusable action has rightly been denounced by all Americans.

This resolution is the least Congress can do in response to this heinous repudiation of internationally recognized procedures for warning aircraft.

I commend the actions taken by the President thus far in response to this Soviet crime against the innocent. Furthermore, I approve of the President's decision not to abrogate the recently approved grain agreement with the Soviet Union.

As much as I believe the Soviets deserve harsh and swift punishment for their action, stopping the grain deal will not hurt them but will hurt the United States. Aeroflot is now barred from overflying Britain, and that hurts the Russians far more than any grain embargo, and the administration is trying to get our other allies to do the same. World opinion continues to rise against the Russians.

I recall how the last grain sales embargo cost U.S. farmers dearly and merely forced the Soviets to turn to other suppliers. The U.S. share of

Soviet imports dropped from 70 to 23 percent and resulted in an estimated loss of $11.4 billion in overall national input, 311,000 jobs, and $3.1 billion in personal income.

More important than the immediate effects of the previous embargo are the lingering shifts in world trade that have helped cause our current grain surpluses and massive farm programs.

Canada doubled its grain exports to the Soviet Union. Australia tripled theirs as did the Common Market countries of Europe. Another competitor, Argentina, quadrupled its grain exports to the U.S.S.R. Not only did they increase their exports to fill the void we left, but they increased their production rate so that they could hold on to their new market share.

Many of my distinguished colleagues have called on the adminstration to impose trade restrictions in retaliation for their despicable action in shooting down the Korean airliner. In rejecting such moves, senior administration officials have stated that the best way to change Soviet behavior is through economic, military, and Western alliance strength. Trade restrictions and embargoes only serve to weaken the imposing country's economy and thus the alliance.

This resolution adequately describes the barbarous nature of the Soviet action and shows the Soviet regime's true colors. The resolution calls for a full and frank explanation from the Soviets for this brutal massacre, and extends the sympathies of the United States to all the families of those who perished on the ill-fated flight and supports their rights to obtain reparations from the Soviets.

I wholeheartedly support this resolution and regret only that stronger action is not within our means at this time.

□ 1630

Mr. BLILEY. Mr. Speaker, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I yield to the gentleman from Virginia.

Mr. BLILEY. Mr. Speaker, the bright glare of daylight often exposes something that was hidden in murky darkness. The explosion of Korean Air Lines flight 007 as it was hit by two Russian missiles has cast a light so fierce that even the magicians of propaganda and disinformation in the Kremlin cannot shut it out.

Murder it was and murder it will always be. How can I, or any of us here in this body, speak of murder. We are not murderers, we have no history or experience of barbarism and criminal murder in our Government. This is sadly not the case with the Government of the Soviet Union and its empire of slavery. The Soviet Government has engaged in before, is engaged in it now, and will be engaged in it tomorrow. The reason that so many people are surprised and suddenly awakening to the nature of the Soviet Union is that this time they did it to us. This time they murdered Americans. They murdered citizens of 13 different nations in one huge ball of flame at 35,000 feet. This time the Soviet Union carried its standard operating procedure beyond the cloak of the Iron Curtain and now they cannot hide the truth from the world that they have so long and so successfully deceived in the past.

The gunning down of our colleague Larry McDonald and 268 other innocent citizens on September 1, 1983, is not an isolated case of wholesale murder, atrocity, and barbarism. Look at the Russian revolution and the civil war that followed it—wholesale murder, atrocity, and barbarism. Look at Stalin's forced collectivization of the farmers in the early 1930's—wholesale murder, atrocity, and barbarism that killed up to 10 million people. Look at the Soviet annexation of Latvia, Lithuania, Estonia, and Byelorussia after Stalin's treaty with Hitler in 1939 and the Soviet occupation of Germany, Hungary, Poland, Czechoslovakia, Bulgaria, and Romania after World War II—wholesame murder, atrocity, and barbarism. Look at Hungary in 1956—wholesale murder, atrocity, and barbarism. Look at Afghanistan today, as we stand here—wholesale murder, atrocity, and barbarism.

As I said, the only difference this time was that they did it to us. They did it in the open. They did it where they could never hide it or claim that it did not happen. People in the West are shocked, outraged, and surprised. I, too, am shocked to my very core. I, too, am outraged to my very core. I am not surprised. This is exactly what our late colleague from Georgia tried to tell us while he lived. Now he is dead. He is dead at the hands of the very government that he tried to expose. How ironic it is that so many people only see the truth because the Soviet Union killed him and 268 other men, women, and children.

This act of the Soviet Union is truly one of the most heinous and despicable acts of terrorism and criminal behavior ever carried out by a government. If this is the Soviet concept of how to act during peacetime, can their humanity and their adherence to human values be trusted when they give their word to the rest of the world? I believe that these murders point out clearer than any rhetoric or warning ever could that we cannot accept anything less than full and complete verifiability in any agreement that we ever make with the Soviet Union. Many people tell us that we should engage the Soviets in talks and treaties that affect their interests as much as ours. Well, I can think of few things that could be of as much mutual importance and sacredness as the inviolability of civilians and the right of people to fly the airways of the Earth without a fear of being blown out of the sky and deliberately murdered because their plane was off course.

My friends, there is no excuse for this action. There can never be any excuse for murder. I am grieved as I know that we all are grieved. I support this resolution. I feel that the strongest possible measures must be taken by the entire world to make the Soviet Union truly understand the importance of what they have done. No action less than an international tribunal that judged the Soviet Government on this crime against humanity can be too strong. I only hope that the fire in the sky that consumed the lives of 269 people, one of whom was only 8 months old, will remain etched in our minds and will force our eyes to remain open so that we will never again forget.

Mr. ZABLOCKI. Mr. Speaker, I yield 5 minutes to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Speaker, I commend the chairman for this resolution.

Over 60 Americans, including a Congressman, and children, most under 4, were killed by the Soviet Government. Our response has been almost exclusively rhetorical: "Short of going to war, what would they have us do," was the President's challenge to his critics. This line implies we should do nothing. To the extent that the President's rhetoric and our country's action are so divergent, the Soviet aggression only serves to undermine our credibility as a nation.

On September 1, 1983, the leaders of the U.S. ferroalloy industry sent a telegram to the President deploring the importation to the United States of Soviet-supplied ferrosilicon. This shipment of 5,365 tons of 50 percent ferrosilicon to New Orleans represents the beginning of a planned market penetration of 50,000 tons of ferroalloys to the United States in the next 2½ years. The Soviet shipment had a declared value of 13.6 cents per pound plus 2 cents tariff. The market for 50 percent ferrosilicon is currently between 36 and 41 cents per pound.

The U.S. ferroalloy industry has been hard hit by subsidized imports in recent years. The industry filed a 232 petition in August 1981 to have the President determine whether our national security is being threatened by the import of ferroalloys. The President has made no determination as yet. In the meantime, the ferroalloy industry remains in a depressed state. That is particularly harmful to Ohio which has about 40 percent of the U.S. capacity to produce ferroalloys containing chromium, manganese, and silicon.

The President can show our country's resolve by banning the further import of Soviet-produced ferroalloys and other products. This would not hurt our own country—"shooting ourself in the foot" as he puts it. Instead, it would help to keep our own people employed and send a sharp message to the Soviet Union. It would also remove a potential threat to our national security: we should not become dependent on the Soviets for a strategically critical material. We should call on the President to ban shipment of ferroalloy.

The United States can take steps to deny the Soviets a market for luxury items such as furs, vodka, and caviar. These seem trivial, but they do supply the Soviets with critically needed hard currency. The Governor of Ohio took forthright steps to stop the sale of Soviet vodka in our State. The President should follow his example and take the kind of steps that demonstrate our rhetoric and our resolve are in harmony. Otherwise we risk becoming a paper tiger.

So let us hit the Soviets where it hurts—let us ban certain Soviet products especially ferroalloys which are so important to our national security. We urge the President to support the 232 petitions—help our own workers, affect the Soviet economy, and protect our national security.

Mr. MILLER of Ohio. Mr. Speaker, will the gentlewoman yield?

Ms. OAKAR. I yield to my colleague, the gentleman from Ohio.

Mr. MILLER of Ohio. Mr. Speaker, I thank the gentlewoman for yielding to me.

Mr. Speaker, I commend the chairman of the Foreign Affairs Committee for bringing forth House Joint Resolution 353 condemning the Soviet criminal destruction of the Korean civilian airliner.

This infamous and tragic incident presents us with a striking example of the Soviet Union and tells us much about Soviet behavior, its system, its view of the world, and of itself. We would be making a serious mistake if we and our allies failed to back up strong words with firm action.

I believe that one of the best ways to take strong action is to stop importing Soviet ferrosilicon. I was shocked to learn that in August the Soviet Union exported 5,365 tons of 50 percent ferrosilicon to the United States. This represented the first such shipment in 9 years. Our own ferroalloy industry is in a state of decline as a result of ferroalloy imports from several producing countries. Moreover, ferroalloys are essential ingredients in the making of high-temperature, corrosion-resistant steels which are in turn used in many defense-related products. It is deplorable that we are hurting our own domestic makers of ferrosilicon and our own national defense by importing this Russian product.

The President has at his hands a method to retaliate against the Russians and at the same time help our own ferroalloy industry. The method to which I refer is a ban on the import of ferrosilicon and favorable decision by the President of the section 232 ferroalloy trade petition that is now before the administration. The ferroalloy industry filed this petition for import relief with the Commerce Department in 1981, but the final determination is pending before the President. A favorable decision would prevent ferroalloy imports from unfairly competing with our domestic industry, and, more importantly, stop the Russians from exporting ferrosilicon to the United States.

The United States must act now to prove that our words of denunciation are not hollow. Stopping imports of Soviet ferrosilicon would be an example of this Nation's resolve to deal firmly with the Russians. I, therefore, urge the President to act favorably on the section 232 ferroalloy trade case before him, and halt the import of Russian ferrosilicon.

Ms. OAKAR. I would just like to say that again we really have an opportunity to do something that is in our own national defense, in our own security interests, and that is banning the Soviet import of ferroalloy that has been dumping in our own industry and supporting the 232 petition which the President has not yet made a determination for.

We hope that he will do what is in the best interests of our national security and show the Soviet Union a lesson and ban this product.

Mr. BROOMFIELD. Mr. Speaker, I yield 5 minutes to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Speaker, I rise in strong support of the resolution and congratulate my friend from Wisconsin, the distinguished leader of the Foreign Affairs Committee, as well as my friend from Michigan.

This resolution expressing our condemnation is appropriate, prudent, and responsible. I say many of the things that are in the hearts and minds—not only of the Members of Congress—but the people that we represent all over this country.

And I want to take a moment to commend our outstanding Ambassador to the United Nations, Jeane Kirkpatrick for her brillant address and firm presentation at New York, I just wish more of our friends at the United Nations had spoken out against this atrocity.

I must say, Mr. Speaker, I also want to commend the gentleman from Michigan (Mr. BROOMFIELD) for his statement pointing out that the President has been equally prudent and responsible and forthright and candid in trying to galvanize international support for the sanctions he has imposed. That effort is critical, because this atrocity is not a matter of the Soviet Union versus the United States, it is the Soviet Union versus the world community, as the gentleman from Michigan rightly pointed out.

In support of the President, I just want to say that I appreciate the fact that he has been nonbellicose, he has been prudent and responsible and measured in his response. I agree with the gentleman from Michigan, we ought to take it a step further, in light of the assertions of Soviet Foreign Minister Andre Gromyko that the Soviet Union reserves the right to continue to attack innocent civilian aircraft. It is unacceptable that Secretary of State Shultz' remarks and reasoned requests at Madrid should be met by such disdain. The gentleman from Michigan suggested that it would be a good idea if the Congress and the administration somehow could lend further evidence of our deploring the Soviet conduct and their behavior in this atrocity and in many other areas by expelling or declaring persona non grata at least one KGB agent in the United States for each of the 269 people who were killed on that flight, one of which incidentally, was an American-Korean by the name of Dr. Park, and his family from Roswell Park Institute in Buffalo, N.Y., one of the great cancer research institutes in this country. We lost a distinguished colleague, Larry McDonald, from Georgia. And there were other victims, some Americans, some Japanese, Korean-Americans, Koreans. And I think the gentleman from Michigan has made exactly a point that I wanted to make: Why allow the Soviet Union to achieve the propaganda and intelligence goals that they are pursuing by tolerating more agents in the United States than any other country would be willing to allow.

Egypt, France, Sweden, and other countries have declared persona non grata to many of these Soviet agents. In fact, the worst thing you can do to a Russian is make him live in Soviet Russia. I cannot think of a better more direct response than to expell an appropriate number of Soviet personnel now in this country for purposes of intelligence activities.

But, I am not trying to engage in one-upmanship. I really do not think that we ought to, as Meg Greenfield pointed out in the morning Post, simply speak from a position of outrage alone. We have to recognize that the Soviet Union is here, as Meg Greenfield says, "like Mount Everest, their features are not exactly a mystery." We all knew what they were like when they invaded Afghanistan, and when they have sent Cuban surrogates around Africa and Central America,

the squeeze on Poland, the treatment of human rights in the Soviet Union. "We have to grow up and confront them—as they are."

We are united in our grief over the loss of our colleague Larry McDonald and the other 268 passengers aboard flight 007; and it is altogether fitting and proper that we should express our moral outrage in a resolution of condemnation of the Soviet Government for this reprehensible act.

But we would dishonor, rather than honor, the memory of those who died aboard the Korean airliner if we allowed our response to stop there.

President Reagan has called upon the Soviet Union to provide a full and truthful accounting of its attack on the civilian airliner. He has demanded restitution for the families of the victims. He has suspended U.S. flights to the Soviet Union. He has closed down Aeroflot operations in the United States. He has called upon our allies for support in these measures. He has requested the International Civil Aviation Organization to conduct an investigation.

I believe that we in Congress must share responsibility with the President to insure that the 269 civilians aboard KAL 007 have not died in vain.

I wonder if the free world does not bear some of the responsibility for the deaths of 269 civilians by our collective failure to react to the Soviets' 1978 attack. I am convinced that a resolution of disapproval, standing alone, will not influence future Soviet behavior one whit.

I was in the Soviet Union over the Fourth of July recess this year, where I had occasion to meet with a number of Soviet officials. In light of the upcoming Madrid Conference, I was most anxious to raise a number of human rights issues. Imagine my astonishment at one Soviet official who dismissed my concerns about Sakharov and Shcharansky and Ida Nudel and others with the comment, "Let's not confuse the flies with the soup. We know you Congressmen have to say these things for public opinion purposes, so let's just put that aside and get to real issues of mutual concern." The "flies" of which he spoke are the individual victims of Soviet violations of human rights. The people aboard KAL 007 now number in their ranks.

It is about time that the Soviets come to understand that our respect for the sanctity of human life is real; that our belief in the rights of the individual is abiding; and that our insistence upon the observance of the precepts of international law is a guiding principle in our relations with all nations.

I believe that we should be doing more to impress the Soviets with the depth of our outrage, to let them know beyond a doubt that they cannot continue to commit atrocities with impunity. I wrote to President Reagan, urging a thorough review of our bilateral relations with the Soviets. I suggested that he recall Ambassador Hartman for consultations. I believe that the Soviets should see an immediate linkage between our perception of their disregard for the most elementary considerations of humanity and our willingness to presume that they enter negotiations on arms control and human rights with honorable intentions.

I believe that the onus is equally on us, the Members of Congress, to perceive the linkage between this terrible and vivid glimpse at the nature of the Soviet regime, and the strength of purpose and policy demanded of the United States as leader of the free world.

Respect for the opinion of mankind is alien to the Soviet leadership. Their entire foreign policy is based on its antithesis—a policy of intimidation. This is the purpose of the Soviets enormous, unprecedented military buildup of the last two decades. Intimidation is the purpose of Soviet power projection in Syria, in Central America, in Africa, in Southeast Asia. Intimidation is the purpose behind the deployment of the SS-20's targeted on Western Europe and Japan. Intimidation is the purpose behind Soviet routine incursions into Japanese and Turkish airspace—the most recent of which occurred yesterday, carried out by the very airwing that carried out the inhumane attack on the Korean airliner. And intimidation will be the fruits of that attack, if the free world in general, and this Congress in particular, fails to respond.

I believe that we must respond to Soviet cruelty in the air by moving against ongoing Soviet cruelty on the ground. Soviet aggression in Afghanistan, Soviet sponsorship of international terror, Soviet aggression through surrogates such as Cuba and Syria and Libya and Nicaragua and Vietnam and Angola, must not go unanswered. We in Congress will be called upon in the months to come to make decisions on vital foreign policy questions that will determine the prospects for the growth of freedom in the world—or its demise. Let us not forget our present consciousness of the reality of the Soviet regime when these vital questions come before us.

□ 1640

If we really want to match the rhetoric with results I think we should support the President in foreign policy areas from Central America to the Middle East.

Who is to benefit other than the Soviet Union if the United States were to leave a vacuum in Lebanon? I am reminded of HENRY JACKSON'S words, and God bless him for his great career and his great contribution to this country and his understanding of the Soviet empire, who said that the Soviets are like burglars in a hotel corridor looking for open doors.

The greatest response that the Congress can make to this is not simply to condemn or to express outrage, it is to support modernization programs for our conventional and strategic armament programs; to negotiate with the Soviet Union at the START talks, from strength and not weakness; to call the Soviets to task for arms control violations; and to respond to the violation of human rights with something more than just rhetoric.

There are many other things we can do, but the Congress now I think is going to be a partner and, if they really want to match their rhetoric with results, then we ought to start supporting the President in his strong foreign policy against the Soviet Union.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes, for debate purposes only, to the gentleman from Louisiana, (Mr. HUCKABY).

Mr. HUCKABY. Mr. Speaker, I, too, want to commend the distinguished gentleman from Wisconsin, the chairman of the Foreign Affairs Committee, for bringing this resolution to the floor in such a timely manner.

The more we learn as time has gone by, the more we can begin to understand some of why this happened. It now seems that a simple computer input error in flight KAL 007 most likely caused this flight to deviate off course. We know that the Russians tracked the plane for over 2 hours. We know that the plane was only 90 seconds from getting out of Russian airspace back into international air space when the Russians shot it down.

We know that a series of errors were made apparently on both sides. It seems now that the execution order probably came from the Far East and not from Moscow, as a result of the experience that the Russian Army hierarchy encountered in 1978.

But, Mr. Speaker, we all know that regardless of the errors that were made on both sides, it is just inexcusable that a civilian airliner would be downed.

Mr. Speaker, a few days later when Mr. Gromyko made the statement that if it happens again we will do it again, should signal to the entire free world, as the gentleman from New York just pointed out, that it is going to be absolutely necessary that the free world deal with the Russians from a position of strength.

Mr. Speaker, in closing let me say I was disappointed that President Reagan met with the Premier of Zimbabwe yesterday and Zimbabwe failed to support the United States in the Security Council resolution on this subject this week.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania (Mr. GEKAS) for debate only.

Mr. GEKAS. Mr. Speaker, the exercise in which we are engaged in this moment is valuable for two purposes, as I see it.

One, to properly reflect, as all of us have, the outrage expressly by our constituents at home who, as true American citizens, are revolted, repulsed, sad, and tragically affected by the events over the Sea of Japan.

But the second and even more valid purpose for this exercise is that we are about the duty of recording this in the annals of the CONGRESSIONAL RECORD to remain in American history for time immemorial. That is an excellent thing for us to do.

Why? Because as historians look back and read the various accounts of what happened over the Sea of Japan they will be able to conclude that with one tragic explosion caused by the Soviet Union there was also exploded for the first time in this century the illumination of the stark contrast between the free world on one hand and the Soviet system on the other.

All of us as American citizens have always known that difference. We know how the free world operates in an open society, with freedoms that were calculated by our forefathers as being the very necessity of life. We have all known that and we could not understand over this generation why other people in the world could not see it and why they would even apologize at any time, even American citizens, for actions of the Soviet Union in the various world affairs that have emanated since World War II.

But now, with that tragic blast out of the sky of our fellow Americans and hundreds of other citizens of the world, for the first time we can say to the world and the world can see and the historians will judge that this free world system of which we are such a vital part is the better way to live, and all those who have to make judgments in the future in international tables and international discussions and debate should know right from wrong and should know which society is in reality the one to nurture; namely, the free world.

I personally have recorded into the CONGRESSIONAL RECORD the names of the victims of that tragedy. They will join in the annals of this event for the historians to see as the victims who through their lives, their blood, have helped in a tragic way to delineate the difference between the free world and the Soviet Union.

Mr. BROOMFIELD. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. FIELDS).

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from Michigan (Mr. ALBOSTA) for purposes of debate only.

Mr. ALBOSTA. Mr. Speaker, I want to commend the chairman and the committee for this resolution.

The downing of the Korean airliner by the Soviet Union was truly a tragic and inhuman act. This barbaric act committed by the Soviet Union has no justifiable explanation and I am outraged at what took place on the morning of September 1. Once again the leaders of the Soviet Union have demonstrated how they value a human life.

Over the years the relationship between the United States and the Soviet Union has had many lows. This most recent event must be considered as a severe blow to any progress these two countries have made in recent years. It is difficult to perceive from a rational point of view, what the Soviet Union was trying to achieve through this terrible act. This is not just a single act committed by this country but too often represents their overall philosophy concerning world affairs and their threat to world peace and stability. The United States and the rest of the international community must respond firmly and in a manner which will demonstrate its strong feelings.

House Joint Resolution 353 condemns the Soviet crime of destroying Korean Air Lines flight 007 murdering the 269 innocent people on board. More than that, this resolution extends the deepest sympathies to the victims' families and friends, while requesting the international authorities to fully investigate this tragedy and develop procedures to prevent a recurrence of such an act.

We in the Congress have the responsibility to the people of this country and to the world to demand a Soviet apology and urge our fellow allies to pressure the Soviet Union for a truthful explanation. I strongly support House Joint Resolution 353 and would hope my fellow colleagues from both sides of the aisle would join in this effort.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. REGULA) for debate only.

Mr. REGULA. Mr. Speaker, there is no question that the Soviet action in shooting down a civilian jetliner is reprehensible, barbaric, and completely beyond the scope of any response to a violation of Soviet airspace.

My colleagues today have eloquently described the tragedy of this action. I would like to make special note of some other features. It is refreshing to recognize that for once we have the strong support of our allies in contrast to the usual indifference to our efforts in problems of this type.

For example, it is my understanding that the United Kingdom has prohibited overflights of Soviet aircraft, thereby adding approximately 1,000 miles to the Soviet-Cuban lifeline. This type of response is very encouraging. It is appropriate and it is effective.

I believe it is especially important that Congress recognize the enormously constructive and courageous role played by the Government of Japan in revealing to the world the extent of Soviet treachery and deception with regard to flight 007. At great risk to their national security Japan released the tape recordings of the Soviet pilot who destroyed the Korean passenger plane.

As a direct result of this release the Soviets have already made changes in their communications systems which now limit substantially the ability of the Japanese to monitor Soviet transmissions. This will entail a dedicated effort by the Japanese Government to regain pre-007 capability. I have total confidence in its ability to do so.

□ 1650

Japan has responded and contributed with complete openness to the investigation of this incident. The Japanese have been forerunners, at substantial security risk, in imposing strict sanctions against Soviet flights as a result of the Korean incident. All navigation of Soviet aircraft within Japan and Japanese aircraft within the Soviet Union has been suspended for 2 weeks. Additionally, all Japanese Government officials are indefinitely prohibited from flying on any Soviet aircraft.

The Japanese Government has been a leader in providing search and rescue missions. I and others here have frequently voiced strong objections to the limited defense contributions of the Japanese. I think in fairness it is important that the role of Japan in this present crisis must similarly be recognized as a major contribution in refuting Soviet lies and in ascertaining the facts. I applaud the courage of the Japanese Government and its leaders in dealing with this tragic event.

Japan joined the fellowship of free world countries in revealing the true nature of this incident to the world. Their contribution should be fully recognized and appreciated. The free world is indebted to the Government of Japan for the decisive actions in the name of humanity.

We are indebted to our allies for taking strong actions as in the case of Japan and the United Kingdom, in joining us and in bringing to the world's attention the character of this action and the enormity of the crime by humanitarian standards committed by the Soviets.

Mr. ZABLOCKI. Mr. Speaker, I yield 4 minutes to the gentleman from Florida (Mr. MICA), for debate purposes only.

Mr. MICA. Mr. Speaker, the cold-blooded downing of the Korean jetliner defies language. Each of us have searched for adjectives to describe this act but we are silenced, really, by its inhumanity. We mourn the loss of our own citizens. Certainly we mourn the loss of our colleague and the loss of all 269 involved in this horrible, devastating incident.

We grieve, and then we act.

The heartless devastation cannot go unanswered. But how do we respond to brutality? The integrity of the American people, I think, demands a response that is conceived out of strength and thoughtfulness, not vindictive, not a gut reaction, but we must join with all civilized people of this world in condemning the outrage and in seeking effective and appropriate reprisals.

As a nation we have learned all too often with harsh experience that unilateral action in an international context all too often is ineffective.

Our answer to the Soviet Union should be part of a collective response conceived with our allies and all civilized nations. Only in unison can we ostracize the Soviet Union as a real enemy of human rights and world progress. Only in unison do I feel that we can make them feel the consequences of their own ugly actions.

Today we will resolve to condemn the Soviet Union but tomorrow and many consecutive days we must impress on the Soviet leaders the folly of their leadership in this action.

It is my belief that economic and political sanctions against Russia will have a strong impact. I urge our President and Members of this body to work with other governmental entities to determine which sanctions we can participate in a collective effort.

We have no desire to bring this world closer to war and we do have every desire to prevent another act of inhumanity.

So I would urge this body to take several actions at a very minimum. First, we are going to vote out this joint resolution and I commend the chairman of the Committee on Foreign Affairs for his action in this regard.

Second, we should support NATO and every international organization in their efforts to support agreements to bring sanctions on the Soviet Union.

Third, I think the Foreign Affairs Committee should try to ferret out Soviet imports for action as well as exports that we, in unison with our allies, can come together and apply real pressure.

I also think we should make it a priority at every international meeting on the face of this globe to raise this issue and to get the Soviets to acknowledge appropriate responsibility for these deaths and to, at least, at the very minimum assure, as they will not do now, that this will not happen again.

Finally, I would say that we should offer every bit of assistance possible to private organizations that are attempting to set forth sanctions such as the airline pilots' boycott, in this incident.

It is clear that we cannot waiver. The Soviets must be reminded of our disapproval. But we must not edge over the limit of reasoning, rational approach in responding to an international incident.

Too many people, I think, depend on the stability and strength of the United States and this will be a demonstration of our national character.

We are a great nation but our true strength lies in our dignity, in our national soul and that is really what separates us from the Soviet Union.

Mr. ZABLOCKI. Mr. Speaker, I yield 6 minutes to the gentleman from Florida (Mr. PEPPER) for debate purposes only.

Mr. PEPPER. Mr. Speaker, when President Roosevelt appeared before the joint session of the Congress and asked for a declaration of war against the Imperial Japanese Government, he described the Japanese attack upon Pearl Harbor on December 7, 1941, as a day of infamy.

Surely the Soviet Union has made the day of August 31, 1983, a day of infamy to be recorded in the annals of history, by destroying heartlessly, without a single semblance of awareness of any spiritual concern, without any evidence of compassion, slaying cruelly, coldly, murderously, 269 people, this deed of infamy will be recorded forever in the annals of time.

Winston Churchill described the Soviet Union, I believe, as something like a riddle within a mystery wrapped in an enigma.

It is extremely difficult to comprehend that a people great in so many ways, who have accomplished many laudable exploits, even in our time, should be so utterly void of humanitarian sentiments or compassion in their heart.

I have read very carefully the newspaper accounts that have appeared about the conversations between the ground control and the pilot who intercepted and eventually shot down that Korean aircraft. They never on a single occasion, never in any respect at all, indicated any awareness or any concern about what might be the nature of what they called the target, the subject that they were concerned about.

And the pilot who shot the missile which downed the airplane and sent those 269 people hurtling down to their death within a period of a few minutes, only said, after he had fired the fatal shot, "The target is destroyed."

□ 1700

Others have described those 269 men, women, and children as being "snuggled up in their blue blankets," on that plane which was coursing through the night toward its destination, probably most of them slumbering. All of a sudden there was a crash, a loud noise. I have tried to imagine what happened on that plane. Evidently its controls were lost as a result of the missile. The plane began therefore a long, large circle, downward and finally, when it got about 2,000 feet from the surface of the water, it plummented down. I imagine it took 5 to 8 minutes. What must have been the pandemonium, the tragedies, the heartaches, the screams of those men, women, and children, all of a sudden shaken from complacency into the very jaws of death.

And all the pilot who killed them said was, "The target is destroyed."

They knew it was a passenger plane. The pilot, in the notices that we have seen, came up alongside the plane, within a relatively short distance of it, and he said, "I have to move back in order to fire the missile. I am a little bit ahead of it."

He could tell from the contour of the plane, twice as big as our reconnaissance plane that had been there, that it was a passenger plane. They knew that very well.

But when Gromyko told our Secretary of State, "Yes, we did it and we will do it again if a plane comes into our air place." No compassion, no concern.

What do you do? How do you deal? I guess when a rattlesnake bites a child, it has no concern or compassion because it has no conscience. How do you deal?

How do you deal with a human being devoid of a human conscience?

I, therefore, Mr. Speaker, recommend two things in addition to the excellent provisions of this resolution. First, let us try to get the world community of aviation to reject the Soviet Union from any participation in international civil aviation unless they commit themselves, first, to make an apology for what they have done, and second, in the future to abide by the humanitarian regulations of the international air community.

Second, let us demand reparations be paid to the families of the deceased by the Soviet Union, and if necessary, let us find a way to enforce our demands that those reparations be paid.

At least let us demand those two things, besides the strong denunciation that has come from this country and from the decent countries of the world. I hope some day Providence may change the Russian Government

into a government with a conscience and a character.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin (Mr. ROTH), for purposes of debate only.

Mr. COUGHLIN. Mr. Speaker, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Speaker, I rise in support of the resolution.

Mr. Speaker, on September 1, I sat for some time with 17-year-old Robert Kohn, entering his senior year at Lower Merion High School. Suddenly, he had no parents. His parents, Mr. and Mrs. Allen Kohn, of 637 Harvard Road, Bala Cynwyd, Pa., had been aboard Korean Air Lines flight 007.

More recently, I have been trying to obtain information on social security death benefits for Mrs. Aiden Lombard, of Hatboro, Pa., now a widow with four children. Her husband was another victim of Soviet brutality together with his brother who is survived by his wife and two children.

The resolution before us can never adequately address their losses or their grief. Nor can anything that Congress or the Nation does.

The downing of this unarmed, defenseless civilian airliner was an act of barbarity, whether a calculated Soviet policy or the isolated act of an individual commander. Americans of all political persuasions and people throughout the world continue to express indignation over this wanton and callous act. As the lies continue to flow out of Moscow it becomes apparent that the Soviet military commanders intentionally were responsible for the massacre of 269 innocent civilians. These revelations clearly illustrate a number of terrible truths about the Soviet Government and its system. Perhaps the most terrible truth is that the Soviet leaders do not share, nor do they care for, the basic human values that distinguish a civilized society.

Mr. Speaker, I hope the deaths of those aboard flight 007 will not be lost on the American people or the Congress and that this dastardly act will serve as a constant reminder of the true nature of the Soviet regime.

Mr. ROTH. Mr. Speaker, I rise in support of this resolution. We have often denounced the Soviets. The Berlin Wall, Afghanistan, Czechoslovakia, Hungary, all loud denunciations. And what has come of it? Nothing!

This resolution is important. It is going to assuage our consciences, and it will send a message, however, weak. If we are candid and frank with ourselves, we will admit that not much else is going to come from it.

The stark facts are that the Soviets are getting stronger and stronger every day. And as the Soviets get stronger, they are going to be more belligerent.

We are not going to have fewer 007 flight incidents, we are going to see more. Weakness in the face of a bully promotes aggression. All history tells us that.

I hope this debate today does not come under the heading of "How quickly we forget."

I commend the chairman of our committee and the ranking minority member for introducing this resolution. But we cannot mesmerize ourselves into believing that something will come of this resolution. We are going to have more instances like this.

I ask the Members of this body, if you were an adviser to Andropov, would you today advise him that we have more to fear or less to fear from the West, from the reaction of the West? It is like finding a murderer on the street here in Washington, D.C. And everyone would tell him, "We don't like what you have done. It is reprehensible conduct." But we will let him walk out the front door. Would he be deterred from murder the next time? I do not think so.

I think that is what we have to address today. We in this Congress, have to do more than just pass a resolution, because a resolution is not going to be enough for this heinous conduct.

I believe that it is important for the United States to demonstrate to the Soviet Union that Congress will not forget the brutal, inhuman, destruction of South Korean flight 007. If anyone has any doubt of the meaning of this incident, think for a moment what it must have been like for our colleague and the other 268 men, women, and children aboard that plane after the first Soviet missile hit the aircraft. It did not explode instantaneously in the air but remained aloft for several minutes. Imagine the terror and the anguish of those on board and the death that was immediately in store for them in the icy waters below.

Many have asked today, What can the United States do? There is much that we can do. First, it means expeditious consideration and passage of the defense authorization bill. Second, it means vigorous oversight of arms control negotiations to insure that any agreement contains adequate safeguards, and is fully verifiable, in order to protect our national security. Third, we must enact provisions to the Export Administration Act which preserve flexibility for the President in the conduct of foreign policy and contains adequate safeguards to prevent the diversion of advanced and strategic technologies to the Soviet Union.

Mr. Chairman, last summer the House Committee on Foreign Affairs approved a series of amendments to the Export Administration Act. Many of these amendments greatly improve the operation of that act but there are others which go in the opposite direction. They eliminate export licensing for U.S. shipments to Western Europe and Japan. They eliminate export controls on strategic goods and technology on which the United States maintains unilateral controls.

The amendments impose unreasonable negotiating deadlines—6 months—in which the President must negotiate the elimination of foreign availability of controlled exports. Amendments to the Export Administration Act, pending before the House, also strip away the President's authority to apply U.S. export controls to foreign subsidiaries and affiliates of U.S. companies.

Mr. Chairman, these provisions must be changed. I cannot believe that with the memory of the 269 fresh in our minds that the House would enact provisions which would make it exceedingly difficult to enforce our export control laws and drastically weakens the President's ability to impose foreign policy export controls. After all this is one of the few nonviolent means the President has to retaliate and express revulsion against acts of other States which violate all standards of decency.

There is much we can do and one of the most important measures is to modify and improve the Export Administration Act when it comes before the House.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from North Carolina (Mr. VALENTINE).

Mr. VALENTINE. Mr. Speaker, I rise in support of the resolution.

Two weeks ago the entire world community was shocked and horrified by an incident of unparalleled brutality, when the Soviet Union's Armed Forces fired an air-to-air missile at Korean Air Lines flight 007, causing 269 men, women, and children to plummet to certain death in the Sea of Japan.

This violent action against an unarmed passenger plane is an example of air terrorism that all Americans deplore. Even though all the facts are not yet known, and may never be, it is evident that the Soviet Union has shown grossly irresponsible, indefensible, and callous behavior.

But this action cannot be called exceptional. On the contrary, it reflects "business as usual" for the Soviets, and is indicative of their total contempt for the people of other nations, as well as for their own people.

The President of the United States has shown good judgment in portraying this tragedy not in terms of an East-West struggle, but rather as a serious breach of civilized conduct which all nations should condemn.

Mr. Speaker, this resolution shows that we in the Congress share the out-

rage of the American people and demand a satisfactory response from the Soviet Union.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. PATMAN), for debate purposes only.

Mr. PATMAN. Mr. Speaker, I strongly support the joint resolution which we have before us. It expresses the outrage, not only of this body of Congress, and not only of our entire government, but that Americans and civilized members of the world community. Indeed, all of humanity is insulted when such a heinous act as the murder of innocent people—adults, children, and even babies—is carried out with such contempt for human life and with such cold and calculating ruthlessness.

This resolution sets forth, in dramatic understatement, the specific and uncontrovertible elements of the Soviet Union's crime which history will record. The resolution rightly demands apology and reparations, because there can be no excuses for the Soviet Union's actions—for its calm tracking of the Korean airliner for 2 hours, for making no diligent effort to assist what was clearly marked as a civilian passenger aircraft, for failing to ascertain its intentions before firing upon it, or for lying and attempting to conceal the truth from the world. Surely this was, in the resolution's terms, "one of the most infamous and reprehensible acts in history."

A government which deliberately takes such a course of action is not a government which respects civilized rules. It is a government which answers honest error with brutality and which exercises restraint only in the presence of countervailing strength.

It may now be that our constituencies and the people of other civilized nations are more likely to accept the idea that the Soviet Union cannot be relied upon not to attack where it perceives weakness. If we here resolve never to invite such an attack, but to maintain the strength to prevent it, then perhaps the tragic sacrifice of these innocent lives will in some meaningful measure serve the future.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. MCCLOSKEY), for debate purposes only.

Mr. MCCLOSKEY. Mr. Speaker, I wish to join with my colleagues today in a unified statement of outrage over the actions of the U.S.S.R. which have cost the lives of 269 innocent men, women, and children. The President has quite eloquently stated our country's anger and condemnation of this atrocity. The Soviet Union has revealed itself as a nation with utter contempt and scorn for world opinion.

Very soon, we will be able to vote on a resolution condemning the Soviet Union for this heinous deed. However, to limit our actions to words or a slight inconvenience in the Aeroflot air schedule will only invite the further contempt of the Kremlin. For this reason, I am prepared to work with my colleagues to make changes in existing credit relations with Communist nations which will achieve effective leverage. It would do no good to embark upon sanctions which are not politically sustainable. But we can make a difference if we truly impede Moscow's economic plans. Nationalizing the extension of credit to the U.S.S.R. and its satellites is one approach which should be examined.

For too long we have concentrated only upon the military component of the Soviet threat. The fact is that the web of East-West economic relations has been used by the Russians as a means of blocking effective political action and reprisals by the West. I hope that my colleagues will join with me in seeking ways to reorganize our economic relations with Communist countries. Policy in this area is too important to be left to international bankers.

□ 1710

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes for debate purposes only to the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. Mr. Speaker, I rise in strong support of this resolution, and I would like the Members of this House to consider what the real message of the shooting down of the KAL airliner is. To me, the message is to civilized people the world over to rethink their own positions and their government's positions on ongoing Soviet actions in Afghanistan, in Southeast Asia, in Africa, and here, close to home, in Central America, and to provide support—moral, political, and material, to those opposing the Soviets, their proxies, and their puppets.

Later on in this session we will all have a chance to prove the extent of our outrage. We will be talking about issues of far deeper concern to Soviet leadership and Mr. Andropov than their international air traffic. We will be talking about major defense issues. We will be talking about countering the Soviet international fighting force and their proxies in Central America, right close to home; we will be talking about helping those fighting Red army invaders in Afghanistan. Right here is the place where righteous indignation should be focused to make a real difference.

Is it too much to ask for greater unity and less partisan posturing on these critical issues now that the symbol of KAL flight 007 is so vividly impressed on our senses?

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. Mr. Speaker, a shudder went through my body when I first heard of this coldblooded act, not only because of the Soviet action, but by how close we are to the horror of total holocaust. The proper response is not further military buildup. We must, instead, determine means to lessen the possibility of such paranoiac reactions as exhibited by the Soviet military.

I myself believe we should also not continue the grain sales to the Soviet Union so long as this issue is not resolved and so long as our grain supplies are burning up in the Middle West.

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute, for debate purposes only, to the gentleman from Florida (Mr. BILIRAKIS).

Mr. BILIRAKIS. Mr. Speaker, I am supporting this resolution condemning the actions of the Soviet Union because we must have a permanent record so that we will never forgive and forget the events leading up to and following the brutal attack by the Soviet Union on an unarmed civilian airliner. We must never forget that 269 innocent people, including a colleague of ours, were just wiped off the face of the Earth by a nation that has time and again shown that it does not value human life.

How can we forgive a nation that says it committed this act in order to protect its boundaries? Protect its boundaries from what? Whom are they protecting? Their people? Their military installations? Their secrets?

Mr. Speaker, we must draw the line. We must recognize that we are dealing with a nation that cannot be trusted. We must remember that the Soviet Union is the nation that crushed freedom in Poland, Hungary Czechoslovakia, and Afghanistan.

We should never forget what the Soviet Union has done, what that nation's leaders have created as a national policy. And we can never forgive them.

Mr. ZABLOCKI. Mr. Speaker, I yield 3 minutes, for debate purposes only, to the gentleman from Michigan (Mr. CROCKETT).

Mr. CROCKETT. Mr. Speaker, like all Detroiters and people throughout the world, I was shocked and saddened by the shooting down of Korean Air Lines flight 007 by a Soviet military aircraft on the night of September 1, 1983.

The tragedy was brought home further by the fact that three of my constituents were on that plane—Jessie Slaton, Margaret Zarif, and Joyce Chambers. I had known Jessie Slaton for many years, as one of the most conscientious and respected members of the bench. Margaret Zarif and Joyce Chambers, while I did not have the opportunity to know them personally, had each contacted my office on

issues of concern to them. They were good and caring members of our community, and their deaths diminish us all.

I would like to believe that these women, though, and the others on that ill-fated plane, would be as horrified as I am by the eye-for-an-eye attitude being espoused by many people, both in and out of our Government, and by the use of this incident to try to increase our military arsenal. I think they would be sorry to see the frightening dimension of vengeance being uncovered by the incident, and would ask us to honor their memories in other ways.

On September 8, I spoke to the students and faculty of Anderson College in Indiana about the incident and its effect on U.S. foreign policy. I shall include that speech for the RECORD. I hope that the victims of Korean Air Lines flight 007 would agree with what I said on that occasion, and that they would want us to rededicate ourselves to the search for a lasting and just peace and permanent disarmament—so that we can insure that such an incident will not happen again.

CONGRESSMAN CROCKETT REMARKS ON KOREAN AIR LINE TRAGEDY

WASHINGTON, D.C.—Congressman Geo W. Crockett, Jr., of Michigan, today released the text of his remarks to the students and faculty of Anderson College, Anderson, Indiana on Thursday, September 8, 1983, concerning the Korean Air Lines tragedy. The text of his remarks follows:

As each of you is aware, we meet here today amid the fallout of a serious international incident—the destruction of a Korean civilian aircraft that had accidentally overflown the territory of the Soviet Union.

We have heard much rhetoric in the last week, since this tragedy occurred. We have heard many people, both in and out of government, express their anger and outrage that such an incident could occur. We have heard the righteous anger and bewilderment of the grieving families, as they struggle to understand why their loved ones perished. We have heard the words and gestures of sympathy, and the prayers for the victims.

But, beneath the outrage and shock of the incident, there is also a disturbing shift of political sentiment, away from the position of cooperation and arms reduction, and back towards the Cold War posture that has characterized the Reagan Administration's approach to the Soviet Union.

As Congress comes back from the District Work Period next week, I'm afraid we are going to see a considerable surge of support for programs like the MX missile and the B-1 bomber, and the Defense Department budget—a surge brought about by nothing more than anger and frustration over the Korean airlines tragedy. We will see conservative groups and Members of Congress saying "I told you so!" and seeking support for their militaristic spending programs.

But we must not allow our foreign policy to be built on anger and frustration. We cannot allow ourselves to make this incident into the foundation of a new tower of weapons and military demagoguery.

"The Soviets made a terrible international blunder in shooting down an unarmed civilian aircraft. I think everyone who is aware of this incident knows that. But, we have been so involved over the years in trying to make the Russians out to be cold-blooded murderers that we seem to have given this incident a life of its own. For, just as the Russians have claimed that they thought the plane was a spy plane for the United States—a scenario that, although wrong, fits in with their view of the world and of the United States' actions—so too are we now ignoring the clear probability that the downing of the aircraft was an unfortunate mistake, occasioned more by a knee-jerk reaction to a mutual nuclear way hysteria, instead of the more militaristic and right-wing scenario that the Russians deliberately took aim at a civilian aircraft and fired their missiles to kill those aboard.

"If Congressional investigations of our Central Intelligence Agency have taught us anything, it is that the CIA's covert operations do not rule out the use of civilian aircraft for reconnaissance purposes, including the aircraft of a surrogate nation like South Korea.

"Whatever the motivations, whatever circumstances led to the firing of the missile, whoever gave the order—the shooting was a grave error, and the loss of innocent lives grieves us all.

"But, out of this tragedy we can learn something also—that the years of weapons build-up and increases in tension between the United States and the Soviet Union have built a hair-trigger into the mechanisms of defense and national security.

"The newscasts after the incident showed many on-the-street interviews with people around our country, giving their reactions to the tragedy. Some, unfortunately, expressed their willingness to go to war with the Soviet Union over the incident. So the hair-trigger also applies to us. But, we must ask: Are we really willing to destroy our world for lack of a Soviet apology?

"I hope this incident will bring into focus what many of us in Congress and around the country have been trying to say for many years—that the growth of military arsenals and the insistence on military 'solutions' to problems will never bring peace to our world. It will only bring more death, and more accidents, and more civilian casualties.

To give you some small sense of the enormity of the military system, and the dangerous situations that could spark conflict, consider:

First, that between the USSR and the United States, we have more than 50,000 nuclear weapons, with millions of times the destructive capacity of the Hiroshima or Nagasaki weapons. In addition, many of these are outmoded weapons in unstable condition. We also have submarines, aircraft carriers, missiles, bombers, tanks, mobile launchers, silos and dozens of other vehicles, more than enough to destroy our world several times over.

Second, the Pentagon budget under the Reagan Administration has ballooned to $1.7 Trillion for the next four years. This amounts to more than one and one-half Billion dollars every day. The Defense Department authorization for this year alone calls for $177.9 Billion just for military hardware and services, including MX missiles, B-1 bombers and nerve gas.

Finally, the fact that the United States has become the premier arms merchant to the world. We sell, give, and loan tens of Billions of dollars worth of weapons to countries and insurgent groups all over the world each year.

Time after time, when we had the chance to make a difference and work for peaceful resolution of international problems and conflicts, we have instead chosen the military solution.

For instance, in El Salvador, the Administration has supplied massive U.S. military assistance and has sent U.S. military personnel as 'advisors'—the latter in clear violation of the War Powers Resolution—even though the government of El Salvador has a long and bloody track record of human rights abuses; has never implemented the land reform programs that brought it to power; and has consistently postponed elections that supposedly gave it the air of a democracy.

Another clear example is in Nicaragua, where the people of that nation a few years ago overthrew the hated American-supported Somoza dictatorship, and where today the U.S. is supplying both covert and overt U.S. military aid to the Somoza-backed rebel factions now seeking to topple the government. Although the House recently voted to cut off the covert assistance, I, and many of my colleagues, refused to vote for the legislation because it still contained more than $80 million in discretionary funds that could be used openly to seek the overthrow of the Nicaraguan government.

Perhaps the clearest example today of our status as arms merchant is in the Middle East, where our position has been to provide virtually unlimited weapons to any nation or faction espousing anti-communist goals—meaning that more than $2 billion worth of U.S. arms have gone to the principal forces in the area. We are in many cases supplying weapons to both sides in conflicts in the Middle East, playing each side against the other in our rush for profits for our military-industrial free enterprise complex.

And now, with four U.S. Marines killed in the fighting in Lebanon—Marines who would not be in that positions had the Administration complied with the War Powers Resolution—the inevitable inclination will be to pour more money and more military hardward and personnel into the Middle East situation, further raising the possibility of direct U.S. involvement in the complex problems of the area.

Some of the other troubled areas where U.S. militarism and short-sighted policies have dominated include:

In Africa, where the Reagan Administration's preoccupation with anti-communism has blinded it to the atrocities of South Africa and its operatives and has set back our relations with Black African nations at least a decade;

On the airwaves in this hemisphere, where 'Radio Marti', the Reagan Administration's proposed $28 million project to escalate the cold war with Cuba, would ram the 'truth' down the throats of the Cuban people;

In Europe, where we have strained our relations with our Western allies by our hardline stance on issues like the Euro-Soviet gas pipeline and the deployment of American Pershing II missiles on the continent.

It's this kind of behavior that has contributed to the tensions in the world today. We can't preach peace if we're not going to live it.

The mindset illustrated by these few examples cannot be allowed to continue in our foreign policy.

"From the politicization of our economic and developmental assistance programs, to the enormous increases in military assistance and weapons sales to sensitive areas, to

the reluctance to come to grips with the nuclear arms reduction issue, we have allowed the world to drift again towards the brink of large-scale conflict.

"The easy temptation, in the wake of the tragedy of the Korean airliner, is to put the incident into our old Cold War framework and capitalize on it as simply another illustration of the inhumanity or brutality of the Soviet people—and then answer the attack by voting more money for missiles and bombers and other weapons.

"But, let us acknowledge for a moment that maybe our own preoccupation with 'defense' and military solutions contributed to the climate that allowed the mistake to be made. And let us acknowledge that, whatever the immediate results of our attempts to secure an apology from the Soviet government, we cannot allow the incident to obscure our goals of world peace and the reduction of tensions.

"Such a goal will not be achieved through the bitterness of revenge, or the stirring up of old fears and hatreds. We won't bring back the people on that plane by throwing Russian diplomats out of the United States, or by reneging on international agreements.

"Our goal must be to go beyond this incident, and to somehow come to grips with the fact that we must live together on this planet in peace.

So while we mourn the dead, let us also renew our vow that we shall do everything possible to stop the deadly march to world destruction and work together to reduce the arsenals and make a permanent and just peace."

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute, for debate purposes only, to the gentleman from New York (Mr. LENT).

Mr. LENT. Mr. Speaker, I rise in strong support of this resolution expressing the outrage of the United States over the unconscionable action of the Soviet Union in shooting down the South Korean 747 airliner, 269 innocent civilians died as a result of this atrocious act.

Mr. Speaker, I fully support the resolution's demand for full compensation for the families of these innocent victims and the call for the Soviet Union to apologize for its actions and promise to abide by the recognized internationally established procedures designed to prevent such tragedies. This resolution is a necessary expression of the sense of outrage that we feel, and our determination to make the Soviet Union suffer the consequences for its action.

Having stated this, Mr. Speaker, I feel compelled to add that realistically we should not expect these measures to persuade the Soviet leaders to change their policies. It is an historical fact, that, from its seizure of power, the Communist regime ruling Russia—regardless of who exercised the power—has never hesitated to take actions which have transgressed the standards of civilized conduct and which have shocked and appalled the world.

From Stalin's order 60 years ago condemning millions of Russian peasants to death by starvation, to this month's destruction of the South Korean airliner, the Soviet regimes have demonstrated a total contempt for the basic human values which are the hallmark of a civilized society.

Red armies have—in the past four decades—invaded and destroyed free nations in the Baltic and in Eastern Europe; have brutally smashed rebellions in Hungary, Poland, Czechoslovakia, and East Germany, and are presently engaged in a bloody campaign to wipe out rebel forces in Afghanistan using chemical and biological weapons outlawed by international treaties.

When will we learn to take into account this horrifying record of truly monstrous inhumanity in our judgments of the U.S.S.R? I find it ironic that those who scoffed and snickered at President Reagan's description of the Soviet Union as an evil empire are now criticizing him for not taking stronger action against the Soviets for destroying the airliner.

In truth, Mr. Speaker, history shows us clearly the Soviet Union is an evil empire built upon the principle that any act of inhumanity—no matter how brutal or how costly in human life—is justifiable if it furthers Communist goals. We must always keep uppermost in our minds the undeniable fact that the Soviet Union is controlled by a ruthless regime, dedicated solely to its own interests.

Recognizing that fact is essential to realistic dealings with the Soviet Union. Wishful thinking that the Kremlin leaders are really pretty much like us will only bring harm to us and our country.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute, for debate purposes only, to the gentleman from Wisconsin (Mr. MOODY).

Mr. MOODY. Mr. Speaker, I rise in support of the resolution.

□ 1720

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. HUNTER) for purposes of debate only.

Mr. HUNTER. I thank the gentleman for yielding this time to me.

Mr. Speaker, I want to remind my colleagues that the real message of this action was that the Soviets respect actions and not words and that the real resolve of this Congress will be manifested in our votes on the defense appropriations bills and the defense authorization bills that will shortly be before Congress. Also, the technology transfer legislation that would cause literally a hemorrhage of Western technology to the Soviet Union will soon be before us. It is then, my colleagues, that we can show the Soviet Union that this Congress is capable of actions as well as words.

Mr. Speaker, I rise today to join my colleagues to express outrage at the brutal Soviet attack on the unarmed Korean airliner. This barbaric murder of 269 innocent civilians is but one more indication that Soviet policy toward the free world has not softened and that Soviet leaders have respect only for strength. I hope my colleagues remember this when called to vote on the Defense Authorization Act and the Defense Appropriation Act. We cannot afford to lose our resolve to strengthen our Armed Forces to the point where they deter the Soviet threat—a threat made all the more clear by the Soviet's callous disregard for human life. It is our duty to have a full awareness of Soviet military power and I think this incident shows us how they use this power.

I hope my colleagues also remember the Soviet's respect for strength when called to consider the Export Administration Act Amendments of 1983. These amendments would make it easier for the Soviets to acquire U.S. technology for use in their military machine. In fact, virtually every new Soviet weapons system is made, at least in part, with the aid of Western technology or equipment. I would hope that when we consider these amendments, we will not forget today's resolution and the reason behind it.

And so Mr. Speaker, I rise in support of this resolution condemning the Soviet attack on the Korean airliner. But I would hope the real resolution of this incident is manifested in our votes on national defense and on technology transfer.

Mr. COURTER. Mr. Speaker, will the gentleman yield?

Mr. HUNTER. I yield to the gentleman from New Jersey.

Mr. COURTER. I thank the gentleman for yielding.

Mr. Speaker, I stand also in favor of this resolution. I think there is something we can do in addition to what the President suggests. I think we should use one of the most effective foreign policy tools we have. I believe we should increase funding for such uses as the Voice of America and our international broadcasting system so we could broadcast to the whole world, including inside the Soviet Union, the truth as to what happened here and the truth with regard to Soviet actions around the world.

Mr. Speaker, a great deal has been said here this afternoon on the subject of our Government's sanctions against the Soviet Union in response to the Korean Air Lines massacre. I note that there seems to be considerable bipartisan sentiment in favor of increasing the sanctions, to take more steps that will have a tangible effect on the Soviet leadership.

As we search for ways to impose sanctions on the Soviets, though, we are frustrated by the fact that so many of the actions that we have to

choose from would impose a cost on us as well, by imposing costs on our own economy or by causing division and dissension in the Western alliance.

I count myself among those who would like to do more in reaction to this latest Soviet atrocity, and I would like to suggest to my colleagues an action that we can take on our own initiative. My proposal is a peaceful one, it would impose a minimal cost on our economy, it would cause no problems among our allies, it would have the support of the President, and it is proven to have an effect which the Soviets do not like.

My proposal, Mr. Speaker, if for Congress to make a substantial, serious and sustained effort to modernize and increase our international broadcasting capability.

We have all heard the stories about the poor shape that our international radios are in. We know that the Soviets spend more to jam our broadcasts than we do to broadcast our message worldwide. We know that the Voice of America is using equipment that is decades old—in one case, we are using transmitters that were made over 40 years ago and captured from Nazi Germany.

Rather than dwell on these stories, I would like to point out the excellent job done by our radios to get the word of the airline massacre into the Soviet bloc. As soon as Secretary Shultz made his first announcement to the world about this event, the Voice of America stepped up its broadcasts by adding frequencies and by broadcasting more hours, so that the Soviet public would be able to learn of the crime that had been committed in its name. We should all be proud of this work, and we should take note of the fact that it added some domestic pressure to the great international pressure that was already bearing down on the Soviet Union, demanding an explanation.

These broadcasts prompted a massive Soviet jamming effort, which is testimony to the Soviet fear of the truth.

Mr. Speaker, this incident and the response of the Voice of America, demonstrate that the truth can be a great weapon in situations such as this—a weapon that helps the cause of peace and international understanding. Increasing this capability is one of the most constructive things that can be done for our foreign policy.

Unfortunately, in a time when we should be acting vigorously to modernize and improve the radios, exceeding the President's budget requests, it now appears that the House and Senate are headed toward a reduction of the President's budget request for fiscal 1984. I urge my colleagues to work together to reverse this action, and to support one of the most peaceful and effective foreign policy tools that our Nation possesses.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. SEIBERLING) for purposes of debate only.

Mr. SEIBERLING. I thank the chairman for yielding this time to me.

Mr. Speaker, I rise in strong support of this resolution. I have spoken on this before in my hometown media. Let me simply say that even if we should concede, for the purposes of argument, that the Soviet military did not recognize that this was a civilian airliner at the time it was shot down and thought it was a military intelligence plane, they now know that it was a civilian airliner. They know that 269 innocent civilians were killed. In such circumstances, a decent group of national leaders would come before the world and say, "We made a mistake. While we always will defend our country, we apologize for the mistake and we will pay reparations to the families and others who were injured."

I still think that even at this late date, if the Soviet leadership came forward in that manner, as I would expect our Government to do if we were in similar circumstances, they would completely turn this thing around and show that they are not simply a hardline group who are unspeakably callous in their attitude toward the destruction of innocent human life.

I think we ought, at the same time as we try to press them to pay reparations and to avoid such incidents in the future through the kinds of procedures that the President has proposed, suggest to the Soviets that they could give a significant boost toward world peace and better international relations by showing that they have some contrition and some sense of error on their part.

I will say one other thing. I do not agree that we should judge all the issues of the defense budget on the basis of this incident. The question of MX and other matters in the defense budget must be judged on the merits as to whether they are needed from a national defense standpoint, bearing in mind the limitations of our economy and Federal budget, and as to whether they will increase or diminish the risk of war.

If anything, the Korean Air Liner atrocity, by revealing the rigid, even paranoid, Soviet military mentality, emphasizes the precariousness of the situation humanity finds itself in as a result of the nuclear arms race. In these circumstances, the addition of an unnecessary, destabilizing weapon such as MX can only heighten the chances of nuclear holocaust being brought on by some military or civilian official somewhere overreacting to some perceived threat, just as the Soviets did in the case of flight 007.

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. BURTON) for purposes of debate only.

Mr. CLAY. Mr. Speaker, will the gentleman yield?

Mr. BURTON of Indiana. I yield to the gentleman from Missouri.

Mr. CLAY. Mr. Speaker, I rise in support of House Joint Resolution 353 condemning the Soviet Union for committing a heinous crime against humanity.

The brutal and barbaric actions taken by the Soviet Union have drawn worldwide outrage and personal torment for the families and friends of the 269 human beings who were murdered when a Russian fighter pilot blew up Korean Air Lines flight 007 on August 31, 1983.

In its wanton attack on a commercial airliner, the Soviet Union has again demonstrated the highest disregard for human rights and a ferocious appetite for destroying life.

There is absolutely no evidence to suggest that KAL 007 was guilty of any crime or action short of human error. It is simply incomprehensible that the Soviet Union demanded the lives of 269 innocent people in reparation for some blameless human error. There was plainly no cause for attack. No threat was made against the Soviet Union. Other courses of action could have been pursued. Indeed, any other course of action would have been far more appropriate. But, the Soviet Union chose savage slaughter.

This ruthless massacre has benefitted no nation, and the Soviet Union's repeated efforts to escape responsibility cannot be condoned. Our Nation has already demonstrated more tolerance than the Soviets showed to the passengers of flight 007. This body has no choice but to denounce the Soviet Union for its brutal strike against humanity and demand that she make reparations to the rest of the world. I urge my colleagues to approve this resolution.

Mr. BURTON of Indiana. Mr. Speaker, I do not think that the words we say today are going to carry the impact that they should. I read an article recently by George Will. He says, "The shocking thing is how shocked people are." And we really are shocked and it surprises me, because since 1917 the Soviet Union has killed 20 million of their own people. That is 800 people per day. In Afghanistan they have killed hundreds of thousands of innocent people. Yet, we did not become outraged until this, their latest barbaric act—that of killing 269 innocent people.

We should be outraged daily by what the Soviet Union does. In Kampuchea (Cambodia) they are still dropping yellow rain on innocent people and killing them. In Hungary and

Poland and Czechoslovakia they have killed innocent people, and yet we are surprised at what they did just the other day.

We should cut off all loans to Communist countries and let the Soviet Union divert their resources away from military to economic problems and let them spend their money on the people they are controlling instead of spending their money trying to control the rest of the world with additional military might.

Should we be outraged? Yes.

Should we be surprised? No.

Should we be prepared in the future? Yes. Yes. Yes.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Speaker, I rise in support of the resolution.

I join my colleagues in condemning the brutal and callous destruction of Korean Air Lines flight 007.

The House must denounce this heinous act. I therefore strongly support House Joint Resolution 353.

Mr. Speaker, the Permanent Select Committee on Intelligence—both members and staff—has made a diligent effort to ascertain all that intelligence can tell us about this tragedy.

I draw several conclusions from what the committee has heard.

First, the account provided by our Government is accurate and leaves out no relevant details.

Second, the account given by the Soviets in several respects is untrue and it must have been obvious to the Soviets that it was untrue.

Third, I see in all the evidence available that the Soviet Union made no reasonable effort, and perhaps no effort to speak of, to identify KAL 007.

My own assessment is that the Soviet Union in cold blood determined to shoot down this unarmed airliner as soon as its fighters intercepted KAL 007.

Mr. Speaker, several false accusations also have been made concerning the flight 007 that need to be dealt with unequivocably.

First, flight 007 was not on a U.S. intelligence mission and no intelligence use was made by the United States of flight 007.

Second, no U.S. reconnaissance aircraft made any use—by shadowing or any other maneuver—of flight 007.

Third, we know of no intelligence use of flight 007 by the Korean Government; we believe its denial of such use and; we can conceive of no probable or useful gain to the Koreans from such use.

The United States does not need, and South Korea could not use any information that could have been gathered by KAL 007.

The virtually nonexistent gain, the appalling risk and the 1978 Soviet downing of another Korean Air Lines plane all suggest the total unlikelihood of a Korean intelligence mission for KAL flight 007.

Mr. Speaker, one last point is important.

The Armed Forces of the United States would not have reacted as did the Soviet armed forces in this case.

I say this not out of conviction but on the basis of our experience.

Earlier this year, two Soviet Bison bombers overflew one of the U.S. Aleutian Islands. Two U.S. Air Force F-15 fighters scrambled to intercept the Soviet plans and escorted them out of U.S. airspace.

They took no hostile action, fired no weapons, despite the fact that these were bombers, not reconnaissance aircraft.

In other words, in face of some provocation, this Nation took care to take no hostile action against a clear violation of the airspace by Soviet bombers.

It goes without saying that no commercial airliner has ever been threatened or harmed by U.S. military aircraft.

Mr. Speaker, the canons of international decency have been dealt a severe blow by the shooting down of KAL flight 007.

The world community endures daily many versions of man's inhumanity to man.

Others here today have referred to widely accepted international procedures for treatment of unidentified aircraft that could be lost or in distress.

There can be no confusion about the Soviet attitude toward such aircraft.

As in 1978, they shoot first and refuse to answer questions later.

Their position remains unchanged.

What this terrible killing should urge upon the nations of the world is a concerted effort to direct the full weight of international opprobrium at this and any possible future atrocities and to seek binding international protections for international air traffic.

Such an effort is urgent.

The United States should lead the way.

Mr. BROOMFIELD. Mr. Speaker, I yield 5 minutes to the gentleman from Georgia (Mr. GINGRICH) for purposes of debate only.

Mr. GINGRICH. I thank the gentleman for yielding this time to me. I am especially grateful that the gentleman from Michigan would yield to me to discuss this resolution because it concerns the murder of my neighbor, friend, and colleague, Larry McDonald, of Georgia.

Larry McDonald was an unusual man, a loner, a Democrat who refused to vote for the Speaker of his party, a strong conservative who marched to the beat of a drum others did not hear. Many people thought he was strange; almost everyone knew he was not typical.

But Larry McDonald understood one great central truth. He knew that the Soviet dictatorship is an evil empire and that Soviet leaders would kill innocent people. Larry McDonald understood that innocent men, women, and children could be killed flying near the Soviet Union. Indeed, if one went back and read Larry McDonald's predictions about the Soviet Union in Vietnam, Cambodia, Laos, Angola, Nicaragua, and compared his predictions to those of the State Department or the nationally known political spokesmen in foreign affairs, it was McDonald who tended to be more correct.

If Larry McDonald had stood on the floor of this House and warned that the Soviets would deliberately, coldly, and ruthlessly murder 269 men, women, and children, many Members of this House and of the national news media would have called him paranoid; indeed, many did call him paranoid. Well, it was not paranoia that killed Larry McDonald; it was a deliberate action of the Soviet leadership.

Even today, during this debate, we have heard calls for avoiding any increased military preparedness, for trying to help the Soviets adjust to reality. It is we in the United States who must adjust to reality. It is we who must rethink our interpretations of the last decade.

For almost 10 years we have lied to ourselves about the conquest of Vietnam, the use of poison gas in Cambodia and Laos, the Soviet use of Cuban puppets in Angola and Ethiopia, the establishment of a Soviet military threat in Cuba, the creation of a new pro-Soviet puppet in Nicaragua, and the creation of a KGB terror network that supports violence and disinformation across this planet.

If we had not been lying to ourselves about the nature of the Soviet dictatorship, we would not have been shocked at the murder of 269 people. And that is the simplest of all tests. If you were surprised that they would kill 269 people, you have not been watching them very carefully.

In 1978 they forced down a Korean airplane. They routinely imprison they own people. They allow their Nobel prize winners to starve themselves in order to get their daughter a simple exit visa. They are a ruthless, fuggish, brutal, and barbaric dictatorship.

While alive, Larry McDonald could not convince Americans that our liberties and our very lives were threatened by the Soviet Union. Hopefully, his death will not have been in vain. Hopefully, his murder and the murder of his 268 fellow passengers will convince all of us that the Soviet dictatorship is a real threat.

This ruthless act by the Soviets should awaken all of us. What could the Soviets possibly be hiding that they would shoot down a civilian airliner, and what does that tell us about verification? If the Soviets will lie openly and blatantly to the entire world, what does that teach us about the problems of trusting them in negotiations and treaties? If the Soviets protect their territory so rigorously that they praise their pilot for killing civilians, what does that teach us about the nature of their society?

There are stronger steps we could take. I hope we take those stronger steps. I think the gentleman from Michigan in his proposal that we expel at least one KGB agent for every dead civilian, is a serious start.

□ 1730

Let me close on this note: This resolution is not a ceiling above which we cannot be stronger. This resolution is the basement on which we build the actions of the future. If this House and the Members of this House vote and forget, if the news media reports and ignores, then Larry McDonald and 268 other people will have died in vain. But if a year from now our defense is stronger, our negotiations are tougher, our awareness is greater then this resolution will have been the first step toward saving freedom on this planet.

Thank you, Mr. Speaker.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. I thank the gentleman for yielding.

Mr. Speaker, on behalf of the people of Puerto Rico, I condemn this atrocious action by the Soviets.

Mr. Speaker, it is with a deep sense of sorrow and indignation that I join my colleagues in condemning the Soviet Union for their barbaric act in firing on an unarmed civilian aircraft.

The people of Puerto Rico join me in expressing our condolences and offers of prayer to the families of the passengers of Korean flight 007, in particular to the family of our late colleague, Congressman Larry McDonald.

It is difficult to imagine the paranoia under which the Soviet military operate that they take such drastic and irrevocable action against helpless passengers. One must wonder at the moral fiber of a system that produces such results. Soviet action and treatment of its own citizens are already well documented; but by this act, the world is again put on notice of the Soviet disregard for basic rules of behavior and humane treatment in the civilized world.

Their act was then compounded by their inexplicable failure to acknowledge the attack for almost 1 week and the statements of Foreign Minister Gromyko in Madrid that they would not hesitate to fire at any aircraft that enters Soviet airspace. The world community cannot but react with astonishment at this additional statement which is evidence of the contempt in which the Soviets hold the world. We have a saying in Spanish—"El ladrón juzga por su condición"—which roughly means that the Soviets are judging others with the knowledge of their own actions. There have been documented instances of Soviet civilian aircraft diverting from approved flight plans in order to fly over military installations in our own country. So, when they accuse the United States of using Korean Air Lines flight 007 on a spying mission, it is merely a reflection of the way they themselves act.

Their callousness in refusing Japan's offer of assistance in their rescue operation and in allowing families of the dead to visit the site to pay their respect is inexplicable. While we continue to search for answers to this tragedy, we must remember that while our first reaction to such a barbarous action is a cry for revenge, the best way to reaffirm our Nation's foundation on the principles of "Life, liberty and the pursuit of happiness" and to honor those who have died, is by acting in a reasonable and calm manner. Let us not besmirch the memory of those that perished on flight 007 by stooping to the level on which the Soviets operate. Rather, let us set an example for others to follow.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Speaker, there exists in my mind no satisfactory or rational explanation behind the Soviet decision to shoot down this easily identifiable, unarmed, civilian, commercial airliner and, in so doing, murdering 269 innocent men, women, and children. Clearly, this reprehensible, barbaric, and irresponsible act cannot, must not, and will not go uncondemned by the world body politic.

Today, we have before us the first prudent opportunity to join with our allies and other members of the world community at large in taking tangible steps in denunciaton of this Soviet action. As an original cosponsor of this resolution (H.J. Res. 353), I would urge my colleagues to join with us in support of its passage. Simply stated, if approved, House Joint Resolution 353 would call for: a full explanation from the Soviet Union with respect to the events that led them to their decision to attack KAL flight 007; Soviet reparations to be paid to the survivors of the victims of this shameful and malicious attack; Soviet assistance and cooperation in international efforts that are aimed at recovering both KAL flight 007's victims and flight debris which as we know will enlighten all parties with respect to the ultimate fate of flight 007; an investigation by the International Civil Aviation Organization, and, finally, a change in current Soviet air defense policies and procedures which will insure greater airliner safety, as well as to insure that such a heinous atrocity may never again occur.

While to many, these actions may appear to fall short of our objective to moderate Soviet behavior in future incidents such as this. In this regard, however, I believe it essential for the United States to act in concert within the world community in order to insure our success in this endeavor. Clearly, for the first time in recent memory, world opinion is in direct divergence with Soviet policies and actions and in my mind, the United States must put this leverage to good use. As I am sure many of us are aware, the President is currently examining the full gambit of diplomatic and economic sanctions and policy alternatives that are available to him that can be implemented against the Soviet Union. I believe we must support the President in these efforts during this time of crisis. House Joint Resolution 353 represents the first such initiative and clearly merits our unanimous support as it was prepared both bipartisanly and in concert between the Chief Executive and the leadership of the Congress.

We know all too well from past experience that unilateral U.S. actions taken against the Soviet Union meet with little success. However, House Joint Resolution 353 represents a first step in a coordinated international effort that is intended to implement changes in Soviet actions not their intentions. We now have the opportunity to demonstrate to the Soviets both the will and unity of our Nation in denouncing this shameful and cowardly act.

President Reagan has established a firm and clear course for the conduct of United States-Soviet relations in the wake of this unwarranted attack. The President has asked that we address this matter on an issue-by-issue basis. It is a policy that deserves both our attention and support. It is a policy that will meet with success both here at home and abroad. It is a policy that hopefully will result in real changes in Soviet actions and behavior.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Maryland (Mr. LONG).

Mr. LONG of Maryland. Mr. Speaker, I rise in support of the gentleman's resolution to condemn the Soviet Union for its unwarranted and brutal attack on an unarmed civilian airliner. Along with all Americans I am appalled by this savage act and sorrowed by the loss of life of passengers, in-

cluding women and children, many of them Americans.

This act is another example of the Soviet's use of force to disrupt peace around the world and expose the moral bankruptcy of the Soviet system. In addition, it points out the contradiction in the administration's policies toward the Russians: Talking tough while in fact expanding sales of grain and sophisticated technology, helping the Soviets solve their economic problems so they can concentrate on their military buildup; a buildup which has forced us to respond in kind thus raising our taxes, fueling the flames of inflation, pushing up interest rates, and keeping the world in constant turmoil.

Are the Soviets our friend or our foe? The downing of Korean flight 007 makes the answer clear. They are our enemy and, while nuclear war is out of the question, we should at least stop helping our enemy, in fact the enemy of mankind.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from Washington (Mr. BONKER).

Mr. BONKER. Mr. Speaker, as an original cosponsor of the resolution condemning the Soviet shoot-down of the Korean airliner, I join with my colleagues in condemning this barbarous Soviet action. Not only have the Soviets violated every norm of international law in shooting down a plainly marked, defenseless civilian airliner with 269 innocent passengers aboard, they have expressed absolutely no remorse for their actions. Indeed, rather than attempt to set the record straight and assist the international investigation into the matter, the Soviets have responded by issuing bellicose statements, and threatening to repeat this unconscionable massacre in any similar future situation.

It is important to note that this is not simply a conflict between the United States and the Soviet Union, an East-West controversy. By their crime and subsequent actions, the Soviets have raised a firestorm of worldwide criticism. Had the Soviets not exercised their veto, the United Nations Security Council would have passed a strong resolution of condemnation.

Mr. Speaker, I commend my many colleagues who have risen in support of this resolution, expressing their outrage with the Soviet action. At this time, I would like to address one of the most important international issues associated with this tragedy, the impact this event should—and should not—have on our Nation's trade policies.

The U.S. response to the Soviet shoot-down of a Korean Air Lines 747 could mark a significant turning point in U.S. crisis diplomacy. For the first time in memory a U.S. President has refrained from responding to a serious Soviet transgression by imposing broad restrictions on trade. Could it be that we have finally accepted the fact that we are no longer such a dominant economic force in the world that we can punish other nations by refusing to trade with them, and that in attempting to do so we damage our own economic interests more than we gain in political results? Such a realization, reflected in Presidential handling of this and future crises, would be a welcome development.

Not that trade with the Soviets is crucial to our economic well-being. On the contrary, the Soviet market has proved to be of only marginal value. Even in agriculture, where the Soviets have been a major cash customer, Mexico, Japan, and other grain importing nations have taken up much of the slack caused by disruptions in Soviet purchases. Exports to the Soviet Union represent less than 2 percent of total U.S. exports—business we could, in fact, do without if that were an effective means of modifying Soviet international adventurism and lawlessness. Under existing export controls, we sell very little advanced technology to the Soviet Union. Only $32 million in advanced technology was licensed for sale to the Soviet Union in fiscal year 1982.

Far more serious than the loss of Soviet business itself is the effect of "light switch" economic diplomacy on our trade with the rest of the world. Try as we might to pursuade other governments that our trade sanctions are intended only for the Soviet Union and will not be used against others, the case is not very convincing. In fact, our broad arsenal of trade restrictions for national security and foreign policy purposes has been applied to many nations, and the cumbersome licensing process employed to prevent certain products from falling into Soviet hands affects every country in the world from which those products might be diverted. Our competitors are only too quick to insert broad allegations of "American unreliability as a supplier" in their sales arguments, even when the goods they are selling may never have been affected by U.S. trade restrictions. These spill-over effects of our on-again-off-again efforts to punish the Soviet Union by cutting off trade are simply too costly to our increasingly export-dependent economy to tolerate.

Mr. Speaker, the President's decision not to resort to ineffective and counterproductive trade sanctions in the face even of a Soviet transgression as serious as the recent shooting down of the Korean aircraft is a display of wisdom and restraint. It is consistent with the direction contained in legislation which will come to the House floor later this month amending and extending the Export Administration Act of 1979. That Act provides basic authorities for the restriction of U.S. exports for national security, foreign policy, and other reasons. The amendments reported by the Committee on Foreign Affairs seek to discourage the use of trade restrictions for foreign policy purposes by limiting the effects of any such restrictions. By his own judgment in responding to the latest Soviet crisis, the President has obviously recognized the limits and costs of economic sanctions, and the legislation that the House will be asked to enact reflects a similar judgment by the Committee on Foreign Affairs.

Some Members of the House, Mr. Speaker, may feel compelled to propose amendments when this legislation comes to the floor calling for harsher retaliation against the Soviet Union, including trade sanctions. I think, however, that the good judgment displayed by the President in refraining from such actions should dispel any illusion that anything can be gained from such an approach. I trust that the House will soundly defeat such proposals, and endorse the approach taken both in the committee bill and in the President's response to the current crisis. As a major trading nation with many competitors in essential world markets, we can no longer afford the disruptive and weakening effects of trade sanctions except where trade directly affects unacceptable situations abroad, such as the sale of crime control instruments to governments engaging in severe violations of human rights. If we can consistently make the distinction between such direct and narrow trade sanctions, and broader trade sanctions, we will have turned a new page in American foreign and economic policy. The President and the Export Administration Act Amendments of 1983 point the way. I urge my colleagues in the House to follow.

Mr. BROOMFIELD. Mr. Speaker, I would like to reserve the balance of my time.

Mr. ZABLOCKI. Mr. Speaker, we have but one speaker remaining. I would hope the gentleman from Michigan would use his time.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from Georgia, (Mr. LEVITAS).

Mr. Speaker, obviously the overwhelming majority of our Members, as hopefully the entire House, today will join in this resolution expressing our condemnation and our revulsion at the barbaric and uncivilized act of the Soviet Union in shooting down a civilian airliner. But what use is it? What significance does it have? Is it anything more than going through the motions of what is expected of us and blowing off some hot air?

Regardless of all of the denials and protestations by the Soviet Union, the evidence is overwhelming that they knew this was a civilian airliner on a

trip it made 5 days a week, that the 747 has a distinct profile, and this flight was not related in any way to the espionage activities the Soviet Union has falsely and corruptly alleged. But, I suggest to you that even if this civilian airliner was on a spy mission, that the innocent passengers on that plane—all of them—including a 19-year-old young woman returning home from a vacation, a young college student going to visit Korea, a 5-year-old child accompanying her parents—those people committed no illegal acts. They only bought an airline ticket to travel to Korea, and they were the victims of a cold and calculated murder. Why was it necessary to kill these innocent people? What type of animal would consciously order their deaths?

Now, I could not add to the condemning rhetoric which has already been presented, both here and in other places. The words have been a veritable the sources of justified vilification. But I do want to say this: I am not sure that the words we utter here today are significant, quite frankly. I do not think the Soviet Union cares very much what we or the Madrid Conference or the United Nations or world opinion or anybody else thinks. And I think that is the nub of the problem. They simply do not care about world opinion over Afghanistan or Poland or Hungary or Czechoslovakia or anything. Words are of no moment to them. The children's doggerel about "sticks and stones" and words without harm is true. What actions have we taken?

What significance is it to the Soviet Union if 100,000 Americans stop eating their caviar, or we pour their vodka into the bay in Boston? The mild civil aviation sanctions—mostly by private organizations—are of little hurt to them.

I think, Mr. Speaker, that what we need to do is add to the rhetoric something of significance. Someplace between diplomatic conversation and war there has to be a way in which we, as Americans, and as the leader of the free world, and indeed the entire world, can condemn and let the Soviet Union know there is a price to pay for barbarism. And that will involve at some point a price that we have to pay in economic sanctions of every sort. But if we do not do something other than talk and blow out a lot of hot air, they are going to do it again and again and again. They have said they will.

What can we do, short of war and beyond conversation? We could now recall our Ambassador for consultations, reduce the size of their diplomatic missions, including KGB agents, close consular offices, and, yes, impose economic sanctions.

Hopefully we could get our allies and others to join us, but I doubt they will. Nevertheless, we must do more than use mere words.

Of course, all that means sacrifice. It all costs. The debate about whether any economic sanctions are effective is a legitimate debate. Certainly the cost to the nation imposing a sanction is beyond debate. It is true. No response to aggression or illegal conduct comes free of cost, whether the response is economic or military. But the failure to make any effective response will, in the last analysis, be far more costly.

I am not so naive to believe the Soviet Union will abandon its ruthless and aggressive actions—Poland or Afghanistan or shooting down civilian airliners—because of economic sanctions by the West. But they have to be made to pay a price because of those actions. They have to know this conduct is unacceptable and has a price attached to it, even if it costs us in the process of collecting the price.

We must work together in nonmilitary responses to threates by the Soviet Union. Can we? I do not know. Recent history is not an optimistic teacher. Nevertheless, we must try. For if we fail, it not only weakens political confidence in our leadership, but it heightens the danger of military solutions being the only game in town.

Mr. BORSKI. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Pennsylvania.

Mr. BORSKI. Would the gentleman comment on the need for this Congress to take a comprehensive look at the credit and loan policy, including the private loans that flow from this country into both Soviet bloc countries and the Soviet Union itself, and whether the gentleman thinks it is appropriate for this Congress to begin to take a look at those kinds of economic sanctions as suggested by Jack Anderson just 2 or 3 months ago.

Mr. LEVITAS. I think the gentleman is absolutely correct. You do not feed or give credit to your adversary and especially not to one who commits murder.

Mr. DAUB. Mr. Speaker, I am compelled at this time to voice my dismay and utter frustration over the Soviet shooting of Korean Air Lines flight 007, in which 269 human lives were taken in cold blood.

The only inference which can be made with respect to this international incident is the total lack of respect the Soviet Government holds for the value of human life, and the Soviet disregard for international opinion.

It is imperative that the Soviet Government be held accountable for this grave action. The world will not soon forget such a tragedy.

In light of this incident, every faction of United States-Soviet interaction must be reevaluated—we cannot continue to trust Soviet intentions when their actions cast such doubt. Whether it be cultural exchanges such as the Olympic games, or negotiations such as the START talks, we must not continue to allow the Soviet Government to exercise its will without our utmost scrutiny.

It is tragic that we must witness such an incident before public awareness is heightened to the level of past days over Soviet actions. I must, therefore, lend my full support to the passage of House Joint Resolution 353, to condemn the Soviet criminal destruction of the Korean civilian airliner. It is my hope, however, that our reaction to this incident is not limited to words, but involves deliberate action on the part of our Government.

Mr. GONZALEZ. Mr. Speaker, I support the resolution, because it is the least that the House, or any civilized body, or any civilized being, could do to condemn an attack on an unarmed commercial airliner, or for that matter any attack on any unarmed commercial carrier—be that a ship at sea, an aircraft in the sky, or an ordinary bus or automobile on a public road. There is no other name for such an attack but murder, no justification except terror, and no excuse under any right or rational code.

It is right that the resolution should call for steps to prevent future tragedies of this kind. It is also right that all reasonable minds see that vengeance is no answer; the only good thing that can come of this tragedy is some kind of assurance that it will not happen again—and it will not, if reason and decency can prevail over violence and fear.

Even as we mourn the loss of innocent life, and even as we condemn those who are responsible, we should be reminded that this terrible event is a warning about the dangers of the hair-trigger world that we live in—a world haunted by the terror that we call mutually assured destruction, which is at the same time a continual war psychosis.

This is a world in which the innocent, most of all, are the targets. This is a world in which there are weapons all around, and anxious fingers on every trigger. Death can come in an instant in such a world, because of madness, because of some misguided ambition, because of misinformation, because of sheer stupidity, or because of a hundred other mistakes, misfortunes, or malignance. It is easy to see that in such a world as this, in such a climate as we have, some foolhardy, insane, or misguided soul would launch an attack, perhaps even a holocaust.

In the grim shadow of this tragedy, we ought to resolve to redouble our efforts to gain some kind of control over an arms race that can kill not only innocent passengers in the cold skies over the Sea of Japan, but can also kill innocent millions, even life as we know it.

Even as we resolve never to be weak, never to be vulnerable, and even as we strain to arm ourselves against all possible attack, we realize that we have never been more vulnerable than we are now—that security is only as certain as the next moment, the next hour, only as certain as the very uncertain disposition of those who sit in the silos out in the West, down in the ocean deeps in their submarines, or indeed, out in the lonely air of far frontiers—they, and their equally alert opposite numbers. All good men, all good soldiers, but all fallible, with fallible systems and guided by fallible people.

There can be no excusing the act that led to the loss of Korea Air Lines flight 007. Yet if we are true to ourselves, true to our responsibilities to the country, the world and future generations, we will at bottom admit that if the world hopes to survive, it cannot rely on terror, cannot forever stand with pistols pointed at each other. If there is a lesson in this tragedy, it is that even as we struggle to survive by building our strength, the real possibility of survival depends on finding some way to end the terror itself, because the instruments of terror can be, no matter how well intended purposes are—can be misused, used by mistake, by madness, by miscalculation, by malice, or through misfortune.

The risk is great in this world. If in the light of this there can be some reduction of that risk, the tragedy may somehow be redeemed, though never could it be justified, never could it be excused.

● Mr. PATTERSON. Mr. Speaker, as I look upon this Chamber, I am reminded that one of our colleagues, Representative Larry McDonald, was not permitted the opportunity of attending this session. That Member, along with 268 other innocent people, was a victim of Soviet aggression that can only be termed cold blooded. The display of terrorism in shooting down Korean Air Lines flight 007 was not only a tragedy of lost lives, but also one of lost morals. The Soviet Union has shown a lack of concern and respect for human lives that has astounded all decent human beings world wide, and its callous and repeated claims of innocense are beyond comprehension.

Yet, are we surprised by the Soviets response? Obviously, we are angered and repulsed. But this is not the first time that the Soviet Union has shot at a civilian airliner, nor is it the first time that it has demonstrated uncaring behavior in dealing with human lives. A regime that has killed over 20 million of its own citizens since its inception is not above striking at helpless men, women, and children in an airliner.

It is our responsibility to fully comprehend the ruthless policies and belligerent attitude that lie behind this tragic incident. As the truth becomes clear and world opinion acknowledges the savagery of Soviet actions, the Soviet Union will no longer be able to hide behind the mask of a peace-loving nation.

The demolition of flight 007 shows us the paranoia of the Soviet leadership, both military and civilian, and the Soviet system of government. Mr. Speaker, I join you and our President in deploring this unjustified action by the Soviet Union.●

● Mr. FORD of Michigan. Mr. Speaker, I rise in support of this joint resolution condemning the criminal destruction by the Soviet Union of Korean Air Lines flight 007 and the murder of the 269 innocent passengers and crew, including 61 U.S. citizens.

I expressed my thoughts on this dreadful incident in a recent column I wrote for one of the newspapers in the 15th District. Those remarks follow:

VIEWS OF CONGRESSMAN WILLIAM D. FORD, SEPTEMBER 12, 1983

Unquestionably, the shooting down of Korean Air Lines flight 007 in cold blood was a wanton and ruthless act, even by the brutal standards the world has come to expect from the Soviet Union. What we have is a situation where an unarmed civilian passenger plane strayed innocently from its course and invaded Soviet airspace.

Like man himself, the sophisticated electronic systems that guide the jetliners of the world are not infallible. And indeed there is some evidence that the navigation error may have been caused, at least in part, by Russian surveillance electronics.

Whatever the reason for the intrusion, the response far, far exceeded the "crime." In civilized society, landowners have a right to order trespassers off their property. But they do not have the right to gun them down. And this precisely is what the Soviets did.

And in doing so they violated not only humanitarian principles—snuffing out 269 innocent lives with reckless and murderous abandon—but internationally recognized rules of jet-age air travel as well.

These rules dictate that intruding aircraft either be escorted out of the violated airspace or forced to land for inspection. On several occasions, the United States has practiced this custom in cases where Russian military planes have entered our airspace. Instead the Russians acted precipitously and without regard for hapless civilians of many nationalities—including Americans.

Then they compound their crime by denying it in the face of incontrovertible evidence. Six days later, when they finally owned up to the heinous act, they displayed a shocking arrogance by announcing they acted properly and reserving the right to take similar action in the future.

All the world knows this was not the first time the Russians fired on a civilian airplane. And now they are saying they are likely to do it again.

What if it is an American airplane next time? It is a frightening thought. The intense furor and indignation being expressed across the United States today would pale in significance if a Pan-Am or TWA jetliner were blasted from the skies. It could, indeed, precipitate an unthinkable military exchange.

Finding ways, then, to guarantee the safety of all civilian aircraft that might inadvertently stray into hostile airspace should be our Nation's paramount goal.

As we consider sanctions we should never lose sight of this single point. There is an understandable desire to want to make the Russians pay. But if that payment does nothing to reduce the danger—or if it is extracted only out of vengeance without regard for the consequences—it is worse than no payment at all.

So far we have wisely rejected hollow retaliation, such as canceling the grain deal, which would hurt the American farmer and the Russians not at all since there is plenty of grain in world markets. Delaying arms negotiations would be equally short-sighted and would play into the Russian's hands.

To be sure, this is the kind of brutal action that invites saber-rattling and macho conduct.

But we cannot forget that as the strongest nation in the world we have an obligation to all nations that seek peace and justice. What's more, our strength gives us the means to punish without jeopardizing world peace.

Because America did not let the Russians get away with this foul deed and because we exposed them in the harshest terms, the Soviet Union already is paying dearly in terms of world opinion. It is feeling the wrath even of other communist regimes around the world.

In the court of the world we must continue this pressure until the Soviets quit their lying in the face of irrefutable evidence, face up to the evil of their action, agree to make restitution and provide guarantees that civilian airline passengers will not be gunned down simply because of electronic breakdowns.

We now have a poignant example of how an accident on the part of a third country can bring the two superpowers toe-to-toe. And we have seen as well the danger of giving too much authority to trigger-happy militarists.

It is now our duty to continue to act responsibly to extract justice without escalating the confrontation solely for the sake of vengeance.●

● Mr. HARKIN. Mr. Speaker, every day it seems new information emerges about the Korean Air Lines massacre.

But the basic facts do not change. A Soviet fighter plane shot down the Korean airliner; 269 people were killed—269 innocent people, including our colleague Larry McDonald.

We know that the Soviet leaders are obsessed with security. We understand the reasons that arise from the history of Russia. But they are no excuse. No new information can possibly excuse shooting down a plane with 269 innocent people.

In similar circumstances, I do not believe that our Government would have taken such a action. First, we would have checked, double checked and then started all over again to make sure that we were not firing on a civilian plane.

As a former naval fighter jet pilot, it is inconceivable to me that positive visual identification was not made

before the passenger jet was fired upon.

Either the Soviet obsession with security caused the Soviets to issue general orders to make the shooting down of civilian planes possible, or there was a breakdown in command and control. In either case their actions are reprehensible. That is what I and what we as a Congress condemn today.

The purpose of this resolution today is to send a clear signal to the Soviet leadership that their behavior is unacceptable, that they must provide a full explanation, must punish those responsible, make reparations and change their defense practices.

We must make unmistakably clear the minimal decent rules for international conduct.●

● Mr. PRICE. Mr. Speaker, of course, I support this resolution condemning this outrageous and brutal Soviet destruction of a civilian aircraft with the loss of 269 men, women, and children, and, or course, like other Members will vote for it.

I hope, however, this action will not lead the House to exceed its normal capacity for fooling itself.

I trust that Members realize that as far as the Soviet leaders in the Kremlin are concerned this resolution will have all the force and effect of a luncheon club speech in Saskatchewan.

The last provision of the resolution calls for the Soviet Government to "unequivocally apologize for its actions, fully compensate the families of the innocent victims, and agree to abide by internationally recognized and established procedures."

We have as much chance of getting the Soviets to do that as I have of being elected a member of the Politburo next week.

We do have a chance to sent the Soviets a message that they understand, however, when we vote on the Defense authorization conference report.

That bill says that the United States is prepared to spend billions of its national wealth to keep up our defense. It says that we are increasing our defense expenditures by 5 percent in real growth, despite great budgetary problems and anguishing domestic concerns because we will not let ourselves be pushed around or bullied by the Soviets.

That bill says that we are taking steps to defend ourselves in a measured and careful way so as to keep open always the avenue of arms control if the Soviet Union is willing to negotiate.

That bill says that we are going to be prepared to negotiate from a position of strength because we know what the Soviet Union would do if we allowed ourselves to get into a position of weakness.

I hope nobody will fool themselves into thinking that this latest tragedy was an isolated incident or that the helpless Korean airplane was shot down by new Soviets. These are the same old Soviets. These are the same Soviets who brutally crushed freedom in Hungary, who destroyed the urge for freedom in Czechoslovakia, who invaded Afghanistan and slaughtered civilians with incredible brutality, who are using chemical warfare in Southeast Asia.

The Soviets are insensitive, brutal, calculating people who will take what they can get in any instance.

Let us send them a message that we will not be intimidated by their threats and we will not react to their brutality with just a slap on the wrist.

I support this resolution, but I ask you to support the meaningful action of providing adequate defense for the United States.●

● Mr. LIPINSKI. Mr. Speaker, I rise in strong support of the resolution offered by the distinghished chairman of the Foreign Affairs Committee, Mr. ZABLOCKI, concerning the brutal Soviet attack on Korean Air Lines flight 007.

When I first heard of this vicious attack by the Soviet Union on a defenseless civilian airliner, I could not believe it really happened. What kind of people or government place such a cavalier and cold-blooded attitude toward human life? 269 innocent people were murdered by a Soviet fighter pilot under orders from the Kremlin to shoot down any aircraft, civilian or military, that does not have clearance over Russian airspace.

It is clear from the facts that flight 007 was simply off course and had no intention of entering Soviet airspace. I am incredulous over Soviet statements alleging the Korean aircraft was on a spy mission for the United States. The Soviets have continued to make a bad situation worse. They refuse to take any responsibility for their actions. The very least the Soviets should do is allow the Koreans, Japanese or Americans to search the crash site for victims and wreckage. This would be the only decent thing for them to do at this time.

I must commend the actions and statements of President Reagan during the aftermath of this tragedy. I am in full agreement with steps he has taken to hold the Soviets accountable. They must be taught a lesson that they cannot go around shooting down defenseless civilian aircraft and suffer no consequences.

The resolution before the House today, if adopted, will help the world determine what actually happened to the Korean Air Lines 747. In addition, it will pressure the Soviet Government to give a full explanation of their actions. The world community of civilized nations must send a strong message to the Soviet Government that this type of behavior cannot be tolerated.

Mr. Speaker, I urge all of my colleagues to support this important resolution.●

● Mr. ANDERSON. Mr. Speaker, I rise today to express my shock and dismay at the brutal Soviet attack on Korean Air Lines flight 007 and to express my strong support for House Joint Resolution 353 condeming this barbaric act. There can be no excuse or justification for this appalling act which has taken the lives of 269 innocent victims, including 61 of our fellow citizens, among whom was one of our colleagues, Larry McDonald.

The callousness of the Soviet Union's response is totally dumbfounding. To even suggest that this commercial airliner was on some sort of a "spy mission" and had intentionally invaded Soviet territory would be to turn reality on its head. Through a series of partial truths and outright lies, the Soviets are attempting to avoid any responsibility for this heinous act.

There can be no doubt, from reading the transcripts of this incident, not only of the unprecedented nature of their actions, but also of the fact that the Korean Air Lines pilot never knew that he was being tracked or that he had strayed off of his original flight path. Just minutes before the aircraft was shot down, the pilot made routine contact with controllers in Japan, giving no hint that anything was wrong. Clearly, the Soviets did not follow internationally-recognized procedures, which were set up to avoid just such a tragedy, for notifying the plane that it had strayed off course and for it to leave Soviet airspace.

Further, the Soviets have shown the greatest insensitivity to those who have lost their loved ones in this tragedy, by refusing to allow non-Soviet ships and aircraft to search for the bodies of the victims in the vicinity of the probable crash site. In his address, the President called this terrible incident a "crime against humanity." Expressing the outrage felt by all of us, a constitutent of mine wrote, "This attack is an act of violence not only against Korea, but against the United States and all other free countries of the world."

That this incident should occur at a time when both the Soviets and ourselves had made a number of significant moves aimed at reducing tensions, including agreement on human rights at Helsinki and on a new grain agreement, is dismaying. Neverthless, in spite of our revulsion, we must continue to maintain our dialog with the Soviets. I agree with the President's statement that "we cannot, we must not, give up our efforts to reduce the arsenals of destructive weapons threatening the world." But this dialog can only reach a meaningful conclusion if we maintain our military

posture so that the Soviets will realize that they have something to gain by negotiation. I think that this act by the Soviets, and their subsequent disregard of world opinion and human decency, reemphasizes the need to keep our defenses strong. The sad truth is that military strength is the only thing the Soviets understand and respect.

The President has taken a balanced and sensible approach to this tragedy. by passing this resolution, the Congress is joining together, in one united voice, to support him in condemning this barbaric act.●

● Mr. BETHUNE. Mr. Speaker, I rise in strong support of House Joint Resolution 353, condemning the Soviet Union for its indefensible action of destroying Korean Air Lines flight 007 and murdering 269 innocent passengers and crew from 14 different countries. I would also like to join with my colleagues in extending my sympathy to the families and friends of those who died.

The Soviets have proven once again that they have no regard for human life. They have ignored international law, and have shocked the world with their callousness and their lies. They have not offered a plausible explanation for this murder because there is not one.

The President is to be commended for his response to this Soviet crime. Instead of allowing the Soviets to draw the United States down to their level of an irrational act, the President has put the United States on high moral ground. We are outraged and disgusted by the Soviets, but we do not want to be like them and we will not be like them. The world has judged the Soviets and found them to be criminals; they will not find the United States to be criminal in either word or deed. The Soviets have proven to the world that they cannot be trusted, while the United States has demonstrated we can be trusted in time of trouble.

Mr. Speaker, I urge support for House Joint Resolution 353.●

● Mr. HANCE. Mr. Speaker, I wish to add my voice to others that we have heard this afternoon in expressing my total disgust and outrage at the Soviet actions toward Korean Air Lines flight 007. There is no doubt whatsoever in the minds of the world that KAL flight 007 was a civilian passenger plane, unarmed and unknowingly off its flight path. Yet the Soviets ordered its destruction without the slightest thought to the lives of those innocent people on board. The wanton disregard for life evidenced by the Soviet action is an affront to every member of the human race and is an act no less appalling than the atrocities committed by the Nazis in World War II. Soviet refusal to assist or cooperate in searching for wreckage and personal affects of the passengers only further points up the Soviets' uncaring and unfeeling attitude for human life. This sad episode in international affairs only goes to prove that the free world must not and cannot ever let its guard down against the Soviet Union.●

● Mr. FASCELL. Mr. Speaker, the shooting of the Korean airliner over the Sea of Japan has sent shockwaves around the world. The tragic and senseless loss of 269 innocent passengers and crew has deeply touched and saddened people of many nations.

This dreadful and needless act demonstrates once more the callous attitude of the Soviet Union toward human life and Soviet indifference to world opinion. Even if some of the dubious statements of the Soviets regarding efforts to warn the Korean pilot were found to have any basis, the deaths of 269 civilians in an unarmed commercial plane deserves the condemnation not only of the American people but of the whole world. The implications for global air safety are ominous.

While the curtailment of air travel with the Soviet Union and other measures already implemented by the President mark a useful beginning, I believe that further steps should be considered. However, the fact remains that there is very little that the United States can do on a unilateral basis that will be effective. Our options are very limited. While the canceling of the grain sale or breaking of diplomatic relations, as some have proposed, may make us feel better, these actions would have minimal impact on the Soviets. The only thing that will make the Soviets realize the revulsion the world feels over this heinous act will be international sanctions taken by nations in concert. This is why the U.N. forum is so important, as is the upcoming meeting in Canada of the International Civil Aviation Organization. Some countries have already implemented a ban on Aeroflot flights. Further sanctions may be determined by the ICAO or other international meetings or organizations.

I have recently returned from the closing ceremonies of the Conference on Security and Cooperation in Europe in Madrid. Virtually every Western foreign minister used the occasion to roundly condemn the Soviets. It is this international criticism that must continue if there is to be any hope of the Soviets' realizing that they must conform to accepted rules of behavior if they wish to be part of the civilized world.●

● Mr. CAMPBELL. Mr. Speaker, I strongly support this resolution and call for its unanimous passage. Although I was unexpectedly sent to the hospital and will have to miss the vote, I want to be on record on this vital legislation.

The destruction by the Soviet Union of a Korean civilian airplane carrying 269 innocent people was, as House Joint Resolution 353, says "one of the most infamous and reprehensible acts in history, a cold-blooded barbarous attack" on an unarmed and clearly marked plane. Very simply, it was murder, and it proved, once again, that the leaders of the Soviet Union do not share the values of the civilized world.

Mr. Speaker, one of the passengers on KAL flight 007 was from my congressional district. Billy Hong was born in Korea and was traveling back on business and to see friends and family. He had come to the United States to escape communism, and to be reunited with JIM MARTIN, who had befriended young Billy during the Korean war. Here, he found happiness. JIM MARTIN adopted him, he married and had children, he established a successful business. Here is what a local paper, the Spartanburg Herald, said about Billy Hong:

> It was the Communists Billy Hong had a bitter distrust in.
>
> It was the Communists who killed his parents in an air attack on their village during the Korean war.
>
> And it was the Communists who took Hong's life 1 week ago today, nearly a decade after he became an American citizen.
>
> He once told an American friend, "One thing I learned for sure, you can never trust a Communist."

Mr. Speaker, to Billy Hong's wife, Joy, to his children Eunice and Billy, Jr., to his adopted family, I again extend my heartfelt sympathy. I extend it to the families and friends of all the passengers and crew, for I am sure that the stories of all the innocent victims of flight 007 are just as poignant and just as tragic.

In the midst of our sense of national outrage, it must be remembered that this is not just an American problem, but also an international one, making it essential that we consider actions that will draw other nations to the cause. I support the President's actions to date and believe that further sanctions will be forthcoming as international reaction grows. I would also support immediate consideration of the defense bill, as many of my colleagues have suggested here today, as a signal to the Soviet Union that we intend to be prepared in the face of their aggression.

The Soviet Union will not apologize. Its leaders will bear none of the responsibility they so justly deserve for this abomination. Americans and world citizenry everywhere are stunned and frustrated. If we stand together and move forward with courage, however, then perhaps history can record that some good did come from this monstrous wrong.●

● Mr. ALEXANDER. Mr. Speaker, every so often something happens

that shocks the conscience of the civilized world.

Such an event took place on August 31, 1983, when the Soviets shot down Korean Air Lines flight 007, killing 269 entirely innocent people, including 61 Americans.

Soviet officials spoke of their sacred borders. They do not understand that it is human life that is sacred.

Soviet officials then gave a series of dishonest alibis. Apparently their respect for truth is as weak as their respect for human life.

Mr. Speaker, I want to join my colleagues in support of the resolution before the House.

It is right that we should demand a full explanation from the Soviet Union.

It is right that we demand compensation for the relatives of the victims.

It is right that we demand Soviet assistance in recovering the remains of the victims.

It is right that we call for a full investigation by the International Civil Aviation Organization.

It is right that we call for changes in the Soviet air defense system to prevent such a mindless tragedy from occurring again.

It is right and it is important that we take the Soviets, and Soviet actions, and the brutal and mindless system that caused those actions, before the Court of World Opinion.

Mr. Speaker, I believe it was Napoleon who said that when there is a conflict between the spirit and the sword, the victor will always be the spirit.

Soviet swords may threaten Poland, rain death on Afghanistan, or shoot down innocent planes, but the civilized spirit of human decency will rise against such actions every time.

And while we condemn the Soviets, as we should, let us remember the American idea, which is a better idea.

Let us remember the benefits of the American system, which is a better system.

Let us remember the strengths of the American economy, which is preferable to the bureaucracy and incompetence of the Soviet economy.

Let us remember American support for human rights, for peace, and for justice, which stand as our strongest weapons of the spirit against the Soviets mindless use of the sword.

Finally, let us be reminded by the Korean airliner tragedy that in our dangerous world, such unfortunate events can easily be triggered by paranoia that rational people cannot understand.

Commonsense becomes more important than ever, whether its directed toward the control of nuclear arms, the condemnation of Soviet brutality, or improvements in our air navigation facilities designed to prevent any more innocent people from being victim to the kind of madness that the civilized world stands united against.●

● Mr. HOPKINS. Mr. Speaker, I cannot enhance the sad and tragic discussion of the Soviet destruction of the KAL 007 airline and its 269 unsuspecting passengers. I would, however, like to reiterate my sorrow for the innocent victims of this needless act of cowardice resulting from the mechanized rote of the Russian military machine.

This incident is internationally mourned. But I believe many Americans feel a sense of loss—philosophically as well as personally. Certainly, the horror—real and imagined—of losing a loved one in such a humanly disgraceful fashion pierces our hearts. We, as Americans, tend to be nice guys who desperately want to given even our enemies the benefit of the doubt. Some of us have wondered at times, fleetingly, if our national, antipodal posture has been excessively stringent.

These philosophical skepticisms have peaked in recent months, in the wake of some of the most deliberate, premeditated public relations efforts by an apparently more opinion-conscious Soviet Government. I, myself, following a very productive congressional visit to Russia a few months ago, had allowed the rose to faintly taint my glasses; I was optimistic that Soviet propaganda about warming relations with its global neighbors was something more than superficial claims and boasting. It was not.

Along with the callous ending of KAL's flight 007 on the grim first day of September, hopes were shattered that the United States undisputed, verifiable evidence against the Soviets was too severe.

The Soviet Government is, undeniably, the pusillanimous bully we have painted it to be.

Many of my colleagues have eloquently expressed the deep sense of outrage we feel about the unjustified downing of a commercial airplane while on its fateful international flight, and I would like to associate myself with their remarks.

I also believe it is important to commend our President for the wisdom of his response to this reprehensible tragedy by not abusing it, by not overreacting militarily, economically, or politically.

On behalf of the people within the Sixth Congressional District of Kentucky, I support the resolution condemning the Soviet destruction of the Korean Air Lines jetliner on September 1, 1983.●

● Mr. ERDREICH. Mr. Speaker, citizens in my district, across our Nation, and indeed, across the world, are outraged at the senseless, cold-blooded murder by the Soviets of 269 innocent people, dead because they were aboard a civilian airliner which the Soviets shot out of the sky. This totalitarian superpower showed its true colors, once again.

To date, the Soviets have yet to provide justification for this abhorrent act; in fact, the events that have unfolded and the information that has been revealed since the attack have only confirmed even more the horror of this aggressive, barbaric act.

No explanation has been given by the Soviets, not for the act itself, nor for the actions of the Soviets in the wake of their crime against humanity.

I believe we in the Congress of the United States should give swift passage to this resolution.

And while I am in favor of the sections of the resolution calling for support for the measures the President has outlined to be taken by the United States in response to the Soviet attack, I would have preferred that further responses were made, such as trade and credit sanctions imposed by the United States and other nations, to make it pointedly clear that such blatant disregard for human life and for everything that the civilized world holds dear will not be tolerated.

The actions that we take today and in the future, to show our total unacceptance of such barbaric action and to seek assurances that such a tragedy does not repeat itself, may well determine whether civilian airliners, from the United States and throughout the world, will again be unwitting prey to outrageous acts of Soviet aggression.

The Soviets stand at the bar of world public opinion. The verdict of condemnation I hear is reinforced by this resolution which shows our resolve on this barbaric act. I urge our allies around the world to join with us in firm response to the act of the Soviet Union.●

● Mr. BIAGGI. Mr. Speaker, I rise in support of the pending concurrent resolution—something which I believe this Congress must pass if we are to have an effective method of expressing our collective outrage over the Korean air massacre.

A resolution of this type while lacking in force of law does present us with an opportunity to state in legislative language that we condemn the Soviet's act of military madness and murder. It allows us as a Congress to deplore the heinous action taken by a Soviet military machine which simply lost control.

A resolution of this type allows us to endorse the reasoned and rational approach taken by the President of the United States to this highly provocative act. Yet this resolution makes it clear that we seek the imposition of sanctions against the Soviet Union both punitive for this act—and hopefully to deter future actions.

The House and the Senate cannot stay silent on this issue. We must take a stand against this senseless act of

terrorism. Yet it would be inappropriate for the House and Senate to try and go beyond the policy of the President. This resolution addresses both of these concerns and does so in a responsible fashion—but unmistakably clear in the message it conveys to the Soviet Union.

Two hundred and sixty-nine innocent men, women, and children including our distinguished colleague Larry McDonald died on the ill-fated flight 007 in the cold waters off Japan. We must not rest as a nation until we have shamed the Soviet Union into both admitting their culpability and paying compensation to the families of the victims. The Soviets cannot be allowed to think that they can act with impunity—flaunting both codes of law and basic morality. We must approach our future relations with the Soviets with greater caution. Let us begin with the passage of this resolution today.●

● Mr. UDALL. Mr. Speaker, I have listened to many of my colleagues over the past few days, as they express everything from surprise to outrage over the horrible tragedy of the downing of Korean flight 007. And I can share the pain, frustration, and shock that is in this Chamber, in this country, and around the globe. Very few events in recent history has so shaken the sensibilities of the civilized world. Emotions have run very high on this issue. The deaths of 269 innocent people in an act of unadulterated aggression is unconscionable. At a time like this, it would be easy to let our feelings dictate our actions. But on a matter as sensitive as this, cool heads must prevail. And for the most part, I believe they have.

I applaud President Reagan's actions in response to the downing of flight 007. Despite calls for harsher sanctions, stopping the grain deal, and expelling Soviet diplomats, the President has chosen a course of reasoned moderation.

At the same time, many people have used this tragedy to call for more missiles, for ending the arms talks. Many of these feelings are understandable, when you consider the magnitude of this crime. But an escalation of tensions is not a thing that we need or can afford at this time At no time, have strategic arms reduction talks been more important than they are now. At no time, is the nuclear freeze more important then it is now. At no time, are improved United States-Soviet relations more important than they are now.

The Soviet action on flight 007 is frustrating and frightening. The men who made the decision to shoot down flight 007, are the same men who would be making the choices should there be a nuclear confrontation. With anti-Soviet rhetoric at an alltime high, we may be closer to a nuclear holocaust than ever.

So we must take every type of action possible to avoid this kind of scenario. We need to make progress in the strategic arms reduction talks, and have people involved who really believe in them. We need ratification of the nuclear freeze.

Winston Churchill once described the Soviet Union as "* * * a riddle, wrapped in a mystery, inside an enigma." The downing of the Korean airliner only hammers home the fact that we know very little about how the Soviet Union will react to different situations.

It is frightening to think about how close we came the other night to not just shooting down an airliner, but a possible nuclear confrontation through a misunderstanding.

The late Senator JACKSON had an important idea, when he proposed a joint United States-Soviet communications command center. Our old hotline between Moscow and Washington is outmoded and dangerous. We need to have state-of-the-art communications, to avoid tragedy through misconception.

We are heading down a treacherous road. But we can avoid a war by miscalculation, by getting to know our Soviet counterparts better. We do not need to have a war by mistake, as we nearly did in 1958 and a couple of times since.

I am deeply saddened by the loss of life associated with the Korean airliner. The Soviet Union's actions and justification of the downing of flight 007 is inexcusable and horrifying. But let us keep our perspective on this matter and United States-Soviet relations as we debate many important pieces of legislation in the near future. Let us look to the future and avoid the mistakes of the past.●

● Mr. YATES. Mr. Speaker, there have been very eloquent speeches today, all condematory to the Soviet Union's inhuman action in shooting down Korean Air Lines flight 007. I support this resolution. There can be no excuse for killing so many helpless air passengers. The Soviet Union has offered no excuses or any reasons for its action except, it says, to protect its national security. National security? From an unarmed plane? Its action does not make sense to any civilized society.

It is an act of international piracy and deserves to be treated as such. Until it recognizes its obligation and responsiblity to act as other nations in transiting this globe with civilian airways, its participation should be limited. I thought the airline pilots of the world were right in calling for ommitting the Soviet Union from travel schedules until and unless it agrees to respect the sanctity of human life in civil air travel. If, indeed, it chooses isolation because it considers it boundaries unavoidable even by accidental civil airplane error, its participation with other international airlines ought to be restricted.

I support this resolution. I believe it is important as an expression of the revulsion I feel and the world feels for this callous and brutal act.●

● Mr. DREIER of California. Mr. Speaker, I rise in support of House Joint Resolution 353, congressional condemnation of the Soviet criminal destruction of the Korean civilian airliner. I do not feel that this resolution is fully adequate, but it is at least a start.

We extend to the families of the victims our deepest sympathies. So many innocent people died, including a friend and colleague of ours. How much closer to home do Soviet atrocities have to hit before we are awakened to what is going on around us? This resolution calls for international investigations and recovery efforts. Yet the Soviets have already vetoed a U.N. resolution and they refuse to allow Japanese ships into their territorial waters to search for bodies. This resolution calls for reparations to families, also rejected by the Soviet Union.

I do not know what upsets me more, Mr. Speaker, the atrocity itself—which should hardly surprise any of us—or the fact that we are now in a situation where anything we do to punish the Soviets will either hurt us more, or not be followed by our allies.

I was impressed by the BBC interview with Soviet Foreign Minister Gromyko in Madrid last week. He stated that he was sure the West would soon forget this situation and let everything go back to business as usual. Are we going to allow this to happen? Does not this incident show us their true colors?

I would like to repeat the comments of several of my distinguished colleagues. This is not the end of the situation, only the beginning. It is the least we can do.●

● Mr. PACKARD. Mr. Speaker, I deplore the act of barbarism the Soviet Union committed when they shot down Korean Air Lines flight 007 on September 1. This destructive action resulted in the murder of 269 innocent passengers from the United States and 13 other nations. The United States and the entire international community cannot tolerate such acts of violence. The callous and uncivilized gunning down of this civilian aircraft must never be forgotten.

The safety of civil aviation has been placed in jeopardy by yet another example of air aggression by the Soviets. Sanctions aimed at the Soviets are vital if we are going to deter that country from future repetition of such inhumane behavior. We must bolster the strong words of disgust, revulsion, scorn, and fury with equally severe measures. Banning Aeroflot—the na-

tional air carrier—from landing in this country, suspending certain cultural, scientific, and diplomatic exchanges and working with other nations to limit Soviet civil flight in the West are all legitimate responses to this tragedy.

This attack was aimed at all societies that value individual rights and moral behavior. The Soviets' action reflects the total disregard they have for human life. Their flagrant neglect for human existence has been further compounded by their steady refusal to tell the truth. I call upon the Congress to cooperate with President Reagan in developing a measured and proper reaction to this international tragedy.●

● Mrs. BOXER. Mr. Speaker, I support House Joint Resolution 353.

There is no excuse acceptable to the civilized world to rationalize the Soviet action in shooting down the Korean Air Lines flight 007.

In a world where there are so many tensions; where the world is quickly being divided up into two camps, this incident demonstrates what a tenuous thread world peace is hanging on.

We must look at three issues:

First, what are all the facts of the incident? These must be thoroughly investigated.

Second, what are the appropriate responses? We must lead the world community to impose international sanctions which hurt the Soviets not Americans, and which do not cripple the chances for peace.

Third, what can be done to avoid incidents like this in the future? It is very important that better communication centers be established between the nations of the world and particularly between the Soviet Union and the United States.

Innocent people have been lost because of the fears and suspicions of the Soviet Union—fears and suspicions which got out of hand in this incident. There are no excuses. Let us take steps to express our outrage and to protect the world community from future tragedies.●

● Mr. ACKERMAN. Mr. Speaker, I rise to express my deep condemnation of the Soviet Union for its brutal attack upon Korean Air Lines flight 007. I strongly support House Joint Resolution 353 which expresses the revulsion of the Congress toward the Soviets for this vicious act. It represents yet another blatant example of the Soviet Union's failure to adhere to the standards of decency upheld by civilized society. The brutal murder of 269 innocent civilians cannot be explained away with flimsy claims about airspace, sovereign rights, and warning shots. Every citizen of the United States understands that the Soviet Union has an overriding fanatical obsession with national security. However, Soviet explanations for their behavior are totally lacking in credibility. No American can accept the outrageous Soviet statements that we should expect these results from an "infringement" of their airspace, and that we can expect a similar tragedy to happen again if another civilian plane strays into Soviet territory. This cold-blooded attitude reflects the Soviet Union's complete disregard for human life and the international aviation safety agreements designed to protect the lives of airline travelers.

The fact that the Soviet leadership is not in the least bit contrite about the loss of life aboard flight 007 points out the need to send a clear message to the Kremlin. That message we send to the Kremlin today is this: The civilized world rejects your excuses. Your behavior is a disgrace, and is recognized as such by the world community. As the elected representatives of the American people, we demand an apology and reparation payments to the relatives of those who died from your cowardly actions.

The resolution before us today is an important means of expressing our disgust for the Soviet handling of this incident. The Congress demonstrates, in the clearest of terms, our desire to see a worldwide response to this heinous act. Beyond this resolution, the steps we have taken within the appropriate international aviation agencies and the United Nations are positive. But this does not go far enough.

Mr. Speaker, I fully support this resolution; however, I believe that the United States must take potent action which goes beyond the strong expressions of condemnation which have been issued on the floor today. I believe that we must give increased priority to the control of high technology exports which allow the Soviets to make important gains in areas where their technology falls behind U.S. capabilities. We must be vigilant in our enforcement of existing laws in this area. We must also reevaluate our grain sale policy in light of recent atrocious Soviet behavior. Should the United States be feeding the war machine which murdered the 269 people on board this flight? Looking at the list of passengers on this flight, I saw the names of many children and young people whose lives were snuffed out before they had the opportunity to reach their full potential. Many on board were there by a stroke of fate. Many were ordinary citizens who did nothing to deserve this terrible death that results from the Soviet refusal to abide by civilized standards of behavior.

Mr. Speaker, I join my colleagues in support of this resolution. However, like so many other people in this country, I feel very strongly that we must take action that will outlive the resolution we pass today. Mr. Speaker, let this resolution be a first step in the effort to bring the Soviet Union to justice for this reprehensible crime. We must not allow this incident to die with the passage of this resolution.●

● Mr. BOUCHER. Mr. Speaker, I rise to join others from throughout the world in expressing my outrage with the Soviet Union for its attack of August 31, 1983, on Korean Air Lines flight 007.

The Soviet Union's attack on an unarmed commercial airliner, which resulted in the loss of 269 innocent people, underscores the fundamental difference between the Soviet Government and our own. Time and time again the Soviet Union has demonstrated that a paranoid sense of national security supersedes the internationally recognized rights of innocent human beings. If anything positive results from the tragic events of August 31, I would hope that it would be a renewed international focus on the Soviet Union's disregard for human rights. I would hope that world attention will be directed to the Soviet Union's brutal suppression of the Solidarity movement in Poland, their apparent use of chemical weapons against civilians in Afghanistan, their treatment of dissidents within their own borders and their failure to allow Soviet Jews to emmigrate to nations which respect the Jewish faith.

I congratulate the administration for its well-balanced response to this incident, and I urge this House to unite behind the President in his efforts to obtain reparations from the Soviets and to lead the free world in placing restrictions on Soviet commercial air traffic. In the coming weeks and months, as the public furor over flight 007 diminishes, it will be important for our Government to maintain pressure on the Soviets for a complete explanation of this horrible act and to press for reparations to the bereaved families of those aboard flight 007.●

● Ms. MIKULSKI. Mr. Speaker, I join with the citizens of this Nation and the rest of the world community in condemning the criminal destruction by the Soviet Union of Korean Air Lines flight 007 and the murder of the 269 innocent passengers and crew on August 31, 1983.

This criminal act is shocking, but not surprising when one considers the Soviet Union's long history of disregard for true justice and human rights. The fact that this crime was committed demonstrates the insensitive brutality of the Soviet regime, and this is compounded by their callous denial of any wrongdoing in the act. Even their own people are denied the truth through the Soviet regime's massive disinformation effort. It is this contempt for freedom and the utter dependence on secrecy in the name of state security that makes the Soviet regime capable of such a hide-

ous act. We in the free world must not lose sight of this fact.

Our response to this crime must be firm and resolute. We must unite with our allies and other nations to send a clear message to the Soviet Union that the world community is repulsed by such atrocities, and take action to prevent such crimes from happening again. I join my colleagues in support of the joint resolution before Congress that condemns the Russian regime for their action.

We must not forget, however, that when all is said and done, it is the families of the victims who suffer, and it is to them that I send my deepest sympathies.●

● Mr. NELSON. Mr. Speaker, I would like to express my abhorrence of the recent act by the Soviet Union in shooting down Korean flight 007, with 269 innocent people aboard.

I found this to be a horrible, reprehensible act; one that is inexcusable.

The Soviets owe an explanation to the entire world—they owe compensation—they owe an apology.

I realize that all this will not bring back those who died, including our friend and colleague, Larry McDonald. However, the Soviet Union must realize that barbaric acts like this will not be tolerated. And we, the Congress of the United States, should continue to take the lead in publicly and universally reprimanding them.

Therefore, I support the sanctions outlined by President Reagan. In fact, I suggest we go a step further and use this opportunity to insure the absolute prohibition of any export of high technology equipment to the Soviet bloc nations.

This incident will surely result in a deterioration of the relations between the United States and the Soviet Union.

Yet, we must continue to use good judgment and wisdom in dealing with this tragedy. We must continue to issue stern warnings that further acts of uncivilized behavior will not be tolerated.●

● Mr. FAZIO. Mr. Speaker, through this resolution we are showing our outrage at this deplorable act against the civilized world. There is no ground so sacred or information so critical to justify the deliberate and unnecessary squandering of 269 innocent civilian lives.

I support the administration's efforts to generate a collective response to this atrocity so that we can exact just compensation for the families of the victims and appropriately penalize the Soviet Union for its callous disregard for human life. Unlike unilateral economic sanctions which have been tried and have failed in the past, this approach will bring the full force of world public opinion on the Soviets and generate appropriate retribution for this senseless act.

I caution, however, that we cannot afford to cut off communication with the Soviet Union in any arena, and particularly in the area of arms control. We engage in arms control negotiations because it is in our own interest and the interest of the free world. To cut off those critical negotiations would not only be contrary to these interests but would serve to only exacerbate the Soviet paranoia which created the environment in which this event occurred in the first place.●

● Mr. FRENZEL. Mr. Speaker, I will of course support the resolution. The Congress should support the President's leadership in the matter.

As a Republican, I try to support the President when I can. This time it is easy. I have seldom been prouder of a Chief Executive than when Mr. Reagan reported on TV to the American people on the incident.

He was serious and concerned, but he correctly focused on the real problem—pinning the tail on the donkey. He has lead the world in identifying this Soviet brutality, and in attempts to make international air travel safer.

President Reagan also had the good judgment not to listen to extreme counsel urging him to indulge in fierce, symbolic, by counterproductive acts. Too often in the past we have expressed our displeasure with Soviet conduct by shooting ourselves in the foot.

The President is correctly trying to coordinate world action to punish the U.S.S.R. without unduly harming ourselves. He deserves our congratulations and our thanks.●

● Mr. MATSUI. Mr. Speaker, I would like to express my strong support for approval today of this resolution condemning the Soviet Union for shooting down an unarmed Korean airliner and taking the lives of 269 innocent civilians. Through this resolution, I believe, the Congress will clearly demonstrate the American people's abhorrence of this Soviet action and show the strength of our Nation's commitment to appropriate international sanctions.

As we are all aware, the Soviet response to this incident has been one of denial and obfuscation. Until faced with incontrovertible evidence to the contrary, the Soviet Government refused to acknowledge it had even shot down the airliner. Most recently, the Soviet Union tried to claim that the Korean aircraft was on a spying mission for the United States.

While it is vital that the United States respond to the Soviet attack and its subsequent propaganda, we must also insure there is concerted action by the international community. Otherwise, we are in danger of turning the incident into simply a United States-Soviet confrontation in which the legitimate concerns of all nations are subsumed.

For this reason, I fully support provisions of this joint resolution which urge our allies and other nations to work with us in securing from the Soviet Union the following demands: A full explanation of the events leading up to the attack; reparations for the families of the victims; an investigation of the incident by the International Civil Aviation Organization and a change in Soviet air defense procedures to insure safety for all airliners.

By thus working with the international community, the United States can fulfill its proper role as a judicious and rational world leader. Without aggravating world tensions or signaling a return to the cold war, we can insure that the Soviet attack is neither easily forgotten nor without serious, long-term consequences for the Soviet Union.

I urge all of my colleagues to support this important resolution.●

● Mr. SHUMWAY. Mr. Speaker, it is with great sorrow and anger that we have occasion to consider the resolution before us. We mourn the loss of the 269 civilians, including our colleague Larry P. McDonald, who were aboard Korean Air Lines flight 007 when it was shot down by the Soviet Union almost 2 weeks ago and share the outrage of the international community at this offensive Soviet action. The killing of civilians aboard an unarmed commercial plane by the Soviets is a heinous act which repulses those people throughout the free world who value human life.

As we are all acutely aware, on September 1, Korean Air Lines flight 007, for reasons which remain unknown, strayed off its intended flight path and veered into Soviet airspace, flying over the Kamchatka Peninsula, the Sea of Okhotsk, and Sakhalin Island, areas which are militarily sensitive to the Soviets. After tracking KAL 007 for 2½ hours and after making what appears to be little if any effort to contact the Korean jet in order to inform it of its misguided course, the Soviet military determined that flight 007 was a spy plane and without provocation, shot it down from the sky. All 269 persons aboard the aircraft were killed. This Soviet "shoot first, ask questions later" mentality is morally repugnant and underscores the Soviet Union's callous disregard for human life and for the minimum standards of a civilized world. The shooting down of Korean Air Lines flight 007 is a reprehensible act of violence which defies explanation and which warrants the condemnation of the entire international community.

Yet impassioned and anguished rhetoric will not suffice. As the international community is united in anger, so too must it be united in action. The President has correctly recognized that the Soviet attack on KAL 007,

which had passengers from 13 countries aboard, is not a bilateral United States-Soviet Union issue and thus has sought a coordinated international response to the incident. The United States is working closely with the United Nations and the International Civil Aviation Organization to look into the incident, to take coordinated steps against the Soviet Union for its actions, and to establish new civil aviation codes for international air safety in order to prevent a recurrence of this type of tragedy. Furthermore, the United States continues to work with its allies to receive a clear explanation from the Soviets for the attack on KAL 007, an apology by the Soviet Union for the incident, compensation for the families of those abcard the aircraft, and a guarantee of the safety of future civilian flights as well as to suspend commercial air traffic to and from the Soviet Union.

I endorse the President's measured and restrained response to the appalling action taken by the Soviet Union against Korean Air Lines flight 007. This response by the President should not be viewed as a softening of U.S. attitudes toward the Soviet Union but rather as measured resistance to the temptation to take harsher actions, actions which could transform this tragic incident into a major confrontation between the United States and the Soviet Union.

With anti-Soviet sentiments and rhetoric running high in the United States, however, there has been a call by some for a harsher U.S. response to the incident involving KAL 007. Possible retaliatory actions bantered about have included revocation of the recently signed grain agreement, imposition of trade sanctions, severance of diplomatic relations, and suspension of arms control negotiations. We are all aware, however, of the problems caused both at home and with our allies by the previous grain embargo and past trade sanctions imposed by the United States on the Soviet Union; these actions clearly have not proven to be an effective means to achieve diplomatic ends with the Soviets.

Furthermore, despite this recent tragedy and our condemnation of it, the imperative to reach an arms control agreement with the Soviet Union continues to exist. It is in the interest of our Nation and of the entire international community that the danger of nuclear war be reduced to the greatest degree possible. It is therefore vital that we not cut off dialog with the Soviets but that we continue our efforts to reach an effective, equitable, and verifiable nuclear arms agreement based on the principle of substantial and militarily significant reductions.

Any agreements with the Soviet Union must necessarily be based upon the good faith of both parties to adhere to the agreement. Yet as President Reagan stated last week, following the Soviet attack on KAL 007, "what can be the scope of mutual discourse with a state whose values permit such atrocities?"

No, Mr. Speaker, it will not be business as usual with the Soviets and Soviet credibility, as evidenced by the Soviet Union's attack on the Korean airliner and its unwillingness to admit its responsibility for the shocking incident, is not great. But it is critical in the interests of international security, stability, and peace, that our line of communication with the Soviets at the arms control negotiating table at Geneva be kept open.

The world will not soon forget the inexplicable Soviet action which claimed the lives of 269 innocent people. The international community must continue to exert pressure on the Soviet Union, which has expressed no regret over the incident, has deflected its responsiblity, and whose account of the tragedy remains inadequate and unacceptable, to admit as culpability. The international community needs, however, to keep in mind that we must continue to live in the same world as the Soviet Union and that the imperative for dialog remains.

● Mr. HEFNER. Mr. Speaker, it is imperative that the U.S. Congress take the necessary action to send an effective and appropriate message to the Soviet Union that we and the world community will not allow the shooting down of KAL flight 007 to simply slip away into oblivion, to be forgotten after all the rhetoric surrounding the incident.

Soviet officials and the Soviet military command were quite aware that flight 007 was a commercial flight carrying innocent people who had no knowledge or concern that they were about to be sent to their deaths by a Soviet missile. They were decent, loving, and law-abiding people with yet unknown contributions to be made to world humankind and they had every right to expect that they would arrive at their destinations safely without being shot out of the sky.

That they went to their deaths at the hands of the Soviets through a deliberate act of terrorism displays an utter disregard by the Soviet Union for any human dignity or respect for human life and acceptable mores of human behavior. It was a murderous, barbaric act which must be met with outrage, condemnation, and appropriate action to produce effective reprisals for a deed that is absolutely unthinkable to the civilized world.

I wholeheartedly support the condemnation resolution calling for a full and frank explanation of this atrocious barbaric deed with apologies and full compensation to be made to the families of those who lost their lives. I support the call for an international investigation by the International Civil Aviation Organization into this crime, and believe we should keep up the pressure for a full accounting of the tragedy. We should demand that the Soviet Union modify its air defense procedures and practices to assure safe passage of commercial flights so that this kind of thing will never happen again.

We must continue to cooperate with the international community in putting pressure on the Soviet Union to admit its full responsibility in this terrible incident. The peace and freedom of the world mandates that we take a stand against this kind of cold, ruthless, aggression by the Soviet Union.●

● Mr. BOSCO. Mr. Speaker, the recent destruction of a Korean passenger airliner and the tragic loss of life has provoked a national discussion relative to the appropriateness of President Reagan's response. I am one who believes the President acted in a dignified and responsible manner, reflecting the sense of outrage felt by all Americans, our sympathy for the families, and the need to pursue this matter through appropriate international channels.

I do not agree with the President, however, that this terrible tragedy points to the need for a further buildup of our nuclear arsenal, and, in particular, the MX missile. It is estimated that at present the United States possesses over 30,000 nuclear weapons of various types, and the Soviet Union some 20,000. Each of our 33 strategic submarines is capable of destroying every major city in Russia, to say nothing of our ICBM's, strategic bombers, and other major weapons. Yet all of this firepower did not prevent the Korean airliner from being shot down, nor could another 100 MX missiles.

Our purpose now must be to prevent these destructive incidents from occurring in the future. This will mean a renewed emphasis on building-down nuclear arsenals, so the next international debacle does not involve far worse loss of lives than the last. We must work particularly hard to eliminate weapons, such as the Pershing II and Soviet SS-20, that can reach their targets in such little time as to make response an almost automatic military decision, regardless of the circumstances surrounding the original firing.

The fact that the Soviet Union is capable of using incredibly poor judgment in the exercise of its military power should only heighten our comitment to removing these weapons of massive destruction from their hands as well as our own. I believe President Eisenhower's remarks are more timely now than ever before:

When we get to the point, as we one day will, that both sides know that in any out-

break of general hostilities, regardless of the element of surprise, destruction will be both reciprocal and complete, possibly we will have sense enough to meet at the conference table with the understanding that the era of armaments has ended and the human race must conform its actions to this truth or die.●

● Mr. HOWARD. Mr. Speaker, I most strongly condemn the Soviet Union's hideous attack on Korean Air Lines flight 007 which caused the loss of 269 innocent men, women, and children.

Considering its vulnerability, a commercial airliner which wanders off-course should be accorded special assistance. Anything less simply reflects a lack of humanity and compassion—an offense which the Soviet Union is most certainly guilty. We cannot bring back those innocent people who lost their lives aboard the ill-fated plane, but measures must be adopted to insure that such a tragedy never happens again. In addition, the incident must be taken into account in our future dealings with the Soviet Union, which is ruled by a government so rigid and paranoid that it cannot bring itself to offer an acceptable apology for shooting down the aircraft and killing 269 people.

I call on the Congress and the President to cooperate in formulating a response to the Soviet Union's revolting act of violence. The Soviet Union must answer more satisfactorily to the civilized world, and we should demand a proper apology and compensation for the victims' families.

In light of this tragedy, we must reevaluate the recent grain agreement made with the Soviet Union. The grain deal was flawed from the start. The agreement did not contain the usual escape clause allowing us to cancel sales in the event of crop failure or other extraordinary events. Now after this despicable act we find ourselves sending grain to the Soviets while we face half a harvest as the result of the drought in the Midwest.

In addition, we might consider imposition of a tariff on Soviet imports which could be used to compensate American families who lost loved ones in the attack.

We all should condemn the Soviets' conduct in this matter, but it is also essential that we search for ways to prevent a recurrence of this type of tragedy. With this in mind, I have cosponsored legislation which would establish a joint United States-Soviet communications center. This would provide an additional line of communication which could be used to prevent another incident like we have seen with the ill-fated KAL plane.●

● Mr. AKAKA. Mr. Speaker, I want to voice my very strong support for House Joint Resolution 353, a resolution condemning the violent and senseless act of the U.S.S.R. in shooting down the civilian Korean Air Lines plane on September 1.

The President has taken a number of steps to make clear this Nation's abhorrence of the Soviet action. In addition, many suggestions have been made here today regarding our response to the KAL shooting. It is in this context that I would bring to the attention of my colleagues the steadily increasing Soviet military presence throughout the Pacific Ocean. In recent years we have heard that the United States should decrease its surveillance and military presence in the Pacific. We have been urged to lessen our involvement in the area and lay the burden of defense and surveillance on Japan, the Philippines, Australia, and other nations of the Pacific. I do not agree with these proposals. No, we cannot allow the Soviets with their policies of brutality and insidious expansion to extend their sphere of influence in the Pacific, an area liberated with the loss of thousands of American lives during World War II. We must continue to provide for the defense of the Pacific with a renewed awareness of the threat from the Soviets.

We can renew our commitment to defense in the Pacific by supporting the defense efforts of the Pacific nations. That can be partially accomplished by initiating a policy whereby U.S. naval vessels no longer needed to meet our defense responsibilities are given to our closest allies in the Pacific. Many of these nations would gladly increase their defense efforts with this minimal effort on our part. I would especially urge this Congress and the President to consider initiating such a policy in cooperation with our ANZUS allies and Japan. Such a policy would increase our surveillance capabilities throughout the Pacific and curtail the U.S.S.R's attempts to increase its sphere of influence.

Let us not forget this very cruel lesson of the extent of Soviet brutality. It could happen again. I do not support a policy to increase our military strength as a hysterical reaction to the Soviet shooting of the KAL plane. No; I believe in renewed caution and defense against the Soviet military might. Renewing our commitment to the defense of the Pacific is the proper step to take in this instance and in the future.●

● Mr. McEWEN. Mr. Speaker, I join with my colleagues in expressing gratitude to the House Foreign Affairs Committee for expeditiously providing this House with the opportunity to register our collective outrage at the Soviet attack on Korean Air Lines flight 007. I wish to express my own view that out of this tragedy and affront to human life, we can recognize the threat to world peace represented by the Soviet mentality which produced this action. We must register our alarm in tangible ways, and encourage a cooperative demonstration by the entire family of nations which share our indignation at this attack on innocent civilians. I commend the careful analysis of this attack and the firm manner in which President Reagan voiced the feelings of all Americans. While it is true that international dialog must be preserved, I look beyond the truism that Americans must coexist with the Soviet people in seeking ways to promote arms control and world peace. This tragedy which House Joint Resolution 353 addresses, cannot be reversed. However, I sincerely hope that out of this distressful event, all Americans will come to better appreciate the worldwide threat to those values which our Founding Fathers held so dear, that are under attack by the Soviet leadership. This is our opportunity to look beyond the necessity of finding constructive ways to discourage a repetition of this barbaric attack on commercial aviation by the Soviet Air Force. In short, it is an opportunity to declare forcefully to the world that there is a better way to share the living-space of this planet. We must move beyond outrage and propagate the American ideals of democracy and respect for human life and prosperity, which offer mankind the promise of a better future, and which mark the gulf that separates us from our Soviet neighbors.●

● Mr. FEIGHAN. Mr. Speaker, bewilderment is the natural reaction to a tragedy like the Soviet attack on Korean Air Lines flight 007. Anger and vengeance soon follow. But as President Reagan and the Congress sort out their options in the coming days and weeks, we should remember the words of Napoleon, who said that "the heart of a statesman should be in his head."

How should the United States respond to this latest—and most cowardly—example of the Soviet Union's disdain for human decency? A cautious but firm approach seems wise. Of course, we should condemn the atrocity in the strongest terms and do everything in our power to focus the indignation of the world on the Soviet Union. But we should resist the temptation to take an drastic action.

Too many questions have yet to be answered: Was downing the passenger airliner the unplanned act of a nervous or overzealous local commander? Or a conscious effort by the top brass in the military to discredit Soviet leader, Yuri Andropov, who has angered the Russian defense establishment by transferring military funds to consumer industries? Even more disturbing, did Andropov authorize the sinister act himself? Only the boys in the Kremlin know for sure, and they are not telling the truth.

That is why the immediate priority of the United States and other nations

must be to demand—through bilateral channels and the United Nations—a full accounting and apology from the U.S.S.R. The principal aggrieved parties, Korea and Japan, should take the lead in this effort. If world attention becomes focused on the United States response, not the Soviet attack, it will be impossible to avoid the perception that we are using the innocent victims of this tragedy as pawns in the chess game of superpower politics. Nothing would please the Soviets more than this.

We should also take a good, hard look at the lessons of Afghanistan and Poland. As the smoke clears, many voices call for trade embargoes and an end to diplomatic contacts. Others work to delay or derail the arms control negotiations in Geneva, while pressing for an appropriate military response. What these emotion-filled pleas ignore is the unsettling and damaging effect that actions like the grain sales embargo and the pipeline sanctions have had on U.S. domestic and foreign policies. Without the unwavering support of the American people and our allies abroad, unilateral trade cutoffs hurt the United States more than the U.S.S.R. where the leaders are more than willing to tighten the screws at the expense of their people. Ending diplomatic contacts is also counterproductive. We negotiate arms control agreements and maintain official relations with the Soviet Union because it is in our best interests to do so, not because we like them, trust them, or agree with their ideology. When the alternative to mutual accomodation is anarchy and a drift toward nuclear conflict, we have no choice.

If history is any guide, the tragedy of KAL flight 007 may offer us a valuable opportunity to reach useful agreements that would preclude the recurrence of such devastating events. After the nerve-wracking Cuban missile crisis of 1962, President Kennedy and Premier Khruschev explored the possibilities of instituting high-speed, direct communications links between the leaders of the United States and the U.S.S.R. Less than 1 year later, the hotline agreement became the first bilateral attempt by the United States and the Soviets to reduce the danger that accident, miscalculation, or surprise attack might trigger a nuclear war. Since then, the hotline has been an invaluable tool to prevent possible misunderstandings between the two superpowers, particularly during the tension-filled days of the 1973 Arab-Israeli war.

Current proposals before Congress call for establishment of a permanent U.S.-U.S.S.R. communications center. Located in a third country, the communication-consultation center would be staffed by technical, military, and diplomatic personnel from both nations. The cost of the center would be shared equally by both countries, and it would have no intelligence-gathering capabilities. Now is the perfect time for the President to propose negotiations on this and other confidence-building proposals to the Soviet Union. The scope of the consultations could also be expanded to include discussions on provocative incidents between military and nonmilitary aircraft. Although the United States and the Soviet Union signed a 1972 agreement regarding prevention of incidents on the high seas, no bilateral or multilateral protocol has been added to govern incidents between military and nonmilitary aircraft. If such an agreement was in place last week, we might not be discussing it today.

Nothing is going to bring back the people who were lost, and there is no excuse for a government callous enough to destroy an unarmed civilian aircraft. The tragedy vividly demonstrates the dangers of the world we live in, a world that will survive only if we heed Einstein's call for a "new manner of thinking." Let us hope that disasters like this can increase our understanding and teach us a better way.●

● Mr. SILJANDER. Mr. Speaker, I rise in support of House Joint Resolution 353, a joint resolution condemning the Soviet criminal destruction of the Korean civilian airliner.

On September 1, 1983, the Soviets shot down an unarmed civilian jetliner with Congressman Larry McDonald of Georgia and 268 other passengers aboard. The act was barbaric and insane.

I have personally been struck by the incident because Larry, my dear friend and colleague in Congress, was on board.

Larry McDonald was probably the most anti-Communist Member of Congress. Everything he stood for and fought against came true for himself in this single incidence of lunacy. Yet was it lunacy? Both Larry and myself never thought the Soviets acted so irrationally. So, implausible as it sounds that Congressman McDonald was shot down for his beliefs—it is equally implausible or irrational to think the plane was even shot down at all! To me, there must be a reason this act of coldblooded murder was committed by the Soviets. I, for one, will not rest until the Soviets' subversive and immoral reason for this grizzly act is revealed.

Congressman McDonald is the first elected U.S. official to be killed by a foreign government. After such an inhumane act, how can we trust the Soviets in any unilateral nuclear freeze, in arms reduction talks, or any other commitment of trust? I can only speculate that perhaps the Soviets are testing us to see just how far they can go in world domination before we react and put a stop to it.

We are now reaping the rewards for the liberal knee-jerk apologists who have so weakened the respect for America on the international scene that the Soviets can act without fear of retribution. It is time for all America, including all the disparate lobbying groups in this country, to put aside their differences in demanding satisfaction from the Soviets. It is time for all of us to realize that freedom is not free. It is gained through sacrifice, commitment, and strength of resolve to oppose tyrants, no matter what their strength. It is precisely the Soviets' slavery to a central demagog and not freedom that led to this "accident," if it can be called such.

What should we do that has not already been done in this instance? By claiming the KAL 007 was a spyplane, the Soviets have failed to give a satisfactory explanation of their actions. After all, they monitored the plane for 2½ hours. From what little I know of Soviet capabilities, there was more than sufficient time to identify the plane and its occupants.

Again, what should we do? First, close all Soviet offices other than the main Embassy in Washington, D.C., and restrict Soviet travel in the United States to the District of Columbia area. Second, deport Soviet "diplomats" who are in reality agents, exempting again the Washington, D.C., Embassy. Third, declare Poland and Romania, both Soviet-occupied countries in default of their Commodity Credit Corporation loans. Fourth, indefinitely suspend all treaty talks until the Soviets have established to U.S. satisfaction they can be trusted (compliance with all existing treaties for a period of years). And fifth, demand they show their good faith by removing all Soviet military and civilian advisers, and equipment to include missiles and military aircraft from the Western Hemisphere.●

Mr. ZABLOCKI. Mr. Speaker, I have no further requests for time, and I move the previous question on the joint resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BROOMFIELD. Mr. Speaker, on that I demand the years and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 416, nays

0, answered "present" 2, not voting 16, as follows:

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING THE SPEAKER TO DECLARE A RECESS AT ANY TIME ON WEDNESDAY, OCTOBER 5, 1983

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that it may be in order at any time on Wednesday, October 5, 1983, for the Speaker to declare a recess for the purpose of receiving in joint meeting the President of the Federal Republic of Germany.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

REPORT OF RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1010, COAL PIPELINE ACT OF 1983

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 98-353) on the resolution (H. Res. 309) providing for the consideration of the bill (H.R. 1010) to amend the Mineral Leasing Act of 1920 with respect to the movement of coal, including the movement of coal over public lands, and for other purposes, which was referred to the House Calendar and ordered to be printed.

□ 1800

PERMISSION FOR SUBCOMMITTEE ON CRIME OF COMMITTEE ON JUDICIARY TO SIT TOMORROW DURING 5-MINUTE RULE

Mr. HUGHES. Mr. Speaker, I ask unanimous consent that the Subcommittee on Crime of the Committee on the Judiciary be permitted to sit during the 5-minute rule tomorrow.

It has been cleared with the minority.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

COMMENTS REQUESTED BY COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT ON PUBLISHING OF OFFICIAL RECORDS OF HOUSE

(Mr. STOKES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STOKES. Mr. Speaker, on June 30 of this year, the House agreed to House Resolution 254, by a vote of 409 to 0, authorizing and directing the Committee on Standards of Official Conduct to undertake an investigation into alleged improper alterations of House documents. A part of the committee's inquiry involved the serving of interrogatories on each Member of the House during the 97th Congress and certain present and former congressional and committee staff. My remarks today are prefaced with a reminder that these interrogatories should be received in the committee office no later than tomorrow September 15.

A great deal of work has already been completed by the committee staff. Yet more needs to be done. Specifically, the committee is also mandated to report to the House any recommendations it deems proper with respect to the adequacy of the present code of official conduct or the Federal laws, rules, regulations, and other standards of conduct applicable to the conduct of Members, officers, or em-

ployees of the House to prevent the improper alteration of transcripts of hearings or other documents. I am therefore taking this opportunity to solicit any comments or advice that you may wish to offer regarding the procedure by which the official records of the House are published. In addition to obtaining the views of the Members of the House, the committee is likewise interested in the opinions of the committee and subcommittee staff directors, Government Printing Office personnel, Office of Official Reporters staff people, and those individuals in congressional offices who have the responsibility delegated to them for the editing of their Member's statements. In short, the committee invites all interested parties to share their advice and suggestions with us.

So that we may expeditiously review and analyze any comments that you may offer, we ask that those who wish to present testimony at a public hearing or statements for the record notify the Committee on Standards of Official Conduct within 7 days.

ARMS CONTROL PRINCIPLES

(Mr. FAZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAZIO. Mr. Speaker, our colleague from Wisconsin (Mr. ASPIN) has long been a leader in this Congress and in the country in behalf of arms control. Recently he made a significant contribution to the evolving debate on this subject by publishing a very well reasoned white paper which I think will help focus our attention, and hopefully the attention of the administration, on the moves that need to be made in October in Geneva to bring about a successful resolution to the START talks that are now in recess.

The Scowcroft Commission report, which we have tentatively, at least, adopted in this body, was based on a three-pronged approach: The deployment of the MX, a new, small ICBM, perhaps a mobile midget missile, and arms control. In my opinion, the administration thus far has given inadequate attention to the arms control element of the Scowcroft Commission report.

It seems to me that the principles that are outlined in the Aspin white paper, which focus on throw-weight differential, on the evolution of the bomber force in both the Soviet Union and the United States, and the third significant issue that has so far been a blockage to a proper resolution of this issue, the large MIRV'd ICBM force that both sides currently have in their arsenal, need once again to be reemphasized and reaffirmed by the Commission with recommendations to the administration for further action and presentation on October 6 in Geneva.

I am very hopeful that the work that Mr. ASPIN has contributed in this regard and the work that the Scowcroft Commission is now doing on his recommendations will be a guideline to the administration. As one who has supported the MX, I can only say that my vote on the very significant defense appropriation measure yet to come this fall will be based upon the success the administration has in meeting this test. Arms control does need to have a greater emphasis that this Congress so desires placed upon it. The administration must understand that if it is to succeed with the MX.

Hopefully, all Members, regardless of their views on the MX, who have a desire to reach a bipartisan consensus on arms control, will read Mr. ASPIN's paper.

SOME THOUGHTS ON POLITICS, STRATEGY, AND ARMS CONTROL PRINCIPLES

(By Les Aspin)

The key question in strategic arms control today is whether we can get beyond negotiating among ourselves so that we can begin to negotiate with the Soviet Union.

The many sides in our own domestic debate are so captivated by their conflicts with one another that they scarcely have any time or energy available to figure out how we should deal with the Soviets. As a nation we rather resemble a highly fractious labor union engaged in a battle over who are to be its leaders, what are the desirable terms for a new contract, which faction is to get credit with the members for proposing what, and whether or not to cancel the new dues assessment for a strike fund. In the meantime, opposing management (headed by a notoriously tough-bargaining, even union-busting, Chief Executive Officer) sits there smiling, waiting and building up its inventories. The prospect for reaching a reasonable deal under these circumstances is not bright.

So it is with arms control. When conservatives are out of power, they argue that any proposed arms accord (e.g., SALT II) merely ratifies Soviet advantages and, further, risks creating an arms-control-induced euphoria that will undermine our will to arm ourselves adequately. On the other hand, when liberals are out of power, they argue that the Administration's proposals are not made in good faith, are too one-sidedly tough on the Soviets and are merely a screen for an arms buildup.

Although it is a reasonable judgment that it was the conservative opposition to SALT II in 1979-80 that was the major provoking incident in this chain of events, there is no doubt that, whoever started things, our nation is now caught in a pathological cycle. Each side is organizing mass movements against the other's arms control proposals. The conservatives did this in 1979-80 and, when coupled with the concerns about national weakness crystallized by Iran and Afghanistan, their opposition to SALT II effectively helped rally the troops for their 1980 election victory. The liberals are now doing the same thing with the freeze movement, looking toward 1984. Each has been trying to use the passions created by the highly emotional issues of national vulnerability and nuclear war to raise money by mass mailing campaigns, to help put more of its people in power and to change the face of American politics.

It has often been said that "the Lord looks after fools, drunkards, and the United States of America," but one must ask if we can continue to count on such beneficence. Where is our arms control Tong War leading? Liberals may be able to continue for a year or two to use the Reagan Administration's blunders to raise money, adopt party platform planks, and help win some elections—as the conservatives did in 1980. But what about the long run? What about the requirement that treaties be approved by two-thirds of the Senate? I can see a Democratic President quickly negotiating an arms control agreement with Mr. Andropov after January 20, 1985 (an agreement, let us say, that cancels MX and the new Soviet SS-X-24 ICBM, reduces various SALT II limits by, say, 10-20 percent, and ratifies for the long term the Soviets' existing advantage in large missiles) and then finding himself beset by a recalcitrant 34 Senators and a fire-storm of right-wing opposition—looking toward the 1986 elections. And so on.

It is at least worth exploring whether there might be a better way—a way to listen to the reasonable portions of what each side in our domestic debate has been saying and to develop, from that, the outline of a mutual position. The guiding principles of such a position have to be simple enough that people can understand them, write about them in the press and talk about them on television. They needn't pass the test of fitting on a bumper sticker, but they must be clear enough to the informed, but non-expert, public to compete with those—"Stop Salt" or "Freeze Now"—that do. This is one of the great disadvantages of both SALT II and the original START proposal. Each, with all its sub-limits and sub-sub-limits, reads as if it were drafted by a committee of lawyers. (Both probaby were.) It is very hard for even an informed public to debate the merits of a treaty as complex as a debenture. It is even harder to organize popular support for one. This doesn't mean there shouldn't be detailed provisions dealing with verification and other such matters in an eventual arms control treaty—merely that the agreement ought to be centered on, at most, two or three principles that can be discussed intelligently.

One way to see whether such an agreement is possible is to construct an ideal, abstract agreement based on technical criteria. These efforts, however, tend to be ignored by everyone but their authors because no one else has any stake in them. Another way, a more political way, is to try to broker an agreement among the various factions—a position the parties could live with over the long haul as we try to negotiate with the Soviets. We must keep in mind that we would be trying to use a process to develop a few principles, not a laundry list of limitations, and that these must be compatible with a strategically sound agreement. What is strategically sound? We will adopt the definition in the Scowcroft Commission Report: we are trying to find something that will "permit[t] the United States to move—over time—toward more stable strategic deployments, and giv[e] the Soviets the strong incentive to do the same." By "stable" we mean survivable forces for both sides, with no significant unilateral advantages and minimal (ideally no) advantages from striking first.

1. DESTRUCTIVE POTENTIAL

To broker an agreement among our domestic factions, we must decide what part of the parties' previous positions to include and what to ask them to give up. The key disagreement between the Administration and a number of its critics involves the destructive power of ballistic missiles. Although accuracy is important in being able to destroy hardened targets, the yield of a weapon—as measured in megatonnage (its destructive power as calculated in millions of tons of conventional explosive)—is also important in attacking both hardened and unhardened [1] targets. Actual missile yield is difficult to verify. The most verifiable measure for yield is a missile's throw-weight—essentially the weight of the missile's warhead, guidance, and MIRV-dispensing mechanism, if any. Because the Soviets have gone in for large missiles such as the SS-18, having over twice the throw-weight of even the MX, they have in their missile force of some 2,300 ICBMs and SLBMs about 13 million pounds of throw-weight. The United States has, in comparison, about 4.5 million pounds on its approximately 1,600 ICBMs and SLBMs. Endless arguments are possible about this disparity. Does it matter, since each side has about 8,500 ballistic missile warheads.

Note.—Following are the numbers of missile launchers and warheads under the SALT II counting rules:

UNITED STATES

	Missiles	Warheads
ICBM's		
Titan	50	50
MM–II	450	450
MM–III	550	1,650
Subtotal	1,050	2,150
SLBM's		
Poseidon	304	4,256
Trident	264	2,112
Subtotal	568	6,368
Total	1,618	8,518
SOVIET UNION ICBM's		
SS–11	520	520
SS–13	60	60
SS–17	150	600
SS–18	308	3,080
SS–19	360	2,160
Subtotal	1,398	6,420
SLBM's		
SSN–6	400	400
SSN–8	292	292
SSN–18	208	1,456
Subtotal	900	2,148
Total	2,298	8,568

Conservatives tend to argue that it matters a lot—that the high Soviet missile throw-weight, if ratified as a perpetual Soviet advantage in an arms control agreement, would give the Soviets a permanent and important edge over the United States. In part, they argue, this is because a large amount of throw-weight gives one the ability, relatively quickly, to replace a large number of warheads with an even larger number of smaller (presumably quite accurate) ones, and thus to multiply quickly one's ability to attack hardened targets. This is often called the ability to "break out." Also, as discussed below, a nation having a significant advantage in throw-weight is better able than its opponent to attack soft targets with a barrage of warheads. Conservatives tend to conclude that any arms control proposal should eliminate this Soviet advantage and do so promptly—otherwise the agreement will be a sham and delusion. Much time has been spent recently within the government arguing whether these sharp and quick throw-weight reduction demands should be incorporated directly or indirectly into our START proposals. That is, should they be stated in terms of the Soviets having to get down to a total level of missile throw-weight near ours, or should they be stated as very low sublimits on large Soviet ICBMs? As originally advanced, our START proposal would have required the Soviets to have no more than 210 large missiles of SS-19 size or larger (essentially the size of MX) and no more than 110 very large missiles of SS-18 size (about 2½ times the size of MX). Since they now have 668 SS-18s and SS-19, including 308 SS-18s alone, the Soviets would have to cut these, their newest ICBMs, by two-thirds quite quickly.

But whether we propose that the Soviets scrap the vast majority of their new ICBMs in the near future because of direct limits on throw-weight or because of indirect limits on large missiles, such proposals are so unilateral and drastic that they are unlikely to be embraced by the Soviets no matter how much we insist. Perhaps in a negotiation that was less in the public eye and in which fewer people had emotional and political involvement, the Administration's approach might be accepted by many congressmen as a tough but valid initial position. After all, the President is a former union negotiator and a man reportedly proud of his reputation as a hard bargainer. Maybe he feels he has a realistic chance of getting the Soviets to cut, say, one-third of their big ICBMs and that the only real opportunity for getting there is to ask for twice as deep a cut initially. Whether this is his tactic or not, it's not working and given the current political situation, it can't work.

Worse, the one-sided and non-negotiable aspect of this proposal has led some liberals to argue that any proposed throw-weight limit, direct or indirect, is but a crafty device of conservatives to scuttle arms control. Many members of Congress who would normally be inclined to give a President some leeway in his negotiating tactics have become convinced, in part because of the long history of his opposition to arms control agreements and the perceived personal views of some in his Administration, that he is not negotiating in good faith. He protests his sincerity, his opponents express their skepticism, the Soviets (convincingly) say they will never agree, and there we are. He needs the support of the middle-of-the-road members of Congress in order to maintain his strategic programs and to be able to negotiate with the Soviets, but he is going to continue slowly to lose it unless some different approach is taken. If we are to avoid catastrophic domestic deadlock, with serious impact both on our strategic programs and on arms control negotiations, we need to seek a new basis on which a consensus might be constructed, but we should not abandon the perfectly sensible idea that all nuclear weapons are not identical in their strategic potential.

But if the Administration has played its hand poorly, some of its liberal opponents have claimed too much in their opposition to any such limits. Their views might best be summed up by the words of a poster reportedly hanging in a State Department office: "Real Men Don't Need Throw-weight." Real men may not need it, but they'd best consider it seriously if the other side will permanently have many times more destructive power. In the past, most discussions of destructive power have been centered on its role in enhancing a weapon's ability to attack a hardened target such as an ICBM silo. In such a case, one can compensate for deficiencies in missile accuracy, within limits, by increasing the warhead's destructive power, or yield. This takes more weight, and many have felt over the years that a greater aggregate throw-weight for the Soviet ballistic missile force was a reasonable, rough compensation for the higher accuracy of U.S. missiles. Now that the accuracy of Soviet missiles is roughly the same as ours, however, there is much less rationale for such a view. In any case, if arms control moves both sides to lessen their reliance on large, silo-based, MIRVed ICBMs, as the Scowcroft Commission has suggested, lower throw-weight totals are desirable for several reasons. If small missiles with single warheads were to be based in silos, relatively low negotiated levels of throw-weight would reduce each side's ability to compensate for inaccuracy by using high yields. If small missiles were based in hardened mobile launchers on military land—and this now seems to be the most likely method of deployment for the United States—a lower level of throw-weight would be quite desirable because it would directly limit the Soviets' ability to conduct the only sort of plausible attack on such a system: a barrage attack over the whole area of deployment. A throw-weight limit similarly would improve the survivability of any such mobile Soviet system by restricting the U.S. ability to barrage any areas of Soviet mobile missile deployment.

For example, if a hardened mobile launcher could withstand 20 pounds per square inch (p.s.i.) of blast pressure (i.e., be 10 times as survivable as a normal truck, which is about 2 p.s.i.), then it would likely be safe unless it were within about 1 mile of a one-megaton blast. A five megaton blast would destroy it, however, if it were about a mile and three-quarters away. Thus, a given number of five-megaton weapons can barrage an area around 3 times greater than the same number of one-megaton weapons. So, over the long run, a significant disparity in throw-weight permitting larger weapons and more destructive power on one side would be destabilizing because such a disparity would tend to undermine the survivability of the other side's forces. The same is true of submarine deployment areas and of areas near bomber bases. If one has no idea where a submarine is in the open ocean or where a bomber is in the air, then a barrage attack is, of course, wholly impractical. But if a probable general location is known, it's a different matter. For example, if technology should permit a submarine to be detected to be somewhere within an area of several hundred square miles, it could be destroyed by a barrage of about the same amount of destructive power that the submarine itself carries—several tens of megatons. Even after bombers took off, they could conceivably be destroyed, in some circumstances, by a barrage attack on the area around the base—if the attacker had

[1] In measuring destructive power against unhardened targets a measure called "equivalent megatonnage" is ordinarily used. This takes account of the fact that such destructive power goes up more slowly than megatonnage itself as the latter increases.

enough throw-weight. The technique of a barrage is uncertain—more warheads, the same number with higher yield—but whatever the technique, the point is the same: gross disparities in missile throw-weight are destabilizing.

Throw-weight disparities are, however, mainly a long-run potential problem stemming from the ability to exploit new technology, not an immediate one. We do not need exact equality, but we do need clear progress in moving away from the big differences that exist today. The incentives set up by an agreement should be stabilizing—pointing toward rough equality—but we need not push this so quickly as to attempt the futile effort to make the Soviets restructure their ballistic missile forces in a very short time. It would be reasonable to construct a proposal in which one requirement is that the two sides approach rough equality in ballistic missile throw-weight as each modernizes its forces to replace aging missiles. Realistically this is going to mean gradual Soviet reductions, because we don't want to permit aggregate increases in destructive power for the United States. But we need not rush this process so much that we destory any possibility of an arms control agreement. In short, a political compromise between the liberals' position—no pressure toward throw-weight equality—and the conservatives'—immediate and sharp Soviet throw-weight reductions—has both strategic and negotiating merit. The Scowcroft Commission recommended that arms control agreements point toward "equal levels of warheads of roughly equivalent yield." In line with this, let's make the gradual evolution toward rough throw-weight equality one principle of our possible compromise.

2. BOMBERS

Treatment of bombers presents another area of disagreement. Although it is one on which the various sides in our domestic debate are not yet so sharply divided, the question of how bombers should be treated in an agreement is a major issue with the Soviet Union.

First of all, what about the destructive power of the weapons carried by bombers? A target destroyed by a bomber-carried weapon would be just as vaporized as a target destroyed by a missile. Bomber weapons can have high accuracy. And bombers carry a very high proportion of the total destructive power of U.S. strategic weapons—about 40 percent—whereas only about 5 percent of Soviet equivalent megatonnage is carried by bombers.

On the other hand, bomber weapons are not the exact equivalent of missile warheads. Bombers are comparatively slow. It would take a bomber carrying the same amount of destructive power as an ICBM nearly 20 times longer to reach its target. For this reason most arms controllers have, correctly, not viewed bombers as destabilizing or first-strike weapons.

Moreover, the Soviets have very large air defenses against bombers—some 10,000 surface-to-air missile launchers and about 2,200 air defense interceptors. The United States has none of the first and minimal numbers of the second. Since, practically speaking, no agreement will limit air defense, some way should be found in an agreement to permit either side to keep a strategic bomber force as a deterrent in the face of large air defenses on the other side. This means not undermining the ability of bombers to carry multiple small weapons which can be launched outside air defenses in order to penetrate them more easily. Air-launched cruise missiles are thus a reasonable response to large air defenses. Bombers, even if so "MIRVed" by being equipped with cruise missiles, are not a potential first strike force, given today's early warning systems. Also, a much smaller proportion of bomber weapons are kept on alert than ICBMs.

Bomber weapons should thus be treated differently from ballistic missile warheads. Still, some account should be taken in an overall strategic arms control agreement of the current U.S. advantage in the overall destructive power of its bomber force. How can this be done?

In SALT II, the essence of the tacit compromise on this issue was to offset the Soviets' large ICBM advantage by leaving our bomber advantage largely untouched. Essentially, the locked-in Soviet advantage in "large modern ICBMs" (SS-18s) in the SALT II agreement was balanced by the way that the sub-limits on "strategic nuclear delivery vehicles" carrying more than one warhead left bombers only loosely constrained.

The Reagan Administration's initial position in START was that bomber limitations be put off altogether until the more important ballistic missile limitations were negotiated. The Soviets, on the other hand, seem to be gearing up for a proposal that equates all nuclear "charges"—in effect implying that a large SS-18 warhead that takes only 30 minutes to arrive accurately at its target is equal to, e.g., a much smaller weapon on a B-52 that takes hours to do so. These positions are both quite one-sided and non-starters. Some way must be found equitably to balance the destructive potential of these two very different strategic systems against one another. Having done this, it should be possible to construct a schedule of reductions that would reduce the size and destructive potential of the forces on both sides while preserving this balance. The desired result is enhanced strategic stability at lower levels of destructive potential. Let's make this, then, the second principle of our possible compromise—promoting a decline in overall destructive power of both missiles and bombers, but by mechanisms that take account of the slowness of bombers and of the defenses against them.

3. BALLISTIC MISSILE WARHEADS

The Reagan Administration has proposed two limitations on ballistic missile warheads—an overall limit of 5,000 and a requirement that no more than 2,500 be permitted on land. At the current time, the U.S. has only about 2,150 of its some 8,500 [2] SALT-accountable warheads on land. The Soviets, on the other hand, have almost exactly the reverse proportions—only about 2,150 of their 8,500 warheads are sea-based. They rely primarily on land-based missiles.

These circumstances present a strategic (and therefore an arms control) dilemma because it is generally agreed that the most stabilizing step—the step that, over the long run, will limit any incentive for a first strike—is to move both sides proportionately away from reliance on large, fixed, MIRVed, land-based missiles. The Soviet side now possesses such weapons. The United States is moving, with much dissension, toward deployment of 100 MX missiles of this category—less than one-sixth the number of Soviet missiles of the same type, less than one-fifth the number of such warheads, and less than one-eleventh of the comparable Soviet throw-weight.

Some of us have supported the first step of this MX deployment, as long as it is imbedded in the Scowcroft Commission's package approach of making the small, single-warhead ICBM the primary U.S. ICBM program of the future and of proposing stabilizing approaches to arms control. We have done so in no small part because of the incentive to negotiate that we believe the MX program gives to the Soviets—or, more precisely, because of the disincentive to negotiate that would be given them by our unilateral cancellation of the MX program. But many fair-minded members of the Congress believe otherwise. Their primary concern is that the Reagan Administration will not negotiate seriously and will use congressional approval of MX procurement to make MX the centerpiece of the U.S. ICBM program—perhaps by deploying more than 100 MX missiles, perhaps by later dropping the small missile program—and will thus bequeath us a less stable rather than a more stable world.

These concerns are legitimate. They must be answered by reasonable arms control proposals and by a vigorous small missile program. But the dilemma remains: in light of the current situation, where the large Soviet ICBMs are already deployed and the equivalent U.S. weapon has just begun flight-testing, how can one construct an equitable and stabilizing proposal that would move both sides away from reliance on such weapons and still have a chance of being negotiated? If, as the Administration has done, we demand a sub-limit on land-based warheads that would require the Soviets to eliminate soon nearly two-thirds of their land-based warheads and over half of their most modern ones on SS-18s and SS-19s, we have another non-starter—even though one-third of the Soviet SS-18 and SS-19 force is still a formidable force of large ICBMs. If, on the other hand, we offer to trade the MX only for potential new large Soviet ICBM's, as does the new ICBM flight test moratorium now being proposed by some in the Congress, we are in effect ratifying the existing Soviet advantage in large ICBMs.

One possibly fruitful compromise—as part of a package—would be to retain the limit of 5,000 ballistic missile warheads that the Administration has proposed but to drop the sub-limit of 2,500 land-based warheads. The incentives provided by a reduction in the overall number of ballistic missile warheads to 5,000—a reduction of over 40 percent from today's SALT-accountable warheads—together with ongoing programs that will put both sides' hardened silos at risk, should be an incentive to both sides to move away from heavy reliance on large, fixed, MIRVed ICBM's.

But, and this is a key point, if the Soviets prefer to keep a huge portion of their warheads on land-based missiles, we should not try to prohibit that by an arms control agreement—as long as they are not destabilizing land-based systems. A sound agreement, together with our own programs, may and indeed should give the Soviets an incentive to move in time toward small land-based missiles instead of large land-based ones. They might choose as they modernize, over time, to replace most of their large, fixed, MIRVed ICBMs with a larger number of smaller, fixed, single-warhead ones, if they believed such were reasonably survivable because of a limitation on warhead

[2] This includes 14 warheads on Poseidon and full loads on Soviet missiles. Actual deployed warhead totals would be somewhat lower, but the former have the virtue of having been agreed upon in negotiations.

numbers. Or they might choose to move toward small mobile ICBMs, similar to their SS-20 intermediate-range missiles. Because of their large land area and this existing program,[3] it can hardly be said that inducing the Soviets to move toward small, land-based ICBM's at some reasonable schedule, or even as they would normally replace their existing missiles over time, is forcing them into unfamiliar or uncongenial technologies or terrain. There is no reason for us to make arms control proposals that would make it easy for the Soviets to choose to cleave to a policy of leaving most of their warheads on their large, fixed, MIRVed ICBMs even after their next modernization cycle.

As in the case of throw-weight limitations, the reasonable compromise between those who are demanding, on the one hand, that the Soviets restructure their strategic forces right now by eliminating large ICBMs as their main warhead carriers, and those who are arguing, on the other, that we should just ignore these missiles is to agree on incentives in the proposed agreement that would lead to a restructuring over time. Let's make this the third principle of our possible compromise—create incentives for both sides to move, during their next modernization cycle, away from putting high proportions of their warheads on large, fixed ICBMs.

These three principles, in sum, seem to be important both strategically and politically for any current U.S. strategic arms control proposal: (a) a gradual evolution toward rough equality in missile throw-weight; (b) a decline in the overall destructive capacity of all strategic nuclear weapons, taking bombers' unique features into consideration; and (c) the creation of incentives for each side to move away, in the course of modernization, from having or putting large proportions of its warheads on large, fixed ICBMs.

The goal is not to score a few points in a continuing policy debate. The goal is to resolve the core disputes that divide the American polity into rival camps that stymie arms control. We need a breakthrough such as that achieved a generation ago by then Senator Arthur H. Vandenberg, when he recognized the advantages to the ultimate interests of the United States of a bipartisan foreign policy. If our interest is truly arms control, and not sterile debate or the quashing of arms control, then we cannot continue on the course to nowhere that we are now following. There is only one choice, and that is compromise.

PARTING CHEERS FROM A PRESIDENTIAL SPEECHWRITER

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. SCHROEDER. Mr. Speaker, the latest issue of the National Review, which arrived on the newsstands in early September, contains an essay by President Ronald Reagan's former deputy assistant and chief speechwriter, Aram Bakshian, Jr., entitled "Two Cheers for Rape."

Mr. Bakshian, who left the White House September 1, reviewed a book on romantic fiction by Helen Hazen. Among other things, Mr. Baskshian states the following:

Rape, especially, seems to strike a deep, instinctive chord in millions of female readers, a cherished fantasy * * *.

* * * I suspect that those of us willing to slog through seas of treacle could pick up a few handy tactical hints.

All this and more, written, thank God, by a woman, who says things I have long suspected but would never have dared publish.

* * * applicants may write in care of this publication.

This is bizarre, pathetic drivel. No one would pay it the slightest attention, except that Mr. Bakshian was, until a few days ago, Mr. Reagan's chief speechwriter.

Next, we hear, "Two Cheers for Child Abuse?" "Two Cheers for Murder?" "Two Cheers for Nuclear War?"

The entire article follows:

TWO CHEERS FOR RAPE

(Reviewed by Aram Bakshian, Jr.)

("Endless Rapture: Rape, Romance, and the Female Imagination," by Helen Hazen.)

Helen Hazen had better watch out. At this very moment she is probably being targeted for destruction (literary if not physical) by that latter-day monstrous regiment of women, the extreme feminists. No doubt she has also distressed a lot of wimpish Alan Alda clones as well, but their bite is likely to be as feeble as their bark. What has Miss Hazen done to incur the wrath of the harridans? She has written a funny, insightful, slightly disconnected, but mostly sensible little book about the question Sigmund Freud asked but could not answer: What do women want?

One thing they seem to want, and certainly consume voraciously, is the subject of much of her book, that turgid, slushy variety of light reading known as romantic fiction. Anyone who has had to machete his way through shelves of the stuff at a bookshop, or who has observed what even the best and brightest of the female office help tend to read at lunch, is no stranger to the phenomenon.

We're dealing here not just with the syrupy costume romances of Georgette Heyer and Barbara Cartland, which seldom go much further than a kiss or a pinch (Sister Cartland once described her ideal of the erotic male figure as being "fully clothed and preferably in uniform"), but with the new wave of rawer romantic fiction that is based on real seduction, abduction, degradation, and outright rape. Rape, especially, seems to strike a deep, instinctive chord in millions of female readers, a cherished fantasy that is not confined to airheaded bits of fluff or frustrated dowds. To these millions of women, who vastly outnumber the readers of feminist novels and tracts, fictive rape, according to Miss Hazen, is a key part of "the woman's world of illusion," a "ritual of love that exists in fantasy":

A man says to a woman that she is so desirable that he will defy all the rules of honor and decency in order to have her. I would like to be raped, but I want it to happen to me exactly as it happened to Cressida in *Vice Avenged*. I want a marquis to come to my second-story window at night with a ladder. The house should be a country mansion. I will be asleep. He will put on a mask and stuff a handkerchief in my mouth. He will carry me down the ladder and onto his horse. I will be dreadfully frightened and in my fear will only cling to him more tightly since his strength is my one antidote to that fear. We will travel across the moors to the hollow he has marked out. He will carry me to the bed of bearskin rugs and furs he has spread * * *

And, of course, there will be a romantic rape—a scary yet somehow cozy sort of rape that bears little resemblance to the real crime, committed in a real setting by a real rapist.

Whatever the reason, this sells like hotcakes to the ladies, most men ignore it, although I suspect that those of us willing to slog through seas of treacle could pick up a few handy tactical tips.

As Miss Hazen points out:

Today's publishing industry relies heavily on novels of romance. The purchases are all made by women, for romance novels are the only literary genre that does not attract both sexes, an interesting fact, since it hints that the rituals of love that are reaffirmed in both every romance and every reader's heart are peculiar only to women, that the mystery of the female is—all protestation aside—really not too fascinating to men.

Here is a yawning gender gap indeed—a literary genre that puts men to sleep, arouses many women, and enrages feminists. Even a harmless old she-hack like Barbara Cartland becomes, in the reddened eyes of Germaine Greer, a sinister menace, a barrier to be removed if "women's liberation movements are to accomplish anything at all."

Why is it that romantic fiction is so widely—and exclusively—popular with women, and so loathed by feminists? As to the appeal, Miss Hazen has a simple and, I believe, rather sensible explanation.

One just cannot get around the truth that romance is more important to women than to men * * * With apologies for stating the obvious, I must say that it is the primary purpose of all animals to perpetuate themselves and it is the responsibility of the female to see to it that the job gets done. Every cell in her body is attuned to this charge, and, as with all the truly big things in her life—birth, growing up, death, * * *—intelligent beings have a need to ritualize the impulses that their cells, nerve endings, and hormones so disturbingly thrust upon them. The ritual merely lends grace to the task and disguises the enormity of its truth * * * To discredit the ritual is to deny the truth.

The feminist loathing for romantic fiction, Miss Hazen says, is a reflection of basic feminist anger. That feminists so often "deal out hatred is only to be expected. If the tie that binds one group of people to another is economic, any revolt will be aimed at the economic structure. The basic tie that binds women and men is love, and regardless of all the other arguments that quicken the feminist cause, it is love, or the fundamental tie between men and women, that is under attack," and she proceeds with a devastating analysis of the Adam-ribbing, naggingly aggrieved nature of most feminist fiction.

All this and more, written, thank God, by a woman, who says things I have long suspected but would never have dared publish. Sane members of both sexes owe Helen

[3] The mobile SS-20, of which about 360 have already been deployed, weighs about 80,000 pounds. It is thus several thousand pounds heavier than our own Minuteman III and it carries 3 warheads, as does Minuteman III. It is thought to be a variant of the Soviet SS-16 ICBM that was not deployed.

Hazen a debt of gratitude for bringing nature and common sense to bear on romantic sexuality at a time when the field was in danger of being overrun by neurotics in rebellion against their glands and consulting engineers who would reduce the whole thing to parts inventories and better living through chemistry.

On a more personal note, I was heartened to discover that the hero-seducers in Miss Hazen's favorite form of fiction generally have grey eyes and sneer a lot. The revelation has come to me rather late in life, but this means that I may have what it takes after all. Thank you, Miss Hazen, and applicants may write in care of this periodical.

IMPACTS OF BUDGET DEFICITS ON THE ECONOMY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. REGULA) is recognized for 60 minutes.

Mr. REGULA. Mr. Speaker, I ask unanimous consent that the gentleman from California (Mr. PANETTA), who also has a 60-minute special order today, be recognized immediately following the 60 minutes allocated to me.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. REGULA. Mr. Speaker, the gentleman from California (Mr. PANETTA) and I have taken this time today to discuss the impact of budget deficits on the economy of this Nation and the impact on the Nation's future.

I have extended remarks here that I will put in the RECORD with statistics contained therein. In the interest of giving time to others who have expressed an interest in participating in this special order, I will keep my remarks brief and try to address what are the salient issues.

I want to say at the outset that the gentleman from California (Mr. PANETTA), who is joining me in this effort, and who has provided leadership in deficit control, has been working hard on this for many years as a member of the Budget Committee. His leadership efforts in the reconciliation process, starting as early as 1981, have contributed very substantially to holding down the level of expenditures. He deserves commendation for that.

□ 1810

This is not a partisan issue. This is not a time to point the finger of guilt. Both sides of the aisle have contributed to the problem. There is enough blame to go around, so far as deficits are concerned. But if nothing is done, if we fail to address this problem of large deficits, we as a nation are in danger of consuming our seed corn.

One of the fundamental rules of good agronomy is to build for the future, to fertilize the land, to save the best seed so that you have a crop not only next year but in the forseeable future. I have observed farmers who have failed to follow these rules who have, in effect, consumed their seed corn in letting the fertility of the land disintegrate and not preparing for the future. They do not last. This Nation faces that kind of potential economic debilitation if we continue fiscal policies that result in the kinds of deficits we are facing this year.

There is a fashionable new economic religion that says "deficits do not matter," a new apathy that is a far cry from our puritan roots of fiscal prudence.

I believe that deficits do matter, that national fiscal policy does have a profound impact on our economic future and well being. I believe that the deficits we face have serious impacts regardless of one's ideological attitude. For those who say they are conservatives, large deficits mean erosion of a strong private enterprise growth because of capital starvation. Likewise, capital starvation bodes ill for those who consider themselves liberals and the liberals of the future, since there will be no revenues to support new social initiatives without confiscatory taxation.

One of the things that has made this Nation continue to be an attractive place and to have a high quality of life is the ability of our economic system to finance the marvelous programs that we take for granted—high-quality education, perhaps the broadest educational base in the world today in terms of touching the lives of all of our citizens, and many other programs of great merit. But it takes somebody working and producing, and for that to happen there needs to be capital to invest. If we continue down the road of large deficits, we are going to erode that capital base and there are not going to be the necessary funds to continue a program of social initiatives of high quality.

Continued large deficits will create a huge debt service cost for future generations that will stifle their ability to have a desirable quality of life. Just look at what it is today. We are touching $100 billion just for debt service. Think what we could do with $100 billion in terms of good quality programs to help the people of this Nation.

New social initiatives will almost be nonexistent because of the drain of dollars required to pay interest on the national debt if we continue the path of high deficits, much of which, incidentally, will be paid to foreign investors, thereby exacerbating the drain on U.S. capital.

The deficits we are leaving as a legacy to our children and grandchildren are unfair. We are mortgaging their future to live beyond our national means. Continued high deficits threaten our future trade opportunities. We are facing a $75 billion trade deficit in 1983—at least this is what the experts are saying—in part as a result of the high-priced dollar resulting from the flow of foreign capital to the United States. Investors are attracted, obviously, by the high interest rates in this Nation that result from the potential of large deficits.

Mr. ROTH. Mr. Speaker, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Wisconsin.

Mr. ROTH. Mr. Speaker, I thank the gentleman for yielding, and compliment him for his excellent remarks. And I associate myself with his statement.

There is simply no other alternative, something must be done immediately to reduce the budget deficits incurred by the Federal Government. These deficits have reached alarming proportions, forcing the national debt to skyrocket.

Current projections for fiscal year 1984 indicate a deficit of between $160 and $180 billion and a public debt of approximately $1.6 trillion, or nearly $6,000 for every man, woman, and child in this country. Designating this a national financial disaster would be understating its importance.

For every tax dollar collected, 14 cents must go toward servicing the interest owned on the debt. This means that the average American is now paying 14 percent of his taxes just to finance the Federal Government's past fiscal irresponsibility. And this burden will only get worse, until the Government disciplines itself to bring its spending practices in line with its revenues.

However, Congress determination to reduce the deficit may be weakening just when aggressive and committed action is most needed. We cannot allow this. Rather, we must reaffirm our commitment to a balanced budget and bold initiatives to wipe out the public debt.

Mr. REGULA. I thank the gentleman for his comments.

Mr. Speaker, a little quick mental arithmetic would say that the trade deficit would mean 1,750,000 jobs, or thereabouts, and that would go a long ways toward relieving unemployment in this country. I would further say that, historically, we have had trade surpluses. However, because of the impact of the deficits, people are anticipating continued high interest rates and we have this tremendous flow of capital to the United States which drives up the price of the dollar, which in turn makes it difficult for us to compete. Deficits do matter. I think that is the important message, if we forget everything else we have said today. I do not subscribe to the new economic religion that deficits do not matter. I think it makes a tremendous difference.

The gentleman from California and myself want to bring this fact to the

attention of this body, as well as to the American public. Deficits threaten our recovery. The pressures on the capital pool to fund large deficits can only result in interest rates rising. High interest rates will debilitate housing starts, auto sales, capital goods sales, appliances and all of the other things that we historically have counted on to take the Nation out of a recession.

We have a tool on the books to address this problem. It is called reconciliation. What is needed to use this tool is the political will to face reality, and that is the reason we are here today.

Historically, we have tended to finance our deficits with inflation. We have financed them with printed money. I think the option of financing deficits with inflation is gone. Investors today are far more sophisticated than in past decades. I know that during some recent years, when inflation was running at a high rate and T-bills were paying high interest, depositors in a small-town bank that is located near where I live, a bank of about $20 million in assets were going in and taking out their money and buying T-bills because they recognized that inflation was eroding their savings, not only their interest return but their principal. This illustrates perfectly that today the American public is sophisticated enough that they are not going to let us get away with financing deficits through the process of inflation. That again emphasizes the very important need to reduce the deficit.

We have the tool. The question that confronts this body is: Do we have the will? I do not think we can wait until November 1984 to demonstrate our will to confront the damage to our Nation of high deficits

Mr. Speaker, under the leadership of President Reagan and with the cooperation of Congress, America has broken the grip of inflation and the concomitant high prime interest rates. But our Nation has come to an economic watershed. Congress is being called upon to make decisions which will influence the course of our great republic far into the future. I am hopeful that we will exhibit wisdom and courage in answering that challenge. If not, the result may be as disasterous as it would have been in those early hours of America's consciousness.

Hindsight shows the long-delayed recovery began last December. Gaining momentum the economy is now growing at its fastest rate in 2 years.

Industrial output in July climbed by a robust 1.8 percent;

Real GNP has grown at 8.7 percent in the second quarter;

Unemployment dropped to 9.5 percent in July;

The index of leading economic indicators rose 1 percent in June for the 10th consecutive monthly increase—the index rose 1.2 percent in May and 1.3 percent in April;

Productivity rose at a 4.3 percent annual rate during the second quarter, surpassing the 3.7 percent pace established during the first 3 months of 1983.

These statistics speak of increased opportunities, employment, and a higher standard of living for our constituents. America appears to be on the move again.

Before congratulating ourselves, let us step back and consider some distressing facts. Prime lending rates are on the increase. Raised from 10.5 to 11 percent the rate hit its highest level in almost 6 months—the first industry-wide increase since February 1982. New home sales fell 2.9 percent in June. July starts slipped further, declining 6.5 percent, as higher interest rates begin to take their toll—the consensus is that the housing recovery has bottomed out due to increasing interest rates—Mark J. Reidy, executive vice president of the Mortgage Bankers Association of America; Robert Ortner, chief Commerce economist; and Michael Sumichrast, chief economist for the National Association of Home Builders—Washington Post, August 30, 1983. Retail sales dropped 0.1 percent in July. America's foreign trade deficit widened to $6.4 billion in July, for annualized projected rate of $65 to $70 billion. Something is seriously wrong with our recovery formula.

I am sorry to say the problem is our inaction. The incapacity of our Government to curtail the growth of Federal spending is manufacturing expectations of continued record deficits. Recovering from years of ballooning inflation and high interest rates, business is wary of another one-two punch in the form of a dwindling supply of capital at a reasonable cost.

Washington must renew its budget slashing efforts. Observers of Congress say that a mood of resignation is developing toward deficit spending. Supposedly, our apathy is the result of the euphoria produced by the unfolding recovery and the politcal difficulties involved with limiting Federal spending. Self delusion is a subtle narcotic. If it exists, such budget escapism will hinder, if not, defeat recovery.

From the Great Lakes steel mills to the Midwest farmsteads Federal budget deficits have produced financial distress. Webster interprets deficit spending as "the spending of funds raised by borrowing." Many of our constituents would add to this definition the words of frustration, worry, and even hunger. Absolutely, whether we like it or not, we must take action to correct this problem.

From fiscal year 1965 to fiscal year 1981 total budget outlays rose at a compound annual rate of 11.3 percent while total receipts have risen by only 10.3 percent. During this same period nondefense outlays swelled to a 12.9 annual growth, while defense spending increased 7.9 percent annually. For the first 6 months of fiscal year 1983 the Federal deficit substantially exceeded the record for any previous full year. By early 1982 the Reagan administration had predicted an $83 billion deficit for fiscal year 1984. This figure has been readjusted several times due to declining revenues and the continuing recession. At present, the budget deficit for fiscal year 1984 is estimated at between $170 to $180 billion. The deficit for fiscal year 1985 is projected to be $156.2 billion.

[1] Estimate

Let us examine these figures in further detail. In the past decade medicare expenditures have risen from $8.8 billion to $46.8 billion, a 430-percent increase, or 43 percent a year. Outlays for the food stamp program have increased from $1.9 billion to $9.6 billion, a 400-percent increase, or 40 percent a year. These ballooning costs typify the increasing demand, and in many cases, need placed upon government to care for America's people.

Characteristic of the budget is the uncontrollable nature of its composition. Approximately 75 percent of the outlays of President Reagan's fiscal year 1984 budget are mandatory under existing law if defense is included. This amounts to $220 billion, or merely 26 percent of the fiscal year 1984 budget outlays, as being discretionary. In 1971 the discretionary portion of the budget was 35 percent. Since many of the entitlement programs are indexed to the cost of living this percentage will continue to shrink.

The red ink trend, if unchecked, will add an additional $1 trillion to the public debt by fiscal year 1988. This means the Treasury would be facing

$220 billion of interest payments each year. Coupled with compounding entitlement program costs, and other spending, budget deficits will remain in the neighborhood of $200 billion through 1986 (CBO projection). If not checked interest costs will erode the opportunity for social program initiatives.

Most economists agree that deficits are not harmful in all situations. During times of recession the increased public and private demands stimulate employment and individual incomes. However, once the economy begins recovering mounting deficits have a dampening effect upon any prolonged growth. The key is to determine when the corner has been turned.

Over the next 5 years, 53 percent of America's savings will be absorbed by the Federal Government in subsidizing the deficit (the Morgan Guaranty Survey, published by the Morgan Guaranty Trust Co. of New York, August 1983). Chronic guzzling from the net-savings pool will inhibit any prolonged recovery. Simply, the private sector will be crowded out from the monetary watering hole. Already, added demand for the finite money supply has boosted interest rates for short-term borrowing. Housing starts, retail sales, and business investments are becoming increasingly suppressed. Unless deficits are trimmed these sectors will experience further market depression which will ripple outward into other fields.

Ask any home loan officer, or contractor, they will tell you the story of ascending interest rates. An average mortgage looms around the figure of $65,000 and a monthly payment of $800. An increase of 1 percentage point raises the payment by another $50. This modification disqualifies over 2 million potential homeowners.

Traditionally, commercial loan demands have tended to rise during the second year of expansion. So far, business credit requirements have remained low. As the recovery proceeds business will require additional funds for expansion of inventories and production facilities. Once the squeeze is put upon the monetary supply interest rates will soar upward and the recession cycle is begun anew.

Rising deficits create an attractive environment for capital investments from abroad. The short-term effect is an economic high to the domestic marketplace. The deficit becomes financed by foreign investors. The value of the dollar is increased and exports become harder to sell abroad. Imports, cheaper than their U.S. counterparts, flow freely into the country causing further deterioration of our capital structure.

Recently, the U.S. Department of Commerce declared that the U.S. trade balance with Latin American (eight high debt nations—Washington Post August 26, 1983) has declined from a $377 million surplus in the first half of 1982 to a $6.3 billion deficit during the same period this year. Overall the trade deficit is estimated to be around $70 billion for this year (Washington Post—August 31, 1981). Secretary of Commerce Baldrige observed this could increase to a $100 billion next year. Unfortunately, we cannot simply sew up our borders to other nation's products. History tells us that nobody is a winner in a trade war.

Furthermore, foreign investments are volatile in nature. The inflow can cease as quickly as it began. Withdrawal from the quick fix of foreign dollars would be severe.

Trade deficits, declining housing starts, and rising interest rates are consequences, not the cause. Perpetual deficits are threatening to debase our Nation's long-term capital structure. Prolonged deficit borrowing can only further elevate interest rates and discourage private investments. Ultimately, capital stock is reduced. This translates into fewer jobs, declining productivity, and lower living standards. The long-term effect of deficit spending will be elaborated upon during our September 21 discussion.

Economist agree that the deficit would be staggering regardless of the recession's effect. CBO predicts (CBO—The Economic and Budget Outlook: An Update, August 1983) the deficit will continue growing even under favorable economic conditions. The problem we face is one of structure. Federal spending is plaqued by defects that will not vanish under the light of an improving economy. Congress must reconsider its spending habits.

The first concurrent resolution on the budget for fiscal year 1984 will eliminate many of these structural defects after 1984 while preserving the stimulus provided by the deficits in the early stages of recovery.

EFFECT OF FIRST BUDGET RESOLUTION FOR FISCAL YEAR 1984

	1982 actual	1983 estimate	CBO projection		
			1984	1985	1986
Revenues	618	600	677	748	842
Outlays (including the reserve fund for domestic programs)	728	807	868	929	989
Deficit	111	207	192	180	146

Source: CBO projection, The Economic and Budget Outlook: An Update, August 1983.

The plan reduces the deficit as a percentage of the GNP from an estimated 6.4 percent in 1983 to about 3.5 percent in 1986. The resolution, alone, is not enough. The bill assumes increased revenues ($73 billion over the 1984–86 period) and spending reductions ($12.3 billion over the next 3 years) which have not yet been enacted. It is only a beginning in addressing the budget crisis.

What is an acceptable reduction in the deficit? A rule of thumb is to overcome the present trend of permitting Federal red ink to grow more rapidly than the GNP.

As the recovery blossoms the credit demands of the private sector will increase. There must be room for this expansion. Another practical guideline is to continue to monitor the MI supply. What is important is that the deficit growth rate, as a percentage of MI, be reduced below its present level. What is an appropriate reduction can only be determined as the recovery develops. Quite frankly, these guideposts are two of a multitude set forth by various sectors of our society. No doubt, those trained in the complex art of economics will persist in prescribing a varied assortment of remedies for America's economic ills. The crisis is near at hand. By early next year the squeeze upon the money supply will commence. It is unlikely that any crowding out will occur during 1983. According to Merrill Lynch, Government borrowing for the first half of 1983 totaled $172.5 billion. This figure is to drop to $150 billion for the second half. Whereas, private borrowing has topped $138.5 billion in the first half is to rise to $154 billion in the second. Mathematics dictate that total borrowing will drop. Based upon this data crowding out will not occur during 1983. The rate of increase of private sector borrowing has been lower than in the average postwar upturn.

For once economists agree upon one thing. Congress will not deal with the issue until after the 1984 election (Washington Post, "For once economist speak as one: Cut those deficits"). Absent an agreement, we risk the recovery being cut off at the knees. I cannot believe Congress will permit politics to cloud this issue.

Clearly, these suppositions are blunt instruments when dealing with such a complicated machine as the American economy. Yet, they indicate a restlessness in Congress. They speak of a renewed concern. I am hopeful that Jenkins Hill will resound to the echo of statemanship not experienced since our Nation's early years.

Mr. Speaker, I now yield to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, I thank the gentleman for sharing his time with me, and I in turn will be sharing the time that has been allotted to me to those who wish to participate.

Mr. Speaker, first of all, I want to thank the gentleman from Ohio (Mr. REGULA) for joining with me in this special order in presenting our concerns about the growing deficits facing this country. He has worked with me

on the Budget Committee and on the reconciliation task force, and I wish to commend him for the work that he has done on those issues. We share a mutual concern about the deficits and the impact that they will have on our economy.

This is not a partisan issue. This is an issue in which, it seems to me, Republicans and Democrats alike ought to be joining together to develop a comprehensive strategy to deal with this growing problem in the future.

Why do we do this? Why are we here with this special order dealing with the issue of the deficit? The main purpose is to raise concerns about what is happening, to define the problem again, to have Members look at what is the meaning of running these high deficits, to explore what its impact is in the future on the recovery that is presently going on in this country and to decide whether action is necessary and, if so, what that action should be.

This is not a new issue. It is not a new issue at all. Almost every Member in this body has expressed their concern at one time or another about the problems of the deficit. And most of us can give a very good Rotary Club speech on the issue.

Administrations come and go, promising that they will balance the budget and deal with the problem of the deficits.

□ 1820

There are continuing expressions of concern every day about the problems of the deficit, and yet nothing happens. Yet, if you look at what has happened over the last few years, we anticipate now the addition of almost a trillion dollars to the deficit over the next 5 years.

If everyone is concerned, if all of us are bothered by this problem, if we agree that the deficit, and growing deficit, is a major issue that needs to be dealt with or it will undermine any kind of economic recovery for the future, then why is nothing happening?

There are, it seems to me, a number of reasons why nothing is taking place. First of all, we are, in fact, in the midst of a recovery. It is difficult psychologically to go back to one's constituents and say that, therefore, being in a recovery after a very deep recession, that the time is now for you to incur additional reductions in benefits. If you are a military retiree, if you are a civil service retiree, if you are someone who benefits from one program or another, that you now have to suffer additional cutbacks in benefits even though we are in a recovery.

Second, it is difficult to impose taxes, obviously, when we are in the midst of a recovery because the argument is present that if you impose taxes at the time we are in a recovery that this, in fact, will undermine the thrust of a recovery. So phychologically, at the time that we are in the midst of a recovery it is difficult to come back and then vote to impose additional reductions in benefits or taxes at a time when the public wants to move ahead with the recovery and not have to face those additional sacrifices. That is understandable. That is a reality.

The double standard still applies around here for all of us. The argument is that if you want to reduce the deficit, you cut the programs that impact on others; you do not cut the programs that impact on your constituents or that are yours. This is true for administrations, it is true for Congressmen.

Conservatives will argue that we should cut social spending; that that is how we balance the budget, that is how we get rid of deficits. But they will vote a blank check when it comes to public works or when it comes to agricultural subsidies.

Liberals will say that the way we do it is to cut defense spending, and yet they, too, will vote a blank check when it comes to many programs for people.

Administrations argue that we ought to cut social spending. The present administration says that the way to do it is to cut discretionary spending, basically spending impacting on people but providing virtually a blank check for defense.

Unfortunately, this kind of double standard is still politically popular because constituents feel the same way. They say, "If you really want to deal with the deficit, do not hurt me; hurt somebody else." So the double standard becomes another problem in dealing with the deficit.

The third problem is that we are presently in the process of rationalizing the existence of these large deficits, and if not rationalizing them, then taking a very apathetic approach to dealing with them.

A few years ago my colleagues in the Democratic Party, many of them would argue when we were facing $20 or $30 billion deficits, that that is not a big problem as long as we have a GNP that is running in excess of a trillion dollars, and those programs are going to serve the needs of people.

Today the rationalization comes from the right, from the supply siders, who basically argue, "Do not worry about $200 billion deficits. As long as we are continuing a recovery, as long as we continue to cut taxes, you do not have to worry about the problem of growing deficits."

So what is happening is that today, whether you are on the left or the right, there is a growing rationalization that says the deficit is really not a big problem and do not worry about it. Now, if you belong to any one of those extremes, you really do not have any problems; you can vote for anything you want because you have, in effect, justified a continuation of borrowing to do whatever you want.

The fourth problem is that if you are somewhere in the middle and believe, as I think the gentleman from Ohio and I do, that we have to do something about deficits, the choices are no longer very easy within the context of the budget. We have a projected budget for 1984 of $850 billion. Thirty percent of that budget goes for defense. That is expected to go up to about a third of the Federal budget within a few years. Forty-six percent of that budget goes to entitlement programs, basically retiree pension programs, social security, programs in which people are entitled to benefits for one reason or another. Those entitlement programs have grown over the last 10 years by 400 percent. They are expected to be about 50 percent of the budget within the next few years.

Ten to twelve percent of the Federal budget is now payment of interest on the national debt. We expect it will be close to $100 billion next year. If you take defense, entitlements and payment of interest on the national debt, that is almost 85 percent of the Federal budget. The remaining 10 to 12 percent is discretionary spending, which is basically now the operations of Government and some money for education and health research.

We can close that down and we still run deficits in excess of $160 to $170 billion per year.

So what is the strategy, then, to deal with it? How do you grab hold of this problem? I think from a fiscal point of view there are only three choices if you really are sincere about trying to do something about the deficit.

One is to limit the growth in defense spending; second, to limit the growth in entitlement spending; and third, to raise sufficient revenues to pay the bills.

If you are not willing to go on all three tracks, then the reality is that we will do very little in impacting on the size of the deficit.

I recognize that in this institution we do not change anything unless we have a majority vote; whether it is the reconciliation or implementation of the Budget Act in any way, it takes a majority vote in this institution to be able to change anything or do anything with regard to the deficit. That, in turn, depends on the will of the public and on the courage of the Members.

My sense right now is that we are engaged in kind of a paralysis in trying to deal with the deficit for some of the reasons that I expressed here, and as a consequence, as reconciliation comes before us, we begin to move that back from the front burner in the hopes that the problem will go away;

that politically it is just not popular right now to try to deal with the problems of reducing the deficit.

The purpose today of raising these issues is to try to educate both the public and the Members of the House on the issue of the deficit. If we fail to do anything about the deficit, then we will pay a very heavy price in the future, economically but also politically. If we think that politically it is easy to get away with not dealing with this problem right now because it may be unpopular, wait within a few months when the recovery begins to slow down and interest rates begin to go up, and decide at that point how the public will react if they know we failed to deal with that problem today.

It is real. It will have an impact on the recovery, and it will, indeed, undermine our entire recovery and our economy if we fail to bring together the ability to deal with this problem of the deficit. It will impact on our national defense if we fail to deal with the deficit. It will impact on our foreign policy in terms of the monetary stability of the world, and it will impact on our ability to deal with human needs in our own society.

□ 1830

And, so, for those reasons I think it is most important for us to gather again the commitment that we need to try to do something about this problem.

I will include a broader statement in the RECORD that summarizes some of the key points that I think Mr. REGULA and I both feel are part of the problem—the fact that there are these danger signals in terms of interest rates, danger signals in terms of inflation, danger signals in terms of trade, danger signals in terms of the diminished resources that we have to deal with needs in our society.

Again, the deficits is a problem. It demands action. And the question is, when will that action come.

WHY THE DEFICIT HAS BECOME AN ISSUE

There are a variety of reasons why the Federal budget deficit has become an issue at this point in 1983. First, very large deficits are forecast for the coming years. The numbers that present the situation most starkly, and probably the most accurately, are those from the Congressional Budget Office. CBO reestimated the first budget resolution for fiscal year 1984, passed by Congress in June, for changed economic assumptions, assumed no action on reconciliation and no action on the reserve fund, and came up with the following projected deficits for the next 3 fiscal years: Fiscal year 1984, $198 billion; fiscal year 1985, $198 billion; fiscal year 1986, $202 billion.

The fiscal year 1983 deficit is projected to be around $207 billion. So, despite the economic recovery, termed "robust" by most experts, the Nation is still facing the prospect of $200 billion deficits for "as far as the eye can see."

With Federal outlays in the range of $850 billion for fiscal year 1984, these deficit figures mean that the Federal Government is only raising enough revenue for between 75 to 80 percent of its spending commitments. The rest must be borrowed.

It is this borrowing which, if the CBO figures prove to be accurate, will amount to about a trillion dollars over the next 5 years, that causes the most concern among those inside and outside of Government. In testimony before the House Banking Committee on July 20 of this year, Federal Reserve Chairman Paul A. Volcker called the large deficits the most important single hazard to the sustained and balanced recovery we want. And earlier this year before the House Budget Committee, he made the following statement:

> In the midst of recession, we can manage a big deficit, even though it does keep interest rates higher than they would otherwise be. But over time, we can't expect "real" interest rates to revert to a low range historically, house our citizens the way they wish, invest what we need to support growth and productivity, and avoid drawing on the savings of other countries (at the expense of an abnormally strong dollar and a huge trade deficit) if Treasury financing absorbs half to three-quarters of the net domestic savings we are capable of generating in a more prosperous economy.

Martin Feldstein, Chairman of the administration's Council of Economic Advisers, stated in his remarks before the Annual Conference of the National Association of Counties on July 18, 1983, that "one of the most crucial requisites for maintaining a healthy economic environment is reducing the unprecedentedly large Federal budget deficits that loom ahead in the second half of this decade." Also, as part of a message to the U.S. Senate earlier this year Michael Blumenthal, John B. Connally, C. Douglas Dillon, Henry H. Fowler, and William E. Simon, all former Treasury Secretaries, and Peter G. Peterson, former Secretary of Commerce, made the following statement about the consequences of large deficits:

> Massive Federal borrowing will consume savings urgently needed for investment in new plant and equipment, new infrastructure and new jobs and training. Overvalued dollars will crush export industries. Real long-term interest rates will remain high for the foreseeable future, smothering capital-intensive sectors and causing the recovery to sputter and stall.

The real possibility that deficits will continue to stay in the $200 billion range, and the sharp warnings from those who should know about the impact of budget deficits on the economy, convince me that this is the time for Congress to address the budget deficit issue. Furthermore, such a discussion is needed because of the approaching deadline for submission of reconciliation legislation. In the first budget resolution reconciliation instructions directed committees to report legislation reducing the deficit by some $85 billion over the next 3 fiscal years. While about $10 billion worth of spending cuts have been approved by five House Committees—well before the September 23 deadline—no action has taken place on the revenue increases directed by reconciliation.

Many feel that with the economic recovery at hand the pressure on Congress to enact deficit reduction measures is weakening. Evidence that the sense of urgency about budget deficits has been lost was seen earlier this year when Congress repealed the interest withholding provisions of the 1982 tax bill, a revenue loss, and an increase in the deficit, of $13 billion over the next 5 years. No offsetting revenue increases were even considered by the Congress during its deliberations on the withholding issue.

There are also signs that the fervor in the administration for deficit reductions is fading. The President has exhibited little interest in the reconciliation process, or for that matter in the budget resolution, and it is not clear that the administration will engage in the trench warfare of recent years on appropriation bills. The upcoming Presidential elections are obviously a factor in this new posture. Does anyone in the executive branch want to risk offending large segments of the populace by raising taxes or cutting spending in the shadow of what is expected to be a bitterly contested Presidential race? The answer could very well be "no."

It appears that Congress and the administration are on the brink of paralysis on the deficit issue. Can we afford to do nothing? In my view, the answer to that question can only be arrived at by undertaking a comprehensive examination of the Federal budget deficit issue. To the best of our ability, we need to determine if deficits threaten our economic recovery, and, generally, the economic health of this Nation. I am not sure we can come up with definitive answers to these questions, but I feel strongly that we in the Congress have a clear duty to address this issue and to find out what the experts are predicting.

Congressman REGULA and I felt that a series of special orders on the problem would be a good vehicle for an in-depth discussion of this issue. I would like to thank the Congressman for his assistance in planning these special orders, and I welcome other Members of the House that plan to join us this evening, and next week on September 23.

THE MAGNITUDE OF THE PROBLEM—THE NUMBERS

The first step in any analysis of the deficit issue is to take a look at the basic numbers. Through this examination we can get a feel for the size of the problem, if one can ever get a feel for the size of something that runs into the hundreds of billions of dollars.

First, the projected deficits.

[In billions of dollars]

	1983	1984	1985	1986	1987	1988
CBO/based on first budget resolution policies (the deficit range reflects the reserve fund)	207	183–192	176–180	143–146	NA	NA
Chase Econometrics (July 1983)	183	174	175	162	145	114
Data Resources (summer 1983)	188	199	209	222	212	188
OMB current services deficit (midsession estimate including off-budget deficit)	226	217	220	232	244	236
OMB current services deficit (midsession estimate, not including off-budget programs)	210	200	206	219	228	210
Second, a look at the budget as a percent of GNP, the public debt and interest payments on the debt.						
CBO/budget resolution deficit as a percent of GNP	6	5	5	3	NA	NA
CBO/public debt projections based on budget resolution	1,143	1,351	1,545	1,704	NA	NA
Interest payments on the public debt/ based on budget resolution (in billions of dollars)	89	106	117	126	NA	NA

SHORT-TERM IMPACT OF DEFICITS ON THE ECONOMY

The current debate over whether deficits matter is being carried out against a background of strong economic recovery, a recovery that makes it very difficult to argue that large deficits are a problem in the short term. Real GNP increased at an annual rate of 8.7 percent in the second quarter of 1983. Industrial production is growing rapidly, unemployment is down from 10.8 percent in December to 9.5 percent in July, and the CPI grew at an annual rate of only 2.9 percent in the first half of 1983. Car purchases are up and the stock market has been booming. The only problem area in the past few months has been interest rates.

Three-month Treasury bills, after hovering around 8 percent from September 1982 to May of this year, rose to 9.6 percent in early August before falling to 9.3 percent in late August. Long-term AAA corporate bond rates have risen from 11.5 percent in May of this year to about 12.5 percent currently. The prime rate, 10.5 percent in March, rose to 11 percent in August. Conventional mortgage rates rose from 12.5 percent in May to 13.9 percent in mid-August, before dropping to 13.8 percent last week. These rates are obviously in a state of flux and should be watched closely in the coming months.

The CBO economic forecast for the next year and a half should also be considered as an indicator of how deficits will impact on the economy in the short-term. The following forecast, made in August, reflects the policies of the first budget resolution:

	1983	1984
Real GNP growth	3.1	5.0
Unemployment rate	9.7	8.4
3-month Treasury bills	8.8	8.6
Inflation (GNP deflator)	4.6	5.0

In the near-term it appears that the economy will be performing well, despite the certainty of a $200 billion plus deficit for fiscal year 1983 and the real possibility of a $180 to $200 billion deficit in fiscal year 1984.

There seems to be wide agreement among economists that deficits in the short term—as the economy is in the beginning stages of a recovery—are not harmful, and are even beneficial. For example, in the CBO August 1983 report entitled "The Economic and Budget Outlook: An Update", the following analysis of the short-term impact of deficits was made:

Large budget deficits are not bad in all circumstances. When the economy is in recession, cyclical or structural increases in the deficit can bolster incomes and employment, mitigating the recession's severity, provided they are not offset by monetary policy.

The current deficit may be stimulating recovery substantially, since the Federal Reserve may not be following a monetary-targeting system. The project of increasing deficits over the 1982 to 1984 period is a major reason for CBO's forecast of a recovery.

Donald Regan, Secretary of the Treasury, made the following remark about the short-term in his testimony, delivered on July 19 of this year, before the Joint Economic Committee:

In the short term, we are fully confident of being able to finance them (deficits) without crowding out private investment.

One of the hardest questions to answer is this: If large deficits are going to be a problem, when will they be a problem. In other words, just how long does the short-term last?

Chairman Volcker, in his testimony before the House Banking Committee on July 20, 1983, had some thoughts on this issue:

. . . there has also been a comfortable assumption that the problem (of deficits) would not become urgent until 1985 or beyond. That might be true in the context of a rather slowly growing economy. But the speed of the current economic advance certainly brings the day of reckoning in financial markets earlier. In the second quarter, total nonfederal credit demands were already increasing substantially, even though business demands essentially unchanged at a relatively low level. Potential credit market pressures have been ameliorated by a growing inflow of foreign capital, but a net capital inflow can be maintained only at the expense of a deep trade deficit. Banks have been sizable buyers of government securities during the early stages of recovery while business demands for credit have been relatively slack. But there has also been some tendency for overall measures of money, liquidity, and credit to rise recently at rates that, if long sustained, would be inconsistent with continuing or even consolidating progress toward price stability.

All of this, to my mind, points up the urgency of further action to reduce the budgetary deficit to make room for the credit needed to support growth in the private economy.

Martin Feldstein also warns that deficit-related problems may appear in 1984. The following excerpt is from a speech given to the American Stock Exchange Annual Washington Conference on June 6, 1983:

The lopsided character of the recovery carries with it the danger that the recovery may lose momentum. Weakness in several key sectors could slow the overall pace of recovery to a speed at which unemployment begins to rise as early as next year. The psychological impact of rising unemployment might reduce consumer spending, leading to a further fall in production and employment.

I must empasize that while such a loss of momentum is a possible consequence of large future deficits, it is by no means a certainty. I believe that it is more likely that even with large prospective deficits the recovery will be sustained and unemployment will continue to decline. But the risk that the recovery will lose momentum is both significant and unnecessary. The recovery can be made more secure if legislative decisions are taken now to assure that the deficits will be declining significantly in the years ahead.

Business economists seem to be predicting a healthy economy at least until 1985. In an article by Jane Seabury in the Washington Post on August 23, 1983, the views of business economists were summarized by Edgar Fiedler, president of the National Association of Business Economists.

Despite their reservations about the effect of federal deficits on the economy, the business economists expect the recovery to continue "in a remarkably serene way," said NABE President Edgar R. Fiedler.

Through next year the economists "see no outbreak of inflation, no upsurge in interest rates and no new recession," Fiedler said. "The theme is all buoyancy and reassurance. The economist's projections are so free of anxiety that we appear to be entering an interlude of cyclical tranquility—18 months of healthy growth without excesses."

Lindley H. Clark, Jr., writing in the August 30 edition of the Wall Street Journal, also reported on a conversation with Mr. Fiedler, who warned that 1985 may be the year when deficits become a problem:

Mr. Fiedler said business economists feared that higher federal deficits would be pushing interest rates higher in 1985 and later.

He said that businesses typically increase their borrowing after a year or two of recovery. Companies by that time have largely used up the excess capacity that arose

during the prior recession and they need new plants and equipment to keep up with demand.

Mr. Fiedler figured that businesses would be at this want-to-borrow stage at the beginning of 1985. But the Treasury then will still have to be borrowing heavily to finance its red ink. The Treasury gets all it wants because it is willing to pay whatever the market demands. Private businessmen may not be crowded out of the market completely, since they can probably find funds at some interest rate. But they may be crowded out in the sense that they won't be able to borrow at rates that offer them the prospect of profits.

So it may be hard to keep much of a recovery going as long as the Treasury Department remains such a massive competitor for funds.

LONG-TERM IMPACT OF BUDGET DEFICITS

The first evidence I think we need to look at in discussing this topic is the CBO economic forecast for fiscal year 1985 and fiscal year 1986.

	1985	1986
GNP real growth	4.0	3.5
CPI	4.7	4.7
Unemployment	7.9	7.5
3-month Treasury	7.7	7.4

These projections show GNP growth will still be healthy, inflation will be moderate, unemployment will be falling and interest rates will be steady. All in all, these numbers should give us a lot of confidence in the continued health of the economy through fiscal year 1986.

Another method of determining the long-term impact of deficits is by examining the opinions of professional economists. Since we are dealing with a complex subject I am including from this point on a number of rather lengthy excerpts from the writings of various economists. First, though, some brief words of caution from economist Robert Samuelson, a frequent contributor to the National Journal, and Herbert Stein, former chairman of the Council of Economic Advisers and now a professor of economics at the University of Virginia.

In an article published in the November 16 edition of the National Journal, Mr. Samuelson asserts:

The honest answer about the economic impact of deficits is, "I don't know."

And in a research report from The Conference Board entitled "Toward a Reconstruction of Federal Budgeting," Mr. Stein writes:

The point is that there is no certainty and agreement about why deficits matter and how much, or about what national policy should be.

Despite these remarks, there is no shortage of economists who are willing to say flat-out that deficits will have an adverse impact on our economy in the long-term.

INTEREST RATES AND DEFICITS

The greatest fear exhibited by economists is that high deficits will cause high interest rates, which will have an effect on other parts of the economy. Consider this excerpt from the CBO report of this August:

Large structural budget deficits may have serious economic consequences, however, particularly if they persist in the face of strong private demands. Under moderate Federal Reserve money growth policies, strong government and business credit demands would result in high real interest rates as government demand for credit absorbs a large share of the economy's savings, diverting or "crowding out" these funds from private capital markets. To the extent that business capital spending was discouraged, the ultimate effect would be a reduction in productivity and living standards.

On June 6, in his American Stock Exchange Washington Conference speech, Martin Feldstein made the following comments about the interest rate/deficit question:

. . . over the next three to five years, large budget deficits will alter the character of the economic recovery and cause what I have called a "lopsided recovery." The large deficits keep interest rates high and reduce activity in all interest sensitive sectors, preventing them from sharing in the overall recovery.

The first and most obvious of these interest sensitive sectors includes all of the industries involved in investment in plant and equipment: the machinery and equipment industries, construction, and the producers of the primary inputs that are used by these industries. Business fixed investment is now severely depressed and only a slow upturn can be anticipated. Fortunately, however, the adverse effects of the high interest rates will be mitigated by the strength of the stock market and by the accelerated depreciation tax rules that were enacted in 1981. Nevertheless, the large prospective budget deficits would inevitably mean less spending on plant and equipment over the next half dozen years than would otherwise be possible.

The large budget deficits and high interest rates will also decrease housing construction and spending on consumer durables. Although the housing starts have experienced a sharp cyclical rebound, the 1.5 million annual rate of housing starts is still well below previous highs and current housing units are typically smaller than before. To the extent that a strong stock market and improved tax laws mitigate the impact of the deficit on business investment, the crowding out will be more concentrated on housing and other interest sensitive activities.

Also consider these statements by George Perry, senior fellow at the Brookings Institution and Rudolph Penner, recently named director of the Congressional Budget Office. First Mr. Perry, writing in the Washington Post:

For some time now there has been agreement that large high-employment deficits in the out years are undesirable if we want a prosperous economy with low interest rates and high investment levels.

Also writing in the Washington Post, on January 31, 1983, Rudolph Penner made the following comments:

With growth more vigorous than expected, the need to reduce the deficit becomes even more urgent. In a typical economic recovery the federal deficit falls rapidly. As the federal government absorbs less saving from the private sector, more is left over for the inventory, housing and other types of investment that occur during the expansion phase of a business cycle. In this recovery, even if vigorous, the deficit will fall very slowly given current policy. Real interest rates will rise more rapidly than usual, and the recovery will consist of an unhealthy mix of production—heavy on consumption but with less capital formation than desirable.

Some suggest that interest rates will rise so fast that the recovery will be aborted. I think that is unlikely, but it cannot be ruled out. The more important point is that, if it continues, it will be the wrong kind of recovery—one that does not sufficiently improve our prospects for long-run economic growth. . . . we cannot grow ourselves out of this problem. It will remain regardless of the speed of the recovery.

The minority staff of the Senate Budget Committee also addressed the problem of deficits affecting interest rates in a report issued this past July. In a summary of their findings, they stated the following:

Our analysis demonstrates quite clearly that over long periods of time, as deficits have increased as a share of GNP, interest rates have also increased. Because deficits threaten to grab an even larger share of GNP in coming years, interest rates threaten to go higher.

And in an article in the Los Angeles Times on May 1, 1983, Henry J. Aaron and Joseph A. Pechman, economists with the Brookings Institution, gave the following analysis of large deficits and high interest rates:

Unless real progress is made in reducing the structural deficit fiscal and monetary policies will clash one again, interest rates will rise and economic recovery will be aborted.

When the economy is weak, as it is projected to be in the immediate future, demand generated by a federal deficit can be a source of strength. But as the economy moves toward high unemployment, government deficits present a serious problem. Government borrowing is a drain on private saving, diverting credit otherwise available for investment in plant and equipment, housing, consumer durables and inventories.

The deficits estimated for the late 1980s would absorb most of the net private saving and economy is projected to generate, the exact proportion depends on economic and budget projections.

Deficits of such a size will cause serious, painful side effects. The heavy demand on credit will keep real interest rates high. (Real interest rates are the excess of actual interest rates over the current rate of inflation) High interest rates will reduce housing and automobile sales and will choke off investment by private businesses and state and local governments. The result will be a slowdown in the growth of productive capabity.

In short, the direct result of large federal budget deficits would be a high consumption-low investment economy that would tend to grow slowly, to run persistent deficits in trade with other nations and to encounter industrial bottlenecks (because of low investment) before full employment of the labor force is reached.

The structual part of the deficit, referred to by Joseph Pechman and

Henry Aaron, "is arrived at by estimating revenues and expenditures at a 'high employment' unemployment rate—assumed to be about 6 percent—associated with a relatively high level of economic activity," according to the House Budget Committee report accompanying the first budget resolution for fiscal year 1984. The other component of the budget deficit—the cyclical deficit—is due to weaknesses in the economy—basically unemployment over 6 percent. The structural deficit is created by existing spending and tax policies—it is a permanent deficit which will not shrink unless the economy is extremely strong. So strong that unemployment falls below 6 percent. Many economists suggest that the goal of Congress should be to eliminate the structural deficit, while allowing the cyclical deficit to expand and contract based on the health of the economy. CBO has projected the following structural deficit between 1983 and 1986:

[In billions of dollars]

1983	97
1984	99
1985	110
1986	87

These figures assume passage of the deficit reductions called for in the first budget resolution.

THE HIGH INTEREST RATE/HIGH INFLATION CHOICE

Two economists see a no win situation if high deficits are experienced. Their analysis centers on the reaction of the Federal Reserve to large deficits. First, Laurence Chimerine, chairman and chief economist of Chase Econometrics, writing in the Washington Post on February 25, 1983:

. . . structural deficits will eventually cause relatively high long-term interest rates, which will prevent faster growth from occurring, and may in fact cause another recession. Such pressure on interest rates from growing deficits will come from either the direct effect of rising Treasury borrowings (if the Fed does not fully accommodate them) or from an eventual acceleration of inflation (if they are financed by continued rapid growth in the money supply). There is some evidence to suggest that anticipation of either of these outcomes is already keeping long-term interest rates considerably higher than they would otherwise be.

Thus, excessive deficits will become self defeating because the resulting rise in interest rates will probably cause sharp declines in credit-sensitive industries such as housing and autos, reductions in consumer spending in response to declines in the net worth and consumer confidence, cutbacks in public works spending by many municipal governments, because they in effect would be priced out of the bond market, and declines in U.S. exports and increased foreign penetration in U.S. markets, reflecting upward pressure on the U.S. dollar on foreign exchange markets.

More recently, Thomas J. Sargent, professor of economics at the University of Minnesota, offered a similar warning in the New York Times (Aug. 12, 1983):

One possible response to this situation (large outyear deficits) is simply to leave the path of Government spending unchanged and eventually to print more money to help finance the deficit. The cost of this option would be eventually abandoning the money supply goal and enduring more inflation.

A second option is for the Federal Reserve to stick to a policy of slow and steady growth for money into the indefinite future, thereby foreclosing the possibility of ever monetizing the deficit. Under this option, sustained Government deficits are simply infeasible. Denied the printing press, the Government would have to promise higher and higher real interest rates on its ever-increasing debt.

CBO, in its August economic update, also addressed this problem:

If, on the other hand, the Fed tried to hold down real interest rates and help finance the larger deficits by converting a significant share of the Treasury's new debt into money, or "monetizing" it, the ultimate outcome might be an accelerating inflation as well as reductions in investment and productivity growth. The large prospective deficits, which are due largely to rising interest outlays, make the prospect of monetization seem more likely.

Lindley Clark, Jr., touched on this issue in his August 30 Wall Street Journal article mentioned earlier. About the public debt, he stated that:

. . . the Federal Reserve can buy it. Such purchases are easier for the Fed than they are for others, since the Fed in effect creates the money to make the purchase. When that happens, of course, the money supply tends to grow. If the process continues for a while we're back in inflation. If we let that run on for a while, the debt is effectively devalued, and—presto!—it is less of a problem. There are other problems, to be sure, notably the inflation.

Finally, the House and Senate Budget Committees, in their reports accompanying the first budget resolution for fiscal year 1984, discussed this potential problem. First, from the Senate Budget Committee report:

Moreover, large future structural deficits, is and of themselves, create the expectation of future inflation which adds an inflation premium to current interest rates even though inflation now is very low. In addition, large structural deficits will compete with private credit demand, when the economy fully recovers, and high interest rates will choke off private investment and bloat the Federal budget. Vigorous economic growth is simply incompatible with high real interest rates, and large structural deficits will tend to keep real interest rates high.

In a high employment economy, structural deficits are a very inefficient way of financing public spending. Large and growing structural deficits absorb private saving and that is necessary for new private investment in business plant and equipment and for growth in consumer investment in housing and durable goods. In the process of competing with private investment, large structural deficits will also raise real interest rates when the growth in credit is restrained.

In fact, large and growing structural deficits are simply incompatible with a noninflationary money policy because as real interest rates rise, real interest costs to the Federal Government grow rapidly, eventually causing the budget deficit to grow out of control. At some point, the Federal Reserve must step in and purchase large amounts of government debt. This is a form of money financing and is inflationary.

In addition, growing structural deficits, if accommodated by expansive monetary policy, raise incomes and, eventually, cause total demand to exceed the capacity of the economy and prices rise. This is another way in which structural deficits cause inflation. High inflation itself acts to diminish incentives to save and invest. So, large structural deficits reduce the private investment which is essential to long-term economic growth. Monetary policy determines whether or not the distortions that arise from structural deficits result from high real interest rates or inflation.

In general, elimination of the structural deficit over time should reduce pressure on real interest rates and make longer term, stable, noninflationary growth more likely.

And from the House Budget Committee report:

However, the large and growing structural deficits in the administration's current policies have extremely negative implications for capital formation and the vigor and viability of economic growth. Cyclical deficits can be compatible with low or falling interest rates, since the recession which increases the deficit also decreases private credit demand. But the growing structural deficits when the economy is growing imply that government and private credit demands will be increasing at the same time. This implies not only rising interest rates in the future but also high "real" interest rates today, reflecting an assessment by financial markets that fiscal and monetary policies remain in a dangerous "no-win" situation:

"If the Federal Reserve is expected to 'accommodate' the future deficits with a rapid and prolonged increase in the money supply, then inflation will re-accelerate. Investors who expect this outcome demand an inflation premium well in excess of current inflation before lending money long-term.

"Alternatively, the Federal Reserve may hold to an anti-inflationary policy. This is Chairman Volcker's announced policy and he has indicated that the greater the structural deficits, the more the Federal Reserve must maintain an anti-inflation stance. In this case, large structural deficits collide with private demands resulting in high real interest rates."

Either way, financial markets expect high interest rates in the future unless fiscal policy changes, and these fears for the future raise current long-term interest rates and put a drag on recovery. The likely outcome would be incomplete recovery and renewed recession.

There are, however dissenting voices on this issue. CBO, in its August report, suggested that the impact of high budget deficits on interest rates might not be that great [because of factors increasing the supply of money available for borrowing]. The report warns that:

. . . it would be easy to overestimate the amount of productive investment that a given deficit is likely to displace, even under a "tight" monetary policy. This is because:

Changes in tax provisions or spending programs that increase deficits may also increase private saving.

Increases in real interest rates that accompany large deficits attract foreign capital.

Crowding out may affect investment in housing and other types of spending more strongly than business investment because the latter may be determined primarily by the strength of overall demand, rather than by interest rates. Of so, consequences for productivity may be less severe than they would if business investment were more heavily affected.

Lawrence R. Klein, professor of economics at the Wharton School, University of Pennsylvania, gave a similar analysis in an article published this past July.

The Wharton Forecast does not look for continuing large declines in interest rates, nor does it look for large increases. This is the important thing. But our national savings outlook would indicate that crowding out (that is, the government's preempting much of the national savings to finance the deficit, to the detriment of business investment and housing) will not be a problem.

There are good reasons for expecting large increases in the components of gross business savings. Profits are well known to fluctuate by wide margins over the course of the business cycle, exceeding the scope of wage fluctuations. Wage increases have been unusually restrained during the last several months, enabling inflation to be brought under control. And in this recovery period, wages will continue to be restrained as long as unemployment remains high; consequently, profits should exhibit their usual cyclical gains on the upswing. It is this profit rise that will form a basic fund for business saving.

He also mentions the 1981 tax bill provisions relating to capital recovery, earlier legislation on accelerated depreciation accounting, and the stock market boom as evidence that crowding out will not be a problem.

And G. Thomas Woodward, an analyst in public finance with the Congressional Research Service, explored this issue in a report, published on August 1, 1983, entitled "Large and Continuing Deficits: Their Role in Recession and Recovery." He made the following points:

* * * some argue that the prospect of future deficits has raised current interest rates and reduced investment, making the recent contraction worse and retarding recovery. Yet a theoretically consistent hypothesis that could explain such an outcome is difficult to construct. One can show how interest rates might rise due to inflationary expectations, but not how they in turn depress investment. Another scenario can show how investment may be depressed but not how interest rates can be boosted. Other explanations are either inconsistent with available evidence or fail to guarantee contractionary results.

Woodward goes on to state that "careful analysis shows that the proposition that future deficits will cause a future contraction is probably not what it seems to be." He makes the point that higher interest rates will not necessarily mean a dangerous weakening of the economy. High interest rates will cause some sectors of the economy to suffer, which will result in temporary employment for certain workers, but he sees other sectors expanding. He admits that investment will be hurt to some degree by increased Government borrowing, but states that "due to a variety of reasons, the crowding-out of business investment may be rather small in the face of even large deficits," and that "the crowding-out that does occur may not affect economic growth by much either."

Also warning in a National Journal article that there may not be a direct connection between interest rates and high deficits is Robert Samuelson:

Moreover, deficits don't fully explain the fluctuations in interest rates. Rates peaked in the summer of 1981, just as the Reagan tax bill—commonly attacked as the fundamental source of deficits—was being passed. During 1982, interest rates declined, even though the deficit widened.

Finally, John Rutledge, president of the Claremont Economics Institute, wrote the following in an August 4, 1983 Wall Street Journal article:

The evidence suggests that each $100 billion of government borrowing, in and of itself, raises the level of interest rates by about sixty basis points, or six-tenths of one percentage point. This suggests that $300 billion deficits, if they were to occur, might raise the level of interest rates by as much as two percentage points. At 5 percent inflation in 1988—higher than our forecast—this would put Treasury bill rates at 7 to 8 percent, hardly a catastrophe by current standards.

THE IMPACT OF DEFICITS ON TRADE

This is one area that is often overlooked in discussions about the deficit. Martin Feldstein and Paul Volcker have addressed this issue recently. First Martin Feldstein in his speech before the American Stock Exchange Conference:

Probably the most serious and certainly the least widely understood form of crowding out is the sharp reduction in net exports. The anticipation of large budget deficits in the years ahead raises the real long-term interest rate in the United States and this, in turn, causes the exchange value of the dollar to rise relative to the value of other currencies. The high international value of the dollar makes American exports less competitive in world markets and makes it easier for foreign producers to sell in this country. As a result, exports fall and imports increase.

This year experts predict that the U.S. merchandise trade deficits—the excess of imports over exports—will be a record $60 billion, or about 2 percent of GNP. This represents a 50 percent increase since 1982's record level and more than double the 1981 level. One reason for the large trade deficit this year is that the economic recovery in the United States is much stronger than the recoveries abroad, causing our imports to rise before the increase in imports by other countries. The large trade deficit also reflects the contraction of imports among the major debtor nations of Latin America. But the primary reason for the sharp rise in our trade deficit is undoubtedly the very strong dollar that is caused by our budget deficit.

The large trade deficit implies a capital inflow to the United States from the rest of the world, a capital inflow that reduces domestic crowding out and keeps the interest rate from rising even higher. The trade deficit with the resulting capital inflow is thus a useful safety valve in the economy's response to the otherwise even more harmful budget deficit.

. . . one of the advantages of reducing the anticipated budget deficit is that that will reduce the dollar's international exchange value and improve the competitiveness of American products at home and abroad.

And Paul Volcker, before the House Banking Committee on July 20, 1983:

The pressures on our capacity to finance both rising private credit demands and a huge budgetary deficit have, as I just noted, been one factor inducing a growing net capital inflow. One short-term consequence is lower domestic interest rates than might otherwise be necessary, and maintenance of extraordinary strength of the dollar at a time of rising trade and current account deficits. But the sustainability of those trends can be questioned. The picture of the largest and strongest economy in the world relying, in a capital-short world, on large inflows of funds to finance, directly or indirectly, internal budget deficits is not an inviting one for the future. The implication would be a persistently weak trade position, instability in the international financial system and exchange rates, and lack of balance in our recovery.

It is not clear whether the benefits of lower interest rates based on the inflow of foreign funds is worth the price we pay for a very serious balance of trade problem. This is one area we in the Congress certainly need to explore further in the future.

HOW LARGE SHOULD DEFICIT REDUCTIONS BE?

An interesting question addressed in the CBO report of last August was "how much deficit reduction is enough." I think the approach described by CBO should be looked at closely by the Congress. CBO first notes the problem of the Federal debt growing faster than the economy's capacity to absorb it, and warns that harmful economic consequences may result. The report then states that "many analysts argue that a compelling quantitative criterion or target for deficit reductions is that they should overcome the recent tendency for the debt to grow faster than the trend rate growth in GNP." The ratio or publically held Federal debt to GNP has grown significantly since 1981, and is projected to continue growing in the years to come if deficit reduction measures are not enacted. CBO calculates, however, that the debt/GNP ration should stabilize under the policies of the first budget resolution.

Another approach was presented by Secretary of the Treasury Donald Regan in his testimony before the Joint Economic Committee this summer. He stated the following:

So let me make a final, modest proposal. Just as the current budget situation took years to develop, so future deficits will not be controlled if we wait until 1986 or 1987. The April projection of Federal spending

for fiscal year 1988 calls for $1 trillion, 125 billion. Why can't we work backwards from that astronomical sum? By retaining tax rates at about the level to which the President's program was designed to reduce them, we can generate a trillion dollars for that year's Federal budget.

Surely a trillion dollars is enough to take care of our defense needs, to provide for the security of all our citizens in genuine need, and shoulder the burden of interest accumulated over a half century of deficit spending. We need to begin now to set such a goal, without slamming on the brakes five years down the road.

Congress may want to consider a similar type of long-term approach to deficit reduction, although it is extremely unlikely that we in the House would ever rely simply on spending cuts, as Secretary Regan would have us do.

WHAT ARE THE HARMFUL EFFECTS OF DEFICIT REDUCTIONS

Another aspect of the deficit reduction issue is addressed in the CBO report and deserves mention here. The report warns that—

Deficit reduction measures would not be costless. Depending on the specific measures adopted and other economic conditions, there might be effects both on aggregate demand (temporarily) and on economic incentives affecting long-run growth.

Deficit-reducing measures would directly reduce the incomes of taxpayers, government workers, recipients of transfers, and others. As a result, businesses might reduce investment, anticipating reductions in their markets. If not offset by other factors, these developments might temporarily weaken GNP.

Quite apart from such potential complications in the short-run outlook, ill-chosen deficit-reducing measures may have adverse impacts on long-run growth that at least partially offset their intended effects. Measures to increase revenues may reduce the flows of savings, of risktaking, or of labor supply if they have incentive-reducing impacts. Spending cuts may have similar perverse impacts, especially if they fall on programs of government investment that contribute to productivity growth in the long run.

We should not assume that reducing the deficit is a zero-sum game, however. Here is the CBO's conclusion:

Most analysts would argue that the favorable long-run impact of deficit cuts working through reductions in government borrowing and consequently in interest rates should be strong enough to outweigh their possible adverse impacts on incentives.

THE IMPACT OF DEFICITS ON NEW PROGRAM INITIATIVES AND CURRENT PROGRAMS

One final aspect of the deficit problem involves the ability of Congress to protect existing Federal programs and to initiate new programs. Large deficits constitute an enormous obstacle for the enactment of new Federal programs, and for legislation expanding existing programs. I do not believe anyone would say that every existing Federal program is effective and well run, or that all ideas for new programs are good ones. But it is inevitable that during the next 5 to 6 years problems will arise in this country that the Federal Government will be asked to address, and these problems will most likely involve spending money. Unfortunately the burden of proof for these new initiatives will be extremely high—it is likely that some need will not be met, and programs misdesigned, because the oppressive size of the Federal deficit will discourage Members from voting for adequate increases in spending. In this sense, large deficits threaten to undermine the basic responsibility of Congress: to provide for the general welfare of the citizens of the United States. While this aspect of the deficit problem is not as obvious as the economic consequences, it is just as insidious and just as great a threat to good government.

SUMMARY

Trying to determine the impact deficits will have on the economic health of this country in the years ahead is a difficult task. Predicting any future event is hard, and when you are dealing with something as large and volatile as the U.S. economy, and with the many unknowns involved in any analysis of the impact Federal budget deficits will have on that economy, the crystal ball never seems all that clear. Even so, it is very hard to ignore the apparent consensus among economists, and those that depend on economists for their opinions on economic matters, like CBO, and the House and Senate Budget Committees, that budget deficits do matter, that they will result in higher interest rates, lower investment, lower productivity, higher unemployment and, generally, economic misery. The consensus I find is not based on a poll of all economists, but rather on what I have read on both sides of the issue, and what theories and projections make the most sense to me.

I believe that Congress must not abandon its efforts to reduce current and future deficits, as tempting as that might be in the warm glow of economic recovery, but must forge ahead and make the tough choices that, unfortunately, are inevitable in any stuggle to narrow the gap between what we spend and what we raise in taxes.

If the deficit is a problem, how must Congress act? Referring back to the short-term section of this presentation, the feeling seems to be that we will need to see substantially lower deficits starting in the middle of 1985. This is unfortunate, for the Presidential election of 1984 makes it unlikely that we will embark on a major effort to cut spending or raise taxes for the fiscal year 1985 budget, which will be voted on in the middle at some of the most crucial Presidential primaries next spring. We could wait until the fiscal year 1986 budget to worry about the deficit, but I do not see how Congress can, in good conscience, delay action that long after considering the warnings from economists, that I have included in the text of this presentation.

What is necessary is for Congress to bite the bullet now, and to enact spending cuts and tax increases that assure us of steadily decreasing deficits in the years ahead. Congress has already approved a budget resolution that calls for such a deficit path, and that asks a number of committees to come up with legislation encompassing spending reductions and tax increases—and most committees have already responded. We are, as everyone knows, paralyzed over the issue of revenue increases. Possibly something as abstract as the theories of economists are not enough to motivate the U.S. Congress to act on the deficit through reconciliation, possibly it will take a crisis. I hope not. I hope we will face the realities of this grave situation and act aggressively in the coming weeks and months to set the Federal budget on a course that will insure continued economic health.

I yield back the balance of my time.

Mr. REGULA. I thank the gentleman from California for a perceptive analysis of the problem. I only hope that those who are watching and listening will take to heart his comments because I think it is extremely important to the economic health of this Nation in the years ahead that we understand what Mr. PANETTA is talking about in terms of the impact that this deficit will have on our quality of life in these United States.

I now yield to the gentleman from the State of Washington (Mr. CHANDLER).

Mr. CHANDLER. Mr. Speaker, I am hunbled to follow the eloquence of the two previous speakers. Certainly in their knowledge and experience, their experience is vastly superior to my own.

But I had the experience of being the chairman of the Ways and Means Committee of the State of Washington in the house of representatives at a time when our economy fell out from under us and we found ourselves $1.5 billion in deficit, that from a general fund budget of just under $8 billion. And we balanced our budget because we did not have any choice, constitutionally we were required to do so. We did it by cutting spending and we did it by raising taxes. It was difficult, it called for sacrifices, but we did it.

So, I am honored and privileged to speak out today and join my honored colleagues in raising this issue as an important one in the United States and certainly to the people of the State of Washington.

As the United States faces international and domestic problems of today, none appear to be more important for our long-term security than our economy. The unacceptably high level of

deficits we face now and in the future threatens our economy and that of the world unless decisive action is taken very soon. If a single message emerged from the international representatives at both the Williamsburg Economic Summit Conference and the recent World Forum hosted by former President Gerald R. Ford in Vail, Colo., it is that we must take action on current and looming deficits.

In the August 20 economic and budget outlook released by the Congressional Budget Office, the projections indicate that budget deficits will remain very high by historical standards with the structural element in the deficit not beginning to decline until 1986, "suggesting continued pressure on interest rates with attendant adverse effects on interest-sensitive sectors of the economy."

While the index of leading economic indicators continued to rise in July, we are already beginning to see the effects of upward pressures on interest rates with new home sales declining in July by 6.5 percent as a result of the steep increases in mortgage rates during the summer. Housing starts also declined in July, with single-family-unit starts plunging 11.9 percent below June's rate.

Need I tell you what effect that has on the forest products industry in the State of Washington. In addition, factory orders were down 1.7 percent in July.

The CBO indicates that unless congressional action is taken, we will be faced with $200 billion deficits for years to come. I am disturbed by reports that no action on the deficit will be taken for the next 18 months. we must come to terms with this problem. It seems clear that the American consumer's purchasing power has been seriously eroded, whether by inflation as a result of deficits or by high interest rates. If high interest rates suppress housing sales, the same result occurs with appliances, automobiles and other major purchases. And, with the ability to buy eroded from the consumer, there surely is no need to produce, and jobs are lost.

We often hear it said that America needs to retool and modernize its steel, auto and other manufacturing plants. This is clearly the case as Japan and other countries outstrip us competitively with products produced in highly automated and efficient plants. Yet, our business executives, who fully understand this fact, are severely hampered by high interest rates which put the purchase and construction of new plants and equipment out of reach. Once again, more jobs are lost.

Perhaps one of the most devastating impacts of the deficit is in the dollar's value in relation to foreign currencies. During a recent trip to Japan, I spoke with Prime Minister Nakasone. He pointed out that the weakness of the yen has been in almost direct correlation with the rates of interest in the United States. And, our Ambassador to Japan, Mike Mansfield, says he has found no evidence whatever that the Japanese have artificially manipulated the value of the yen downward. On the contrary, it would be, he points out, very much in the interest of the Japanese to strengthen the yen, which they have tried unsuccessfully to do.

But, with the situation as it is, Japanese products are far more competitive in the United States than many of our own. And, when we compete against the Japanese and others in world markets, our U.S. products are at a decided disadvantage. Simply ask the Caterpillar Co. how it fared in Brazil where it was competing against a Japanese heavy equipment manufacturer. Caterpillar lost the competition, in part because it was more economical for the Brazilians to buy Japanese earthmovers with cheap yen than it was to purchase Caterpillar equipment with expensive dollars.

Who can know how many jobs we lost as a result of the loss of that sale?

I want to congratulate those Members of Congress who are speaking out and to urge Mr. PANETTA and Mr. REGULA to continue their efforts to focus attention on the need for congressional action.

I am concerned, however, as so eloquently pointed out by Mr. PANETTA, at the ability of the Congress to succeed in this endeavor. Even though the chamber of commerce/Gallup survey indicated that 78 percent of the people feel that large Federal deficits would be a great or very great threat to economic recovery, I am not convinced that the American people fully understand the sacrifices necessary to correct the problem. Nor do I feel that there will be broad political acceptance of the necessary solution.

For that reason, I wrote to the President earlier this year, suggesting the formation of a bipartisan, high level commission to deal with the subject. The commission, as I view it, could be structured similiarly to the one on social security or the Scowcroft Commission, both very successful in producing solutions which have been successful in the Congress. Ideally, the commission would define the problem and provide a suggested solution, or perhaps, a set of alternatives.

This is not to say the Congress should duck the issue. Indeed, I see here today signs that Members are willing to tackle this difficult problem head on. Rather, I believe the commission gives us the opportunity to set to work as Democrats and Republicans, labor leaders and business executives, workers and consumers. We need to set aside the usual political rhetoric and put the national need ahead of partisanship.

Finally, let me say that I believe this budget deficit problem is one of the most difficult we will face for many years. As we get onto the track of attempting to reduce deficits we surely will see coming at us from the other direction another train. That train represents the inevitable conflict between fiscal constraint and the very real needs of national defense, education, and human services or the legitimate desire for lower taxes.

But, we cannot escape the reality, though difficult perhaps to accept, that sacrifice by us all will be necessary.

Thank you for the opportunity to speak out today on this vitally important issue, Mr. Speaker. And again, my compliments to my colleagues for their leadership in arranging today's special order. Perhaps we have started something.

Mr. REGULA. I thank the gentleman from Washington for a thoughtful contribution. I am certainly especially pleased to have one of the new Members participate in discussing this serious problem.

Now, I would like to recognize the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Speaker, I commend the gentlemen from California and Ohio for organizing this special order on the deficit. The Federal budget deficit crisis requires expeditious resolution by the President and the Congress. Failure to act will severely undermine the recovery. Our country is experiencing a slow recovery that is being threatened not only by deficits but also by a major industrial base restructuring as we move into a more competitive global economy. We must view the deficit question in this larger context.

Economic indicators point to a burgeoning recovery from the worst recession since the Great Depression. Employment is growing: sales are up; industrial production is on the rise and inflation is not significant. Much of this progress has been achieved not by the administration's economic blueprint for an investment-led recovery, but by easing of the monetary policy and an economic policy closer to Keynesian economics.

Prospects for long-term growth, however, are not optimistic. Lester Thurow, in a recent analysis, showed U.S. productivity growing at 3.3 percent per annum from 1947 to 1965; at 2.4 percent per annum from 1965 to 1972 and at 1.6 percent per annum from 1977 to 1982. This pattern has taken place through several business cycles, inflation, and recession, an overvalued dollar and an undervalued dollar. Simply because we are in a recovery, with its improved statistics, does not mean the long-term trend has changed. From 1976 to 1981, productivity in Japan grew at 7.1 percent per

annum, in Germany at 3.9 percent per annum and in France at 3.4 percent per annum.

The deficit cloud hangs over the challenge to true recovery. Thus, it is not the only dimension of a recovery effort, but it is a very significant element. The Congressional Budget Office in its August 1983 update on the economic and budget outlook warned that while economic growth has been stronger and inflation lower in the first half of 1983 than anticipated, the recovery still appears to be precarious because of high interest rates and uncertainty concerning the future course of both monetary and fiscal policy. Another clash with restrictive monetary policy and expansionary fiscal policy could destroy the fragile recovery. Interest rates have not declined to the levels usually experienced during the early stage of a recovery, perhaps reflecting expectations of increased inflation and fears that large Federal deficits will persist in the later stages of the recovery because of failure to implement the budget resolution or to take further steps to curb deficits.

When the economy is weak, deficits can help take up the slack. But, once the economy approaches high employment and capacity, the deficits present a serious problem. Government credit demands collide with business and consumer loan demands, and bid up interest rates. If the deficit persists at the $200 billion range, Government demand will preempt roughly 40 percent or upward of all funds in the credit market.

Because of these deficits and resulting interest rates, predictions that the rapid growth of the economy will slow dramatically in the next 6 months, are becoming more widespread. If this happens, it will prevent the kind of long-term investments necessary for sustained economic growth. The effect will be a slowdown in the growth of productive capacity. The dollar will remain high in foreign markets and our rapidly enlarging trade deficit—which by the second quarter of this year was running about $36 billion per year above that for 1980—will only grow worse.

There are those who believe that a strong recovery will by itself reduce the huge projected deficits. The troubling reality, however, is that only a small part of the deficit is cyclical in nature, that is, related to the recession. The deficit is mostly structural, that is, due to the budget policy and the complex relationship of the U.S. economy to the international economy.

When the President took office in 1981, the fiscal year 1981 deficit was $30 billion. A surplus was projected for fiscal year 1984 and beyond. Instead, the current projection for fiscal year 1984 has jumped to an incredible $200 billion and for fiscal year 1988—$300 billion. This enormous deficit is the result of policies enacted over the last 2 years. To state otherwise is to ignore the facts. Revenues were cut by an estimated $211 billion by 1988; the large defense buildup outpaces economic growth and more than offsets the large cuts that were made in nondefense spending. These deficits producing actions have been accompanied by growth in nonmeans tested entitlement programs and mounting interest points on the accumulating debt. These structural deficits will continue even if the economy recovers. Without spending and revenue changes they are projected to go from 2.6 percent of GNP in fiscal year 1984 to an unprecedented 4.2 percent in 1988—four times as large as in 1982.

According to Joseph Pechman of Brookings:

> A high unemployment deficit of 4.2 percent of GNP is unprecedented since the Second World War. It would absorb over a quarter of gross private savings and almost two thirds of net private savings. The Federal Reserve Board would be reluctant to accommodate that much fiscal stimulus in a period of economic expansion: if it did not accommodate it, there would be continued upward pressure on interest rates which would retard the growth of the economy.

The case is clearly compelling for reducing the structural deficit as the economy attempts to move to high employment. It is necessary to increase taxes, cut the defense buildup and control rising medicare costs and other nonmeans tested entitlement programs. Tax cuts enacted but not in effect should be repealed or delayed. We cannot afford to continue to finance large tax cuts through Government borrowing. We must restore fairness to the Federal tax laws and remove irrational and unwarranted tax breaks that misallocate capital and labor, impair economic efficiency and stifle growth. We must set in place a coordinated set of industrial policies to revitalize American competitiveness. The budget resolution adopted in June would begin to turn the long-term deficit projection around. As a first step, it must be implemented.

Such action will require extraordinary political will. Congress and the administration must agree on a package of cuts and tax increases that will sharply and believably reduce future deficits.

Further extensive cutbacks in nondefense discretionary programs or means-tested entitlement programs are inappropriate. Those programs, most of which serve the neediest of our citizens, have borne the brunt of the budget cuts over the last 2 years.

Furthermore, there are certain programs, for example, jobs and relief measures for those hardest hit by the recession, which deserve to be enacted. The 1984 budget resolution includes a reserve fund for those essential initiatives. Until economic growth aids the long-term unemployed, they need Government assistance.

The latest CBO projections estimate that the unemployment rate will be at 8.9 percent at the end of this year and 8.2 percent at the end of next year. This corresponds to unemployment levels of 10 million and 9.4 million. Only 35 percent of the unemployed now receive some type of unemployment benefits. Less jobless assistance is being provided now than in previous recessions. No matter how fast the recovery, there will be an unprecedented number of long-term unemployed workers in the next few years. The unemployment insurance system needs to be made more responsive and Congress needs to pass the well-designed, highly targeted, cost-effective Community Renewal Employment Act to assist the long-term unemployed.

In short, Mr. Speaker, we must deal with the political stalemate surrounding the Federal budget deficits reasonably, responsibly and expeditiously, without turning our backs on those in need. To do otherwise, would pose irreparable harm to the economic recovery.

□ 1840

Mr. REGULA. I thank the gentlewoman from Ohio. I think she has made many good points, but three that I noted that I think should be emphasized and reemphasized.

One, is that capital starvation is depleting greatly productivity. The statistics pointed out so effectively by the gentlewoman indicated we had productivity growth when we had capital investment, but that is not available when the greatest share of our GNP goes into deficit financing.

Second, as you pointed out, structural deficits are not going to respond to economic recovery. They are built in because of excessive Government spending through many different programs and we in the Congress simply must address these.

The third point that I think is extremely important is that monetary policy cannot carry a bad fiscal policy. If we are going to have a strong, viable economy that is productive for everyone involved, that monetary policy has to complement and vice versa fiscal policy.

What we are really addressing tonight is the issue of fiscal policy and how we can get a handle on that and not depend on monetary policy alone.

I might mention to our colleagues watching that the gentleman from California (Mr. PANETTA) and myself will have a special order next week on the 21st and discuss at that time the long-term effects of the deficit as well as the solutions.

I would welcome other Members to join us. I think this is the most serious

domestic policy challenge confronting the Congress and not just the Congress but the people of this Nation at this time, because if we do not address the problem of deficits we are being unfair to our children and grandchildren, we are being unfair to their future, and we are seriously limiting their horizons in terms of the quality of life, in terms of opportunity.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding and thank him for his participation in this effort.

As the gentleman indicated, next Wednesday we will have an additional special order at which time we will deal with not only the long-term impacts of the deficit but look at specific answers at that time.

Again, other Members are invited to participate at that time.

Again I want to thank the gentleman for his cooperation in putting together this special order.

Mr. REGULA. I thank the gentleman especially for his leadership in already working on the answers to the problem, and I am quite sure he will have a very significant contribution to make next week as we discuss the solutions to these difficult challenges.

● Mr. KEMP. Mr. Speaker, I congratulate my colleagues on the Budget Committee, Mr. REGULA and Mr. PANETTA, for holding this series of special orders on the Federal deficit. I believe it is a useful forum for clearing up misconceptions and there are many about deficits and the nature of this problem. I agree deficits matter but that is only a small part of this debate.

The debate over the effects of Government deficits has gone on for many years within the academic profession, and there is still a great deal of controversy. If we can learn anything from this debate, it is not that deficits don't matter, but rather that they matter in different ways than conventional wisdom would suggest.

The fact that interest rates came down sharply last year, at exactly the same time that current and projected deficits increased, indicates that there is no simple relationship between deficits and interest rates. Indeed, a strong economic recovery has begun, led by those very interest-sensitive sectors—such as housing and automobiles—which some believed would be choked off by the Federal deficit.

What economists have learned is that the relationship between Government borrowing and interest rates is affected by the stage in the business cycle, by domestic monetary policy, by international monetary, capital and trade flows, and so on. This is further modified by the rate of private personal and business saving, by State and local government surpluses, by the effects of inflation on outstanding debt, and by the way people handle their trillions of dollars of existing assets. Moreover, the same Federal deficit can have a different effect, depending on whether it finances the current consumption of goods and services, or long-term capital investment, or loans to the private sector, or building up Federal cash balances. The working of all of these factors make it difficult to find any simple relationship between Federal deficits and interest rates.

As I said, this does not mean that the deficit has no effect. Crowding out by the Government is a real phenomenon, but it involves the total Government preemption of real resources which the private sector could otherwise use. This total crowding-out effect is approximated by Government spending, not by the deficit. Whether spending is financed by current taxation or borrowing affects mostly the timing and nature of this crowding-out effect. This case was put very well today in the Wall Street Journal, in an editorial and in an article by Norman Ture, the former Under Secretary of the Treasury for tax and economic policy.

In general, there are two ways to reduce the Government's crowding out of private economic activity—we can reduce the size of Government, and we can increase the size of the economy. Any successful economic strategy must seek to do both—both restrain the growth of Government spending and encourage real economic growth. For this purpose, any significant tax increases would be counterproductive, since they would neither increase economic growth nor restrain the growth of Government spending. The best chance for continued economic recovery lies with President Reagan's original plan of tax incentives, spending restraint, deregulation, and monetary reform.

In addition to the two articles from today's Wall Street Journal, I would like to introduce into the RECORD at this point two earlier articles from the same newspaper, and a recent paper by Alan Reynolds.

The articles follow:

BUDGET SOLUTION

The days and nights of the living dead have returned: The Congress of the United States is back in Washngton, where it must again confront the budget nightmare. Congress's wailing and howling over the dread budget deficit causes quite enough discomfort across the land, so we're reluction to arouse them further. Alas, we present some simple truths about the deficit—and a proposal to free Congress from the curse of the budget process.

Recent history has taught us a few things about what a budget deficit does and does not do. Deficits do not prevent a recovery. We currently have a $200 billion deficit. We currently have a recovery.

It's widely argued that if the government has to finance a deficit of $100 billion to $300 billion, interest rates will skyrocket again, perhaps to 17%, crushing the recovery (and the Reagan presidency). We have come to doubt the validity of this argument, which depends in large part on the assumption that government borrowing—and its impact—is limited to the securities market, which in 1982 was thought to have an available savings flow of about $350 billion.

It seems more plausible, as John Rutledge argued on this page last month ("The 'Structural-Deficit' Myth," Aug. 4), that government borrowing to finance a deficit should be viewed in the larger context of the economy's total asset holdings, currently about $20 trillion. Placed against $20 trillion, a large government borrowing may cause some rise in interest rates, but nothing as large or destructive as the Armageddon generally predicted.

We've been pooh-poohing these concerns (much to the discomfort of many traditional allies) and making the point that a lot of the deficit talk is merely an excuse to get more revenues to increase spending. But we've also been saying privately that two years from now—when recovery came despite deficits—we will be the only people in the land worried about deficits. For the plain and undeniable truth is—and here we rejoin the ranks of our worried allies—deficits do crowd out resources.

But let's get something straight about this. As Norman Ture makes plain in a nearby article today, deficits crowd out resources only to the extent that they serve their imperial master—government spending. We can raise taxes to close the deficit; we can borrow from the private sector to close the deficit. Either way, the money raised becomes government spending. Government spending is the first cause of crowding usable resources out of the private sector.

The choice is clear as it can be: If we want America to have primarily a public economy, we should quit whining about the deficit and let congressional policies proceed toward that goal. If instead we want primarily a private economy, we simply have to cut spending.

And that means we've got a very big problem: The best political minds in Washington say that all the king's horses and all the king's men will never be able to cut government spending again. That is the implicit assumption behind much of the deficit talk and the counterproductive solutions in the air. We're not so ready, however, to throw in the towel on prudent economic management. What's really happened is that the terms of the political game in Washington have changed in a way that has eroded the traditional restraints on spending imposed by Congress's internal discipline and the external pressure applied by the Executive.

The erosion began with the House committee reforms of the 1970s, which undermined the authority of the House leadership. Next, Congress perverted the principle of entitlements.

Providing basic support for citizens who fell into deep poverty was properly regarded in the 1960s as an appropriate commitment by a successful nation, and Congress, with clear public support, made the commitment. But it erred in not foreseeing (or in willfully refusing to see) that the payment formulas—primarily indexing payments to inflation—would create a claim on the nation's wealth large enough to undermine the health of the larger economy.

The last brick in the dam gave way with passage of the Congressional Budget and Impoundment Control Act of 1974. This

mistake had the unintended effect of opening the spending spigot without ever finding the proper tools to shut it off (see the accompanying graph).

Forget the phrase, "budget control." No one takes that seriously anymore. The key words in the act are "impoundment control." In the early 1970s, Congress became petulant over Richard Nixon's attempts to reduce spending by using the president's power to withhold, or impound, funds appropriated by Congress. By effectively eliminating the president's impoundment powers in the 1974 act, Congress grievously damaged the balance of power. The president can still veto appropriations bills, but the bills have become so huge and inclusive that the big veto is no longer managerially or politically useful.

The fact is, this issue has gone quite beyond the question of conservative vs. liberal social philosophies. Congress can't hold down the upward growth in spending, and the president has no effective counterweight to pose against Congress. In short, the ship of state, in its current upward spending stream, is on automatic pilot, with the government laying claim to an ever larger share of whatever the economy produces.

The solution to this problem requires two things: Reimposing discipline on the politics of spending and restoring the balance of power between Congress and the presidency. And as is often suggested, the solution requires two other things: the support of the House speaker and the president. Well, we know the speaker's position: The economy be damaged; this conservative president must be jettisoned from the Oval Office no matter what the costs. Resolution of the budget crisis clearly lies with the president, and we know of one proven mechanism for getting the job done. Ronald Reagan should do the following:

He should send a constitutional amendment up to Congress, exhorting it to give the president a line-item veto over the budget. Ed Meese has been floating the item-veto idea for some time, citing in support Mr. Reagan's experience with it in California. The governor of every major state in the Union has line-item veto power, which permits the Executive to veto individual items in the legislature's budget. Nearly every president since Ulysses S. Grant—Democrat and Republican—has requested it. (Yes, indeed, that includes FDR.)

Mr. Reagan should make the line-item veto the centerpiece of his reelection campaign, and he shouldn't flinch from claiming it as the Republican answer to the deficit issue. There is no way Mr. Reagan can avoid having the Democrats fling the deficit in his face, but there's no way the Democrats can hide the intellectual exhaustion of their own ideas. Moreover, it's likely that the prospect of a line-item veto would unify the supply-side and conventional wings of the Republican party.

The usual argument against the line-item veto—that it would unfairly expand the president's power—is clearly fatuous. Congress in 1974 arrogated to itself responsibility for spending; it has clearly failed. Politics in America most effectively performs its proper role—arbitrating among the competing interests of a huge population of free and informed people—when power is real but rarely used. It's most likely that once a president held the power to veto individual spending items, Congress would sort out for itself what is justifiable spending and what isn't, just as it did before the "budget control act." And if, as now, Congress declined to exercise prudence in managing the people's tax payments, that national constituency that elects a president would surely expect him to use the item veto to restore prudence, regardless of the highly publicized screams of Congress's many constituencies.

That is how the balance of power was intended to work. When it is damaged, as it is now, the American system suffers. The presidential power created by the line-item veto will restore the balance. And by forcing legitimate political horse-trading to take place again on Capitol Hill, it would allow Congress to regain its self-respect. Most important, it would show that Washington is truly serious about solving the deficit problem.

What Really Does the Crowding Out

(By Norman B. Ture)

(Mr. Ture, a Washington, D.C.-based economic consultant, was undersecretary of the treasury for tax and economic policy from March 1981 through June 1982.)

In the continuing debates over federal budget and fiscal policy, those who insist we must raise taxes argue that budget deficits impede recovery and growth by crowding out private investment. Proponents of higher taxes are mistaken in asserting that the deficit per se is the fiscal culprit. The villain is government spending. This is what crowds out, not the deficit.

There are two principal versions of the deficits-crowd-out argument. The one widely articulated in the media is that the government's borrowing competes with private borrowing for a limited amount of money or credit, driving up interest rates and crowding out private investment. A more sophisticated version was presented in the president's 1983 Economic Report and has been repeated frequently by the chairman of the Council of Economic Advisers. This version holds that government deficits pre-empt equal amounts of the nation's total saving, leaving less to finance capital formation.

Both versions are mistaken. The first view supposes erroneously that deficits are financed out of the money supply or the credit supply, whatever that is taken to be. There is, however, no necessary connection between deficits and the money supply in concept, and certainly none in fact. Government and private-sector borrowing don't compete for the money supply.

Government deficits are financed by the economy's saving. So, too, is private capital formation. A fundamental national-income-account relationship is that gross national saving, which is gross private saving plus the government's surplus or minus the government's deficit, always equals the sum of gross private domestic investment and net foreign investment. The argument that the larger the government deficit, the less saving is available for capital formation rests on an incomplete application of this fundamental relationship.

That argument ignores the effect of government fiscal actions on gross private saving, which is the main part of gross national saving. By definition, gross private saving is what is left of the economy's total output or income (GNP) after consumption and taxes are taken out. For any given amount of GNP, the greater the amount of taxes, the less is gross private saving.

DOES THE OPPOSITE

Some might argue that raising taxes reduces consumption, so that gross private saving isn't necessarily less if taxes are more. But with a given amount of GNP, this could be the case only if the tax increase raised the cost of consuming relative to the cost of saving and investing and did so enough to reduce consumption by at least as much as the increase in taxes. In fact, however, the principal tax in our revenue system, the income tax, does just the opposite—it raises the cost of saving relative to the cost of consumption. Even if additional tax revenues were raised by excises, sales taxes or a broad-based consumption tax, economists generally agree that this wouldn't raise the cost of consuming relative to the cost of saving. So, unless a tax increase, in and of itself, were instantaneously to increase GNP, gross private saving must fall—and by at least as much as taxes go up. Gross national saving, therefore, won't be increased—it very likely will be reduced—by raising taxes to cut the government's deficit.

Some simple national-income-account arithmetic is useful to illustrate these points. Suppose the economy is producing $3.3 trillion of goods and services, and the government takes $700 billion of that output but collects only $500 billion in taxes, borrowing the remaining $200 billion from the private sector. No matter how the government pays for that $700 billion, there is precisely $2.6 trillion left for the use of the private sector. Whether the government's budget shows a surplus, a balance or a deficit doesn't change that fact; only the amount the government spends in buying part of the economy's output or its production inputs determines what's left for the private sector out of any given total output.

How the $2.6 trillion of output available to the private sector is split up between consumption and investment depends on the cost of saving relative to the cost of consumption. The cost of saving—of buying things that will produce income in the future—is the amount of consumption one must give up to get some specified amount of future income. With no taxes, this cost depends on the productivity of capital—on how much additional output is obtained if the economy has one more unit of capital, everything else the same. With taxes, the cost of saving also depends on how much tax will be taken out of the return to the increment of capital. The bigger the tax bite out of that incremental return, the less is the net return and the greater is the cost of saving. A government deficit doesn't itself affect the productivity of capital, which is the basic determinant of the cost of saving relative to the cost of consumption. The deficit per se doesn't influence the allocation of the income available to the private sector between consumption and saving.

Suppose, using the previous example, that given the productivity of capital and the prevailing tax system, $2.15 trillion of the $2.6 trillion of output available to the private sector is used for consumption. Then gross private saving—total output minus consumption and taxes—is $650 billion. Subtracting the deficit of $200 billion, gross national saving is $450 billion. And, as it must, gross national saving equals investment. The initial situation is shown in column 1 of the table.

Suppose that taxes are raised $200 billion in order to balance the budget. Virtually any tax increase that might be politically acceptable and enacted would raise the cost of saving proportionally more than the cost of consumption and incline the private

sector toward reducing the share of available output used for captial formation.

But let's ignore this supply-side effect of the tax increase in order to focus on the consequences of eliminating the deficit by raising taxes. Assuming that a neutral tax increase were enacted, gross private saving would fall from $650 billion to $450 billion. The deficit would also decrease by $200 billion, and the budget would be balanced. Gross national saving, then, would be $450 billion, the same as before.

Raising taxes, at best, would be ineffectual in expanding the amount of saving available for capital formation. More realistically, taking account of the virtual certainty that they will disproportionately raise the cost of saving, tax increases would be counterproductive, would actually reduce gross national saving.

In a third case, assume that the government buys $800 billion of the economy's total output, $100 billion more than in the first two cases. Assume also that it collects $800 billion in taxes, again balancing the budget. The fact that the government buys more certainly doesn't itself mean that the economy has more production imputs or uses them more efficiently than when the government buys less. So unless GNP is magically increased, total output is still $3.3 trillion. Now, however, there is only $2.5 trillion of output left for the private sector's use. How that $2.5 trillion will be split up between consumption and saving and investment can't be determined from the fact that the budget is in balance.

If the additional government spending were for goods and services to be made available to the public as substitutes for private consumption, one might reasonably infer that most, if not all, of the cut in output available to the private sector would show up as a reduction in private consumption. On the other hand, if the added taxes were of such a character as to raise the cost of saving and investment relative to consumption, some of the cutback in output available to the private sector would be in the form of reduced capital formation. Column 3 in the table assumes that both of these factors are at work and the cutback is evenly divided between reduced private consumption and reduced capital formation.

The result is that both gross private saving and gross national saving fall to $400 billion, even though the budget is in balance. Private spending is crowded out not by a budget deficit, which is zero in this case, but by the increase in government spending.

Finally, consider a case in which government spending increases to $800 billion but taxes aren't increased. Again assume that half of the increase in government spending substitutes for private consumption, which declines to $2.1 trillion. With taxes remaining at $700 billion, gross private saving is $500 billion; with a deficit of $100 billion, however, gross national saving is $400 billion; so, too, is investment. This is, of course, the same result as when both spending and taxes increase by $100 billion. In other words, with or without a deficit, crowding out has occurred. Comparing this and the prior case (columns 3 and 4 in the table) with the first two cases, it is clear that it isn't the deficit that crowds out private sector activity; it is, instead, the government spending itself that is the culprit.

EVEN MORE PERILOUS

These illustrations, of course, don't tell the whole story. Raising taxes in the foreseeable future is as likely to underwrite additional government outlays as it is to cut the deficit. Even more perilous to the nation's economic health, the additional tax revenues are likely to come from increasing the tax load on business. Whether these additional business levies are selective or general, they will make saving and capital formation more costly. Individual income-tax increases will have the same adverse effect on saving.

If Congress and the administration are truly concerned about crowding out, they should subject all federal spending programs to the most searching examination, looking for ways to reduce the government's grab on output and production resources. If no significant spending cuts were to emerge, we would have to infer that our policy makers believe that the perceived results of the government's outlays are more important than the capital formation that is crowded out. That isn't an unthinkable conclusion, however contrary it may be to the prevailing consensus. Whatever the outcome of that examination, the economy certainly would be better off than if the need for that searching scrutiny is finessed by raising taxes.

HOW RAISING TAXES CAN AFFECT SAVING

[In millions of dollars]

PRIVATE BORROWING AND THE FEDERAL DEFICIT

(By Evan G. Galbraith)

Most discussions on crowding out of private borrowers focus on a comparison between annual net private savings in the U.S. and the projected budgets deficits. These comparisons show U.S. budget deficits approaching the level of net private savings. People then conclude that federal financing will crowd private borrowers out of the capital market—or more accurately, will force medium- and long-term interest rates to rise inordinately, thus thwarting economic recovery. This comparison is based on an important miscalculation.

Instead of net private savings, we should look at gross private savings. Roughly speaking, gross private savings represents our private cash flow—income calculated before non-cash deductions like depreciation. Net private savings refers to income after we deduct depreciation. The cash represented by depreciation is left with the private owners, corporate or individual, who use it either in the capital market or for self-financing. Because self-financing takes pressure off the market, it is as important as contributing cash directly to the market.

According to figures from the third quarter of 1982, capital consumption allowances (the term used for depreciation et al.) reached an annual rate of $360 billion. Net private savings was $189 billion and gross private savings $549 billion. We should use the gross figure of $549 billion rather than the net $189 billion in comparing private savings with the budget deficit.

The widespread use of the net figure results from the mistaken idea that depreciation equals the amount to be spent for wear and tear. If this were true, then we could discount depreciation and start at net. But this isn't the way things work.

First, much of the money spent maintaining a plant is expensed and never makes it to the bottom line, hence, the depreciation money isn't needed. Second, the rate at which depreciation is taken usually exceeds the equipment's useful life. Third, many assets are never replaced.

Thus the old shorthand is erroneous. We must compare the gross amount of cash generated each year with annual need, and this need can be broken down into private investment (for whatever reason, whether replacement or new investment), and the net government deficit. Business capital investment for 1983 is estimated at $315 billion, or $45 billion less than 1982's depreciation. While we obviously want to limit the amount the government takes from the pool, we shouldn't underestimate how much we have, from both foreign and domestic sources.

Using gross private savings to evaluate the effect of federal financing on interest rates doesn't eliminate the upward pressure caused by deficits. There will always be crowding—i.e., competition among borrowers. But if the pool for borrowing is larger, and if some potential borrowers are self-financed, then the upward pressure on interest rates will be less. The large disproportion between gross private savings and the budget deficit may be one reason why we haven't been seeing the effect of crowding out. The market absorbed large private and federal financings in 1982, but interest rates fell.

The large amount of private borrowing abroad in 1982 ($15 billion) also helped relieve our domestic bond market and compensated for a drop in foreign holdings of Treasury obligations. Indeed, the world is our capital market for both federal and private financing.

Another area neglected in estimates of crowding out is federal funds—Fannie Mae, agricultural supports, etc.—that return directly to private borrowers. Other federal funds transferred to individuals make their way back into the capital market without passing through the income accounts, and thus never appear as private savings. This important analysis will have to be done another day, but there is no doubt that the beneficial effect on the capital market is significant. For example, it has been estimated that governments will lend $90 billion to borrowers in 1983.

The total credit demand for 1983, private and government, is estimated to be $515 billion, an amount well below (by at least $100 billion) the total of our cash flow, net foreign inflow and government money returned to the market. Moreover, this annual excess of supply over credit demand is greater than any estimated increase in our budget deficits in coming years.

The evidence suggests that our market can absorb large deficits—provided investors are convinced that inflation will be contained at low levels. This is quite a proviso in the face of our current large deficits. But it can be done because of our low utilization of capacity and because investors realize that both the Reagan administration and the public want to curtail federal spending.

In a few years. deficits should diminish as we enjoy the benefits of a growing economy. Meanwhile, our enormous and fast growing

capital market (including a $900 billion pension fund market growing at the rate of 11 percent a year) will be large enough to provide funds for the private sector and to service the federal debt.●

● Mr. JONES of Oklahoma. Mr. Speaker, some years from now when the clash and confusion of the present have given way to dispassionate analysis, these years of the early 1980's will be judged as the time when we either succeeded or failed in dealing with a national and international economic crisis.

The code name for that effort on the national level will be the budget.

The budget, as a term, has come to mean far more than the congressional resolutions over which many of us have shed so much blood, sweat, and tears.

The public perception of the budget has now been extended to include nearly all congressional and Presidential actions on spending and revenues.

Basically, the budget has come to both symbolize and encompass the essential and increasingly public debate and decision process on national economic policy.

It is one of the fortunate coincidences of history that as the current economic crisis was building, the tool which we need to resolve the crisis also was being refined and strengthened.

We have the means, the process, with which to address our fiscal crisis. It is a process which needs to be improved, but in its present state it is workable and effective.

The problem we face with the budget and with national fiscal policy is not then one of process. It is a problem of finding the political will to deal with serious and substantive issues—military spending, entitlements, and taxes.

We have a level of Government spending upon which there is a general agreement. The congressional budget resolution, for example, calls in 1986 for spending $966.6 billion. The President's budget called for spending $967.5 billion. That is a difference of $900 million in an outlay total of nearly a trillion dollars.

These are, of course, deep difference over priorities and the composition of spending. And while additional savings can and should be made, the overall levels will not change drastically.

On the revenue side, the congressional budget calls for 1986 revenues of $835.8 billion. The administration calls for $835.8 billion. No difference.

So on the surface there is no macroeconomic argument—if the administration would follow in practice what it proposes in principle. Then what is the fight about? It is a battle between an ideologically committed white House with its minority of allies in the House and Senate and a congressional coalition of Democrats and moderate Republicans searching for rational and logical policy.

We in our congressional coalition believe that we must act now to reduce deficits over time. Failure to act will place our economy at grave risk.

If we do not reduce deficits, interest rates will rise; the dollar will stay too strong, withering our export industries; the recovery will fade; and both national economy and the framework of international trade and relations will be placed in extreme hazard. Perhaps the crunch will come in 1984, perhaps not until 1985 or even later. But it will come.

And if we go into another recession, this time starting with a $200 billion deficit, we will quickly have $300 billion recession level deficits. How does one correct that condition? Raise taxes in a recession? Cut spending for the unemployed, the poor and the elderly? Slash defense?

We say that no President and no party should take such risks with the well being of the American people and the world.

We say it is essential to control domestic spending, to increase defense spending at an efficient rate—about 5 percent real growth—and raise revenues to reduce deficits.

The administration has said repeatedly that it will try to block our efforts. The President seems to believe that all is well and contradicts his own policies by acting as if no changes need be made.

The administration for reasons of ideology and partisan election politics now disregards its own budget policies.

The administration continues to demand excessive spending in defense and the President quite clearly seems to believe that unprecedented deficits are better than raising taxes to pay for the actual cost of government.

What happens if the administration ignores its own macroeconomic analysis and maintains the present policies?

The administration's current tax and spending policies will produce $200 billion deficits as far as the eye can see even as the economy recovers. They will be even larger if the recovery fails.

These huge future deficits, unlike this year's deficit, are structural. That is, they are not due to a weak economy, but to a failed budget policy—a gap between spending and revenues produced by adopting the 1981 supply-side tax cut while increasing overall spending. This administration has raised Federal spending to 25 percent of GNP this year—a record in peacetime.

The structural deficit under the administration's current policies will be over $150 billion or an unprecedented 3.5 percent of GNP by 1986—far above the average 1 percent of GNP observed during the 1960's and 1970's when the economy experienced much stronger growth.

And what are the long-term effects of these looming deficits? We are now financing large income tax cuts through government borrowing. This is producing a consumption-oriented economy at the expense of saving, investment, and long-term growth.

Deficits under current policies will absorb a record share of net national savings. In the next few years, the deficit will account for 75 to 85 percent of available net savings.

The result will be a crowding out of private investment in business plant and equipment and housing. The share of GNP available for net private capital formation, after financing the deficits, will average only about 2 percent during the next 3 years, as compared to 7.2 percent in the 1960's and 5.8 in the 1970's.

Expenditures for new plant and equipment in 1982 slumped 5.5 percent in real terms. Real capital spending in 1983 is projected by the Commerce Department to be 2.3 percent lower than the depressed 1982 levels.

Low levels of investment will inevitably produce lower productivity growth, lower living standards, and fewer jobs—exactly the opposite of what a sensible and responsible supply-side policy would produce.

The President keeps saying that the deficits come from uncontrolled domestic spending—not from his defense buildup and tax cuts. The facts, however, show that Reagan's tax policies have drastically eroded the revenue base while his record peacetime defense program has largely offset cuts in domestic spending.

CBO's independent analysis shows that for the 1982–86 period, the President's original Kemp-Roth plan reduced revenues by $633 billion.

Even after a partial restoration of the revenue base by TEFRA, the Reagan tax policies have added $474 billion to the deficit while his defense buildup has contributed $155 billion, more than offsetting $265 billion in nondefense spending cuts. These nondefense cuts have been severe, so severe that neither Republicans nor Democrats were willing to impose further reductions in these areas this year.

Higher interest costs from the tax cut and defense buildup have added $60 billion to the deficit for this period.

The fundamental conflict between uncontrolled future defictis and a long-term anti-inflationary monetary policy has not been resolved.

These massive structural deficits place the Nation's economic policy in a no-win situation:

If the Federal Reserve substantially accommodates the future deficits by expanding the money supply to keep

interest rates from rising, the likelihood of high future inflation increases. Investors are already demanding a deficit risk inflation premium on long-term bonds.

Alternatively, if the Federal Reserve holds to a more restrained policy, public borrowing will collide with growing private credit demands as the economy recovers, producing high real interest rates.

The administration's irresponsible budget policy, which will produce future high interest rates, is keeping current real interest rates at unprecedented levels for an economy in recovery. Long-term rates are now running 7 to 8 percent above underlying inflation, 3 to 4 times higher than in the 1960's and 1970's when the economy experienced much stronger growth.

Interest rates have risen over the summer. Three-month Treasury bills now yield over 9 percent, compared to 8 percent last May. Long-term interest rates—crucial for investment—now stand at over 12½ percent, up from 11½ percent at the beginning of the summer.

At best, the administration's high interest rate policies will result in a low investment, high consumption, low productivity economy, with lower living standards.

We are running the risk, however, that high interest rates will abort the recovery and produce more years of joblessness, rising poverty, and even larger budget deficits—a terrible repeat of the 1981-82 recession.

This is the final riverboat gamble—and surely the most cynical. The first riverboat gamble, as Republican Senator HOWARD BAKER so accurately named it, was that the self-contradictory mix of supply-side tax cuts and doctrinaire monetarism would give us a painless cure for stagflation. It did not. It gave us lower inflation, all right, at the price of terrible recession—as conventional economics said it would.

Now the truly cynical gamble—that the big deficits and huge debt would not matter until after the 1984 elections. The gamble is that the recession has been so long and so deep, and private credit demands so shattered, that $200 billion deficits can be financed without driving up interest rates and aborting the recovery.

The solution is straightforward—carry out and enforce our congressional budget.

But the way is hard. It requires political courage, will, and leadership.

Congress cannot act alone to solve the problem. The President cannot act alone to solve it. We have a divided Government—Republican Senate, Democratic House, and a White House which often ignores both the Senate and the House.

Ultimately, the solution lies in the hands of both Congress and the President. Either can block a solution. Only both working together can provide a solution.

And the unanswerable question today is—what role will the President play? Ideologue or responsible leader.●

● Mr. WILLIAMS of Montana. Mr. Speaker, I rise to join my colleagues, to support action by the Congress to reduce the size of the deficit in the outyears.

Because deficits are already so high, revival of the economy is obviously an effort which must be shared by both public and private institutions. The performance of the economy over the last 3 years suggests that monetary policy is exceedingly potent. We experimented with stepping on the monetary brake and the fiscal accelerator simultaneously, and discovered that the car screeched to a halt—real GNP has not inceased since 1979—presumably, reversing the experiment by lightly stepping on the fiscal brake and the monetary accelerator would help to revive the economy. The lower interest rates that this would permit would have the additional benefits of encouraging investment, lowering debt financing charges and thus the deficit, reducing the debt burdens of less developed countries, and making the value of the dollar and thus our exports more competitive.

While monetary policy is central, fiscal policy will need to play a necessary role over the next year or two. With about one third of existing capacity idle, the recent collapse of business investment will not be easy to reverse, even if interest rates drop. Thus, the recovery will need to be led by government and consumer spending, preferably on a broad range of products, in addition to such interest-sensitive items as housing and automobiles.

An August 1983 CBO report based on the first budget resolution shows that fiscal policy is currently projected to provide $68 billion in new stimulus for the economy between fiscal year 1982 and fiscal year 1983 and only an additional $2 billion between fiscal years 1983 and 1984. This corresponds to a net stimulus of 1.9 percent GNP between fiscal year 1982 and fiscal year 1983 and a contraction of 0.2 percent of GNP between fiscal years 1983 and 1984.

The CBO estimated shortfall between potential and actual GNP will be about $270 billion during 1983 and $200 billion during 1984 in current dollars. With this amount of slack, current deficits can be enlarged without sigificant risk of accelerating inflation or driving up interest rates. Future deficits, on the other hand, are clearly too large. Between fiscal years 1984 and 1986, a contraction of $12 billion is projected under current policies at the same time that the economy is predicted to move closer and closer to full employment. What this pattern suggests is that any new fiscal stimulus; for example, a new jobs program; be triggered to phase out automatically with a reduction in the undemployment rate.

For these reasons, I urge Members of the House to support Representative AUGUSTUS HAWKINS' job creation bill, H.R. 1036, when it comes to the floor next week on September 20.●

● Mr. SCHAEFER. Mr. Speaker, I think it is very appropriate that we are setting aside a special time after we have completed the day's business to talk about the Nation's deficit problem. All votes have been cast, so now it is time to demonstrate how concerned we are about the deficit problem. And given the House legislative record, it appears that this is a rare opportunity for most Members.

Budget deficits are an enormous problem. For 1983, the deficit stands at $210 billion. Given current projected deficits, we could easily, over the next few years, add another trillion dollars to the public debt. This is not a backdrop for continued economic recovery, and reflects continuing encroachment of government into our free market system at a significant cost to private enterprise and individual economic and personal freedom. The Federal Government has been profligate with deficit spending, and, not only is there no plan or program for repaying the borrowed money, but also there are very few signs that Congress has the will to deal with this difficult problem.

The degree of commitment to slowing deficit spending and balancing the budget is not demonstrated at moments like this. We demonstrate our commitment to reducing deficits by casting responsible votes and initiating responsible legislation. When deficits are around $200 billion, it is irresponsible to consistently cast votes for increased Federal expenditures that we just cannot afford.

As a stark example of congressional duplicity on this issue, contrast today's special order on deficits with last month's House vote to increase the funding level of the revenue sharing program. Revenue sharing was established to allow local governments to share the Federal Government's substantial tax base. When the program was initiated, it made more sense, because the Federal deficit was about 10 percent of what it is this year. Understanding that local governments have planned for and count on the revenue sharing program, there may be reason for reauthorization, but how can we rationally increase revenue sharing when the only thing we have to share is a $200 billion deficit?

I appreciate this opportunity to comment on the Federal Government's deficit problem. But my hope is that

from this day Congress will address the problem with legislative initiatives and votes.●

● Mr. BROWN of Colorado. Mr. Speaker, the deficit is a bit like the weather. We all like to talk about it, and yet when it comes time to do something about it we seem unable to act.

We have not been willing to face the unpleasant truth that is before us. The truth is that we cannot continue on the road we have traveled. Ahead lies a disaster, a disaster that we cannot avoid without a change of course. We must face up to our budget problems now and resolve them.

A few of our colleagues dismiss the deficit and dismiss the overwhelming burden that has built up over these past years, because as a percent of the GNP, the increase has not been dramatic.

The real concern is not just the debt that we owe whether a portion of the GNP or not. The significant concern is the cost of carrying that debt and the work that must be performed by every working American to pay the bill for interest each year.

It is almost overwhelming when you realize that every working American in this country next year will be asked to come up with almost $200 to pay the interest on the increase in the national debt just for this last year. That is only the interest on the increase.

The portion of the budget that goes to interest payments on the national debt went from $6.4 billion in 1955 to $33.5 billion in 1975. In those 20 years it increased more than fivefold. In the next 5 years it more than doubled to $75.2 billion. The estimate for 1984 is $148.6 billion, almost double again in 4 years.

The fact is, in 1984, the interest burden will be more than 23 times as large as it was in 1955.

We are familiar with the crowding out that takes place in the marketplace when the Federal Government borrows money to sustain governmental activities. Interest rates, are dramatically higher now because of our failure to face up to those budget problems, but the crowding out does not stop there.

The crowding out I want to draw your attention to is the crowding out that results in the Federal budget; the simple elimination of our ability to fund essential programs, because we have to pay for the debts of the past.

In 1964, interest payments were 9.3 percent of our Federal budget and amounted to $11 billion. By 1974 interest expense had grown to $30 billion and was 11.2 percent of the budget. By 1984, interest will be 17.3 percent of our budget. The cost of carrying our debt is crowding important programs out of the Federal budget.

What is the effect of our continued deficits? Can we ignore them as some would suggest? The cost of carrying those deficits is becoming a crushing burden. There is no question that the continued deficits are going to cause higher interest rates. There is no question that those high interest rates cause higher unemployment.

The programs that we talk about with such enthusiasm to solve the problems of this Nation cannot solve the unemployment problem unless we cope with those interest rates.

If we continue the deficits, it is clear that we will continue the crowding out of our ability to fund essential programs. Whether it is higher interest or higher unemployment, or the crowding out of essential programs, the results of our continuing to ignore the deficit problem are catastrophic.

Many may recall the words of John Maynard Keynes, who when criticized about the long-term ramifications of his suggestions, replied that in the long run we would all be dead. The long run is now. The policies of the 1930's and 1940's combined with the irresponsbility in Congress of the 1960's and 1970's have come home to roost. In the 1980's we have to face that long run impact.

It is a little like the auto mechanic who comes on television every now and then. He says: "Pay me now or pay me later." We are at that point. We can pay the piper now and face our problems with regard to the deficit. By not increasing spending for several years, we can bring this problem under control, or we can pay him later. And pay him we will, because we have no choice.

The problem has grown to such an extent that we have to face it. Our very ability to fund this Government, our very ability to meet our obligations, our very ability to keep the economy moving is endangered by our irresponsibility with regard to this debt burden. It is pay now or pay later. Let us hope the Members of this body who care so deeply about people will understand that those who vote to control spending indeed care about people. Perhaps they care about people far more than those who would avoid the realities.●

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1797

Mr. OBERSTAR. Mr. Speaker, I ask unanimous consent to remove my name as a cosponsor of H.R. 1797 to which it was added by mistake.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

□ 1850

ALTERNATIVE TO H.R. 2350

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alabama (Mr. SHELBY) is recognized for 5 minutes.

● Mr. SHELBY. Madam Speaker, today, I, along with my colleagues, JIM BROYHILL and ED MADIGAN, am placing in the RECORD a broadly supported alternative to H.R. 2350, the reauthorization of our meritorious National Institutes of Health (NIH). Regarding the work of the NIH, the American Medical Association writes:

> The NIH is a unique national resource of which all persons in this country can and should be proud. Investments in fundamental research today make future scientific and medical breakthroughs possible for the benefit of all people in this country and throughout the world. It is therefore especially important to assure the continuation of the NIH's broad discretionary mandate to continue vital basic biomedical research in order to establish a broad base for future applied research in the health area.

The substitute we put before our colleagues today will insure that just such a discretionary mandate is upheld.

The alternative I, Congressmen BROYHILL and MADIGAN will offer is an amendment in the nature of a substitute to H.R. 2350. Our substitute reauthorizes the National Cancer Institute, the National Heart, Lung, and Blood Institute, and the other expiring authorities of the NIH for 3 fiscal years at the same funding levels contained in H.R. 2350, but without the unnecessary specificity of the Waxman bill. These authorizations provide an increase in spending of 15 percent over the fiscal year 1983 funding levels, as well as a 35-percent increase for cancer research. In addition, the substitute creates a new National Institute of Arthritis and Musculoskeletal Disease, and 25 centers dedicated to research in health promotion and disease prevention.

We are compelled to offer this alternative to H.R. 2350, because, in our opinion, while it claims to maintain NIH's ability to decide research priorities, it does not provide any guarantees. In fact, the legislation calls for basic statutory changes in the organization and management of NIH which threaten to dismantle a superbly functioning NIH structure. By proposing detailed statutory authority for each of the 11 existing institutes and the new Arthritis Institute, H.R. 2350 risks supressing valued NIH flexibility to pursue research and to allocate resources to meet long-term research goals. The legislation incorporates 17 new line item authorizations for specific diseases and disease centers, compromising the leadership abilities and scientific acumen of the NIH physi-

cians and clinicians whose work deserves minimal congressional interference.

If we have confidence in the professional and nonpolitically motivated ventures of the able men and women at NIH, then we do a great disservice to them, and ultimately to our constituency, in tying their hands. Our role as legislators should not be to inhibit such a successful venture as NIH through mandating research in specific disease areas, but to enhance its operation by providing the flexibility to allocate resources, as scientific evaluation dictates.

The substitute we offer today allows for that flexibility, and the continued growth and support of high-quality biomedical research, with no political strings attached. I urge my colleagues to take a few moments to study the choices at hand. I encourage their careful consideration of our substitute—one which insures adequate funding of the expiring NIH authorities and the protection of NIH's vital mandate for the prevention and treatment of disease.●

FEDERAL SUPPLEMENTAL UNEMPLOYMENT COMPENSATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. MOLLOHAN) is recognized for 10 minutes.

Mr. MOLLOHAN. Madam Speaker, yesterday I testified before the Ways and Means Subcommittee on Public Assistance and Unemployment Compensation in support of my bill to extend the Federal supplemental unemployment compensation program an additional 6 months beyond its current September 30 expiration date. I urged the committee to report a simple extension of the FSC program to the floor because I think it has the likeliest chance of passing both Chambers of Congress and being signed by the President. As I indicated in the testimony, however, I do not think the present unemployment compensation program goes far enough in meeting the needs of our unemployed, particularly the long-term unemployed, and I am today introducing a second bill to expand the FSC program. The current program offers between 8 and 14 weeks of compensation to those persons who exhaust their regular or extended benefits. Briefly, the bill I am introducing today will expand the system by offering 8 to 14 weeks of additional FSC benefits to those persons who exhaust all current FSC benefits and then go 12 weeks without finding a permanent job.

This would be a substantial expansion of the FSC program, but I do not hesitate to propose it. I know the unemployment situation in my State of West Virginia certainly warrants it. Men and women who have spent most of their working lives in one occupation are being laid off. Forty- and fifty-year-old men and women are being told the only skills they have are no longer needed, not in West Virginia and not anywhere. Young graduates of high schools and colleges in West Virginia are being told there are no jobs available for them in the State; they must leave their home to have even a chance of obtaining work. Let me briefly describe the situation of one of my constituents. Last year he lost his job as a construction worker when the company for which he worked went out of business. He exhausted all unemployment benefits, and in April of this year his home was threatened with foreclosure. We managed to save his home, but he has still not found a permanent job. Let me quote from his most recent letter:

> I am 32 years old, married, and have a 9-month-old daughter. I graduated from local high school in 1970. At the present time I am attending residential electric wiring classes five nights a week through CETA, and working during the day when I can. . . . I did sign a contract with the Wetzel County Board of Education for substitute maintenance work last fall and received a few days work in our local school. I have done painting, poured concrete, tended bar, washed windows, anything available. . . . If you could offer any assistance in my procuring employment, I could certainly use your help and would be most grateful. I have tried particularly hard to get into the school systems, doing maintenance work, driving bus, or anything available.

He enclosed with this letter a list of 27 businesses he had contacted about employment. He said some of them refused to even accept his application.

Madam Speaker, what am I to say to my constituent? There simply are not enough jobs available for the people in my district and my State, because West Virginia's economy rests on the basic smokestack industries—coal, steel, chemicals, and glass—that have been most devastated by this recession. West Virginia and other similarly affected States can and will adapt, but it will take time and it will take the assistance of the Federal Government.

That is why, Madam Speaker, I have introduced this additional unemployment bill which will extend unemployment compensation beyond the current programs. It is desperately needed.

I urge my colleagues to cosponsor my bill.

DEMAND DEPOSIT DEREGULATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

● Mr. ST GERMAIN. Madam Speaker, last month I introduced the Demand Deposit Equity Act of 1983 (H.R. 3535) to authorize all depository institutions to offer interest bearing demand deposits. H.R. 3535 recognizes the financial needs of small businesses and addresses the major remaining deregulation issue involving the liability side of depository institution balance sheets.

As I pointed out when I introduced it, H.R. 3535 is not a new bill. It is virtually identical to legislation I introduced 5 years ago in the 95th Congress and reintroduced in the 96th Congress. When I convened hearings in May 1979, on the need for interest bearing checking accounts, I commented that, "it is amazing that we have waited 46 years to provide this simple equity for the small consumer and the small businessman." In the 5 years since those hearings, deregulation authorized by the Depository Institutions Deregulation and Monetary Control Act of 1980 and the Garn-St Germain Act has resulted in interest paying transaction accounts being available to individuals but not to businesses. For small businesses, this result has been particularly hurtful. They depend heavily on demand deposit accounts to manage their cash and lack the access to money markets that large corporations have to manage their cash positions and earn interest at the same time.

Today, Madam Speaker, at the request of the Depository Institutions Deregulation Committee, I am introducing along with Congressman WYLIE an alternative interest on demand deposits bill. This bill differs from my own in several ways. The difference that concerns me most is a provision in the administration's bill which would impose an interest rate ceiling on accounts of less than $2,500. In my judgment such a limitation is difficult to justify in the present deregulatory environment and could prevent the benefits of interest paying checking accounts from being fully enjoyed by the public and, in particular, by small businesses. Nevertheless, in the interest of full and thorough debate I am introducing the administration's bill for consideration.

Hearings on H.R. 3534 by the Financial Institutions Subcommittee of the House Banking Committee will begin on September 28, 1983, and conclude on October 13 to accommodate the Federal Home Loan Bank Board Chairman's schedule. The testimony of DIDC member agencies, small business and consumer groups, and depository institution representatives will be heard. It is my hope that soon depository institutions will be able to structure interest paying demand deposit accounts that compete effectively in the market and offer those accounts to anyone.●

EXPORT-IMPORT BANK FINANCING NOTIFICATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 5 minutes.

● Mr. NEAL. Madam Speaker, I am notifying the House today of the U.S. Export-Import Bank's proposal to provide credits and guarantees of $225 million to enable Alitalia, the Italian national airline, to purchase 14 McDonnell Douglas DC-9 Super 80 jet aircraft in the United States.

This transaction would be the first phase of Alitalia's plan to purchase 30 jetliners from McDonnell Douglas, 14 this year and 16 in 1984. The total export value of these sales would be more than $788 million, including related spare parts and services.

The Eximbank has made a preliminary commitment to provide up to $516 million of financing to make possible the Alitalia fleet modernization. Alitalia is expected to apply for additional Eximbank credits and guarantees during the first half of 1984.

Over the next 7 years, the health of the American aircraft industry and its subcontractors will depend heavily on exports. During that period, 40 percent of U.S. aircraft sales are expected to be made to foreign airlines.

The Eximbank financing notification was referred to me as chairman of the Banking Committee's Subcommittee on International Trade, Investment and Monetary Policy. Under section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended, the Eximbank is required to notify Congress of any proposed direct credits or financial guarantees, or combinations thereof, of $100 million or more. Unless the Congress determines otherwise, the Eximbank may give final approval to the proposed transaction after 25 days of continuous session of the Congress after the notification.

I am submitting for the RECORD the Eximbank notification, which provides details of the proposed Alitalia financing. I would welcome questions or comments from my colleagues on the proposal.

The Eximbank material follows:

EXPORT-IMPORT BANK
OF THE UNITED STATES.
Washington, D.C., August 17, 1983.

Hon. STEPHEN L. NEAL,
Chairman, Subcommittee on International Trade, Investment and Monetary Policy, Committee on Banking, Finance and Urban Affairs, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Eximbank has submitted a statement to the Speaker of the House of Representatives and the President of the Senate in accordance with the provisions of Section 2(b)(3)(i) of the Export-Import Bank Act of 1945. I am taking the liberty of providing you with a copy of this statement.

Sincerely,

NANCY S. PIGMAN,
Congressional Relations Officer.

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., August 17, 1983.

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES,
The Speaker's Room, U.S. Capitol, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States House of Representatives with respect to the following transaction involving U.S. exports to Italy:

A. DESCRIPTION OF TRANSACTION

1. Purpose: Eximbank is prepared to make available to Alitalia-Linee Aeree Italiane S.p.A. (Alitalia) financing in the form of loans and guarantees of $225,000,000 to facilitate the purchase in the United States by Alitalia of 14 McDonnell Douglas DC-9-Super 80 jet aircraft with related spare engines, spare parts and services. The total U.S. export value of these purchases is estimated to be $358,000,000.

This transaction is the first proposed financing under a Preliminary Commitment issued by Eximbank to Alitalia for financing of Alitalia's purchases of up to 30 DC-9-Super 80 jet aircraft. In the Preliminary Commitment, Eximbank indicated to Alitalia the terms and conditions under which it will be prepared to extend up to $516,000,000 of financing (including the Eximbank financing proposed in this transaction) to Alitalia to assist in the purchase of these jet aircraft and related items to meet that airline's needs for replacement of a portion of its aging fleet with more fuel-efficient, quieter, medium-range aircraft. Including the transaction mentioned above for 14 aircraft, the total U.S. export value of these purchases is estimated to be $787,500,000. It is contemplated by the Preliminary Commitment that Alitalia will apply during the first six months of 1984 for financing of the balance of 16 aircraft with an estimated export value of $429,500,000.

In the Preliminary Commitment, several alternative financial plans were offered involving different percentages of Eximbank direct credits or financial guarantees. In response to these offers, for the first portion of the procurement Alitalia has applied for an Eximbank credit of $75,000,000 and a financial guarantee of $150,000 of loans to be arranged from private sources, based on $358,000,000 of U.S. procurement for the first 14 aircraft.

2. Identity of the Parties: Alitalia, Italy's national flag air carrier, was established in 1948 as a corporation wholly-owned by the Government of Italy through Istituto per la Ricostruzione Industriale (IRI), a Government holding company. Its routes are worldwide, the principal routes being within Europe and to Africa. Eximbank has previously financed numerous aircraft purchases by Alitalia and repayments have been made on a timely basis.

Istituto per la Ricostruzione Industriale (IRI), which will guarantee repayment of the Eximbank financing, is a public financial corporation owned by the Government of Italy and established in 1933 by an act of Parliament. IRI is a Government holding company, the largest of three such entities through which the Italian Government owns, supports and controls a wide range of companies which carry on business in virtually every sector of Italy's economy.

3. Nature and Use of Goods and Services: The principal goods to be exported from the United States and to be used by Alitalia are the 14 McDonnell Douglas DC-9-Super 80 commercial jet aircraft in this first proposed financing, together with the additional 16 commerical jet aircraft contemplated by the Preliminary Commitment. The aircraft will be exported under various schedules during the period 1983-1987.

The airframes will be manufactured by the McDonnell Douglas Corporation of Long Beach, California. The engines and related spares will be manufactured by the Pratt and Whitney Aircraft Division of United Technologies Corporation in Hartford, Connecticut. These two companies will subcontract with numerous U.S. companies for major portions of the airframe and engine manufacture. In addition, other U.S. firms will furnish spare parts.

B. EXPLANATION OF EXIMBANK FINANCING

1. Reasons: The Eximbank financing support of $225,000,000 contemplated in this transaction will facilitiate the export of $358,000,000 of United States goods and services. Sales, profits and employment for U.S. aircraft manufacturers and their subcontractors are heavily dependent upon exports. Through 1990, aircraft purchases by foreign airlines are expected to account for approximately 40% of total U.S. aircraft sales.

There is extensive evidence of efforts by Airbus Industrie to sell A-320 aircraft to Alitalia. Government-supported financing typically is available for Airbus sales, and Airbus has been actively proposing co-production of A-320 aircraft with Italy as an incentive to purchase by Alitalia. Following issuance by Eximbank on October 21, 1982 of its Preliminary Commitment, Alitalia signed a contract with McDonnell Douglas on December 9, 1982 for 30 DC-9-Super 80 aircraft, subject to satisfactory Eximbank financing. The Eximbank financing offered in the Preliminary Commitment appears to have been a significant factor in winning the sale for the U.S. suppliers.

McDonnell Douglas estimates that each DC-9-Super 80 aircraft will require 890,000 manhours of work throughout the United States, allocated as follows: 160,000 for McDonnell Douglas; 179,000 for subcontractors and vendors; 551,000 for non-aerospace industries. Additional benefits which will flow to the United States form the transaction include follow-on sales of up to 16 additional DC-9-Super 80 aircraft and related exports of spare parts, ground support and other auxiliary equipment.

2. The Financing Plan: The financing plan for the U.S. procurement supported by the Eximbank direct credit and financial guarantee of private financing is as follows:

	Amount	Percent of U.S. Costs
Cash payment	$133,000,000	37.2
Eximbank credit	75,000,000	20.9
Financial guarantee	150,000,000	41.9
Total	358,000,000	100.0

a. All or part of the Eximbank credit may be converted, prior to disbursement, to private financing guaranteed by Eximbank.

b. The financial guarantee of Eximbank will be made available for loans from a fi-

nancial institution chosen by Alitalia and acceptable to Eximbank.

c. The interest rate on the Eximbank credit will be 12% per annum, payable semi-annually. A 2% credit application fee will be charged on the authorized amount of the Eximbank credit, and a commitment fee of ½ of 1 percent per annum will be charged on the undisbursed portion of the Eximbank credit.

d. A guarantee commitment fee will be charged on the undisbursed portion of the private financing guaranteed by Eximbank at the rate of ⅛ of 1 percent per annum. A guarantee fee of ½ of 1 percent per annum will be charged on the disbursed and outstanding amount of the private financing guaranteed by Eximbank.

e. Aggregate disbursements of principal under the Eximbank credit and the private financing guaranteed by Eximbank will be repaid in a series of repayment schedules, each of 20 semiannual installments, as set forth in Attachment A hereto. In each schedule, installments will be applied first to private financing guaranteed by Eximbank and last to the Eximbank credit. Amounts disbursed with respect to any aircraft shall be repaid under the schedule set forth in Attachment A for the delivery period during which the related aircraft is delivered.

Attached as Attachment B is additional information on the economy of Italy and Eximbank activity in that country.

Sincerely,

WILLIAM H. DRAPER III.

TRIBUTE TO GEN. EDWARD C. MEYER

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PRICE. Mr. Speaker, I rise to pay tribute to Gen. Edward C. "Shy" Meyer who recently retired as Chief of Staff of the U.S. Army.

Though one of the youngest officers to head the Army, General Meyer brought the full panoply of necessary qualifications to the top soldier's job. After graduating from West Point in 1951 he served with distinction in Korea, and, later, twice in Vietnam. His decorations from those campaigns include 2 Silver and 2 Bronze Stars, the Distinguished Flying Cross, 34 Air Medals, and the Purple Heart.

General Meyer's qualifications equipped him to assess the condition of the Army soon after he became Chief of Staff. This Nation owes him its thanks for his courageous, forthright, and timely warning that the Army was in danger of becoming hollow. As events subsequently proved, Shy Meyer was precisely the right man to cure the ills he diagnosed.

Surely that is General Meyer's greatest distinction. He restored the morale and combat effectiveness of an Army still demoralized from the Vietnam experience and depleted from long years of neglect. The list of his initiatives and accomplishments in placing the Army on the right track includes the following:

Returning Active Army units that were below strength when he became Chief of Staff in 1979 to their full authorization.

Halting the movement toward an all heavy force by introducing more light, maneuverable units. Integration of light and heavy forces has improved overall capabilities.

Improving the quality of the Army across the board. His emphasis on excellence included equipment, training, military doctrine, and the way of life provided for soldiers. General Meyer channeled scarce financial resources to the development and procurement of modern equipment. He increased the quality of personnel recruited into the Army and initiated measures designed to make Army life attractive enough to retain highly motivated, trained, and skilled soldiers.

Championing the "total Army" concept which includes the ongoing effort to increase National Guard and Army Reserve readiness.

Improving the professionalism, training, and education of the noncommissioned officer corps.

Developing and sponsoring the high technology test bed project to provide a mechanism to create and test new doctrine and equipment.

Expanding the use of the national training center which is designed to create a realistic military training environment. The national training center is now the most modern military trainng center in the free world.

Initiating the new regimental system to increase soldier esprit, stability of assignments, and cohesion of units.

Mr. Speaker, a man's worth can be measured by the value of the objectives he pursues. And a man's contributions can be gaged by his success in achieving those objectives. By these criteria Gen. Edward C. Meyer has few peers among the many distinguished officers who have led our Army throughout our history as a nation.

Mr. Speaker, I know I speak for members of the Committee on Armed Services, as well as the entire House of Representatives, in thanking General Meyer for his outstanding service and wishing him good fortune in the coming years.●

SENATOR HENRY M. JACKSON

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PRICE. Mr. Speaker, the death of Senator HENRY M. JACKSON is a source of great personal sorrow to me. SCOOP and I have worked together in the Congress for nearly 40 years. It was truly an honor to be associated with such a great patriot. He was a true statesman. He always had the national interest in mind. At great personal sacrifice he fought long and hard for the welfare and security of every individual and faction in this great Nation of ours. All of us owe a debt of gratitude for what he did in his illustrious career of service to his country.

SCOOP and I worked very closely together on matters of national security. One particular area we both gave special consideration to was the use of nuclear energy for defense and security purposes. SCOOP was one of the strongest supporters of nuclear propulsion for submarines. I firmly believe that we would have been able to attain our position of preiminence in the nuclear submarine field without SCOOP's help. I cannot think of a more appropriate recognition of SCOOP's great help in this area than to name our next nuclear attack submarine in his honor. I have accordingly made such a recommendation to the Secretary of the Navy.

We have all lost a great friend and colleague. In his honor we must dedicate ourselves to following through in carrying out the patriotic goals SCOOP worked so hard for. I consider it a privilege to support and further the ideals and goals this great American worked and fought for.

I would like to take this opportunity to pay a tribute to SCOOP's family. We all feel deeply about the death of our great friend. How great the sorrow must be for Helen and her family who face such a tragedy in the loss of a husband and father who was so dedicated in their behalf. Our hearts go out to you Helen, Anna Maria, and Peter. May God bless you and console you in this period of great sorrow.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CLAY (at the request of Mr. WRIGHT), for September 12 and 13, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BOEHLERT) to revise and extend their remarks and include extraneous material:)

Mr. DANNEMEYER, for 30 minutes, today.

Mr. DANNEMEYER, for 30 minutes, on September 20.

Mr. DANNEMEYER, for 30 minutes, on September 21.

Mr. DANNEMEYER, for 30 minutes, on September 23.

Mr. REGULA, for 60 minutes, today.

Mr. MCCANDLESS, for 60 minutes, on September 20.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. PANETTA, for 60 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. STOKES, for 5 minutes, today.

Mr. SHELBY, for 5 minutes, today.

Mr. CROCKETT, for 5 minutes, today.

Mr. COYNE, for 15 minutes, today.

Mr. MOLLOHAN, for 10 minutes, today.

Mr. ST GERMAIN, for 5 minutes, today.

Mr. GAYDOS, for 20 minutes, on September 15.

Mr. LEVITAS, for 60 minutes, on September 20.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DYSON, during general debate on H.R. 5, in the Committee of the Whole today.

Mr. DAUB, immediately prior to the vote on House Joint Resolution 353.

Mr. EDGAR in two instances.

Mrs. SCHROEDER.

Mr. WILLIAMS of Montana.

ADJOURNMENT

Mr. MOLLOHAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly, (at 6 o'clock and 55 minutes p.m.), the House adjourned until tomorrow, Thursday, September 15, 1983, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1842. A letter from the Acting Secretary of State, transmitting the monthly report covering August 1983, explaining the manner in which the national interest has been served in making payments under loan guarantee or credit assurance agreements extended to Poland in the absence of default, pursuant to section 306 of Public Law 97-257; to the Committee on Appropriations.

1843. A letter from the Comptroller General of the United States, transmitting a report on his review of the one new deferral of budget authority proposed in the message from the President dated August 18, 1983 (H. Doc. No. 98-96), for the Railroad Retirement Board, pursuant to sections 1014 (b) and (c) of Public Law 93-344; to the Committee on Appropriations.

1844. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Navy's proposed sale of certain defense articles to Spain (Transmittal No. 83-51), pursuant to 10 U.S.C. 133b; to the Committee on Armed Services.

1845. A letter from the Acting Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the Army's intention to initiate disposal of chemical munitions at Umatilla Army Depot Activity (UMDA), Oreg., pursuant to section 506(d) of Public Law 91-441; to the Committee on Armed Services.

1846. A letter from the Acting Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the Army's emergency disposal of a suspected chemical agent munition at Dugway Proving Ground, Utah, pursuant to section 506(d) of Public Law 91-441; to the Committee on Armed Services.

1847. A letter from the Acting Assistant Secretary of State (Legislative and Intergovernmental Affairs), transmitting notice of a proposed license for the export of defense articles sold commercially under a contract to Israel (Transmittal No. MC-16-83), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1848. A letter from the Acting Assistant Secretary of State, Legislative and Intergovernmental Affairs, transmitting a report on political contributions by Ambassador-designate Daniel Anthony O'Donohue, and members of his family, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

1849. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Army's intention of offer to sell certain defense articles and services to Saudi Arabia (Transmittal No. 83-58), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1850. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense articles and services to Spain (Transmittal No. 83-51), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1851. A letter from the Auditor of the District of Columbia, transmitting a report entitled, "Revenue Report for July 1983", pursuant to section 455(d) of Public Law 93-198; to the Committee on District of Columbia.

1852. A letter from the Director, Selective Service System, transmitting a report on a matching program to locate absent parents with child support obligations; to the Committee on Government Operations.

1853. A letter from the Deputy Assistant Secretary for Health Operations and Director, Office of Management, Department of Health and Human Services, transmitting the annual report of the Public Health Service Commissioned Corps Retirement System, pursuant to 31 U.S.C. 9503(a)(B); to the Committee on Government Operations.

1854. A letter from the Chairman, Securities and Exchange Commission, transmitting a report of the Commissions activities under the Government in Sunshine Act during the calendar year 1982, pursuant to 5 U.S.C. 522b(j); to the Committee on Government Operations.

1855. A letter from the Chairperson, Navy Resale and Services Support Office, Depart-

ment of the Navy, transmitting the annual report for the Office Retirement Trust for 1982, pursuant to 31 U.S.C. 9503(a)(B); to the Committee on Government Operations.

1856. A letter from the Comptroller General of the United States, transmitting his report and recommendation of the meritorious claims of an employee of the Department of Energy, pursuant to 31 U.S.C. 3702(c); to the Committee on the Judiciary.

1857. A letter from the Acting Administrator, General Services Adminstration, transmitting a draft of proposed legislation for the relief of Kenneth L. Perrin; to the Committee on the Judiciary.

1858. A letter from the Commissioner, Immigration and Naturalization Service, transmitting notice of 603 waivers granted to refugees for the first half of fiscal year 1983, pursuant to section 207(c)(3) of the Immigration and Nationality Act, as amended; to the Committee on the Judiciary.

1859. A letter from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to provide by statue for two Assistant Secretaries in the Department of the Treasury; to the Committee on Post Office and Civil Service.

1860. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a report on the Kern River, Calif., which is in response to a resolution adopted by the Committee on Public Works and Transportation; to the Committee on Public Works and Transportation.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LONG of Louisiana: Committee on Rules. House Resolution 309. Resolution providing for the consideration of H.R. 1010, a bill to amend the Mineral Leasing Act of 1920 with respect to the movement of coal, including the movement of coal over public lands, and for other purposes (Rept. No. 98-353). Referred to the House Calendar.

Mr. JONES of Oklahoma: Committee on the Budget. Report pursuant to section 2 of House Concurrent Resolution 91 (Rept. No. 98-354). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DELLUMS:

H.R. 3884. A bill to establish a U.S. Health Service to provide high-quality health care and to overcome the deficiencies in the present system of health-care delivery; jointly, to the Committees on Energy and Commerce; Armed Services; Banking, Finance and Urban Affairs; the District of Columbia; Education and Labor; the Judiciary; Post Office and Civil Service; Veterans' Affairs; and Ways and Means.

By Mr. AuCOIN:

H.R. 3885. A bill to provide for the restoration of Federal recognition to the Confederated Tribes of the Grand Ronde Community of Oregon, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. COYNE:

H.R. 3886. A bill to make certain changes in the trigger provisions of the Federal-State Extended Unemployment Compensation Act of 1970, and for other purposes; to the Committee on Ways and Means.

H.R. 3887. A bill to extend the Federal Supplemental Compensation Act of 1982 for 6 months and to increase the number of weeks for which compensation is payable under such act; to the Committee on Ways and Means.

By Mr. MICA:

H.R. 3888. A bill to amend title 28, United States Code, to provide for three additional district judges for the Southern District of Florida; to the Committee on the Judiciary.

By Mr. MOLLOHAN:

H.R. 3889. A bill to extend the Federal Supplemental Compensation Act of 1982 for 6 months and to provide additional weeks of benefits to certain individuals who have exhausted their benefits under such act; to the Committee on Ways and Means.

By Mr. PAUL:

H.R. 3890. A bill to limit U.S. contributions to the United Nations; to the Committee on Foreign Affairs.

H.R. 3891. A bill to terminate all participation by the United States in the United Nations, and to remove all privileges, exemptions, and immunities of the United Nations; to the Committee on Foreign Affairs.

H.R. 3892. A bill to repeal the Gun Control Act of 1968; to the Committee on the Judiciary.

By Mr. QUILLEN:

H.R. 3893. A bill to amend title II of the Social Security Act to eliminate benefit disparities by increasing primary insurance amounts, in cases where the benefits involved are computed under the present formula (enacted in 1977), to the extent necessary to assure that such benefits are no less than they would have been if computed under the pre-1977 formula; to the Committee on Ways and Means.

By Mr. RODINO (by request):

H.R. 3894. A bill to implement the Inter-American Convention on International Commercial Arbitration; to the Committee on the Judiciary.

By Mr. ST GERMAIN (for himself and Mr. WYLIE) (by request):

H.R. 3895. A bill to permit the payment of interest on demand deposits held by depository institutons; to the Committee on Banking, Finance and Urban Affairs.

By Mr. TORRICELLI:

H.R. 3896. A bill to amend the National Housing Act to establish procedures for approval of rental increases in certain multifamily housing insured under such act; to the Committee on Banking, Finance and Urban Affairs.

H.R. 3897. A bill to provide for the repatriation of the remains of five unknown members of the U.S. Navy killed and interred in Tripoli in 1804 and for the interment of such remains at the U.S. Naval Academy or the Arlington National Cemetery; jointly, to the Committees on Armed Services and Veterans' Affairs.

By Mr. BOSCO (for himself, Mr. WEAVER, and Mr. SWIFT):

H. Con. Res. 164. Concurrent resolution to obtain disaster relief for salmon fishermen; to the Committee on Small Business.

By Mrs. BOXER (for herself, Mr. LELAND, Mr. TORRICELLI, Mr. EVANS of Illinois, Mr. ECKART, Mr. WAXMAN, Mr. OWENS, Mr. DURBIN, Mr. BRYANT, Mr. GEJDENSON, Mr. GRAY, Mr. FEIGHAN, Mr. FAZIO, Mr. WOLPE, Mr. BEILENSON, Mr. FRANK, Mr. WEISS, Mr. TOWNS, Mr. FAUNTROY, Mr. MITCHELL, Mr. MARKEY, Mr. LEVINE of California, Mr. MATSUI, Mr. BERMAN, Mrs. BURTON of California, Mr. STARK, Mr. BONIOR of Michigan, Mr. EDGAR, Mr. SHANNON, Mrs. KENNELLY, Mrs. HALL of Indiana, Mrs. SCHROEDER, Mr. STUDDS, Mr. MARTINEZ, Mr. MILLER of California, Mr. BROWN of California, Mr. EDWARDS of California, Mr. MOODY, Mr. PATTERSON, Mr. TORRES, Mr. ACKERMAN, Mr. RODINO, Mr. FOGLIETTA, Mr. GARCIA, Mr. BEDELL, Mr. HOYER, Mr. WALGREN, Mr. WEAVER, Mr. MORRISON of Connecticut, Mr. DYMALLY, Mr. LANTOS, Mr. MINETA, Mr. YOUNG of Missouri, Mr. CONYERS, Mr. OBERSTAR, and Mr. DELLUMS):

H. Con. Res. 165. Concurrent resolution calling for an impartial international tribunal to investigate the Aquino assassination and calling for democracy in the Philippines; to the Committee on Foreign Affairs.

By Mr. MITCHELL:

H. Con. Res. 166. Concurrent resolution calling for an impartial international tribunal to investigate the Aquino assassination and calling for democracy in the Philippines; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII,

258. The SPEAKER presented a memorial of the Legislature of the State of California, relative to trucking; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. MYERS:

H.R. 3898. A bill for the relief of Elvis J. Stahr, Jr.; to the Committee on the Judiciary.

By Mr. SEIBERLING:

H.R. 3899. A bill for the relief of Elvis J. Stahr, Jr.; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 58: Mrs. BOGGS, Mr. CLINGER, Mr. FASCELL, Mr. RICHARDSON, and Mr. WOLPE.

H.R. 137: Mr. DREIER of California.

H.R. 354: Mr. CHAPPELL.

H.R. 417: Mr. TOWNS and Mr. STOKES.

H.R. 516: Mr. KINDNESS and Mr. RUDD.

H.R. 521: Mr. KASICH.

H.R. 765: Mr. SHAW, Mr. DREIER of California, Mr. HARTNETT, and Mr. PETRI.

H.R. 943: Mr. WEISS.

H.R. 1077: Mr. MRAZEK.

H.R. 1092: Mr. BATEMAN.

H.R. 1225: Mr. HARTNETT.

H.R. 1415: Mr. SKEEN, Mr. ROWLAND, Mr. HALL of Ohio, Mr. THOMAS of California, Mr. GONZALEZ, Mr. BEREUTER, Mr. NATCHER, Mr. WILLIAMS of Ohio, Mr. HILLIS, Mr. PENNY, Mr. HARKIN, Mr. LEACH of Iowa, Mr. OBER-

STAR, Mrs. LLOYD, Mr. GORE, Mr. DASCHLE, and Mr. COOPER.

H.R. 1579: Mr. MADIGAN, Mr. ANNUNZIO, Mr. O'BRIEN, Mr. PHILIP M. CRANE, Mr. SIMON, Mr. DURBIN, Mr. LIPINSKI, Mr. HYDE, Mr. YATES, and Mr. DANIEL B. CRANE.

H.R. 1617: Mrs. KENNELLY, Mr. ST GERMAIN, Mr. WOLPE, Mr. GEJDENSON, and Mr. TORRICELLI.

H.R. 1644: Mr. MORRISON of Connecticut.

H.R. 1668: Mr. MARKEY and Mrs. SMITH of Nebraska.

H.R. 1701: Mr. BATEMAN, Mr. EMERSON, Mr. MCEWEN, and Mr. LUNGREN.

H.R. 1727: Mr. MITCHELL, Mr. STARK, Mr. MORRISON of Connecticut, and Mr. MCNULTY.

H.R. 1743: Mrs. BURTON of California, Mr. BOLAND, Mr. EARLY, Mr. CONTE, Mr. SHANNON, Mr. MARKEY, Mr. SCHUMER, and Mrs. HALL of Indiana.

H.R. 1880: Mr. BORSKI and Mr. DELLUMS.

H.R. 1903: Mr. WEAVER, Mr. BATES, and Mr. HALL of Ohio.

H.R. 1914: Mr. MOLLOHAN, Mr. DYMALLY, and Mr. WEAVER.

H.R. 2036: Mrs. COLLINS, Mr. TORRICELLI, and Mr. OWENS.

H.R. 2053: Mr. DOWDY of Mississippi, Mr. LELAND, Ms. SNOWE, and Mr. WILLIAMS of Montana.

H.R. 2138: Mr. RUDD.

H.R. 2225: Mr. ALBOSTA.

H.R. 2282: Mr. MCCOLLUM, Mr. ACKERMAN, Mr. NEAL, Mr. GREGG, Mr. SUNIA, Mr. HAMMERSCHMIDT, Mr. TOWNS, Mr. YATES, Mr. LOWRY of Washington, Ms. KAPTUR, Mr. CHANDLER, Mr. WIRTH, Mr. HORTON, and Mr. RATCHFORD.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 1797: Mr. OBERSTAR.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1010

By Mr. BEDELL:

(Amendment to the amendment in the nature of a substitute (text of H.R. 3857).)

—In section 3 of the amendment in the nature of a substitute—

(1) strike out "and" at the end of paragraph (6);

(2) strike out the period at the end of paragraph (7) and insert in lieu thereof "; and"; and

(3) insert after paragraph (7) the following:

"(8) no State shall sell or otherwise transfer or permit the sale or transfer, for use in a coal pipeline outside of such State, water which is taken from any river or other body of surface water which is located in or which passes through more than one State or from any aquifer or other body of ground water which underlies more than one State unless there is in effect an interstate compact (A) among the States in the drainage basin of such river or other body of surface water, or (B) among the States under which such aquifer or other body of ground water lies, which governs such sale or transfer.".

By Mr. MOLINARI:

(Amendment to the amendment in the Nature of a substitute (text of H.R. 3857).)

—Page 28, after line 17, insert the following:

"(1) Any person issued a certificate under this section shall have to provide the same assistance with respect to rights-of-way acquired by exercise of the power of eminent domain under section 9 of this Act, as a Federal agency provides with respect to acquisitions of real property under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.".

By Mr. MATSUI:

Amendments to the amendment in the nature of a substitute (text of H.R. 3857).

—Page 28, after line 17, insert the following:

"(1) Notwithstanding subsection (h) of this section, the Commission shall not issue a certificate under this section unless the Commission determines, in writing, that the coal pipeline or extension thereof will not disrupt the coal industry in regions of the United States other than the region in which such pipeline will originate.".

—Page 28, after line 17, insert the following:

"(1) Notwithstanding subsection (h) of this section, if the Commission finds that issuance of any certificate under this section will result in diversion of revenue or traffic from an existing carrier, the Commission shall not issue the certificate.".

—Page 28, after line 17, insert the following:

"(1) With respect to each certificate issued under this section, the Commission shall require compliance with terms and conditions which will—

"(1) minimize damage to scenic and esthetic values and fish and wildlife habitat and otherwise protect the environment;

"(2) require compliance with applicable air and water quality standards established by or pursuant to applicable Federal or State law;

"(3) require compliance with regulations issued by the Secretary of Transportation under section 15 of this Act; and

"(4) require compliance with State standards for public health and safety, environmental protection, and siting, construction, operation, and maintenance of coal pipelines if such standards are consistent with or more stringent than applicable Federal standards.".

—At the end of section 10 of the amendment in the nature of a substitute, insert the following:

(1) No certificate may be issued to, or held by, any person under this section who controls, is controlled by, or is under common control with, any person who—

(1) uses or will use coal transported by the coal pipeline constructed or proposed to be constructed pursuant to such certificate, or

(2) supplies or will supply coal to such pipeline.

For purposes of this subsection, the term "control" has the meaning such term has under section 10102 of title 49, United States Code; except that any person who owns 5 percent or more of the voting stock of another person shall be deemed to control, to be controlled by, or to be under common control with, such other person unless such person demonstrates to the Commission by clear and convincing evidence, in a hearing on the record, that such person does not control, is not controlled by, or is not under common control with, such other person.".

—At the end of section 10 of the amendment in the nature of a substitute, insert the following:

(1) No certificate may be issued to or held by any person under this section who controls, is controlled by, or is under common control with, any person who—

(1) uses or will use coal transported by the coal pipeline constructed or proposed to be constructed pursuant to such certificate, or

(2) supplies or will supply coal to such pipeline.

In addition to the meaning given the term "control" by section 10102(7) of this subtitle, any person who owns 5 percent of the voting stock of another person shall be deemed to control such other person for purposes of this subsection.

—Page 48, after line 19, insert the following:

ABANDONMENT

SEC. 19. (a) A person holding a certificate issued under section 10 of this Act may—

(1) abandon any part of its coal pipeline; or

(2) discontinue the operation of all coal pipeline transportation over any part of its coal pipeline:

only if the Commission finds (A) that the present or future public convenience and necessity require or permit the abandonment or discontinuance, or (B) that water used for transporting the coal has been reduced by circumstances beyond the control of such person to an amount insufficient to continue the transportation of coal, or (C) that the available supply of coal is depleted to the extent that continued service is unwarranted.

(b)(1) A proceeding to permit abandonment or discontinuance under subsection (a) of this section begins on application filed with the Commission. If the Commission—

(A) finds that public convenience and necessity require or permit abandonment or discontinuance, it shall—

(i) approve the application as filed; or

(ii) approve the application with modifications and require compliance with conditions that the Commission finds are required by public convenience and necessity; or

(B) fails to find that public convenience and necessity require or permit abandonment or discontinuance, it shall deny the application.

(2) On approval, the Commission shall issue to the person holding a certificate issued under section 10 a certificate describing the abandonment or discontinuance approved by the Commission.

(c) The abandonment or discontinuance approved by the Commission shall take effect on the 60th day after the date of issuance of the certificate under this section.

EMPLOYEE PROTECTIVE ARRANGEMENTS IN COAL PIPELINE CARRIER ABANDONMENTS

SEC. 20. When a pipeline carrier providing transportation of coal under a certificate issued under section 10 of this Act is involved in a transaction for which approval is sought under section 19 of this Act, the Commission shall require the carrier to provide a fair arrangement which is at least as protective of the interests of employees who are affected by the transaction as the terms imposed under section 11347 of title 49, United States Code, before February 5, 1976, and the terms established under section 405 of the Rail Passenger Service Act (45 U.S.C. 565). Nothwithstanding subtitle IV of title 49, United States Code, the arrangement may be made by the pipeline carrier and the authorized representative of its employees. The arrangement and the order approving the transaction must require that the employees of the affected pipeline carrier will not be in a worse position relative to their employment as a result of the transaction during the 4 years following the effective date of the final action of the Commission (or, if an employee was employed for a lesser period of time by the carrier before the action became effective for that lesser period).

At the end of the table of contents on page 2 before line 1, insert the following new items:

Sec. 19. Abandonment.
Sec. 20. Employee protective arrangements in coal pipeline carrier abandonments.

By Mrs. SCHROEDER:

(Amendment to the amendment in the nature of a substitute (text of H.R. 3857).)

—In subsection (c) of section 5 of the amendment in the nature of a substitute, strike out the comma at the end of paragraph (2) and all that follows through the period at the end of such subsection and insert in lieu thereof a period.

In subsection (e) of section 9 of the amendment in the nature of a substitute, strike out "unless there is" and all that follows through the period at the end thereof and insert in lieu thereof a period.

—In section 9(a)(1) of the amendment in the nature of a substitute, strike out "private lands" and insert in lieu thereof "those lands owned by any common carrier engaged in the interstate transportation of coal which are needed for such transportation and are".

—At the end of section 10 of the amendment in the nature of a substitute, insert the following:

(l) The Commission shall not issue a certificate under this section unless the Commission determines, in writing, that the coal pipeline or extension thereof will not have a substantially detrimental effect on the environment.

—At the end of section 10 of the amendment in the nature of a substitute, insert the following:

(l) A certificate issued under this section is contingent upon approval by local, State, and Federal authorities of wastewater treatment and disposal facilities at coal pipeline terminals.

By Mr. SHUSTER:

(Amendment to the amendment in the nature of a substitute (text of H.R. 3857).

—Page 28, after line 17, insert the following new subsection:

(l) Any certificate issued by the Commission shall establish a maximum allowable cost for the construction of the coal pipeline or extension. For purposes of the preceding sentence, maximum allowable cost shall be exclusive of any cost increase that results from subsequent inflation or an unanticipated grave, natural disaster or other natural phenomenon of an exceptional, inevitable, and unavoidable character. The Commission, in cooperation with the Federal Energy Regulatory Commission, shall establish the maximum allowable cost for each pipeline by considering, at a minimum, the reasonableness of the design of the pipeline and of the construction cost projections for the pipeline.

Page 39, line 21, strike out "or".

Page 39, line 25, strike out the period and insert in lieu thereof "; or".

Page 39, after line 25, insert the following new paragraph:

"(5) in the case of a pipeline with respect to which a certificate is issued under such section, if the contract will allow recovery of any portion of the cost of the construction of such pipeline in excess of (A) the maximum allowable cost established for such construction under subsection (1) of such section, plus (B)(i) any cost increase that results from subsequent inflation, and (ii) any cost increase that results from an unanticipated grave, natural disaster, or other natural phenomenon of an exceptional, inevitable, and unavoidable character."

Page 42, after line 17, insert the following:

"§ 10956. Maximum allowable cost

"Notwithstanding any provision of chapter 107 of this title, no rate for the transportation of coal by a coal pipeline or extension thereof for which a certificate is issued under section 10 of the Coal Pipeline Act of 1983 shall provide for recovery of any portion of the cost of the construction of such coal pipeline or extension thereof in excess of (1) the maximum allowable cost established for such construction under section (1) of such section, plus (2)(A) any cost increase that results from subsequent inflation, and (B) any cost increase that results from an unanticipated grave, natural disaster, or other natural phenomenon of an exceptional, inevitable, and unavoidable character.

Page 42, line 18, strike out "§ 10956" and insert in lieu thereof "§ 10957".

Page 43, in the matter following line 14, strike out

"10956. Definitions."

and insert in lieu thereof

"10956. Maximum allowable cost.
"10957. Definitions.".

By Mr. SNYDER:

(Amendment to the amendment in the nature of a substitute (text of H.R. 3857).)

—Page 32, strike out line 1 and all that follows through line 4 on page 44 and insert in lieu thereof the following:

COMMON CARRIER OBLIGATION

SEC. 14. Transportation of coal by coal pipeline for which a certificate is issued under section 10 of this Act shall be subject to the jurisdiction of the Commission under subchapter I of chapter 105 of subtitle IV of title 49, United States Code, as a pipeline carrier and the coal pipeline shall be constructed, operated, maintained, and extended as a common carrier, in fact, fully subject to rate and charge regulation by the Commission under such subtitle.

In the table of contents on page 2 before line 1, strike out

"Sec. 14. Amendment to Interstate Commerce Act."

and insert in lieu thereof

"Sec. 14. Common carrier obligation.".

Page 25, line 19, strike out "and indicate" and all that follows through the period on line 22 and insert in lieu thereof a period.

Page 27, strike out line 14 and all that follows through line 9 on page 28.

Page 28, line 10, strike out "(k)" and insert in lieu thereof "(j)".

Page 28, line 16, strike out "and" and all that follows through the period on line 17 and insert in lieu thereof a period.

—Page 32, strike out line 1 and all that follows through line 4 on page 44 and insert in lieu thereof the following:

COMMON CARRIER OBLIGATION

SEC. 14. Transportation of coal by coal pipeline for which a certificate is issued under section 10 of this Act shall be subject to the jurisdiction of the Commission under subchapter I of chapter 105 of subtitle IV of title 49, United States Code, as a pipeline carrier and the coal pipeline shall be constructed, operated, maintained, and extended as a common carrier, in fact, fully subject to rate and charge regulation by the Commission under such subtitle.

"Sec. 14. Amendment to Interstate Commerce Act."

and insert in lieu thereof

"Sec. 14. Common carrier obligation.".

Page 19, strike out lines 13 through 23.

Page 19, line 24, strike out "(6)" and insert in lieu thereof "(5)".

Page 25, line 19, strike out "and indicate" and all that follows through the period on line 22 and insert in lieu thereof a period.

Page 27, strike out line 14 and all that follows through line 17 on page 28.

H.R. 2350,

By Mr. SHELBY:

—Strike out all after the enacting clause and insert in lieu thereof the following:

SHORT TITLE AND REFERENCES IN ACT

SECTION 1. (a) This Act may be cited as the "Health Research Amendments of 1983".

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be to a section or other provision of the Public Health Service Act.

CANCER APPROPRIATION AUTHORIZATIONS

SEC. 2. (a) Section 410(a) (42 U.S.C. 286e(a)) is amended—

(1) by striking out "and" after "1981;", and

(2) by inserting "; $1,258,000,000 for the fiscal year ending September 30, 1984; $1,326,000,000 for the fiscal year ending September 30, 1985; and $1,420,000,000 for the fiscal year ending September 30, 1986" before the period.

(b) Section 410(b) (42 U.S.C. 286e(b)) is amended—

(1) by striking out "and" after "1981;", and

(2) by inserting "; $64,000,000 for the fiscal year ending September 30, 1984; $74,000,000 for the fiscal year ending September 30, 1995; and $84,000,000 for the fiscal year ending September 30, 1986" before the period.

APPROPRIATION AUTHORIZATIONS FOR CARDIOVASCULAR, LUNG, AND BLOOD ACTIVITIES

SEC. 3. (a) Section 414(b) (42 U.S.C. 287c(b)) is amended—

(1) by striking out "and" after "1981,", and

(2) by inserting ", $54,000,000 for the fiscal year ending September 30, 1984, $62,000,000 for the fiscal year ending September 30, 1985, and $71,000,000 for the fiscal year ending September 30, 1986" before the period.

(b) The first sentence of section 419B (42 U.S.C. 2871) is amended—

(1) by striking out "and" after "1981,", and

(2) by inserting ", $659,000,000 for the fiscal year ending September 30, 1984, $756,000,000 for the fiscal year ending September 30, 1985, and $865,000,000 for the fiscal year ending September 30, 1986" before the period.

APPROPRIATION AUTHORIZATIONS FOR ASSISTANCE TO MEDICAL LIBRARIES

SEC. 4. Section 390(c) (42 U.S.C. 280b(c)) is amended—

(1) by striking out "and" after "1981,", and

(2) by inserting ", $10,000,000 for the fiscal year ending September 30, 1984, $11,000,000 for the fiscal year ending September 30, 1985, and $12,000,000 for the fiscal year ending September 30, 1986" before the period.

APPROPRIATION AUTHORIZATIONS FOR NATIONAL RESEARCH SERVICE AWARDS

SEC. 5. The first sentence of section 472(d) (42 U.S.C. 2891-1(d)) is amended—

(1) by striking out "and" after "1981,", and

(2) by inserting ", $191,000,000 for the fiscal year ending September 30, 1984, $220,000,000 for the fiscal year ending September 30, 1985, and $251,000,000 for the fiscal year ending September 30, 1986" before the period.

APPROPRIATIONS AUTHORIZATIONS FOR DIABETES DATA SYSTEM

SEC. 6. Section 435(c)(2) (42 U.S.C. 289c-2(c)(2)) is amended—

(1) by striking out "and" after "1981,", and

(2) by inserting "; $1,000,000 for the fiscal year ending September 30, 1984, $1,100,000 for the fiscal year ending September 30, 1985, and $1,200,000 for the fiscal year ending September 30, 1986" before the period.

APPROPRIATION AUTHORIZATIONS FOR DIABETES RESEARCH AND TRAINING CENTERS

SEC. 7. Section 435(d) (42 U.S.C. 289c-2(d)) is amended—

(1) by striking out "and" after "1982,", and

(2) by inserting ", $16,000,000 for the fiscal year ending September 30, 1984, $18,000,000 for the fiscal year ending September 30, 1985, and $20,000,000 for the fiscal year ending September 30, 1986" before the period.

APPROPRIATION AUTHORIZATIONS FOR DIABETES AND DIGESTIVE DISEASES ADVISORY BOARDS

SEC. 8. (a) Section 437(k) (42 U.S.C. 289c-4(k)) is amended—

(1) by striking out "and" after "1982,", and

(2) by inserting "; $400,000 for the fiscal year ending September 30, 1984; $400,000 for the fiscal year ending September 30, 1985; and $400,000 for the fiscal year ending September 30, 1986" before the period.

(b) Section 437(l) (42 U.S.C. 289c-4(l)) is amended by striking out "1983" and inserting in lieu thereof "1988".

NATIONAL INSTITUTE OF ARTHRITIS AND MUSCULOSKELETAL DISEASES

SEC. 9. (a) Title IV of the Public Health Service Act is amended by adding at the end the following:

"PART J—NATIONAL INSTITUTE OF ARTHRITIS AND MUSCULOSKELETAL DISEASES

"PURPOSES OF THE INSTITUTE

"SEC. 481. (a) The general purpose of the National Institute of Arthritis and Musculoskeletal Diseases (hereinafter in this subpart referred to as the 'Institute') is the conduct and support of research, training, health information, and related programs with respect to arthritis and musculoskeletal diseases, including sports-related disorders, and skin diseases.

"(b) The Director of the Institute, with the advice of its advisory council, shall develop a plan for a national arthritis and musculoskeletal program to expand, intensify, and coordinate the activities of the Institute respecting the diseases, and shall carry out the program in accordance with such plan. The program shall be coordinated with the other national research institutes of the National Institutes of Health to the extent that they have responsibilities respecting such diseases and shall, at least, provide for—

"(1) investigation into the epidemiology, etiology, and prevention of all forms of arthritis and musculoskeletal diseases, including sports-related disorders, primarily through support of basic research and such areas as immunology, genetics, biochemistry, microbiology, physiology, bioengineering, and any other scientific discipline which can contribute important knowledge to the treatment and understanding of these diseases;

"(2) research into the development, trial, and evaluation of techniques, drugs, and devices used in the diagnosis, treatment, and prevention of arthritis and musculoskeletal diseases and medical rehabilitation of individuals with such diseases and disabilities;

"(3) research on the refinement, development, and evaluation of technological devices that will replace or be a substitute for damaged bone, muscle, and joints and other supporting structures; and

"(4) establish mechanisms to monitor the causes of athletic injuries and identify ways of preventing such injuries on scholastic athletic fields.

"(c) The Director of the Institute shall—

"(1) carry out programs of support for research and training (other than training for which National Research Service Awards may be made under section 479) in the diagnosis, prevention, and treatment (including medical rehabilitation) or arthritis, musculoskeletal diseases, and skin diseases, including support for training in medical schools, graduate clinical training, graduate training in epidemiology, epidemiology studies, clinical trials, and interdisciplinary research programs; and

"(2) establish programs of evaluation, planning, and dissemination of knowledge related to such research and training.

"INFORMATION CLEARINGHOUSE AND DATA SYSTEM

"SEC. 482. (a) The Director shall (1) establish the National Arthritis and Musculoskeletal Diseases Date System for the collection, storage, analysis, retrieval, and dissemination of data derived from patient populations with arthritis and musculoskeletal diseases, including, where possible, data involving general populations for the purpose of detection of individuals with a risk of developing such diseases, and (2) establish the National Arthritis and Musculoskeletal Diseases Information Clearinghouse to facilitate and enhance knowledge and understanding of arthritis and musculoskeletal diseases on the part of health professionals, patients, and the public through the effective dissemination of information on such diseases.

"(b) For the clearinghouse and data system authorized by subsection (a) there are authorized to be appropriated $1,000,000 for the fiscal year ending September 30, 1984, $1,100,000 for the fiscal year ending September 30, 1985, and $1,200,000 for the fiscal year ending September 30, 1986.

"INTERAGENCY COORDINATING COMMITTEES

"SEC. 483. (a) For the purpose of—

"(1) better coordination of the research activities of all the national research institutes relating to arthritis, skin diseases, and musculoskeletal diseases, including sports-related disorders; and

"(2) coordinating those aspects of all Federal health programs and activities relating to such diseases to assure the adequacy and technical soundness of such programs and activities and to provide for the full communication and exchange of information necessary to maintain adequate coordination of such programs and activities;

the Secretary shall establish an Arthritis and Musculoskeletal Diseases Interagency Coordinating Committee and a Skin Disease Interagency Coordinating Committee (hereinafter in this section individually referred to as a 'Committee').

"(b) Each Committee shall be composed of the Director (or his designee) of the Institute and its divisions involved in research involving arthritis and musculoskeletal diseases or skin diseases, as may be appropriate, the chief medical director (or the director's designee) of the Veterans' Administration, and a medical officer designated by the Department of Defense, and shall include representation from all other Federal departments and agencies whose programs involve health functions or responsibilities relevant to arthritis and musculoskeletal diseases, as determined by the Secretary. Each Committee shall be chaired by the Director of NIH (or his designee). Each Committee shall meet at the call of the chairman, but not less often than four times a year.

"(c) Each Committee shall prepare an annual report for—

"(1) the Secretary, and

"(2) the Director of NIH,

detailing the work of the Committee in the fiscal year for which the report was prepared in carrying out the coordinating activities described in paragraphs (1) and (2) of subsection (a). Such report shall be submitted not later than the one hundred and twentieth day after the end of each fiscal year.

"ARTHRITIS AND MUSCULOSKELETAL DISEASES DEMONSTRATION PROJECTS

"SEC. 484. (a) The Secretary may make grants to public and other nonprofit entities to establish and support projects for the development and demonstration of methods for arthritis and musculoskeletal diseases screening and detection and for referral for treatment and medical rehabilitation, and for dissemination of information on these methods to the health and allied health professions. Activities under such projects shall be coordinated with (1) Federal, State, local, and regional health agencies, (2) centers assisted under section 485, and (3) the data system established under subsection (c).

"(b) Projects under this section shall include—

"(1) programs which emphasize the development and demonstration of new and improved methods of screening and early detection, referral for treatment, and diagnosis of individuals with a risk of developing arthritis and musculoskeletal diseases;

"(2) programs which emphasize the development and demonstration of new and improved methods for patient referral from local hospitals and physicians to appropriate centers for early diagnosis and treatment;

"(3) programs which emphasize the development and demonstration of new and improved means of standardizing patient data and recordkeeping;

"(4) programs which emphasize the development and demonstration of new and improved methods of dissemination of knowledge about the projects and methods referred to in the preceding paragraphs of this subsection to health and allied health professionals;

"(5) programs which emphasize the development and demonstration of new and improved methods for the dissemination to the general public of information—

"(A) on the importance of early detection of arthritis and musculoskeletal diseases, of seeking prompt treatment, and of following an appropriate regiment; and

"(B) to discourage the promotion and use of unapproved and ineffective diagnostic, preventive treatment, and control methods for arthritis and unapproved and ineffective drugs and devices for arthritis and musculoskeletal diseases; and

"(6) projects for the investigation into the epidemiology of all forms and aspects of arthritis and musculoskeletal diseases, including investigations into the social, environmental, behavioral, nutritional, and genetic determinants and influences involved in the epidemiology of such diseases.

"(c) The Director shall provide for the standardization of patient data and recordkeeping for the collection, storage, analysis, retrieval, and dissemination of such data in cooperation with projects under this section and centers assisted under section 485, and other persons engaged in arthritis and musculoskeletal diseases programs.

"(d) For grants under subsection (a) there are authorized to be appropriated $2,000,000 for the fiscal year ending September 30, 1984, $2,000,000 for the fiscal year ending September 30, 1985, and $2,000,000 for the fiscal year ending September 30, 1986.

"MULTIPURPOSE ARTHRITIS AND MUSCULOSKELETAL DISEASES CENTERS

"SEC. 485. (a) The Director of the Institute shall, after consultation with the advisory council to the Institute and consistent with the arthritis plan developed under section 482(b), provide for the development, modernization, and operation (including staffing and other operating costs such as the costs of patient care required for research) of new and existing centers for arthritis and musculoskeletal diseases. For purposes of this section, the term 'modernization' means the alteration, remodeling, improvement, expansion, and repair of existing buildings and the provision of equipment for such buildings to the extent necessary to make them suitable for use as centers described in the preceding sentence.

"(b) Each center assisted under this section shall—

"(1)(A) use of the facilities of a single institution or a consortium of cooperating institutions, and (B) meet such qualifications as may be prescribed by the Secretary; and

"(2) conduct—

"(A) basic and clinical research into the cause, diagnosis, early detection, prevention, control, and treatment of arthritis and musculoskeletal diseases and complications resulting from such diseases, including research into implantable biomaterials and biomechanical and other orthopaedic procedures and medical rehabilitation of individuals with such diseases;

"(B) training programs for physicians, scientists, and other health and allied health professionals;

"(C) information and continuing education programs for physicians and other health and allied health professionals who provide care for patients with arthritis and musculoskeletal diseases; and

"(D) programs for the dissemination to the general public of information—

"(1) on the importance of early detection of arthritis and musculoskeletal diseases, of seeking prompt treatment, and of following an appropriate regimen; and

"(ii) to discourage the promotion and use of unapproved and ineffective diagnostic, preventive, treatment, and control methods and unapproved and ineffective drugs and devices.

A center may use funds provided under subsection (a) to provide stipends for health professionals enrolled in training programs described in paragraph (2)(B).

"(c) Each center assisted under this section may conduct programs to—

"(1) establish the effectiveness of new and improved methods of detection, referral, and diagnosis of individuals with a risk of developing arthritis and musculoskeletal diseases,

"(2) disseminate the results of research, screening, and other activities, and develop means of standardizing patient data and recordkeeping, and

"(3) develop community consultative services to facilitate the referral of patients to centers for treatment.

"(d) The Director shall insofar as practicable, provide for an equitable geographical distribution of centers assisted under this section. The Director shall give appropriate consideration to the need for centers especially suited to meeting the needs of children affected by arthritis.

"(e) Support of a center under this section may be for a period of not to exceed five years and such period may be extended by the Director for additional periods of not more than five years each after review of the operations of such center by an appropriate scientific review group established by the Director.

"(f) For multipurpose arthritis and musculoskeletal diseases centers there are authorized to be appropriated $15,000,000 for the fiscal year ending September 30, 1984, $18,000,000 for the fiscal year ending September 30, 1985, and $21,000,000 for the fiscal year ending September 30, 1986.

"ADVISORY BOARD

"SEC. 486. (a) The Secretary shall establish in the Institute the National Arthritis Advisory Board (hereinafter in this section referred to as the 'Advisory Board').

"(b) The Advisory Board shall be composed of eighteen appointed members and nonvoting, ex officio members as follows:

"(1) The Secretary shall appoint—

"(A) Twelve members from individuals who are scientists, physicians, and other health professionals, who are not officers or employees of the United States, and who represent the specialties and disciplines relevant to arthritis, musculoskeletal diseases, and skin diseases; and

"(B) six members from the general public who are knowledgeable with respect to such diseases, including at least one member who is a person who suffers from such a disease and one member who is a parent of a person who suffers from such a disease. Of the appointed members at least five shall by virtue of training or experience be knowledgeable in health education, nursing, data systems, public information, or community program development.

"(2) The following shall be ex officio members of the Advisory Board: The Assistant Secretary for Health, the Director of NIH, the Director of the National Institute of Arthritis and Musculoskeletal Diseases, the Director of the Center for Disease Control, the chief medical director of the Veterans' Administration, the Assistant Secretary for Medical Affairs of the Department of Defense (or the designees of such ex officio members), such other officers and employees of the United States as the Secretary deems necessary for the Advisory Board to carry out its functions.

"(c) Members of the Advisory Board who are officers or employees of the Federal Government shall serve as members of the Advisory Board without compensation in addition to that received in their regular public employment. Other members of the Board shall receive compensation at rates not to exceed the daily equivalent of the annual rate in effect for grade GS-18 of the General Schedule for each day (including traveltime) they are engaged in the performance of their duties as members of the Board.

"(d) The term of office of an appointed member of the Advisory Board is three years. Any member appointed to fill a vacancy for an unexpired term shall be appointed for the remainder of such term. A member may serve after the expiration of the member's term until a successor has taken office. If a vacancy occurs in the Advisory Board, the Secretary shall make an appointment to fill the vacancy not later than ninety days from the date the vacancy occurred.

"(e) The members of the Advisory Board shall select a chairman from among the appointed members.

"(f) The Secretary shall, after consultation with and consideration of the recommendations of the Advisory Board, provide the Advisory Board with an executive director and one other professional staff member. In addition, the Secretary shall, after consultation with and consideration of the recommendations of the Advisory Board, provide the Advisory Board with such additional professional staff members, such clerical staff members, and (through

contracts or other arrangements) with such administrative support services and facilities, such information, and such services of consultants, as the Secretary determines are necessary for the Advisory Board to carry out its functions.

"(g) The Advisory Board shall meet at the call of the chairman or upon request of the Director of the Institute, but not less often than four times a year.

"(h) The Advisory Board shall—

"(1) review and evaluate the implementation of the plan under section 481 and periodically update the plan to ensure its continuing relevance;

"(2) for the purpose of assuring the most effective use and organization of resources respecting arthritis, musculoskeletal diseases and skin diseases, advise and make recommendations to the Congress, the Secretary, the Director of NIH, the Director of the Institute, and the heads of other appropriate Federal agencies for the implementation and revision of such plan; and

"(3) maintain liaison with other advisory bodies related to Federal agencies involved in the implementation of such plan, the coordinating committee for such diseases, and with key non-Federal entities involved in activities affecting the control of such diseases.

"(i) In carrying out its functions, the Advisory Board may establish subcommittees, convene workshops and conferences, and collect data. Such subcommittees may be composed of Advisory Board members and nonmember consultants with expertise in the particular area addressed by such subcommittees. The subcommittees may hold such meetings as are necessary to enable them to carry out their activities.

"(j) The Advisory Board shall prepare an annual report for the Secretary which—

"(1) describes the Advisory Board's activities in the fiscal year for which the report is made;

"(2) describes and evaluates the progress made in such year in research, treatment, education, and training with respect to arthritis, musculoskeletal diseases, and skin diseases;

"(3) summarizes and analyzes expenditures made by the Federal Government for activities respecting such diseases in the fiscal year for which the report is made; and

"(4) contains the Advisory Board's recommendations (if any) for changes in the plan referred to in subsection (h)(1).

"(k) The National Arthritis Advisory Board in existence on the date of the enactment of the Health Research Act of 1983 shall terminate not later than ninety days after such date. The Secretary shall make appointments to the Advisory Board established under subsection (a) before the expiration of such days. The members of the Board in existence on such date may be appointed, in accordance with subsections (b) and (d), to the Board established under subsection (a).

"(l) For the Advisory Board there is authorized to be appropriated $400,000 for the fiscal year ending September 30, 1984, $400,000 for the fiscal year ending September 30, 1985, and $400,000 for the fiscal year ending September 30, 1986.".

(b)(1) Section 431(a) (42 U.S.C. 289a(a)) is amended by striking out "arthritis, rheumatism, and".

(2)(A) Subsection (a) of section 434 (42 U.S.C. 298c-1) is amended by striking out "Arthritis, Diabetes," each place it appears and inserting in lieu thereof "Diabetes".

(B) Subsection (b) of such section is amended (i) by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes", and (ii) by striking out "Arthritis and Musculoskeletal and".

(C) Subsection (c) of such section is amended (i) by striking out "arthritis and musculoskeletal and", and (ii) by striking out "arthritis, musculoskeletal and".

(D) Subsection (d) of such section is amended (i) by striking out "Arthritis and Musculoskeletal and", and (ii) by striking out arthritis,".

(E) Subsection (e) of such section is amended by striking out paragraph (1) and by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(6) The heading for such section is amended by striking out "ARTHRITIS, DIABETES," and inserting in lieu thereof "DIABETES".

(3)(A) Subsection (a) of section 436 (42 U.S.C. 289c-3) is amended (i) by striking out "arthritis, diabetes mellitus," and inserting in lieu therof "diabetes mellitus", and (ii) by striking out "an Arthritis Interagency Coordinating Committee,".

(B) Subsection (b) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(4)(A) Subsection (a) of section 437 (42 U.S.C. 289c-4)) is amended by striking out "the National Arthritis Advisory Board,".

(B) Subsection (b)(2) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(C) Subsection (d) of such section is amended by striking out "and the National Arthritis Advisory Board, six of the members of each" and inserting in lieu thereof ", six of the members of".

(D) Subsection (g) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(E) Subsection (h)(3) is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(F) The heading for such section is amended by striking out ", ARTHRITIS,".

(5) Sections 438 and 439 (42 U.S.C. 289c-5, 289c-6) are repealed.

(6) The heading for part D of title IV is amended by striking out "ARTHRITIS, DIABETES," and inserting in lieu thereof "DIABETES".

HEALTH PROMOTION AND DISEASE PREVENTION CENTERS

SEC. 10. Part I of title IV is amended by adding at the end the following:

"CENTERS FOR RESEARCH AND DEMONSTRATION OF HEALTH PROMOTION AND DISEASE PREVENTION

SEC. 405. (a) The Director of the National Institutes of Health shall establish and maintain Centers for Research and Demonstration of Health Promotion and Disease Prevention to undertake research and demonstration projects in health promotion, disease prevention, and improved methods of appraising health hazards and risk factors. The centers shall serve as demonstration sites for the use of new and innovative research in public health techniques to prevent chronic diseases.

"(b) Each center assisted under this section shall—

"(1) be located in an academic health center with—

"(A) a multidisciplinary public health faculty which has demonstrated working relationships with relevant groups in such fields as medicine, dentistry, nutrition, psychology, nursing, social work, pharmacy, education, and business;

"(B) graduate training programs relevant to disease prevention;

"(C) core faculty in epidemiology, biostatistics, social sciences, behavorial and environmental health sciences, and health administration;

"(D) demonstrated core medical school curriculum in disease prevention;

"(D) residency training capability in public health and preventive medicine; and

"(F) such other qualifications as the Secretary may prescribe.

"(2) conduct—

"(A) health promotion and disease prevention research on retrospective and longitudinally prospective bases in population groups and communities;

"(B) demonstration projects for the delivery of health promotion and disease prevention services to defined population groups using, as appropriate, community outreach and organization techniques and other methods of educating and motivating communities; and

"(C) evaluation studies on the efficacy of its demonstration projects.

"(c) During fiscal year 1984 ten centers shall be established under subsection (a); during fiscal year 1985 an additional ten centers shall be established under such subsection; and during fiscal year 1986 an additional five centers shall be established under such subsection. Such centers shall be distributed geographically as well as within areas containing a wide range of population groups which exhibit disease incidences which are most amenable to preventive intervention.

"(d) For assistance to centers under subsection (a) there are authorized to be appropriated $10,000,000 for the fiscal year ending September 30, 1984, $20,000,000 for the fiscal year ending September 30, 1985, and $25,000,000 for the fiscal year ending September 30, 1986.".

H.R. 3134

By Mr. HUGHES:

—Page 27, beginning on line 13, strike out "Justice System Improvement Act of 1979, as amended" and insert in lieu thereof "title I of the Omnibus Crime Control and Safe Streets Act of 1968".

Page 27, line 21, strike out the period and insert in lieu thereof the following: "; and, contingent upon any enactment into law of H.R. 2175 or S. 53 as passed by the 98th Congress (and in addition to the other appropriations made in this paragraph), for grants, contracts, cooperative agreements, and other assistance authorized by title I of the Omnibus Crime Control and Safe Streets Act of 1968, including salaries and expenses in connection therewith, and for any other program which is established in H.R. 2175 or S. 53, as so enacted, and which authorizes the Attorney General of the United States to provide Federal law enforcement assistance to States to address crime problems of serious and epidemic proportions, $162,000,000, to remain available until expended.".

EXTENSIONS OF REMARKS

REPORT ON U.S. POLICY TOWARD EL SALVADOR

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 14, 1983

● Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the following report by Col. Samuel T. Dickens, USAF (Retired) who has been studying U.S. policy toward El Salvador for a number of years. His report, which has been edited due to consideration for space, reflects his most recent visit to that Central American nation and U.S. responsibility for certifying Salvadoran progress on a number of reform questions. I urge my colleagues to consider carefully Colonel Dickens' remarks.

STATEMENT BY COL. SAMUEL T. DICKENS, USAF (RETIRED) U.S. POLICY TOWARD EL SALVADOR

EL SALVADOR CERTIFICATION

During the 10-day period from July 8 through July 17, 1983, Colonel Samuel T. Dickens USAF (Ret.) visited El Salvador for the purpose of collecting information for analysis to determine whether that country was making sufficient progress to warrant continued economic and military assistance from the United States as provided by Public Law 97-113. Colonel Dickens, a director of New World Dynamics, was representing a coalition of organizations known as the Central American Freedom Alliance (CAFA).

The process by which the President of the United States must "certify" that El Salvador is making progress in certain areas in order to receive continued United States support was established by Section 728 of the International Security and Development Cooperation Act of 1981 (Public Law 97-113, approved December 28, 1981.)

Every six months, the President must certify to Congress that the government of El Salvador . . .

"(1) is making a concerted and significant effort to comply with internationally recognized human rights;

"(2) is achieving substantial control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by those forces;

"(3) is making continued progress in implementing essential economic and political reforms, including the land reform program;

"(4) is committed to the holding of free elections at an early date and to that end has demonstrated its good faith efforts to begin discussions with all major political factions in El Salvador which have declared their willingness to find and implement an equitable political solution to the conflict, with such solution to involve a commitment to:

(A) a renouncement of further military or paramilitary activity; and

(B) the electoral process with internationally recognized observers."

CONCLUSIONS

The government of El Salvador is making significant progress in each of the four major areas specified by Public Law 97-113 and therefore merits continued United States economic and military assistance. The Apaneca Pact set the stage for subsequent government actions which provide overwhelming evidence of officials' desires to bring about peace, economic reforms and meet internationally accepted human rights standards.

One must question the value and significance of the economic reforms which the United States is, in effect, imposing upon El Salvador. Any careful analysis will reveal that the economic reforms are inimical to United States traditions and theory which espouse private enterprise, free trade and competition. The banks have been nationalized, foreign trade is strictly controlled by the central government and private property has been confiscated. The United States' continued pressures for agrarian reform translates into additional confiscation of private property. (Phase II of the Agrarian Reform if enacted would affect properties between 100 to 500 hectares—approximately 250-1250 acres.)

No less an authority than the National Association for Private Enterprise (ANEP) states that 50 percent of the blame for El Salvadors disastrous economic status today is due to the negative policies implemented since the 1979 coup.

The Congress should undertake a careful look at policies which the United States is enforcing El Salvador to follow. Assumptions are being made about "Agrarian Reform" which do not bear close scrutiny. This "look" or formal analysis should determine whether we are offering the best opportunities for alleviating poverty in El Salvador through a free market economy and free enterprise or whether, the United States is encouraging a strong central government and socialism. All this under the guise of economic and agrarian "reforms.". . .

ANALYSIS AND FINDINGS

Apaneca Pact

On August 3, 1982 the President of the Republic, the political party leaders and representatives of the Constituent Assembly joined together and signed a basic government platform called the Apaneca Pact. The primary purpose of the pact was to respond to the popular mandate of the March 28, 1982, elections, which would lead the country to peace, social and economic progress. The Apaneca Pact addressed several principles to be followed including, Pacification, Democratization, Human Rights, Economic Recovery, Reforms, Confidence and Security and efforts to strengthen international support.

In order to help bring about these objectives three commissions were formed: the Peace Commission, the Human Rights Commission and the Political Commission.

The Human Rights Commission

The Human Rights Commission was established by executive decree on December 1, 1982, beginning formal activities on January 3, 1983. Seven members make up the commission appointed by the executive. Members will serve for two years. The present commission chairman is Monseñor Freddy Delgado A. Since they undertook their duties they have received 303 formal petitions protesting human rights violations of which 126 have been successfully resolved.

Of the 303 formal petitions, 99 persons have gained their release, 36 of those imprisoned for political crimes were released because of the Human Rights Commission's efforts. Twenty-seven have been ordered to trial through the judiciary system and another 19 persons have been given the protection of the Human Rights Commission.

The Human Rights Commission has undertaken an intensive educational campaign to raise the level of consciousness of Salvadorans through the press, radio and television. The Armed Forces and community leaders attend talks on Human Rights in order for all to have a better understanding of the need to preserve standards of Human Rights during peace and war.

The Human Rights Commission has designated one delegate as a representative to the Amnesty Board.

The following information is an analysis of the Human Rights Commission report approved by them on July 15, 1983, covering the period January 1 through June 30, 1983. This report refutes independent reports by unauthorized sources which would have one believe that the El Salvadoran government bears primary responsibility for the killings taking place in that beleaguered country.

Take the figure of 3,421 which includes combat casualties (dead and wounded), homicides and murders. Of the total of 3,421 deaths and casualties the FMLN (guerrillas) accept a total of 1,644 casualties. In turn the El Salvadoran Armed Forces accept losses of 813. These combat casualties total 2,457. When combat casualties (2,457) are subtracted from total deaths in El Salvador during the first six months of 1983 we have a difference of 964. It is this total which should have closer scrutiny. The 964 deaths would appear to be civilian deaths.

The Human Rights Commission analysis concludes: Civilian deaths by terrorist acts, 222; civilian deaths thru military operations, 23; civilian deaths by unidentified persons, 676; deaths attributed to unknown organizations, 43; total 964.

The Human Rights Commission charges the terrorists (guerrillas) with 222 civilian deaths, the military with 23 deaths and to unknowns, 719 deaths (presumably the latter, 719, are murders having nothing to do with the war, or guerrilla activities). What most analysts are not appreciating when analyzing deaths is that the country is engaged in a total guerrilla war. These analysts make the false assumption that the guerrilla war only involves combatants in the mountains, on the slopes of volcanos

and by various sized organized military units. To make this assumption is to ignore the realities of guerrilla war which in fact has the enemy operating in every part of the country, in the cities, and infiltrating every sector of government and the economy.

Discussions with key government officials confirms their desire to eliminate human rights abuses. They recognize the importance of continued public support by Salvadoran citizens evidenced by the over 80 percent of the electorate participation in the March 28, 1982, elections. They do not want to alienate that support. Additionally they are fully aware of the importance of international acceptance of their government and the importance of continued United States support, economic and military, to ensure their survival.

An analysis of the 137 kidnappings by departments (states) where they took place is revealing. The most kidnappings (42) took place in the department of Chalatenango, a major combat area. Second in kidnappings was San Salvador with (24). Other major areas where kidnappings have taken placed are San Vicente (10), Usulutan (14), and Morazan (15), all major combat areas. This closely ties the kidnappings to the areas where most of the fighting takes place. Communist guerrillas effectively use kidnapping as a means to control small towns and villages through intimidation, removing leaders; mayors, teachers and other authority figures. Chart II bears this out identifying terrorists (guerrillas) with (96) of the kidnappings for the period January 1 through June 30, 1983. Bishop Pedro Aparacio, of El Salvador, reported guerrilla recruitment through kidnappings in the smaller towns threatening the youths with the murder of family members if they escaped. . . .

Terrorist Acts

International press and television has paid insufficient attention to the destruction waged by the guerrillas against El Salvador's economy which is a direct attack upon the people. This destruction is revealing. As the elections proved the people did not support the guerrilla movement the terrorist actions by the guerrillas clearly shows their acceptance of their failure to win over the nation's population and so have set about to destroy the economy. This destruction, waged against the people themselves, directly and adversely influences their daily lives, their ability to work and receive wages and forces a deterioriation of everyone's standard of living and quality of life.

These acts of terrorism are direct against the electrical power system, the telephone system, roads, railroads, residences, government facilities, construction companies, commercial activities, banks, farms, animals, vehicles and include the taking and sacking of towns and villages.

A flight over the eastern part of the country reveals the destruction to the electrical grid system with the scores of high tension towers lying on their sides, resulting from dynamite explosions. The eastern departments were without electricity 200 days last year with the resulting deterioration of productivity of all commercial activities.

There were 355 attacks on the electrical grid system of the country involving the destruction of power distribution centers, high tension towers, posts, transformers and other line cuts. The telecommunications system suffered 71 attacks against telephone lines, grid systems and line cuts. There were 180 attacks against the transportation system. This involved the dynamiting, machinegunning, setting on fire of buses, private cars, farm workers transportation, railroad cars, trucks and commercial vehicles. There were 17 attacks against bridges, roads, railroad bridges and railroad lines. The government suffered 83 attacks by fire, machinegunning and dynamite directed against offices, court houses, schools and the judiciary system. There were 975 vehicle thefts during this sixth month period. There were 25 attacks against the agricultural activities involving damage to fields of sugar cane, cotton and coffee. El Salvador's economy depends on the export of these three crops which are directly affected as well by power outages, vehicle destruction, road and railroad outs as well as telephone outages. . . .

The Amnesty Board

The Amnesty Board has been created to authorize amnesty to those who have taken up arms against the government now wishing to surrender, those who have been processed or sentenced for political crimes, those who have been sentenced for politically motivated crimes for terms of less than four years and served six months in prison.

The Amnesty Board is composed of three members and was created by Decree No. 210 of the Constituent Assembly on May 4, 1983. It was expected to be in existence for 60 days however, its life was extended an additional 30 days into the first few days of August 1983.

On July 12, 1983 the Amnesty Board reported the following information: From May 21 through July 12, 1983 a total of 540 individuals convicted of political crimes were granted amnesty. Of those bearing arms, 182 voluntarily presented themselves to the government seeking amnesty (135 were men and 47 women). Total: 722 have taken advantage of the amnesty program.

Among those granted amnesty provisions were made for those interested in farming to be granted land, grain and credit. Forty families have taken advantage of this offer.

An immigration program was established for individuals desiring to leave El Salvador. Canada has received 139, of which 75 had been granted amnesty. Australia had received 70 people and Belgium 5 families.

The Peace Commission

The Peace Commission has the objective of incorporating all the political and social sectors into the democratic process and in peace. The Commission on May 30, 1983, made a call to all sectors and in particular the FDR (Frente Democratico Revolucionario) to initiate a dialogue leading to their participation in democratic, political life in El Salvador. The Commission reiterated its belief that a democratic and political solution was the only method to achieve an answer to violence.

Agrarian Reform

The Salvadoran Agrarian Reform Institute (ISTA—Instituto Salvadoreño de Transformacion Agraria) has the responsibility of administering the cooperatives created through the expropriation of properties greater than 500 hectares. (Approximately 1250 acres.)

The Agrarian Reform began with the Armed Forces proclamation of October 15, 1979, in which, among various points, it was stated that measures would be adopted to make an equitable distribution of the nation's wealth.

On March 6, 1980, the Army physically took possession, at the point of the gun and without formal notice, of all properties which exceeded 500 hectares. In most cases owners were not allowed to remove any of their personal possessions including clothes, books, furniture and all private property in their living quarters. This included automobiles and private aircraft, with limited exceptions. Though the owners were by law authorized to retain 100 hectares for their own development that authority has only recently come into play. The owner does not select the 10 hectares as the government makes this decision often resulting in the owner being granted the least productive and fertile property. In most cases the private owners have had no access to their private homes on the expropriated property.

In order to understand the impact and significance of Phase I of the agrarian reform one should study the report, "Agrarian Reform In El Salvador," by Checchi and Company, 1730 Rhode Island Ave., N.W., Washington, D.C., 20036, published January, 1983 which was commissioned by the Agency for International Development (AID) of the United States government. Only reading the summary will not provide sufficient understanding of the disastrous effect that implementing agrarian reform has had on El Salvador. A thorough study of the report should be made.

The United States Congress through the process of "certification" is requiring that El Salvador proceed with certain "reforms" which include agrarian reform, nationalized banking and foreign trade. These "reforms" were imposed by a revolutionary government and are being continued by the present government under the tutelage of the Provisional President, Alvaro Magana. Further evidence of continued efforts to ensure the agrarian reform process can be seen in provisions of the new Constitution which is being reviewed for approval by the Constituent Assembly.

Phase III of agrarian reform is commonly known as the "land to the tiller" program as people working land which is less than 100 hectares in size are encouraged to seek title to that land, subsequently expropriated from rightful owners.

Phase II of agrarian reform has not been implemented. It would expropriate all property between 100 and 500 hectares in size. During my July 1983 visit to El Salvador the possibility of invoking Phase II was being widely discussed by the press and by the people. The director of ISTA (responsibility for implementing Phase I of the Agrarian reform) told me that it would be his responsibility to implement Phase II if it were so decreed. He added that if this were the case he would resign his office as there were now insufficient monies available to implement fully and successfully Phase I of the reforms, so how was there hope in proceeding with Phase II?

In Ahuachapan department on June 1, 1982, 3,298 farm workers on 13 different agrarian reform "cooperatives" signed petitions to the Constituent Assembly complaining about the adverse effects on farm workers since the property seizures by ISTA and the Armed Forces. This petition related that the property seizure had created great insecurity and high unemployment. Produce delivered to market was not immediately paid for by the Government.

This same June 1982 petition stated that if the farm workers were to be given the property then the previous owners should be paid as the workers were unhappy to benefit from property taken from others. The farm workers asked for major efforts to reopen sugar and coffee mills in Ahuacha-

pan. They reiterated the need for early payment by financial institutions and those commercializing the sale of produce as these delays resulted in increased interests on their debts and unemployment. They asked for urgent consideration for their problems affecting families and causing a feeling of desperation.

Later, I flew to the eastern part of the country to visit with the Salvadoran Cotton Cooperative. This cooperative represents independent groups owning their own property banding together for joint ventures. Included in this group as association members were the so called "cooperatives" created by the agrarian reform decree. The President of "Cooperativa Algodonera Salvadorena, Ltda." took me through the facilities there at San Miguel as well as at La Carrera in the department of Usulutan.

Cotton production was down for two primary reasons; terrorist, guerrillas with their destruction and the agrarian reform. International credit was sorely lacking.

A comparison of recent yields with the 1978-79 harvest as a data base:

Raw cotton for 1980-81 was 59.05 percent of base year.

Raw cotton for 1981-82 was 54.39 percent of base year.

Cotton production for 1980-81 was 63.33 percent of base year.

Cotton production for 1981-82 was 63.82 percent of base year.

Profits were down in 1980-81 by 68.29 percent of base year.

Profits were down in 1981-82 by 49.61 percent of base year.

Production by cotton properties affected by "agrarian reform" was 8 percent less than the unconfiscated properties; 41.76 percent of the total properties associated with the Cooperative Algodonera Salvadorena were properties confiscated by the agrarian reform decree.

During 1982 the eastern departments were without electricity for 200 days, due to guerrilla actions. Guerrillas additionally destroyed cotton fields, warehouses, and railroad cars loaded with cotton.

Asociacion Nacional de la Empresa Privada (ANEP)

National Association of Private Enterprise: I met in executive session with ANEP leaders who represent 31 different groups covering all privately owned sectors of the economy. They stated that the threat of instituting the second phase of the agrarian reform should be lifted as owners were not working their property. As long as this threat continued production would be down, dramatically affecting coffee production, a major source of foreign exchange. (Phase II would confiscate properties between 100-500 hectares in size.)

Phase I agrarian reform confiscations of property over 500 hectares have not been properly compensated for. Owners have been receiving a maximum of 2% of land value in cash. The difference has been handled with bonds having 3, 5 and 20 years for redemption. Many considered these worthless. The government used a tax base for the period 1976-77 without consideration for any real improvements to property during the intervening period.

During the confiscation process of Phase I there were 100 cases of property seizures which were less than the required 500 hectares. Special government decrees maintained government ownership of these properties rather than returning them to the owners. They too have been inadequately compensated for the loss of their properties. (Government data base for property ownership was taken from the year 1970.)

When asked who was pressuring government to institute Phase II of the Agrarian Reform (confiscation of properties between 100-500 hectares) I was told the American Institute for Free Labor Development (AFL-CIO).

ANEP officials stated that the nationalized banks were now a government monopoly, in the hands of a few with no competition. Interest rates were higher and the government controlled 100 percent of the actions. The banks were now attempting to sell bonds representing 49 percent of assets; 20 percent of these were available for sale to bank employees and 29 percent to the public. Public newspaper notices of offerings were getting few takers. The public had little confidence since the banks had been taken over by the military, intervening with armored cars in a simultaneous takeover of all banks. For three years three people have been providing the provisional directorship of the banks. These managers have no experience in economic analysis. As there is no competition between the banks, preference for credits have been directed to government monopolies, such as the agrarian reform. Bank loans to the private sector have been greatly affected by the lack of bank competition and the direction of credits to government agencies. Bank loan availability has been sharply curtailed.

These ANEP officials requested that United States economic assistance be channeled to the private sector to encourage the free market economy and private business.

Armed Forces

The new Defense Minister, Carlos Eugenio Vides Casanova, takes pride in the initiatives being taken by the army over the guerrillas. He hopes to keep the guerrillas on the defensive while providing protection to civilians in those areas cleared of guerrillas. General Vides Casanova spoke proudly of extensive civic actions underway in bridge and road reconstruction, rebuilding of clinics and schools while providing protection to farm workers and public transportation.

A visit to a local commander at Zacatecoluca confirmed the enthusiasm for civic action and the zeal to secure the area for farm workers to work their land. This Lieutenant Colonel told of his efforts to coordinate army support with local mayors and other town leadership to gain civilian confidence in army supportive actions.

Military Hospital

A visit to the military hospital confirmed the propaganda success of the communists in their disinformation program designed to discredit El Salvador in the United States and Europe. There was no evidence of any international support by way of assistance. Some foreign equipment is being made available but the military sadly lack adequate medicines, equipment and supplies.

The hospital was crowded with over 330 patients. Passageways werefull of beds with patients. Expansion of hospital facilities was not keeping pace with requirements.

The hospital commander informed me that there was a shortage of doctors. Paramedical training being conducted by a United States military medical team would help alleviate suffering of combat wounded in war areas. However at this time doctors were required to move to forward combat areas to treat wounded despite inadequate facilities, and shortage of medical supplies and equipment in these areas. There were insufficient helicopters to perform needed tasks. The fourteen army helicopters were being utilized for troop movement, supply deliveries and wounded evacuation.

The hospital commander told me there were infrequent visits from international groups inspecting the hospital. Each promised assistance from their organizations without any subsequent response.

Refugee Centers

Two refugee centers were visited. One at Santa Tecla just west of the capital city of San Salvador. The other at Cojutepeque to the east on the Pan American Highway.

Santa Tecla has been operating for over three years. There are over 800 refugees there. A number of the men have found work in the surrounding urban area and a few are engaged in minor work programs creating small profits for basic food necessities. Refugees at Santa Tecla come from two areas in Morazan department and had been moved out of these areas for their own protection.

The Cojutepeque refugee center had been operating a month and existed because of the exodus of refugees fleeing fighting, primarily from the Suchitoto town area. This town has been taken by the guerrilla, retaken by the army and then been involved in renewed fighting. These civilians had not been displaced by the army for their protection but rather were fleeing the guerrillas.

Young workers, representing the Green Cross, were painstakingly reporting names of individuals at the Cojutepeque refugee center. Again there was no evidence of international support for these several hundred refugees and the Green Cross was the only representative at both refugee camps visited.

The lack of concern by the international community for the tribulations being endured by the Salvadoran people is testimony to the effectiveness of communist propaganda. El Salvador has been made an outcast nation without justification.

Another View of Agrarian Reform

My visit to the local Army commander at Zacatecoluca was with two men who owned farming property in nearby department San Vicente. For some time this area near the slopes of the San Vicente volcano has been terrorized by guerrillas. In the past the army has not been able to provide sufficient force to maintain control so that the guerrillas have always been able to return.

These two men own property less than 500 hectares in size and thus not confiscated under Phase I of the Agrarian reform. They had been forced to leave because of guerrilla actions. The ambitious and confident Lieutenant Colonel commanding army forces in Zacatecoluca proudly spoke of his civic action programs, the mutual cooperation between army units, his headquarters and civilian authorities. He carefully outlined his activities and efforts to create an atmosphere of confidence in the army in their ability to keep the guerrillas from their destructive raids of the farm lands.

The two farm owners and I drove back to San Salvador with considerable optimism. The two seemed eager to accept the Colonels' offer to come back and work their property under the army's protection. Shortly that optimism collapsed like a popped balloon.

In San Salvador we met with several Salvadoran men in a private home. The two men who had accompanied me to the army headquarters in Zacatecoluca told of their optimism and their confidence in the Army colonel. Immediately one of the men

present raised his voice in anger. He pounded the table with his fist and said, "Trust the army! How can we? The army took our property away at the point of a gun in 1980, and now you say trust them and go back to work our farms? Don't you remember what Morales Ehrlich (previous director of ISTA's Agrarian Reform organization under ex-president Duarte) told us when we were all assembled that day? That we should all work our properties so that when they were expropriated the transition would be that much smoother? Do they think we're crazy? Maybe this army Colonel is a good man, but how long is he going to be there? Who's going to replace him? And what about the elections? If the Christian Democrats win they will expropriate all our property! Do they just want us to get the fields back in production so that they can confiscate them from us?"

That tells the story. The greatest threat to unity in the country is distrust. And yet a distrust for very valid reasons. What most Americans don't realize is that the country is in a guerrilla war, without frontiers. The war is not just being fought in the mountains, in the forests, on the slopes of the volcanos and among armed forces, but by individuals. There is a guerrilla leadership that operates from the cities, with intelligence networks, clandestine, propaganda and psychological operations.

In El Salvador trust and confidence is given to those you know and know well. Occasionally someone you once had confidence in is identified as a guerrilla leader. A school friend not seen for two years has his house raided; it is an arms cache, a "safe" house and full of communist propaganda literature. The leader of the Miami kidnapping of Mrs. Roberto Quinones turns out to be an old friend, one had not seen for several years. The fight is ideological.●

TRIBUTE TO WILLIAM CARLOS WILLIAMS

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 14, 1983

● Mr. TORRICELLI. Mr. Speaker, this month we mark the 100th anniversary of the birth of William Carlos Williams, New Jersey's Pulitzer prize-winning poet and one of the foremost creators of modern American art. I am proud to recognize Mr. Williams' birthday and announce the beginning of a centennial celebration at the William Carlos Williams Center for the Performing Arts in Rutherford, N.J.

We celebrate William Carlos Williams not so much for his role as the "father of modern poetry," as he is often described, but as the people's poet. He lived in Rutherford almost all his life, serving the community as a general practitioner and pediatrician. In an era when many of his artistic colleagues chose to leave America as cynical expatriots, Williams remained. He found in the people of Bergen and Passaic Counties a rich resource of contemporary life. Williams drew his striking and precise images from the faces and scenes that surrounded him at home in America.

William Carlos Williams wrote in 1917:

> My townspeople, beyond in the great world, are many with whom it were far more profitable for me to live than here with you . . .
> I remain! Therefore, listen!
> For you will not soon have another singer.

Williams gave life and energy to the obvious and pedestrian. He saw in his small community images of the modern American spirit. Those images influenced not only a young generation of poets and authors, but changed the direction of music and the visual arts forever.

Although the artistic community around the world is indebted to the poetry of William Carlos Williams, those of us from Bergen County, N.J., are proud to claim him as our own. It is timely and the Governor's Committee on the Arts of the State of New Jersey as one of five regional arts centers. Through the center and his admirers, the force of William Carlos William's poetry will endure to raise our spirits and vision. As Williams wrote:

> At our age the imagination, across the sorry facts, lifts us, to make roses, stand before thorns.●

IN CELEBRATION OF OUR HISPANIC HERITAGE

HON. MATTHEW G. MARTINEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. MARTINEZ. Mr. Speaker, during this week long celebration of Hispanic Heritage Week, we are all made more aware of the many significant contributions of the Hispanic Community to the advancement of our Nation. Whether this results in a renewed pride in our Hispanic heritage or in a new awareness of the accomplishments of our neighbors to the South, this celebration is worthy of support.

Although this is a time for celebrating achievements, we cannot overlook the obstacles which need to be overcome so that the future can be a better place for all Americans.

Our country has prospered and progressed because the various ethnic groups which immigrated to this Nation have brought with them a rich heritage, a healthy diversity, a strong dedication to freedom, and a hunger for a better way of life.

The same is true of those of us with a Hispanic Heritage. We have contributed our share of war heroes, artists, scientists, businessmen, entrepreneurs, educators, and political leaders. Yet, each story of success is accompanied with its example of discrimination and prejudice. Given this sad truth, one is left wondering how much more could Americans of Hispanic Heritage, blacks, Asian-Americans, American-Indians, and others have contributed had they not experienced the prolonged level of discrimination which persists to this day. Had these superficial limitations been removed earlier in our history, would not we all be better off today?

There is no doubt that Americans of other ethnic origin were also victims of such prejudice. However, their ability to retain their native culture and language while being fully accepted as Americans has enabled them to more easily take advantage of the available opportunities.

Given our country's rapidly changing economy and dependence on an educated public, I see a need for us to put away our prejudices and commit ourselves to programs which are vital to our Nation's prosperity. We cannot afford to permit the further depletion of our human resources and alienation of our ethnic groups. I challenge the President, Congress, State legislatures, local governments, and the private sector to develop this hidden potential so that it will become a productive asset rather than a liability.●

MILITARY INDUSTRIAL COMPLEX

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 14, 1983

● Mr. SHELBY. Mr. Speaker, 20 years ago President Eisenhower warned of the growth of a military industrial complex, subservient to none and omnipotent to all. Today, his worst fears seem to be coming true. A massive, noncompetitive, monolithic bureaucracy has gradually developed, one where managers have no interest in assuring quality, workers are poorly trained, production controls are almost nonexistent, and weapon design rarely meets manufacturing requirements. The result is a plethora of abuses ranging from paying $110 for electronic diodes costing 4 cents apiece, to missing washers grounding our Pershing II missiles, to $2 billion cost overruns on the C-5A cargo plane. In addition, contractors are rarely forced to guarantee their products. If the plane, tank, or gun does not work the contractor simply tacks on additional charges to the bill, all at taxpayers' expense.

More importantly, the atmosphere of waste and inefficiency fostered by an anticompetitive environment inevitably leads to unreliable, shoddy weapons; weapons with which our soldiers in the field must risk their lives. In fact, some of the most vocal critics of our procurement process have been

the field officers themselves. Clearly, changes must be made, especially in our bidding procedures.

Our process of procurement is in urgent need of a massive dose of competitive medicine. Competitive bidding pitting rival systems against each other will ultimately lead to lower prices, higher quality, and according to the Defense Science Board, savings of up to 20 percent on the average contract.

A truly independent testing office should be established to monitor the Pentagon's testing and procurement procedures. Sponsored by Congressman COURTER of New Jersey, the House has recently passed legislation that would include funding for such an office, one which would report directly to Congress rather than the Secretary of Defense. Congress, which eventually appropriates all defense funding, will now be in a better position to determine what programs are actually needed. In addition, the independent office will correct the ludicrous situation where the students at the Department of Defense, are, in effect, grading their own exams.

The profiteering perpetrators within DOD must be vigorously dealt with. Full scale prosecution, not simply the loss of jobs, should accompany each instance of graft or scandalous overpayments. Cheating can never be condoned, but fraud that jeopardizes our national security is unconscionable and should be dealt with accordingly.

Above all, we need to reexamine our overall defense philosophy. At a time of limited resources available for defense, we must begin to develop a mind-set like that of the Israeli's, one which designs and buys equipment that helps its soldiers do their jobs, not just solve unemployment in congressional districts. In an ideal world Congress would not have to bother with such problems as missing washers on Pershing missiles and graft and greed at the Pentagon. Budgetary guidelines would be followed and an efficient, lean Pentagon would emerge. Then again, in an ideal world there would be no need for a Pentagon; would there?●

LEONID KELBERT

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 14, 1983

● Mr. SIMON. Mr. Speaker, "refusenik" has become an international word—a word that describes Soviet Jews who are denied the right to emigrate. As part of the Congressional Call to Conscience Vigil, I would like to draw attention to the plight of one refusenik in particular, Leonid Kelbert.

Leonid, a film producer, is the only Jew to participate in the Moscow Film Institute since the 6-day war in 1967. In 1975, he won at least three prizes at the Cuban Film Festival for "The Catastrophe Will Not Happen," and at the Czech Film Festival of 1976, he won the Grand Prize, Gold Medal, and First Place for "Ideas of Academiciam T. Selikov." His film "Ice and Fire" was made for the 1980 Italian Film Festival and was shown on Italian television under the title, "Man and Science," but with another director's name substituted.

Leonid lives with his wife, Miriam, a forensic pathologist, and their daughter, Ruth, who was born March 22, 1982. They live in a one-room communal flat. Leonid applied for an exit visa and then resigned his job because of official pressure on cinema and the arts. His visa was refused in March 1981.

Except for his 15 days' detention for "hoolinganism," Leonid has remained creative and considers "the time of his refusal" as the most important period of his life so far. He produced a series of playlets based on episodes of Jewish history and culture in 1981. He is an active participant in a group of young Leningrad Jews who are studying their religion and culture in weekly seminars. These seminars have recently been under attack by the KGB, and since the arrest of Evgeny Lein in May 1981, the general atmosphere surrounding refuseniks has sharply deteriorated.

In March 1983, Leonid was told by the KGB that no more Jewish cultural activities would be permitted. In the past, those involved in cultural activities had been detained for periods of 15 days, but in the future, they were told they would be charged with anti-Soviet activities and face long-term imprisonment.

Mr. Speaker, as one of many concerned Members participating in this year's Vigil, I hope the Soviet Union will exhibit respect for basic human rights and allow citizens such as Leonid Kelbert to follow their consciences, practice their religion, and participate in cultural activities without fear of punishment from the state.●

CALLOUS NATURE OF SOVIET LEADERSHIP

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 14, 1983

● Mr. KEMP. Mr. Speaker, the loss of 269 innocent lives in the Korean Airline massacre is a reprehensible attack that has gone a long way toward highlighting the true nature of Soviet intentions. The Soviets have proven to the world that their indifference to the norms of international behavior can only be matched by their disregard for human life. It is clear that the Soviets have no intention of admitting their crime of shooting down Flight 007, as they arrogantly continue to dismiss the deaths of hundreds of civilians. It is also apparent that the apology, full accounting of the facts and corrective actions the President has asked for will not be forthcoming.

I commend to my colleagues the following outstanding editorial from the Buffalo Evening News on this barbaric act. As the News points out,

Just when the Soviet Union is seeking to persuade Western Europe that it has no need to deploy new nuclear missiles, the brutal and callous nature of the Soviet leadership has been freshly demonstrated.

As the crucial INF as well as START talks continue in Geneva, I urge my colleagues to support the President's negotiating positions as the Soviet efforts to cajole and neutralize our allies will undoubtably be stepped up.

The editorial follows:

[From the Buffalo Evening News, Sept. 10, 1983]

SOVIET "BIG LIE" POLICY

Moscow has issued its "big lie" concerning the downed South Korean airliner, and it is sticking to it, using no less a mouthpiece than Soviet Foreign Minister Andrei Gromyko, who reiterated the fairy tale before an angry meeting of European foreign ministers in Madrid.

The airline was on an American spying mission, the story goes, and was shot down while trying to escape. Trying to embellish the lie, Moscow says the plane had no navigation lights. This is in direct contradiction of the recorded conversations of Soviet pilots, who three times mention the doomed airliner's flashing lights.

Mr. Gromyko defiantly proclaimed the right to shoot down any plane that violated the Soviet Union's "sacred" borders. Quietly seething at the session, Secretary of State George Shultz said in commenting on the Gromyko statement that it illustrated "the difference in allocation of weight to security on the one hand and human values on the other. There is no weight given to human values in that kind of statement.

In contrast, Japan estimates that Soviet fighter planes have violated its airspace over 2,000 times in the past year alone. Last November, a Soviet airliner on a scheduled flight went off course and flew over the U.S. Navy submarine base at Groton, Conn. Last March, Cuban airliners strayed from their approved courses and went near Griffis Air Force Base near Rome, N.Y. The airliners were not shot down for their error; the flights were merely suspended for a short time as a penalty.

Those most directly affected by the Soviet action—the airline pilots—are proposing appropriate measures. The council of the 57,000-member international Federation of Airline Pilots has recommended that all member unions boycott all flights to the Soviet Union for at least 60 days. This would be a significant gesture of the world's contempt.

The greatest penalty, however, is the tremendous blow to Soviet prestige and credi-

bility, and this is something Moscow has done to itself.

The uncivilized Soviet behavior hurts a whole range of East-West relations and increases international tensions, but it affects particularly an important aspect of Soviet policy. Just when the Soviet Union is seeking to persuade Western Europe that it has no need to deploy new nuclear missiles, the brutal and callous nature of the Soviet leadership has been freshly demonstrated.●

BAN ON COP-KILLER BULLETS

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 14, 1983

● Mr. TORRICELLI. Mr. Speaker, I rise today as a strong advocate of legislation to ban cop-killer bullets—armor piercing handgun ammunition which can penetrate bullet-resistant vests worn by police officers. The dangers posed by this ammunition to our Nation's 528,000 police officers is well known. The only purpose of these bullets is to kill human beings wearing bulletproof vests—vests which are credited with saving the lives of more than 400 police officers.

Legislation is now pending before the Congress to ban these cop-killer bullets. These bills, introduced by Representative MARIO BIAGGI and Senator PATRICK MOYNIHAN of New York, now have 170 cosponsors in the House and 15 in the Senate. Furthermore, police groups around the country support these bills with unanimity.

Recently, an editorial appeared in the New York Times supporting this ban on cop-killer bullets. It thoughtfully examines the dangers posed by these bullets and the need for action to outlaw their use and production. I would commend the reading of this editorial to my colleagues. During consideration of this legislation I hope they will reflect on the cogent and compelling views set forth in this editorial.

The article follows:

[From the New York Times, Aug. 29, 1983]

KILL THE "COP-KILLER" BULLETS

"Apple greens" are bullets so hard that without their coating of light green Teflon they would tear up the inside of a gun's barrel when fired. That hardness permits them to penetrate the Kevlar vests credited with saving the lives of more than 400 police officers. Such penetrating bullets offer little advantage to the sportsman. Their only purpose is to kill human beings—whether policemen, presidents or popes—who wear Kevlar vests.

Yet such "cop-killer" ammunition remains available for sale to potential criminals and terrorists. Bills in Congress would ban it, but the Administration has yet to take a position, apparently for fear of offending its friends at the National Rifle Association. This bow to politics is not only misguided, it's dangerous.

Bills introduced by Representative Mario Biaggi and Senator Daniel Moynihan of New York would give Washington authority to ban handgun ammunition that can penetrate the most common police vest. The bills have 170 co-sponsors in the House and 15 in the Senate.

Police records don't always reveal the kind of ammunition criminals use to shoot officers, so the magnitude of the threat is hard to assess. Mr. Biaggi cites two cases of law enforcement officers shot with the bullets. Armor-piercing bullets are thought to be popular in the Florida drug and gun-running community, where criminals wear vests and want the penetration power for their own wars.

More than half the nation's police now wear the vests, and police groups support the bill with unusual unanimity, from unions to the conservative International Association of Chiefs of Police. Its president says flatly that the bullets have "no legitimate use . . . either in or out of law enforcement."

Such talk prompts anxiety at the N.R.A. The gun lobby values its friendly relations with police, to whom it offers firearms training. It favors voluntary restrictions by manufactures but gags on the idea of any new regulation, even to protect police lives. So the N.R.A. raises technical issues. The bill is unacceptable, it argues, because it would also ban some hunting rifle ammunition, which, if fired from certain handguns, might penetrate a Kevlar vest.

Those kinds of handguns aren't practical for street crime, and it's unlikely the Feds would ban hunting ammunition because of them. The effect of voluntary controls is dubious. But once the N.R.A., with its conservative following, spoke up, an issue that seemed as appealing as apple pie began to feel more like a hot potato. The Administration referred it to the National Institute of Justice and National Bureau of Standards, in hopes they can produce a definition that will please the N.R.A. The agencies promise a report soon.

There's no reason for Congress even to wait for the agencies' findings. In 1982, a less formal F.B.I. report identified eight kinds of imported and domestically made ammunition that seemed to fit the "cop-killer" category. The Treasury Secretary could be given the power to ban them but forbidden to restrict popular sporting ammunition. The ban might then be extended as further study demonstrated a clear need.

Only the most fanatical gun-lobby ideologues could find fault with that.●

THE GRAND RONDE RESTORATION ACT

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 14, 1983

● Mr. AuCOIN. Mr. Speaker, today, I am introducing legislation to restore Federal status to the Confederated Tribes of Grand Ronde Indians in Polk County.

It enables the tribe to qualify for education, health care, and economic development programs administered by the Bureau of Indian Affairs and other Federal agencies.

With the full support of the community, the Grand Ronde have worked tirelessly to retain their identity as a people, to preserve their culture, and to achieve economic self-sufficiency. Restoration of tribal status places an important tool in the hands of a tribe which asks for no special privileges, but only for the opportunity to help itself.

I sponsored similar legislation for the Siletz Indians, in Lincoln County in 1977. That bill has demonstrated that restoration is a critical step toward the goal tribes such as the Siletz and Grand Ronde have set for themselves, which is self determination. Examples of possible tribal programs include schools, vocational training programs, and tribal enterprises such as those being operated successfully by the Warm Springs.

The legislation I am introducing today also establishes membership requirements and provides for the election of an interim council which will represent the tribe during its reorganization process.

A constitution and bylaws will be drawn up by the interim council for approval by the tribe. Following the pattern of the Siletz, the tribe and the Bureau of Indian Affairs are authorized to develop plans for a reservation to serve as an economic land base, subject to the approval of Congress.

This bill has received strong, bipartisan support from city, county, and State officials, church groups, and business and civic organizations in Oregon.

The Grand Ronde Restoration Act is endorsed by Gov. Vic Atiyeh, State Senator Dell Isham, and State Representative Paul Hanneman, The commissioners from Polk and Yamhill Counties, the cities of McMinnville, Sheridan, and Willamina, and the Indian tribes of the Siletz, Umatilla, and Warm Springs.

Organizations supporting the legislation include the National Coalition to Support Indian Treaties, the Affiliated Tribes of the Northwest, the Friends Committee on National Legislation, the Catholic Campaign for Human Development, the Presbytery of the Cascades and the Ecumenical Ministries of Oregon, among others.

This bill is the product of years of careful preparation by the Grand Ronde Tribes. The endorsements I have just mentioned show how well the tribe has done its work. Now it is time to take the next step, which is the introduction in Congress of this restoration bill. I am pleased to take that step today, and I am confident this Congress will act to restore to the Confederated Tribes of Grand Ronde Indians the official Federal status and trust relationship with the Government which was taken from them, in a mistaken moment of history, 15 Congresses ago.

I am also pleased that Kathryn Harrison, vice chairman of the Confederated Tribes of Grand Ronde, is in

Washington today for the introduction of this legislation. I would like to include her statement in the RECORD, so my colleagues may have a personal account of the effects of termination.

STATEMENT OF KATHRYN HARRISON, VICE CHAIRMAN, CONFEDERATED TRIBES OF THE GRAND RONDE TRIBAL COUNCIL

Today, for the first time, I feel at peace with my ancestors; the introduction of this restoration bill is a beginning of an ending: a Eulogy and a Greeting!

I am speaking here today, not only for my people back home who are gathered together to celebrate this day, but also for those ancestors who completed our first "Trail of Tears", one hundred and twenty-seven years ago, walking from Table Rock near what is now the city of Medford, Oregon, in a massive military round-up during the wintry month of February, in 1856. It took them thirty-three days to reach the present site of the Grand Rondes. For those proud people who carried on, persisted, even stood alone to preserve our culture, termination was not in their plans at all.

Did they make that walk in vain?

If you know anything about Indian people, especially the history of the Grand Ronde Indians, a history that's not in the history books, you know we have endured much, but we have endured. With the coming of termination in 1954, our second "Trail of Tears" began and is now in the twenty-ninth year; our children know of no other way of life.

The economic impact was devastating and we became "experts" on poverty; our original reservation of 69,000 acres, with proper management, could have been a continuing, on-going support for us. As a terminated tribe, we suffer from problems in addition to issues confronting other tribes. Without resources, we are a minority among recognized tribes, yet we are not considered as equals either in the dominant society.

It has taken a lot of hard work, depressing and discouraging at times, but there has always been the feeling that, as extensions of our ancestors, this restoration effort is the carrying out to their visions—and so we could always reach back to their strengths and wisdom. Because of this, we have seen organizations come and go, yet the Grand Ronde tribe continues. Our roots are there, but we need those roots confirmed by restoration. We are not only looking at strengthening our culture, we are also interested in working for economic betterment, and, so by helping ourselves, we are helping the total community.

Termination of Indian tribes has been discredited by all of the Presidents since President Nixon, yet my tribe is still terminated.

But, now, Congressman AuCoin knows and understands our plight and has joined us in our long walk toward rejoining the family of Indian nations. By introducing our restoration bill today, he is giving us new hope that there is still "Liberty and Justice for All" in this United States of America.●

MEMORIAL ADDRESS BY PHIL CRANE HONORING LARRY McDONALD

HON. GERALD B. H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 14, 1983

● Mr. SOLOMON. Mr. Speaker, the needless, unprovoked murder of our fine colleague, Larry McDonald, and 268 other innocent civilians aboard a Korean airliner by a Soviet pilot which shocked and sickened the free world, brought forth countless words of justified praise for Congressman McDonald. The gentleman from Illinois, PHIL CRANE, in his address at Constitution Hall on Sunday, September 11 at the memorial service honoring Congressman Lawerence Patton McDonald and the other passengers onboard Korean Air Lines flight 007, summed up best the brutal attack by an agent of the Godless Soviet Union, and the loss of one of the finest Members ever to serve in the House of Representatives. Mister Speaker, I request permission to place Congressman CRANE's remarks in the RECORD.

The remarks follow:

Kathy, Tryggvi, members of the McDonald family, bereaved loved ones here and beyond, on September 1 of this year, the Communist tyrants of the Soviet Union shocked most people in the civilized world with an incredibly cruel and cowardly act.

Two hundred and sixty-nine defenseless men, women and children were murdered in cold blood on Korean Airline's flight 007.

But why should anyone have been shocked or surprised by this monstrous atrocity?

The man who presides over the grotesque police state in the Soviet Union is the man who stands accused in the court of world opinion for having authorized the assassination attempt against Pope John Paul II.

Why should anyone be shocked or surprised that a dictator, who sought to murder this Prince of Peace, would order the murder of a plane full of innocent civilians?

Why should anyone be shocked or surprised that this inhumane ruler, who superintended the butchery of Budapest and the bloody persecution of Prague, would order the murder of a plane full of innocent civilians?

Why should anyone be shocked or surprised that this cynical sadist, who orchestrated the rape of Afghanistan, would order the murder of a plane full of innocent civilians?

Why should anyone be shocked or surprised that this barbaric paranoid, who sanctions the use of chemical and biological weapons against defenseless women and children, would order the murder of a plane full of innocent civilians?

No, Samantha, they are not just like us.

The ruthless rulers of the Soviet empire are psychopathic subhumans who kill without provocation and without conscience. They are obscene. They violate the laws of God and nature. The most vicious beasts of the jungle do not match the atrocities that this form of evil species in pinstripe suits can perpetrate.
